PALESTINE.—The second expedition sent out by the American Society for the exploration of the Holy Land, under the direction of Colonel Lane, departed in June. Their object is the triangulation of the tract of country east of the Jordan, between the 31st and 33d degrees of latitude. This survey, which is expected to take two years, will join on to the survey of the English society. The party has two assistant surveyors, an archaeologist, and a photographer; and it is proposed that the students who graduate from the Protestant Syrian College of Beyrout shall join them for a few months. The company reached Palestine in the autumn, and commenced their work, though without the services of Mr. Van Dyk, who was laid up with bronchitis at Beyrout, and Mr. Treat, who was attacked with fever at Jerusalem.

The English surveying party in Palestine, under the management of Lieutenant Conder, commenced their work this year in February. They surveyed a strip of the desert west of the Dead Sea, visiting and planning Masada; they then crossed over to Beit Jibrin, and from March till June occupied themselves with the survey of the Philistine plain. Then, moving north, they commenced the triangulation of the district of Galilee. On the 10th of July they were unexpectedly assailed by Safed men, and obliged to remove to Carmel. The extent surveyed up to this time, from the beginning of the year, was 1,200 square miles, leaving 1,800 square miles still to be surveyed in western Palestine. The discovery of the site of Adullam (Ayd el-Mish), by Clermont Ganneau, was confirmed. Ascalon was surveyed, and the remains of a second modern place were found, which clears away the difficulties raised by Prof. Pusey. Gaza was also surveyed, and the supposed site of Gerar was examined. Among the identifications proposed, about forty in all, were Azekah, Shaaraim, Dilean, Zaanah, Mizpeh, Gederoth, Libnah, Ether, Ashnah, Achzib, Debir, Arab, Mount Seir, and Zanoah. In Jerusalem Lieutenant Conder discovered the Asnerie, or the pilgrims' inn; the excavation of which disclosed rows of mangers still preserved. At Nablus the floor and founda-

tions of the ancient church built over Jacob's Well were found still existing under modern vaults. A fine tomb with rich ornamentations was discovered at Shefa Amr, and another tomb and cave at Khirbet Rumeih, where an early Jewish traveler says was the tomb of Benjamin, and a cave from out of which the Messiah was expected to come forth.

CENTRAL AND EASTERN ASIA.—The Prussian Government has commissioned Dr. Andreas to conduct a series of researches into the geography, ethnology, geology, and antiquities of Persia. He will seek to identify the geographical names given by Istakhri and other Arab writers, to explore the mounds and antiquities particularly of the ancient empire of Elam; on the sites of Susa and Ecbatana he expects still to find the remains of the palaces of the Median monarchs; in the Zagros range of mountains he thinks there may survive some tribe speaking an idiom of the Turanian tongue of Elam.

The Russian Expedition to Hissar, composed of MM. Vishnieffski, Mayef, and Schwartz, ended its labors in August. This country, lying in the western part of the upper basin of the Oxus, and now subject to the Amir of Bokhara, they explored its western hill-country in two directions, from Karshi, by Khuzár, to Shirábád, and from Ohushka-Khuzár to Baisun. The rivers Khuzár-Darya and Shirábád-Darya they found to be considerable streams, fertilizing the large oases of Khuzár and Shirábád. The banks of the Katta Uru-Darya are, it seems, very thickly peopled, and among these hill-people are individuals who possess flocks of 3,000 sheep, and herds of 1,000 camels. In summer these Uzbeks leave their abodes in the valleys and drive their herds upon the mountains, where on the edge of the snows they find rich pasturage. In winter, in the barren steppe of Karshi, they find a cheap fodder for their beasts in the *salsolacea*. On the road to Baisun they came, after passing through the Chakeha Valley, not far from Darband, to the famous "Iron Gate," now called by the natives the Buzgola-Khana, or "Goat-House." All that has been known of this spot is the account of the Chinese missionary of the seventh century, Hwen Thsang, who describes a folding iron gate hung with bells; and that of the Spaniard Clavijo, who passed through it in the beginning of the fifteenth century and speaks of it as an impregnable position. They found the Surkhán, a river whose very existence has often been denied, to be one of the most important tributaries of the Oxus, and a large river, forming the most westerly affluent of the Amt-Darya. All the towns of the province of Hissar lie in the valleys of the Surkhán and Kafirihán, with the exceptions of Baisun, which lies in a high valley, shut in with its villages by mountains, and Shirábád, which is situated away to the south, behind a group of hills. Visiting the valley of the Surkháb or Wakhsh River, passing up the river through a

wild and narrow gorge, and crossing the famed Pul-i-sangín, or "Stone Bridge," they then entered the valleys of Baljuwán and Kuláb, and proceeded to Kobádian and Baisun, returning to Shaar, after forty days' absence, on the 13th of June. The result of the expedition will be an accurate map of all the country lying between the Zerafshan and the Oxus, based upon fourteen astronomical positions and a number of charts plotted from numerous route-surveys.

The Russians, in a reconnaissance of newly-occupied territory in the Atrek, have come upon the half-buried ruins of an ancient Mohammedan city. Minarets and remains of distinctly Saracenic architecture are found preserved. The ruins are on a steppe east of the Caspian, which, after a tradition of the Toorkomana, was once extremely fertile and irrigated by a canal conducting into the Atrek. The ruins are of great extent, and indicate a numerous settled population. The remains of large tanks and water-pipes were discovered. Inscriptions found are in decipherable characters, and have been sent to St. Petersburg for interpretation.

Dr. Bretschneider, physician to the Russian embassy at Peking, visited an interesting mountain, the Pei-hwa-shan, or "Mountain of a Hundred Flowers," three or four days' journey from Peking. This mountain is down on none of the maps; it rises to the height of 8,000 feet, and is covered with an exceedingly brilliant flora; its summit is a plateau 8,000 paces by 200, upon which is an old monastery, dedicated to the mountain-god. Although it was in the spring, Dr. Bretschneider collected fifty blossoming plants, among which were eight new species.

AFRICA.—Stanley started forth upon his second exploring expedition amply provided for by the *New York Herald* and London *Telegraph* companies, with extensive accoutrements and a band of 300 soldiers and bearers. He set out, in October, 1874, from Bagamoyo, the point of departure of the various caravan routes, opposite Zanzibar; following his former course as far as the district of Ogogo, he then struck out upon a new, more northerly way, and passing through unexplored tracts, he came in sight of the Victoria Nyanza, February 27, 1875, and marched into the village of Kagehyi, latitude 2° 31' south, longitude 38° 18' east, situate on the southern shore. The journey took 103 days, the lake being 780 miles distant from Bagamoyo. The progress of the expedition was impeded by the most serious hardships. The climate was so unwholesome that many of the men were taken sick with fevers and dysentery; owing to the barrenness of the country traversed, or in the more fertile portions to the inhospitality of the natives, the company were more than once upon the point of famishing; some died from fatigue and hunger, others deserted; the native tribes encountered were shy and unfriendly, in some cases hostile and predatory; twice they were deserted by their guides, and lost their way in

the jungle. In Urimi they came across a tribe, of unusual beauty of person, of men and women, girded only with goat-skins; they owned no chief, but were obedient to the old men. This people they induced with difficulty to sell them provisions, or to grant them leave to pass through. At Chiuwu, 400 miles on their route, Edward Pocock died. Farther northward they entered a land of springs and rivulets, the extreme fountain-heads of the Nile. By the village of Vinyata, containing two or three thousand inhabitants, in Ituru, a district of northern Urimi, they struck the river Leewumbu, which drains this whole region. The natives received them coldly and suspiciously, and cast avaricious glances upon their stores. They bought milk, eggs, and chickens, from the people, and exchanged cloth and beads with the "magic doctor," whom the tribe respects like a king, in return for a fat ox, and endeavored to conciliate this personage with further gifts. On the following day the war-cry, which sounded like "Hehu, a hehu!" was raised through the 200 villages of the plain; soon after the camp was surrounded by warriors, armed with spears in their right hands and bows and arrows in their left, with plumes of bustards, eagles, and kites, upon their heads, and the manes of zebras and giraffes about their brows. They held a parley with the elders through an interpreter, and when it was charged that one of the white men had stolen milk and butter, they acceded to their demand of four yards of sheeting, whereupon they departed appeased. But the warriors were not diverted from their hostile purposes; a band hurried around to the other side of the camp, and there wounded a man who was gathering firewood. An attack soon commenced. The Wanguana, or freemen of Zanzibar, engaged with the savages, while the camp was fortified with a palisade, or high fence of thorn-bushes. The next morning the enemy reappeared in greater numbers, reinforced, Mr. Stanley suspected, from the neighboring nations. It has since been reported that they were aided by the followers of Seyvid ben Selim, Governor of Unyanyembi. Four several detachments were sent out, and drove the savages before them. One of these detachments, over-confident, pursued the fleeing enemy to a distant plain, when suddenly they turned, and slaughtered the detachment, every man; one of the other companies was saved from a like fate by being reinforced in time upon the warning of a fleet runner. The other two companies, more successful, fired the villages, a score or more, on every side, and returned at evening with booty of cattle and grain. The killed of this day's fighting were 21 men, against a reported loss among the savages of 35. The third day 60 men were sent out to complete the demolition of the enemies' places; they took another large village, and before noon the savages were completely subdued. On entering Isamba and Usukuma they heard rumors of the wars of the

robber-chief Mirambo, and as they approached the Victoria they were but a day's march from the spot where this conquering tyrant was fighting with the tribes of Usandu and Masari. North of Mizanza the party entered an unknown region, passing, as far as the boundary of Usandawi, for thirty-five miles through a plain of the altitude of 2,800 feet; thence, on their westerly and northwesterly course, they crossed a broad, wooded plateau of about 4,500 feet mean altitude, which takes in all the territory of Uyanzi, Unyanyembi, Usukuma, Urimi, and Irumbo, or the whole tract between the valley of the Rufigi on the south and the lake Victoria Nyanza. As far as Urimi a thick growth of acacias covered the shallow soil, with here and there only a huge euphorbia rooted in the cleft of a rock. In the basin of Matongo, in Southern Urimi, and upon all the ridges and basins up to the Victoria Nyanza, they observed evidences of the action of a primeval ocean upon the underlying granitic, porphyritic, and gneissic rock. The Leewumbu River, after a course of 170 miles, in Usukuma is called by the name of Monangah, and, after flowing 100 miles more, takes the name of the Shimeeyu. Crossing a broad, level flat, which in the *masika*, or rainy season, is inundated, and which must once have been a bay of the lake, they entered Usukuma, a country thickly peopled and rich in cattle, consisting of rolling plains, intersected at wide distances by chains of rocky hills. At the arrival on the shore of the lake, Stanley, upon mustering his force, found that he had left only 3 whites and 166 Wanguana soldiers and carriers, over half his band having been lost by death and desertion.

The lake Victoria Nyanza was first discovered by Captain John Hanning Speke, in 1858. He was convinced that it and its tributaries were the headwaters of the Nile. On a second expedition, accompanied by Colonel Grant, 1859-'63, Speke endeavored, unsuccessfully, to find its connection with the Nile, and his hypothesis was therefore extensively discredited. Subsequently Captain Richard Burton wrote to disprove the theory, affirming that the Victoria was an unimportant chain of small lakes, and claiming that the Tanganyika was the chief source of the great river, supporting his rebuttal with the difference in the altitude found by Speke between the northern and southern sides of the lake, and by several outlets, marked on Speke's chart, on the northern side. In 1864 Baker confirmed the statements of Grant and Speke of a southerly outflow; but the belief that the Victoria was only a group of lagoons has prevailed, and on the maps it has been so designated. This supposition was strengthened by the report of Colonel Long, in 1874, who declared that the breadth of the lake from north to south was but slight. In 1871 Stanley and Livingstone examined the north end of the Tanganyika, and did not find the outlet supposed by Burton and others to exist. In 1874 Cameron discovered the western issue of

that lake into the Lualaba, supposed to be the head-stream of the Congo.

Now, from March to May, 1875, Stanley, circumnavigating almost the entire lake, established, beyond a peradventure, the unity of the sheet. Stanley has perfected himself in the art of taking hypsometrical and astronomical observations, and has been able to make a complete map of the lake and the country explored. Though the lake is a large body of water, it turns out to be smaller than some of the maps have represented it to be. According to Stanley's measurements it is considerably larger than the area of the entire kingdom of Scotland. Speke spoke of two rivers flowing into the lake from the south, but Stanley discovered only one, which is therefore the true southern source of the White Nile. There are a number of islands, some of them of considerable size. The supposed lake of Baingo is, it appears, only the northeastern arm of the Victoria Nyanza. The southern affluent, named Shimeeyu, which they followed down some distance before reaching the lake, rises somewhere near latitude 5° south, longitude 35° east from Greenwich, and has a length of about 350 miles. The altitude of the lake he found to be 3,808 feet; Speke's reckoning was 3,740 feet. Mr. Stanley intended crossing over to the Albert Nyanza, and exploring that unknown water in his portable boat. His object was to determine whether there were any stream flowing into that body which rivaled the Victoria Nile, or Somerset River, as a source of the great river, and, furthermore, to connect definitely the Albert Nyanza, or Mvulan, with the Nile. Their connection was known to Speke only through accounts of natives and traders; Baker's observations made it still more probable. The latter learned also from the natives that Somerset River, passing through the lake, flowed out again, and continued its course, a navigable river, between the lands of Koshi and Madi. Baker saw at Magungo the point where the river empties into the lake, latitude $2^{\circ} 16'$ north, about eighteen miles across, the outlet between the lands of Koshi and Madi, and upon its left shore a range of hills. Again, upon his next expedition at Ibrahimia, in the Madi country, latitude $3^{\circ} 34'$, distant about ninety miles from Magungo, he could see up the Nile, for twenty miles, the lands of Madi and Koshi upon the east and west, and the range of hills stretching along the western border of the valley. There is a discordancy in the diverse accounts given of the Nile in Madi, which Speke spoke of as a highland stream, and the Somerset River, described by Colonel Long as large enough to be navigated by the Great Eastern. E. Marno also states that from the size of the Bar Djebel, as the Nile is called at Gondokoro, no one would suppose that it was the outlet of so great a lake. He had also been informed by traders that the Albert Lake loses itself in morasses at its northern end, and several of them had declared that the outlet

seen by Baker was nothing but a creek. Mr. Stanley intended, from last accounts, crossing over to the Albert Nyanza, and exploring in his Lady Alice that little-known water.

It was expected that General Gordon would precede him in this exploration. At the close of August the latter had reached a point above the largest rapid of the Nile, and was reported to be only 140 miles distant from the lake. His further progress was interrupted by the killing of his assistant, M. Linant de Bellefonda, by the Bari, and a retaliatory excursion against the attacking tribe. M. Linant had been sent by General Gordon with messages to Stanley at Uganda, and upon his return was set upon by the natives, and killed, together with thirty-six of his men. From later accounts, owing to other accidental causes, Gordon has not been able to continue his progress up the river.

Lieutenant Cameron, who was sent out by the Geographical Society in 1873 to bring succor to Dr. Livingstone, and who, after learning the fate of that traveler, and sending home his journals and charts from Ujiji, proceeded to explore and survey the southern shores of the lake of Tanganyika, discovered on the 8d of May, 1874, the Luoga River, the outlet of the Tanganyika, flowing westward, he supposed into the Congo. On the 20th he entered this river, determined to find where it issued, although suffering from disease at the time, and although the Geographical Society withheld further support. For a year and a half no intelligence was received from the brave explorer. On the 19th of November, 1875, he arrived safely at Loanda. Following the river which flows out of Lake Tanganyika, in a south-westerly course, into the Lualaba, and following the latter river, he came to a new lake. Out of this lake another large river runs in a westerly course, which he traced for a long distance, and which he believes to be the Congo. Meeting a hostile tribe of natives, he was obliged to turn his route, striking other streams between Zambesi and Congo, which he followed down, reaching the western coast in Benguela. It seems established by this exploration that the Lualaba and Tanganyika do not contribute to the Nile system. He has no doubt himself that they flow into the Congo. The Lualaba at Nyangwé he found to be only 1,400 feet above the level of the sea, that is 500 feet below the altitude of the Nile at Gondokoro. It flows, he says, at that point through an enormously wide valley, "which receives the drainage of all this part of Africa, and is the continuation of the valleys of the Luapula and Lualaba." Contrary to the report of Livingstone, the river turns westward below Nyangwé, and farther on, according to Arab reports, southwestward. Another river, the Luowa, as large as the Lualaba at Nyangwé, flows into it from the north, and farther on other large rivers join it from the same direction. The lake of Sankorra, into which the Lualaba flows, Cameron could

not reach. To this lake he heard that wearers of trousers came in sailing-boats, and brought palm-oil and gold-dust packed in quills. Proceeding down the Lualaba he found that the upper course of this river is to the westward of Lake Bangweolo, and that Livingstone probably took the Luowa to be the upper Lualaba. On the route away from the river southward from Nyangwé, he came upon a small lake, Nohrya, which contained true lake-villages. He found that the Lomâmi and the Kassabé are entirely unconnected. Passing the sources of the Lulua he established their position as latitude $11^{\circ} 15'$ south, longitude 23° east. Of the country through which he passed he gives a glowing account. Coal was found, and gold, copper, iron, and silver, were abundant. A great variety of tropical products, such as nutmegs, coffee, semsun, ground-nuts, oil-palms, the mpafu (an oil-producing tree), rice, caoutchouc, copal, and sugar-cane, were found growing. He took 400 astronomical observations. Cameron predicts that for a moderate outlay of capital "one of the greatest systems of inland navigation in the world might be utilized," and proposes the construction of a ship-canal of from twenty to thirty miles in length, by which the Congo and Zambesi systems might be connected. Lieutenant Cameron is the only European save two, Livingstone and Silva Porto, who has traversed the continent of Africa within the tropics. He traveled on foot 2,958 miles, and passed through 1,200 miles of entirely unexplored territory, and much of the remaining country which he crossed has only been visited by ignorant or unobservant travelers.

The German Expedition to the west coast of Africa has met with many drawbacks. Herr von Gussfeld was obliged to return to Berlin with shattered health. The expedition started by Herr Hemayr proceeded by the way of Kasanje to the capital of the Matiamoo; but its organizer remained sick at Loanda. Dr. Lenz started a second time in a journey up the Ogowe. The station, established at great expense at Chincexo, they have been obliged to abandon.

The latest intelligence from the Scotch Livingstonia Mission Expedition was sent from the Upper Shiré by Lieutenant E. D. Young, September 25th. They ascended the Zambesi and Shiré in their steamboat Itala, which they took in pieces and conveyed above the Murchison cataracts by the help of 650 carriers, having now a plain course into Lake Nyassa, expecting to steam into the lake in another fortnight. The Makalolo chiefs and people greeted them with enthusiasm, and worked willingly to assist in the transportation. Thousands lined the banks, clapping their hands, dancing, and singing, saying their fathers the English had come back to them. On the Lower Shiré the Makalolo inhabitants came to meet them from far and wide in canoes, with presents of food, and fuel for the steamer. The passage was slow and difficult on account of

the low water but the party remained in good health. The shores of the Upper Shiré are uninhabited; but along the lower source of the river the country is thickly peopled for forty miles, "and all are eager to be taught."

Another missionary enterprise under the conduct of Bishop Steer proposes to start from the town of Lindz on the coast thirty miles north of Mikindany Bay, pushing into the Agaos's country, which borders on Lake Nyassa, and establishing a mission among them, if it can be effected. Bishop Steer is accompanied by the Rev. A. C. James, and Messrs. Bellville and Beardall, and by Chuma and Susi, Dr. Livingstone's attendants.

NEW GUINEA.—Further explorations upon this still little known though highly interesting island have met with small success. D'Alberis, the sagacious Italian traveler, who recently visited the northwestern part of the island, has, in a second excursion, sought an entrance from the southern coast, but was unable to make a landing. The London Missionary Society dispatched an expedition, commanded by Rev. S. Macfarlane, which, it was intended, should ascend the rivers of the southeast, in order to establish a mission in the interior: their object remains unaccomplished; but they gained valuable information regarding the geography and products of that portion of the island. The Macleay Expedition, of which much was expected by the Australians, returned to Sydney without important results. The difficulty of navigation prevented their landing in the Fly River, which flows into the gulf of Papua. The missionary expedition has thus far excelled the colonial explorations, since they ascended a river on the south coast to the distance of sixty miles. The Australians will not remit their exploration of this wonderful region, since they expect considerable commercial advantages therefrom.

Mr. William Macleay has given an account of the Chevrert Expedition. The vessel sailed from Port Jackson, May 18th, with eighteen in her crew, a doctor, four zoölogists, three botanists, Captain Onslow, and Mr. Macleay. After visiting the intervening islands and stopping in Mud Bay, they put out on June 28th for New Guinea, making for the mouth of the Katow River. Anchoring two and a half miles off the mouth of the river, they were visited by two canoes containing the headmen of the village of Mohatta at the mouth, and of a village farther up. Upon the invitation of the chiefs a party landed. The village consists of seven houses about one hundred feet long, elevated six or seven feet above the ground, and thickly thatched. These houses accommodate fifty people each, whose sleeping-places are ranged on either side, the ends being open. The houses are down upon the shore and are surrounded with filth. The men are strong and well built, very black, with hooked noses and straight foreheads, and without the protuberant jaws of the Australians. They usually

cut off their ringlets of crisp hair, making them into wigs for their own wearing. The men go naked, some being marked with seams upon their shoulders, and all cutting the lobes of their ears into curious forms, and threading the rim all around with wool and fibres of bright colors. They ornament their heads with plumage, and wear necklaces of strong mother-of-pearl. The women, who are ugly, are put to the coarse labor; they are kept out of view of strangers; their dress is a narrow waist-clout, with ornaments of cassowary-feathers round their knees and ankles. The only weapons of these savages are bows of bamboo with arrows four feet long. They are great sailors, making canoes of large size from the trunks of the native trees. They eat the flesh of hogs, which are abundant both in the wild and tame states; and are addicted to the use of the kava, which is found some way in the interior. They have banana and taro plantations upon the driest spots, and cultivate also yams, sago, and bread-fruit. The appearance of the shore is the same everywhere, a level flat reaching to the horizon, covered densely with trees of all kinds. Going up the river, which narrows rapidly, they passed for two miles through mangroves, with palm-trees beyond of fifty feet, and beyond them a lofty and dense forest. Sailing thence to Darnley Island, they did some dredging. They came to Hall Sound, on the east side of the Papuan Gulf, on the 18th of August. Rough weather prevented their going farther. Remaining a fortnight at Yule Island, where Signor d'Albertis is posted, they returned. The surgeon of the expedition, Dr. James, with Mr. Knight, one of the botanists, and Mr. Pollard, a taxidermist, determined upon an independent exploring expedition to New Guinea.

Signor d'Albertis, who has established himself upon Yule Island, in the gulf of Papua, has made a number of excursions upon the mainland, though greatly hindered by the desertion of most of his men, who stole his boat, and by the robbery of the natives. He entertains friendly relations for the most part with the islanders. Procuring a canoe he has visited five villages, and can converse with the natives. On the shore the fauna and flora resemble those of north Australia; but inland on the mountains the vegetation is of the Papuan type. He has obtained a perfect specimen of the *Paradisia raggeana*, the new bird-of-paradise which he has discovered, as well as a second tree-kangaroo, *Dorcopsis luctuosa*. The natives here are of a light color, medium-sized, and agile. Their hair, which is not woolly, they wear long and gathered up behind. They chew the betel-nut. They wear a narrow strip of cloth about their loins, belted down tightly. They are timid, greedy, and thievish. The women seem to rule, and are not backward before strangers. The younger ones are not ill-looking, wearing showy waist-cloths; they tattoo their breasts and bellies. They live

amicably together, building their villages upon sloping ground, and keeping their houses clean. Considerable attention is paid to cookery, and to the manufacture of pottery, cloths, and nets. There is in each village a house built solely for the reception of guests.

SUMATRA.—An expedition is under way, instituted by the Geographical Society of Amsterdam, for the exploration of the unvisited portions of Sumatra. The region selected as the special object of the exploration is the territory which is designated by the name of Djambi. The whole unexplored tracts of the island extend between the straits of Banca and the sea of Riano on the east, and the volcanic range which transects the island on the west, and are bounded on the south by the residencies of Palembang and Bencoolen. The exploration of the country of the Bataks as well as the native kingdoms of Reteh, Indragiri, and Kwantan, which lie within the bounds of the colonial territory, would prove of ethnographical and linguistic interest; yet, induced partly by the disturbances which have lately occurred in the north, the war with Acheen preventing a peaceful exploration of the neighboring parts, and partly by the promise of commercial advantages which would accrue from the navigation of the Djambi River, the society made their choice of the above-named region. The domain of the Sultan of Djambi has never been visited by a European, except when, in 1869, the Resident of Palembang, Van Ophuysen, ascended the Djambi River in the steamer Boni; he was called back before he had completed the observations purposed, and brought a favorable report both as to the navigability of the river, into which important tributaries emptied, and the fruitfulness of the country; neither had he found the inhabitants unfriendly. Two parties will set out, one ascending the river in a steamer, and the other striking across the mountain-chain from Padang, intending to follow the course of one or more of the tributaries, and especially the Batang Hari if possible. Upon meeting, they intend to survey the courses of the Teboo, the Tabir, and the Tambesi, making their way toward the mysterious valleys in the interior of Korintji, Assai, etc., of which wonderful accounts have been rumored, and which the natives who trade with the coast describe in glowing terms. The staff will consist of a topographer, a linguist, a naturalist, an artist, and probably a botanist sent by an association of botanists and horticulturists; the vessel will, it is likely, be commanded by one or more capable naval officers, and will be provided by the Indian Government.

GEORGIA. The regular session of the Georgia Legislature began at Atlanta on Wednesday the 18th of January, and came to a close on the 1st day of March. There was a large amount of legislation effected, but the great bulk of it was of a local and special character, regulating or prohibiting the sale

of spirituous liquors in special localities, modifying the boundary-lines of counties, affecting the powers and jurisdiction of certain county courts and officials, incorporating various companies and associations, etc. A bill was introduced early in the session, providing for the submission to the people of the question of holding a convention to revise and amend the constitution of the State, and making provision for the holding of such convention in case of a favorable vote, but after a good deal of discussion it was defeated. Acts were passed for the amendment of the constitution in several particulars. One of these extended the period of residence necessary to qualify citizens to vote from six months to one year in the State, and from one month to six months in the county; another prohibited payment of certain bonds of the State, decided to be fraudulent. Acts were also passed "to protect the people against the payments of past-due bonds;" "to declare void the State indorsement on the bonds of the Alabama & Chattanooga Railroad;" and "to provide for the protection of the State in the indorsement of railroad bonds." Considerable attention was given to the question of fixing the rate of interest and preventing usury. Finally, an act was passed making seven per cent. the legal rate where no other is stipulated, and placing at twelve per cent. the limit for any charge for the use of money by special agreement or contract. In case of violation of this provision, all interest is forfeited. Among the other acts of the session was one "to prevent the sale of spirituous liquors to minors;" and one "to create a State Board of Health for the protection of life and health, and to prevent the spread of disease in the State." A joint resolution was adopted requesting the Governor to take the proper steps to secure an exhibition of the products of the State at the Centennial Exposition at Philadelphia. Resolutions were adopted in both branches condemning the interference by Federal authority in the organization of the Legislature of Louisiana on the 4th of January. The following resolution seems to have led to no practical action, but is given as declaratory of the sentiment of the people of the State:

Whereas, It is apprehended Congress will pass the civil rights and other bills, the effects of which will be to deprive the people of Georgia of the rights and privileges guaranteed under the Constitution of the United States; and, whereas, the people of Georgia are devoted to the Constitution and to the laws not in conflict with the same; and, whereas, we desire the peace, tranquillity, and prosperity of all races in the American Union; and, whereas, the hope of the perpetuation of our liberties lies in devotion to the Constitution and the purity and impartiality of the courts created under its provisions; and, whereas, the Constitution of the United States, and all laws not in conflict with the same, should be strictly and impartially administered in all the States of the Union; and, whereas, no laws in conflict with the Constitution should be enforced against the people of any portion of the Union; and, whereas, the enforcement of such laws would bear hardly upon the

people of Georgia, who are unable to test their constitutionality; and, whereas, in the event of the passage of such laws by Congress it is the duty of Georgia to protect her citizens in the courts of the United States in the full enjoyment of the rights and privileges guaranteed by the Constitution:

Resolved, That the Joint Finance Committee take the matter into consideration and report to the General Assembly.

The discovery of a discrepancy, or supposed discrepancy, between the amount of cash in the Treasury at the beginning of the year and the amount stated by the Treasurer in his annual report, led to an investigation of the affairs of the Treasurer's office by the Finance Committee of the two Houses, aided by an agent specially appointed for the purpose. While the investigation was going on there were wild reports of deficiency and defalcation, which created considerable public excitement. The committee made its report near the end of the session. They stated that they found with the Treasurer, February 9th, the sum of \$167,685.10. They found State bonds paid prior to January 1st, \$1,007,500, of which \$152,250 matured prior to 1872, \$440,000 matured in 1872, \$165,750 matured in 1873, and \$249,500 matured in 1874. The amount of bonds past due and not paid was stated on an estimate of the Treasurer at \$325,000. They then made a statement of the debt from the Treasurer's reports at the beginning of each year from January 1, 1870, showing that in 1870 it was \$6,014,500; in 1871, \$6,544,500; in 1872, \$5,618,750; in 1873, \$5,688,500; in 1874, \$8,343,000; in 1875, \$8,430,000, including \$325,000 over due. Following this was a summary of bonds issued as follows:

Bonds signed Jenkins, Governor, and mortgage on Western & Atlantic Railroad.....	\$2,900,000
Bonds issued to Atlantic & Gulf Railroad Company.....	900,000
Bonds issued in 1870, signed Bullock, Governor, and Bell, Controller, principal and interest in gold quarterly coupons, issued.....	8,000,000
Returned to Treasurer and destroyed.....	300,000
Ordered from Fourth National Bank, New York, by Financial Committee, this February, 1875.....	500,000
Outlawed by act of Legislature—\$102,000, \$902,000.....	2,095,000
Bonds issued in 1873, and signed by Smith, Governor, and Angier, Treasurer.....	307,500
Old, or past-due bonds outstanding, supposed to be about.....	325,000
Issued in 1873, and signed Smith, Governor, and Jones, Treasurer.....	1,900,000
	\$13,590,500

Thus a discrepancy of \$299,500 appeared between the statement of the Treasurer and the summary of bonds footed up by the committee. On examining the cash accounts of the Treasurer on the 9th of February, the committee found debits amounting to \$1,182,260.78, and credits to the amount of \$1,113,343.25, leaving an apparent balance against the Treasurer of \$68,917.93. Various credits claimed by the Treasurer as existing against this were allowed and others were not allowed, as it was impossible to verify or satisfactorily account for them. The committee further alleged that an examination of the report would show that \$152,250 of the bonds of the

State maturing prior to 1872 had been^a paid in 1873 and 1874, and the statement of ex-Governor Bullock was quoted as evidence that "all the bonds of the State that fell due as per report of the Treasurer prior to January 1, 1872, have been paid." The committee assumed that these bonds had been paid twice. With regard to the management of the Treasury they said :

The examination made of the Treasury Department has satisfied your committee that a thorough revision and change in the manner of its administration should be made. The business of the department is loosely and inaccurately conducted, and there appears a want of system and arrangement, which, with the absence of important and necessary debit and credit entries, renders it difficult, if indeed possible, to determine promptly and definitely the exact status of the affairs of this department. In essential particulars the law has not been complied with. The code of Georgia provides "that the Treasurer shall keep a book in which he shall record a description of all bonds heretofore and hereafter issued by the State, and in said book he shall note all bonds paid, date of payment, and all coupons paid on each, and the date of payment." This wise and salutary provision of the law has, in some degree, been complied with, but in some points has been wholly disregarded. There is no accurate record of the bonded debt of the State of Georgia, and the discrepancies existing between the reports of the Treasurers during the past ten years clearly show that this department cannot furnish reliable and accurate information thereon. The provision of law requiring the date of payment to be noted on the bonds, also of the coupons, seems to have been disregarded, and the present manner of entering in pencil-mark the letter "P," as indicating the payment of coupons, is no indication of the date of its payment, and effaceable as to the fact, and is, in all respects, unsatisfactory as a record of value. The want of system employed by this department, in its dealings with the many banking institutions, is apparent. No accounts are kept in the department of its deposits and its checks, by which the Treasurer can tell, without inquiry of the bank, the state of his account with each, and no exhibit exists of the amounts charged his department by them, by which the Legislature may know what amounts are paid for interest on overdrafts, premiums on exchanges, or commissions of any kind, if any are charged by them. Whatever these may be, enter into an account with the Treasurer as an individual, and are consolidated by him in charge to a general account in an aggregate item. In conducting so large a business as pertains to the management of the fiscal affairs of this State, more detail and accuracy is demanded for the public interest. The distribution of the funds of the State among a large number of banking institutions seems to your committee to be both unwise in policy and unsafe in practice. And the loss sustained by the Treasurer in 1873 (reported by your committee) indicates the danger here but suggested.

In conclusion, the committee suggested the following remedies :

1. That the Treasurer be requested to resign his trust, and—
2. That the Legislature provide for the appointment of a financial agent.

Your committee are content to recommend to the General Assembly that the Treasurer be requested to resign his trust, and in the event of his failure so to do, that the Governor be directed to appoint a competent financial agent to take charge of the department. They therefore recommended the adoption of the following resolutions :

Resolved, That it is the sense of this General Assembly that the present Treasurer should resign his said trust, and he is herewith respectfully requested so to do.

Resolved, That in the event that the present Treasurer does not at once resign as recommended by the General Assembly, that this General Assembly, in view of the facts presented by the report of the Finance Committee, respecting the management of the State Treasury, by the present incumbent, that the Governor of the State be, and is hereby, authorized and required to take whatever measures may be necessary and proper to secure the State from loss and preserve the credit of the State, and to appoint a financial agent of the State until the present arrangements in the Treasury are removed, and its operation brought under the rules and regulations required by existing laws and the custom of business, to take entire charge of the finances of the State, of receipts and disbursements—said agent being required to give good bond and security for the faithful discharge of his duties; and be it further

Resolved, That the Governor of the State and Attorney-General, and a suitable person to be selected by them, be, and they are hereby, authorized to investigate fully and thoroughly, in all places, the true condition of the public debt, and report the same to the next General Assembly for its action.

A supplementary report was made, in which it was shown that, after all proper allowances had been made, the balance against the Treasurer on cash account was \$5,140.82. They say in this report :

Your committee desire to be distinctly understood as not charging the Treasurer with dishonesty or the misappropriation of the public funds, and in the balance-sheet herewith submitted there may have been errors committed by the committee in the count of so large a number of coupons, and the Treasurer may be able hereafter to present vouchers for any balance now appearing against him. Giving the Treasurer, however, full credit for honesty and integrity, your committee are compelled to reiterate their previous report that the business of the department is loosely and inaccurately conducted, that there is want of system and arrangement in the office, absence of important and necessary books, and non-compliance with the provisions of the code in important and essential particulars.

They also acknowledge that the discrepancy of \$299,500 between the Treasurer's report and the summary of maturing obligations may be explained on the ground that the item reported as \$3,900,000 bonds issued by Governor Jenkins and mortgage on the Western & Atlantic Railroad should be \$3,600,000. A warm debate arose on the resolutions submitted by the committee, but they were adopted by a decisive majority in both Houses. Protests were entered against this action, signed by several members of the Senate and House. The protest in the House of Representatives declared that the action taken was "too summary and unsatisfactory;" that, if the facts reported were correct, the Treasurer should be impeached, and, if they were not correct, he should have an opportunity to vindicate himself. Mr. Jones, the Treasurer, himself demanded a trial by impeachment. After the adjournment of the Legislature, which occurred immediately after the adoption of the resolutions, he made a statement addressed to the citizens of the State, and embodying another intended for

the Legislature, in which he claimed that great injustice had been done him. He showed that the discrepancy in the debt statement should have appeared in the committee's calculations as \$300,000, and that it was caused by including that amount twice in stating the bonds issued to the Western & Atlantic and Atlantic & Gulf Railroads. He also showed that payments which the committee failed to justify were made on the approval of Governor Smith. He also complained that such weight should be given to a statement of Governor Bullock as to the payment of bonds due before 1872 against his solemn asseveration that he had no knowledge that the bonds which he paid had been already paid once. He excused the lack of systematic book-keeping on the ground of the multiplicity of his duties and the insufficiency of his salary, which was only \$2,000 a year.

Mr. Jones continued in the office of Treasurer until November 25th, when the Governor declared the office vacant, and requested Mr. Jones to turn his accounts over to his successor within ten days, because he had failed to file his official bond. From that time to the 4th of December the duties of the office were performed by the Controller-General. On the 4th of December, John W. Renfroe was appointed and commissioned State Treasurer to act until the next meeting of the General Assembly.

In accordance with a joint resolution of the Legislature, authorizing the Governor to appoint a "skillful and competent person to assist the Treasurer in systematizing the manner of book-keeping in his office, to make out a full and complete registration of all the bonded obligations in the Treasury, to ascertain, if possible, all the outstanding obligations recognized as legal or illegal by the State, to report to the General Assembly a tabulated statement of the same," and to do whatever else was necessary "to protect the interest of the State in the conduct of the business of the office," James F. Bozeman was selected for that service, and entered upon his duties March 22d. He made a report of the results of his investigation at the end of the year. He stated the valid bonded debt of the State at \$8,005,500; the amount of outstanding bonds declared null and void by legislative enactments, \$2,872,000; other bonds classed as "invalid" by Mr. Bozeman amounted to \$473,250; outstanding bonds past due and payable, \$35,500. Books of record were opened in which all the recognized and valid current bonds of the State as well as all over-due and paid bonds wherever discovered were carefully registered. It was ascertained by Mr. Bozeman that of \$272,250 bonds redeemed by Henry Clews & Co., of New York, in 1870 and 1871, only \$98,250 had been canceled, and that the remaining \$174,000, together with \$800,000 of void currency bonds, and £15,000 of sterling bonds which had been redeemed, were sold at public auction in New

York with only one day's notice by the said Clews & Co., then financial agents of the State. These bonds came back into the control of the firm, and \$149,250 of them were redeemed a second time at the State Treasury in 1874. It appeared also that other redeemed but uncanceled bonds had been paid a second time by the Treasurer, increasing the amount to \$196,612.15.

On the 1st of January the balance in the State Treasury, as officially reported, was \$1,003,128.88. From that time to the removal of Treasurer Jones, November 25th, the receipts amounted to \$1,287,277.87, making the amount charged against the Treasury \$2,290,406.25. From this disbursements were made, under Executive warrants, amounting to \$810,401.79, and reducing it to \$1,480,004.46. The Treasurer also claimed credits for the payment of a variety of interest coupons, amounting in the aggregate to \$682,527.50. As there was reason to believe that some of this interest had been paid before, and no satisfactory vouchers were presented in many cases, these credits were disallowed and the whole subject reserved for further investigation. At the time of Treasurer Jones's removal he stood charged with a balance of \$1,480,004.46, and claimed credits amounting to \$1,544,980.95, making the State indebted to him in \$64,926.49. A careful audit of the accounts afterward made showed a balance against him of \$110,274.84, exclusive of illegal and improper payments, which would swell the amount to \$291,969.95. Suits have been instituted against the late Treasurer and his sureties for the recovery of the amount due the State. During the vacancy in the Treasurer's office, from November 25th to December 4th, the Controller-General received \$204,287.79, and disbursed \$21,730.16. The whole amount received by the new Treasurer to the end of the year was \$782,240.07, disbursements \$270,454.86, leaving a balance of \$511,785.21.

In accordance with a resolution of the last Legislature, the State authorities took possession of the Macon & Brunswick Railroad, and caused the same to be publicly sold on the first Tuesday of June. It was purchased for the State for \$1,000,000, and directors appointed to manage it. The directors at the beginning of 1876 had advertised the property to be sold again on the 25th of January. The North & South Railroad has been in the hands of a receiver during the year, and operated for the State. It is proposed also to offer this property for sale in the spring of 1876.

Great excitement was caused in Washington and adjoining counties, about the 20th of August, by reports of an intended negro rising, the object of which was believed to be an indiscriminate slaughter of white citizens. It was known that the negroes had been forming secret military organizations, and a letter was discovered, signed Corday Harris, and addressed to Jerry Walters, captain of a military

company, commanding him, and others through him, to move toward station 11, on the Central Railroad, about twenty miles from Sandersville, and kill and rob the whites on every hand. The discovery of the supposed plot led to prompt action on the part of the Governor and other authorities, and several leaders of the military organization and of the supposed conspirators for an insurrection of the negroes, were arrested. A special term of the Superior Court was called, to be held on the 20th of August, at Sandersville. Judge Herschell V. Johnson delivered a charge to the grand-jury, in which he directed an examination in the premises, and counseled the utmost calmness and fairness, warning the jurors against being affected by prejudice or excited feeling. He impressed upon them the fact that colored citizens had an equal right with others to fair and impartial treatment. An indictment was found, charging—

Prince R. Rivers, Joseph Morris, Francis Murkerson, Corday Harris, Asa Gilmore, Neil Huston, *alias* Neil Wood, and Jerry Simmons, of the county and State aforesaid, with the offense of an attempt to incite insurrection, for that the said Prince R. Rivers, Joseph Harris, Francis Murkerson, Corday Harris, Asa Gilmore, Neil Huston, *alias* Neil Wood, and Jerry Simmons, in the county aforesaid, on the twenty-fourth day of July, in the year of our Lord one thousand eight hundred and seventy-five, and on divers other days before and since said day, and before the finding of this "true bill" with force and arms unlawfully and feloniously did attempt by persuasion of the colored citizens of said county and the adjoining counties, and organizing the male colored citizens of said county into military companies, oath-bound to follow the orders of their officers, and by falsely representing to Jake Mooreman, Benjamin Davis, Benjamin Wright, John Chillis, James Wright, Tobe Norris, Gilbert Duggan, and other male citizens of color of said counties, that the laws of said State generally, and especially as to juries, public schools, and the tenure of real and personal property, are partial to the white citizens and unjust and oppressive to the colored citizens of said State, and of said counties, and by other means to the jurors aforesaid unknown, to induce the said Jake Mooreman, Benjamin Davis, Benjamin Wright, John Chillis, James Wright, Tobe Norris, Gilbert Duggan, and other colored citizens of said counties, to join in combined resistance to the lawful authority of said State, by which jurors are empaneled, public schools are organized, and rights of property are secured, with intent then and there to the denial of said authority in said counties, and then and there intending that said denial of said authority should be by the colored citizens of said counties unlawfully manifested by acts of violence, to wit, by the practical abrogation and subversion of laws in said counties unlawfully by the burning of the court-houses and consequent destruction of the evidences of the tenure of the land in said counties, and by the forcible and unlawful taking away from the white citizens of said counties their lands and household property, and unlawfully and forcibly appropriating the same to the colored citizens of said counties, and by the indiscriminate, unlawful killing of the officers of said counties, and all other of the white citizens thereof who dared to oppose them in their said nefarious design, contrary to the laws of said State, the peace, good order, and dignity thereof.

Corday Harris was first put on trial, but, though there was evidence of the existence

of the secret military organization and a good deal of incendiary talk, the special offense with which he was charged was not proved, and a verdict of "not guilty" was rendered on the 2d of September. The next day the grand-jury made a special presentment, recommending the discharge of the other prisoners. This was immediately effected. Judge Johnson, in his response to the grand-jury, said :

I, therefore, implore all my fellow-citizens, after this calm investigation has been made, to coincide in the result and to endeavor to establish and maintain relations of harmony and good-will with all, of every race, color, and condition. Be sure you do not cherish the spirit of enmity and revenge against those of the opposite race.

The question of holding a convention for the revision of the constitution of the State, which was considered but not acted upon by the last Legislature, is likely to come into greater prominence next year. The grand-jury of Wilkes County, in December, submitted among its presentments to the Superior Court the following recommendation :

We would recommend our representatives to use their influence in calling a constitutional Convention to undo the work of the corrupt radical party which framed the unjust constitution under which we, as Democrats, still continue to live; and especially the iniquitous homestead law, which we consider unreasonably large for the present impoverished condition of our country, and entailing endless litigation and unnecessary taxation, and a premium for dishonesty and the violation of contracts, injuring the credit of the honest, industrious planters and crippling that of the merchants, and enforcing stagnation of the mercantile and agricultural interests of the country.

Prof. Little, the State geologist, is making fair progress with his scientific survey of the State, but says that with the present means and appliances for its prosecution it will require ten years to complete it. It promises valuable results in exhibiting the undeveloped and almost unknown mineral resources of the State. The State Board of Health was organized on the 9th of June, consisting of one commissioner from each congressional district, together with the Attorney-General, Controller-General, and State geologist.

GERMANY, an empire in Europe, reestablished January 18, 1871. The Emperor, William I., was born March 22, 1797, and was married June 11, 1829, to Augusta, daughter of the Grand-duke Charles Frederick of Saxe-Weimar. The heir-apparent, Frederick William, born October 18, 1831, has the official title of Crown-prince of the German Empire, and Crown-prince of Prussia. He was married January 25, 1858, to Victoria, Princess Royal of Great Britain and Ireland, born November 21, 1840. Offspring of the union are, three sons: Frederick William, born 1859; Henry, born 1862; Waldemar, born 1868; and four daughters: Charlotte, born 1860; Victoria, born 1866; Sophia, born 1870; Margaretta, born 1872. Imperial Chancellor (Reichskanzler), Otto, Prince von Bismarck-Schönhausen.

President of the Imperial Chancery (Reichskanzler-Amt), Delbrück, Minister of State.

The following table exhibits all the states of the German Empire, the area, the popula-

tion, the number of representatives of every German state in the Federal Council, and the number of deputies who represent each state in the Reichstag:

STATES.		Square Miles.	Population in 1871.	Votes in Federal Council.	Deputies to the Reichstag.

		H. A. C. Weber.....	For 1876.....	
		Theodor Behn.....	For 1876.....	

The ducal line of Brunswick is likely to become extinct by the death of the reigning duke, who is now (1876) in his seventieth year and not married. The succession is disputed by the ex-King of Hanover and the Emperor of Germany. It is also interesting to notice that in only twelve of the twenty-two sovereign houses

which belong to the German Empire the heir-apparent is the son of the reigning sovereign.

The legislative functions of the empire are vested in the Bundestag, or Federal Council, and the Reichstag, or Diet of the empire. The Bundesrath represents the individual states of Germany, and the Emperor must have its con-

sent to declare war except in case it is merely defensive. The members of the Bundestag are appointed by the governments of the individual states for each session. On January 1, 1876, the German Bundesrath was composed of the following members:

Prussia.—Prince Bismarck, President and Imperial Chancellor; Delbrück, President of the Imperial Chancery; the ministers Camphausen, Leonhardt, Kameke, and Achenbach; Stosch, Chief of the Admiralty; Von Philippsborn, Director in the Foreign Office; Bitter; Dr. Friedberg, Under-Secretary of State in the Ministry of Justice; Postmaster-General Stephan; Hasselbach, Director-General of Indirect Taxes; Meinecke, Ministerial Director in the Imperial Ministry of Finance; Nathusius, Geh. Oberregierungsrath; and Maybach, President of the Imperial Railroad Office.

Bavaria.—The Ministers Adolf von Pfretzschner, Dr. von Fäustle, and Georg Berr; Freiherr von Perglas, ambassador in Berlin; Ministerial Councilor von Riedel; and Colonel Fries.

Saxony.—The Ministers Richard von Friesen and Chr. W. L. Abeken; Oswald von Nostitz-Wallwitz, ambassador in Berlin; and Major Planitz.

Württemberg.—Minister von Mittnacht; Hugo von Spitzenberg, ambassador in Berlin; Colonel von Faber du Faur; and Councilor von Winterlin.

Baden.—Dr. Julius Jolly, President of the Ministry; Rudolf von Freydrorf, State Minister; and Moritz Elstätter, President of the Ministry of Finance.

Hesse.—Minister Karl Hoffmann, Councilor Dr. Weidhardt, and Councilor Göring.

Mecklenburg-Schwerin.—Von Prollius, *chargé d'affaires* in Berlin, and Director Oldenburg.

Saxe-Weimar-Eisenach.—Councilor Dr. Stiehling.

Mecklenburg-Strelitz.—Councilor von Prollius.

Oldenburg.—Councilor Mutzenbecher.

Brunswick.—Councilor Schulz.

Saxe-Meiningen.—Minister Albrecht Otto Giseke.

Saxe-Altenburg.—Minister von Gerstenberg-Zech.

Saxe-Coburg-Gotha.—Minister Freiherr von Seebach.

Anhalt.—Minister Freiherr von Krosigk.

Schwarzburg-Rudolstadt.—Dr. Hermann von Bertrab, State Minister.

Schwarzburg-Sondershausen.—Councilor Rudolf von Wolfersdorf.

Waldeck.—Director von Sommerfeld.

Rouss, older line.—Councilor Kunze.

Rouss, younger line.—Dr. Adolf von Harbo, State Minister.

Schaumburg-Lippe.—Councilor Höcker.

Lippe-Deimold.—Councilor Meyer.

Lübeck.—Dr. Krüger, minister resident.

Bremen.—Otto Gildemeister, burgomaster.

Hamburg.—Dr. Kirchenpauer, burgomaster.

The following table gives the movement of population in 1872:

STATES.	Mar- riages.	Births.		Deaths.	Stillborn.	Excess of Births.
		Including Stillborn.				
Prussia, with Lauenburg..	255,474	1,033,946	766,229	40,548	267,717

Total in 1873.	423,900	1,632,227	1,260,992	66,190	431,805	
In Dec., 1871.	423,080	1,130,008	1,111,008	63,448	423,000	

A new census was taken in December, 1875. From the preliminary reports on the result of the census it appears that the German Empire now numbers 32 cities above 50,000 inhabitants, with a total population of about 4,400,000 inhabitants. Of the large cities, 18 number above 100,000 inhabitants: Berlin, with her vicinity, 1,000,000; Hamburg-Altona, 850,000; Breslau, 240,000; Dresden, 196,000; Munich, 190,000; Elberfeld-Barmen, 160,000; Cologne, 131,000; Hanover, 129,000; Leipsic, 126,000; Magdeburg, 120,000; Königsberg, 119,000; Stuttgart 107,000; and Frankfurt-on-the-Main, 103,000: total, 3,000,000. The other 19 cities, which have from 50,000 to 100,000 inhabitants, are: Dantzic, Stettin, Bremen, Strasburg, Nuremberg, Aix-la-Chapelle, Düsseldorf, Crefeld, Chemnitz, Halle, Cassel, Brunswick, Posen, Mühlhausen, Mayence, Augsburg, Essen, Dortmund: total, 1,400,000 inhabitants. The aggregate population of the 32 cities with more than 50,000 inhabitants amounts consequently to more than the tenth part of the entire population of the empire. Sixty years ago Germany had only one city with about 200,000 inhabitants (Berlin), one with 80,000, and two with 50,000 (Breslau and Königsberg); and the capital of France with 1,000,000 had a population exceeding the aggregate population of the German cities with above 50,000 inhabitants. Now the population of the latter almost equals that of the French cities with more than 50,000 inhabitants. According to the census of 1872, France had 25 cities with more than 50,000 inhabitants, and with a total population of 4,500,000; of these cities, 9 (Paris, Lyons, Marseilles, Bordeaux, Lille, Toulouse, Nantes, Rouen, and St.-Etienne) had more than 100,000 each, and an aggregate of 3,500,000. In 1815 France had 30,000,000 inhabitants, while Germany, exclusive of Austria, numbered 22,000,000. Thus the population of Germany during this period almost doubled, while that of France increased only by 20 per cent. The following table gives a nearly complete list of all the German cities which, according to the preliminary census-reports, had a population exceeding 20,000. A comparison of their population in 1875 with that in 1871 will show the remarkable fact that each city shows an increase.

CITIES.	Population in 1875.	Population in 1871.	Increase since 1871.

1838-1844.....	12,949	1,704	14,653

The total number of emigrants from the three ports of Hamburg, Bremen, and Stettin, in 1875, was 56,289; in 1874, 75,502; in 1873, 134,191.

The governments of the various states of the empire are investigating the causes of emigration from Germany. They will endeavor to remove them by facilitating the acquirement of small estates, and by opposing the action of emigration-agents paid by the transatlantic governments.

The states of Germany are constitutional monarchies, with the exception of the three Hanse-towns, which are democratic republics, and the two grand-duchies of Mecklenburg, where the old feudal institutions, notwithstanding the urgent demands of the population and the admonition of the German Reichstag, had, in 1875, not been abolished. In the principality of Lippe-Detmold, the constitutional government has for some years been suspended in consequence of a conflict between the government and the representatives of the people. Prussia, Bavaria, Saxony, Würtemberg, Baden, and Hesse, have Diets consisting of two Chambers; all the other states have only one Chamber. In Prussia, Bavaria, Saxony, Würtemberg, Baden, Hesse, Brunswick, Schwarzburg, Waldeck, and Schaumburg-Lippe, women can succeed after the extinction of the male line; but not in the other states.

The following tables show the composition of the different classes of the Diets of the particular states:

STATISTICS OF THE DIETS OF THE PARTICULAR STATES.

I. STATES WITH TWO CHAMBERS.

a. FIRST CHAMBER.

STATES.	MEMBERS ENTITLED.		CHOSEN REP- RESENTATIVE'S		Representatives of Cities.	Appointed for Life.	Total.

In all, twenty universities, of which nine are in Prussia, three in Bavaria, two in Baden, one each in Württemberg, Hesse, Saxony, Saxe-Weimar, Mecklenburg, and Alsace-Lorraine. Sometimes the Academy of Münster, containing the two faculties of Catholic theology and philosophy, is counted among the German universities. At the following universities, outside of the German Empire, the German language is exclusively or predominantly used, and in the province of literature they may be counted as German universities:

During the winter of 1874-'75 the 228 Prussian gymnasias were attended by 65,018 scholars, and the preparatory schools connected with them by 9,588. The scholars in the gymnasias were distributed as follows among the different provinces of Prussia: Silesia, 10,796; Brandenburg, 10,283; Prussia, 8,816; Saxony, 6,567; Rhine Province, 6,195; Pomerania, 5,297; Westphalia, 4,616; Posen, 4,122; Hanover, 3,144; Hesse-Nassau, 2,949; Schleswig-Holstein, 1,782; and Hohenzollern, 151. In the preparatory schools Brandenburg had the largest number of scholars, 2,592. Then followed—Silesia, 1,208; Prussia, 1,194; Pomerania, 1,068; Hanover, 892; Rhine Province, 840, etc. The different religious denominations were represented as follows in the gymnasias: Evangelicals, 44,805 and 7,598 in the preparatory schools; Roman Catholics, 14,592 and 886; Jews, 6,114 and 1,108; Dissenters, 7 and 1. The number of directors and regular teachers was 2,493; of the assistant teachers, 285; special teachers, 411; of parish priests giving religious instruction, 187; and candidates on trial, 169. The 33 pro-gymnasias were visited by 3,502, and their preparatory schools by 898 scholars. The 79 Realschulen of the first class had 26,316, and the preparatory classes 4,783 scholars. Of these Brandenburg had 5,138; the Rhine Province, 4,656; Prussia, 3,061; Silesia, 2,894; Hanover, 2,824; Saxony, 2,785; Westphalia, 2,009; Posen, 1,444; Pomerania, 1,227; Hesse-Nassau, 1,023; and Schleswig-Holstein, 207. Of these scholars 20,962 were Evangelicals, 2,972 Catholics, 2,360 Jews, and 18 Dissenters (the latter all in Saxony). The number of directors and regular teachers was 899; of the special teachers, 161; of parish priests giving religious instruction, 54. The 67 Realschulen of the second class were attended by 5,202 scholars, of which 1,832 were in Brandenburg, 1,154 in Hesse-Nassau, 947 in the Rhine Province, 911 in Schleswig-Holstein, 566 in Saxony, and 239 in Pomerania. (The other five provinces, Prussia, Posen, Silesia, Hanover, and Westphalia, do not have these schools.) Of these scholars, 3,988 were Evangelicals; 841 Catholics; 870 Jews; and 3 Dissenters. The number of directors and regular teachers was 176.

The budget of the German Empire for 1875, as declared by law of December 27, 1874, estimates revenue and expenditure each at 515,018,563 marks (1 mark = 28.8cents). The revenue was derived from the following sources:

	Marks.
1. Customs and excises of consumption.....	329,017,690
2. Stamp-duty for bills of exchange.....	5,815,950
3. Administration of postal affairs and newspapers.....	10,759,227
4. Administration of telegraphs (deficit).....	(-3,353,996)
5. Imperial Railroad in Alsace-Lorraine.....	1,067,550
6. Receipts of various descriptions.....	1,590,450
7. From the Imperial funds for invalids.....	23,870,748
8. Surplus of the years 1873 and 1874.....	54,077,896
9. From the St. Gothard Railroad.....	966,028
10. Profit from the coining of Imperial money.....	7,800,000
11. Interest of invested capitals.....	9,880,000
12. Extraordinary receipts.....	94,054,176
13. Matricular contributions.....	68,969,549
Total.....	515,018,563

The matricular contributions were divided among the particular states as follows:

STATES.	Marks.	STATES.	Marks.
Prussia.....	32,051,351	S.-Coburg-Gotha.....	271,456
Mecklenburg.....	63,688	Anhalt.....	362,256
Bavaria.....	15,819,571	Schw.-Rudolstadt.....	108,486
Saxony.....	8,239,999	Schw.-Bondershausen.....	117,547
Württemberg.....	5,784,188	Waldeck.....	83,818
Baden.....	4,349,174	Reuss (older br'ch).....	73,519
Hesse.....	1,868,285	Reuss (younger branch).....	135,364
Mecklenburg-Schwerin.....	689,067	Schaumburg-Lippe.....	44,928
Saxe-Weimar.....	427,850	Lippe.....	170,297
Mecklenburg-Strelitz.....	187,441	Lübeck.....	65,191
Oldenburg.....	457,789	Bremen.....	193,786
Brunswick.....	387,648	Hamburg.....	568,173
Saxe-Meiningen.....	293,138	Alsace-Lorraine.....	2,200,617
Saxe-Altenburg.....	314,582	Total.....	65,969,549

The regular expenditures of the empire were estimated as follows:

	Marks.
1. Chancery of the Empire.....	2,171,084
2. Imperial Diet.....	515,225
3. Foreign Office.....	5,282,540
4. Administration of the Imperial Army.....	311,394,605
5. Administration of the Navy.....	13,047,515
6. Interest of the debt of the empire.....	2,640,000
7. Chamber of Accounts.....	231,512
8. Imperial Supreme Court of Trade.....	231,546
9. Railroad-Office of the Empire.....	179,530
10. General Pension Funds.....	23,870,748
11. Empire Invalid Funds.....	23,870,748
12. "Rayon" indemnification rentes.....	23,040
Total.....	398,514,251

The extraordinary expenditures are thus estimated:

	Marks.
1. Chancery of the Empire.....	292,204
2. Imperial Diet.....	20,000
3. Foreign Office.....	1,965,250
4. Postal Administration.....	1,317,379
5. Administration of Telegraphs.....	198,000
6. Army of the Empire.....	43,901,000
7. Administration of the Navy.....	9,084,793
8. Chamber of Accounts.....	60,000
9. Railroads of the Empire.....	54,714,126
10. St. Gothard Railroad.....	1,317,048
11. Mint Reform.....	7,306,000
12. Manufacture of Empire Bank-notes.....	600,000
Total.....	121,592,512

The following table gives the military forces of the empire in time of war:

FIELD ARMY.

CLASS OF TROOPS.	Officers.	Men.	Horses.
Higher staff.....	868	5,170	5,670

Pioneers.....	555	90,917	9,647
Train.....	484	38,451	46,017
Administrations.....	216	9,596	10,364
Total.....	17,810	687,594	282,392

The new fortifications at Metz may be regarded as almost complete. The chain of forts which surrounds the town, forming a circle is closed, and all the forts are ready, except that of Woippy, which is to be finished in 1876. The total number of forts is eleven, four of which have been newly built by the Germans, and are now being supplied with guns, ammunition, and provisions. The storehouses will, when finished, afford sufficient

space to hold provisions for about 40,000 men for several years; the forts are connected by railways and lines of telegraph. The fortifications of Strasburg are not in so advanced a state as those of Metz. The works on the left bank of the Rhine are all ready for defensive purposes, but those on the right bank will not be completed till 1877. These great fortresses, combined with Mayence, Coblenz, Germersheim, and Rastadt on the east, and Diedenhofen, Breisach, and Saarlouis on the west and south, would in themselves form one of the strongest lines of defense in Europe; but it is also intended to enlarge the fortifications of Cologne, so as to oppose a hostile attack from the north or northwest. Energetic steps are being taken to connect all the Rhine fortresses with railways; several important strategic lines, such as that from Bruchsal to Germersheim, have already been opened for traffic, and others are being constructed. These fortresses will then be brought so near to each other that it will be possible to concentrate all the forces at their disposal at any point inclosed by them within twenty-four hours.

The military forces of the empire in time of peace are as follows:

CLASS OF TROOPS.	Officers.	Men.	Horses.
1. Staff.....	2,172	2	8,608

Very extensive works are in progress in Kiel dockyard, four large dry docks and two basins being under construction. All the docks are of brickwork, and range from 350 feet in length and 76 feet in width to 420 feet and 82 feet. They will have from 26 feet to 32 feet depth of water; and the harbor not being subject to tides, the water does not vary more than twelve inches in level. The basins are each about 900 feet square. The works are expected to last for some years. The brickwork to two docks has been started. The entrance to the harbor is commanded by strong forts, with a few of Krupp's steel guns.

On the 1st of May, 1875, the new law regulating the protection of trade-marks throughout the German Empire came into force. Paragraph twenty of this law says that all foreigners belonging to nations which have a reciprocity treaty with the German Empire can get protection for the whole of Germany for their trade-marks, names, firm-names, etc., by applying to the Commercial Court at the city of Leipsic.

The movement of shipping in the German ports was, in 1874, as follows:

The Reichstag, after a vacation of two weeks, resumed its sessions on January 4, 1875. On January 7th it ratified the convocation between Germany and Russia relative to bequests, and on January 8th the consular treaty between these two countries. One of the most important bills of the session, that on the Landsturm, was, January 22d, adopted by 198 against 84 votes. The bill was intended to carry out Art. VI. of the imperial military law, which had announced that the duties of the Landsturm would be regulated by special law. The new bill essentially changed the character which the Landsturm had in the War of Liberation in 1815. By placing it under the military law and giving it military signs, it secured to it the protection which the law of nations confers in time of war upon organized armies in opposition to freeshooters. It also intended to facilitate partial mobilization of the Landsturm. The Minister of War, Kameke, who pointed out the essential features of the new bill, called attention to the fact that the new regulations had in view the employment of the Landsturm for merely defensive purposes. The Party of Progress opposed several clauses of the bill, but from motives of patriotism voted for the bill as a whole when their amendments were rejected. Their speakers declared that in their opinion it was important to show to foreign nations that, whatever differences of opinion might exist on some features of the bill, in time of war the whole nation was ready for the defense of the country. The Catholic

Centre, the Poles, and the Socialists, who desired to substitute for the Landsturm bill one for arming the entire nation, persisted in their opposition to the last. All other parties voting solidly for the bill, it was on January 22d adopted by 198 against 84 votes. Three days later, on January 25th, the civil marriage bill was adopted by 207 against 72 votes. During the debate preceding the vote Dr. Fäustle, the Bavarian Minister of Justice, pointed out that the clause of the bill by which the ecclesiastical matrimonial courts in Bavaria will be abolished, did not violate either Bavaria's reserved rights or the concordat with Rome. He added that, notwithstanding the concordat, civil matrimonial courts existed in the Bavarian Palatinate. In conclusion, the minister said the distress caused in Bavaria by the conditions for contracting marriage could only be terminated by a minute definition of the limits of jurisdiction between church and state. This bill extends civil registration of births, deaths, and marriages, from Prussia to the whole empire. The new statute is a consequence of the resolution adopted some time ago to enlarge the powers of the central Legislature, and include civil law among the topics appertaining to the empire. In all Germany this law does away with the services of the clergy in celebrating the three great domestic events of life. It allows of children entering on their earthly career without being baptized or assigned to any religious denomination whatever. It enables men and women to marry indepen-

dently of the consent of the clergy, not always easily obtained in Catholic districts. And, finally, it allows of people being buried in consecrated ground whose relatives may not be in a position to mention any recognized creed believed in by the defunct. The churchyards, so long in the exclusive possession of the clergy, henceforth must be thrown open to the people who owned to no denomination while alive. What the effect of it all upon German society is likely to be, will easily be divined when it is stated that, in the few months the Prussian civil registration law has been in operation, only 25 per cent. of all Berlin marriages have been celebrated in churches, while only 30 per cent. of the children born in Berlin have been baptized by clergymen.

On January 30th the Reichstag concluded the debate upon the third reading of the Imperial Bank bill. To clause 44 Dr. Lasker moved an amendment conferring upon the Federal Council discretionary power to authorize, either for a given or an indefinite period, the different banks to avail themselves of some of the forms for granting credit otherwise forbidden by the terms of the bill. This amendment being adopted, the measure then passed. The House proceeded to the final vote, and the bill was carried by a large majority. Herr Delbrück having read the imperial message, declaring the session closed, the House separated with three cheers for the Emperor William.

The German Reichstag reassembled on October 27th. The Emperor William being absent on account of indisposition, the speech from the throne was read by Herr Delbrück, Minister of State. The strongest hope was expressed by the imperial speech in the continuance of peace, which was said to be more assured now than at any time during the twenty years preceding the reconstruction of the empire. The bills prepared by the Federal Council for the Reichstag were chiefly of a commercial nature. The Reichstag reelected its President, Max von Forckenbeck,* almost unanimously; the two Vice-Presidents, Prince von Hohenlohe and Dr. Hänel, were likewise reelected. The fears which had been widely entertained that the budget as well as the new penal code might lead to new conflicts between the Imperial Government and the Reichstag were dispersed by the speeches which Prince Bismarck and Minister Camphausen made in November. During the discussion of the budget, Camphausen undertook to show that the economical situation of the country was by no means so unfavorable as it had been for some time represented in many financial circles. He expressly stated that he still regarded it as a duty to defend the rights of the representatives of the people, and that, when the Government and the representatives of the people disagreed, the former must recede. Prince Bismarck again expressed many views on tax-

ation and other subjects, with which the majority of the Reichstag did not agree, but his unreserved recognition of the constitutional rights of the Reichstag made a most favorable impression throughout the empire. On December 7th a petition from the iron and steel manufacturers in favor of a protective tariff called forth an animated discussion. In accordance with the report of its committee, which was supported by the President of the Imperial Chancery, the Reichstag resolved, by a large majority, to pass to the order of the day. At the second reading of the new penal code, which began on December 15th, the Reichstag almost unanimously rejected several sections in the forms proposed by the Government. A complete agreement between Government and Reichstag, on the other hand, was attained in the debate on the budget for 1876. A bill for the protection of copyright in works of art was also adopted. On December 18th the Reichstag adjourned for one month.

A visit made by the Grand-duke of Mecklenburg-Schwerin to Berlin, in January, 1875, and his friendliness with leading men of the National party and other parliamentary notabilities, drew fresh attention to the affairs of the two grand-duchies of Mecklenburg. There has never been so singular a dead-lock in any European sovereignty since Duke Ernest of Saxe-Coburg and Gotha first tried to govern his united duchies constitutionally against their own will. On the one hand the new German Empire has expressly guaranteed to all its citizens representative administration, and the two Mecklenburgs have their members in the Diet according to their population. But the local government is of purely mediæval character, intended to give the sovereigns almost absolute powers over the working-classes, and to support these by favoring the privileges of the Ritterschaft, or order of landed gentry. The Baltic towns, again, as Rostock, possess certain ancient municipal privileges; but these are confined strictly to their own burgesses. The whole relation of the various classes one to another is a bequest direct from the age preceding the Thirty Years' War, and a perfect anachronism now. The present Grand-duke of Schwerin abandoned long ago the claims which his predecessors maintained; in theory at least, to such powers as that of direct corporal punishment, and since the late war made his name popular he has used various efforts to introduce genuine constitutional government. In this Strelitz has followed his lead; but the Ritterschaft cleaves to its own privileges, and refuses any concession to popular feeling. Hence the two dukes at last resolved in concert to make use of the power of the central Legislature against their own aristocracy. At the meeting of the joint Diet of the two grand-duchies, the Government submitted the draft of constitutional forms of administration; but the Ritterschaft, which constitutes the immense majority of the Diet, was unwill-

* For biographies of Forckenbeck, Hohenlohe, and Hänel, see ANNUAL CYCLOPEDIA for 1874.

ing to make any important concession. It substituted for the Government bill one of its own, which provided for the continuance of all the privileges of the Ritterschaft, and made, in particular, the entire legislation on taxes and every change in the constitution of the grand-duchies contingent upon the assent of both the Ritterschaft and the Landschaft (representatives of towns) as now constituted. It adopted an address to the two grand-dukes requesting them to oppose any undue influence which the Imperial Government and Reichstag might endeavor to exercise upon the affairs of the duchies. The members of the Landschaft, on the other hand, declared that they were agreed with the grand-dukes and the majority of the population in their fidelity toward the empire; that they must decline even to take into consideration the proposition of the Ritterschaft; and that they hoped the grand-dukes would find means to carry through a reform of the constitution on the basis of the propositions made in 1874.

In Bavaria, a general election for a new Diet took place in June, and resulted in the success of seventy-nine candidates of the Patriotic (Catholic) and seventy-seven of the Liberal or Unionist party. The new Chamber met on September 29th, and the Patriotic party elected by a majority of two the President, Vice-President, and other officers. The Diet soon after adopted an address to the King, in which they emphatically declared no confidence in the ministry. The latter, therefore, offered its resignation, which the King, however, refused to accept. On the contrary, he assured the ministers that he approved of their conduct, and refused to receive an address subsequently voted by the Chamber of Deputies.

The foreign relations of the empire were, on the whole, of a pacific character. Only with Belgium serious complications appeared for a time to arise, but the diplomatic negotiations finally resulted in an agreement which was entirely satisfactory to both parties (*see* BELGIUM).

The relations between Germany and France were at no time seriously disturbed. In April, considerable uneasiness was created by a leading article in a Berlin paper, the *Post*, which was supposed to represent the views of the Government. The paper thus expressed itself on the political situation:

Recent events have unfortunately rendered it but too probable that the Legislative Assembly of France, being afraid that the Republican majority of the next Chamber will eschew war, under the dangerous auspices of MacMahon and the Orleans princes, are anxious to precipitate it, while a strong body of Royalist deputies is there to profit by the results for the reestablishment of monarchy. War, accordingly, is coming on, though the clouds gathering on the horizon may yet be in dispersion. The Austrian Conservatives, aided by influential military circles, are endeavoring to turn out the Andrassy cabinet with a view to take part in coming events in Italy. It is certain that she wishes to make the Pope a tool in her hands, to use him for the exercise of Italian

political influence all over the world. The greater part of the upper classes of Italy are ready to join any ally against Germany, whose anti-Papal attitude is considered by them as anti-Italian and hostile to their national interests. Yet it is by no means certain that the French Government will be able to procure an Austro-Italian alliance just now. If they fail in their endeavors to do so, war will probably be delayed. Things, however, have reached a pass when the German people should be better acquainted with the realities of the situation. It is time to awake slumberers.

The organ of Prince Bismarck, the *North-German Gazette*, tried to calm the excitement which the above article had produced. It accepted the explanation of the French press as reassuring, and intimated that the Belgian note was not so much intended to formulate demands as to promote a desirable agitation of international law. But even this official disclaimer produced in wide circles the impression that the peace of Europe was not resting on a solid basis. The French Government positively contradicted the assertion that Germany had recently made representations of a hostile tendency. The semi-official organs of the Government also stated that no cause of conflict existed between Germany and France.

The relations between the Emperors of Germany and Russia remained of the most intimate character. In May the Czar made a visit to Berlin, where his reception, as on former occasions, was most enthusiastic. The Czar, accompanied by Prince Gortschakoff, paid a visit to Prince Bismarck. The reports of the European press on this visit agreed in representing the result of the interview as most favorable to the continuance of European peace. It was stated in diplomatic circles that both the Czar and Prince Gortschakoff, on their arrival at Berlin, were still in doubt as to the real character of the political situation, and were inclined to regard it as critical. It was only at Berlin that they were fully satisfied, by the positive assurances of the German Government, that there were no troubles to be apprehended. Upon this, by order of the Czar, all the diplomatic agents of the Russian court were immediately telegraphed to and advised that the prospect was entirely pacific. Russia had first offered its mediatorial offices should there have been any serious complication. The court of St. James's made a similar offer. The Governments of Austria and Italy likewise inquired if their interference would be needed. Thus, while critical events were apprehended, Russia, Austria, England, and Italy, offered to mediate between Germany and France. It is supposed that the Russian propositions were accompanied with offers of eventual support. Soon after, Prince Gortschakoff telegraphed to all the principal agents of Russia that the continuance of peace was insured. The firm attitude adopted by Russia in these conferences was strengthened by reports received from France

to the effect that the most influential portion of the French nation accept the results of the late war, and that the foreign policy of the country is likely to remain unchanged.

The friendly relations between Germany and Italy continued, and were strengthened by a visit paid by the Emperor and the crown-prince to Italy (*see ITALY*).

The German Government, on January 6th, ordered the gunboats Albatros and Nautilus back to Santander. It also published the documents sent by the German consulate in Bayonne relating to the depositions of the crew of the Rostock brig Gustav. These confirmed the announcement that the Carlists fired upon the ship, and rendered it impossible to lower the third anchor. The documents further showed that the sailors, when able to proceed to the vessel two days later, found the cargo landed, and even their private lockers despoiled of all wearing-apparel and valuable articles. At the same time a Carlist officer who spoke German again attempted to induce them to sign a document stating that the brig had not been fired upon by the Carlists, and that the latter had treated the crew well. As a final act of reparation for the Gustav outrage, the Spanish commander at Guetaria, on April 28th, on the arrival of the German fleet off that port, fired a salute of twenty-one guns with due ceremony, as agreed upon.

On August 17th the colossal statue of Hermann, the ancient German hero, who, in 9 A. D., delivered Germany from the rule of the Romans, was unveiled near Detmold, the capital of the principality of Lippe-Detmold, before an immense concourse of people. The Emperor William and the crown-prince were present. The unveiling of the statue was the occasion of a grand national festival, which was celebrated not only throughout Germany, but even by the Germans in all foreign countries. The statue is a remarkable work of art, and owes its completion solely to the devoted patriotism and the perseverance of Herr von Bandel, the sculptor. Ninety feet high from the point of the uplifted sword to the legionary eagle trodden under foot by the victor, this gigantic Hermann in form and countenance is intended to impersonate the manly vigor, frankness, and strength attributed to the ancient Germans by their Roman enemies. His costume, being the old Saxon tunic, with bearskin mantle and helmet, leaves arms and legs uncovered, and gives full effect to the huge proportions of this the tallest figure erected since the Rhodian Colossus. The circular cupola temple which forms the pedestal is 89 feet high, and is supported by a foundation 66 feet in diameter. The figure, being of chased copper, derives solidity from a complicated system of iron tubes placed in the interior of the body. The copper used in making the statue weighs 287 cwt., the iron 1,138 cwt. In the open temple which forms the base is a bronze *haut-relief* of the German Emperor, and sundry German and

Latin inscriptions commemorate the reign in which the monument was completed. The German inscriptions chiefly refer to the last war, which established unity and revived the empire, while a Latin legend contains the well-known words of Tacitus, in which Hermann is described as the only one who had the courage to attack Rome, and the strength to defeat her when at the height of her power. The statue crowns the dome of a handsome semi-Gothic structure, which Von Bandel found necessary to erect in order to raise the monument high up above the crests of the trees. This sub-structure reaches a height of 93 feet; the figure itself, up to the point of the sword, being 90 feet high, the entire monument is therefore 183 feet in height. This temple-like structure has a diameter at its base of 70 feet. The figure of Hermann stands erect, holding high in his right hand a ponderous sword, measuring 24 feet in length, his left resting upon a shield, bearing the simple inscription, "Treuefest!" "True and Firm." On the sword is an inscription, which reads in German: "Deutsche Einigkeit meine Stärke; Meine Stärke Deutschlands Macht"—or in English: "German unity my strength; my strength Germany's might." The hero is clad in a close-fitting tunic, trimmed with fur; the arms are bare, the limbs are in close-fitting hose and shoes of untanned leather. A long mantle clasped on the breast falls gracefully over the shoulders, the head is covered with a winged helmet, the foot treads on the Roman eagle. The head of Hermann is a noble work, full of majesty and power, the features stern yet German, "terrible in war, gentle in peace;" the long flowing hair is apparently caught up and held fast beneath the pressure of the helmet. Von Bandel has not of course been able to give a portrait but rather an ideal Hermann; or, as he better expresses it, he would symbolize Hermann's great deed, the "raising of the German sword against Rome."

The anniversary of the surrender of Sedan, September 2d, was observed throughout Germany as a holiday and day of general rejoicing. A large portion of the Catholic population, following the advice given by the bishops, took no part in the celebration.

The Government of Italy gave notice of the termination of the commercial treaty concluded between the Zollverein and Italy, on December 31, 1865, and the treaty of navigation between the North-German Confederation and Italy, of October 14, 1867.

The number of trials for offenses of the press was very large. Some of them are interesting illustrations of the German press laws. Julius Lang was condemned at Munich to six months' imprisonment for the much-talked-of article entitled "Die Revolution von Oben," in which allusion was made to crowned revolutionists who ought to be punished, banished, or executed. The public prosecutor contended that this passage referred to the German Emperor,

while the defendant's counsel endeavored to rebut this construction. Another editor, who was prosecuted for an article which placed Prince Bismarck in the same category with the manager of an acrobatic company, was acquitted. A third editor, who had charged the Crown-prince of Germany with diplomatic shuffling, was sentenced in *contumaciam* to ten months' imprisonment. The public prosecutor had only demanded eight months, and it rarely happens that the court passes a heavier sentence than that proposed by the prosecution. It was especially the Catholic journals which were confiscated and prosecuted frequently in all parts of the empire. In Breslau a paper was seized for reprinting an article from a New York journal; and on the Rhine two petty sheets, one a Liberal, were seized for publishing a translation of an article from an English weekly paper. Public opinion in Germany declared itself on this question decidedly against the Government, especially when, in the prosecution of the Democratic *Frankfurter Zeitung*, the Government held all the persons in the editorial and printing offices responsible for the articles in its pages. Not only the General Assembly of German Journalists, but also the Congress of German Jurists, emphatically demanded a legislation protecting a reasonable freedom of the press.

GILLET, Rev. EZRA H., D. D., was born at Colchester, Conn., July 18, 1823, and died in Harlem, September 2, 1875, at the age of 52. He was educated in Yale College, Conn., and in the Union Theological Seminary, New York, ordained a pastor of the Presbyterian Church in Harlem in 1844, and appointed professor in the University of the City of New York in 1868, where he was an instructor in political economy, ethics, and ancient history. He was brought into general notice by his "Life and Times of John Huss" (2 vols. 8vo, Boston, 1863-'64). He also wrote "History of the Presbyterian Church in the United States" (2 vols. 8vo, Philadelphia, 1864; revised edition, 1875); "God in Human Thought" (2 vols. 8vo, New York, 1874); "The Moral System" (1875). His minor works are, "Life Lessons" (1864); "Ancient Cities and Empires;" "England Two Hundred Years ago," and various tracts. He was likewise a frequent contributor to the *Presbyterian Quarterly*, the *Historical Magazine*, the *Observer*, and the *Evangelist*.

GOLUCHOWSKI, COUNT AGENOR, an Austrian statesman, was born February 8, 1812; died August 3, 1873. He descended from an old Polish family. After having held various offices, he became in 1849 Governor of Galicia, and in 1859 Minister of the Interior, which office he held a little over a year, when he was created Minister of State. But in this capacity he made himself so odious to the people that he was removed from office in December, 1860. On April 18, 1861, he was created a life-member of the Herrenhaus, and on September 20,

1866, again Governor of Galicia. In 1868, after the stormy scenes in the Diet of Galicia, he resigned, but was again appointed Governor in 1871, which position he then held up to his death. He was a strong supporter of the clerical-feudal party of the Polish nobility, and was very unpopular among the constitutional party and the people.

GOMM, Sir WILLIAM MAYNARD, an English field-marshal, was born in 1784; died July 15, 1875. He received his first commission in 1794, took part in the campaign in Holland in 1799, distinguished himself in the war on the Peninsula and in the campaign of 1815, at the close of which he was made a K. C. B. In 1837 he was promoted to the rank of major-general, was appointed commander-in-chief of the troops in Jamaica in 1840, and in 1843 Governor and commander-in-chief of the Mauritius. In 1850 he succeeded Sir Charles Napier as commander-in-chief in India, retiring in 1855. He was made a G. C. B. in 1859, a field-marshal in 1868, and in 1872, on the death of Sir John Burgoyne, was appointed Constable of the Tower of London.

GRAHAM, Hon. WILLIAM A., a Southern statesman, died at Saratoga, August 11, 1875. He was born in North Carolina, September 5, 1804, and was the son of General Joseph Graham, a person of distinction during the Revolutionary War. He was graduated at Chapel Hill University, N. C., in 1824, and subsequently admitted to the bar at Newbern. He served in the State Legislature from 1833 to 1836, and also in 1839 and 1840. In 1841 he was chosen to fill a vacancy in the United States Senate, and served through the Twenty-seventh Congress. He was not reelected, because the Legislature of 1842-'43 was of adverse politics. In the struggle of 1844 he was chosen by the Whigs as their candidate for Governor, and carried the State over an able and popular opponent by 8,158 majority, on a larger vote than was ever before polled. He was reelected in 1846 by 7,859 majority, and declined a third term, retiring to private life. In 1850, on the accession of Mr. Fillmore, he was called into the cabinet to fill the post of Secretary of the Navy. At the Whig Convention which met at Baltimore in June, 1852, and nominated General Scott for President, Mr. Graham was named for Vice-President on the second ballot. Immediately upon his nomination Mr. Graham withdrew from the cabinet, and was succeeded by Mr. Kennedy, of Maryland. Mr. Graham retired from public life after the defeat of his party at the succeeding presidential election. During the civil war he "went with his State," but was at heart a Unionist. He attended the Union Convention at Philadelphia in 1866, called to sustain the policy of President Johnson. He was within a recent period appointed one of the arbitrators of the boundary of Maryland and Virginia, and was acting in that capacity at Saratoga.

GRANT, Sir JAMES HOPE, an English gen-

eral, born in 1808; died March 7, 1875. He entered the army in 1826, and having served with distinction in China, under Lord Saltoun, he went to India. He commanded the Ninth Lancers during the whole of the Sikh wars of 1848-'49, and took a prominent part in suppressing the Sepoy mutiny of 1857-'58. In 1860 he commanded the military forces in the war with China, at the close of which he was made a G. O. B.

GREAT BRITAIN, a kingdom of Western Europe. The Queen, Victoria, was born May 24, 1819. She is a daughter of Prince Edward, Duke of Kent, the fourth son of George III.; succeeded her uncle William IV. as Queen of Great Britain in 1837; married, in 1840, Prince Albert of Saxe-Coburg-Gotha.

Children of the Queen.—1. Princess Victoria, born November 21, 1840; married to the Crown-Prince of Germany. 2. Prince Albert Edward, heir-apparent, born November 9, 1841; married, in 1863, to Princess Alexandra, daughter of King Christian IX. of Denmark. Issue, two sons and three daughters; eldest son, Albert Victor, born January 8, 1864. 3. Princess Alice, born April 25, 1843; married, in 1863, to Prince Ludwig of Hesse. 4. Prince Alfred, Duke of Edinburgh, born August 6, 1844; married, in 1874, to the Grand-duchess Marie of Russia. He is heir-apparent to the Duke of Saxe-Coburg-Gotha. 5. Princess Helena, born May 25, 1846; married, in 1866, to Prince Christian of Schleswig-Holstein-Sonderburg-Augustenburg. 6. Princess Louise, born March 18, 1848; married, in 1871, to the Marquis of Lorne. 7. Prince Arthur, Duke of Connaught, born May 1, 1850. 8. Prince Leopold, born April 7, 1853. 9. Princess Beatrice, born April 14, 1857.

The cabinet was composed as follows in 1875: *First Lord of the Treasury*, Rt. Hon. Benjamin Disraeli; *Lord High Chancellor*, Rt. Hon. Lord Cairns; *Lord President of the Council*, Rt. Hon. Duke of Richmond; *Lord Privy Seal*, Rt. Hon. Earl of Malmesbury; *Chancellor of the Exchequer*, Rt. Hon. Sir S. H. Northcote, Bart.

Secretaries of State.—1. Home Department, Rt. Hon. R. A. Cross; 2. Foreign Affairs, Rt. Hon. Earl of Derby; 3. Colonies, Rt. Hon. Earl of Carnarvon; 4. War, Rt. Hon. G. Hardy; 5. India, Rt. Hon. Marquis of Salisbury; *First Lord of the Admiralty*, Rt. Hon. George Ward Hunt; *Postmaster-General*, Rt. Hon. Lord John J. R. Manners.

Parliament is composed of two Houses, the House of Lords and the House of Commons. The number of peers in 1875 was 486. Of these, 5 were princes of the blood-royal, 2 archbishops, 21 dukes, 20 marquesses, 129 earls, 82 viscounts, 24 bishops, and 253 barons. The number includes 16 Scottish and 28 Irish representative peers. The former are elected for the duration of Parliament, the latter for life. The Speaker of the House of Lords is Lord Cairns, the Lord High Chancellor. The mem-

bers of the House of Commons are elected by the people. The number of electors on the register in 1875 was 2,305,094 in England and Wales, 289,789 in Scotland, and 282,874 in Ireland.

The following table gives the area and population of the British Empire, according to the latest official statements and estimates:

COUNTRIES.	Square Miles.	Population.
Great Britain and Ireland... Heligoland, Gibraltar, and Malta	121,607 145	33,198,400 (1875) 174,218 (1871)
Europe	121,752	33,874,600
Cape Colony	192,490	498,381 (1868)
British Kaffraria	8,468	84,201 (1868)
Basuto Land	8,450	75,000
West Griqua Land	16,682	25,477 (1868)
East Griqua Land	8,403	85,000
Natal	17,501	289,778 (1868)
West African settlements	17,115	683,400 (1871)
St. Helena	47	6,241 (1871)
Ascension	84	27 (1871)
Tristan da Cunha	45	58 (1871)
Mauritius	789	317,069 (1871)
Dependencies of Mauritius	850	18,891 (1871)
New Amsterdam	25.5	
St. Paul	2.8	
Africa	260,526	1,978,018
Australian Continent	2,945,227	1,776,495 (1873)
Tasmania	26,215	104,217 (1873)
New Zealand	104,259	893,800 (1873)
Norfolk Island	16.8	481 (1871)
Chatham Island	520	143 (1871)
Auckland Islands	196.7	
Lord Howe's Island	8.2	87
Feejee Islands	8,068.8	149,040 (1871)
Fanning Island	21	150
Caroline Island	25.5	
Australasia	3,086,518	2,862,860
British India	904,049	190,563,048 (1871)
Native states of India	546,685	43,987,910 (1871)
Ceylon	24,454	2,406,287 (1871)
Straits settlements	1,208	303,097 (1871)
Hong-Kong	82	124,198 (1871)
Labuan	45	4,896 (1871)
Nicobar Islands	735	8,000
Andaman Islands	2,551	12,500
Laccadive Islands	744	6,900
Curia-Muria Islands	21	
Aden	7.71	29,780
Perim, Mosha, Kamanar, and Keeling Islands	77.45	900
Asia	1,480,607	241,729,500
Dominion of Canada	3,518,825	3,718,745 (1871)
Newfoundland	40,200	140,586 (1868)
Bermuda	40.8	15,309 (1871)
Honduras	13,500	24,710 (1870)
West Indies	13,754	1,068,836 (1871)
British Guiana	86,425	915,200 (1871)
Falkland Islands	4,741	808
America	8,670,986	5,185,200
British Empire	8,620,888	284,629,700

The above table somewhat differs from the last official statement on the area and population of the British Empire (the census of England and Wales, vol. iv., 1873), as it contains territories not enumerated in the official census, and in some cases later figures.

The following table gives the area and population of the civil countries (as distinguished from "union" or "registration" counties) of the United Kingdom:

COUNTIES.	Acres.	Population in 1871.

Total.....	198,647	144,618
Soldiers and sailors abroad.....		216,099
United Kingdom.....	77,938,904	81,945,579

According to the calculations of the Registrar-General (who does not include the soldiers and sailors abroad, and the islands in the British waters) the population of the United Kingdom for 1873, 1874, and 1875, was as follows:

DIVISIONS.	July, 1873.	July, 1874.	July, 1875.
England and Wales.....	28,856,414	28,648,609	28,944,459
Scotland.....	3,480,928	3,462,916	3,495,214
Ireland.....	5,887,261	5,300,485	5,297,732
Islands in British waters (estimated).....	145,000	145,000	145,000
Soldiers and sailors abroad.....	216,000	216,000	216,000
Total.....	83,485,600	83,778,000	83,198,600

The movement of population for the four years 1871-1874 inclusive was as follows:

YEAR.	Marriages.	Birthe.	Deaths.	Excess of Birthe.
England and Wales.				
1871	190,112	797,428	514,879	282,549
1872	201,267	825,907	492,265	333,642
1873	205,613	829,778	492,590	337,188
1874	201,805	854,807	526,701	328,106
Scotland.				
1871	22,966	116,127	74,644	41,483
1872	25,580	118,878	75,741	43,137
1873	24,780	119,733	76,537	43,196
1874	26,247	128,795	80,676	48,119
Ireland.				
1871	28,960	151,665	88,720	62,945
1872	27,114	149,292	87,577	61,715
1873	26,370	144,877	87,587	57,290
1874	25,301	141,411	92,852	48,559

The following table exhibits the ages of the inhabitants of the United Kingdom, and the rate per cent. of persons living at the different age-periods:

AGES.	Males.		Females.		Rate per cent.	
					Males.	Fem.
Under 5 years....	2,098,828		2,081,974		13.7	12.9

Oldham	2.97	Cork	2.40		
Portsmouth	2.04	Total	2.65		
Salford	2.96				
Sheffield	2.69				

The number of emigrants from the United Kingdom to different countries was as follows:

YEAR.	To the United States.	To British North America.	To Australia and New Zealand.	To other Countries.	Total.
1874	148,161	25,450	58,958	13,445	241,014
1873	298,073	87,208	26,428	13,903	810,612
1872	228,747	82,205	15,876	13,855	295,213
1815-1874	5,336,406	1,519,805	1,096,912	210,198	8,112,911

In 1874 £485,566 were remitted by settlers in North America to their friends in the United Kingdom.

The number of persons belonging to each religious denomination is estimated as follows, on the basis of the census of 1871:

DENOMINATION.	ENGLAND.		SCOTLAND.		GREAT BRITAIN AND IRELAND.	
	Population.	Per cent.	Population.	Per cent.	Population.	Per cent.
Church of England	17,781,000	77.8	78,000	2.2	18,587,000	58.6
Church of Scotland			1,478,000	42.9	1,478,000	4.7
Dissenters	3,971,000	17.4	1,486,000	44.2	6,084,000	19.1
Roman Catholics	1,058,000	4.6	820,000	9.5	5,580,000	17.5
Jews	89,000	0.2	6,000	0.2	46,000	0.1

Enumerations of religious denominations exist in Ireland only. This country had, in 1871, 4,150,867 Roman Catholics, 667,979 Episcopalians, 497,648 Presbyterians, 43,441 Methodists, and 52,442 of different denominations.

The nativity of the 22,712,266 inhabitants of England and Wales was as follows: 21,692,165 were born in England and Wales, 213,254 in Scotland, 566,540 in Ireland, 25,655 on the islands in the British seas, 70,812 in the British colonies, 189,445 in foreign countries, and 4,395 on the high-seas.

The "General Report of the Census of England and Wales" gives the following estimate of British subjects residing abroad in 1871:

United States	8,192,823	Austria	1,528
Argentine Republic	10,583	Netherlands	1,077
Germany	4,986	China	949
France	5,895	Japan	800
Italy	5,844	Morocco	580
Uruguay	3,500	Greece	538
Turkey and Egypt	3,375	Colombia	500
Belgium	3,008	Hungary	460
Chili	2,614	Sweden	355
Russia	2,432	Denmark	269
Spain	2,369	Other countries	571
Switzerland	2,297		
Portugal	1,819	Total	8,182,199
Brazil	1,709		

This table, made up from the different consular reports, does not lay any claim to completeness, Norway, for instance, being omitted. The figures for France are unreliable on account of the German-French War. The French census of 1872 gives the number of British subjects resident in France at 26,003.

The following table gives the population of all the cities and towns having in 1871 more than 40,000 inhabitants. Different statements of the population of English cities are sometimes found to vary considerably, accordingly as the city proper (C.), the city and suburbs under one municipal government (M.), or the parliamentary borough (P.), is meant. In the following table they are distinguished, as above, by C., M., and P. Furthermore, I. denotes Improvement Commissioner's District, and L. Local Board District.

London	8,254,260 —	Leeds	259,312 M.
Glasgow (Scot'd)	547,538 P.	Dublin (Ireland)	246,326 M.
Liverpool	498,405 M.	Sheffield	239,946 P.
Manchester	351,189 M.	Edinburgh (Scot-land)	197,561 P.
Belfast	124,801 M.	Bristol	182,532 M.
Birmingham	343,787 M.		

Belfast (Ireland).	174,894 M.	Greenock (Scot-	57,821 P.
Bradford	145,380 M.	land)	54,995 P.
Stoke-upon-Trent	180,968 P.	Swansea	55,652 L.
Newcastle	128,448 M.	Croydon	58,741 M.
Hull	121,892 M.	Southampton	58,014 M.
Dundee (Scot'd)	119,141 P.	Stockport	58,557 M.
Portsmouth	118,569 M.	Bath	51,949 L.
Oldham	118,100 P.	Merthyr-Tydril.	49,810 M.

Blackburn	76,899 M.	Cheltenham	43,796 M.
Huddersfield	70,258 M.	York	43,782 M.
Plymouth	68,758 M.	Dudley	42,947 M.
Wolverhampton	68,291 M.	Ipswich	41,819 M.
Halifax	65,510 M.	Great Yarmouth.	41,166 M.
Devonport	64,084 P.	Northampton	40,858 M.
Exchdale	62,465 P.	Burnley	39,976 M.
West Ham	62,919 L.	Hawley	

The following table is taken from the estimates of the Registrar-General for July, 1875:

1. London	8,445,160	11. Bradford	168,806
2. Glasgow	584,564	12. Newcastle-on-	187,665
3. Liverpool	515,068	Tyne	
4. Manchester	355,636	13. Hull	182,983
5. Salford	185,730	14. Portsmouth	182,883
6. Birmingham	364,825	15. Leicester	109,580
7. Dublin	314,666	16. Sunderland	106,848
8. Leeds	285,118	17. Nottingham	92,351
9. Sheffield	267,851	18. Oldham	87,437
10. Edinburgh	211,626	19. Norwich	83,432
11. Bristol	196,186	20. Wolverhampton	71,718

The revenue and expenditure for the year ending March 31, 1875, were as follows (£1 = \$4.8666):

REVENUE.	
Customs.	£19,626,848
Excise, stamps, taxes, and income-tax.	48,181,952
Post-office.	7,809,785
Telegraph service.	1,129,989
Crown lands.	508,444
Miscellaneous.	3,828,724
Total.	£78,480,287

Of this total the net receipts within the year, after deducting repayments, etc., consisted of £75,005,595, of which £19,349,280 were customs, £27,254,132 excise, £10,547,730 stamps,

£2,459,132 land-tax, etc., £4,815,132 income-tax, £5,705,432 from the post-office, £1,123,794 from the telegraph service, the balance being from various sources. Under the head of miscellaneous the principal sources were as follows: military and naval receipts and sale of old stores, £798,960; contributions from Indian revenues, £576,842; revenue departments, £846,797; profits of issue from Bank of England, £188,578.

EXPENDITURE.	
Debt:	
Interest of the permanent debt and management.	£21,730,928
Terminable annuities.	5,173,658
Interest of unfunded debt, etc.	144,197
Consolidated fund charges:	
Civil list.	405,964
Annuities and pensions.	329,453
Salaries and allowances.	94,154
Courts of justice.	623,695
Miscellaneous services.	130,839
Supply services:	
Army.	14,519,434
Army purchase-commission.	579,115
Navy.	10,950,404
Vote of credit, Ashantee.	125,000
Miscellaneous civil services.	11,974,126
Departmental charges:	
Customs and inland revenue.	2,094,906
Post-office.	2,911,917
Telegraph service.	1,185,665
Post-office packet service.	972,000
Total ordinary expenditure	£74,828,048
Expense of fortifications.	£100,000

The budget estimates for the financial year 1875-'76 are as follows:

RECEIPTS.	
Customs.	£19,500,000
Excise	27,740,000
Stamps	10,600,000
Land and house tax.	2,450,000
Income-tax	3,900,000
Post-office	£5,750,000
Telegraph service	1,300,000
Crown lands	500,000
Miscellaneous	4,100,000
Total	£75,025,000

EXPENDITURES.	
Public debt	£27,470,000
Consolidated funds	1,500,000
Miscellaneous	45,453,000
Total	£75,523,000

The local taxation and local expenditure of Great Britain and Ireland for 1872-'73 were—

RECEIPTS AND EXPENDITURES.		England and Wales.	Scotland.	Ireland.	Total.
RECEIPTS.					
Direct taxes		£18,619,378	£1,698,008	£3,514,691	£23,831,077
Indirect taxes		3,989,288	455,454	800,224	4,694,916
From public property.		928,011	285,000	30,361	1,239,082
Added by the Government.		962,895	128,788	1,000,950	2,067,292
From loans.		6,568,513	145,658	169,995	6,899,490
From other sources.		2,926,984	138,768	187,946	3,239,698
Total		£28,955,818	£2,881,676	£4,904,776	£40,991,770
EXPENDITURES.					
Poor.		£3,401,110	£276,810	£267,243	£4,005,163
Miscellaneous.		20,059,749	1,905,446	3,810,921	25,776,116
Total		£23,550,859	£2,781,766	£4,268,269	£40,600,594

The national debt was as follows:

DEBT.	Capital.	Charges.
Total unredeemed capital of funded debt of Great Britain and Ireland, 1874.	£738,514,005	£236,576,092
Debt reduced 1874-'75.	8,716,290	
Charges increased 1875.		442,632
Debt on March 31, 1875.	£714,797,715	£237,020,814

Adding to this an unfunded debt of £5,239,800, and annuities amounting to £55,811,671, we have a total debt for Great Britain and Ireland of £775,848,686. The first debt incurred was in 1664, and since then it has been growing steadily, with the exception of a few periods.

In the following table a statement of the debt at various periods is given:

Revolution 1689.....	£664,263
Accession of Queen Anne, 1702.....	16,894,709
Accession of George I., 1714.....	54,145,368
Accession of George II., 1727.....	52,092,288
In 1768.....	183,865,480
Commencement of the American War.....	123,588,685
Conclusion of American War, 1784.....	249,351,638
Commencement of French War, 1798.....	239,250,248
Debt in 1817.....	840,850,491

In 1817 the English and Irish exchequers were united, and in 1835 the debt was reduced to £743,675,299. But in consequence of the West India emancipation act it again rose,

until in 1843 it reached £773,069,340. After a short period of reduction, the Crimean War again advanced it, until in 1859 it reached £786,801,154 funded debt, £18,277,400 unfunded debt, and £4,023,728 annuities. Since then it has been steadily reduced, until now it has reached the lowest figure in the century.

The imports from, and exports of British products to, other countries, were as follows in 1873 and 1874:

COUNTRIES.	IMPORTS FROM.		EXPORTS TO.	
	1873.	1874.	1873.	1874.
FOREIGN COUNTRIES.				
Russia.....	£21,189,000	£20,983,000	£23,993,000	£23,776,000
Sweden and Norway.....	10,697,000	11,894,000	5,081,000	5,401,000
Denmark (including Iceland).....	8,571,000	8,890,000	3,671,000	2,520,000
Germany.....	19,926,000	19,947,000	27,370,000	24,900,000
Netherlands.....	18,372,000	14,464,000	16,745,000	14,427,000
Belgium.....	18,075,000	15,049,000	7,201,000	5,823,000
France.....	43,399,000	46,519,000	17,292,000	16,870,000
Spain.....	10,973,000	8,642,000	8,787,000	4,064,000
Portugal (including Azores).....	4,661,000	4,683,000	8,438,000	3,057,000
Italy.....	8,881,000	8,684,000	7,444,000	6,870,000
Austro-Hungary.....	869,000	800,000	1,484,000	1,064,000
Greece.....	1,787,000	1,587,000	994,000	1,010,000
Turkey in Europe.....	6,069,000	5,848,000	7,788,000	7,088,000
Roumania.....	1,024,000	612,000	1,079,000	11,245,000
Egypt.....	14,156,000	10,516,000	6,222,000	8,586,000
Europe.....	£168,380,000	£163,462,000	£117,334,000	£105,555,000
United States.....	£11,471,000	£78,897,000	£28,575,000	£28,242,000
Mexico.....	500,000	547,000	1,194,000	1,126,000
Central America.....	1,364,000	1,121,000	831,000	157,000
Cuba and Porto Rico.....	5,109,000	8,765,000	2,752,000	1,658,000
Remainder of the West Indies.....	849,000	403,000	900,000	788,000
Venezuela.....	98,000	51,000	528,000	506,000
Colombia.....	1,077,000	996,000	3,075,000	2,570,000
Ecuador.....	818,000	297,000	101,000	65,000
Brazil.....	7,400,000	7,003,000	7,545,000	7,678,000
Argentine Republic.....	2,604,000	2,709,000	8,729,000	4,852,000
Uruguay.....	1,271,000	1,762,000	1,762,000	
Chile.....	4,764,000	4,701,000	8,166,000	2,751,000
Peru.....	5,220,000	4,501,000	2,525,000	1,593,000
America.....	£101,546,000	£99,991,000	£61,182,000	£51,680,000
Other continents.....	£20,852,000	£19,463,000	£10,818,000	£10,042,000
British colonies.....	£81,009,000	£82,163,000	£66,326,000	£72,280,000
Total.....	£371,387,000	£370,088,000	£255,168,000	£239,558,000
Exports of foreign and colonial products.....			£255,580,000	£258,092,000

The movement of shipping was as follows (in tons) :

YEARS.	ENTERED.			CLEARED.		
	British.	Foreign.	Total.	British.	Foreign.	Total.
I. TOTAL NUMBERS ENTERED AND CLEARED.						
1860.....	6,889,000	5,284,000	12,780,000	9,026,000	5,491,000	12,517,000

III. STEAMERS ENTERED AND CLEARED.						
1860.....	2,145,000	404,000	2,549,000	2,042,000	377,000	2,419,000
1873.....	9,272,000	1,870,000	11,142,000	9,672,000	1,949,000	11,621,000
1874.....	9,556,000	1,871,000	11,426,000	9,858,000	2,001,000	11,864,000

The number of vessels cleared for the United States was 3,214, of 3,034,793 tons, in 1873, and 2,773, of 2,806,251 tons, in 1874. The number

entered from the same country was 3,412, of 3,020,158 tons, in 1873, and 4,068, of 3,509,249 tons, in 1874. The number cleared for British

North America was 1,761, of 1,179,179 tons, in 1873, and 1,824, of 1,242,328 tons, in 1874. The number entered from that country was 2,065, of

1,388,456 tons, in 1873, and 2,257, of 1,509,265 tons, in 1874. The commercial navy was as follows on December 31, 1873 and 1874:

	SAILING-VESSELS.		STEAMSHIPS.		TOTAL.	
	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.
<i>Number of Ships registered.</i>						
United Kingdom	1874. 21,464	4,108,000	4,088	1,571,000	25,497	5,979,000
	1873. 21,698	4,091,000	3,868	1,714,000	25,561	5,905,000
British colonies	1874. 10,583	1,877,000	732	112,000	11,438	1,854,000
	1873. 10,583	1,877,000	732	112,000	11,264	1,459,000
Total					34,985	7,583,000
<i>Number of Vessels used in 1874 (exclusive of River Steamers).</i>						
Coasting	10,827	694,000	1,128	220,000	11,955	913,000
Coasting and long voyage	1,456	251,000	221	94,000	1,707	345,000
Long voyage	5,618	3,093,000	1,597	1,513,000	7,310	4,606,000
Total	17,926	4,088,000	2,946	1,827,000	20,872	5,865,000

The imports and exports during the past years were as follows:

YEARS.	Imports.	Exports.	Total Commerce.
1874.....	£270,082,701	£297,650,464	£567,733,165
1873.....	871,287,872	811,004,765	682,292,187
1872.....	854,693,624	814,568,584	669,252,458
AVERAGE.			
1866-1870.....	292,777,000	284,717,000	527,493,000
1861-1865.....	247,629,000	190,581,000	438,460,000

The imports and exports of precious metals were as follows:

YEARS.	Imports.	Exports.
1874.....	£30,879,000	£22,554,000
1873.....	33,549,000	28,899,000
1872.....	29,608,000	30,386,000

The United Kingdom had on December 31, 1874, 16,449 miles of railway, against 16,082 in 1873. Of these, 11,622 were in England, 2,700 in Scotland, and 2,127 in Wales. The capital in 1874 was £583,506,000 in England, £84,131,000 in Scotland, and £36,701,000 in Ireland, making a total of £704,338,000 against

£588,320,000 in 1873. The total number of passengers amounted to 478,316,701 in 1874, against 455,634,767 in 1873. The total receipts were £59,256,000 in 1874, against £57,742,000 in 1873; while the net receipts were £26,643,000 in 1874, against £29,989,000 in 1873.

The number of letters forwarded in 1873 was 907,000,000, and in 1874, 965,000,000. Of these 802,000,000 were in England, 90,000,000 in Scotland, 73,000,000 in Ireland. The number of newspapers and book packets was 254,000,000 in 1873, and 238,000,000 in 1874.

In 1874, 15,900,562 inland and 320,941 foreign money-orders were issued, amounting to £26,296,441 and £1,211,231 respectively, making a total of 16,221,503 money-orders, amounting to £27,507,672.

The length of the telegraph-wires at the end of 1872 was 105,051 miles; the number of offices in 1873 was 5,600, and the number of messages delivered in 1874 was 19,116,634, exclusive of press, service, and news messages.

The value of the principal articles of import and export was as follows in 1874:

IMPORTS.		EXPORTS.	
Articles.	Value.	Articles.	Value.
Corn, grain, and wheat.....	251,070,302	Cotton manufactures.....	259,738,000
Raw cotton.....	60,696,496	Metals.....	36,740,376
Wood and timber.....	31,328,287	Woolen and worsted manufactures.....	22,770,528
Wool.....	31,116,184	Cotton yarn.....	14,317,435
Sugar.....	30,191,471	Coals and fuel.....	11,954,621
Silk, raw and manufactured.....	77,560,118	Linen yarn and manufactures.....	10,753,638
Tea.....	11,582,966	Machinery.....	9,790,914
Flax and hemp.....	11,378,622	Notions and millinery.....	6,140,160
Metals.....	10,976,108	Woolen and worsted yarn.....	5,538,560
Butter.....	8,050,025	Hardware and cutlery.....	4,408,389
Seeds.....	7,464,798	Leather.....	3,548,925
Coffee.....	7,064,788	Silk.....	3,184,063
Wine.....	6,563,465	Alkali.....	2,613,064
Hides, tanned and untanned.....	6,381,432	Beer and ale.....	2,449,085
Bacon and hams.....	5,902,429	Chemical products.....	2,143,049
Oil.....	5,799,728	Telegraph-wire.....	2,113,301

The British army is filled up exclusively by recruiting. The term of service is twelve years, after which a soldier can serve for nine years more. At the end of three years he can also enter the reserve, one year in the regular army

being counted as three in the reserve. By the reorganization of 1872 the United Kingdom is divided into sixty-eight military districts. In each district there is one brigade depot of 183 men, two battalions of the regular army, which

alternately serve abroad, two battalions of militia, and the volunteers of the district. According to the army estimates for the year 1875-'76, the army was to be composed as follows:

TROOPS.	Officers.	Privates.	Horses.
REGULAR ARMY.			
General staff.....	71		350
Cavalry.....	873	16,402	13,971
Artillery.....	1,430	33,476	14,044
Engineer corps.....	624	4,378	433
Infantry.....	5,133	120,190	1,000
Colonial corps.....	126	2,354	13
Officers on the general and departmental staffs.....	88	90	650
Paymaster's, chaplain's, medical and control departments.....	1,973		350
Hospital corps.....	31	1,324	1,095
Army service corps.....	8	3,006	
Miscellaneous establishments.....	130	549	
Reserve of the regular army.....	1,300	32,000	
Regular army.....	11,677	214,954	81,544
Total number of men.....		225,931	
RESERVE TROOPS.			
Yeomanry cavalry.....	1,048	14,330	16,000
Militia.....	3,436	130,466	800
Volunteers (total number of men).....		161,150	8,200
Total number of reserve troops (rank and file).....		310,480	20,000
Total army.....		536,411	51,540

Besides the above, there are the following organizations: In Ireland there is a police force under military discipline, consisting of 13,000 men and 4,000 horses; the Channel Islands have a militia of 300 officers and 8,000 men, subsidized by the British Government; India has a native army of 140,000 men, and a police force under military discipline of 190,000 men, the officers of both of which are Europeans; the colonies all have a militia, a volunteer corps of their own. The home Government stations troops only at fortified places (except in the Cape Colony, where peculiar circumstances exist), and at places where policy demands it, as in Hong-Kong. The standing army was distributed as follows on January 1, 1875: England, 67,152; Channel Islands, 2,043; Scotland, 4,348; Ireland, 22,731; under way, 3,933; in the colonies, 23,003; and in India, 63,197 men.

The navy consists of 59 iron-clads, about 800 steamers, and 170 sailing-vessels. Of this number 244 were in commission on August 1, 1875, 126 being at home and 118 abroad. The navy is manned by 46,625 seamen, 14,073 marines, and 18,337 men belong to the Royal Naval Reserve.

In 1874 the number of schools inspected by the Government inspectors was 13,163 in England and Wales, and 2,609 in Scotland. These

schools had accommodations for 2,962,981 children in England and Wales, and 392,771 in Scotland. The average attendance was 1,759,641 in England and Wales, and 280,143 in Scotland. In Ireland there were on the same date 7,257 national schools, in which the total number of pupils during the year had been 1,006,511, and the average daily attendance 395,390.

In England the number of paupers relieved in 1873-'74 was 829,281, and the amount expended was £7,664,957. Scotland in the same year had 123,182 paupers, on whom it spent £347,682. In Ireland the number of paupers was 79,633, and their annual cost £958,203. The rate per head of the total population for relief of the poor was 6s. 6d. for England and Wales, 5s. 1d. for Scotland, and 3s. 7½d. for Ireland.

The number of criminal offenders committed for trial, convicted, and acquitted, in the United Kingdom, was as follows in 1874:

COUNTRIES.	Committed for Trial.	Convicted.	Acquitted.
England and Wales...	15,195	11,509	3,649
Scotland.....	2,500	2,231	654
Ireland.....	4,130	2,867	1,748
Total.....	22,205	16,107	6,051

On December 31, 1874, there were 89 reformatory schools in the United Kingdom, of which 68 were Protestant and 21 Roman Catholic. They were attended by 5,424 boys (3,519 Protestant and 1,905 Catholic) and 1,364 girls (862 Protestant and 502 Catholic). The number of industrial schools at the same time was 161 (101 Protestant and 60 Catholic), attended by 10,368 boys (7,423 Protestant and 2,945 Catholic) and 5,610 girls (3,124 Protestant and 2,486 Catholic). The police and constabulary force in 1874 was 28,870 in England and Wales, 3,075 in Scotland, and 12,224 in Ireland, making a total of 44,169.

The circulation of the notes of the Bank of England, and the average of bullion kept on hand by that institution, together with the total bank-note circulation in the United Kingdom in 1860, 1870, and 1874, were as follows:

YEARS.	Bank of England.	Total Banks United Kingdom.	Average of Bullion in Bank of England.
1860....	£21,332,624	£38,552,461	£15,387,463
1870....	23,263,959	39,835,329	20,935,337
1874....	26,277,150	43,935,256	22,330,348

The returns of the savings-banks for 1873 and 1874 made the following exhibit:

COUNTRIES.	1873.			1874.		
	Number of Banks.	Number of Depositors.	Amount due to Depositors.	Number of Banks.	Number of Depositors.	Amount due to Depositors.
England and Wales.....	336	1,133,092	£33,323,410	381	1,144,934	£34,064,254
Scotland.....	52	232,300	4,637,423	52	241,551	4,936,084
Ireland.....	41	68,745	2,124,487	39	55,455	2,017,561
Islands in British seas.....	2	21,352	440,096	2	21,673	449,373
Total.....	461	1,445,489	£40,525,851	474	1,468,562	£41,467,171

The post-office savings-banks have been rapidly and steadily growing in favor, as can be seen from the following table.

YEAR.	Number of Post-Office Savings-Banks.	Number of Accounts open the 31st of December.	Number of Deposits.	Amount of Deposits.
1865	3,821	611,819	1,802,809	£2,719,017
1870	4,082	1,138,168	2,185,998	5,995,121
1874	5,068	1,668,788	3,044,693	8,341,256

The agricultural returns for 1874 show the following number of acres to have been devoted in the United Kingdom to the different crops:

Crops.	Acres.
Corn crops.....	11,844,894
Green crops.....	4,957,688
Other crops.....	12,558,126

The live-stock of the United Kingdom was as follows in June, 1874:

	Number.
Horses	1,845,054
Cattle.....	10,370,516
Sheep.....	84,687,206
Pigs.....	8,529,897

In 1875 the extent of land in Great Britain producing wheat was 3,842,888 acres; barley, 2,509,598 acres; oats, 2,664,048 acres; potatoes, 522,634 acres; and hops, 69,203 acres.

In 1875 Great Britain had 6,012,605 heads of cattle, 29,165,278 sheep, and 2,229,870 pigs.

The results of the herring-fisheries of Scot-

land in 1874 were 1,000,561 bbls. cured, 517,558 bbls. branded, and 787,814 bbls. exported. These figures are the largest on record. The increase in 1874 over the average of the seven preceding years was 27 per cent. in the quantity cured, 46 per cent. in the quantity exported, and 59 per cent. in the quantity branded. The cod and ling fisheries in 1874 produced 6,754 bbls. cured in pickle, against 12,381 in 1873; and 148,466 cwts. cured dried against 160,716 in 1873. The returns of the cod and ling fishery of 1874 were not so good as in 1873; but the year 1873, as compared with 1872, showed an increase of 14,740 cwts. cured dried, and of 441 bbls. cured in pickle. This increase was not produced, as in some former years, by importation, the result of successful expeditions from Shetland to the Faroe Islands and Iceland, but was obtained from the home coasts, and chiefly from the fishing by boats off Shetland, Orkney, and the Hebrides. The number of fishing-boats in Scotland in 1874 was 14,847, and of fishermen and boys, 45,226. In 1871 the total estimated value of the sea-fisheries of Scotland was £1,505,431.

In 1874 the amount of coal exported was 13,927,205 tons, of iron and steel manufactures 2,487,522 tons, and of pig iron 776,116 tons.

The finances, commerce, and movement of shipping of the British colonies were as follows, according to the "Statistical Abstract for the Colonial and other Possessions of the United Kingdom, 1859-1873" (London, 1875):

COLONIES.	Income.	Expenditure.	Debt.	Imports.	Exports.	Movement of shipping (tons).
	£	£	£	£	£	
Gibraltar	48,000	46,000				4,244,000
Malta	162,000		(?)	8,706,000	8,010,000	4,343,000
Dominion of Canada	4,386,000	8,995,000	21,936,000	26,478,000	18,655,000	6,166,000
Newfoundland.....	175,000	205,000	280,000	1,410,000	1,681,000	412,000
Bermuda.....	88,000	45,000	14,000	255,000	65,000	146,000
Honduras.....	52,000	34,000	16,000	287,000	217,000	73,000
Bahama Islands.....	54,000	52,000	54,000	226,000	157,000	187,000
Turk Islands.....	8,000	9,000	2,000	18,000	24,000	114,000
Jamaica.....	510,000	523,000	683,000	1,738,000	1,266,000	615,000
Virgin Islands.....	2,000	2,000		4,000	6,000	8,000
St. Kitts.....	25,000	34,000	7,000	162,000	183,000	60,000
Nevis.....	9,000	8,000		52,000	88,000	24,000
Antigua.....	83,000	88,000	52,000	169,000	171,000	51,000
Montserrat.....	5,000	5,000		21,000	37,000	13,000
Dominica.....	16,000	18,000	5,000	68,000	62,000	19,000
Santa Lucia.....	20,000	20,000	18,000	116,000	151,000	83,000
St. Vincent.....	29,000	29,000		161,000	216,000	41,000

West Indies (Total).....	1,151,000	1,224,000	878,000	5,420,000	5,258,000	2,344,000
British Guiana.....	862,000	890,000	475,000	1,765,000	2,217,000	444,000
Falkland Islands.....	11,000	10,000		87,000	41,000	56,000
British India.....	50,219,000	50,698,000	120,698,000	85,817,000	56,592,000	4,700,000
Straits Settlements.....	813,000	295,000		12,120,000	11,302,000	2,507,000
Ceylon.....	1,267,000	1,176,000	640,000	5,574,000	5,440,000	1,994,000
Hong-Kong.....	177,000	165,000				3,373,000
Labuan.....	7,000	7,000		80,000	83,000	15,000
Australia.....	11,175,000	10,167,000	42,642,000	41,447,000	39,190,000	5,069,000
Cape Colony.....	2,073,000	2,160,000	1,728,000	5,452,000	4,011,000	542,000
Natal.....	207,000	173,000	381,000	1,011,000	651,000	107,000
Sierra Leone (1872).....	94,000	87,000	25,000	412,000	359,000	343,000
Gold Coast (1872).....	40,000	43,000		280,000	335,000	(?)
Gambia (1872).....	17,000	18,000		123,000	127,000	64,000
St. Helena.....	15,000	17,000	(?)	91,000	43,000	163,000
Mauritius.....	660,000	657,000	900,000	2,454,000	8,275,000	513,000

The mineral statistics of the United Kingdom were as follows in 1874:

METALS.		Quantity.	Estimated Value.
Coal,	tons.....	125,043,257	245,849,194
Pig iron,	".....	5,991,405	16,476,372
Fine copper,	".....	4,951	447,891
Metallic lead,	".....	53,777	1,395,455
Tin,	".....	2,942	1,077,712
Zinc,	".....	4,440	105,778
Silver from lead, ounces.....		509,277	127,319
Gold,	".....	833	1,540
Estimated value of other metals.....			3,000
Total.....			267,884,000

The session of Parliament for 1875 was opened by commission on February 5th. The speech was read by the Lord-Chancellor. It commenced with the assurance that friendly relations continued to exist with all foreign powers, and with the expression of a hope that the peace of Europe would remain unbroken. Reference was then made to the conference held at Brussels on the laws and usages of war. Spanish affairs, on the question of the recognition of King Alfonso XII., were mentioned. The slave-trade on the East-African coast, Chinese and Japanese difficulties, the colonies, the Gold Coast, Natal, and Feejee subsequently were reviewed, and this portion of the speech was concluded by reference to an abundant harvest in India, which consequently had averted an expected calamity. After reviewing the finances of the United Kingdom, reference was made to the measures to be introduced during the session, including the transfer of land, the reconstruction of the judiciary, improvement of the dwellings for the working-classes, "friendly societies," a merchants' shipping act, and the questions of appointing a public prosecutor, trade-unions, and agricultural tenancies. A few days before the opening of Parliament, on January 16th, Mr. Gladstone had published a letter, in which he announced his retirement from the leadership of the Liberal party, and on February 3d Marquis Hartington had been elected his successor. The new leader of the Liberals made the usual criticism on some portions of the speech in the House of Commons, and the Earl Granville performed the same duty connected with the leadership of the Opposition in the House of Lords. Addresses in reply to the speech from the throne were then in both Houses agreed to.

The election of John Mitchel as member for Tipperary led, on February 18th, to a discussion as to whether an unpardoned convict could hold a seat in the House. Papers relating to his conviction and escape from custody were put in. Mr. Disraeli, on February 18th, moved that, owing to Mr. Mitchel being an unpardoned convict, he was incapable of being elected or returned as a member. After numerous amendments had been rejected, it was resolved that a new writ should be issued for Tipperary. This rejection of John Mitchel

by the House of Commons caused great popular agitation in Tipperary. At a meeting of the Nationalists, held on the 21st of February, it was resolved to reelect him. Charles J. Kirkham, one of the Fenian leaders of 1865, published a letter advocating that course. Mr. Mitchel's electoral address was as follows: "Electors of Tipperary—You have made me your representative. I sincerely thank you. The British Parliament has pronounced me disqualified to represent you. Is this verdict yours? If not, vote for me. I stand again, unpromised and unpledged." On March 11th Mr. Mitchel was elected for the second time as member for Tipperary, but before the House of Commons had another discussion on the question of his admission he died at Newry. On May 28th the Court of Common Pleas, to which the appeal in the case of the Tipperary election was referred, unanimously decided that the late John Mitchel was disqualified, and that Mr. Moore was entitled to the seat.

Another remarkable election for the House of Commons, which took place in February, was that of Dr. Kenealy, well known as the defender of the Tichborne claimant. He was elected on February 16th for Stoke-upon-Trent, by nearly 2,000 majority over his nearest opponent, a Liberal and (so-called) working-man, Mr. Walton. Dr. Kenealy did not stand as either Liberal or Tory, but his election was simply a popular demonstration in favor of the claimant and his counsel. It showed that a multitude of Englishmen still believe Arthur Orton to be Tichborne. On April 23d Dr. Kenealy brought in a motion that a royal commission be appointed to investigate the circumstances attending the Tichborne trial. In a powerful speech in support of his resolution, Dr. Kenealy alluded to the growing dissatisfaction at the result of these trials and the manner in which they had been conducted by the bench. Nothing short of a royal commission of inquiry would content the people of England, who were convinced that justice had not been done. He stated that he had received many letters from America to the same effect. The discontent had grown into a torrent which was pouring over the land. The late ministry partly owed its downfall to its conduct in regard to the Tichborne case. He asserted that he had positive proof that the Chief-Justice, Sir Alexander Cockburn, in society, while the trial was in progress, said he would give the claimant fifteen years' imprisonment. He spoke in severe terms of the Pittindreigh forgeries, and stated that the claimant was unable to call more witnesses for lack of funds. The penalties for contempt of court had been directed against one side only. The witnesses were browbeaten, and the partiality of the bench was patent throughout the proceedings. Dr. Kenealy declared he had sacrificed himself to his sense of honor and duty, and had been irretrievably ruined in his profession. He believed the motion before the House would

never be renewed in its present form. It was impossible to predict the result if this commission should be refused. The defeat of the motion would spread dismay throughout the country. Dr. Kenealy spoke three hours. He was followed by Mr. Whalley, who seconded the motion. The Attorney-General, Sir Henry James, Mr. Disraeli, and Mr. Bright, opposed the motion, which was finally rejected by 1 to 433.

Among other subjects discussed by the House of Commons during the month of April was the woman's-suffrage question. On April 7th a lengthy debate took place on a bill introduced by Mr. Fawcett to enable unmarried women to vote at elections for members of Parliament. Messrs. Chaplin, Leatham, and Smollett, made speeches in opposition to the measure. Mr. Smollett said the agitation emanated from turbulent women in America. The bill, if passed, would enfranchise women who gained their livelihood by immorality. The House, upon a division, refused to order the bill to its second reading by a vote of 152 to 187. Mr. Disraeli voted with the minority.

On May 4th a motion was offered by the Marquis of Hartington that the House should not entertain any complaint with respect to the publication of its proceedings, except in cases of willful misrepresentation, or when publication is prohibited, and that strangers shall not be obliged to withdraw unless they are disorderly, or by special direction of the House. A vote on the motion was not taken until May 31st, when it was rejected. Mr. Disraeli then moved that, if attention is called by any member to the presence of strangers, the House shall decide by division whether they withdraw; furthermore, that the Speaker be empowered to order their withdrawal whenever he thinks fit. Mr. Disraeli's motion was adopted.

A violent scene occurred in the House of Commons on July 22d. Mr. Disraeli announced that the Government had abandoned the Merchants' Shipping bill for the session, and expressed the hope that the session would be closed on the 10th or 12th of August, or possibly at an earlier date. Mr. Plimsoll took the floor and delivered a speech in which he violently attacked the Government. He said the consequence of the abandonment of the bill would be the destruction of thousands of lives. He spoke vehemently and excitedly, using extraordinary epithets, stamping his feet and gesticulating wildly, setting the House in an uproar. Mr. Plimsoll added that he was determined to unmask these villains. Upon being called to order, he advanced to the table and gave notice that he would ask, on July 27th, whether certain vessels which had been lost, entailing great sacrifice of life, belonged to Mr. Bates, member for Plymouth. Mr. Disraeli moved that Mr. Plimsoll be removed from the House. The Speaker ordered Mr. Plimsoll to withdraw his remarks, but the latter left

the Chamber, shaking his fist at the Government benches as he went out. The House then began discussion as to what action it was proper to take in regard to Mr. Plimsoll's conduct. Several speakers urged his excitability as an excuse for his offense. Mr. Bates subsequently made a personal explanation in regard to the remarks of Mr. Plimsoll concerning himself. He acknowledged that he had lost five ships during the last two years, but said they were well equipped, were classed A No. 1 at Lloyd's, and were only insured for part of their value. He expressed pity for Mr. Plimsoll, who, he said, was not responsible for his action. Messrs. T. E. Smith, Liberal member for Tynemouth, and Mr. Rathbone, Liberal member for Liverpool, protested against the Government's course. They declared that the suspense and uncertainty which would be produced by the withdrawal of the Merchants' Shipping bill would be injurious to the shipping interest. In a protest placed by Mr. Plimsoll on the table of the House of Commons, he says: "I protest in the name of God against the delay of the Shipping bill. Although the bill itself is an atrocious sham, there is enough humanity and knowledge in the House to change it into a good measure." He denounced the present laws against breach of contract, which leave sailors who have unknowingly agreed to sail in unseaworthy ships the alternative of the jail or death, and continued: "I charge the Government with wittingly and unwittingly playing into the hands of the maritime murderers inside and outside the House, to secure the continuance of the present murderous system. I desire to unmask the villains who sit in this House, fit representatives of the more numerous but not greater villains outside. I demand that the bill be proceeded with. Failing in this, I lay upon the heads of the premier and his colleagues the blood of all who perish next winter from preventable causes, and denounce against him and them the wrath of God!" The impression produced in the country by these scenes in the House of Commons was intense, and public opinion unmistakably and emphatically supported Mr. Plimsoll. At a number of public meetings resolutions expressing sympathy with and pledging support to him were adopted. The Earl of Shaftesbury published a letter to Mr. Plimsoll, earnestly sympathizing with him in his efforts to better the condition of seamen, and advising him to appear in the House and adhere to the views he expressed, but to signify his regret that excitement led him to violate the rules of debate. A majority of the prominent daily and weekly journals expressed a similar view. On July 26th, in the House of Commons, various notices of motions and questions were given, all reflecting the depth of public indignation at the Government's withdrawal of the Shipping bill. On motion of Mr. Roebuck, July 29th was assigned for the second reading of Mr. Plimsoll's

Shipping bill. This measure the latter had abandoned in favor of the Government bill. On the other hand, Sir Charles Adderley, President of the Board of Trade, announced that he would introduce a bill further empowering the Board of Trade to prevent unseaworthy ships from sailing. This was regarded as a Government concession to and triumph for Mr. Plimsoll. On July 27th Mr. Disraeli, in reply to Mr. Dillwyn, refused to give precedence to Mr. Plimsoll's Shipping bill, which, he said, despite the excellence of its motives, would only aggravate the evils it intended to remedy. Besides, it would require too much time in consideration. The bill of Sir Charles Adderley, President of the Board of Trade, would give the Government more rapid and direct action in stopping ships from sailing. After a long debate the House, by a vote of 73 against 19, agreed to give the Government bills precedence. On July 28th Sir Charles Adderley introduced his bill further to empower the Board of Trade to prevent unseaworthy vessels from sailing. In presenting the measure he stated that Mr. Plimsoll's bill was not acceptable to the Government because it was based on a wrong principle. Here he was interrupted by cries of "No!" Continuing his remarks, he said the bill was also objectionable because, besides punishing offenders, it actually takes upon itself the conduct of the marine service. The act of 1872 already empowers the Government to stop unseaworthy ships. Since that went into effect 958 vessels had been stopped, of which 515 were found to be unseaworthy. The present bill was intended to strengthen the Executive, facilitate more rapid and direct action, and provide a sufficient number of officers to effectually detain unseaworthy ships. It also allows a fourth part of the crew to demand a survey. Finally, it was merely an earnest of fuller action to be had next session. After a lengthy debate, in which Mr. Sullivan, Mr. Roebuck, and several other members took part, the bill passed to its second reading. On July 29th Mr. Plimsoll read an apology for his conduct. He said he retracted the unparliamentary expressions with reluctance, but not his statement of facts. He then submitted his case to the judgment of the House. Mr. Disraeli asked that the order moving for a reprimand of Mr. Plimsoll be discharged, which was agreed to amid vociferous cheering. On July 30th Mr. Disraeli, replying to a question from Mr. Bates, said the Government would afford every facility for the appointment of a committee to investigate Mr. Plimsoll's charges affecting Mr. Bates, if the latter so desired. The debate on Sir Charles Adderley's Shipping bill began. Mr. Plimsoll favored the measure, but advocated certain amendments. In the evening the bill passed its second reading without a division. On August 2d the House of Commons went into committee on the Unseaworthy Ships bill, and on August 5th the bill was read

a third time and passed. The House of Lords passed the bill on August 11th. Being intended only as a temporary measure, until the subject can be dealt with more generally, the act is to expire on October 1, 1876.

The first clause of the act gives power to appoint paid officers with authority to detain unseaworthy ships, and the orders made by them will have the same authority as orders made under the act of 1873 by the Board of Trade. The second clause facilitates the action of seamen who may have reason to think the vessel to which they belong in an unseaworthy state. One-fourth of their number may complain to this effect either directly to the Board of Trade, or to some officer appointed under the first clause, in which case steps will be at once taken to ascertain whether the ship ought to be detained, without any security for consequent costs and expenses being required from the complainants. Clause 5 relates to the carriage of grain in bulk. After October 1, 1875, no cargo, of which more than one-third consists of any kind of grain, corn, rice, paddy, pulse, seeds, nuts, or nut-kernels, is to be carried on board a British ship unless contained in bags, sacks, or barrels, or secured from shifting by boards, bulkheads, or otherwise. By clause 4 every person who sends an unseaworthy ship to sea, the managing owner of any ship so sent to sea, every person who attempts the same, or is party to such an attempt, and every master of such a ship who knowingly takes the same to sea, are made alike liable to the penalties of a misdemeanor. The owner of every ship is to register the name of her managing owner, or of the person to whom the management of the vessel is intrusted on behalf of the owner, under a penalty of £500. Clause 5 relates to deck-lines. After the 1st of November a line is to be painted amidships on every British ship, indicating the position of each deck. Coasting and fishing vessels, and pleasure-yachts, are exempted from the clause. By clause 6 every ship, before she is entered outward, is to be marked with a disk a foot in diameter, a line drawn through the centre of which shall indicate the maximum load-line in salt-water to which the owner intends to load the vessel for that voyage. The owner is to deliver to the customs officer a statement, in writing, of the difference in feet between the centre of this disk and the upper edge of each of the lines indicating the position of the decks, and this statement is to be repeated in each seaman's contract, and in the log-book. No alteration in these marks is to be made until her next return to a port of discharge in the United Kingdom. The penalty for neglecting this provision, or for defacing the lines, is £100. A clause makes the shipowner personally liable to the master, seamen, and apprentices of the vessel for neglect of proper measures to insure the seaworthiness of the vessel at the commencement of and during the voyage.

A bill amending and extending the Supreme Court of Judicature act of 1873 was passed on August 9th. The act, in its amended form, is regarded as one of the most important reforms in the recent history of England. The Court of Chancery, the Courts of Queen's Bench, Common Pleas, and Exchequer, and the Courts of Admiralty, Probate, and Divorce, were united and consolidated together as one Supreme Court of Judicature. The Supreme Court has no judicial functions. It never sits as a court. It consists of two permanent divisions, viz., "Her Majesty's High Court of Justice," and "Her Majesty's Court of Appeal." Notwithstanding the provisions in the principal statute abolishing the appellate jurisdiction

of the House of Lords, the right is to be reserved until November 1, 1876. The number of judges is not to be reduced. The courts known as Queen's Bench, Common Pleas, and Exchequer, with the Probate and Admiralty Courts, will still exist in their several divisions, and "Her Majesty's Court of Appeal" is substituted for the Court of Chancery. The ordinary judges of the Court of Appeal are to be styled "Justices of Appeal." All the officers of the courts on appeals are to attend the High Court of Justice. The London Court of Bankruptcy is not transferred to the High Court. A plaintiff has option as to which division he will sue in. Three judges are to constitute the Court of Appeal. Before and after the commencement of the act rules may be made for the sittings of the courts, etc., and her Majesty is empowered, by order of Council, to make regulations as to the circuits of the judges. There is to be no local venue, and causes may be tried before a judge and assessors, or jury, or official referee. Although terms are abolished, the "long vacation" is preserved, and is to commence as usual on the 10th of August, and to terminate on the 24th of October. There is to be a vacation of a week at Easter, Whitsuntide, and Christmas. Two of the judges, however, are to sit in the vacation for the hearing, in London and Middlesex, of such applications as may require to be immediately or promptly heard, and they may sit either together, or separately, as a divisional court. The vacation-judges of the High Court may dispose of all actions, matters, and other business of an urgent nature, during any interval between the sittings of any division of the High Court to which such business may be assigned, although such interval may not be called or known as a vacation.

On August 18th Parliament was prorogued till the 29th of October. The Queen, in her speech closing the session, said:

MY LORDS AND GENTLEMEN: I am happy to be enabled to release you from attendance at Parliament. The relations between myself and all foreign powers continue to be cordial, and I look forward with hope and confidence to the uninterrupted maintenance of European peace. The visit paid to this country, on invitation of my Government, by the ruler of Zanzibar, has led to the conclusion of a supplemental convention, which, I trust, may be efficacious for the more complete suppression of the East-African slave-trade. I have learned with deep regret that the expedition dispatched by my Indian Government from Burmah, with the view to open communication with the western provinces of China, has been treacherously attacked by an armed force while on Chinese territory. This outrage, unhappily involving the death of a young and promising member of my consular service, is the subject of careful inquiry, and no effort shall be spared to secure the punishment of those by whom it was instigated and committed. The condition of my colonial empire is generally prosperous.

GENTLEMEN OF THE HOUSE OF COMMONS: I thank you for the liberal supplies you have voted for the public service.

MY LORDS AND GENTLEMEN: It is gratifying to me to find that the lengthened consideration you have given the various statutes, which have from

time to time been passed for the preservation of the peace in Ireland, has resulted in a measure which, while relaxing the stringency of former enactments, is calculated to maintain the tranquillity of the country.

The Queen then referred to the other principal enactments of the session, her reference to the Shipping and Revenue bills being as follows:

The state of the public business and the difference of opinion naturally arising on a varied and comprehensive scheme have unfortunately prevented you from completing the consideration of the Merchant Shipping bill. But I rejoice that you have been able by a temporary enactment to diminish considerably the dangers to which my seafaring subjects are exposed.

I have every reason to hope the progress in the revenue system which has marked recent years will be fully sustained in the present.

The arrangements which you have made with respect to the reduction of the national debt and those for the better regulation of loans for public works will lead to valuable improvements in our system of imperial and local finance. In bidding you farewell for the recess, I pray that the blessing of Providence may fall on your recent labors and accompany you in the discharge of all your duties.

The reopening of the Eastern question by the insurrection in European Turkey led to an earnest reconsideration of the position which England ought to occupy. While the confidence in the former policy of the British Government, to maintain under all circumstances the integrity of the Turkish Empire, is generally shaken, public opinion expressed itself strongly in favor of strengthening British influence in Egypt for the purpose of securing the possession of India. While this subject was discussed by the English press, the whole world was surprised by the announcement that the British Government had purchased from the Khedive nearly one-half of all the shares of the Suez Canal Company. Public opinion in England received this clear indication of the intention of the Government in regard to the Eastern question with enthusiastic applause. (*See Egypt.*)

The views of the Government on its relations with Russia in the affairs of Central Asia were officially stated, on July 7th, by the Under-Secretary of Foreign Affairs. In the House of Commons, Mr. Cochrane asked for the publication of the official correspondence between the British and Russian Governments relative to the occupation of Khiva by Russia. He called attention to the danger involved in the advance of Russia, which would facilitate an attack upon India, and become injurious to British commerce. He censured the English Government for its inactivity in view of the steady progress of Russia, in spite of all the assurances of the Emperor and his ministers to the contrary. He did not regard it as desirable for England to enter into agreements and treaties with Russia; it was necessary to retain freedom of action, and to make the utmost effort to strengthen the position of England in Afghanistan, which was the key of the British position. The visit of the Prince of

Wales would be a favorable opportunity to secure this aim. The Under-Secretary of Foreign Affairs declined to comply with the request of Mr. Cochrane. Several communications and dispatches which had been exchanged with Russia relative to the treaty with Khiva could not be published at the present time. At the proper time, all the documents would be submitted to Parliament. The present relations between the two Governments were of the most amicable nature, and he did not believe in the hostile intentions which were ascribed to Russia. The English Government was not indifferent in this question, but it regarded the advance of Russia as a step toward opening the resources of the countries of Central Asia. The English Government was fully convinced of the necessity of supporting the independence of Afghanistan, and it agreed with Russia in the opinion that the maintenance of a neutral territory between the Russian and the British dominions was a necessity; it preferred, however, not to enter into any formal agreement with Russia, as this would interfere with its freedom of action.

In order to strengthen the British rule in India, it was regarded by the Government desirable to arrange a visit of the Prince of Wales to India. A special grant for this purpose was demanded from the Parliament and voted. The Radicals of England violently opposed the grant, and a meeting held in Hyde Park, London, to protest against it, was attended by twelve thousand persons, and addressed by Mr. Bradlaugh. The Prince of Wales left London on October 11th, arrived on October 18th at the Piræus on a visit to the King of Greece; from there proceeded to Egypt, where he invested Tefwick Pasha, the heir-apparent of Egypt, with the grand cross of the order of the Star of India, and on November 8th landed at Bombay, where he was received with immense enthusiasm. (For an account of the tour of the prince through India, *see* INDIA.)

The relations of England to the diplomatic conflict between Germany and Belgium (*see* BELGIUM) was on April 19th the subject of an interpellation by Mr. O'Reilly, member of Longford County. Mr. Disraeli stated that Prince Bismarck, as long ago as January, 1874, made the suggestion that England should join Prussia in a strong remonstrance which the latter was compelled to make to Belgium against what Prince Bismarck described as a conspiracy of the Ultramontane and Jesuit refugees against the peace of Germany. Earl Granville, then Minister of Foreign Affairs, replied that he hoped Prince Bismarck would not press Belgium to go beyond the limits of her constitutional institutions. In the House of Lords, Earl Russell asked Lord Derby whether the Prusso-Belgian correspondence was terminated, and whether there was any reason to fear that the peace of Europe was endangered thereby. Lord Derby replied that the text of Prussia's first note fully justified Mr. Disraeli

in pronouncing it not a menace, but a friendly remonstrance. He had the assurance of the German ambassador, which a hasty examination had given no reason to doubt, that the second Prussian note was conceived in a very friendly spirit. It would be premature to express an opinion on the merits of the question, as England had not been formally applied to. At present he anticipated a result of the controversy without uneasiness. The British Government valued the independence of Belgium and the peace of Europe, but was happy to think that neither was in danger.

The exciting rumor of an impending war between Germany and France induced, on May 31st, Earl Russell to ask in the House of Lords that the correspondence between Great Britain and the Continental powers arising out of the recent war alarm be laid before the House. The Earl of Derby replied that the Government desired to conceal nothing it had done, but it would be impossible to give a fair account without largely using confidential communications relating to the policy and opinions of other Governments, which would object to such disclosure. The publication of these communications would prevent English diplomats from receiving information in the future, and to submit a mutilated correspondence might mislead the House. The causes of dispute were liable to recur; therefore it was not desirable in the interests of peace to give publicity to the details of the controversy. Lord Derby then proceeded to state that persons highest in authority in Berlin of late openly declared that the French army had become a source of danger to Germany, because its magnitude showed a determination on the part of France to renew the war; that Germany, in self-defense, might feel impelled to strike the first blow to secure peace, and that it was necessary that the French army should be considerably reduced. This language, repeated by German representatives here and elsewhere, created extreme uneasiness in France. The French Government immediately disclaimed all warlike intentions. Lord Derby said he accepted this declaration as entirely sincere. He believed no statesman in France contemplated a renewal of the war. France after her humiliations naturally desired to have an army which would give her the influence to which she considered herself entitled. One of the difficulties was that the French were unable to conceive that the German apprehensions were genuine. They regarded the representations made by Germany as a pretext for a fresh war. It seemed to her Majesty's Government that there was a mutual misunderstanding which might lead to grave consequences, for Germany's next step might have been a formal request for France to discontinue her armament, while France on the other hand would probably accelerate it and thereby confirm the suspicions of Germany. The existence of this mutual distrust afforded a good opportunity to

offer the friendly offices of England. The Russian Government saw things in the same light, and the visit of the Emperor Alexander to Berlin supplied the means of supporting England's representations. Lord Derby concluded by declaring that England had done her duty without sacrifices, past, present, or prospective. She had entered into no engagements and made no pledges; but her policy of non-intervention did not mean isolation or indifference to the peace of Europe.

On June 9th the Sultan of Zanzibar arrived at Gravesend. He remained in England about a month, all the expenses of his visit being defrayed by the English Government. He left England on July 19th for France, where he paid a visit to the President of the Republic, after which he returned home by the way of Egypt.

The assassination of Captain Margary by Chinese subjects, near the northern frontier of Burmah, led to serious complications with both Burmah and China. The Governments of both these countries finally agreed to the demands of England (*see BURMAH and CHINA*).

In December a new set of instructions, based upon the following rules, was approved by the Admiralty for the guidance of commanders-in-chief and commanding officers of her Majesty's ships, and was to be issued in the place of the "suspended" Admiralty circular:

When any person professing or appearing to be a fugitive slave seeks admission to one of her Majesty's ships on the high-seas, beyond the limit of territorial waters, and claims the protection of the British flag, the commanding officer is to bear in mind that, although her Majesty's Government is desirous by every means in its power to remove or mitigate the evils of slavery, yet her Majesty's ships are not intended for the reception of persons other than their officers and crew. A commanding officer is, therefore, to satisfy himself before receiving the fugitive on board that there is sufficient reason in the particular case for thus receiving him. In any case in which, for reasons that may be deemed adequate, a commanding officer shall have received a fugitive slave on board one of her Majesty's ships, and have taken him under the protection of the British flag upon the high-seas beyond the limit of territorial waters, he may be retained on board the ship, if he so desires, until he can be landed in some country or transferred to some other ship where his liberty will be recognized and respected. Within the territorial waters of a foreign state, commanding officers of her Majesty's ships are bound by the comity of nations, while maintaining the proper exemption of their ships from local jurisdiction, not to allow them to become a shelter for those who would be chargeable with the violation of the law of the place. If, therefore, while one of her Majesty's ships is within the territorial waters of a state where slavery exists, a person professing or appearing to be a fugitive slave seeks admission on board, the commanding officer is not empowered to receive him unless his life would be in manifest danger if he were not admitted into the ship. Should such a person be received in order to save him from danger, he ought not to be permitted to continue on board after the danger is passed. But commanding officers are not to entertain any demand for the surrender of such person, or enter into any examination as to his status. If, while any of her Majesty's ships are within the territorial waters of any chief or state in Arabia, or on the shores of the Persian Gulf, or on

the East Coast of Africa, or in any island lying off Arabia, or off Zanzibar, Madagascar, and the Comoro Islands, any person should claim admission on board, and protection, on the ground that he has been kept in a state of slavery contrary to treaties existing between Great Britain and such territory, he may be retained until the truth of his statement is examined into. In making this examination it is suggested that the nearest British consular authority should be communicated with, and special reports are always to be made of fugitive slaves seeking refuge on board any of her Majesty's ships.

This new fugitive-slave circular caused great dissatisfaction. The Antislavery Society and the Birmingham Liberal Association issued an emphatic protest against it. The latter society stigmatized the circular "as opposed to human freedom and English feeling, and as disgraceful to the nation." The *Times*, the *Post*, the *Daily News*, and the *Standard*, agreed in severely condemning the circular.

In July a great damage was caused by the sudden overflow of the river Nene. Four thousand acres of grazing-land were flooded between Edrith and Denburgh, and 3,000 cattle were deprived of pasturage. The water was three and four feet deep on 4,000 acres of land near Whittlesey. No such flood had been seen in that section of the country for fifty years. In October and November great floods occurred in Devonshire; Torquay, Teignmouth, and Dawlish, were flooded, and much damage was done to property. A district of Bristol, with a population of 6,000 souls, was declared by the sanitary authorities unfit for habitation until midsummer. In the valley of the Trent large tracts of land were expected to remain under water throughout the winter. The floods were particularly disastrous at Darlington, in Durham, where the gas-works were flooded, and the town consequently left in total darkness. At Rotherham, in Yorkshire, 2,000 people were thrown out of employment because of the flooding at the factories.

On December 17th the Earl of Derby was formally installed as Rector of the University of Edinburgh, and delivered his inaugural address. In the evening he made a speech before the Workingmen's Conservative Association, in the course of which he alluded to England's relations with Egypt. He denied that the Suez Canal purchase signified a reversal of England's policy on the Eastern question, and disclaimed any desire on the part of the Government to establish a protectorate over Egypt. He declared that the only object of the Government was to obtain additional security and uninterrupted access to India.

The centenary of the birthday of O'Connell was celebrated at Dublin, on August 5th and the following days, with great festivities. The exclusive character of the invitation widened, however, the split already existing between the Irish Home-Rulers and the Catholic party. The former were especially indignant that even the most prominent of the Home-Rule members of the British Parliament, Dr. Isaac Butt, had not been invited to the festival.

GREECE,* a kingdom of Southeastern Europe. Reigning King, George I., King of the Hellenes, born December 24, 1845, second son of the reigning King of Denmark; elected King of the Hellenes by the National Assembly at Athens, March 18 (30), 1863; accepted the crown June 4, 1863; declared of age by a decree of the National Assembly, June 27, 1863; married October 27, 1867, to Olga, daughter of Grand-duke Constantine, of Russia, born August 22, 1851. Issue of the union are three sons and one daughter: Constantinos, Duke of Sparta, born August 2, 1868; George, born June 25, 1869; Alexandra, born August 30, 1870; and Nicholas, born February 2, 1872.

The area of the kingdom amounts to 19,353 square miles; the population, according to the census of 1870, to 1,457,894 persons.

In the budget for 1875 the revenue was estimated as follows (1 drachma = \$0.19):

	Drachmas.
1. Direct taxes:	
a. Land tax, tithe	10,815,000
b. Duty on cattle and pastures ..	1,645,000
c. Duty on beehives	40,000
d. Licenses	1,000,000
e. Taxes on edifices	700,000 — 14,300,000
2. Indirect taxes:	
a. Customs	11,600,000
b. Stamp	4,200,000
c. Miscellaneous	490,000 — 16,290,000
3. Produce of national property	8,309,000
4. Public service:	
a. Posts	700,000
b. Telegraphs	420,000
c. Printing-office	4,000 — 1,124,000
5. Sale of national property	2,600,000
6. Miscellaneous receipts	805,000
7. Ecclesiastical receipts	816,000
8. Arrears	1,110,000
Total revenue	89,644,000

The expenditures were estimated as follows:

	Drachmas.
1. Interest on foreign debt	1,258,000
Interest on internal debt	6,294,570
2. Pensions	8,179,000
3. Civil list	1,125,000
4. Salaries of deputies	400,000
5. Department of Finance	1,296,720
6. " Foreign Affairs	969,116
7. " Justice	2,944,607
8. " Interior	4,895,201
9. " Worship and Education	2,011,220
10. " War	7,880,500
11. " Marine	1,500,848
12. Costs of general administration	2,776,980
13. Miscellaneous expenditure	8,510,000
Total	89,791,512

The actual budgets of the kingdom differ, however, widely from the budget estimates. Since the establishment of Greece as an independent kingdom, there have been few financial terms without a deficit.

The foreign debt, according to Mollet (in "Reports by her Majesty's Secretaries of Embassy and Legation, 1875"), amounted, at the close of 1874, to 385,500,000 drachmas; the home debt, to 94,600,000; total debt, 430,100,000.

The army of the kingdom is formed by conscription, with the general privilege to procure

substitutes, which is done to a very large extent. The strength of the army on the peace footing was, according to the budget of 1875, 14,063 men with 720 horses.

The navy, in 1875, consisted of 2 iron-clad frigates, 1 royal yacht, 8 screw-steamers, and 10 sailing-vessels.

The general commerce, in 1873, was as follows, in drachmas:

COUNTRIES.	Imports.	Exports.
Great Britain	89,284,000	44,812,000
Turkey	20,215,000	6,260,000
Austria and Hungary	11,925,000	11,266,000
Russia	14,489,000	3,451,000
France	15,846,000	8,118,000
Italy	8,040,000	2,698,000
Other countries	7,856,000	5,248,000
Total, 1873 ..	117,685,000	76,858,000
" 1872	128,181,000	67,878,000
" 1871	108,586,000	76,882,000

The movement of shipping, in 1872 and 1873, is shown by the following table:

ENTERED AND CLEARED.	Year.	Vessels.	Tons.
<i>Entered.</i>			
Ocean navigation	1872	17,697	2,980,138
Coast	1872	85,747	8,508,596
<i>Cleared.</i>			
Ocean navigation	1873	16,624	2,882,162
Coast	1873	96,090	4,004,825

The merchant navy, on December 31, 1873, consisted of 5,001 vessels, of 239,135 tons; among them there were 16 steamers, of about 6,048 tons, and about 4,000 coasting-vessels.

Greece had, in 1875, only one railroad in operation. It connects Athens with the port of Piræus and Phalerits, was opened in 1869, and is 12 kilometres long (1 kilom. = 0.62 m.). In 1872 the railroad from the Piræus to Lamia, which is to be in length 220 kilometres, was begun, and a charter was granted for another road, which is to connect Athens with Kalamate, a distance of 275 kilometres. The aggregate length of the electric telegraph-lines is 1,600 kilometres; that of the wires, 1,800 kilometres.

The Greek Chamber was throughout January without a quorum, because the entire Opposition persisted * in its refusal to attend the meetings. On February 5th, the session expired. The Chambers were again convoked for March 17th, but the Opposition still adhered to its determination not to attend, and thus the Chamber continued to be left without a quorum. At length the President, Cassinati, of Cerigo, declared that, although the legal quorum of the entire Chamber (96) were not present, the Chamber was justified in proceeding to business, as several elections had formerly been declared invalid, and, if these were deducted, the constitutional quorum was present. The Chamber then ratified a treaty concluded with the German Empire relative to the excavations to be made by German scholars at

Olympia. It likewise ratified a new treaty concluded with the Laurion Mining Company, and, in April, was adjourned by the Government. The Opposition, which had remained absent to the close of the session, protested against the legality of the proceedings, and, when the King sanctioned the resolutions submitted to him by the ministry, they raised against them charges of violation of the Constitution and high-treason.

In order to calm the extraordinary excitement prevailing in the country, the King again tried the formation of a new cabinet. The Greek ambassador in Paris, Konduriotis, to whom the task was at first assigned, failed in his attempt, and the new cabinet was then formed under the presidency of C. Trikupis, one of the leaders of the ultra-Democratic party. Another leader of the same party, C. Lombardos, assumed the Ministry of Finance.

The new ministry issued a proclamation to the Hellenic people, announcing that the Constitution would be restored and would henceforth be faithfully respected. The most urgent laws, which admitted of no delay, would be provisionally issued by royal decree, but they would be submitted to the new Chamber for ratification. Immediately after its organization the new Chamber would be called upon to designate the members of a definite cabinet who would be acceptable both to the majority and to the King. A royal decree ordered the dissolution of the Chamber, and the holding of new elections on July 20th. The new Chamber was to meet on August 23d.

Very exciting rumors about this time not only agitated Greece, but produced a sensation throughout Europe. It was reported and very widely believed that the King was determined to resign, and that a regency would be appointed to govern the country during the minority of the heir-apparent to the throne, the young Duke of Sparta. The Russian Government was said to have sent to the Piræus three ships-of-war to take Queen Olga on board and bring her home. Part of these rumors was speedily contradicted, but it was generally admitted that the condition of Greece was most deplorable and that a severe crisis might be expected at almost any time. Since the failure of the Cretan insurrection, no foreign questions and hopes for a remodeling of the map of Europe and an extension of the limits of Greece have any longer diverted the attention of politicians from home matters, and, thus circumscribed by the narrow limits of a small kingdom, the parties have become more captious and intolerant than ever. The narrower the subject of controversy, the more fiercely it has been discussed, and the Opposition spies out with microscopic eye defects in every existing institution, in everything that the Government does or proposes to do. The nature of the Athenian politician renders administration almost impossible. The place-hunting of Greece makes that of every other country insignificant, and

the aspirants to office pursue one another with a ferocity which neither patriotic feeling nor the authority of the sovereign can restrain. One cabinet succeeds another only to be overthrown in its turn. The number of men who have held the highest offices is almost incredible; those who have been placemen of an inferior degree are not to be reckoned. The Chamber consists of 190 deputies, and is generally so divided as to make a majority hopeless. Five distinct parties are reckoned in it, and each of these sections has its chief or chiefs, and each aspires to rule. Each of them has had its turn at one time or another, and each has succumbed.

The new elections took place in July, without any pressure being brought to bear upon the electors by the cabinet. In the new Chamber, Kumunduros was believed to have 58 trustworthy adherents; Deligeorgis, 40; Zaimis, 30; Trikupis, 30; and Bulgaris, 17. The session of the new Chamber was opened by the King on August 23d. In the speech from the throne, the King promised that a new ministry would be formed from the ranks of the majority of the Chamber, that the Constitution would be conscientiously observed, the real estate taxes reorganized, and a military education provided for all citizens. The speech was well received by the country. The Chamber elected Kumunduros as President by 136 against 17 votes, a mark of confidence which induced the King to intrust to him the formation of a new ministry. Kumunduros had in the new ministry, in addition to the presidency, the Department of the Interior. The other members of the ministry were: Kondastapoulos, Minister of Foreign Affairs, in one of the former cabinets Minister of Justice; Colonel Karaiskakis, son of one of the leaders in the War of Independence, Minister of War; Airerino, Minister of the Navy; Papazafropoulos, Minister of Justice; Milissi, Minister of Public Worship; Sotoripoulos, Minister of Finance. The new premier, in the name of the ministry, fully explained his plan of government, and announced bills for employing the monastic property for the establishment of agricultural banks, for introducing a landwehr, for improving the electoral law, and for making the ministers responsible. The new President of the Chamber, Zaimis, assured the ministry that it would be strongly supported by the representatives of the people. In November the Chamber resolved to impeach all the members of the cabinet of Bulgaris for violating the Constitution. Two of the members, Valassapoulos and Nikolopoulos, were moreover charged with having accepted bribes at the appointment of three bishops of the state Church, and Delyannis, the Minister of Foreign Affairs, with having appointed ambassadors for whom the budget had not made any appropriations. Of the laws passed by the former Chamber during the absence of the Opposition, twenty-one were declared to be invalid on the ground that

no quorum had been present when they were passed. The treaty with Germany relative to the excavations in Olympia was again sanctioned. The three bishops who had been appointed by the cabinet of Bulgaria were likewise impeached. The chronic disagreement between ministry and Chamber again showed itself in December, when Deligeorgis violently opposed the appropriation demanded for the

foreign ambassadors and their secretaries. The prime-minister threatened to resign if the Chamber should refuse to make the demanded appropriations, and the Chamber took sides with him by acknowledging the necessity of maintaining ambassadors at Paris, London, and St. Petersburg, and voting the appropriations. The vote was 98 yeas and 42 nays. The budget proposed for the coming year showed

GENERAL VIEW OF MODERN ATHENS (FROM A RECENT PHOTOGRAPH).

a deficit of 2,000,000 drachmas. On December 15th the twelve members of the high court which is to try the impeached ministers were selected by lot.

The original Laurion* Company, which almost provoked an international conflict while working the surface of Laurion, had made an interesting discovery. The company had purchased the subsoil corresponding to that surface. This subsoil, which was not explored, or, at least, not avowedly so, remained unworked and unknown. The company having sold only the surface to their successors, an engineer was directed by the old company to examine this subsoil. He set himself to search for all the wells now filled up which had served in ancient times for the working of the mines, and discovered a certain number. He examined some of them, and was greatly surprised to find in the centre of the tract, in one of the mines which seemed abandoned for ages, the miners' tools leaning against the walls, small

heaps of minerals ranged behind each tool, the mine, in short, in the very state the Greeks—surprised, doubtless, by some unexpected attack—had left it. The mine or mines were not abandoned, therefore, on account of their being exhausted; excavations were made, and immense horizontal layers of silver, lead, and calamine were found, all of incalculable richness. Operations were immediately arranged. A third company, with a capital of £500,000, has since been formed by the efforts of the original *concessionnaires*.

The Government has introduced the study of the Turkish language into all the gymnasia of the country.

The Turkish ambassador in Athens, in March, reminded the Greek Government of an old debt. Forty years ago the Government of Greece promised to pay to the Greek Patriarch of Constantinople a certain sum, for releasing the Church of Greece from his jurisdiction, and recognizing the Holy Synod. This sum has never yet been paid.

No sympathy was felt by the Greeks with

*See ANNUAL CYCLOPEDIA for 1872 and 1873, article GREECE.

the insurrection of the Christians in European Turkey.

The appointment of a Roman Catholic archbishop for Athens by the Pope created great dissatisfaction, and the Government refused to sanction the appointment, on the ground that the Minister of Public Worship should have been consulted in such a matter.

A convention was concluded on April 25, 1874, between the Governments of Greece and Germany, by which the latter was authorized to undertake excavations at Olympia. According to the articles of the convention, all the objects that may be found will be the property of Greece, but Germany, which defrays all the expenses of the excavations, has for five years the exclusive right of taking copies and imitations of all the works of art that may be found. The results of the excavations will be published in Germany in the German language, and at Athens in Greek. After the sanction of the convention by the Greek Chamber, in 1875, the excavations began on October 4, 1875, and early in January, 1876, Prof. Curtius and the architect Adler published the first account, embracing the important discoveries which had been made from October 4 to December 31, 1875.

GREEK CHURCH. The population connected with the Oriental Greek Church of Russia was in 1871, according to the "Statistical Year-book of the Russian Empire" (vol. ii., 1871), about 58,000,000, divided as follows: European Russia, 53,189,000; Poland, 30,000; Caucasus, 1,930,000; Siberia, 2,875,000; Central Asia, 131,000; Finland, 34,000. Turkey numbers about 12,000,000 inhabitants belonging to the Greek Church, of whom 4,275,000 belong to Roumania, and 1,295,000 to Servia; Austria, according to the census of 1869, 8,050,000; the kingdom of Greece, 1,440,000; Montenegro, 125,000; Germany, about 3,000.

All sections of the Greek Church take a profound interest in the union movements which for some time have been going on between the Eastern, Old Catholic, and Anglican Churches. A Russian theologian, who, as a prominent representative of the Greek Church, took part in the Union Conferences held at Bonn, stated in a letter, addressed to a Greek theologian, very clearly the negotiations which have thus far taken place between the Greek and Old Catholic theologians, and the present condition of the question so far as the Greek Church is concerned. As the movement is still progressing, and one of the prominent ecclesiastical questions of the day, the letter of the Russian theologian, which has been received by the organs of the Greek Church with general approval, will be useful for reference. It is as follows:

DEAR SIR: In compliance with the request which you have done me the honor to make, I hasten to give you some information touching our relations with the Old Catholics.

Immediately after the Old Catholic Congress (the second) held at Cologne, in 1872, a committee of the most learned of the Old Catholics, under the chair-

manship of Dr. Von Schulte, laid down the bases on which might be arranged, in the future, unity between the Old Catholics and the Orthodox. These bases were accepted by us (who took part in the discussion), and by the Anglicans. They are as follows:

1. We believe that Jesus Christ is our Lord and Saviour, the only-begotten Son of God, and the God-Man.

2. We believe in one Church founded by Him.

3. The criterion of Christian truth is *quod semper, quod ubique, quod ab omnibus creditum est*. The sources of information as to the teaching, the worship, and the discipline of the divinely-founded Church are the following: (a) The Holy Scriptures; (b) The writings of the Fathers of the Church; (c) The decrees of the Œcumenical Councils.

4. In the discussions and investigations the historical method should be followed as the only one which is safe and entirely impartial.

The orthodoxy of these bases is, I suppose, undoubted, and in all that we have done we have had that in view.

The dogmatic differences are as to the following questions:

1. Concerning the Church and its Head.

2. Concerning the Holy Ghost.

3. Concerning the Holy Virgin Mary.

4. Concerning God's Works.

5. Concerning Sin.

6. Concerning the condition of the Soul after death.

The Canonical and disciplinary differences are as to the following questions:

1. Concerning the Creed.

2. Concerning the Sacrament of Baptism.

3. Concerning the Sacrament of Confirmation.

4. Concerning the Sacrament of the Eucharist.

5. Concerning the Sacrament of Penance.

6. Concerning the Sacrament of Marriage.

7. Concerning the Sacrament of Extreme Unction.

Dr. Langen, as chairman of the Committee for Union with the Eastern Orthodox Church, sent to us, in the name of the committee, a very careful reply concerning each of the points in debate. This reply, although expressing a sincere desire for the attainment of unity, was, nevertheless, very cautiously expressed, especially upon two of the more important questions, of the *Filioque*, and concerning the authority of the Pope of Rome. It was very evident that the ideas of the Old Catholics were much in advance of what they were at the time of the Congress at Munich, when it was proposed to take a stand upon the Decree of the Council of Trent.

At the Conference at Bonn, in 1874, another step was taken—a step most important for the truth, and toward mutual understanding. The Old Catholics made concessions, more or less important, as to all the points of difference, with an independence of spirit doing credit alike to their understanding and their character.

DOGMATIC QUESTIONS.—1. Concerning the Church and its Head.

This question is divisible into two parts—the first, concerning the discipline of the Church, and the position of the Bishop of Rome, to whom had been assigned an honorable precedence (*primus inter pares*). Concerning this first point, the Old Catholics said that they were unable to make a dogmatic definition, and for this reason, especially, that this question still excites very lively discussion among the Old Catholics themselves.

This answer states that some explanations are needful; let us compare it with the answer which was given in 1874, by the Committee on Unity, of which Dr. Langen is chairman. This said in its answer that, although they denied the infallibility of the Pope, the committee thought that, as *primus inter pares*, a certain precedence belonged to the Pope, similar to that enjoyed by any one who presided over a gathering of equals. This point, in accordance with a suggestion of Dr. Dollinger, was not discussed,

but will come up for discussion at the next Conference.

The second part of this question, "The Universal Church only, lawfully represented by her Bishops, is the Infallible Keeper of the Faith," was received by the Old Catholics without any hesitation.

It is very evident that this last is the more important of the two. The clear and distinct way in which the Old Catholics expressed themselves concerning it places an impassable gulf between their teaching and that of the Ultramontanes. But, indeed, they could not do otherwise, for the very starting-point of the Old Catholic movement was the decreeing of the Pope's infallibility. The reason whereby some of the Old Catholics show an indisposition to accept simply and clearly the Orthodox theory is, that some of them (e. g., the revered Michaelis) think that to have on earth a Visible Centre of Unity for the Church is a desirable and useful thing.

2. The question concerning the Procession of the Holy Ghost was likewise deferred to the approaching Conference. This question is, evidently, the most difficult of all that divide us from the Old Catholics. In regard to this question, as well as to others, the Old Catholics made most important concessions to the true doctrine. As with the last question, so is it with this, that it has two sides, namely, the material question concerning the Procession of the Holy Ghost (the doctrine of the *Filioque*), and the other touching the insertion of the *Filioque* in the Creed. To this latter we shall come presently in studying the canonical questions. The former question was deferred to the next Conference. A dogmatic definition as to this will not be easy, but, in regard to this point, the Old Catholics made a most important declaration, namely, that they did not consider the doctrine of the *Filioque* as of essential importance, or hold that it was necessary to salvation for one to believe it.

It is very evident that the teaching of the *Filioque*, even as a pious opinion, has no *raison d'être*. It is indisputable, however, that this way of presenting the doctrine is a great help toward coming to an understanding, when we consider this, also, that the Old Catholics do not mean, in any way, to interfere, through the *Filioque*, with the teaching of the oneness of the source of Deity (*Fons Deitatis*), which is God the Father. This was asserted in the most distinct manner. In private conversation with the Old Catholics, they brought forward the pious opinions of the Fathers of the Church (St. Epiphanius, St. Cyril, St. Augustine) of the ages before the Great Schism. We shall come to the question as to the Creed further on.

3. The dogma of the Immaculate Conception is rejected by the Old Catholics.

4-5. The doctrine concerning Good Works was satisfactorily expressed by the Old Catholics, who excluded from it everything which could displease the Orthodox, viz., whatever had any relation to the Ultramontane theory of indulgences, to the *thesaurus meritorum*, and to works of supererogation.

6. The doctrine concerning the temporary condition of souls after death was not formulated in our statement with sufficient precision to form the basis for discussion, but the Old Catholics declared that since they rejected the doctrine of forgiveness obtained after death, etc., they considered that the doctrine concerning the condition of souls after death could give no ground for dissension between the two Churches.

CANONICAL AND DISCIPLINARY DIFFERENCES. 1. Concerning the Creed.—The insertion of the *Filioque* was declared to be uncanonical, and the Old Catholics even spoke of removing the words from the Creed. It is noticeable, however, that their reason for so doing was, not the incorrectness of the doctrine, all question as to this being adjourned to a future discussion, but because it was uncanonical to insert these words in the Creed. "We have," said

Dollinger, "no objection, in principle, to the removal of the *Filioque*." But the Anglicans did not see fit to agree with this proposition. The agreement attained was not as to the main point, for the doctrine was kept out of discussion, but an acknowledgment of the uncanonicity of the insertion of the *Filioque* was a most important step toward reconciliation and the unity of the Church.

2. *Baptism*.—The Old Catholics declared that the manner of administering this Sacrament in the Eastern Church was more ancient than the mode of sprinkling, which the Western Church employs, agreeing better with the signification of the Greek word *baptismos*. They thought, however, that such difference of rite ought to be no longer a cause of division between the Churches, or an occasion of strife.

3. *Confirmation*.—The Old Catholics declared that this Sacrament could be administered, not only by a bishop, but also by a priest, according to the Eastern usage. They also said that, while the Eastern custom of administering Confirmation to children at the same time with Baptism was more ancient than the Western usage, there were important reasons in favor of the latter, and that, in any event, a change in this matter would be difficult to bring about.

4. *The Eucharist*.—The question concerning the Sacrament of the Eucharist was divided in our statement into four heads:

(a.) *The Western custom of using unleavened bread*.—The Old Catholics said that the Western Church did not think this custom indispensable.

(b.) *The Invocation of the Holy Spirit*.—The Old Catholics stated that they thought that opinion most correct according to which, in order to the Act of Consecration being performed in its full integrity, there should be a prayer of invocation; that, moreover, in the Western liturgy there was such a prayer; that the difference between the two Churches sprang up while they were yet united.

(c.) *The Communion in both kinds*.—The Old Catholics showed themselves well disposed toward having the Communion in both kinds, considering it only a question of time.

(d.) *Infant Communion*.—The Old Catholics stated that, in regard to this question, they must repeat what was said as to Confirmation, that the Western custom began at a very early period, that in neither case did it give ground for division; but that it should be allowed.

5. *Penance*.—The Old Catholics consider this question fully explained by what they say concerning the state of the soul after death, concerning sin, concerning good works (the Ultramontane theory of indulgences, of works of supererogation, and of the *thesaurus meritorum*).

6. *Concerning Clerical Celibacy*.—The Old Catholics showed the greatest reserve in discussing this point. The absurdity of enforced celibacy was evident, and fully confessed; consequently, the partial difference of opinion here cannot be explained, except from the fear lest their enemies might make of this question a weapon of attack, and explain away the whole movement of the Old Catholics by saying that the leaders had gone into this movement simply to get rid of compulsory celibacy. It is known that the Ultramontanes often resort to such measures.

7. *Unction*.—The Old Catholics declared that they held that Unction could be performed not only for a dying person, but for others who were ill. They suppose that the consecration of the anointing oil by a bishop, according to the Western custom, gave no ground for a separation between the Churches.

All the above-mentioned differences were mentioned at the sixth session of the Bonn Conference, and discussed between the Orthodox and the Old Catholics; but besides these, in the earlier sessions of the Conference, in the discussions between the Orthodox and the Anglicans, many questions were settled according to the Orthodox opinion, on which

the Eastern and Western Churches had been at disagreement, hitherto. Among others, it was declared that the liturgy ought to be celebrated in a language understood by the people; that the reading of the Scriptures in the vulgar tongue ought not to be forbidden, and that no translation of the Scriptures could have greater authority than the original. (Those who made this latter decision had in view the Vulgate translation.)

At the Union Conference held at Bonn, in August, 1875, the Greek Church was more numerously and more prominently represented than at the Conference of 1874. The Patriarch of Constantinople, in compliance with an invitation from Dr. Dollinger, not only appointed several theologians to represent the Patriarchal Church, but his official paper, the *Neologos*, of Constantinople, expressed the hope that the project of uniting the Episcopal churches of Christendom would be successfully accomplished. In an elaborate article on the history of the Old Catholics this paper says :

The period for the unity of the church is, at last, arrived. The fanaticism of worldly power caused the separation; its abuses have caused the different peoples to draw near to each other through knowledge and science, and the common canons of logic and ethics.

Very remarkable are the patience, the care, and the promptitude, displayed by the Old Catholics in organizing their new, independent and autocephalic church, while, at the same time, they do not cease laboring, through the power of true learning and of kindly tact, for the unity of their Church with the rest of Christendom; but still more remarkable is the readiness with which the other churches accept the invitation of the Old Catholics, with which they greet the beginning of unity. We say advisedly, the "other churches," for no political or ecclesiastical authority has in any way opposed this manifest tendency toward unity in which the most distinguished theologians and professors share. This unity will be brought about by the spirit of peace and Christian brotherhood; and not at all by that of damnation and of worldly interests.

Among the prominent representatives of the Oriental churches were Archbishop Lyourgios, of Syra and Tenos, for many years the most prominent leader of the union movement in the Eastern churches; two archbishops of Roumania, Archpriest Yanishev and Prof. Ossinin, of Russia, who have taken an active part in all the previous assemblies of the German Old Catholics; Prof. Damalas and Prof. Rhossis, of Athens, both distinguished as theological scholars. After long and animated discussions it was found possible to frame in regard to the dogmatical questions, which have so long divided the Eastern and Western Christian Churches, several resolutions so worded that the representatives of the Greek could accept them as well as the Anglicans and Old Catholics. (*See OLD CATHOLICS.*) It was understood that the resolutions agreed to would be submitted to the Patriarch of Constantinople and his Council and to the Holy Synods of Russia and Greece. At the meeting of the Synod of the Roumanian Church which met at Bucharest on November 27th, the two Roumanian bishops who had attended the Conference

gave a full account of the proceedings. At the close of their report they moved that the Synod cause a Roumanian translation to be prepared of the German pamphlet, containing a *verbatim* account of all the transactions of the Conference, in order to give to all members of the Church an opportunity to become familiar with the important union movement. The bishops say :

The participation of the Roumanian Church, in a work of so high a moral importance as a union of churches which for centuries had been separated would be, is the greatest consolation and the greatest joy for every true Christian. This work will also elevate our national dignity, for by taking part conjointly with the other autocephalous orthodox churches in a question of so great an importance for Christian civilization, the Roumanian Church rises to the rank which belongs to it in the Christian world and in the spiritual life of the Church. It is, therefore, our opinion that the Holy Synod should authorize his Holiness the Metropolitan Primas and President of the Holy Synod to come to an understanding with the authorities of the other orthodox churches on the steps which the Roumanian Church should take in behalf of a reunion of the Christian Church.

The Greek Church of Turkey continues to be greatly distracted by the disputes between the Slavic and the Hellenic races. The last annual report of Count Tolstoy, the chief procurator of the Holy Synod of St. Petersburg, expresses the views which the Government of Russia entertains in regard to recent difficulties in the Patriarchate of Jerusalem. Count Tolstoy says :

The Greco-Bulgarian difficulty was, even in 1873, upon the close of the Council of Constantinople, sadly reflected in the condition of the Patriarchate of Jerusalem. The courageous prelate who presided over the Church in Palestine, the most blessed Cyril, after having occupied that Patriarchal See with honor for twenty-seven years, through his dissent from the decision of that Council in the Bulgarian affair, incurred the enmity of the Greek clergy, both at Constantinople and in his own patriarchate. Considered for this as a traitor to Greek nationality, he was condemned and driven from his patriarchal throne, to the great grief of that part of his flock (forming the majority of it) which belonged to the Arab race, and which had a great esteem for the character of a true archpastor, free from national prejudice, and watchful over the moral and the material interest of his flock, without stopping to consider to what race they belonged. In the place of the most blessed Cyril, there was raised to the patriarchal throne of the Church at Jerusalem the Archbishop of Gaza, the Most Reverend Procopius. The new patriarch, in January of the past year, sent to the Holy Synod a letter telling of the deposition of the most blessed Cyril, and of his own accession to the Patriarchal throne. As the deposition of the late Patriarch, and the accession to the See of the Most Reverend Procopius, was the work of the Greek party only, and as this was in immediate connection with the Council at Constantinople, in regard to which the Holy Synod has delayed to express its judgment, the above-mentioned letter of Procopius has been left, by the Synod, unanswered, and the rather so for this reason, that, in his letter, the facts relative to the change in the Patriarchate of Jerusalem were stated, by the new Patriarch, partially and superficially. Guided by the dictates of justice, our Holy Synod in its response would have been compelled to express itself to the Jerusa-

lem Church, according to a true judgment of facts, in reference to the motives which had to do with the change in the patriarchate. But this could hardly be of service amid the quarrels and agitations in the Patriarchate arising from the deposition of the most blessed Cyril. Such has been the motive for our delay to send an answer to the letter of Procopius, an answer which would inevitably involve an exposure of injustice. And so has been given a new proof of our love of peace with regard to the Eastern Churches in communion with us.

Patriarch Procopius gave in his resignation early in 1875, and the "Holy and Sacred Synod of the Holy Apostolic and Patriarchal Throne of Jerusalem, and the representation of the Orthodox people," chose as his successor Hierotheus, a Greek priest of Smyrna. The new Patriarch addressed, as usual on such occasions, to the heads of the other autocephalous Churches of the Greek communion, an "Eiren-ic Epistle," in which he notified them of his election, and alluded to the needs of his Church and the trials of his position. The *Neologos*, of Constantinople, the organ of the Patriarch of Constantinople, thus refers to the new Patriarch, and the conflicts between Slavism and Hellenism:

The evident struggle of Slavism, and its tools of different races, is, systematically, toward acquiring the ecclesiastical sceptre over the Eastern people. Many evidences of this have been seen at various times at Constantinople, at Jerusalem, Antioch, and wherever else that Hellenism, that prototype and guard of pure Christianity, lives and moves and has its being. The evidence of this is set down in so enduring colors as to bear witness to the latest generation that Caesarism, with all its dread power in things earthly, can never avail to subdue minds inspired by true devotion and free understanding.

The present most blessed Patriarch of Jerusalem, Hierotheus, has been neither a candidate, nor a friend, nor a tool, of Slavic policy, as was Cyril, who was deposed by his Synod. It is known that the revenues by which the Church in Palestine has kept up its various institutions come from property, which for three years past has been in possession of the Russian Government. The want and the hunger to which the Church of the Holy Land has thus been condemned, greatly aid the destructive work of those who are enemies to it and to orthodoxy. To the starving soldiers of the faith they show the silver-headed spears, and, as Satan did to Jesus in the same city, tempting through a glittering display, they show to them the gold of Bessarabia, if they will only fall down and worship the deposed and schismatic Cyril, and with humble and contrite heart ask his forgiveness. And these inimical plots after a leadership have succeeded in persuading a sister Church, if report speaks truly, to advise the standing garrison of the Church in Jerusalem to yield to the demands of its enemies, not on the ground of right, but of expediency, not according to the sacred canons of the orthodox faith, but according to the rule of financial prudence.

The reports of the chief-procurator of the Holy Synod of St. Petersburg, Count Tolstoy, are one of the most valuable sources of information for the recent history of the state Church of Russia. The report published in 1875 treats of the condition of the Russian Church during the year 1873. We learn from this report that the missionary activity of the Church among the pagan tribes of Russia is

actively pursued, but thus far without notable result. A Russian bishop who, in 1872, visited a congregation of Chinese immigrants in Siberia, found that many of the converts were Christians only by name, and in their customs and religious life continued to adhere to paganism. Count Tolstoy reports that the reform of the "Ecclesiastical Academies" (theological faculties) has now been carried through; that 37 of the ecclesiastical seminaries, and 138 of the lower ecclesiastical schools, had been thoroughly reformed by the end of 1873. Among the theological works published in the course of 1873, there are specially mentioned the seventh volume of the "History of the Russian Church," by Archbishop Macarius, of Lithuania (containing the history of the fifteenth and sixteenth centuries); a "History of the Russian Translation of the Bible," by Prof. Tchistovitch; and a "History of the Return of the United Greeks in Western Russia to the Orthodox Church," by Prof. Kojalovitch. Of the new Russian translation of the Bible which has been begun by order of the Holy Synod, the books of Ezekiel, Daniel, and the Maccabees, appeared in 1873. The ukase of 1869, which orders the improvement of the material condition of the clergy, and therefore a reduction of their number, was gradually carried out. In 1873 the number of congregations in eighteen governments was reduced from 9,810 to 7,818, and the number of clerics was reduced by 14,701, leaving 11,431 priests, 179 deacons, and 12,511 psalmists (the priests with salaries ranging from 500 to 700 rubles, and the psalmists with salaries from 144 to 180 rubles). A project for reforming the ecclesiastical courts has been submitted to the bishops and consistories, to obtain their opinions, before the Holy Synod will enter into its discussion.

The Missionary Society in the Russian Church, founded by and under the presidency of Innocent, for many years Bishop of Kamtchatka, and now Metropolitan of Moscow, appears to make great progress, and to awaken a considerable interest in the missionary cause. The society publishes a weekly paper, called *The Missionary*.

The United Greek Church in Poland, which in 1871 numbered a population of 229,000, is now nearly extinct, the immense majority having in the course of the years 1874 and 1875 renounced the communion with Rome, and joined the Orthodox state Church of Russia. In May, 1875, there were only 22 parishes in the government of Siedlce, with 22 priests and 25,000 persons, and 1 parish, with 1 priest and 2,000 people, in the government of Warsaw, which still adhered to the United Church. A number of priests, who refused to join the Russian Church, emigrated to Galicia. Roman Catholic accounts represent this change of religion as one which the Russian officials forced, by acts of unparalleled cruelty, upon a reluctant population.

The Metropolitan and Primate of the Rou-

manian Church, who was at the same time President of the Senate, died on May 17th. On June 12th the united members of the Synod, the Senate, and the Chamber of Deputies, elected the Metropolitan of Jassy, Kalinik, as "Primate of the Holy Orthodox Church of Roumania," and Metropolitan of Bucharest. The election was sanctioned by the prince.

The Church of Greece suffered a great loss by the death of the Archbishop of Syra. None of all the bishops of the Eastern Churches had taken so active a part in the movement for establishing close relations of friendship and intercommunion with the Anglican and Old Catholic Churches as this prelate.

The Government of Greece intends to adopt stringent measures against the clergy of the state Church and against the Church property. In December the ministry submitted to the Chambers a bill, providing for the abolition of all the convents, except five, which are to be designated by the Holy Synod. The proceeds of the sale of the convents and their property are to be devoted to the establishment of an agricultural bank at Athens. According to the statistical information which was on this occasion collected by the Government, there were in Greece, in 1875, 145 convents (of which only 7 were for females), with a total number of 1,728 monks and 145 nuns. The property of the convents yields an annual revenue of 1,617,157 drachmas, and they owe an aggregate debt of 224,348 drachmas.

The Greek Church of Austria received, by the establishment of a university at Czernovitz, for the first time, a theological faculty in connection with a complete university.

GREEN, General DUFF, died in Dalton, Ga., June 10, 1875. General Green was an influential politician and editor during General Jackson's Administration. As early as 1801 he published in Baltimore a journal called *The Merchant*. He was at one time well known throughout the country, and his name appeared almost daily in connection with political intelligence. For ten years past he had devoted his attention to the subject of the regulation of labor and capital.

GUATEMALA (REPÚBLICA DE GUATEMALA), one of the five independent states of Central America, comprised between latitude 13° 50' and 18° 15' north, and longitude 88° 14' and 93° 12' west; and bounded on the north by the Mexican State of Chiapas; on the east by Balize, or British Honduras, and the Caribbean Sea; on the south by the republics of Honduras and San Salvador; and on the southwest by the Pacific Ocean.

There is nothing lacking in the geographical position of Guatemala to render it, with its extensive seaboard on both oceans and one good port on each, one of the most prosperous states south of Mexico.

Mexico has not renounced her claim to the district of Peten, bordering upon her territory, and the inhabitants of which, immediately

after the establishment of Central American independence, expressed the desire to remain under the Mexican Government. An extensive exchange of diplomatic correspondence upon this subject took place in the course of the past year, and the question of right to the district was discussed at some length in the journals of the Mexican capital. The territory of Guatemala is divided into the twenty departments of Guatemala, Amatitlan, Esquintla, Zacatepeque, Chimaltenango, Sololá, Quiché, Totonicapan, Quezaltenango, San Marcos, Suchitepequez, Huehuetenango, Vera Paz, Santa Rosa, Jutiapa, Jalapa, Zacapa, Chiquimula, Izabal, and Totonicapan, with an area of 40,777 square miles, and has an estimated population of 1,200,000. Of these not more than 20,000 are whites (natives), mainly descended from the early Spanish colonists; the number of foreigners of all nationalities is computed at about 2,000; there are 750,000 pure-blooded Indians; 420,000 *ladinos* or mestizoes (from whites and Indians); and the remainder are negroes.

In a non-official statistical report published in 1875, the population of the department of Sololá was set down at 80,000, and that of the town of Sololá, capital of the department, at 15,000. Its area was given at 700 square miles, and within its limits are comprised 26 coffee and 19 sugar estates. This department, one of the most prosperous in the country, has a number of cotton and woolen factories, and 35 public schools. The capital, Guatemala, has a population of 45,000.

The President of the Republic is Lieutenant-General Rufino Barrios, elected on May 7, 1873. The Minister of the Interior and of Finance is Señor F. Alburez; of War and of Public Works, Señor J. M. Samayoa; and of Foreign Affairs and of Public Instruction, Señor M. A. Soto.

The standing army is composed of 3,200 men; besides which there is a militia 13,000 strong.

The following tables exhibit the amount and various sources of the national revenue for 1874, and the branches and amount of the expenditure for the same year:

REVENUE.	
Balance from 1873.....	\$12,200
Import duties.....	959,100
Yield of frontier custom-houses.....	14,600
Export duties.....	70,000
Tonnage dues.....	2,800
Spirit-tax.....	678,000
Slaughter-house tax.....	62,700
Mill-tax.....	52,500
General duties.....	84,500
Communal duties.....	70,800
Sugar-plantation tax.....	54,100
For exemption from military service.....	34,500
Paper-stamp.....	5,700
Post-office.....	5,000
Fines, confiscations, etc.....	4,000
Sale of public land.....	58,200
National bank (account current).....	58,400
Mint.....	14,700
Receipts extraordinary.....	401,900
Sundries.....	
Total.....	\$3,601,000

EXPENDITURE.

Army.....	\$1,008,800
Civil administration.....	280,500
Pensions.....	14,000
Public instruction.....	64,800
Public works.....	5,200
Public worship.....	84,800
Foreign affairs.....	10,800
Subsidies.....	16,400
Expenditures extraordinary.....	70,800
Premium on exports.....	1,900
Municipal subsidies.....	85,800
Hospitals.....	12,400
Mint.....	71,800
Post-office, stamps, etc.....	6,000
Indemnities.....	6,500
Public debt:	
Interest.....	\$208,000
Installments on capital.....	817,100
Reimbursements of advances.....	15,000
Reimbursements of deposits.....	930,700
Sundries.....	184,900
Total.....	\$2,542,600

From the foregoing table it is to be observed that, although the revenue was \$14,677 less than in the year 1873, the expenditure amounted to \$60,938 less than in 1873, thus constituting a surplus of \$58,400 in 1874. A like prosperous state of the finances will probably be recorded for 1875, judging from the relation between the revenue and the expenditure in some of the early months of that year: in February, for instance, the income reached \$376,045.51, while the expenditure did not exceed \$119,510.

A non-official report of the Treasury Department gave the revenue for 1874 at \$3,877,-884.18.

In the same report the duties on exports and imports by sea, tonnage dues, etc., appeared as in the following table, for the years therein expressed:

Years.	Amounts.
1868.....	\$470,971 88
1869.....	467,997 74
1870.....	636,115 87
1871.....	688,782 85
1872.....	888,102 99
1873.....	738,418 60
1874.....	1,106,844 08½

The national debt, which on July 31, 1874, amounted to \$4,119,784.92, stood on the 31st of August of the same year at \$4,092,987.10, having been reduced, in the space of one month, \$26,797.82; and by December 31, 1874, it had been further reduced to \$3,877,384, thus showing a diminution of nearly \$250,000 in less than half a year.

The Guatemala press, in congratulating the people on the continued peace enjoyed by the country for two years (a happy anomaly for Central America), warmly eulogized the wise management of financial affairs by which the Government had at last raised the nation's credit to the highest standing, both at home and abroad.

Nor was the British press less warm in its encomiums upon this new and satisfactory order of things, as appears from the following extract from the report of the council of foreign bondholders on Spanish-American states, published in London in 1875:

This republic (Guatemala) has discharged her obligations to the foreign creditors with increasing regularity during the past year, and there is now every prospect of punctuality in the future.

The council called attention in their last annual report to the much-needed railway from the port of San José to the capital. As soon as strict punctuality in the payments of the loan is established, there would probably be no difficulty in raising funds for that important undertaking.

Mr. Corbett, who acted as agent of the bondholders, having permanently left Guatemala, the council will appoint another agent in his place, subject to confirmation by the contractors, in accordance with the terms of the general bond.

The total value of the imports for the year 1873 was \$2,364,000; and in 1874, \$2,574,165, of which \$2,435,108 through the southern or Pacific ports.

The value and destination of the exports for the year 1873 are set forth in the subjoined table:

COUNTRIES.	Values.
United States.....	\$1,235,000
Germany.....	855,000
Great Britain.....	659,000
France.....	819,000
Other countries.....	802,000
Total.....	\$3,370,000

The quantity of coffee exported in the same year was 15,050,700 lbs., of the value of \$2,-408,100; cochineal, 1,107,481 lbs., value \$498,-866; India-rubber, 360,800 lbs., value \$156,-125; skins of the value of \$99,915; indigo of the value of \$37,293; and wool, etc., of the value of \$58,382. The largest imports are from Great Britain; while the largest exports are to the United States.

From three to five steamers (mainly of the Pacific Steam Navigation Company, plying between Panama and San Francisco) touch at the Pacific ports of Guatemala monthly; and there were entered at the port of San José, in 1873, 29 sailing-vessels—9 being German, 8 American (United States flag), 2 British, etc.

The city of Guatemala is now connected by telegraph with the department of Quiché; and the wires are to be extended to Mita, Chiquimula and Zacapa, and, in course of time, as far as Izabal.

A complete apparatus for the manufacture of gas had been received at the port of San José.

Indeed, it would appear that the republic has fairly entered upon the career of progress. Good roads, the want of which has been so sensibly felt, as exercising a retarding influence upon the development of the material resources of this as well as of all the other Spanish-American countries, are in course of preparation; no less than 1,000 men having been employed on the road leading from Guatemala northward, with the determination on the part of the Government to increase that number to 2,000. By virtue of a recent decree, every adult in the republic is to work three days in repairing the highways, or find a suitable substitute.

An aqueduct, to supply Champerico with water, was soon to be built.

Public instruction still continues to be energetically extended; schools are fast multiplying in every portion of the republic; and neither labor nor expense is spared in removing any obstacles which may yet stand in the way of the adequate education of the masses.

It has already been stated that Sololá has 85 public schools; it may here be added that Zacatepeque possesses 37 primary schools, and one night-school for adults, the aggregate attendance at all of them being 1,910. Vera Paz boasts of 34 schools, 7 of which are for females; and Santa Rosa has no less than 56, of which number 8 are for females. The total number of schools in the republic at the end of 1874 was 541, of which 183 were for females; and the aggregate attendance in both was 6,312. The reorganization of the university was seriously talked of.

Agriculture, in the mean time, participates in the general prosperity. Coffee and sugar plantations are becoming more numerous from year to year, and the crops of both of those commodities have doubled within the last few years.

The production of rice having been limited, owing to the lack of suitable machinery for cleaning it, four large machines have been introduced at Government expense.

Among the many articles sent to the Chilian Exposition were cotton, sarsaparilla, vanilla, hats, beer, and stuffed birds. Cotton, though it grows well in the coast-regions, especially on the Atlantic side, is not yet cultivated in sufficient quantities for export; but the home consumption is pretty fairly supplied. The sarsaparilla-plant abounds on the banks of the Polochique and Motagua, and is the object of an active trade through all the northern ports, though the commodity generally goes in commerce under the name of Honduras. No small proportion of the vanilla is of spontaneous production, the beans being gathered from wild plants by the Indians in Vera Paz, who use it largely in beverages, the common other ingredients of which are chocolate and pimento. Sulphur is, of course, very plentiful in the immediate neighborhood of all the extinct volcanoes, and yet it is little used in the republic and still less exported. Some four or five species of palm-leaf are used in the manufacture of hats.

The manufacture of beer has become an industry of considerable importance; the English system of brewing has in general been adopted; and the beverage is reported to be productive of excellent effects, hygienic and moral, in the people.

The grapevine finds in many parts of the country a genial soil; and large vineyards are in process of plantation with shoots imported from California. The algalia-plant (*Hibiscus Abel moschus*), the seeds of which are so extensively used by French perfumers, is cultivated in Esquintla; and the seeds bring, in the port of San José, \$10 per quintal (100 lbs.)—the

odor of the seeds bears some analogy to that of civet.

Since the commencement of the importation of horses from Chili and the United States, the prices of horses have been raised to a standard hitherto unknown in Central America. A few years ago \$100 was the highest price paid for any horse; and nowadays horses commanding from \$500 to \$1,500 are quite common.

A decree having been issued on April 6th, determining the recognition of the "Cuban Republic" as a nation, in which Guatemala had done nothing more than had already been done by the other Spanish-American republics, a special envoy arrived at the capital from the Spanish Captain-General at Havana, demanding that the decree be immediately revoked. There was a rumor that General Barrios's government had so far yielded as to dispatch an envoy to the court of Madrid to treat the question in a manner at once satisfactory and honorable to both nations.

For the initiatory steps taken by Guatemala toward the reestablishment of the Central American Confederation, see CENTRAL AMERICA in this volume. In addition to the information there to be found, it is only necessary here to say that the plenipotentiaries from the five republics were to meet in Guatemala city on January 15, 1876, for the purpose of deliberating on the subject of the proposed union.

President Barrios decided to signalize the celebration of the fifty-fourth anniversary of the independence of Central America (September 15th) by remitting one-fourth of the punishment to which prisoners of both sexes had been judicially condemned.

GUÉRANGER, DOM PROSPER, a French Benedictine monk, born at Mans in 1806; died January 3, 1875. He was destined at an early age for the Church, and entered in 1830 the Benedictine Abbey at Solesmes, of which he became the abbot and historian. He wrote "Institutions liturgiques" (2 vols., 1840-'42), "l'Année liturgique" (6 vols., 1843-1859), "Mémoire sur la Question de l'Immaculée Conception de la Vierge" (1850), "Histoire de Sainte-Cécile" (1853), and other theological works. Guéranger regarded it as the aim of his life to restore the literary reputation of the Benedictine order in France. He was, however, unlike many of the great Benedictine scholars of the seventeenth and eighteenth centuries, a decided opponent of the peculiarities of the Gallican Church, and made incessant effort to replace the Gallican liturgies in the French dioceses by the Roman. This led to an animated controversy with M. Guérard, who sharply attacked Guéranger in his *Bibliothèque de l'École des Chartes*.

GUÉRONNIÈRE, VISCOUNT LOUIS ÉTIENNE ARTHUR DUBREUIL HÉLION, DE LA, a French writer and politician, born in Limoges in 1816; died December 23, 1875. He went to Paris quite young, where he formed an intimate

friendship with Lamartine and Girardin, and joined the editorial staff of the *Presse*, in which position he soon distinguished himself by his able treatment of the questions of the day. In 1850 M. de Lamartine made him editor-in-chief of his new journal, *Le Pays*, in which he published a series of political articles, creating great excitement at the time. They directed the attention of Louis Napoleon to him, who made him a secretary in his cabinet, placed him at the head of the bureau of the press, and intrusted to him the publication of the celebrated pamphlet on the Italian and the Roman question which preceded and followed the War of 1859. He was rewarded with a seat in the Council of State, and afterward in the Senate. In 1862 he went over to the Liberals and founded *La France* as the organ of the Liberal senators. But, seeing that nothing was to be gained by this course, he left his new associates and asked for an appointment in the diplomatic service. Thus the last years of Napoleon's reign found him an ambassador at the

courts of Brussels and Constantinople. After the Revolution of 1870 he retired from the public service and devoted himself to literary labors.

GURNEY, Sir GOLDSWORTHY, Knt., an English inventor, born in 1793; died February 28, 1875. Having studied medicine, he soon turned his attention to chemistry. From a "Course of Lectures on Chemical Science, delivered at the Surrey Institution in 1822" (1823), it appears that he first discovered the lime and magnesium lights. He also discovered several other lights, and made various discoveries in steam, by which he was enabled in 1829 to drive a steam-carriage from London to Bath on the turnpike-road. His high-pressure steam-jet has been applied to various uses, with signal success. In locomotives, it increased the speed almost threefold, and in coal-mines has been used successfully to ventilate them, and to extinguish fires which had been burning for many years. He was raised to the knighthood in 1863.

H

HACKETT, HORATIO BALCH, D.D., a distinguished American Biblical scholar, was born at Salisbury, Mass., December 27, 1808, and died at Rochester, N. Y., November 2, 1875. He graduated at Amherst College in 1830, studied theology at Andover, Mass., and afterward at Halle and Berlin. On his return from Germany, having changed his views of baptism, he was ordained as a Baptist clergyman. He was Professor of Ancient Languages in Brown University from 1835 to 1839, when he became Professor of Biblical Literature in Newton Theological Institution, Mass. In 1869 he resigned his professorship at Newton, and in 1870 became Professor of New Testament Greek in the Rochester Theological Seminary. He published Plutarch's "De Sera Numinis Vindicta," with notes, of which there have been two editions; the first appeared in 1844 (Andover); a translation of Winer's "Chaldee Grammar," with additions (1845); "Hebrew Exercises" (1847); "Commentary on the Acts" (Boston, 1851); new edition, enlarged (1858); "Illustrations of Scripture" (1855); "Translation of the Epistle to Philemon, with Notes" (1860); "Memorials of Christian Men in the War" (1864). He also translated, for Dr. Schaff's edition of Lange's "Commentaries," Van Oosterzee's "Philemon" and Braune's "Philippians." Dr. Hackett contributed articles to the *North American Review* and the *Christian Review*, to Dr. William Smith's Classical and Bible Dictionaries, and, with Dr. Ezra Abbott, edited the enlarged and corrected American edition of Smith's "Dictionary of the Bible." He also edited an American edition of Rawlinson's "Historical Illustrations of the Old Testament." He is said to have translated

or revised parts of Dr. Conant's translation of the Scriptures as issued by the American Bible Union. In 1858-'59 he resided several months at Athens, in order to study modern Greek. He made three tours through Palestine and other parts of the East. Dr. Hackett was a member of the American company of revisers of Scripture cooperating with the British revisers.

HARPER, JOHN, senior member of the firm of Harper Brothers, died on April 22d, aged 78 years. He was born at Newtown, Long Island, January 22, 1797. His father was a substantial farmer. At the age of sixteen he went to New York City to learn the art of printing. In 1817 he and his brother James formed a partnership under the title of J. & J. Harper, and, with some aid from their father, commenced business in Dover Street. Here he became an excellent compositor and accurate proof-reader. In 1839 the firm being enlarged, and taking the name of Harper Brothers, John Harper was made financial manager. In 1853, after the fire of December 10th, which burned the establishment, John Harper planned and designed all parts of their present fire-proof edifices. After the death of his brothers James and Joseph Wesley, in 1869 and 1870, he retired from the more active duties of the firm.

HARRIS, Hon. IRA, a judge and Senator, died at Albany, N. Y., December 2, 1875. He was born in Charleston, Montgomery County, N. Y., May 31, 1802. He was descended from one of the first colonists of Rhode Island, on his father's side, while his maternal ancestry were from Scotland. Until seventeen he did farm-work during the summer, and attended school in winter. In 1815 he entered Courtland

Academy, and went thence to Union College, where he was graduated at the head of his class in 1824. He studied law in Albany in the office of Ambrose Spencer, and was admitted to the Albany bar in 1828. During the succeeding seventeen years he devoted himself to his profession, and rose to the highest position in the estimation and confidence of the public. In 1844 he was elected member of Assembly by the Whigs of the Albany district, and again elected in 1845. In 1846 he was chosen State Senator. In 1848 he became Judge of the Supreme Court, and held that position for twelve years. In February, 1861, Judge Harris was elected United States Senator. On that occasion the Republicans had control of the Legislature, and the leading candidates were Horace Greeley and William M. Evarts. Eight ballots had been taken in the caucus without any decisive result. Finding that Mr. Greeley was gaining, the friends of Mr. Evarts relinquished their candidate, and made Mr. Harris the party nominee, the vote standing as follows: Harris, 60; Greeley, 49; Evarts, 2; scattering, 6. In the Senate Mr. Harris served on the Committee on Foreign Relations and Judiciary, and the Select Joint Committee on the Southern States. At a time when partisan bitterness prevailed in Congress he showed his candor and independence, particularly in his defense of Hon. Jesse D. Bright, the Senator from Indiana. Although he supported the Administration, in the main, he did not fear to express his opposition to all measures, however popular at the time, that did not appear to him either wise or just. Senator Harris's term expired in 1867, when he was elected a delegate at large to the Constitutional Convention of 1867. He was, for more than twenty years, Professor of Equity, Jurisprudence, and Practice, in the Albany Law School. During his senatorial term he delivered a course of lectures at the Law School of Columbian University, Washington, D. C. He was for many years President of the Board of Trustees of Union College, and was one of the founders of Rochester University, of which he was the Chancellor.

HAUSER, KASPAR, the mysterious foundling who was found in the streets of Nuremberg, May 26, 1828, and died by an unknown hand at Anspach, December 17, 1833, has not yet ceased to be the subject of animated literary controversies. The continued interest taken in the history of this foundling arises chiefly from the fact that a number of writers still regard him as the legitimate heir of the grand-duchy of Baden, whom the Countess of Hochberg, the grandmother of the present grand-duke, caused to be abducted in order to secure the succession in Baden to her own son. This theory, first circulated in 1834, by a political refugee from Baden, by the name of Garnier, owes all the importance that it has obtained to the authority of the great jurist Feuerbach, who acknowledged that he regarded it as prob-

able. The opinion of Feuerbach was for the first time publicly stated in a work on his life, published in 1852 by his son, the philosopher Ludwig Feuerbach (*"Feuerbach's Leben und Wirken,"* Leipsic, 1852). Among the writers who have defended, circulated, and further developed the view of Feuerbach, no one has displayed so great a zeal as G. F. Kolb, the author of the well-known statistical works, and for many years a Democratic deputy of the Bavarian Diet. His first work on the subject was published in 1859, under the pseudonym of Broch (*"Kaspar Hauser, kurze Schilderung seines Erscheinens und seines Todes,"* Zürich, 1859). The views of this work were reproduced by him in 1868 in a series of articles, published in the *Frankfurter Zeitung*. In 1872 the interest in Hauser was very extensively revived by the publication of official documents (*"Authentische Mittheilungen über Kaspar Hauser,"* Anspach, 1872), by means of which Julius Meyer, a Bavarian jurist and son of a former teacher of Hauser, endeavored to prove that Hauser was an impostor. Kolb undertook to refute this work (in another series of articles in the *Frankfurter Zeitung*), and he was this time vigorously supported by two men who had intimate relations with Hauser — Herr von Zucker, a councillor of the Supreme Court of Appeal, and Prof. Daumer, the foster-father and educator of Hauser. Prof. Daumer had in a former work, published in 1859 (*"Enthüllungen über Kaspar Hauser,"*), expressly disclaimed any belief in the guilt of the grand-ducal house of Baden; but in his new work, chiefly directed against the views of Meyer (*"Kaspar Hauser, sein Wesen, seine Unschuld, seine Erduldungen und sein Ursprung,"* Ratisbon, 1873), he eagerly collated everything which seemed to favor the claims of Hauser to the throne of Baden. The combined attacks upon the house of Baden did not remain without effect, and reviewers of the new literature, in some of the prominent periodicals of Germany, even went so far as to declare this controversy as virtually settled. Public opinion appeared to be so strongly influenced by the new turn the controversy was taking, that the grand-ducal house of Baden for the first time deemed it opportune to publish from the family archives the official documents relating to the death of the heir-apparent who had been identified with Kaspar Hauser. These documents, dated October 16, 18, and 31, 1812, contain an official account of the baptism administered to the prince two hours before his death, of the dissection of the corpse two days after the death of the prince, and the solemn funeral in the family vault at Pforzheim. The documents proved that the prince was in the last hours of his life attended by his father, the midwife, Mrs. Horst, the two court physicians Schrickel and Kramer, and two high officers of the court; that the corpse had been inspected and dissected by nine physicians in the presence of the state Minister Berckheim, and

his funeral had taken place with the usual solemnities and under the eyes of a large number of officers and persons in the employ of the court. The publication of these documents had the desired effect. The impression produced by the publications of Kolb, Daumer, and others, was more than neutralized, and public opinion was evidently inclined to regard the charges against the house of Baden as definitely refuted. Kolb again tried to defend his theory in the *Frankfurter Zeitung*, and to represent the documents published by the grand-ducal house of Baden as irrelevant, but an elaborate reply to his article, by Dr. Mittelstädt, Attorney-General of Hamburg, in the *Augsburger Zeitung* (August and September, 1875), did even more than the publication of the grand-ducal documents to decide public opinion. The articles of Dr. Mittelstädt ("Kaspar Hauser und der Streit um seine badische Abstammung") are an exhaustive review of the whole story of Hauser's descent from the grand-dukes of Baden, showing how it originated, was developed, circulated, defended, and finally exploded.

HEAD, Sir FRANCIS BOND, an English diplomatist, born at Rochester, January 1, 1793; died July 20, 1875. He served at Waterloo and at Fleurys, and in 1825 he took charge of an expedition which left England to work the gold and silver mines on the Rio de la Plata. He described his journey across the South American continent in "Rough Notes of a Journey across the Pampas" (1826). In 1838 he was appointed Governor of Upper Canada, and was created a baronet in recognition of his services in quelling a rebellion, and repelling incursions made from the United States. In 1867 he was created a privy councillor. Among his works are "Bubbles from the Brunnen of Nassau" (1833), "Life of Bruce" (1844), "The Emigrant" (1847), "Stokers and Pokers" (1850), "The Defenseless State of Great Britain" (1850), "A Fortnight in Ireland" (1852), and "The Horse and his Rider" (1860).

HEALTH, PUBLIC. The cause of sanitary reform has been urged upon the attention of the people with increasing emphasis of late years by those whose minds have been engaged with this momentous subject.

An important part in the dissemination of timely views upon this matter has been taken by the National Health Association, a society composed of members of the medical profession from all parts of the country. This Association has been in the habit of convening yearly to compare the results of the individual investigations of its members upon all matters affecting the sanitary condition of the people, and to deliberate upon the measures which can be most effectively taken for the prevention of epidemic and removable forms of disease. The last annual assembly, the fifth of this body, took place at Baltimore, November 9th. The names of the officers and attendant members were as follows:

J. M. Toner, M. D., President of the Association, Washington, D. C.; Henry Hartshorne, M. D., Vice-President, Pennsylvania; John Ranch, M. D., Treasurer, Illinois; Elisha Harris, M. D., Secretary, New York; C. B. White, M. D., New Orleans; A. N. Bell, M. D., Brooklyn; Ezra M. Hunt, M. D., New Jersey; R. S. Dugdale, M. D., New York; J. W. Pinkham, M. D., New Jersey; Dr. Husted, New York; Y. G. Wheelock, M. D., New York; Heber Smith, M. D., Surgeon Marine Hospital Service, New York; Frederick Brown, M. D., Boston; J. J. Woodward, M. D., United States Army; John M. Woodworth, M. D., Supervising Surgeon-General United States Marine Hospital Service; John S. Billings, M. D., Washington, D. C.; Prof. Stephen Smith, New York; J. A. Steuart, M. D., Baltimore; Moreau Morris, M. D., formerly Health Officer of New York; W. Snively, M. D., Pittsburg, Pa.; W. J. Asdale, M. D., Pittsburg, Pa.; Crosby Gray, M. D., Pittsburg, Pa.; Thomas L. Neal, M. D., Dayton, Ohio; L. H. Skinner, M. D., Frederick, Md.; R. S. Stewart, M. D., President Maryland Hospital; Geo. M. Sternberg, M. D., United States Army; H. R. Noel, M. D., L. C. Winternitz, M. D., J. S. Conrad, M. D., D. I. McKew, M. D., Baltimore; Dr. Gleatsman, North Carolina; E. Lloyd Howard, M. D., Baltimore; C. W. Chancellor, M. D., Baltimore; Richard Duglison, M. D., Philadelphia; William Lee, M. D., Washington, D. C.; Robert Waccoun, M. D., United States Navy; H. O. Hitchcock, M. D., Kalamazoo, Mich.; John Eaton, M. D., Washington, D. C.; James E. Reeves, M. D., Wheeling, W. Va.; F. Donaldson, M. D., Baltimore; C. B. White, M. D., President Board of Health, New Orleans; C. H. Nichols, M. D.

Some of the State governments have opened their eyes to the duty of governmental action upon matters concerning public hygiene, and have established central boards of health of a more or less initial character, but which have already furnished contributions to the furtherance of this object; and their reports for the past year have been more full and valuable than in any preceding year. The papers published by the Massachusetts State Board of Health, the most active of the official societies, for the past six years, are valuable contributions to science. The boards in California (founded in 1870), Michigan, and Minnesota, have followed the example of the older board in efficient work. A Board of Health has been constituted in Alabama in February of the present year by act of the Legislature. The last report of the board of California presents information upon the subject of sewage, drainage, local diseases, climatology, and phthisis; upon forest-culture in its prophylactic sanitary relation; the condition and wants of the insane and inebriate classes; the vital statistics of the chief cities; and the sanitary development of hospitals, asylums, and other State institutions. An elaborate report on malarial diseases and phthisis pulmonalis, by the secretary, presents an illustrated and carefully studied history of the *Eucalyptus globulus*, the alleged prophylactic advance against malaria. The board of the District of Columbia, organized in 1871, has been active in the abatement of deleterious influences. A State board of Georgia was created in July of this year. The board of Michigan possesses the advantage, that its secretary is the Registrar

of Vital Statistics of the State; and they have been more active in the propagation of hygienic information in the schools and among the people than any other board. The board of Massachusetts, empowered with smaller effective authority than all the rest, has always continued to be the most earnest in the investigation of the causes of preventable mortality, and in the collection of vital statistics. The State Board of Health of Minnesota, organized in 1873, has been efficiently spreading sanitary doctrines. The board of Virginia, first appointed in 1872, work earnestly in their field, though little sustained by the State government. The Health Commission of New Jersey, appointed in 1874, ably discharged the duties which they undertook, and it will not be long, probably, before a permanent central board of health is organized. The board of Maryland has been actively inquiring into the condition of jails, almshouses, etc.

At the last convention of the National Health Association a discussion took place upon the necessity for public action in sanitary matters, viz.: for the institution of a central or State board of health in each State; upon the advisable duties and powers of such boards; and upon the means by which they may effectually register the vital statistics, especially as regarding the causes of death and the sources of preventable disease. During this discussion the impropriety of selecting the boards exclusively from the medical faculty, as a class especially interested, was dwelt upon: the example of Massachusetts was named, where the leader of the movement was a lady, whose husband, a member of the Legislature, brought the measure forward. The importance of that branch of their services which has to do with the collection of pathological and mortuary statistics was emphasized. An address, presented at the meeting by Dorman B. Eaton, LL. D., chairman of the United States Civil Service Commission, on the essential conditions of good sanitary administration, propounded as such conditions: a knowledge among the majority of the people of the purpose, nature, and scope of sanitary enactments; a confidence in the adequacy of public health measures, and a knowledge of the means of carrying them out; and the adoption of effective methods by statutory enactment, in accordance with our legal and social condition. The following is an extract from a report of this address:

No competent judge, I venture to think, can look into the crude, shallow, arbitrary, and heterogeneous mass of laws and ordinances which are nominally in force of a majority of the municipalities of this country, or compare the statutes recently enacted in various States for creating State Boards of Health, without being painfully impressed with the conviction that the conditions named last only among a small portion of the people of the United States.

The municipal health laws of New York City, which are the earliest and best in this country, while in some particulars superior to any elsewhere, are yet defective as compared with those relating to several European cities.

Laws should be passed by State Legislatures to secure the dissemination of practical knowledge of disease; the securing of a complete registry of births, deaths, and marriages; the highest standard of education in the medical profession; better safeguards against nostrums and quackery; the procurement of pure air, water, and milk, and wholesome food; good drainage and sewerage; ventilation in schools, colleges, hospitals, asylums, courtrooms, theatres, and all places of public resort; vaccination in an effective manner; regulation of occupations and practices detrimental to the public health; instruction in the art of nursing; a prevention of overwork and abuse of children; supervision of dead bodies; provisions in regard to the width of city streets and the erection of proper tenement-houses; cheap transit for the poor to country parks; quarantine against the introduction of malarious disease. In ancient and mediæval times, it is a matter of familiar knowledge that plagues, black-deaths, and fevers, destroyed such numbers as have been unknown to later times. There is nothing better settled in regard to life and health than that such diseases as cholera, yellow fever, small-pox, typhus and typhoid fever, can be in a great measure kept away by good sanitary legislation, the cost and loss of which is trifling compared with the expensive results of these diseases.

All England is divided into 15,000 sanitary districts, with a sanitary authority in each, and since 1872 there has not been a spot on the surface of England that has not been liable to feel, and, if it needed, has not felt the direct exertion of such authority. These 15,000 small districts are grouped into twelve larger divisions; in each of these divisions there is an inspector who reports directly to the Local Government Board in London, and over that board is one of the members of the cabinet. Connected with the board is a chief medical officer, now Dr. Simon, perhaps the greatest sanitarian in the world.

In 1873, the national vaccine establishment furnished carefully-selected vaccine matter for use in 9,669 different places; in 1874, in one of the twelve districts, 17,188 nuisances were removed, and out of 206,008 nuisances complained of in all England in the same year 204,000 were actually removed within that year. Other figures were given, showing the great decrease of the death-rate in different parts of the world, caused by improved sanitary measures; and the address concluded with a few practical suggestions as to the duty of the Government toward perfecting arrangements to keep a record of the experience of the different State boards of health, and of increasing sanitary measures all over the country.

HELPS, Sir ARTHUR, an English diplomatist, born in 1817; died March 7, 1875. He graduated B. A., in 1838, from Trinity College, Dublin, served as private secretary to Lord Montague, Chancellor of the Exchequer, was appointed Commissioner of French, Danish, and Spanish Claims, served for a time as private secretary to Lord Morpeth, Chief Secretary of Ireland, and in 1859 was appointed Secretary of the Privy Council, which position he held up to his death. He wrote a number of works, among which may be mentioned: "Henry II." (1845), "Catherine Douglas" (1845), "The Claims of Labor" (1845), "The Conquerors of the New World and their Bondsmen" (1852), and "The Spanish Conquest of America" (1855-'61). He was created a K. C. B. in 1872.

HENDRICKS, THOMAS ANDREWS, an American statesman, born in Muskingum County, Ohio, September 7, 1819. In 1823 his father settled in Shelby County, Indiana. Thomas graduated at South Hanover College in 1841,

studied law at Chambersburg, Pa., was admitted to the bar there in 1843, and returned to Indiana to practise. In 1848 he was a member of the Legislature, and in 1850 a delegate to the State Constitutional Convention. From 1851 to 1855 he represented the Indianapolis district in Congress, from 1855 to 1859 was Commissioner of the General Land-Office, and from 1863 to 1869 was a member of the United States Senate, in which he was regarded as the Democratic leader. (See ANNUAL CYCLOPEDIA for those years—article, *Congress*.) In the Democratic National Convention of 1868, in New York, he was strongly supported for the nomination to the presidency. (See ANNUAL CYCLOPEDIA for 1868—article, *United States*.) As candidate for Governor of Indiana he was defeated in 1860 and in 1868, but was elected in 1872, for the term ending January 1, 1877. He continued the practice of law till his election as Governor.

HERWEGH, GEORG, a German poet, was born May 31, 1817, in Stuttgart, and died April 7, 1875, in Baden-Baden. He studied at first theology in Tübingen, but, having no taste for this study, he turned his attention to journalism. Having had some trouble with an officer, he went to Switzerland, where he published his "Gedichte eines Lebendigen," in 1841. The poems, which were of a political character, were read by all classes of people, and produced a great sensation. In his poems he gave expression to the desire then felt throughout Germany, the desire for a united fatherland. He urged the King of Prussia to accept the imperial crown, and clearly prophesied the mission of Prussia to reunite the fatherland, and to take up the old quarrel with the Vatican. In 1842 he undertook a journey through Germany, in which he was everywhere received with enthusiasm. The crowning point of this journey was the audience with King Frederick William IV. The King closed the audience with the words, "Let us be honest enemies." From Königsberg, where he was particularly well received, he wrote a letter to the King, which from the boldness of its tone was destined to produce serious consequences for him. The letter is as follows:

KÖNIGSBERG, December, 1842.

YOUR MAJESTY: "Let us be honest enemies" were the words which Prussia's King recently addressed to me; and these words give me a right, ay, oblige me, to bring my bitter complaint before your throne openly and in plain terms, without pretending a devotion which I do not know, or sympathies which I do not feel, nor ever will feel. Let us be honest enemies—and on the same day when your Majesty was pleased to pronounce these words, it pleased a high ministry to forbid the booksellers selling a journal which I was to edit, solely on account of my name, of which not a syllable had as yet appeared under my editorship, and whose sale had been permitted two months previous, before my appointment as editor had become known. That my name should also have so bad a reputation with your Majesty, I can and will not believe after what you said to me a few days ago. Without doubt, your Majesty has no knowledge of these proceedings, and the object of

this letter is only to bring this simple fact to your notice, that your Majesty may further decide what is right. I do not ask for the withdrawal of the order of suppression, for I know that my limited understanding as a subject, my consciousness of a new era, must forever contradict the rule of most German ministers. Gladly would I grant to these ministers the right of opposition, if they would only take notice of what is happening around them, that is, what is happening in the lower strata of humanity, instead of quarrelling with a little foam and wind which are playing on the surface; if, in the opposition made to them, they were only able to discover at times the elements of a new religion, and not only suspect frivolity; in short, if they would have, besides the accident of their birth, and their administrative and police talents, the talent and will to enter into a fair contest with their enemies, instead of ignoring them at first, and then treating them brutally without knowing them, thus deceiving the princes and the people in speaking of a tranquillity which in reality does not exist, and can never be enforced by outward measures. There are still men who are to be intimidated by nothing (and I count myself among them); and all the more, as even the enemies of progress no longer possess the courage to use force, because they very well know how dangerous martyrdom is. But forbidden books fly through the air, and what the people wish to read they will read, in spite of all suppressions. Some time ago your Majesty's ministers ordered the suppression of my poems, and I have the pleasure of preparing the fifth edition at the present time. I do not ask for the withdrawal of the order of suppression, for I cannot ask for anything in a country I am about to leave. I am by nature a republican, and perhaps even at this moment a citizen of a republic. But my heart has prompted me to direct a last, an honest, even if a passionate, word to your Majesty, a word which shall touch the servants of the sovereign, but not the sovereign himself; a word in private, but which shall not only be my word, but that of many thousands.

In deepest devotion, your Majesty's most obedient
GEORG HERWEGH.

In consequence of this letter he was expelled from Prussia. He was attacked by Geibel and Freiligrath, and a number of poems were written *pro* and *con*. In 1848 he gathered a band of workmen in France, with which he entered Germany. But his force was quickly routed by a detachment of soldiers, and after this Herwegh took but little part in public life. The most important of his later literary works were translations of several plays of Shakespeare, for the new German translations of Shakespeare edited by Ulrici and Bodenstedt. In his political views Herwegh sympathized, in the last years of his life, with the "Internationale," and for the restoration of the German Empire, which had been the dream of his youth, he had nothing but biting sarcasm. (See "Georg Herwegh," by R. Gottschall, in *Unsere Zeit*, 1875, p. 751.)

HITZIG, FERDINAND, a German Biblical critic, was born June 28, 1807, in Haningen; died January 22, 1875, in Heidelberg. He studied successively in Heidelberg, Halle, and Göttingen. In Halle he attended particularly the lectures of Prof. Gesenius, whose teachings were of great influence on the later works of Hitzig. In 1828, after he had graduated in Göttingen, he became a professor in Heidelberg. In 1832 he received a call from the

University of Zürich as Professor of Theology, and in 1861 returned to Heidelberg, where he remained until his death. He lectured not only on the Old and New Testaments, but also on the Oriental and particularly on the Semitic languages. He wrote commentaries upon the Psalms (1835-'36), the twelve minor prophets (1838), Jeremiah (1841), Ezekiel (1847), Daniel (1850), and Canticles (1855). He also wrote "Ueber Johannes Markus und seine Schriften" (1843), "Urgeschichte und Mythologie der Philistæer" (1845), "Die Grabschrift des Eschmunazar" (1855), "Geschichte des Volkes Israel" (1866), "Die Inschrift des Mesha" (1870), and "Das Buch Hiob; übersetzt und ausgelegt" (1874).

HOBART, Lord VERE HENRY, an English statesman, born December 8, 1818; died April 27, 1875. He was the eldest son of the Earl of Buckingham, and was educated at Trinity College, Oxford. In 1842 he was appointed a clerk in the Board of Trade, and then became private secretary to Sir George Grey. In 1861 he was appointed a special commissioner to investigate the condition of the Turkish finances, and afterward became director-general of the Imperial Ottoman Bank at Constantinople. In 1872 he succeeded Lord Napier as Governor of Madras, which position he held up to his death.

HONDURAS (REPÚBLICA DE HONDURAS), one of the five independent states of Central America, lying between the thirteenth and sixteenth parallels of north latitude, and 83° 12' and 89° 47' west longitude. It is bounded north by Guatemala and the gulf of its own name; southeast by the Caribbean Sea; south by Nicaragua, Fonseca Bay, and San Salvador; and west by the latter republic and that of Guatemala. Its territory embraces an area of 58,168 square miles; and its population, in 1874, was estimated at 351,700. The capital, Comayagua, has a population of from 7,000 to 8,000.

Honduras, in common with all the other Latin-American states, is desirous of attracting immigrants to its shores, and the government of Comayagua has even promulgated a law regulating the conditions upon which the colonists will be received. They will be governed by the same laws as the natives of the country; the lands given to them will, after five consecutive years of cultivation, become their own property; they will be exempt from military duty for the space of ten years, save in case of foreign invasion; they may, if not Roman Catholics, exercise their religion in private, and have their own cemeteries; they will be exempt from all taxation, will be entitled to granted patents for any invention of their own or the introduction of machinery into the country; and they will be at liberty at any time to sell their property and leave the country. Favorable, however, as these conditions may appear, it is doubtful whether they will suffice to turn aside any portion of

the tide of immigration from the United States, in the north, and the Argentine Republic, in the south.

The President of the Republic is Señor Ponciano Leiva. The Minister of the Interior and of Foreign Affairs is Señor A. Zúñiga; of Finance, Señor E. Ferrari; and of War, Señor J. Lopez.

The bishop of Comayagua is J. D. Zepeda (1861).

The national income is unofficially estimated to amount to some \$400,000, about two-thirds of which are derived from the custom-house and the monopolies.

The foreign debt, at the end of 1872, stood as follows:

British loan of 1867, @ 10 per cent., and at the rate of 80 per cent.	\$1,000,000
French loan of 1865, @ 6 per cent. and at the rate of 75 per cent.	2,490,105
British loan of 1870, @ 10 per cent. interest, and at the rate of 90 per cent.	2,500,000
Total.	\$5,990,105

All the loans were contracted for the purpose of building an interoceanic railway in the republic.*

The following is an extract from the report of the council of foreign bondholders on Spanish-American states, published in London in 1875:

Although, with the coöperation of the Foreign Office, the council have made application to the Government of Honduras for placing the customs revenues of Amapala under an agent of the bondholders, to meet the interest of the Federal five per cent. debt, no result has yet been obtained. The appointment of a vice-consul by her Majesty's Government may facilitate the required measure.

The strife of internal factions, and the intervention of those of neighboring territories, keep the country in so wretched a condition that any satisfactory arrangement regarding the comparatively small amount of the old Federal debt of 1867 may yet be delayed.

The loans issued in England and France, in the name of Honduras, for a projected interoceanic railway, remain in the same hopeless condition, and the hardship inflicted on many of the holders is very great.

An official journal of Honduras gave place in its columns to the statement that, for the better arrangement of the debts of the interior, caused by successive public disorders from 1870 to 1874, a *Junta* of public credit has been established by the Government in the capital of each department.

President Leiva, in his message to the Congress of 1875, observes that "with some foreign governments there are claims outstanding, caused by acts for which neither the people of Honduras nor the present administration can be held to account."

He also added, in regard to the railway question, that the affairs of the interoceanic line were in a state by no means satisfactory. The company organized according to the new contract made in London, on July 12, 1873.

* For full statements of this debt, and of the finances in general of Honduras, see the ANNUAL CYCLOPEDIA for 1873, 1875, and 1874.

has been unfortunate in its endeavors to procure funds to carry on the work. The Government, however, "continues to uphold the company, in the hope that it will yet be successful in its negotiations." Some 1,000 tons of railway-iron at Amapala were sold to San Francisco, and the proceeds were to be appropriated to the defrayal of the expenses of completing the third section of the line.

It should here be mentioned that even the British and French bondholders themselves concurred in the suspicion that of the total amount of the last two loans (say somewhat less than \$5,000,000) but a very small proportion really reached the country for which the loans were contracted.

The worst of it is (observes a recent writer) that nobody can tell where the money loaned has gone to. Experience and unbiased inquiry lead to the almost certainty in this case that the ready money these countries expect to handle for the realization of schemes offered as a paying speculation, is pretty well absorbed by the knowing ones in the loaning country before much of it reaches the foreign field of operations for which it is intended. There is a strong conviction that Honduras has been victimized in this way. Of course, the innocent shareholders and principal sufferers loaned their money with no such intention; but so it is, and so it will be, until more caution is exercised on both sides. The suggestion that Honduras ought to have a railroad, and an interoceanic one, too, originated, not with herself, but with people outside of the country, who deemed the speculation a good and a taking one. It did take, and the speeches made at the different meetings in London, with the glowing terms in which the country, the people, and the President were described, and the exhaustless riches to be dug out of the lands, and to be derived from the scheme itself, were set forth, would, if read at the present time, excite laughter, were the consequences not so serious to hard-working people in Great Britain and France, who invested their surplus earnings in it.

Such, then, is the unhappy financial condition of a nation groaning under the weight of a loan, the greater part of which it probably never came into possession of, and that to the direct prejudice of its dearest interests, inasmuch as, with the whole of the money, the Government could have completed, or nearly so, its railway; and, without it, nothing can be done in that direction. With the railway, the republic would rapidly rise in importance by the thorough development of her agricultural and mining industry; without the railway, all her resources and capabilities must remain undeveloped or only imperfectly developed.

There is, nevertheless, a strong conviction in Central America that an amelioration will before long take place in the material condition of Honduras; both the President and the Congress have manifested a determination to do well, and to do all in their power to render the country at once prosperous and respected.

Peace has remained undisturbed by any incident of moment, either at home or abroad; and public instruction continues to be the object of special exertion and unremitting energy on the part of the powers that be.

HOOK, Rev. WALTER FARQUHAR, a dean of

the Church of England, born in 1798; died October 20, 1875. He was educated at Winchester College, and proceeded as student to Christ Church, Oxford, where he graduated in 1821. He was curate at St. Philip's, Birmingham, in 1827, and vicar of Trinity Church, Coventry, in 1829, where he remained till 1837, when he was elected to the vicarage of Leeds. In the year 1827 he was appointed chaplain in ordinary to George IV., and continued in that office under William IV. and Queen Victoria. On the accession of Queen Victoria, Dr. Hook preached in the Chapel-Royal a sermon on the text, "Hear the Church," of which more than 100,000 copies were sold within a month, but the sermon gave offense in high quarters. During his incumbency of twenty-two years at Leeds, twenty-one new churches, in addition to the parish-church, which was rebuilt at a cost of £40,000, thirty-two parsonages, and more than sixty schools, were erected in his parish. Notwithstanding these clerical labors he found leisure for the production of numerous valuable books. In 1859 he was nominated by Lord Derby to the deanery of Chichester. In 1862 he was elected a fellow of the Royal Society. Of his "Lives of the Archbishops of Canterbury" nine volumes have appeared. When the Queen visited Leeds, Dr. Hook was unanimously elected to present to her Majesty an address from 20,000 persons belonging to the various benefit societies; and when, at one time, there was a strike, the working-men, having agreed to a compromise with their employers, appointed Dr. Hook their referee.

HOOPER, SAMUEL, a member of Congress from the fourth district of Massachusetts, died at Washington, February 13th, after a short illness. He was born at Marblehead, Mass., February 3, 1808. After receiving an education in the common school, he entered early the counting-house of his father, who was largely engaged in trade with the West Indies and Europe. As agent of the house the son made several trips to the West Indies and Russia, and a long visit to Spain. In 1832 he became junior partner in the firm of Bryant, Sturgis & Co., of Boston, where he remained for ten years. He then joined another firm in the same city, engaged, like the former house, in the trade with China. Meanwhile he became interested in the iron-business and its relation to questions of political economy. He served three years in the Lower House of the State Legislature, but at the expiration of the term in 1854 he declined a reelection. In 1857 he was chosen to the State Senate, where he took a leading part in the legislation on banking and finance. At this time he published two pamphlets on currency and bank-notes, which became well known on account of their comprehensive treatment of those subjects. His congressional career began in 1861, when he was elected to fill a vacancy caused by the death of William Appleton. He was

reelected six times, but declined last fall a seventh renomination. His knowledge of financial questions caused several Congresses to appoint him a member of the Committee of Ways and Means. He also served on the Committees on Banking and Currency, and on the War Debts of the States. In 1869 Chief-Justice Chase wrote a letter attributing the success of the bill providing for the national banking system to the sound judgment, persevering exertions, and disinterested patriotism of Mr. Hooper. The Chief-Justice also mentioned Mr. Hooper's aid in negotiating the loan of April, 1861, and added that "his public services placed him under obligations which he could never forget and should always be glad to acknowledge."

HOSEMANN, THEODOR, a German painter, born September 24, 1807, in Brandenburg; died October 17, 1875. At the age of twelve he visited the Academy in Düsseldorf, and worked, at the same time, in the art establishment of Arnz & Co. Soon after he enjoyed the instruction of Cornelius, and afterward that of Schadow. He went to Berlin with Winckelmann, Arnz's partner, and furnished the illustrations to the large number of juvenile books published by him. His oil-paintings and sketches were generally sought for. In 1857 he was made professor, and in 1860 was elected member of the Academy of Arts.

HOVERBECK, LEOPOLD, Freiherr von, a German politician and one of the most prominent leaders of the Party of Progress (Fort-schrittspartei), was born July 25, 1822, and died August 12, 1875. He studied law in Königsberg and Berlin, but, having passed his first examination, he turned his attention to agriculture. He began his political career in 1858, when he was elected to the Prussian House of Deputies, in which he remained until 1870. In 1862 he was elected "Landschafts-director" for East Prussia. From 1867 to 1870 he was a member of the North-German Parliament, and from 1870 up to the time of his death of the German Reichstag. His principal political aim was to build up a free state on the foundation of equal rights and equal duties for all. He was less distinguished for great learning, and an exhaustive treatment of great political questions, than for a rapid comprehension of details and a quick perception of the weak points of his opponents. For this reason he was one of the strongest men of the Party of Progress. But at the same time he would hold to what he had conceived to be right, and for this reason his death was mourned by his opponents as well as by his friends.

HUNGARY, a kingdom of Europe, and one of the two main divisions of the Austro-Hungarian monarchy. (All the affairs which are common to the entire monarchy have been treated of under the head of AUSTRIA.) As the Military Frontier, which had formerly its own administration, has been wholly incorpo-

rated partly with Hungary proper and partly with Croatia and Slavonia, the lands of the Hungarian crown now consist of three large historic divisions, namely:

DIVISIONS.	Area.	Population in 1900.
Hungary Proper.....	87,046	11,580,397
Transylvania.....	21,317	2,112,024
Croatia and Slavonia.....	16,789	1,864,084
Total.....	125,043	15,556,455

The Hungarian ministry, as reconstructed on October 20, 1875, was composed as follows: 1. President of the Ministry, Koloman Tisza; 2. Minister near the King's person (*ad latus*), Baron Wenckheim; 3. Minister of Finance, Koloman Szell; 4. Minister of the Interior, Koloman Tisza; 5. Minister of Education and Public Worship, Dr. Augustin Tréfort; 6. Minister of Justice, Bela Perczel; 7. Minister of Public Works, Thomas Pechy; 8. Minister of Agriculture, Industry, and Commerce, Baron Simonyi; 9. Minister of Croatia and Slavonia, Count Pejacevitch; 10. Minister for the Defense of the Country, B. Szende von Kevesztes.

In the budget for 1875 the revenue was estimated at 212,188,000 florins (1 florin = \$0.48), the expenditures at 238,804,000; the deficit at 21,665,000. The special budget for Croatia and Slavonia estimates the expenditures for the same year at 3,107,000 florins; the revenue at 3,159,000 florins. Besides its share in the common debt of the monarchy, Hungary has a special debt, amounting, at the end of 1870, to near 700,000,000 florins (including a debt of 269,000,000 florins for redeeming real estate and commuting the wine-tithes). The assets of the state were estimated at 696,600,000 florins.

The aggregate length of railways open for traffic was, on January 1, 1875, 6,415 kilometres (1 kilometre = 0.62 mile). The number of private and official letters, newspapers, etc., was 68,673,000. The length of telegraph-wires, in January, 1874, was 46,780; of telegraph-lines, 13,725 kilometres. The number of telegraph-stations was 837.

When the Hungarian Diet reassembled, in January, 1875, its attention was wholly absorbed by the serious financial crisis of the country. With the exception of that small fraction in the House which looked to the compromise with Austria as the source of the financial difficulties of the country, the conviction was general that the equilibrium between revenue and expenditure could only be established by reductions in the expenditure and by an increase of taxation. It was the mode of procedure which formed the chief ground of difference. While the Government laid the chief stress on providing at once by taxation the amount necessary to tide over the period required to make the reductions in the expenditure, its opponents thought it possible to tide over this period by means of what remained of the last loan, without having at once

to resort to extraordinary taxation. According to the calculations of the Government, the deficit for the current year was estimated at 25,500,000 florins. At the end of last year there was in hand a cash reserve of 12,500,000 florins, and 32,000,000 florins remaining of the last loan. If this whole deficit was covered from this source, after deducting the sums payable in December on account of the next year, there would remain, on the 31st of December, 1875, 14,500,000 florins, which the Minister of Finance did not think a sufficient reserve to begin the year with; for, owing to Hungary being chiefly an agricultural country, experience has shown that there is a great decrease in the product of taxation during the first seven months of the year, which after the harvest is in a great measure compensated. There must therefore always be a considerable cash reserve in hand during the first months of the year to defray current expenses, which are going on all the same. The minister's proposal was therefore to apply only 12,000,000 florins of the proceeds of the loan to the covering of the deficit, and to raise 18,000,000 florins by taxation, the chief item of which would be a general income tax of four per cent. If this was accepted there would be at the beginning of the new year 27,500,000 florins in hand. This sum, with other resources which might be made available by that time, would be sufficient to enable the country to look forward without anxiety to the year 1876, and thus leave time for carrying through all those reductions on the one hand, and the various financial measures on the other, by which the minister thought it possible to establish a perfect equilibrium between expenditure and revenue.

An important speech was made, on January 29th, by Sennyey, who fully developed the principal features of the political system of which he has been for years the gifted leader. He advocated adhesion to the compact with Austria, a reform of administration with municipal officers appointed by the Government, reform of the judicial system, solution of the banking question, revision of the commercial treaty, and a reduction of the army. He severely censured the want of energy exhibited by the Government, but acknowledged that he did not expect that the present Diet was willing to co-operate with him in carrying out his views. Though only a small party supports the conservative programme of Sennyey, he is more than ever recognized by men of all parties as a rising statesman. The former prime-minister, Lonyay, gave his views on the financial crisis on February 1st, recommending greater economy. A great sensation was produced, on February 4th, by a speech of Koloman Tisza, the leader of the Left, who for the first time announced the acceptance by himself and his party of the compact (*Ausgleich*) arrived at in 1867 between Austria and Hungary.

On February 11th the Diet, after thirteen

days' debate, accepted the budget, as presented by the Permanent Finance Committee of the Diet, by an imposing majority. The Deak party, which made the compact with Austria in 1867, and has been in power ever since, rose like one man. The parties headed by Sennyey, Lonyay, and Tisza, voted likewise for it. Yet, immediately after this signal triumph, the minister-president rose and asked the House to suspend its sitting, as the ministry, in the face of the altered situation, which opened the possibility of bringing about a coöperation of parties hitherto opposed, and of thus making parliamentary action more rapid and energetic, thought it its duty to waive all personal considerations which might be in the way of such a desirable solution, and to make proposals in this direction to the crown. This movement on the part of the ministry, indicating its intention to resign the moment after it had made a show of such an overwhelming majority, seemed one of the greatest parliamentary anomalies, but the loud approval which this declaration elicited on both sides showed clearly enough that this deviation from parliamentary forms was commanded by higher political considerations, and that the ministry, by adopting this course, was but following the general feeling prevalent in the country. All the prominent statesmen, including Sennyey, Lonyay, and Tisza, had audiences with the Emperor, to explain their views on the finances and the general condition of the country. After protracted negotiation, the formation of the new cabinet was at last intrusted to Baron Wenckheim, the Hungarian minister attached to the person of the Emperor. Tisza was appointed in the new cabinet Minister of the Interior; Szell, Minister of Finance; Perczel, Minister of Justice; Tréfort, Minister of Public Worship; Simonyi, Minister of Commerce; Pechy, Minister of Public Works; Szende, Minister for the Defense of the Country; Pejacevitch, Minister for Croatia and Slavonia. In the place of Perczel, Ghyczy was elected President of the Diet. As the adherents of Lonyay, and likewise the Croatian deputies, joined the new coalition majority of the Diet, the ministry could rely on the support of about 350 members. The unanimous reflection of Tisza as member of the Diet at Debreczin, one of the chief seats of the ultra-Magyar opposition to Austrian rule, was received as an indication that his reconciliation with the Government was fully approved by his party.

The Diet was closed on May 24th by the premier as royal commissioner. The royal speech said that adverse circumstances, the financial crisis, and bad crops, made it very difficult to provide for the state expenses and necessary investments. The financial question being thus in the foreground, legislative measures were delayed. Still, many important measures were passed, which the speech enumerated. Much remained to be done, but confidence was expressed that it would be done,

as there was an earnest desire to retrench expenditure, as the Diet had shown its readiness to increase taxation, and as the friendly relations with the other powers had strengthened since 1872, when the Diet met.

The elections for the new Diet took place in July and the first days of August, and resulted in a complete victory for the Government, which carried about 350 of 416 seats. Of the opposition about 18 belonged to the Conservative, 21 to the Radical (extreme Left) party, and the remainder to the party of Nationalities. The Croatian Diet, which sends to the Hungarian Diet 34 deputies, also chose supporters of the Hungarian Government by an overwhelming majority. The new Diet was opened by the Emperor on August 31st. The speech from the throne pointed out that in almost every department of legislation vigorous and searching measures were required, and that arrangements regulating the country's finances appeared to be specially imperative, inasmuch as the safety of Hungary's existence as a state required the establishment of a financial balance at the earliest fitting moment. Hopes were held out that after certain reforms had been accomplished, the Administration would succeed in overcoming the difficulties of the occasion. The speech mentioned in particular the bills which would be introduced for improving the administration of justice, the completion of the network of railways in Hungary, the reform of the Upper House, the settlement of questions relating to religion and marriage, the solution of the banks question, and the negotiations between the trans-Leithan and cis-Leithan portions of the monarchy respecting the conventions concluded for ten years in 1867 and 1868. With regard to foreign countries the speech said: "Our cordial relations with foreign powers justify us in hoping that, notwithstanding the circumstances which have recently arisen, peace will be maintained, and that you will therefore be able to apply yourselves undisturbed to your legislative tasks." The speech was received with loud and prolonged cheering. Both Houses adopted addresses in reply to the speech from the throne after only short debates. Even Sennyey, the

leader of the Right, announced that he would make no systematic opposition to the Government, and would support it in financial questions. The Minister of Finance announced that he intended to get rid of the deficit by means of a general income-tax of 3½ per cent. and by means of a new loan. The deficit of the next year he estimated at 16,000,000 florins.

On October 20th, Baron Wenckheim, having resigned as prime-minister, was succeeded by Tisza, the remainder of the ministry retaining their seats. The appointment of Tisza to the head of the Administration was received by the country with almost unanimous and enthusiastic applause. The new prime-minister announced in the Diet that he desired to renew the customs treaty with cis-Leithan Austria, so far as it was favorable to the interests of Hungary; if the latter demanded it, he would prefer a separate customs territory. On November 30th he announced, in reply to an interpellation, that Hungary had given its consent to notifying England of the termination of its commercial treaty with the Austro-Hungarian monarchy. Notice had also been given to cis-Leithan Austria, on November 29th, of a termination of the customs treaty between the two sections of the empire, because it had been found impossible to arrive at an agreement in regard to the consumption tax. When a member of the extreme Left asked the Minister of Public Worship to introduce a bill providing for religious liberty, Tisza replied that this was for him a question only of opportuneness, not of principle. In December both Houses of the Diet adopted the income-tax and the new loan proposed by the Government.

In April the Minister of Public Worship Pechy, issued an ordinance, in which he announced that after January 1, 1876, the Hungarian language would be the official language in every branch of public administration, and that every officer would be dismissed who had an insufficient knowledge of it. He demanded a knowledge of the Hungarian language on the part of every officer, as a proof of correct sentiments. The ministerial act gave great offense to all the non-Magyar nationalities of the empire.

I

ILLINOIS. The twenty-ninth biennial session of the Illinois Legislature began on the 6th of January and continued 100 days, coming to an adjournment April 15th. It consisted of 24 Republicans, 24 Democrats, and 3 Independents in the Senate, and 70 Republicans, 56 Democrats, and 27 Independents in the House. Several days were consumed in organizing the House, and Mr. E. M. Haines, an Independent, was finally chosen Speaker. The session was characterized by an unusual lack of harmony, and was remarkably barren in re-

sults. Of 612 bills introduced in the House and 374 in the Senate, only 37 House and 50 Senate bills were passed, and none of these were of special importance. There was from the start an alleged coalition of the Democrats and Independents, and it was announced that they would endeavor to repeal the registry law and the law creating the Board of Public Charities, would abolish the Board of Equalization, and repeal or completely remodel the law regulating the liquor-traffic. A very large portion of the time was occupied in attempts

to carry out these purposes, but they all failed. The bill to repeal the registry law passed the Senate by a vote of 28 to 16, but was defeated in the House by a vote of 67 to 70. A bill to abolish the Board of Equalization also passed the Senate, 29 to 16, but was defeated in the House. The bill to repeal the law creating the Board of Public Charities did not obtain the support of the majority in either House. The act which it was proposed to substitute for the existing law for the regulation of the liquor-traffic provided for a less stringent license system, but, originating in the House, it failed to pass that body. Among the other bills of some importance which were defeated was one making radical changes in the law regulating the business of life-insurance, one appropriating \$50,000 to complete the monument to Stephen A. Douglas at Chicago, and one amending the school law. Among the measures proposed affecting the public-school system was the following, submitted as an amendment to the constitution of the State:

Sec. 3. The General Assembly shall provide for an equitable distribution of all money appropriated for school purposes among the free schools of the State, provided each religious sect may establish free schools and be entitled to an equitable share, but no money shall be appropriated by the General Assembly to aid or sustain any academy, seminary, college, or university of any sectarian denomination whatever, nor shall any grant or donation of land, money, or other personal property ever be made by the State or any such public corporation to any church, except to sustain free schools therewith connected.

It was referred to a committee on education and never reported back. The section of the constitution which it was intended to displace runs as follows:

Sec. 8. Neither the General Assembly, nor any county, city, town, township, school district, or other public corporation, shall ever make any appropriation or pay from any public fund whatsoever anything in aid of any church or sectarian purpose, or to help support or sustain any school, academy, seminary, college, university, or other literary or scientific institution controlled by any church or sectarian denomination whatever; nor shall any grant, or donation of land, money, or other personal property ever be made by the State, or any such public corporation, to any church, or for any sectarian purpose.

Among the acts passed was one providing for refunding seven thirty-sixths of the taxes assessed in 1873, and collected in 1874. This covered the amount of tax levied under an act of 1869, entitled "An act to fund and provide for paying the railroad debts of counties, townships, cities, and towns," which act had been declared unconstitutional by the Supreme Court. An act was also passed changing the beginning of the fiscal year from December 1st to October 1st, and requiring the superintendents of State institutions to make their reports at that time. With these exceptions there were no measures of importance passed except the appropriation bills.

Several investigations were set on foot dur-

ing the session, and others announced, but with very meagre results. A special committee of five was appointed to inquire into the expenditures for the new State-House, and ascertain whether any reduction could be made in the estimates for completing the work. The amount already expended was \$2,700,000, and the amount asked for was \$800,000. Two reports were made by different members of the committee, that of the majority criticising the manner in which some of the expenditures had been made, and that of the minority fully approving of the work of the commissioners. A resolution of the House of Representatives called for information regarding the canals on the following points:

1. The number of men employed continuously through the year under the Canal Commissioners, what they are employed at and what remuneration they receive therefor; the number of men employed during the season of navigation, how employed, and the rate of wages paid.

2. The number of canal-boats now in "commission" and the number that were in commission for each year during the last fifteen years.

3. The amount of tolls collected for each year during the last fifteen years on all shipments south of La Salle, stating the shipments going north and south from that point separately.

4. A statement of all shipments that have cleared the lock at Henry during the last three years, going north, and a like statement of all shipments going south during the same time each year, stated separately.

The Canal Commissioners made a special report in answer to these inquiries, from which it appeared that the total salaries paid to officers and employes for the preceding year was \$19,042. The following exhibit was made of the clearances of canal-boats for fifteen years:

Total number of clearances issued for fifteen years.....	70,859
Average number per year for last fifteen years.....	4,690
Average number per year for last three years.....	4,686
Total number of different boats cleared each year for fifteen years.....	8,040
Average number per year of boats cleared for last fifteen years.....	208
Average number per year of boats cleared for last three years.....	166
Total number of miles run by boats on canal for fifteen years.....	5,178,209
Average number of miles run per year by boats on canal for fifteen years.....	344,880
Average number of miles run per year by boats on canal for last three years.....	317,020
Total number of tons of freight transported on canal for fifteen years.....	9,944,720
Average number of tons of freight per year transported on canal for fifteen years.....	662,951
Average number of tons of freight per year transported on canal for last three years.....	781,781

The following shows the transportation of corn over the principal lines of canal and railroad:

ILLINOIS & MICHIGAN CANAL.

	Bushels.
1873.....	7,058,571
1874.....	5,668,693
Total for two years.....	12,727,269
Average per year.....	6,363,285

Length of canal and river improvement to Henry, 124 miles.

CHICAGO & ALTON RAILROAD.

	Bushels.
1873.....	7,961,576
1874.....	5,305,090
Total for two years.....	13,766,666
Average per year.....	6,983,333

Total length of main line and branches, 649 miles.

CHICAGO, ROCK ISLAND & PACIFIC RAILROAD.

	Bushels.
1873.....	4,471,833
1874.....	4,075,864
Total for two years.....	8,547,187
Average per year.....	4,273,593

Total length of main line and branches, 680 miles.

The following is a comparative statement of rates for freight on corn by canal and railroad:

ROUTE.	Per Bushel.	Miles.
Henry Lock and below.....	5c.	124
La Salle.....	4½c.	96
Utica.....	4c.	91
Ottawa.....	3½c.	81
Seneca.....	3¼c.	69
Morris.....	3¼c.	57
Joliet.....	2½c.	33
Lockport.....	1½c.	29
Total.....	97½c.	580

Average freight, 3.47 cents; distance, 72½ miles.

Comparative railroad freight same distance:

	Per 100 lbs.
Railroad commissioners' rate.....	11c.
Michigan Central.....	14c.
Illinois Central.....	13.15c.
Chicago & Alton.....	14.35c.
Chicago, Burlington & Quincy.....	13.25c.
Chicago & Northwestern.....	14.5c.
	80.15c.

Average rate, 13.36c. per 100 lbs., or 7.48c. per bushel.

This shows a total benefit to the producer in 1874 of \$283,184 on transportation of corn by the canal. It was estimated that the benefit on all freights amounted to \$509,731. The total benefit of the Illinois & Michigan Canal for nineteen years, since its construction, including the excess of tolls over expenses, was calculated at \$18,322,876.

A committee on charitable institutions visited all the institutions of the State and made a special report. The Eye and Ear Infirmary in Chicago was commended as a "worthy object and of great benefit," for which all necessary appropriations should be made. The Northern Insane Asylum at Elgin was pronounced a model institution, and an appropriation of \$100,000 was recommended to put it in condition to accommodate 460 patients. The Southern Insane Asylum at Anna was not found to be in so good a condition. It had 138 patients, and the part completed was capable of accommodating 150. The Illinois State Hospital for the Insane at Jacksonville had 492 patients, and was found to be in need of various improvements. The Institution for the

Education of the Blind at Jacksonville was found to be efficiently managed, but in need of repairs and alterations. The Institution for the Education of Feeble-minded Children at Jacksonville was found to be defective in accommodations, and the erection of a new building was recommended, to be located at Springfield. The Institution for the Education of the Deaf and Dumb, under the charge of Dr. Gillett, at Jacksonville, was very highly commended. The Soldiers' Orphans' Home at Normal was also found to be excellently managed and serving its purpose well. A special investigation was made into the management of the Penitentiary at Joliet, and it was reported that there had been irregularities both in contracts for supplies and for employing the convicts. It was also found that there had been much looseness of management and laxness in discipline.

An act for levying a tax for the payment of interest upon bonds issued in aid of railroads, by counties, cities, towns, or townships, in the State of Illinois, and for creating a sinking fund for the payment of the principal of the same, was vetoed by the Governor on the ground that it provided that the local authorities might in their discretion levy a tax for the payment of interest on these bonds, whereas the State was pledged to the collection and payment of the interest, which entered into the contract with those who had purchased the bonds. He regarded the proposed change as impairing the obligation of contracts, therefore unconstitutional, besides injuriously affecting the credit of the State.

Early in the session resolutions were adopted in the House, protesting against Federal interference in the affairs of Louisiana, and condemning the President and his Administration for sustaining the government of Kellogg. These appear not to have been concurred in by the Senate. The following resolutions, suggesting some peculiar changes in the national Constitution, were submitted in the House, and referred to a committee from which they were never reported:

Resolved by the House of Representatives, the Senate concurring herein, That our Senators in Congress be instructed, and our Representatives requested, to propose and advocate the passage of a joint resolution by Congress, proposing to the Legislatures of the several States for ratification and adoption as part of the Constitution of the United States, the following amendment as a substitute for section 1. Article II., of the Constitution as it now is, viz.:

ARTICLE II.—Section 1. The executive power shall be vested in a cabinet, the chief of which shall be styled the Executive, and he shall be chosen by the House of Representatives from the members thereof upon the nomination of the Speaker, or of such other person, not a member of the House, as Congress may by law designate for that purpose. He shall retire from office and give place to his successor upon a vote of non-confidence by both Houses of Congress: *Provided,* That upon such vote of non-confidence he shall have power in his discretion to declare a dissolution of the House of Representatives, and thereupon members of a new House of Representatives shall be elected as Congress may by law provide.

But the Executive shall not dissolve the House of Representatives upon a declaration of non-confidence affirmed by the country in the return of a new House. Before entering on the duties of his office, the Executive shall take the following oath or affirmation: "I do solemnly swear (or affirm) that I will faithfully maintain and observe the Constitution and execute the laws of the United States."

Wherever in the Constitution the word "President" now stands, the word "Executive" shall be substituted, and all sections, clauses, or parts thereof, inconsistent with this amendment, are hereby annulled and declared void.

And be it further resolved, That our Senators in Congress be instructed, and our Representatives be requested, to favor the adoption by Congress of a joint resolution, proposing to the several State Legislatures for ratification and adoption as part of the Constitution of the United States, the following amendment as a substitute for section 2 of Article I, viz.

Sec. 2. The House of Representatives shall be composed of members chosen by the people of the several States to serve for the term of three years, unless the term be ended before the expiration of three years by a dissolution of the House, as provided in Article II. of this Constitution. The electors of Representatives in each State shall have the qualifications required for electors of the most numerous branch of the State Legislature.

Before the close of the session a protest was drawn up and signed by nearly all the Republican members of the House against the arbitrary rulings of the Speaker in numerous instances, and his refusal to allow the minority its just rights in debate, and the influence in controlling action which the rules were intended to secure. The instances were enumerated and the circumstances stated to show that the Speaker had disregarded the rights of members to be heard, and ruled in defiance of all precedent and law to carry his own points and those of the majority in spite of legitimate opposition. In conclusion, the protest says:

When such means are resorted to, to overcome the minority and attain partisan ends, when the simplest dictates of justice and the plainest principles of parliamentary law are thus lost sight of, where members of the minority are thus refused the privilege, ay, the right, of having their votes recorded as they give them; when we are compelled to quietly sit by and see our official acts falsified, and the official record of the people's representatives go down to the future, bearing a lie upon its face, and when we have sat here for weeks and months, under the almost daily infliction of wrongs similar to those enumerated, vainly hoping, from day to day, that the light of justice would finally break through the clouds of partisan passion that seem to envelop the House, and bring to us some relief, is it to be wondered at that we find ourselves at last compelled to resort to this, the only means left us under the constitution of our State, to protest against the wrongs which we are powerless to prevent?

To offset this the Democratic members made a protest in reply, answering and explaining the allegations of the Republican protest.

The Farmers' Association of Illinois held its third annual meeting at Springfield on the 21st of January. A long series of resolutions was adopted, including the following:

Whereas, Through the departure from the primary principles of our Government, as promulgated by its founders, and through the imprudent exercise of that

highest prerogative of the freeman, the right of suffrage, we, the farmers of Illinois, in common with the wealth and food producers of these United States, have, through our past action, acquiesced in a system of class legislation, which makes the great majority slavishly subservient to a small minority; and

Whereas, This condition is clearly traceable to the fostering protection which has been accorded by our legislative bodies, both State and national, to the financial, mercantile, manufacturing, and transporting interests, enabling them to accumulate an undue proportion of the national wealth, and encouraging them in the exercise of the corrupting lobby influences which have become inseparable from our legislative system: therefore—

Resolved, That the preservation of our national life imperatively demands that every American voter shall attend with care all primary nominations and elections, so as to insure the election of competent and honest men to all offices in the gift of the people.

Resolved, That the record of old political parties of this country is such as to forfeit the confidence and respect of the people, and that we are therefore absolved from all allegiance to them, and should act no longer with them.

Resolved, That we do not recognize any necessity that public officers should receive extravagant salaries, to the end that they may conform to the demand of expensive and fashionable tastes, which in their very nature are antagonistic to republican principles; and, therefore, we demand a reduction of official salaries, including that of the President of the United States to its former basis, as soon as can be constitutionally done.

Resolved, That we demand the immediate reform of abuses in the civil service, through which the patronage of the Government is dispensed as a reward for partisan service, rather than with regard to the public necessities.

Resolved, That the right to exchange the products of labor is coextensive with the right of ownership. We submit to all needful taxation for the support of the Government, but denounce all taxation levied for the benefit of special classes. We hold that the existing duties on clothing, lumber, salt, iron, and steel, are not only unnecessary to the successful prosecution of these industries, but oppressive to labor, and tend to create monopolies; while at the same time they furnish a pretext for extravagant charges for railway transportation.

Resolved, That we demand the repeal of the national banking law, and that the Government shall supply national paper-money directly from the Treasury, made a legal tender for all debts, public and private, including duties on imports, to be interchangeable for registered bonds bearing 3.65 per cent. interest.

Resolved, That the existing railroad legislation of the State should be sustained and enforced until thoroughly tested before the courts; that we oppose any legislation by Congress under the plea of regulating commerce between the States, which shall deprive the people of their present controlling influence through State legislation.

At a convention of the National Temperance Association at Chicago, on the 3d of June, the following resolution among others was adopted:

Resolved, That the time has arrived to more fully consider the relations of the national Government, and its responsibility for the alcoholic liquor-traffic, and we hereby ask the Forty-fourth Congress to prohibit the manufacture and sale of all alcoholic beverages in the District of Columbia, and in the Territories of the United States, and to prohibit their importation from foreign countries; to require total abstinence from all alcoholic beverages on the part of all officers and subordinates of the civil, military, and naval service, and to initiate and adopt, for ratification by the several States of the Union, a consti-

tutional amendment which shall make the traffic in alcohol as a beverage illegal throughout our national domain.

There are six life-insurance companies organized under the laws of the State, with an aggregate capital of \$1,827,694.34, and fifty life and accident insurance companies of other States doing business in Illinois, whose capital amounts in the aggregate to \$8,464,194.35. The aggregate assets of foreign companies doing business in the State amount to \$377,318,883. The premiums received amount to \$90,022,989.86; deferred and unpaid premiums, \$11,236,957.41. The total number of life-policies issued during the year was 10,767, amounting to \$23,265,806; premiums received, \$3,958,397; losses paid, \$1,446,824. Total assets of all the companies, \$389,093,434.99; liabilities, \$356,202,578.34; surplus, \$32,890,856.65; income, \$117,774,726.27; expenditures, \$84,514,643.23.

During the year the following railroads passed into the hands of receivers through the bankruptcy of the companies:

	Miles.
Gilman, Clinton & Springfield.....	111
Springfield & Illinois Southeastern.....	226
Springfield & Northwestern.....	49
Calro & Vincennes.....	160
St. Louis & Southeastern.....	208
Tamaroa & Chester.....	43
Rockford & Rock Island.....	820
Toledo, Peoria & Warsaw.....	246
Indianapolis, Bloomington & Western.....	189
Teledo, Wabash & Western.....	583
Total.....	2,078

In the case of the people against the Chicago & Alton Railroad Company the Circuit Court made a decision in November which sustains the constitutionality of the railroad law, although the case was not disposed of. The decision of the lower court in favor of the people was reversed on account of a defect in the declaration, and the case was continued to allow of an amendment. In the case of the Chicago, Burlington & Quincy Railroad Company against Cole, the point at error was whether the Board of Equalization, in determining the valuation of the property, was right in adding to the market value of the shares the cash value of the debts, not only of the company itself but of the indebtedness of six other companies whose roads it had leased. This court decided that the amount of this indebtedness, amounting to \$6,756,000, should not have been included in making up the valuation. It said:

We can conceive no possible process by which the amount of this indebtedness can be made to show the present value of that which belongs to appellant. It cannot be said to reduce the value of its shares of stock, because its payment demands nothing which would otherwise, in any contingency, belong to the shareholder. The effect of it is, necessarily and unavoidably to increase the valuation of the capital stock, including the franchise of appellant, \$6,756,000 beyond what it should be. If, as it must be to be sustained, the rule adopted by the Board of Equalization, by which to be governed in making this class of assessments, may be regarded as the honest expression of the judgment of the majority of the board, then it is plain this assessment, be-

cause in violation of that rule, and consistent with no other reasonable theory of valuation, cannot be the honest judgment of a majority of that board. It is an arbitrary and unreasonable valuation. Because the law has devolved on the Board of Equalization and not on the courts the duty of making such valuations, we hold it is not the duty of the courts to exercise any supervisory care over its valuations, so long as it acts within the scope of the powers with which it is invested, and in obedience to what may reasonably be presumed to be an honest judgment, however much we may disagree with it. But whenever the board undertakes to go beyond its jurisdiction, or to fix valuations through prejudice or a reckless disregard of duty, in opposition to what must necessarily be the judgment of all persons of reflection, it is the duty of the courts to interfere and protect tax-payers against the consequences of its acts. Where its jurisdiction is conceded, no mere difference of opinion as to the reasonableness of its valuations will justify equitable interference. But its valuations must be the result of honest judgment and not of mere will.

The elections and legislative sessions in this State are biennial. No State election occurred this year, and, as there is no session of the Legislature in 1876, official reports of the various departments of the government are wanting.

Assessment returns from the several counties of the State afford the following statistics:

PERSONAL PROPERTY.

CLASS.	Number.	Value.
Horses.....	923,468	\$37,518,706

INDIA, BRITISH, a vast empire in Asia, equaling in extent the continent of Europe without Russia. The area of the region in which the supremacy of England is acknowledged is estimated at 1,450,744 square miles, with a population of 239,000,000. The population varies in density from 700 persons to the square mile in some parts of Oude and the lower provinces of Bengal to 10 in some of the hill districts. About two-fifths of the country consist of independent native states, whose chiefs acknowledge the supremacy of Great Britain, and are, to a certain extent, subject to its control. British India proper comprises the remaining three-fifths.

According to the "Memorandum of the Census of British India of 1871-'72" (London, 1875), the area and territory of the districts under British administration were, at the date of the latest enumerations, as follows:

TERRITORIES UNDER BRITISH ADMINISTRATION.	English Square Miles.	Population.
General Government of India:		
District of Ajmeer (May, 1872).....	2,661	816,082
Province of Berar (Nov., 1867).....	17,834	2,281,565
Province of Coorg (Nov., 1871).....	2,000	165,312
Province of Mysore (Nov., 1871).....	27,077	5,055,412
Presidency of Bengal (1871-'72).....	157,595	60,467,724
Province of Assam (1871-'72).....	58,556	4,182,019
North-west Provinces (Feb., 1872).....	81,408	80,781,204
Oude (Feb. 1, 1869).....	23,992	11,220,282
Punjab (Jan., 1868).....	101,829	17,611,493
Central Provinces (Jan., 1872).....	84,963	8,201,519
British Burmah (Aug., 1872).....	85,506	2,747,148
Presidency of Madras (Nov., 1874).....	183,818	81,281,177
Presidency of Bombay (Feb., 1872).....	124,462	10,249,206
Total.....	904,049	190,568,048

The aggregate area of the native states of India is 546,695 square miles; population 48,267,910. The most important of the native states is Hyderabad, with an area of about 80,000 square miles, a population of about 11,000,000, and an annual revenue of about £1,655,000. Then comes Maharaja Sindia's state of Gwalior; then Baroda and Jeypoor. The united military force of the native states is estimated at 100,000 men.

In regard to religion, the population of British India (exclusive of the native states) consisted, according to the census, of 139,248,568 Hindoos, 1,174,436 Sikhs, 40,882,537 Mohammedans, 2,832,851 Buddhists, 896,658 Christians, 5,102,823 persons connected with other religions, and 425,175 persons of unknown religion.

The total revenue of India, during the financial year ending March 31, 1874, reached the sum of £49,598,253, and the expenditures amounted to £54,959,228. The three most important sources of the public revenue are land (£21,037,912), salt (£6,150,662), and opium (£8,324,879). The heaviest items among the expenditures are the expenses for the army (£11,872,941); for relieving the sufferers from the famine, £3,851,423 were expended. The total amount of the Indian debt on March 31, 1874, was £107,368,949, on which was paid

interest during the year amounting to £4,618,850. For the same period, the obligations of the Government of India amounted to £9,918,929, and the interest paid thereon to £541,001. These obligations are for the most part savings-banks, fund, and other deposits.

The imports and exports, from 1871 to 1873, were as follows:

ARTICLES.	IMPORTS.		EXPORTS.	
	1871-'72.	1872-'73.	1871-'73.	1872-'73.

Cotton-manufacture in India is assuming important dimensions. According to a report dated June, 1875, there were altogether twenty-five cotton-mills in India in full operation, working 600,000 spindles and 7,000 looms. The spindles produced about 130,000 pounds of cotton thread a day, of which about 50,000 pounds were used to produce cloth. These mills were chiefly in the Bombay Island, where a new spinning-mill, just opened by a wealthy Hindoo and working 25,000 spindles, made a total of seventeen working mills. Up-country there were several others—one at Surat, two at Broach, two at Ahmedabad, one at Jaulgaum, one in the native state of Bhownuggar, and one at Madras. Extensions were also rapidly going forward. Eight extensions were in course of construction at Bombay, chiefly on share capital, and these would provide at

least for the working of 40,000 more spindles and 1,345 looms.

The annual report of the East Indian railroads, issued by Mr. Julian Danvers, the government director, states the length of the railroad network for the year 1874 at 6,250 miles. In 1873 the total was 5,872 miles; in 1872, 5,111 miles; in 1871, 5,076 miles. It thus appears that the railroad progress of British India is, for evident reasons, slower and less satisfactory than was anticipated a few years ago. When Mr. James Wilson, one of the best financial statesmen that England ever sent to India, laid the foundations in 1859 of a successful railroad policy, the total mileage was but 432 miles. In 1863, under the stimulus of Mr. Wilson's system of government subventions, assisted by the cotton-famine, the result of the war in the United States, 2,234 miles were in operation; in 1867, 3,597 miles had been constructed; and in 1870, 4,826 miles. The whole network as projected was to be between 7,000 and 8,000 miles, and it was expected to be finished in about ten years. From the report of Mr. Danvers it appears that the network is far from being completed after the lapse of fifteen or sixteen years. The total private capital of the railroad system is reported at £95,119,119, and the gross earnings amounted last year to £7,762,760, which shows a considerable increase of traffic, due in part to the famine in Bengal. The working expenses are reported at £3,804,689, and the net earnings at £3,958,071.

The electric telegraph connects all the important places in India. The aggregate length of the telegraph-lines was, in March, 1873, 15,516 miles; the number of offices, 205.

The present Viceroy and Governor-General of India, Lord Thomas George Baring Northbrook, assumed his powers in May, 1872.

The expedition which, at the close of the year 1875, was prepared against the Duffia chiefs, on the northern frontier of Assam, for keeping some Englishmen captives and committing depredations, was not carried out, as the chiefs, in January, 1876, consented to surrender their captives unconditionally. The survey of their country was continued, and no further opposition to it was expected. The following extract from a letter of an English correspondent with the expedition gives a description of the people and the country:

A more heterogeneous lot of mortals could not exist; some are Paens, Duffias, and some Assamese—all wonderful for ugliness, especially the former. They are very free and easy in their manners, and smoke all the time they are giving their information. It is very difficult to keep them from playing a fast and loose game; and the position of their villages, so close to the hills, may really be pleaded as an excuse for them. They are all right enough while our force is here, but they have a wholesome dread of the retribution their brethren in the hills may wreak on them when the whole business is over and the troops withdrawn. The forest-trees are simply monarchs, the stems rising 120 feet clear in many instances without a branch, and then there is a spread of grand foliage. Then the enormous tree-ferns are studies in themselves—in fact, there could

scarcely be a finer field for a botanist, as far as foresting goes.

In February an expedition was sent against the tribes in the Naga Hills, on the northwestern frontier of Burmah, who had attacked and killed Lieutenant Holcombe and a number of Sepoys and coolies belonging to Captain Badgley's surveying party in that district. At the beginning of April advices from the expedition announced its complete success. Seven villages had been destroyed, and the power of the guilty tribes completely broken. The neighboring chiefs had tendered their submission. The heads and rifles of the massacred party had been recovered. The Nagas were found to use firearms freely, but without inflicting any loss on the English.

A profound sensation throughout India was created by the trial and subsequent deposition of the Guicowar, or native prince, of Baroda,* a tributary state, situated in the province of Guzerat. On the report of a commission appointed in 1873 to ascertain the condition of the Baroda administration, the Guicowar was, in July, 1874, allowed a probationary period of eighteen months for the reform of his administration. On November 2d the Guicowar wrote to the Viceroy, requesting the removal of Colonel Phayre, who had been British Resident at the Guicowar's court since March, 1874. The request for his removal was based on the alleged grounds of his persistently hostile action, and the impossibility of carrying out, in communication with him, the reforms required by the British Government. On November 9th Colonel Phayre found reason to believe that an attempt to poison him had been made, and he instituted proceedings which showed that poison had been administered. About the same time Colonel Phayre was, however, removed, and Sir Lewis Pelly, formerly agent for Rajpootana, appointed as his successor. Sir Lewis Pelly, on reaching Baroda, at once took up the inquiry regarding the attempt to poison his predecessor. The services of the Bombay Commissioner of Police, Mr. Louter, were secured, and on January 13, 1875, the Guicowar, Mulhar Row, was arrested for having attempted to poison Colonel Phayre, the British Resident, the Government of India assuming temporary charge of the administration of Baroda. A commission, or court of inquiry, was appointed, consisting of three British officers, two native chiefs, and a native statesman of high reputation. The Guicowar's advisers secured the services of Sergeant Ballantine for the defense, paying him the enormous sum of ten thousand guineas. The trial lasted from February 23d to March 18th. The three European members of the court regarded the Guicowar as guilty, while all the three native members considered the evidence insufficient. The Government ex-

* The state of Baroda is situated between latitude 21° and 23° north and longitude 73° and 74° east; area, 4,400 square miles; population, about 350,000.

pressed their decided opinion that the Guicowar was guilty of the offense imputed to him, but, as the commissioners were divided in opinion, refrained from punishing him for his crime. Nevertheless, in consideration of the "notorious misconduct of the Guicowar, his gross misgovernment of the state, and his evident incapacity to carry into effect the necessary reforms," considering also the opinion of the Government of India that "it would be detrimental to the interests of the people of Baroda and inconsistent with the maintenance of the relations which ought to subsist between the British Government and the Baroda state that his highness should be restored to power," a proclamation, dated April, 1875, ordered the deposition of the Guicowar from sovereignty, and the forfeiture by him and his issue of all the advantages and rights appertaining to it. The deposed Guicowar succeeded his brother Khundee Row in 1870. His antecedents were not favorable. He had been accused of being concerned in a conspiracy to murder his brother, by poison or other means, in 1863, and had in consequence been kept in confinement as a state prisoner during his brother's lifetime. He was then described in the residency records as being "intellectually feeble and apparently irresponsible for his actions." On Khundee Row's death Mulhar Row was believed to be the only legitimate lineal descendant of Peelajee Guicowar, the founder of the dynasty, and as such he succeeded to the government of the state. It was subsequently found that there were other claimants to the throne, whose titles were carefully investigated after the deposition of Mulhar Row. The Government of India at length decided in favor of Gopal, the son of Kaasi, who was adopted by the widow of the late Khundee Row, and solemnly installed as Guicowar on June 24th.

A great excitement was produced throughout India by the announcement that the Prince of Wales would pay a visit to the country. It was the first visit ever paid by a member of the royal family of England to the Indian Empire. The voyage was made on board the iron-clad steamer *Serapis*, which reached Bombay on November 7th. Grand preparations had been made to receive him. On landing, he was met by the civil, military, and municipal authorities, accompanied by seventy native princes and chiefs, and more than 200,000 people lined the streets through which the prince was conducted to the government-house. The prince in the course of November and December visited Poona, Ceylon, Madras, and Calcutta, and the capitals of several native princes. The English Government declared itself entirely satisfied with the enthusiastic reception the prince had everywhere received, and with the proofs of loyalty to British rule which the native population on this occasion had shown.

At the beginning of November, the British Resident of Perak, on the peninsula of Malacca,

was murdered by the natives. Several rajahs were believed to have instigated the attack, and a general outbreak of the Mohammedan population of the peninsula was at first anticipated. In great haste troops were sent from Singapore to Perak, which relieved the English residency of Perak from the siege by the Malays, but in an unsuccessful attack upon a neighboring stockade the English lost a captain and several men. A few days later larger reinforcements arrived from Hong-Kong and Calcutta. The Malays, who were commanded by the Maharajahs Ismail and Lela, were severely defeated on December 7th, and retreated to Kintah, which, on December 23d, was taken by General Colborne without any loss. The two Maharajahs fled to Siamese territory, and the English took possession of all the important places in the neighborhood.

Serious complications between British India and Burmah were caused by a treacherous attack made, near the northern frontier of Burmah, upon a British expedition which was to explore a land-route between British India and Western China. The anticipation of an impending war paralyzed the trade of British Burmah, and caused a general stagnation of business. In the district of Pegu, the *dacoits*, or armed robbers, displayed an unwonted audacity, and Lieutenant-Colonel Hamilton, the inspector-general of police of the province, lost his life in an encounter with them. During the troubles with Burmah, the natives of British Burmah showed a general disaffection toward British rule, which was eagerly fomented by Buddhist priests. On December 12th, an organized outbreak had been planned at Rangoon by Moug Bena, a political refugee from Upper Burmah, who intended to seize the town, massacre all the Europeans, and reestablish Burmese rule instead of the English. The English authorities received notice of the plot in the course of the day; speedy precautions were taken, a number of arrests made, and this scheme, it seems, was consequently abandoned.

In May, a petition was presented to the English Parliament, under the auspices of the East India Association, and signed by nearly 22,000 native inhabitants of India, residing in different parts of the Deccan, in the Bombay Presidency, complaining that the affairs of India receive but little attention at the hands of the British Parliament. Questions of the most vital importance, affecting the well-being of 200,000,000 of her Majesty's subjects, seldom enter into its deliberations, or at best are dragged to the far-end of the session, when they are disposed of with little or no attention. The few members who devoted their time to Indian topics in the last Parliament lost their seats at the new election, and there exist no means whereby the grievances and wants of the people of India can be efficiently represented. The petitioners, therefore, urge that it has become a political necessity that India should have direct representation in Parlia-

ment, and they point to the entire success of a similar experiment in respect of those parts of India which are administered by the French and Portuguese Governments. The petitioners represent that about sixteen members elected for the whole of India would at present suffice in the following proportions: four for Bengal, four for Bombay, four for Madras, two for the Northwestern Provinces, and two for the Punjab; and the electoral qualification might be the payment of fifty rupees as annual rates and taxes.

On May 13th a disastrous fire broke out in the city of Peshawer. Thirty-three *mohullas*, or wards, including the wealthiest portion of the city, sustained more or less damage. The number of houses destroyed is supposed to exceed 1,000, while upward of 800 detached shops were also burnt down. Nearly one-third of the inhabitants of the city were rendered houseless. The hill-station of Murree also suffered severely from a fire, which is said to have been the work of an incendiary. Two of the main streets in the bazaar, containing 300 houses, were completely destroyed.

INDIANA. At the beginning of the last fiscal year in Indiana, November 1, 1874, the State Treasury contained \$244,203.78. The receipts of the year following amounted to \$4,441,288.67, including \$2,176,410.19 belonging to the general fund, \$1,992,315.26 to the school-fund, \$24,642.80 to the college-fund, \$1,738.25 to the swamp-land fund, and \$1,978.39 to a fund of unclaimed estates. The disbursements amounted to \$4,019,893.83, of which \$1,997,244.86 was from the general fund, \$1,999,595.75 from the school-fund, \$20,355.74 from the college-fund, \$1,724 from the swamp-land fund, \$352.90 from that of unclaimed estates, and \$120.57 for excess of sinking-fund sales. This left a balance November 1, 1875, of \$421,394.85. The total value of real and personal property for 1875 was \$897,739,788, showing a decrease of \$57,117,692 from the preceding year. The public debt amounts to \$5,003,538.84. Of this amount \$1,098,755.12 is classified as foreign debt, as follows: 5 per cent. certificates, State stock, \$16,469.99; 2½ per cent. certificates, State stock, \$3,285.13; war-loan bonds, 6 per cent., \$139,000; temporary loan bonds, 7 per cent., due April 15, 1876, \$510,000; temporary loan bonds, 8 per cent., due December 1, 1876, \$200,000; temporary loan bonds, 7 per cent., due April 1, 1878, \$200,000; internal improvement bonds, due April 1st, \$30,000; total, \$1,098,755.12. The domestic debt is classified as follows: School-fund bond No. 1, January 1, 1867, \$709,024.85; school-fund bond No. 2, January 20, 1867, \$2,658,057.30; school-fund bond No. 3, May 1, 1868, \$184,284; school-fund bond No. 4, January 20, 1871, \$177,700; school-fund bond No. 5, May 3, 1873, \$176,767.07; total, \$8,904,783.22. The redemptions of the year amounted to \$274,000. The receipts of the Wabash & Erie Canal, for the year ending April 1st, were \$71,188.78; disbursements, \$6,678.30.

The forty-ninth session of the Indiana Legislature began on the 11th of January. The legal limit was reached March 8th, but as the two Houses had failed to agree on several important measures, the Governor called a special session to begin on the 9th, which came to a final adjournment on the 15th. On the 20th of January a vote was taken for a United States Senator to succeed Mr. Pratt. The vote in the Senate was 24 for Joseph E. McDonald, 15 for Mr. Pratt, and 9 for other candidates; in the House 54 for Mr. McDonald, 28 for Mr. Pratt, and 13 for other candidates; Joseph E. McDonald was declared elected in a joint convention of the two Houses.

The measure which occupied the largest share of attention was a new law for regulating the traffic in intoxicating liquors. The Supreme Court had decided that the existing law afforded no restraint upon the sale of liquors on Sunday, in the night-time, or on election-days, except in cases where the same were to be drunk on the premises. Two bills on the subject were reported from a committee of the House on which there was a good deal of discussion. One of these was a license act, and the other provided for local option. The license act finally passed by a vote of 56 to 39. It met with strong opposition in the Senate, and was a good deal amended. It finally passed both Houses in amended form at the special session. It prohibits the selling, bartering, or giving away of any spirituous, vinous, or malt liquors in quantities less than a quart at a time, or to be drunk on the premises, without a license to be obtained from the county commissioners. Persons applying for licenses must give twenty days' notice of their intention, and any voter may remonstrate in writing against the grant of their application on account of immorality or unfitness. Persons receiving licenses are required to give bonds in the sum of \$2,000 to keep an orderly house, obey the provisions of the law, and pay all fines and damages assessed against them. Fees of \$100 for license to sell spirituous, vinous, and malt liquors, and \$50 to sell vinous and malt liquors alone, must be paid to the county treasurer for the benefit of the school-fund, and cities and incorporated towns may require an additional fee of \$100. All licenses are to be granted for one year, and one year only. Penalties are affixed for selling liquors on Sundays, legal holidays, and election-days, and between the hours of 11 p. m. and 5 a. m., and for selling to any person after the wife, child, parent, brother, sister, or trustee of the township has given notice in writing that such person is in the habit of being intoxicated; also for selling or giving to any person under twenty-one years of age, or in a state of intoxication. Selling adulterated liquors is also made a misdemeanor punishable by fine and imprisonment, and keeping a disorderly house where liquor is drunk forfeits the license and incurs a fine.

An effort was made in the early part of the

session to secure the abolition of the grand-jury system, and a bill for the purpose received a vote of 47 to 48 on its passage. A bill was afterward passed reducing grand-juries to six members, and making the vote of five of them sufficient to secure an indictment. A bill was also introduced making the agreement of ten members of petit juries sufficient to give a verdict, but it failed to pass. A bill amending the school act provides for the election of county superintendents by the trustees of the several townships, who are to meet at the office of the county auditor for the purpose, on the first Monday in June. The superintendents hold office two years and perform the duties formerly belonging to the examiners. Several investigations were made by committees for the purpose of ascertaining wherein reductions could be made in the expenses of the government; acts passed in pursuance of their recommendations reduced the salary of the Governor from \$8,000 per annum to \$6,000, and the compensation of members of the Legislature to \$6 per day, and \$5 for every twenty-five miles of necessary travel.

Among the other acts passed were the following: making gambling a misdemeanor punishable by fine and imprisonment; prohibiting the selling of deadly weapons to minors; adding the President of Purdue University to the school board; making New Year's, Fourth of July, Christmas, Sundays, and Thanksgiving days, legal holidays; vesting police powers in conductors on railroad-trains; appropriating \$350,000 for additional facilities for taking care of the insane; requiring the reappraisal of property every five years; forbidding any director or manager in a State institution to appoint his relatives to official positions under him; authorizing any citizen to bring suit for the removal of office-holders who become intoxicated in office-hours; and fixing the tax-levy at thirteen cents on each hundred dollars of property valuation. A joint resolution was adopted asking Congress to award pensions of \$3 per month to soldiers in the Mexican War. A bill providing for the organization of camp-meeting associations, and the government and management thereof, was vetoed by the Governor on account of the extraordinary privileges granted. Certain proposed legislation affecting railroads, and providing for further supervision and restriction, met with vigorous opposition and was defeated.

Several investigations into the affairs of public institutions were ordered during the session and reports made thereon. A favorable report was made on the condition and management of the Northern Prison at Michigan City, various charges which had been made not being sustained by the evidence taken. Two reports were made on the Southern Prison at Jeffersonville. A majority of the committee found that there had been a good deal of mismanagement, and an illegal, fraudulent use of money appropriated for the support of the in-

stitution. Some of the officers were charged with using the public funds lavishly on their own houses, and for the entertainment of guests. This report closes with the following recommendation:

1. That A. L. Munson, director, L. S. Shuler, warden, A. M. Luke, deputy-warden, and John W. Sullivan, moral instructor, be removed from their respective offices. 2. That an appropriation sufficient to relieve the prison of its present indebtedness be made. 3. That the salaries of the warden and deputy warden be increased, and they deprived of all allowances or perquisites of every kind. 4. That such legal process be resorted to as shall be necessary to recover from any and all of those officers all of their fraudulent and illegal appropriations and peculations from the money and property of the State, including the convict-labor illegally used.

One of the committee signing this report added the following explanatory note:

In subscribing my name to this report, I would state that I do not fully indorse all that is said therein; but I am entirely convinced, from the evidence taken before the committee, that there has been gross mismanagement in the affairs of the prison, and misappropriations of the funds of the State, and that the public interests demand an entire change in the responsible officers of the institution. I therefore heartily concur in the recommendation that such change be made.

A minority of the committee, two members of six, made a separate report, in which they "differ totally from the statements and conclusions of the paper published as the report of the majority of the sub-committee of investigation of the State-prison South." In this it was charged that the majority of the committee had instituted an "inquest organized to convict the officers of the prison, utterly regardless of truth and decency," and "engaged in a persecution, not an investigation." Most of the allegations of the other report were met by counter-statements and contradictions, and the minority conclude as follows:

We are aware that this defense of our efficient public officer against a combined attack of personal malice, private interest, and party zeal, will be held, by those who had pronounced judgment before the case was tried, as an attempt at whitewashing. To such we say that we hold it to be far more honorable to whitewash than to blackwash our fellow-men. We concur in the opinion that "slander, foulest whelp of sin, makes hellish meals of good men's names," and have no sympathy with that depravity of mind which thinketh only evil. We hold the State bound to defend the character of her officers when unjustly assailed as well as to punish those who are convicted of wrong. If the tendency to denounce all public officers as corrupt and thievish does not cease, the time is not far distant when all honorable men will shun the public service, and the affairs of state being really left to the unprincipled and dishonest, we shall deservedly perish in our own corruption.

There appears to have been no definite action taken on these reports by the Legislature. An investigation into the management of the Deaf and Dumb Asylum was made by authority of the Legislature through a committee appointed by the Governor and the trustees of the institution, and their report was made to

the Governor some time after the adjournment of the Legislature. The charges to be investigated were made against the superintendent in a communication to the Legislature, signed "W. Brown," and were: improper intimacy with female pupils, misapplication of funds, and cruelty to the inmates. The report entirely refutes these charges, and the committee declared that they had not "discovered anything that should impair the confidence of the people in the present management of the institution," and pointed to its "present condition and efficiency, and its past record, as an honor and credit to the State."

Among the other subjects of investigation were the Wabash & Erie Canal, and the project for building a new State-House. A communication had been made by the Governor, informing the Legislature that suit had been brought against the trustees of the canal by a certain stockholder in New York, the purpose of which was to secure the sale of the work for the benefit of the creditors and stockholders, on the ground that in its dilapidated condition and with the powers accorded to the trustees the trust could not be properly administered. The subject was examined into by a committee, and a report made in favor of some action for securing the canal to the State, and putting it in a condition to compete successfully with the railroads in the business of transportation. It was admitted that it was in a bad condition and could not be profitably used as it was, and it was feared that it might fall into the hands of the railroad companies.

The State-House Committee made a report on the need of a new Capitol building, and the several plans that had been presented, and submitted a bill providing for five commissioners to be appointed by the Governor, to build a new State-House and direct the whole enterprise. It fixed upon the old State-House grounds as the site, limited the cost to \$2,000,000, and made other provisions regarding the selection of a plan, employing an architect, making contracts, etc. The bill was not passed.

A Temperance Convention held at Indianapolis, on the 11th of June, adopted the following resolution regarding a memorial to Congress:

Inasmuch as the traffic in intoxicating liquors is a great national evil, causing annually a fearful destruction of life and property, and seriously affecting the moral, social, and material interests of the whole country; and in the judgment of this convention it is the duty of Congress to exercise all its legitimate power for its suppression: therefore—

Resolved, That this convention respectfully memorialize the United States Senate and House of Representatives, in Congress assembled, to appoint a national commission to investigate and report upon the effects of the alcoholic liquor traffic upon pauperism, crime, revenue taxation, and the general welfare of the country.

2. To prohibit the manufacture and sale of such beverages in the District of Columbia and the Territories of the United States.

3. To prohibit the importation of alcoholic liquors from foreign countries.

4. To require total abstinence from all such beverages on the part of officials and subordinates in the civil, military, and naval service of the United States.

5. That the executive committee of the Woman's Temperance Union of Indiana be instructed to prepare a petition to the Senate and House of Representatives, covering the ground taken by this memorial, and to circulate it throughout the State.

A convention of colored men was held at Indianapolis on the 21st of September, the purpose of which is expressed in the following resolutions:

Whereas, We, the colored men of the State of Indiana in convention assembled, in view of the many outrages perpetrated upon our race in the Southern States, have reasons to believe there is inadequate protection to life and property; and in view of the recent amendment to the Constitution of the United States whereby we claim that all distinctions between races in the laws or constitution of the separate States are illegal: therefore, we hold the recent suit brought against colored men for marrying contrary to the provisions of the "black laws" unwarranted, and that these "black laws" should be removed from the statute-books of the State.

Resolved, That we call upon good men of all parties to see to it that the next Legislature remove these invidious distinctions from our laws.

That we commend as worthy the sanction of the nation the resolution of the Congress of the United States, which gives the approval of that body to President Grant's wise course in protecting the government of Louisiana from the treasonable mob violence which sought its overthrow; and we consider the admission of Hon. P. B. S. Pinchback to his seat in the Senate as necessary to a satisfactory and equitable adjustment of the affairs of that unhappy State.

That we believe it to be the duty of the General Government to interpose its strong arm in protection of the colored people of Mississippi against the mob violence of the White-Leaguers of that State.

That it is the duty of township trustees in our State to establish schools for the education of our youth, where they have failed to do so, in compliance with the law of the State, and demand that we shall suffer no longer from such neglect, and we recommend our people to bring suits, if necessary, to compel compliance with the provisions of the law.

That to the extent of our power we will aid and defend all persons indicted under the existing "black laws."

A decision was rendered in one of the State courts in June on the question of what constituted a valid marriage contract. The parties had entered into the following agreement: "Whereas the courts of law have decided that marriage is a civil contract, and governed by the same rules as all other contracts; therefore, we hereby agree that this contract exist and be in force during our physical lives, provided our mutual love and natures blend as now, but to terminate without prejudice by the wish of either party if love shall ever cease to be mutual, which event we trust and believe never will occur." The prosecution urged that the conditional character of this agreement showed that neither party believed the marriage legal. But the court was of the opinion that it did not show that either party believed the marriage illegal, although it showed ignorance of what courts of law had

decided. The conclusion reached was, that the parties contracted a valid marriage, such as could only be dissolved by death or decree of a competent court; that their agreement to dissolve the contract by their own consent was, in law, void; that if they should act under this stipulation, and thereafter enter into similar relations with other parties, it would be bigamy; and that, as the marriage was valid, the parties were not guilty, as charged in the indictment.

IOWA. The State census of Iowa, taken this year, shows a total population of 1,350,544, an increase of 99,211 since 1873. The average yearly increase for ten years has been 59,584.5. In 1846, when Iowa was first set off from Wisconsin as a Territory, her population was 97,588. The first State census was taken in 1847, when it was shown to be 116,651. The average annual increase from 1846 to 1856 was 42,147, or 43.19 per cent.; from 1856 to 1865 it was 26,183, or 5.04 per cent.; from 1865 to 1875, 59,584, or 7.86 per cent. At the present time the whole population consists of 697,057 males and 647,420 females; colored, 3,123 males and 2,853 females. Of the entire population 552,482 were born in the State, 581,550 in other parts of the United States, and 203,501 in foreign countries. The total number of persons under twenty-one years of age is 496,471; of those over sixteen years old, 8,148, or one in 165, cannot read. There are in the State 249,624 families, and 221,568 dwelling-houses. There are nearly 13,000,000 acres of improved land, of which 9,645,961 acres were under cultivation in 1874, producing 43,280,918 bushels of spring and 850,889 bushels of winter wheat, 146,993,570 bushels of corn, 432,008 of rye, 29,213,891 of oats, 3,534,291 of barley, and 160,805 bushels of buckwheat. In the same year there were 698,205 horses in the State, 12,160 thoroughbred cattle, 3,086,161 hogs, 724,204 sheep. The value of farm products was \$124,407,078; garden produce, \$726,229; orchard products, \$1,215,659; small fruits, \$488,259; products of the herd, \$42,261,089; of the dairy, \$8,398,212; of the forest, \$3,467,020; value of articles manufactured, \$39,263,319; of coal mined, \$2,600,140; of building-stone, \$202,000. There were 99 colleges, academies, and other (private) educational institutions, of which 22 were Roman Catholic. The number of teachers employed in public schools was 6,280 males and 10,713 females; average monthly compensation of the former \$35.98, of the latter \$27.66; whole number of children of school-age, 506,381; number enrolled in the schools, 365,115; average attendance, 227,115. There were 8,154 frame, 650 brick, 268 stone, and 153 log school-houses, with an aggregate valuation of \$9,499,075. The total annual school expenditures are set down at \$4,429,874.

The geological survey of the State is making good progress. The several formations of rock which appear on the surface in different local-

ities have been classified as follows, beginning with the lowest: the Lansing formation, appearing in the bluffs above the Mississippi, and composed of the Potsdam sandstone and the lower magnesian limestone, being the lowest divisions of the lower Silurian found in the State; the McGregor formation, represented by the St. Peter's sandstone and containing the pictured rocks below McGregor, also belonging to the lower Silurian; the Dubnque formation, belonging to the lower and upper Silurian and containing lead-bearing and fossiliferous limestones, shales, coral-reefs, etc.; the Davenport formation, belonging to the Devonian system, and containing fossils, sandstone, limestone, and fine marbles; the Marshalltown formation, of the lower sub-carboniferous series, containing limestone-marble of various colors, building-stone, gypsum, oolitic layers, etc., the Keokuk formation, belonging to the sub-carboniferous, containing limestone of different colors, chert-beds, geodes of quartz and chalcedony, calcareous spar, zincblende, etc.; the Burlington formation, of the sub-carboniferous, with chert, limestone, argillaceous strata, etc.; the St. Louis group, highest of the sub-carboniferous, containing quarries of Kinderhook chert; the carboniferous formation and coal measures; the cretaceous, composed chiefly of coarse ferruginous sandstone; the drift, covering all the northwestern portion of the State and a large part of the southwestern; the lacustrine, covering most of the western slope below Sioux City. Lead is quite extensively mined in the vicinity of Dubnque, the yield being about 2,000,000 pounds last year.

At the beginning of the last fiscal period of two years, November 1, 1873, there was a balance in the State Treasury of \$31,217.66. The receipts on account of general revenue for the two years were \$1,947,412.24; disbursements, \$1,975,512.24; leaving a balance on November 1, 1875, of \$3,114.66, which would be increased to \$150,758.15 by the sums remaining in the hands of county treasurers. The estimated receipts for the next two years are \$1,962,000; ordinary expenditures, \$1,553,927. The State tax is two mills on the dollar of property valuation. Local taxes are much higher, and the amount raised for school purposes alone amounted to \$3,764,784.30 for the two years. The permanent school-fund is \$8,098,490.74, and the income from it distributed in the last two years was \$623,833.99. The funded debt of the State has been liquidated. There are now 3,850 miles of railroad in the State, the additions in the last two years being narrow-gauge roads from Des Moines to Ames, and from Keosauqua to Summit Station, and ordinary-gauge lines from Albia to Knoxville, and from Grinnell to Montezuma.

The State Penitentiary at Fort Madison contains 809 convicts, and has a capacity for 318. Improvements are contemplated which will increase its capacity to 504. A Reform School for juvenile delinquents has been established

at Eldora, though the main building has not yet been erected. An investigation into the management of this institution was made in April, and resulted in the resignation of the superintendent, who was charged with incompetency. The Hospital for the Insane at Mount Pleasant has required \$220,518.17 for its support during two years, and has had an average of 506 inmates. The institution is overcrowded, and improvements are contemplated. The Hospital for the Insane at Independence is but partly finished, and now accommodates 250 patients. It will cost \$15,000 to complete the main building and north wing, and the commissioners ask for \$300,000 for the construction of the south wing. Branches of the Soldiers' Orphans' Home are maintained at Cedar Falls and Davenport, that at Glenwood having been discontinued. The number of inmates has decreased in two years from 508 to 298. The Governor has recommended the use of the building at Glenwood for an Inebriate Asylum. The Institution for the Education of the Deaf and Dumb has 158 pupils, and the erection of a new west wing at a cost of \$65,000 is contemplated. The State University has 620 students. Considerable progress has been made in the construction of the new Capitol at Des Moines, the corner-stone of which was laid in 1871. It is to cost \$1,500,000, and the amount expended up to November 30th was \$750,000.

The Democratic Executive Committee of Iowa, in calling the State Convention of the party, invited all Democrats, Liberal Republicans, and anti-monopolists, to take part. The convention was held at Des Moines on the 24th of June. The nominations made were: For Governor, Shepherd Leffler, of Des Moines; for Lieutenant-Governor, E. B. Woodward, of Lucas; for Judge of the Supreme Court, W. J. Wright, of Dubuque; for Superintendent of Public Instruction, A. R. Wright, of Woodbury. The following platform was adopted, after considerable discussion and some spirited opposition, coming chiefly from the anti-monopolists:

The Democrats, Liberal Republicans, and anti-monopolists of the State of Iowa in delegate convention assembled, declare, as a basis of permanent organization and united action, the following principles:

1. A firm adherence to the doctrine of political government as taught by Jefferson, Madison, and other fathers of the republic.
2. A strict construction of the Constitution in all measures involving constitutional powers.
3. The supremacy of the Federal Government within the sphere and the reservation of the local authority of the Constitution, as opposed to the concentration of all powers in a strong centralized government.
4. Absolute prohibition of military interference with the local State elections, and the peaceful assembling and organization of State Legislatures except in the manner clearly defined in the Constitution.
5. Honesty in the administration of public offices, and strict economy in the public expenditures.

6. All officers to be held to a rigid accountability for misuse of the public funds, or for the prostitution of their powers for private use.

7. Preservation of all the legal rights of every citizen, without regard to race or color.

8. Reservation of the public lands for the benefit of actual settlers, and opposition to any further grants to corporate monopolies for any purpose.

9. Restoration of the presidential salary to \$25,000. No third term.

10. That we are in favor of resumption of specie payments as soon as the same can be done without injury to the business interests of the country, and meantime a sufficient supply of national currency for business purposes. Opposition to the present national banking law.

11. A tariff on imports that will produce the largest amount of revenue with the smallest amount of tax, and no imposition of duties for the benefit of manufacturers at the expense of agricultural interests.

12. We are in favor of the repeal of the present prohibitory liquor law, and the enactment of a well-framed, practical license law, strictly enforced, as the best guard against and the safest solution of the evils of intemperance.

13. That we are opposed to all legislation that restricts any citizen in his individual or social rights and privileges.

14. With this declaration of principles and policy, in the language of our brethren in Ohio, we arraign the leaders of the Republican party for their extravagant expenditure and prodigate waste of the people's money; for their oppressive, unjust, and defective system of finance and taxation; for their continued tyranny and cruelty to the Southern States of the Union; their squandering of the public lands; their continuance of incompetent and corrupt men in office, at home and abroad, and for their general mismanagement of the Government; and we cordially invite all men, without regard to past party association, to cooperate with us in expelling them from power, and in securing such an administration of public affairs as characterized the purer and better days of the republic.

The Republican State Convention was held at Des Moines on the 30th of June. Ninety-four counties were represented and nearly 640 votes were cast. Samuel J. Kirkwood, of Johnson County, was unanimously nominated for Governor. The other candidates were: J. G. Newbold, of Henry County, for Lieutenant-Governor; Austin Adams, of Dubuque, for Judge of the Supreme Court; and Alonzo Abernethy, of Crawford, for Superintendent of Public Instruction. The following platform was agreed to:

We, the representatives of the Republican party of the State of Iowa in convention assembled, do adopt the following platform of principles:

Resolved, 1. That we declare it a cardinal principle of Republican faith that the republic is a nation, one and indivisible, within which the constitutional rights of the States and of the people to local self-government must be faithfully maintained.

2. That we favor the early attainment of a currency convertible into coin, and therefore advocate the gradual resumption of specie payments by continuous and steady steps in that direction.

3. That we are in favor of a tariff for revenue, so adjusted as to encourage home industry.

4. That the earnest effort of the Government to collect the revenues and prevent and punish frauds, has our unqualified approval.

5. That we are opposed to further grants of lands to railways or other corporations, and we demand a

reservation of the public domain for settlement under the homestead laws and for other *bona-fide* settlers.

6. That we demand such a revision of the patent laws as will relieve industry from the oppression of monopolies in their administration.

7. That we cordially approve the policy of the present Administration in the settlement of difficulties between ourselves and other nations, by arbitration instead of appealing to arms.

8. That the Republican party of Iowa is opposed to a third term in the presidency.

9. That we demand that all railway and other corporations shall be held in fair and just subjection to the law-making power.

10. That we stand by free education, our public-school system, the taxation of all for its support, and no diversion of the school-fund from the public schools.

11. That our national and State administration of public affairs has our hearty approval.

12. That we cordially invite all who are opposed to the restoration of the Democratic party to power, to forget all past political differences and unite with the Republican party in maintaining the cause of true reform.

13. That the persistent and tyrannical efforts of the enemies of the Union, by murder and intimidation of the newly-enfranchised citizens, and the ostracisms and proscriptions of the white Republicans of the South, for the purpose of rendering null and void the constitutional amendments, merit the condemnation of every honest man. That we heartily indorse the action of President Grant in enforcing the laws when called upon to do so by the proper authorities of the State.

An attempt was made to incorporate a resolution in favor of prohibition of liquor-selling, but without success.

A State Temperance Convention had been called, to meet at Des Moines on the day preceding the Republican Convention. It met on that day, and had a spirited discussion on the following resolution:

Whereas, The so-called Democratic party, in convention assembled on the 24th instant, adopted a plank in its platform in favor of a license law, which means opposition to, and the final repeal of, our present prohibitory law:

Resolved, That it is the sense of this meeting that the Republican party, at its convention on the 30th instant, ought to insert in its platform a plank opposing the repeal of said prohibitory law.

Subsequently the following were reported by the committee on resolutions, and adopted:

Resolved, That it is the object of this convention to consolidate the temperance vote of the State of Iowa, and to wield that vote, as far as possible, in favor of such party or candidate as will sustain the prohibitory laws of the State.

Resolved, That the Republican party of Iowa, having been organized upon a great moral issue, and sustained in part by the moral sentiment of the State, owes it to that moral sentiment, as well as to the public weal, to maintain the foregoing principles in its platforms and in the selection of its candidates, and in its legislators.

The convention then adjourned to await the action of the Republicans. When it transpired that the latter had made no declaration on the subject of temperance legislation, the following was adopted as the platform of the party:

Whereas, Existing political parties have ignored prohibition:

Resolved, That the temperance people of Iowa are forced to seek promotion of their cause in such a way as will be most effective, without regard to parties; that the laws of the State relating to the desecration of the Sabbath should be rigidly enforced; that there should be no diversion of the school-fund for sectarian purposes; that political organizations should not control men in their actions on moral questions; that county organizations be formed to elect temperance men to the Legislature.

The question of nominating a State ticket was left to a central committee, consisting of one member from each congressional district. At a subsequent date J. H. Lozier was nominated as candidate for Governor.

The election took place on the 12th of October, and resulted in the choice of the Republican candidates by large majorities. The total vote for Governor was 218,417, of which Kirkwood received 125,058, Leffler 93,359, and Lozier between 1,000 and 2,000, making Kirkwood's majority over Leffler 31,699. Of the fifty members of the Senate elected, thirty-five were Republicans; six were elected two years before as anti-monopolists, having previously been Republicans, and were understood to have virtually returned to the Republican party; nine were declared Democrats. Of the one hundred members of the House of Representatives, seventy-one were Republicans, and twenty-nine Democrats.

The State Grange of Patrons of Husbandry held its annual session at Des Moines, beginning December 14th, and continuing five days. The report of the State agent showed the assets of the organization to amount to \$18,761.16, of which \$1,040.80 consisted of cash in bank, \$2,050.83 dues to the agency, and the balance invoices of implements, etc. The amount received and disbursed by the Treasurer, during the year, was about \$22,000. The time of the session was chiefly occupied with discussions, or various reports and resolutions. Among the resolutions adopted was one providing for crop reports from the subordinate granges, the facts thus obtained to be classified and arranged by the Secretary, and by him given to the agricultural papers for publication; and one, asking the General Assembly to pass such laws as shall compel banks of deposit to give sufficient security in real estate first mortgages to be deposited with and held by the Auditor of the State, as security in favor of depositors, in case of failure of said banks.

A decision was rendered in the United States Circuit Court for the District of Iowa, by Judge Dillon, in May, sustaining the validity of the law of March, 1874, "to establish reasonable maximum rates of charges for the transportation of freights and passengers on the different railroads of this State." This law went into effect in July, 1874, and most of the railroads complied with its provisions. In other cases suits were begun to compel compliance. The Burlington & Missouri River Railroad, operated by the Chicago, Burlington & Quincy Railroad Company, obtained a temporary in-

junction, restraining the Attorney-General from prosecuting that company, and the State Treasurer from paying out money for the support of such litigation. The question brought before Judge Dillon was that of making the injunction perpetual. The ground on which the injunction was asked was, that the company had exclusive power to fix the measure of its own compensation, and that the act of 1874 was a violation of its chartered rights. In denying the injunction the learned judge said:

Without further enlarging upon the public nature and uses of railways, or undertaking to review the authorities cited, or examine the positions assumed by counsel, which would necessarily lead through a broad field of discussion, I content myself, on this branch of the subject, with stating, as my conclusion, that the Legislature has not expressly conferred on railway corporations in this State the exclusive power to fix their own charges; that such a power cannot be deduced by implication from the constituent act of the corporations, and that whatever powers are conferred in this respect are subject to an implied condition that they shall not be oppressively or unreasonably exercised, and also subject to the future exercise of the police regulations of the State or any other power possessed by the State, properly legislative in its nature, which includes the power to regulate, consistently with the charter, all of the franchises granted, and to prescribe and limit the amount of toll or charges which it shall be lawful to take.

An appeal was taken from the decision to the Supreme Court of the United States.

In the case of Isaac Brandt, indicted for embezzlement while Deputy State Treasurer, a majority of the judges of the State Supreme Court at the September term sustained a demurrer to the indictment, and reversed the decision of the Circuit Court. The questions discussed by Chief-Justice Miller, in giving the opinion of the court, were, whether the grand-jury that found the indictment was legally constituted, whether the Deputy Treasurer was an "officer" in the meaning of the law, and whether the indictment was sufficiently explicit. The law requires that a list of seventy-five persons to serve as jurors shall be chosen in each county, to be apportioned among the election precincts by the County Auditor, and that, from these lists, the clerk of the District Court and the sheriff of the county shall make the draft of grand-jurors. In 1874, when this indictment was found, no return was made from one township, and the jury-list had but seventy-three names, and in drawing the grand-jury the deputy-sheriff acted instead of the sheriff. The court decided that the former defect was not material, but the sheriff not acting, as required by law, was fatal to the legality of the grand-jury. It was also set up that selecting the foreman from talesmen, and not from the regularly drawn jurors, was illegal, but that point was overruled. The claim that the Deputy State Treasurer was not an officer within the meaning of the law was not sustained, as the Treasurer was authorized by statute to appoint a deputy who was required to take the regular oath of office. The first count of the indictment

charged that the defendant did "unlawfully and feloniously loan without authority of law the sum of two hundred and twenty-nine thousand six hundred and ninety dollars and forty cents" of the public money of the State, which was in his charge for safe keeping, etc. This was claimed to be insufficient, as it did not state to whom the money was loaned, or whether to one person, or in different sums to different persons. The court sustained this point as invalidating the indictment. The second count charged the defendant with converting five thousand dollars of the public money to his own use, without stating how or in what manner it was converted. This was also decided to be insufficient, as it charged "a legal conclusion rather than a fact." And finally, it was decided that the indictment failed to charge the crime of embezzlement "for that it does not charge that any of the public money, with the safe keeping of which the defendant was charged, has been lost to the State or unaccounted for." The opinion of the Chief-Justice, in which these conclusions were set forth, was fully concurred in by Judge Cole. Judge Day concurred, except on the points deciding the first and second counts of the indictment insufficient in not giving particular circumstances. As to these he agreed with Judge Beck, who submitted a dissenting opinion, disagreeing altogether with the conclusions of Chief-Justice Miller. A motion was made for a rehearing on the appeal in December, but was denied, Judge Cole giving the opinion, which agreed substantially with that formerly pronounced by Miller, and Judge Beck submitting a dissenting opinion again. The result was a complete failure of the prosecution of Brandt for embezzling the funds of the State, under the indictment found in 1874.

Judge O. C. Cole of the Supreme Court tendered his resignation on the 17th of November, to take effect January 17, 1876, giving as his reason the inadequacy of the salary, four thousand dollars a year, to the support of his family. For ten years he had added to his income by acting as Professor of Law, editing the *Western Jurist* and a series of Iowa reports, and by other labors, but the business of the court had so increased as to leave him no time for these pursuits, and he felt compelled to resign.

ITALY, a kingdom of Southern Europe. King, Victor Emmanuel II., born March 14, 1820; succeeded to the throne of Sardinia, on the abdication of his father, March 23, 1849; proclaimed King of Italy by vote of an Italian Parliament, March 17, 1861; married, April 12, 1842, to the Archduchess Adelaide of Austria; widower January 20, 1855.—Children of the King: 1. Heir-apparent, Humbert, Prince of Piedmont, born March 14, 1844; married, April 22, 1868, to Princess Margareta of Genoa; offspring of the union is a son, Victor Emmanuel, Prince of Naples, born November 11, 1869. 2. Amadeo, Duke of Aosta, born May

30, 1845; King of Spain from December 4, 1870, to February 11, 1873; married, May 30, 1867, to Princess Maria della Oisterna, born August 9, 1847; offspring of the union, three sons: Emmanuel, Duke of Apulia, born 1869; Victor, Duke of Turin, born 1870; Louis, born 1873. 3. Clotilde, born 1843, wife of Prince Napoleon Bonaparte. 4. Maria Pia, born 1847; wife of King Luiz of Portugal.

The ministry* remained during the year 1875 unchanged.

According to the latest census, taken in 1871, the population was 26,801,154. The movement of population, from 1870 to 1873, was as follows:

YEAR.	Marriages.	Births, including Stillborn.	Deaths, including Stillborn.	Stillborn.	Surplus of Births.	Estimated Population.
1870.	186,966	976,148	797,922	94,658	178,826	25,913,600
1871.	192,839	984,559	805,837	26,589	181,322	26,501,154
1872.	202,861	1,050,228	857,044	29,546	198,184	26,994,838
1873.	214,906	1,018,589	842,824	28,351	171,215	27,165,558

With regard to the birthplace, the population was divided into 26,720,326 native-born, and 80,828 foreign-born. The foreign-born population was divided as follows:

Austro-Hungary.....	18,660
France.....	15,681
Switzerland.....	10,623
Great Britain.....	4,893
Germany.....	3,159
Russia.....	1,273
Greece.....	1,082
Spain.....	772
Turkey.....	738
Belgium.....	429
Holland.....	268
Sweden, Norway.....	227
Denmark.....	186
Portugal.....	124
America.....	1,978
Africa.....	820
Asia.....	57
Australia.....	4
Unknown descent.....	19,904
Total.....	80,523

ESTIMATES.	1871.	1872.	1873.	1874.
Expenditures.....	1,277,780,755	1,366,934,649	1,384,618,021	1,366,734,209
Receipts.....	1,198,649,085	1,296,598,880	1,290,785,260	1,294,205,835
Deficit.....	64,232,750	70,835,769	98,582,752	102,518,874

In the budget for 1875 the revenues and expenditures were estimated as follows:

Revenue.	Lire.
Land-tax.....	186,084,168
Income-tax.....	179,207,051
Duty on grinding.....	73,114,200
Mutation-tax.....	141,108,251
Registration.....	2,518,702
Customs.....	101,000,000
Consumption duties (octroi).....	58,000,000
Tobacco and salt.....	167,000,000
Lottery.....	79,427,308
Trade, state railroads, telegraphs, and fees.....	76,814,693
Miscellaneous receipts.....	10,406,520
State property.....	65,418,970
Returns of payment.....	89,076,612
Extraordinary receipts.....	117,606,718
From church property.....	52,045,875
Total revenue.....	1,396,307,986

* See the names of all the members of the cabinet, with brief biographical notices, in the ANNUAL CYCLOPEDIA for 1874.

The number of Italians living abroad in 1871 was estimated, on the basis of the consular reports, as follows:

In Europe:	
France.....	118,496
Austro-Hungary.....	26,889
Switzerland.....	17,950
Other states.....	50,081—218,896
In the Levant and North Africa.....	44,840
In the United States.....	70,000
In South and Central America.....	147,547
Argentine Republic.....	68,000
Uruguay.....	32,000
In Asia and Australia.....	1,100
Total.....	476,408

The religious statistics of the kingdom, in 1871, were as follows: Catholics, 26,658,679; Protestants, 58,651; Israelites, 35,356; others, 48,468; total, 26,801,154.

In 1874 there were 42,920 schools in Italy, of which 35,583 were public, and 7,337 were private. In 1873 there were 42,118 schools: 34,781 public, and 7,337 private. The number of scholars in 1874 was 1,836,381, of which 1,009,020 were boys, and 827,361 girls. In 1873 there were 1,797,596 scholars, of which 993,120 were boys, and 804,476 were girls. The number of teachers was 45,596 in 1874, and 44,430 in 1873. Of these 8,927 were priests in 1874, and 9,329 in 1873. In 1874 the Government spent, for elementary instruction, 232,112 lire (1 lira = 19.3 cents), the provinces 129,665 lire, the communes 22,067,133 lire, and other bodies 611,727 lire. In 1873 the Government spent, for the same purpose, 280,652 lire, the provinces 173,922 lire, the communes 21,504,140 lire, and other bodies 612,193 lire.

The financial accounts for the years 1872, 1873, and 1874, were as follows, in lire (1 lira = 19.3 cents):

Expenditure.	Lire.
Finances:	
Dotation.....	761,991,782
Charges for collection.....	168,627,117
Asse ecclesiastico.....	15,023,582
Reserve funds.....	9,450,000—955,092,481
Ministry of Justice.....	84,012,983
“ Foreign Affairs.....	5,926,743
“ Public Instruction.....	28,124,050
“ Interior.....	65,419,289
“ Public Works.....	148,622,556
“ War.....	308,038,299
“ Marine.....	46,488,198
“ Commerce and Agriculture.....	12,432,521
Total expenditure.....	1,494,152,580

The aggregate length of railroads in operation, in 1873, was 6,881 kilometres; in 1874, 7,372. The aggregate length of telegraph-lines, at the close of 1873, was 20,192 kilometres; the length of wires, 69,373.

The total debt of the kingdom amounted in

January, 1875, to a nominal capital of 9,883,-589,226 lire, divided as follows:

	Lira.
1. Rentes, 5 per cent.....	6,902,712,918
2. Rentes, 3 per cent.....	213,602,881
3. Perpetual rents of the Papal See.....	64,500,000
4. Special debts.....	1,183,290,045
5. Miscellaneous debts (including unpaid interest).....	406,472,450
Bank-notes in circulation, December 31, 1873.....	198,029,100
Conto correntes.....	84,991,942
Notes of National Bank which are legal tenders.....	890,000,000
Total.....	9,883,589,126

The budgets and debts of the communities and provinces are given in the following table:

BUDGETS.	Receipts, 1872.	Expenditures, 1872.	Debt at the Expiration of 1873.
	Lira.	Lira.	Lira.
Communities.....	881,981,218	888,337,495	536,109,773
Provinces.....	88,228,095	87,932,639	56,401,390

The strength of the Italian Army, on July 1, 1875, was as follows:

ARMY.	Officers.	Under Arms, (Peace Footing).	Men on Furlough.	Total (War Footing).
Standing army.....	18,694	204,255	205,171	409,426
Reserve.....	1,016	14,786	163,409	181,195
Provincial militia.....	2,810		277,265	277,265
Officers of the reserve.....	1,616			
Total.....	18,886	219,041	648,845	867,856

The navy consisted, on September 1, 1875, of the following classes of vessels (in lire):

NAVY.	No.	Guns.	Tons.	Horse-power.
Men-of-War:				
Iron-clads.....	16	180	79,380	11,400
Screw-steamers.....	14	101	20,889	8,740
Wheel-steamers.....	10	46	9,504	2,540
Total men-of-war.....	40	277	109,673	17,680
Transports:

Wheel-steamers.....	7	..	1,073	836
Total transports.....	25	58	19,294	3,272
Total navy.....	65	335	128,967	20,952

The movement of the special foreign trade, from 1871 to 1874, was as follows (in lire):

YEAR.	OFFICIAL VALUE.		COMMERCIAL VALUE.	
	Imports.	Exports.	Imports.	Exports.
1871...	890,100,000	756,600,000	968,700,000	1,065,500,000
1872...	1,189,200,000	1,106,800,000	1,186,600,000	1,167,200,000
1873...	1,184,400,000	1,287,800,000	1,286,700,000	1,183,200,000
1874...			1,806,000,000	965,500,000

The movement of navigation, in 1873, is exhibited by the following table:

SHIPPING.	ENTERED.		CLEARED.	
	Vessels.	Tons.	Vessels.	Tons.
Long navigation....	19,991	4,882,699	19,929	4,885,730
Coast navigation....	100,876	6,495,761	98,990	6,439,136
Total.....	120,866	10,878,460	118,919	10,924,916

On January 25th Signor Cairoli, a member of the Left, moved in the Chamber of Deputies a vote of censure against the ministry on account of the arrests made in the Villa Ruffi; but the Chamber rejected the motion by the large majority of 232 yeas against 121 nays. On February 18th a similar motion, introduced by the same deputy, to censure the ministry for having influenced the elections, was also negatived by 147 against 100 votes.

After a long discussion on the death-penalty, the Italian Senate, on February 25th, declared by 73 against 36 votes in favor of the article of the new criminal code which retains the penalty. A motion to exempt Tuscany, where the death-penalty has been abolished for about twenty years, was negatived, on the ground that there must be a uniformity of laws throughout the kingdom. An amendment was, however, adopted which provides that the penalty shall no longer be publicly inflicted.

On March 15th the Minister of Finance presented the budget for 1875, and the preliminary budget for 1876. He expressed the hope that he would succeed in establishing in 1876 a complete balance between revenue and expenditure.

On April 5th the Emperor of Austria paid a visit to the King of Italy at Venice. The reception given to the Emperor, not only on the part of the royal family, but of the entire population, was most enthusiastic. The Italian journals generally regarded the meeting of the two monarchs with much satisfaction, and declared that the friendship of Italy and Austria was one of the foundations of the peace of Europe. The ministers of the two countries who accompanied the monarchs discussed the basis of a new commercial treaty.

At the beginning of May the Chamber of Deputies was the scene of violent debates on the relations between church and state. On May 4th Signor Vigliani, the Minister of Justice, replied to an interpellation submitted by Signor Mancini respecting the relations between church and state. He said the question of the honorable member was an impeachment of the ecclesiastical policy of the ministry. The accusation was only based upon suppositions which he showed to be unfounded, and upon censures directed against the Papal guarantee law—a legislative act which was in harmony with the exceptional position occupied by Italy. In conclusion, the minister stated that the sole aim of the cabinet was to regulate the relations between the two powers in accordance with the existing law. Signor Mancini maintained his views, and moved an order of the day calling upon the ministry to defend the dignity of the nation, the laws and the rights of the state, and to bring in immediately a bill regulating the tenure of ecclesiastical property on the basis of liberty for the lower ranks of the clergy and the laity. After being continued for several days, the debate terminated in the adoption of an order of the day,

30, 1845; King of Spain from December 4, 1870, to February 11, 1878; married, May 1867, to Princess Maria della Gisierna, born August 2, 1847; offspring of the union, three sons: Emmanuel, Duke of Aosta, born 1869; Victor, Duke of Turin, born 1870; Louis, born 1873. 3. Clotilde, born 1843, wife of Prince Napoleon Bonaparte. 4. Maria Pia, born 1847; wife of King Luis of Portugal.

The ministry* remained during the year 1875 unchanged.

According to the latest census, taken in 1971, the population was 26,801,154. The movement of population, from 1870 to 1971, was as follows:

	Marginal	Births, including Stillborns	Deaths, including Stillborns	Balances	Surplus or Deficit	Amount Expended
1976	188,986	976,145	797,589	84,058	175,565	259,623
1977	192,539	956,550	803,897	28,259	191,292	219,551
1978	202,361	1,020,228	827,944	29,545	198,593	228,138
1979	214,905	2,018,520	942,294	29,291	127,297	156,588

With regard to the birthplace, the population was divided into 26,720,996 native-born and 80,828 foreign-born. The foreign-born population was divided as follows:

[illegible]

gh the influence of Kiddo and Itagaki
fect of deliberative assemblies was re-
med, and on the 14th of April an im-
proclamation was issued creating a body
"Genero," and which will be composed
ators appointed by the Mikado; also a
called "Daishen," the functions of which
e to adjust and administer a judicial sys-

The question of an elective House was reserved for future consideration. The proposition is regarded as making the greatest concession compatible with a proper regard for the public safety, and to the desires of the party asking parliamentary reforms, led by Inagaki, Kiddo, Soyesima, and others less prominent. On the same day two or three minor departments were abolished. On April 17th Soyesima and Goto, former members of the Imperial Council, but out of office since the spring of 1873, were called to the Mikado to be heard on the question of the new Senate. They were the leaders of the movement for popular representation in the winter of 1873.

The first meeting of the *Chihokuan Kuaigi*, or Parliament of the chief officers of the *Fu* and *Ken*, called together by imperial edict for purposes of deliberation, was held at the Honganji, a temple of the Shinto sect at Asakusa, on Sunday, the 20th of June. The Mikado arrived at the temple at about half-past ten o'clock, accompanied by the Princes Daijin, Sangi, and other officers of his household. On arriving at the eastern gate the band of the Imperial Marines, which was stationed in the court, began to play, and the Mikado entered the temple between two rows of officers. He then delivered the following address:

Our object, in opening in person this the provincial Parliament, has been to secure by its means the thorough discussion of all matters affecting the interior economy of our empire, and of securing to the provinces adequate representation. You have been convoked for this purpose, and in order that your knowledge of the condition and feeling of the people of your several districts may aid you in discussing their requirements and introducing such reforms and changes as may seem to you to be most urgently demanded, it is our wish that your deliberations should be marked by general harmony, and that, sinking minor differences, they should tend to promote the ends in view in calling you together. If with one mind you adhere steadily to this course, your conduct will be surely productive of the general welfare, and thus your deliberations may become the foundation of the external well-being of the empire. Understand, therefore, our views.

The Assembly, by its Speaker, thus addressed his Majesty :

We, your humble servants, in obedience to your imperial will, and with profound reverence, have been convoked as members of the *Chihokuan Kwaigi*. We cannot foretell the results of this our assembling, in which we have no experience to guide us. But if, happily inspired by your Majesty's benevolence and justice, the results of our deliberations, duly made known to your Majesty, should contribute toward the welfare of the people, then not in vain will the imperial will have gone forth, and the efficiency

American, 146 Dutch, 44 Portuguese, 43 Austrian, and 48 Danish.

The number of foreigners in the employment of the Japanese Government amounted in 1875 to 705, and 280 others were found in private service. This number is increasing every day, showing that the nation recognizes the foreign elements to the promotion of its advancement. That necessity will continue to exist for a long time, notwithstanding the extremely commendable efforts made to train Japanese young men, either at home or abroad, and to make them educated instructors, capable of teaching others. The development of knowledge also receives great attention; regular examinations are held, prizes are distributed, and during the last two years not less than \$1,000,000 has been given by private individuals for the establishment of public instruction. For the Philadelphia Exhibition in 1876 the Administration will, it appears, spend a sum of \$200,000.

In the budget for 1874, the revenue is estimated at 58,473,000 yen (1 yen = \$1.00), and the expenditures at 52,804,000 yen. Of the surplus, amounting to 5,669,000 yen, 5,000,000 were to be used for redeeming paper, and the remainder was to be transferred to the reserve funds, which at the close of 1874 amounted to 21,080,000 yen.

The imports and exports, in 1873 and 1874, were as follows (value expressed in dollars):

PORTS.	1873.		1874.	
	Imports.	Exports.	Imports.	Exports.
Yokohama.....	19,586,000	15,085,000	16,716,000	12,573,000
Hiogo-Osaka....	6,810,000	3,822,000	6,080,000	4,567,000
Nagasaki.....	1,627,000	1,900,000	1,873,000	3,757,000
Hakodadi.....	49,000	559,000	61,000	274,000
Total.....	27,522,000	20,966,000	24,732,000	21,569,000

The most important articles of import were as follows:

YEARS.	Cottons.	Woolens.	Rice and Sugar.	Metal.
1872.....	8,011,000	2,590,000	4,449,000	594,000
1873.....	10,063,000	7,572,000	3,860,000	416,000
1874.....	9,107,000	3,222,000	2,600,000	1,099,000

The following are the principal articles of export:

YEARS.	Raw Silk.	Cocoons.	Silkworm-Eggs.	Tea.	Copper.
1872.....	3,416,000	41,127	2,184,000	4,651,000	414,000
1873.....	7,353,000		1,963,000	5,445,000	1,528,000
1874.....	5,597,000	274,259	181,000	7,349,000	457,000

The movement in shipping was, in 1874, as follows:

COUNTRIES.	YOKOHAMA.		HIOGO-OSAKA.		NAGASAKI.		HAKODADI.	
	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.

A new code of regulations for military levies was promulgated in November, 1875. The object of the Government is to render service compulsory upon all classes, and train the entire male population to the use of arms.

The first railroad of Japan, from Tokio to Yokohama, was opened in November, 1872; it has a length of eighteen miles. It was at once used so much that, early in 1873, a double track had to be laid. A second railroad, from Hiogo to Osaka, of about equal length, was opened on May 11, 1874.

The electric telegraph connects (since the beginning of 1873) the towns of Nagasaki, Osaka, Hiogo, Kyoto, Yokohama, and Tokio, with each other, and with other countries of Asia and Europe.

A general post-office was established in February, 1873. The number of post-offices in 1872 was 1,174; in 1873, 1,500; in 1874, 3,244; the number of letters forwarded in 1872, 2,509,032; in 1873, 10,036,292; in 1874, 17,095,842. The Government has issued stamped envelopes and postal-cards.

The number of newspapers in Japan is rapidly increasing, and now amounts to about 200. Ten years ago there was not one in all Japan. Soon after the restoration of the Mikado, three or four were established; but as they were established by the friends of the late Tycoon, the Government suppressed them. The Japanese newspapers are generally conducted on the principle of having one leading editor, but the prominent articles are often written by outsiders, and invariably signed by the writers, upon whom alone rests the responsibility of their opinions. Very many of the articles which appear in the native press of Japan are regularly translated and copied by the English newspapers printed in Yeddo, and constitute one of their most interesting features. The advertisements which appear in the Japanese newspapers are numerous, and often illustrated with woodcuts of steamships, and the attractions of a circus or public exhibition. Postal contributions are also frequent. There can be little doubt that the press is becoming a remarkable power in the country, that the Gov-

ernment is disposed to grant it every possible freedom, and that it is, for the most part, in the hands of a superior class of men.

An article by Prof. Griffin, on "Christianity in Japan," thus summarizes the results of missionary labor:

There are several Catholic,* two Russo-Greek, and at least seven Protestant Churches in Japan. In Tokio there are of the latter two, in Yokohama three, in Kôbe one, in Osaka one. They are Union, Presbyterian, and Baptist, the latter erected and ministered to by the Rev. J. Goble. The membership in these churches amounts to between two and three hundred. There are probably as many as twenty Sunday-schools now organized. In these the gospels and hymns are read and sung in Japanese. The translation of the Scriptures is now proceeding under the direction of a board of translators, representing several and practically all the Protestant denominations. Among these are the Rev. David Greene, Congregational; Rev. S. McClay, D. D., Methodist; Rev. Nathan Brown, D. D., Baptist; Rev. David Thompson, Presbyterian, and others. We should have mentioned, when speaking of the pioneers, that the Rev. Dr. Bettelheim, who lived for years the only foreigner on the Liu-Khiu (Loo-choo) Islands, translated the gospels into Japanese. These, having been printed in Vienna, are now in circulation, together with the portions of Scripture issued by the Union Committee. The Gospel of John, in Romanized Japanese, printed by the American Bible Society, has been issued and circulated to test the popularity and practicability of Romanizing the entire version of the Bible. Dr. Hepburn also issued, over ten years ago, a tract containing the Ten Commandments, Lord's Prayer, and Apostles' Creed, in the vernacular. It has had a great circulation and influence. Other translations of minor works have been made in Tokio and other places.

The port of Hakodadi is growing in importance. As the silver coins are very scarce, one foreign firm, Blakiston & Co., began in 1875 to circulate paper-money on its own account. The Government remained ignorant of the fact until it learned, from one of the Japanese students in Germany, that paper-money for Japan was manufactured in Frankfort and exported. The paper-money was then declared by the Government to be worthless.

The trade of Japan with Australia is rapidly increasing. Fourteen Japanese merchants paid a visit to the exhibition in Melbourne, where Japanese merchandise, valued at about \$20,000, had been sent.

In April it was announced that the two statesmen, Kiddo and Itagaki, who had been alienated for some time from the present cabinet, had again joined it. The former was second in rank of the members of the late embassy to Europe, and enjoys a high reputation throughout the empire. The latter is a man of undoubted ability, whose retirement from the cabinet was due to his conviction that the measures which had been proposed for giving more effect to the popular voice were below the necessities of the occasion. It was expected that the Government would gain strength by the accession of these two well-known men to the cabinet. Kiddo's alienation is supposed to

have had its origin in the Formosa question, now happily ended.

Through the influence of Kiddo and Itagaki the subject of deliberative assemblies was reconsidered, and on the 14th of April an imperial proclamation was issued creating a body called "Genero," and which will be composed of Senators appointed by the Mikado; also a body called "Daishen," the functions of which will be to adjust and administer a judicial system. The question of an elective House was reserved for future consideration. The proclamation is regarded as making the greatest concession compatible with a proper regard to the public safety, and to the desires of the party asking parliamentary reforms, led by Itagaki, Kiddo, Soyesima, and others less prominent. On the same day two or three minor departments were abolished. On April 17th Soyesima and Goto, former members of the Imperial Council, but out of office since the spring of 1873, were called to the Mikado to be heard on the question of the new Senate. They were the leaders of the movement for popular representation in the winter of 1873.

The first meeting of the *Chihokuan Kuaiji*, or Parliament of the chief officers of the *Fu* and *Ken*, called together by imperial edict for purposes of deliberation, was held at the Honganji, a temple of the Shinto sect at Asakusa, on Sunday, the 20th of June. The Mikado arrived at the temple at about half-past ten o'clock, accompanied by the Princes Daijin, Sangi, and other officers of his household. On arriving at the eastern gate the band of the Imperial Marines, which was stationed in the court, began to play, and the Mikado entered the temple between two rows of officers. He then delivered the following address:

Our object, in opening in person this the provincial Parliament, has been to secure by its means the thorough discussion of all matters affecting the interior economy of our empire, and of securing to the provinces adequate representation. You have been convoked for this purpose, and in order that your knowledge of the condition and feeling of the people of your several districts may aid you in discussing their requirements and introducing such reforms and changes as may seem to you to be most urgently demanded, it is our wish that your deliberations should be marked by general harmony, and that, sinking minor differences, they should tend to promote the ends in view in calling you together. If with one mind you adhere steadily to this course, your conduct will be surely productive of the general welfare, and thus your deliberations may become the foundation of the external well-being of the empire. Understand, therefore, our views.

The Assembly, by its Speaker, thus addressed his Majesty:

We, your humble servants, in obedience to your imperial will, and with profound reverence, have been convoked as members of the *Chihokuan Kuaiji*. We cannot foretell the results of this our assembling, in which we have no experience to guide us. But if, happily inspired by your Majesty's benevolence and justice, the results of our deliberations, duly made known to your Majesty, should contribute toward the welfare of the people, then not in vain will the imperial will have gone forth, and the efficiency

* For a fuller account of the Roman Catholic missions in Japan, see ANNUAL CYCLOPEDIA for 1874.

of the *Chihokuan Kwaigi* will be apparent to all. Our earnest endeavors shall be directed to this end.

The Mikado replied :

It was our intention to convoke this Assembly in May of last year. But at that time our foreign relations were attended with some perplexities, and demanded its postponement. We now greatly rejoice that the members have assembled together. This being your first meeting, for which our history affords neither precedent nor guiding law, our hopes are based on the tenor of your reply, and we confidently trust that your efforts will avail to bring forth from deep sources streams of lasting happiness to the people.

The Assembly closed its session July 17th. The subjects debated were the organization of a national police force, the improvement of roads and bridges, and the establishment of a popular House of Representatives. The first two were satisfactorily adjusted, and the third left open for further consideration.

In July a convention was signed between Russia and Japan by which the island of Saghalien, at the mouth of the river Amoor, is ceded to Russia. In exchange, Russia ceded to Japan its portion of the Kurile Islands. The treaty provides that subjects shall be allowed to remain in or leave the territories as they may decide, those remaining receiving equal rights and protection to property and religion. The island of Saghalien is about 600 miles long, and about 90 miles broad. Its population is no more than about 15,000 souls, of whom 3,000 are Russians, but only 50 are Europeans or Americans. There is a Russian garrison at Dhui, which is the principal settlement in the island, also some artillery. The object of maintaining this garrison, at any rate during the summer, is not apparent; for the deported persons detained at Saghalien could not escape if they tried. The sea all around is far too dangerous. At the time of the Crimean War the garrison was removed to Siberia. In winter the sea is frozen over for the space of four months, and then the passage to Siberia is effected by sledges drawn by dogs. Russia appears always to have had a hankering for Saghalien long before its value as a colony was known. Indeed, it disputes the priority of occupation with the Japanese. In 1807 the Russian Lieutenant Ohoostoff formally took possession of it as a Russian dependency, but in 1813 the Russian Government declared that occupation invalid. Since then Japan has gradually acquired possession of the southern half, whereas the northern has always been indisputably under Russian government. There has been a good deal of friction between Russians and Japanese concerning the possession of the island, but, valuable or almost invaluable as it is to Russia, it would be useless to Japan, owing to the difference of climate. This fact alone would invest the island with importance as a site for a Russian naval station. But, over and beyond this, Saghalien holds an enviable tactical position. It commands and protects the mouth of the river Amoor, a channel of communication with

a great future, and also the sea of Okhotsk. It is, therefore, all-important for Russia to have possession of it. Its extensive coal-fields are to be worked by Russian engineers and miners, and it is intended for this purpose to employ a large number of the convicts from Siberia. In August the Russian and Japanese commission sailed from Tokio to complete the transfer of the Kurile Islands to Japan, and the Saghalien Islands to Russia.

New complications have arisen in the Liu-Khiu affair, in consequence of a party of Liu-Khiuans having started, without authority, to congratulate the new Emperor of China on his accession. They were escorted to Peking and lodged in one of the government buildings. A false announcement being made that the visit was for the purpose of renewing the declarations of ancient vassalage, the Japanese *chargé*, instead of referring to his Government for instruction in the matter, committed the mistake of seeking a personal explanation from the Liu-Khiuans. To this the Chinese authorities objected. The Japanese Government, while regretting that the affair had been carelessly handled by the *chargé*, deemed it necessary to warn China not to continue surreptitious relations with this Japanese dependency, and decided to establish a military camp at the Liu-Khiu Islands.

The relations between Japan and Corea were throughout the year of an unfriendly character. It was stated that there was a great clamor for war among the soldiers, who showed themselves as eager to go against Corea as formerly to go to Formosa. It was believed that for want of a foreign war the soldiers might create disturbances at home, and that the most resolute and the most united action on the part of the Mikado and all the members of his Government was needed to avert either internal or external war. In October it was reported that a Japanese man-of-war was fired upon from a Korean fort near the capital, and that the Ministers of War and Navy were ordered to make the necessary preparations.

In September, Judge Richardson, of the United States Court of Claims, at Washington, and Commander Lewis, of the United States steamer *Yantic*, while traveling within the treaty limits of Yokohama, were arrested by local officers and sent back to the foreign settlement. The act was undoubtedly illegal, and was immediately recognized as such by the Government at Yeddo, which took immediate measures for an investigation of the case before any complaint had been made of the offending parties, who were promptly punished and ample apology made.

In November, Arinori Mori, formerly minister to the United States, and latterly Vice-Minister of Foreign Affairs, was appointed minister to China.

A proclamation was issued in November intimating that "the age of feudalism is past forever."

JOHNSON, ANDREW, seventeenth President of the United States, was born at Raleigh, N. C., December 29, 1808, and died in Carter County, East Tennessee, July 31, 1875, aged 66. He lost his father when only four years of age, and at ten was apprenticed to a tailor of his native place, whom he served seven years. He was not at school a day in his life. While learning his trade he resolved to educate himself, and having learned his letters, he borrowed a book which he had heard read aloud; he thus learned to read, and at the end of his apprenticeship, in 1824, he went to Laurens Court-House, S. C., where he was employed as a journeyman for nearly two years. After working again for a short time at Raleigh, in 1826, he set out to seek his fortune in the West, taking with him his mother, who was dependent on him for support. He obtained work at Greenville, Tenn., remained there about a year, married, afterward went farther westward, and eventually returned and settled at Greenville, where he commenced business. Hitherto he could only read, but now, after the labors of the day were over, his wife taught him to write and cipher. The first office he held was that of alderman, to which he was elected in 1828. He was reelected in 1829, and in 1830 he was chosen mayor, which office he held for three years. In 1835 he was chosen to the Legislature, where he took decided ground against a certain scheme for internal improvements. On account of this course he was defeated at the next election, in 1837, but events having demonstrated his forecast, he was in 1839 elected again by a large majority. In 1840 he served as presidential elector on the Democratic ticket; in 1841 he was elected to the State Senate, and in 1843 to Congress, in which, by successive elections, he served until 1853. During this period he was a conspicuous advocate of the annexation of Texas, the war with Mexico, and the other measures of Mr. Polk's Administration. To the question of slavery he was as yet indifferent. In 1853 he was elected Governor of Tennessee, and reelected in 1855, after a severe contest. At the end of his second term as Governor, in 1857, he was elected United States Senator for a full term, ending March 3, 1863. The opening of the civil war found Mr. Johnson on the side of the Union. Having supported the compromise policy of Breckinridge, he now denounced secession, and supported the Administration of Lincoln. In February, 1861, he made a powerful speech of two days, wherein he arraigned the seceding Senators as traitors, and when assailed by Senator Lane, of Oregon, he replied to him with great vigor and animation. These speeches made him very popular in the North, but, on his return to Tennessee, he was threatened with personal violence, was burnt in effigy at Memphis, and was in daily peril of his life. He fled to the North, a fugitive, as he said, not from justice, but from tyranny. Before his term in the Senate had expired, Mr. Lincoln

appointed him provisional Governor of Tennessee, and gave him the rank of brigadier-general in the Volunteers. He ruled the State with an iron hand, and in 1864 brought her back into the Union. On the reelection of Mr. Lincoln, in 1864, in order to conciliate the war Democrats, Mr. Johnson was elected Vice-President, and after the assassination of Mr. Lincoln, April 14, was sworn in as President, April 15, 1865. In May he appointed a commission to try the persons engaged in the assassination of the late President. His attempts to reconstruct the Union were not well received by Congress. When this body assembled in December, 1865, he sent a message announcing that eight of the Southern States had been thoroughly reconstructed; the Republican majority, however, repudiated the President's acts, and proceeded to reorganize the South after its own fashion. Congress passed bill after bill, designed to cripple his power and assert its own authority in the subjugated States. The President vetoed each measure, but it was nevertheless passed by Congress. Before the close of his term he had vetoed no less than nineteen bills. Appealing to the people, the President encouraged the holding of a convention in August, 1866, the specific object of which was not defined. This convention approved of his policy, and sent him a deputation to assure him of its confidence. On August 28th he set out on a tour through the Middle and Western States, accompanied by several members of his cabinet and others, making speeches with the view of affecting the approaching election. However, his supporters were left in a minority. On August 12, 1867, he suspended Mr. Stanton from office as Secretary of War, and appointed General Grant as Secretary *ad interim*. The Senate having refused to sanction Mr. Stanton's removal, General Grant resigned the office into the hands of Mr. Stanton. On February 21, 1868, the President made another attempt to remove Mr. Stanton. The next day the House of Representatives passed a resolution that the President be impeached. At the close of the trial, May 20th, when the final vote was taken, thirty-five voted guilty, nineteen not guilty. As a two-thirds vote is required to convict, the President was formally acquitted. His last act in opposition to Congress was in December, 1868, when he issued a proclamation of full pardon to everybody who had participated in the rebellion. Returning home at the close of his term of office, he became, in 1870, a candidate for the United States Senate, but was defeated. In 1872 he was again defeated as Congressman at large. But in January, 1875, he was elected United States Senator, and occupied his seat during the brief extra session in March, speaking on a resolution against recognizing the Kellogg government in Louisiana. He had courage, political insight, and honesty never shadowed by suspicion.

JUBINAL, MICHEL LOUIS ACHILLE, a French politician and writer, born at Paris, October 24, 1810; died December 28, 1875. In 1839 he became Professor of Foreign Literature in Montpellier, was elected to the Corps Législatif in 1852, and again at each succeeding

election, in 1857 and 1863, without opposition. Besides contributions to the *Indépendance Belge* and other papers, he wrote: "Vers à Napoléon III" (1853), "Vers à l'Armée de Crimée" (1855), "Impressions de Voyage" (1859), and "Napoléon et M. Sismondi en 1815" (1865).

K

KANSAS. A State census, taken March 1, 1875, shows the total population of Kansas, at that date, to have been 528,437, an increase, since 1870, of 30 per cent., or 5 per cent. per annum. In the preceding autumn many inhabitants left the State, in consequence of the prevalence of locusts. A large number of these persons spent the winter in other States, and had not returned when the census was taken. It is believed that if the census had been taken on the first of May, instead of on the first of March, several thousand would have been added to the population returns of the State. The population by counties, according to the census of 1875, is as follows:

COUNTIES.	Population.	COUNTIES.	Population.
Allen	6,638	Lyon	9,542
Anderson	5,809	Marion	5,906
Atchison	20,187	Marshall	10,322
Barbour	867	McPherson	6,206
Barton	2,099	Miami	12,667
Bourbon	16,867	Mitchell	5,872
Brown	8,928	Montgomery	18,018
Butler	9,852	Morris	4,597
Chautauque	7,416	Nemaha	7,104
Chase	8,116	Neosho	11,076
Cherokee	12,233	Ness *	
Clay	6,672	Norton	899
Cloud	7,170	Osage	10,268
Coffey	7,285	Osborne	3,467
Comanche *		Ottawa	4,480
Cowley	8,968	Pawnee	1,006
Crawford	9,886	Phillips	2,818
Davis	4,611	Pottawatomie	10,344
Dickinson	6,841	Pratt *	
Doniphan	18,945	Reno	5,118
Douglas	18,505	Republic	8,043
Edwards	284	Rice	2,458
Elk †	6,215	Riley	7,065
Ellis	940	Rooks †	567
Ellsworth	1,753	Rush	451
Ford	818	Russell	1,051
Franklin	10,108	Saline	6,860
Greenwood	6,438	Sedgwick	8,811
Harper *		Shawnee	15,417
Harvey	5,046	Smith	3,876
Jackson	6,631	Sumner	4,925
Jefferson	11,716	Wabaunsee	4,649
Jewell	7,650	Wallace *	
Johnson	14,530	Washington	8,622
Kingman *		Wilson	9,750
Labette	14,572	Woodson	4,476
Leavenworth	27,738	Wyandotte	12,868
Lincoln	2,498		
Linn	11,546	Total	528,437

* It appears from the record in the office of the Secretary of State that the counties of Comanche, Harper, and Ness, polled 812 votes at the general election of 1873. The counties of Kingman, Pratt, and Wallace, polled 422 votes in 1874. There have been no returns from these counties for 1875. Allowing four inhabitants to the voter, it will give to these counties, at the periods named, a population of 4,386.

† The census returns of population of Howard township, Elk County, were transmitted to the county clerk for transmission and copy on the 18th day of August last, at his request. Although repeatedly requested to return the same, he has neglected to do so. The population of Howard township, in 1874, was 712, which is included in the population of Elk County, given above.—The unorganized counties contain a population of about 500.

‡ Returns of 1874.

The agricultural statistics show that the cultivated area of the State has increased from 8,669,769 acres in 1874 to 4,749,900 in 1875; the taxable area from 16,996,746 acres in 1874 to 17,672,000 in 1875; the value of farm-products from \$29,920,734 in 1874 to \$43,970,494 in 1875; the production of wheat from 9,881,883 bushels in 1874 to 13,209,403 bushels in 1875; corn from 15,699,078 bushels in 1874 to 80,798,769 in 1875; and flax-seed from 174,608 bushels in 1874 to 447,864 in 1875.

During the same period the number of manufacturing establishments in the State has increased from 305 to 604, or about 100 per cent. An important industry has recently been established in the State, which promises to develop into extensive proportions. This is the culture of silk now in progress in Franklin County.

In regard to the State finances the Governor says that—

It is a source of continued gratification that, notwithstanding the general depression throughout the country, the Treasury has promptly met all the demands which have been made upon it. The credit of the State is as good as any citizen could have reasonably expected or desired. The warrants drawn upon the Treasury are equal to cash, while the few State bonds held in the East now command a premium. The fact that last year we were operating under a new financial system, with vastly reduced penalties for non-payment of taxes, renders the present financial condition of the State doubly gratifying.

The total bonded indebtedness of the State is \$1,385,775. The resources belonging to various funds in the Treasury amount to \$1,943,687, comprising \$123,745 in cash, \$1,403,359 in bonds and taxes due from the various counties to the amount of \$416,583. Of the bonded debt \$769,550 is held by the State as an investment for its several permanent funds. Of the outstanding bonds \$150,000 will fall due on the 1st of July, 1876. These were the first bonds issued by the State, and were authorized by the Legislature of 1861, for the purpose of putting the new State government in motion and defraying its current expenses. The sinking-fund in the Treasury created for the final redemption of State securities has reached the sum of \$227,525. This is invested in the bonds of the States and of the United States, and it will be the duty of the Sinking-Fund Commissioners to sell a sufficient amount of them to take up the bonds about to fall due.

The total receipts of the Treasury from taxes during the fiscal year were \$646,248.51, of which \$430,774.79 was credited to the general revenue fund, the remainder going into the annual school, interest, and

sinking funds. From the general revenue are paid the current expenses of the State government, including the salaries of State and judicial officers, the expenses of the Legislature, public printing, the support of educational and benevolent institutions, and the money invested in the permanent public buildings. To a careful consideration of the items embraced in the disbursement of this considerable sum your attention should be earnestly and vigorously directed. From this sum there was expended during the year \$496,512.68, leaving undrawn, of the appropriations made last winter, \$17,941.67. Upward of one-fourth, or about \$140,000, was for the erection of permanent public buildings, while nearly one-half of the remainder was for the support of the various State institutions.

The educational, charitable, and reformatory institutions of the State are reported to be in a prosperous condition. The trustees of the Blind Asylum report a large increase in the number of pupils in that institution, and speak in the highest terms of its general management. The increase in the number of pupils during the last term is about forty per cent., and yet the trustees are confident that the asylum can be supported during the coming year by an appropriation of \$10,240, an excess over last year's estimate of less than eight per cent. The number of pupils now in attendance is 40. The trustees are of the opinion that the necessities of the institution demand an extension of the building, and for that purpose recommend an appropriation of \$12,000 and \$1,000 for the establishment of shops for the instruction of pupils in some useful occupation. The number of pupils in the Deaf and Dumb Asylum is 80. The entire cost of the institution to the State during the year, including the support and maintenance of pupils, and salaries of officers, teachers, and employes, was \$164.41 *per capita*. The appropriation made by the Legislature for the extension of the Insane Asylum at Ossawatimie has been judiciously expended, and the capacity of that institution considerably increased. A still further extension of the building is recommended. It is expected that the new building will be ready for occupancy February 1, 1876, when the capacity of the institution will be increased to 200. The average number of patients in the asylum during the year was 110. The construction of the asylum at Topeka is not yet completed. The total number of prisoners in the penitentiary at the close of the fiscal year was 379, of whom 90 had been convicted at twenty years of age or under.

The educational report for 1875 shows that the number of pupils enrolled in the common schools has increased from 135,598 in 1874 to 142,606 in 1875; and the average daily attendance from 77,384 to 85,580. There has been an increase of 165 in the number of school districts, 340 in the number of teachers employed, and \$107,441 in the valuation of school buildings and furniture. The report of the Regents of the State University shows that institution to be in a flourishing condition. During the year ending June 16, 1875, 194

students were enrolled, representing 80 counties of the State. During the autumn of 1875, there were in attendance 207 students, representing 40 counties of the State and five other States. The industrial courses of instruction recently incorporated in the curriculum of the Agricultural College have led to satisfactory results; 287 students were enrolled in the college during the year. The appropriation of \$7,500 made last year has been expended in the erection of a substantial stone-building, to be used for purposes of industrial education and in needed changes and improvements on some of the old buildings. Each of the three normal schools reports a largely increased attendance. The number attending the school at Emporia was 302, at Leavenworth 420, and at Concordia 254.

The constitutional amendments, making a change in the sessions of the Legislature, have been submitted to the people, and ratified by a large majority. Beginning in 1877, the sessions will be biennial, instead of annual, as heretofore, and will begin on the second Tuesday of January.

In December, 1875, a body of over 800 Mennonites from the town of Saratov, near the Volga River, in Eastern Russia, reached Kansas, with the view of settlement. There were already over 200 families of Mennonites in the counties of Harvey, Reno, Rice, Barton, and Pawnee.

One of the most important acts passed by the Legislature during the session in the early part of the year was known as the County Relief bill, and was entitled—

An act to authorize the issuance and sale of State bonds for the purpose of supplying the destitute citizens of the State with grain and seeds for spring planting in the year 1875, and to punish the violation of the provisions of this act, and repealing an act entitled "An act authorizing the issue of bonds for the relief of the destitute people of the frontier," approved September 21, 1874.

It provided for the issue of State bonds to the amount of \$95,000, payable in twenty years, in denominations not less than \$100, bearing seven per cent. interest, payable semi-annually. Sections 2 and 3 provide that

The proper officer or officers of the State shall cause to be levied and collected with the other taxes of the State an amount sufficient to pay the interest on said bonds as it becomes due, and to create a sinking-fund sufficient to pay the principal of said bonds at maturity. The State Treasurer shall cause the interest on said bonds to be paid promptly as the same becomes due and payable.

The Auditor and Treasurer of the State are hereby made the agents of the State to sell and dispose of said bonds, at not less than ninety-eight cents on the dollar, and they shall place the proceeds thereof in the Treasury of the State, to be disbursed as hereinafter provided.

The president, vice-president, treasurer, and secretary of the State Board of Agriculture were constituted a commission to purchase and distribute the seeds in the manner prescribed.

The present State government is composed of

the following Republicans: Governor, Thomas A. Osborne; Lieutenant-Governor, M. J. Salter; Secretary of State, Thomas Cavanaugh; Auditor, D. W. Wilder; Treasurer, John Francis; Attorney-General, A. M. F. Randolph. The Legislature is composed as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans.....	21	71	92
Opposition.....	12	81	48
Republican majority.....	9	40	49

The State is represented in Congress by Senators John James Ingalls and James M. Harvey, the term of the former expiring March 3, 1879, and of the latter, March 3, 1877; and by Representatives William A. Phillips, John R. Goodin, and William R. Brown.

During the year it was discovered that the school-fund had been defrauded of a large amount of money, through the purchase of fraudulent bonds of school districts. On this subject the Governor, in his message to the Legislature of 1876, says:

Upon different occasions, in September, October, and November last, the School-Fund Commissioners purchased the bonds of various school districts, in Mitchell, Jewell, and Republic Counties, amounting in the aggregate to \$19,050, paying therefor the accustomed rate of ninety cents on the dollar, and the accrued interest. These bonds were, in the month of December, discovered to be forgeries, and measures were at once instituted having in view the detection and punishment of the criminals, and the restoration of the money wrongfully taken from the school-fund. The general circumstances attending this entire transaction will be understood from a perusal of the official correspondence, a copy of which is herewith transmitted, and which has been communicated to the public through the press. Special facts and circumstances, which it has not been deemed prudent to publish in detail, seemed to demand an immediate change in the Treasury, and, impelled by that necessity, but without specific authority of law, I suggested to Mr. Lappin that his resignation would be acceptable, and it was promptly tendered. For the second time, during my incumbency of the Executive office, Hon. John Francis was invited to assume the arduous and responsible duties of State Treasurer, and his acceptance is a sufficient guarantee to the people that those duties will be honorably discharged.

Suits have been brought against Mr. Lappin and his sureties for the recovery of the money of which the school-fund has been defrauded, through the purchase of these forged bonds. Criminal proceedings have also been instituted against him for participation in the forgeries, and he has been held to answer at the next term of the District Court for Shawnee County. It would not become me to enter upon a discussion of the facts which impelled the initiation of legal proceedings; the impropriety of such a course will be obvious. The cases are to be judicially determined, and while I intend to insist upon a vigorous prosecution, it is far from my purpose to say or do anything which might have a tendency to prejudice the rights of the accused, or to lessen the chances of a fair and impartial trial. It is proper to add, however, that the public interest demands that the person or persons guilty of this crime should be punished, and that, too, without unnecessary delay. The government is strong in proportion as it shows itself entitled to the confidence of the people. The prompt, faithful, and fearless

discharge of duty by all public officers, and a vigorous execution of the law, are the only means by which that confidence can be preserved. It will be the duty of the Legislature to provide the proper department of the government with the funds requisite to the energetic prosecution of these cases.

A full investigation, by the Legislature, of the management of the school-fund, is desired by the Commissioners, and would seem to be proper.

The repeal of the law of 1872, authorizing the investment of this fund in school-district bonds, is earnestly recommended, together with an amendment requiring that all securities purchased by the Commissioners shall be inspected and approved by the Auditor, and a record thereof kept in his office.

KASHGAR, also called East Toorkistan, a Mohammedan empire in Central Asia, formerly a part of the Chinese Empire; area in 1874, 574,000 square miles; population, about 1,000,000; ruler, Mohammed Yakub Beg.

The report that the Chinese Government in 1874 sent out an army for reconquering Kashgar was confirmed. The progress of the Chinese troops appears, however, to be very slow, and up to February, 1876, no accounts of any encounter between the two hostile armies had been received. The Russian *Invalids* stated that Yakub Khan kept a garrison of 10,000 men at his capital, and had dispatched 12,000 others to guard his eastern frontier against the Chinese. All his troops were armed with breech-loaders, and drilled according to European tactics.

The feeling of the Russian Government, as well as the Russian press, toward Yakub Beg appeared to be unfriendly. He was openly charged with having instigated the rising of the tribes in Khokan against Russia. It was also believed that the awakening of Mohammedan fanaticism in Central Asia was largely due to his instigation, as he hoped to find in it an element of strength in his conflict with China.

The hopes which the conclusion of a treaty between England and Kashgar awakened in British India were not realized. A Central Asiatic Trading Company was formed in the Punjab, to develop the commercial relations with Kashgar, and on June 30, 1874, sent the first caravan (500 beasts of burden) to Kashgar; but the result was not satisfactory, and no caravan was sent off in 1875. Indian papers, which are known to be influenced by the Government, gave very little encouragement to the schemes of Yakub Beg. Thus the *Al-lahabad Gazette*, of Simla, stated, on July 9, 1875, that in November, 1874, an ambassador of Yakub Beg had arrived in India, and had proposed to the Government of British India an offensive and defensive alliance between Kashgar, the Mohammedan states of Central Asia, and Great Britain; that the Government of India, however, had advised Yakub Beg to keep on good terms with Russia.

Sir H. Rawlinson, in his work, "England and Russia in the East" (London, 1875), speaks thus of the relations of Kashgar to England and Russia:

The policy of England in regard to Kashgar has never altered; though negative in its object, it is clearly defined, and needs neither concealment nor excuse. It would undoubtedly be inconvenient to us if Russia, either by force of arms or at the invitation of the native ruler, succeeded in establishing a protectorate over Eastern Toorkistan—similar to her protectorate of the Usbeg khanates—and were thus brought into contact, through Thibet with Cashmere, and through Wakhan with Cabul. Our interest, therefore, irrespective of commercial considerations, is clearly to maintain the Amir in independent power. We desire to see him ruling over a contented and orderly population, giving offense neither to Russia nor to China, contracting his frontiers within manageable limits, devoting himself to the improvement of his country, and laying the foundations of a permanent dynasty. Fortunately, we have not the same dread as Russia of the contagion of Mohammedan influences, the Mussulmans of India, prone as they may be to mischief, being outnumbered and controlled by Hindoos and Sikhs. Toorkistan, indeed, like Afghanistan and Persia, may help to buttress our Indian Empire; but it can never, so long as it retains its independence, be to us a source of danger or uneasiness. Our envoys, therefore, to Kashgar have invariably counseled prudence and moderation. We have recommended the Amir, as a measure of precaution, to withdraw his garrison from Urumchi and Manass, and to remain content with the submission and tribute of the Tungsans. Above all things, we have insisted that he should strictly fulfill his treaty-engagements with Russia, and leave no opening for reprisals.

It is not possible, of course, to see very far ahead in this region of nebulous politics. There are difficulties, both external and internal, which may shipwreck the most carefully-considered plans. If China, for instance, should recover from the military paralysis which for some years past has stricken her extremities, she might possibly reassert her claims to Kashgar, and thus necessitate a European armed intervention, the result of which it would be impossible to foresee. Or Kokand and Bokhara, inspired from without, might follow up the call they are said to have already made on Amir Yakub's allegiance, by invading his territories, which would certainly embroil Kashgar with Russia. But the most serious indications of danger come from within. The Amir Yakub has been by no means single-minded in his dealings with us. His experience of Russia had rendered him suspicious of all Europeans; and as an Oriental prince, moreover, cannot understand the meaning of a commercial mission, but always supposes there is some deep political design shrouded under the mask of trade, so in the Amir's reception of Mr. Forsyth—notwithstanding that it was marked with a lavish hospitality and much personal attention, still, there was from the commencement an undercurrent of distrust, which it required the nicest circumspection not to rouse into activity. There was, in fact, no reason why the Amir should especially affect our friendship, except as a defense against Russia; and when the suspicion, therefore, crossed him—partly, perhaps, from the recent matrimonial alliance of the two royal families, and partly from our interposition in favor of Russian interest—that the two powers might have coalesced to compass his ruin, he showed undoubted signs of recalcitration. With the intuitive love, also, for duplicity which characterizes all Orientals, he has apparently desired to steer his course midway between Scylla and Charybdis, concluding treaties of friendship with both powers, but never committing himself irretrievably with either. As he has made known his communications with Russia to us, so, if we had exposed our hands, or had had any hands to expose, he might have made known our communications to Russia. Passing, then, from his shadowy ground of intrigue and deception to practical life, we can at

any rate repose with satisfaction on our own honesty of intention, and take further consolation from the knowledge that under no circumstances can we incur real danger from the hostility of Kashgar; since invasion through a country like Thibet, entirely destitute of supplies, and seamed with passes 18,000 feet in height, is beyond the scope of modern warfare; while the only other access to India from Toorkistan, by the Chitral route, is closed by stubborn mountaineers, who have never succumbed to an invader since the days of Timur, as well as by the proud and stern resistance of the free-born tribes of Afghanistan.

KEMENY, SIGMUND, Baron, a Hungarian author, born in 1816, in Transylvania; died December 22, 1875. In the Upper House of the Transylvanian Diet he belonged to the Liberal party, and in 1848 was elected to the Diet of Pesth. In 1849 he was for a short time a councilor in the Ministry of the Interior. At this time he wrote several political pamphlets, entitled "After the Revolution" (1850), and "Another Word after the Revolution" (1851), in which he severely criticised the Hungarian Revolution. Since 1855 he was the editor of the *Pesti Napló*, the leading organ of the Deak party. Among his novels are, "Gyulai Pál" (Paul Gyulai, 5 vols., Pesth, 1846), "Férj és no" (Man and Wife, 2 vols., 1858), "Szerelm és hiúság" (Love and Vanity, 1855), and "Zord idő" (Rough Times, 4 vols., 1861-'62). He also wrote "Character Sketches of the Two Wesseleny and of Count Stephen Szécheny" (1850), which is considered one of the best productions of the Hungarian literature in this field.

KENTUCKY. The financial condition of Kentucky may be regarded as very promising. The entire bonded debt of the State is \$184,894, of which \$10,394 is now due. In the last two years bonds have been redeemed to the amount of \$347,000. To meet the outstanding indebtedness the State holds \$145,559.07 in the sinking-fund, Government bonds valued at \$246,000, and stocks of the Bank of Louisville, the Louisville & Frankfort Railroad, and the turnpike roads, together amounting to \$350,032, besides a considerable unexpended balance in the Treasury. The State also owns 260 shares of the preferred stock of the Louisville, Cincinnati & Lexington Railroad, and 2,173 shares in the Frankfort & Lexington Railroad, the value of which is not stated. It has received from the Federal Government since the close of the fiscal year, October 10th, \$28,726.45, for internal revenue tax illegally collected on the interest of the State in the profits of certain banks, and \$12,950.18 on war claims. There remains unpaid of the latter \$248,863.09. At the beginning of the last fiscal year, October 11, 1874, there was a surplus in the Treasury of \$241,741.17; the receipts of the year were \$1,378,788.83; expenditures, \$1,258,925.25. This leaves at the end of the year a balance of \$361,604.25. The assessed value of taxable property in the State was \$417,602,688, showing an increase of \$26,972,995. The amount of tax collected was

\$121,378.48 more than in the preceding year, though the rate of taxation was unchanged.

There are 108 fire and 16 life insurance companies authorized to do business in Kentucky, fourteen fire and one life company being organized under the laws of the State. The amount of insurance effected in 1874, the last year for which any report has been made, was \$100,720,124; premiums paid, \$23,364,201; losses paid, \$829,583.

The number of school districts in the State is 5,693, in which 5,627 schools were taught this year. The number of children reported was 437,100; average attendance at the schools, 159,000. There were 340 colored schools taught, the amount of money expended on them being \$34,657.28. The Agricultural and Mechanical College, which has been established as one of the colleges of the Kentucky University at Lexington receives yearly \$9,900 as interest on its endowment fund. The number of students has decreased from 300 in 1869-'70 to 80.

The charitable institutions of the State are reported to be in good condition. They were maintained during the year at a cost of \$314,853.90, exclusive of \$39,896.04 expended for the care of idiots. These institutions are: the First Lunatic Asylum at Lexington, the Second Lunatic Asylum at Hopkinsville, and the Central Lunatic Asylum at Anchorage; the Institution for the Deaf and Dumb at Danville; the Institution for the Education of the Blind at Louisville; and the Institution for the Education and Training of Feeble-Minded Children at Frankfort. The State Penitentiary at Frankfort contained 891 convicts December 30th, 497 of whom were colored. The prison is greatly overcrowded, the number of cells being 684. The number of convicts in 1865 was 201, only twenty of whom were colored. Of those at present in the penitentiary 396 were sentenced for grand larceny, and the larger part of them are young men, young women, and boys, convicted of stealing property of less value than \$20.

The geological survey of the State, begun by Prof. N. S. Shaler in 1873, has made excellent progress and is likely to prove of great value. The reports already prepared will fill four large volumes, and a fifth is in preparation. They are richly illustrated with maps and plates. A cabinet of minerals has also been collected.

The Democratic State Convention met at Frankfort on the 6th of May, and was in session two days. There was a sharp contest over the nomination for Governor. James B. McCreary was nominated on the fourth ballot, receiving 653 votes to 608 for J. S. Williams. The other candidates were: Lieutenant-Governor, John C. Underwood; Attorney-General, Thomas E. Moss; Auditor, D. Howard Smith; Treasurer, James W. Tate; Superintendent of Public Instruction, H. A. M. Henderson; Register of the Land-Office, Thomas D. Mar-

cum. The following was unanimously adopted as the platform of the party:

We hold it to be absolutely essential to the preservation of the liberties of the citizens that the several States shall be maintained in all their rights, dignity, and equality, as the most complete and reliable administration of their own domestic concerns, and the surest bulwarks against anti-republican tendencies. Every attempt on the part of the Federal Government to exercise a power not delegated to it in the Constitution, or to exercise a delegated power not therein prescribed, is an act of usurpation demanding the instant and unqualified condemnation of a people jealous of their liberties; and we hold that any unconstitutional interference by the General Government with the local affairs of any State to any extent or under any pretense whatever should be at once repudiated and condemned by all classes of every section of the Union; as all such acts tend directly to the destruction of our Federal system, and the consolidation of all power in a centralized despotism.

The Republican State Convention was held at Louisville, on the 13th of May. The ticket put in nomination was the following: For Governor, John M. Harlan; for Lieutenant-Governor, Robert Boyd; for Attorney-General, W. Cassius Goodloe; for Auditor, R. B. Ratliff; for Treasurer, W. J. Berry; for Register, Reuben Patrick.

The following was the platform adopted:

The Republicans of Kentucky, in convention assembled, declare:

1. That the history of the nation has fully established the necessity of the perpetuation of the Republican party, and that the causes which called it into existence are permanent in their nature, and now imperatively demand its peaceful and constitutional triumph.

2. We recognize the equality of all men before the law, and hold that it is the duty of government, in its dealings with the people, to mete out equal and exact justice to all, of whatever nativity, race, color, or persuasion, religious or political.

3. The Federal and State Governments are parts of one system, alike necessary for the common prosperity, peace, and security, and ought to be regarded alike with a cordial, habitual, and immovable attachment. Respect for the authority of each, and acquiescence in the just, constitutional measures of each, are duties required by the plainest considerations of national, State, and individual welfare. But the Constitution and laws of the United States made in pursuance thereof are the supreme law of the land, anything in the constitution and laws of any State to the contrary notwithstanding.

4. We are one people. The Constitution of the United States forms a government and not a league, and whether it was formed by compact between the States, or in any other manner, its character is the same.

5. We approve the financial policy of the Administration as set forth by the President and the Secretary of the Treasury in their last annual communications to Congress, and we hold that the financial legislation of Congress should be steadily directed to resumption of specie payments at the earliest date consistent with the business interests of the country.

6. Our confidence in President Grant's patriotism and devotion to republican principles is unabated.

7. As Kentuckians we have observed with pride and pleasure the eminent ability and fidelity with which our fellow-citizen, Hon. B. H. Bristow, has discharged the responsible duties of his position, and we congratulate the President and the country that he is Secretary of the Treasury.

8. We hold that the safety of our liberties and of republican institutions depends upon the intelligence of the people, and we therefore value and cherish our common-school system, and favor its improvement and extension; and as a measure of justice, no less than of wise statesmanship, we hold that the provision now made for the education of colored children should be increased until they are afforded, in their separate schools, facilities for obtaining instruction in every respect equal to those provided for white children.

9. We are in favor of a convention to amend the constitution of the State, in order that the people may resume that control over their own government which has, since the establishment of American liberty, been held to be their inalienable and indefeasible right, but which the present constitution sought to take away that slavery might be made permanent; in order that provision may be made for an equal and intelligent system of taxation; in order that the flood of partial and special legislation may be checked, and that the stigma placed by the present constitution on all the free colored citizens of the State may be removed, and that such other changes may be made as time and experience have shown, and may show, to be necessary.

10. We are in favor of such appropriation and other provisions by the next Legislature as will secure the proper representation of the products and industries of Kentucky in the Centennial Exposition, to be held next year at Philadelphia, to celebrate the completion of the first century of our national independence.

11. We are in favor of, and most cordially invite, immigration to our State, and we call upon the next Legislature to pass laws providing agencies, such as the experience of other States has shown to be advantageous, for attracting to us a fair proportion of that crowd of immigrants who annually land upon our shores, or leave the older States for new homes in the West and South.

12. We arraign the Democratic party of Kentucky for failure to pass laws for the encouragement of immigration, by reason of which failure we see immigrants passing our State into other States having fewer natural advantages than ours; for that dilatoriness in suppressing Ku-kluxism by which our State acquired a reputation which deters immigrants; for a long course of special legislation, creating monopolies and conferring valued privileges on favored individuals at the expense of the public; for its multiplication of offices and its disregard for constitutional restrictions; for failing to make sufficient provision for the prompt payment of teachers of the common schools; for allowing restrictions to remain upon the statute-books in the way of the acquisition and holding of property in Kentucky by those who wish to invest their capital here, and for an extravagance of administration which has increased the annual expenditures of our State government to nearly three times what they were before the war.

13. That the attempt of the Democratic leaders to create the impression that our patriotic President desires or seeks a reelection for a third term is an absurd device to disrupt the Republican party and produce a division between it and the President. The charge has no foundation in fact, and cannot mislead the people of the country into a restoration of that party to power which came so near destroying the Union of our fathers.

The canvass was conducted with a good deal of spirit, chiefly on State issues, the opposing candidates debating before the people the political questions of the day.

The election occurred on the 2d of August, and resulted in the choice of the Democratic candidates. The total vote for Governor was 217,771, of which McCreary received 126,976,

and Harlan 90,795, making the majority of the former 86,181. The largest Democratic majority was that of Henderson, for Superintendent of Public Instruction, which was 44,928; the smallest was that of McCreary for Governor, General Harlan receiving more votes by over 5,000 than any other candidate on the Republican ticket. The Legislature elected at the same time consists of 32 Democrats and 6 Republicans in the Senate, and 89 Democrats and 11 Republicans in the House, making the Democratic majority 26 in the Senate, 78 in the House, and 104 on a joint ballot. The proposition for holding a convention to revise the constitution of the State, which was submitted to a vote at this election, was defeated by a large majority.

Governor McCreary was inaugurated on the 31st of August, with a considerable military and civic display. In his inaugural address he promised to be Governor, "not of any particular class or section, but of all the people of our Commonwealth," and pledged whatever ability or energy he possessed to a "faithful maintenance and support of the Constitution and laws, both of the United States and the Commonwealth of Kentucky." In the course of his remarks he said:

A restoration of fraternal feeling should be the earnest wish of every patriotic heart; and we will have accomplished our grandest national triumph when, forgetful of the sorrow and strife of the past, we resume in every section of the Union an onward career as a free, prosperous, and united people. I desire an era of honesty, economy, and justice in the administration both of our State and Federal Governments, and peace and prosperity and progress not only in Kentucky but in every part of the Union. I wish to see the records of secession, coercion, and reconstruction fled away forever, and the people of the whole country earnestly advocating peace and reconciliation, and all looking to the Constitution as the guarantee of our liberties and the safeguard of every citizen. Northern and Southern men have recently met in the shadow of Bunker Hill Monument, and there, animated by common memories and common hopes, with clasped hands, have renewed their friendship and rededicated their energies to the advancement of the whole country and the restoration of peace and good-will.

An Educational Convention was held in Lexington, on the 10th of November, for the purpose of promoting a more general interest in educational matters among the colored people of the State; to procure such legislation as will, if possible, provide equal educational advantages to every child in the State; and, in case the petition to the Legislature should fail, to make efforts to secure the necessary means from other sources. The following statement was adopted, as expressive of the purposes of the convention:

The State Educational Convention, assembled at Lexington, Ky., November 10, 1875, for the purpose of promoting greater and more general interest in the education of our colored population, and of instituting measures to provide adequate common school advantages for them, do most earnestly invite the attention of our fellow-citizens to the fact that the present school law, doubtless contrary to the expectation

of its framers, furnishes no fund sufficient to maintain free schools for the colored children in any portion of the State. It even operates as a hindrance, in many cases, by encouraging the expectation of free schools, and thus preventing private subscriptions.

The fund for white children is generally acknowledged to be inadequate, yet, considering the fact that white children are enumerated from six to twenty, while the colored children are enumerated from six to sixteen, it is, this year, almost nine times as much per scholar as the funds for colored schools. The result is that our colored people are becoming disheartened, the efforts they formerly made are diminished, and the children in the country are, to a great extent, growing up in ignorance.

This state of things cannot continue without great injury to all classes of our people, and great detriment and disgrace to the State. We believe the State should furnish the means of a common-school education to every child within it, giving, as far as possible, equal advantage to all.

To accomplish this, we appeal first to the colored people to interest themselves more thoroughly in the education of their children, to hold educational meetings, and stimulate each other to provide schools for their children, even at a pecuniary sacrifice.

We urge upon the preachers to present the subject frequently to their congregations, and to all we say: Seek for yourselves equal school advantages with the white people. Ask for nothing less, yet make the best possible use of those you have.

We also beg of the white people of the State to consider that they cannot neglect the colored population without involving themselves in the consequences of the ignorance, indolence, poverty, vice, and corruption that must follow. We appeal to preachers to present this subject to their congregations, and to editors and writers for the press to prepare and publish frequent articles in all the papers, setting forth our necessities and delinquencies in this respect.

We also recommend to all the people to petition the Legislature, soon to convene, to so modify the school law as to furnish equal and adequate facilities for a common-school education to all children of the State.

Under the authority of the Legislatures of Kentucky and Indiana, commissioners were engaged during a portion of the summer in surveying and establishing the boundary between the two States above and near Evansville, Ind., a place which had become the refuge of thieves, because it was not known which State had jurisdiction over it. The survey was completed and a report drawn up, with an accompanying map, about the end of July. The commissioners were governed by the original survey made by authority of the national Government in 1806. The result shows that Green River Island belongs to Kentucky, and that the boundary-line between the two States is a short distance from the present bed of the Ohio River, on the Indiana side.

The Court of Appeals decided a case in October involving the title to certain shares in the Maysville & Mount Sterling and the Maysville & Bracken Turnpike Companies. In March, 1871, the Legislature had authorized the commissioners of the sinking-fund to sell the stock of the Commonwealth in all the turnpike companies on certain terms. In December of the same year the Senate by resolution requested them to withhold all propositions and to consummate no sales, and in February, 1872, the

previous act was repealed. Meantime W. W. Baldwin had made bids for the stock in the companies already named, which bids had been accepted and the terms of sale complied with on his part, though the contracts had not been signed or the bonds executed when the commissioners suspended their operations under the resolution of December, 1871. Mr. Baldwin was anxious to consummate the bargain, and took all the action he could for the purpose, but the commissioners refused to complete it. Both the State and the purchaser claimed the dividends on this stock. The lower court decided the case in favor of the Commonwealth, but the Court of Appeals reversed the decision on the ground that the act providing for the sale entered into the contract with Mr. Baldwin, which was virtually completed so far as the agreement between him and the commissioners was concerned, and that the repealing act could in no way impair the obligation of such contract. Judge Cofer, in delivering the opinion of the court, said:

The act under which the stock was sold is a part of the contract, and the General Assembly had no more power to repeal the act, and thereby render the contract unenforceable, than to enact that the agreement between the commissioners and appellant should be esteemed and held to be utterly void. When the appellant purchased the stock, he not only had a vested interest in so much of the act as authorized the commissioners to make that contract, but he had a like interest in that part of it which authorized them to transfer the stock to him upon the payment of the purchase-money. He cannot sue the State; and if, after his purchase, the power of the commissioners to transfer the title can be revoked, he would be effectually deprived by indirectness of a right that could not be taken from him by direct action. He may, therefore, sue the commissioners, and compel them to perform their duty under the act, so far as may be necessary to secure to him the title to the stock, for to that extent the act is unrevoked. * * * *

The act, under which the sale was made and the transfer is to be made, must therefore be held to be still in force so far as its provisions are necessary to carry into complete effect the sales to the appellant. No relief can be granted against the State, and none is needed. It is clear that, if no repeal had been attempted, the courts could have compelled the commissioners of the sinking-fund to transfer the stock upon payment being made without granting any relief whatever against the State; and, as the attempted repeal is ineffectual to destroy the right of appellant to have a transfer, it is equally ineffectual to deprive the commissioners of the power to make it, or to deprive the courts of the power to enforce performance of the contract.

Wherefore the judgment is reversed, and the case is remanded with directions to adjudge the dividends in contest to the appellant, but to be paid into the Treasury under the order of the court, for the benefit of the sinking-fund, as a credit on appellant's purchase, and upon payment of the balance of the purchase-money, to cause the stock to be transferred to him in accordance with the act of March 7, 1871.

The regular biennial session of the Legislature opened at Frankfort on the 31st of December. One of its first acts was to elect the Hon. James B. Beck to the United States Senate for the full term of six years, beginning March 4, 1877. Mr. Beck was born in Dumfries-shire.

Scotland, on the 18th of February, 1822, and came to America when sixteen years of age. He was graduated at the Transylvania University, Kentucky, in 1846, and adopted the profession of law, to which he devoted his attention exclusively for several years. He was elected to Congress in 1867, and served four successive terms in the Lower House. He was succeeded in March, 1875, by J. C. S. Blackburn, having declined another reelection.

KHOKAN, or **KOKAN**, a country of Central Asia, one of the three great khanates of West Toorkistan; area about 28,270 square miles; population about 800,000.

In July, the Governor-General of Russian Toorkistan, General Kaufmann, sent Mr. Weinberg on a diplomatic mission to the Khan of Khokan. The agent was accompanied by Colonel Skobeleff and twenty-two Cossacks. When they arrived in the capital of Khokan, they were informed by the Khan that several sections of the khanate were just now disturbed by civil war, and that he had sent out three different bodies of troops against the rebels. Soon after their arrival the Russians heard that, of the commanders of these three bodies, two had at once raised the standard of revolt and were now marching against the city of Khokan. On July 19th it was reported that even the oldest son of the Khan had joined the rebels, whose real leader, according to the statement of the Khan, was Abdurrahman, a son of Musulman Kul.* On July 20th news was also received that Sultan Murad Bey, a brother of the Khan, and Governor of Merzulan, had united his forces with the rebels, who were marching upon Albi Arik, a town about thirty miles distant from Khokan. On the next day, July 21st, the second son of the Khan, Mohammed Emir Bey, also left the city with 4,000 men, in order to join the rebels. The Khan sought the protection of the Russian envoy, and left with him, on July 22d, the city of Khokan, in order to reach, if possible, Russian territory. The remainder of the native troops, consisting of 4,000 infantry and 2,000 cavalry, also left him and united with the advancing rebels, who attacked the small Russian escort of the Khan, but were unable to prevent it from safely reaching the town of Mehrem, which is situated near the boundary-line dividing Russia and Khokan. In a letter, dated July 26th, and addressed to General Kaufmann, the Khan surrendered himself and the khanate into the hands of the Russians. General Kaufmann reported that the leader of the rebels was preaching a religious war against the infidels. In August advices were received from General Kaufmann, stating that the district of Kuranim had been invaded on several sides by armed bands from Khokan, for the purpose of inciting the inhabitants to rebellion, but that the attempt had failed. The

principal band, consisting of 5,000 men, had been defeated, and another of 800 had been totally annihilated, whereupon the remainder fled over the mountains to Khokan. The principal attack of these Khokan bands was directed against Khojend, the environs of which they surprised in great force (on August 9th), surrounding the gardens of the town. The garrison, which had been reinforced by three files of troops from Urutuba, repulsed the attack on all sides, and pursued the enemy, driving them across the frontier. The loss of the Russians was unimportant. General Kaufmann then marched with his troops to Khojend, and thence to Khokan.

The Russian Government suspected the Emir of Kashgar, Yakub Khan, of secretly aiding the rebels, though about the same time the arrival of an embassy sent by him to Russia was reported from Odessa. Upon advancing from Khojend against the retreating Khokan troops, the Russians encountered a body of the enemy's cavalry numbering 7,000 men. Eight hundred Cossacks, four batteries of horse-artillery, and a rocket-battery, were engaged with the enemy for one whole day, without suffering any loss. The principal battle was fought on September 4th, against 80,000 Khokan troops, and resulted in a complete victory for the Russians, although the enemy had taken up a strongly intrenched position in the fortress of Mehrem. The place was taken by storm by General Golovatcheff. The enemy was pursued a distance of fifteen versts, and many of his men were either drowned in the Amoo-Daria or killed. The Russians captured thirty-nine guns and a great quantity of war material. The enemy's loss was very considerable; that of the Russians amounted to one officer and six men killed, and one officer and seven men wounded. The impression created by this defeat upon the population was very great. The general, in conclusion, announced that he would continue his advance upon Khokan as soon as the supplies of war material arrived from Khojend.

On September 16th the city of Khokan was occupied without resistance. The greater portion of the Russian troops remained in the fortified camp outside. All the Russian prisoners were delivered over to General Kaufmann. An interview took place between General Kaufmann and Khan Sade, eldest son of the fugitive Khan, who had been proclaimed the new ruler of Khokan. Khan Sade went to meet the Russian general, and endeavored to convince him that he was free from any complicity in the invasion of Russian territory by the Khokan insurgents. Abdurrahman was stated to be the sole originator of this act, and to have forced Khan Sade to join him. Khan Sade also expressed his readiness to comply with all the wishes of Russia, and the Russian Government therefore recognized him as Khudayer's successor.

A small Russian force was dispatched from

* For a full account of the history of Khudayer Khan, the ruler of Khokan, see *ANNUAL CYCLOPEDIA* for 1874.

Pendekent, in the direction of Garm, the capital of Muhamed Rachim Shah, ruler of Karateghin. Garm is situated about 150 miles south of Khokan, and as many north of Feizabad, in Badakshan. Garm and the whole country of Karateghin in the British Government maps appear as Afghan territory, though the Russians regard Muhamed Rachim as a vassal of Bokhara. The inhabitants of this mountainous region were stated to have made an attempt to attack Russian territory during the late Khokan rebellion; it was only owing to the fidelity of the Upper Zarafshan Valley tribes that the Karateghin people were prevented from penetrating across the hills to Uratuba, and it was to protect the Matcha or Upper Zarafshan Valley that the present expedition was undertaken. General von Kaufmann was presented by the Ozar with a golden sword, bearing the inscription, "For the defeat of the Khokanders."

In October the troops were compelled to storm the town of Undidsham, where Abdurhaman, conjointly with Palad Khan, the chieftain of the Kirgheez, had collected a force of some 80,000 men. The fighting on the walls and in the streets is described as most severe. Two guns were captured from the insurgents, and the place was then set on fire. In the various engagements that took place the loss of the Russians was twelve men killed, and five officers and forty soldiers wounded. The loss of the enemy was said to have been very heavy.

Though the Russian Government was willing to recognize Khan Sade as ruler of a part of Khokan, it deemed it best to annex part of the khanate to the Russian dominions. The following order, dated November 6th, was addressed to the Russian troops in Khokan: "The territory on the right bank of the Syr-Daria, from the Russian frontier to the river Nareen, hitherto belonging to Khokan, is annexed to Russia." The capital of the new Russian territory is Namangan. A dispatch from Tashkend, dated November 21st, stated that, after General Kaufmann had left Namangan for Khojend, the Kiptchaks rebelled and surprised the former town. They invested the citadel and the Russian camp. The Russians resisted successfully for three days, when General Skobelev returned and attacked the Kiptchaks, who fled, leaving 8,800 dead on the field.

Notwithstanding their recent defeat at Namangan, the Kiptchaks assembled on the left banks of the Nareen and Syr-Daria Rivers in large numbers. Their headquarters were at Balyktachi, where they had concentrated to the number of 20,000. The Russians, under General Skobelev, attacked the town on November 24th. The Kiptchaks were defeated with immense loss. The Russian troops, after their victory, returned to Namangan.

On December 22d, the *Invalide Russe* stated that emissaries from Khokan had incited the tribes subject to Russia in the neighborhood of

Urapete, Toorkistan, to revolt. The Russian troops attacked them, and were at first repulsed, but subsequently obtained a victory: 300 insurgents were killed in one engagement, and the insurrection was regarded as extinct.

A few months before the annexation of a part of Khokan to Russia, Sir H. Rawlinson, in his new book, "England and Russia in the East" (London, 1875), represented the relations between Khokan and Russia as follows:

In Khokan the prospect is better, inasmuch as the inhabitants generally are neither so fanatical nor so warlike, while the upper valley of the Jaxartes, studded with populous and important cities, is far better able to repay the expenses of occupation. Even in that quarter, however, Russia is not yet prepared for intervention. If she had troops available to garrison the large towns of Khokan, Namangan, Andigan, Oosh, and Marghilan, it is incredible that she should have resisted the temptation to enter in and take possession, which was afforded in the recent civil war between the Kirgheez and Kiptchak parties, when either side invited her interference, and would have willingly submitted to her rule. For the moment it is believed that Khudayar Khan has silenced his opponents, and that he will thus be allowed to continue in power, acting, when necessary, as a lever against Amir Yakub, in virtue of the old money claims of Khokan upon Kashgar, until railways and steam-vessels have brought the military resources of European Russia into the heart of Toorkistan, and have thus rendered the annexation of the whole province a mere question of administrative expediency. But even with all the impulsive force of civilization, and all the appliances of modern warfare, which may thus be brought to bear on the position, it is not clear that Russia, although she may be in complete possession of the Jaxartes Valley, will be able to realize her sway over the southern dependencies of Khokan, any more than over the mountain-ranges of Bokhara. It is far more likely that for long years Kulab, Darwar, and Karategin, will be virtually independent, and that, whatever may happen to the westward, we shall thus, at any rate, escape the inconvenience of direct Russian contact with Afghanistan along the borders of Badakshan and Wakhan.

KINGSLEY, CHARLES, a canon of the Church of England, born at Dartmoor, Devon, June 12, 1819; died January 28, 1875. He received his first education at home, was afterward sent to King's College, London, and from there went to Magdalen College, Cambridge. After first studying for the bar, he entered the Church, and became curate, and afterward rector of Eversley, in Hampshire. In 1859 he was appointed Professor of Modern History in Cambridge, Canon of Ochester in 1869, and afterward of Westminster, and chaplain to the Queen. In 1872 he became the editor of *Good Words*, and in the winter of 1873-74 he made a lecturing tour through the United States. He was identified with various efforts to improve the condition of the working-men, in whose interest he wrote a number of novels, of which "Alton Locke" is probably best known. He also wrote "Hypatia; or, New Foes with an Old Face" (1853), "Westward Ho!" (1855), "Two Years Ago" (1857), and "Hereward, the Last of the English" (1866). Besides these, he published a large number of sermons and lectures.

KLEIN, JOHANN ADAM, a German painter, born at Nuremberg, November 24, 1792; died May 21, 1875. He studied in Vienna from 1811 to 1815, and then traveled through Styria, Hungary, and the country of the Danube, finding in the military events of the time many subjects for his sketch-book and canvas. On returning to his native city, he produced paintings of considerable merit, the proceeds of which enabled him to visit the Rhine, the Main, and the Neckar. Resuming his studies at the Art Academy in Vienna, he remained

there from 1816 to 1819, when, through the liberality of Prince Louis, of Bavaria, he was enabled to go to Italy. Returning to Nuremberg in 1822, he painted several battle-scenes and other incidents of military life. He was considered one of the best painters of horses in Germany, and excelled in portrait-painting as well as in landscape. He was likewise a skillful engraver, and reproduced many of his own works, as well as those of other artists. His engravings are prized in Germany for their fineness and completeness.

L

LAFONT, Rev. Father AUNET, pastor of the church of St. Vincent de Paul in New York City; died January 7, 1875. He was born at Ambert in Auvergne, France, October 2, 1812. His earlier training was received at Billom, where he was always at the head of his class. He studied theology at the Seminary of Clermont-Ferrand, where he completed his course at the age of twenty-two. Before he was twenty-five he was appointed Professor of Philosophy and afterward Professor of Theology in the same institution. He was ordained priest in 1837, and was appointed assistant pastor of Lezoux, in which office he distinguished himself in the discharge of his duty. He remained there two years. In 1839 he entered the Society of the Fathers of Mercy. He was among the first missionaries sent to America by the Superior of this society, Rev. Father Rauzan. The Rev. Father was at the College of Spring Hill, when the Bishop of Nancy, Mgr. Count de Forbin-Janson, being in New York, and desirous of establishing a French Catholic church in that city, Father Lafont was sent to him. In 1842 he founded the French Congregation in Canal Street, and in 1857 the present church in Twenty-third Street was built. He was the first to introduce the Order of Christian Brothers in this country. He also introduced the Order of the Sisters of the Holy Cross, and was chiefly instrumental in establishing in New York the Order of the Little Sisters of the Poor. He received and harbored the first Jesuit Fathers who came to the United States. He advised the establishment of the Sacred Heart in Manhattanville, and introduced the work of the Society for the Propagation of the Faith and of the Holy Childhood. He also established the school of St. Vincent de Paul, and gave the pupils his untiring care. In 1860 he founded the Orphan Asylum of St. Vincent de Paul, and caused the present splendid structure in Thirty-ninth Street near Seventh Avenue, New York, to be built for the inmates, and placed them under the care of the Good Sisters of the Holy Cross.

LAROUSSE, PIERRE, a French journalist and educational writer, born at Toucy, October 23, 1817; died January 3, 1875. He re-

ceived his education in a primary school, and also passed through a few classes of the College of Versailles. He was for a time teacher in a small school in his native town, and afterward professor in a large Parisian institute. In 1851 he established with M. Boyer a publishing-house, chiefly for the publication of his educational works, of which he published a large number, and all of which met with considerable success. His principal work was his "Grand Dictionnaire Universel du Dix-neuvième Siècle," which he began in 1864. He also founded two educational journals, *L'École Normale*, in 1858, and *L'Émulation*, in 1860.

LEONHARDI, HERMANN KARL, Freiherr von, a German philosopher, was born at Frankfurt-on-the-Main, March 12, 1809; died August 21, 1875. He received his first education in the Lyceum of Hanover, from where he went to the University of Göttingen. Here he studied natural history and philosophy, in accordance with the wishes of his father. In Göttingen he also became acquainted with the eminent philosopher and thinker, Karl Christian Friedrich Krause, whose lectures on logic he attended. This acquaintance soon ripened into friendship and deep veneration for the teacher, so that Leonhardi soon determined to devote his life to spreading Krause's doctrines. After the death of Krause, in 1832, he edited and published the latter's "Religionsphilosophie" (1834-'43); "Erkenntnislehre" (1836); and "Lebenslehre und Philosophie der Geschichte" (1843). On his various journeys he became acquainted with Friedrich Froebel and Langethal, and thus fitted himself for subsequently uniting the schools of Krause and Froebel. In 1841 he married Krause's second daughter, and then went to Heidelberg. It was here that he became acquainted with Julian Sanz del Rio, whom he induced to introduce Krause's philosophy into the Spanish high-schools, where it was better appreciated than in Germany. In his work "Ueber den Deutschkatholicismus," he pronounced against Ronge and against those who rejected every religious creed. In 1849 he was appointed extraordinary and in 1866 ordinary professor in Prague. But three parties, the Ultramontanes, the ad-

herents of Herbart, and the National party of the Czechs, were opposed to him, and in 1865 succeeded in leaving him without any academic hearers. He now turned his attention to the public at large, and for two years delivered popular lectures, which were very largely attended. In 1868 the first Philosophical Congress met in Prague, chiefly through his exertions. A second Congress in 1869 was held at Frankfort-on-the-Main. In 1871 he substituted for the Philosophical Congress the General Educational Union (Allgemeiner Erziehungsverein), by means of which he united the two schools of Froebel and Krause.

LEOPOLD, PAUL FRIEDRICH EMIL, Prince of Lippe, was born September 1, 1821; died December 8, 1875. He succeeded his father as Prince of Lippe in 1851, and in 1852 married Princess Elizabeth, daughter of Prince Albert of Schwarzburg-Rudolstadt. Having had some trouble with the Diet, he restored in 1858 the illiberal and unpopular Constitution of 1836. The Diet complained to the Federal Diet, but without success. The changes made by Oheimb, the president of the cabinet, in church and school matters, caused general dissatisfaction throughout the country. When in 1863 the Emperor of Austria convoked the Diet of Princes (Fürstentag), Prince Leopold did not attend. In 1866 he added his forces to those of Prussia, and joined the North-German Confederation. As he died without issue, he was succeeded by his brother, Prince Woldemar, who married in 1858 Princess Sophia, daughter of Margrave William of Baden.

LESPEDES, NAPOLEON, a French author, born at Bouchain, June 18, 1805; died April 23, 1875. From 1832 to 1840 he served in the army. He then turned his attention to literature, and, under the *nom de plume* of Leo Lepsel, he published a number of sensational novels in the *Audience*. In 1862 he was one of the founders of and principal contributors to the *Petit Journal*, which he left in 1869 for the *Petit Moniteur*. Among his best known works are: "Histoires roses et noires" (1842), "Histoire républicaine et illustrée de la Révolution de Février, 1848" (1848), "Paris dans un Fauteuil" (1854), "Les Veillées de la Saint-Sylvestre" (1863), and "Promenades de Paris" (1867).

LÉVY, MICHEL, a French publisher, born December 20, 1821; died May 4, 1875. He founded in 1836 the publishing-house of "Michel Lévy Frères," taking his elder brother Calman as his partner. The house rose rapidly, and at present occupies one of the foremost places among European publishing-houses. During their rapid rise, the brothers paid particular attention to theatrical pieces, and their "Bibliothèque dramatique" and "Théâtre contemporain illustré" are among the finest collections of dramas and plays in the world. They published the following periodicals: *L'Entr'acte*, since 1858, *Journal du Dimanche*, *L'Univers illustré*, *Le Journal*

du Jeudi, and *Les Bons Romans*. Their publications comprise the works of the leading French authors of the present century in every field of literature. The works of Guizot, Victor Hugo, Lamartine, Ernest Renan, Dumas, father and son, George Sand, Eugène Scribe, Octave Feuillet, and many others, are among those that have been published by this firm.

LIBERIA, a republic of Western Africa. The settlement of Liberia was founded in 1822 by liberated slaves from the United States, under the auspices of the American Colonization Society, and on July 26, 1847, was proclaimed a free and independent state. It was first acknowledged by England, afterward by France, Belgium, Prussia, Brazil, Denmark, and Portugal, and in 1861 by the United States. The Constitution of the republic is on the model of that of the United States. The executive power is vested in a President and Vice-President, the legislative in a Congress, consisting of the Senate and the House of Representatives, and the judicial in the Supreme Court. The President in 1875 was J. J. Roberts, elected in 1874 for two years, and the Vice-President A. W. Gardner. The cabinet consists of a Secretary of State, J. E. Moore; a Secretary of the Treasury, H. W. Dennis; and an Attorney-General, W. M. Davis. The Senate consists of eight members, each county sending two. The House of Representatives has thirteen members. The Senate is presided over by the Vice-President; the Speaker of the House in 1875 was D. F. Wilson. The Supreme Court consists of a Chief Justice and four Associate Judges. The Chief Justice in 1875 was O. L. Parsons, appointed in 1868. The republic has concluded commercial treaties with the United States, Great Britain, Germany, France, Belgium, Denmark, Italy, the Netherlands, Sweden and Norway, Portugal, Austro-Hungary, and Hayti. The following countries were in 1875 represented in Liberia by consuls and diplomatic agents: United States, Germany, Hayti, and the Netherlands. The area in 1875 was estimated at 9,500 square miles, and the population at 718,000, of which about 700,000 were uncivilized negroes, while only about 18,000 were civilized. Monrovia, the capital, has an estimated population of 18,000. The finances in 1872 and 1873 were as follows:

	1872.	1873.
RECEIPTS.		
Surplus of the previous year.....	\$75,941	\$106,619
Customs duties.....	101,435	74,629
Other receipts.....	118,169	22,543
Total.....	\$295,545	\$203,791
EXPENDITURES.		
Civil list.....	\$16,688	26,573
Courts.....	20,567	14,935
Legislative.....	15,836	13,410
Outstanding claims and interest.....	107,823	21,267
Miscellaneous.....	24,625	103,686
Total.....	\$185,539	\$180,971

In August, 1871, the republic laid the foundation of a public debt by contracting a loan with England for \$500,000 at 7 per cent. in-

terest, to be redeemed in fifteen years. There is no regular army; but every citizen between the ages of sixteen and fifty, able to bear arms, is liable to be called upon in case of war, and is enrolled in the militia, which comprises a brigade of four regiments.

The Methodist Episcopal Church has organized the Liberia mission into an Annual Conference, with a bishop at its head. The mission in 1875 had 25 American missionaries, 40 assistant missionaries, 2,100 members, 200 probationers. The Protestant Episcopal Church also supports a missionary bishop at the head of its mission. The largest mission reported in 1875 was Cape Palmas, with 98 communicants and 175 attending divine worship. The Baptists had in 1875 10 native preachers, 10 churches, and 525 members. The expenses for the year were \$3,141.66. The Baptist churches in 1868 organized the "Liberian Baptist Missionary Union," for the evangelization of the heathen within the borders of the republic and contiguous thereto. A training-school for Baptist preachers and teachers has been established in Virginia, and is reported to be in a good condition. The Presbyterian churches of Liberia have an aggregate membership of about 300, and form, with those of Gaboa and Corisco, the Presbytery of Western Africa.

The native population under the jurisdiction of the republic comprises a variety of tribes, of whom the principal are the Vays, the Pessehs, the Barlines, the Bassas, the Kroos, the Grebos, and the Mandingos. The *Vays* extend from Gallinas in the north to Lille Cape Mound in the south, and they stretch inland about two days' journey. They have invented an alphabet for writing their own language, and, next to the Mandingos, are the most interesting and promising of the aboriginal population of Liberia. They hold constant intercourse with the Mandingos and other Mohammedan tribes of the far interior, by whom they are rapidly converted to the faith of Islam. The *Pessehs* are located about seventy miles from the coast, and extending about one hundred miles from north to south. They are entirely pagan, but are hard-working and industrious. The *Barlines* are a very interesting tribe, next interior to the Pessehs, and but recently brought into treaty relations with Liberia. This tribe is situated about eight days' journey northeast from Monrovia, and was visited in 1858 by Mr. James L. Sims, a young Liberian. He described the inhabitants as being very industrious, and, for the most part, Mohammedans. According to Mr. W. S. Anderson, the latest explorer, there are no Mohammedans at present in the Barline country. The next tribe, proceeding south along the coast, is that of the *Bassas*, occupying a coast-line of over sixty miles, and extending about the same distance inland. They are the great producers of palm-oil and cane-wood, which are sold to foreigners by thousands of tons annually. The *Kroos*, occupying the region south of Bassa, are a

large and powerful tribe, and, in many respects, more remarkable than the Bassas. They extend about seventy miles along the coast, and only a few miles inland, and are the sailors of West Africa. They are shrewd, intelligent, and manly, never enslaving or selling each other. Bordering upon the southeast boundaries of the Kroos are the *Grebos*, extending from Grand Sesters to the Cavalla River, a distance of about seventy miles. It is supposed that this people emigrated about one hundred and fifty years ago from the coast. They are said to equal the Kroomen in physical development, and to resemble them in intellectual character. The two tribes have many points in common. The same love of freedom, the same martial qualities, the same love of maritime adventure, and the same patience of exposure and fatigue, characterize both tribes. They number about 30,000. But perhaps the most interesting and promising tribe found in the territory of Liberia are the *Mandingos*. They are numerous, intelligent, enterprising, and not a few of them learned. They are found on the whole of the eastern frontier of the republic, and extend back to the heart of Soudan. They have books, and schools, and mosques, in every large town. They read and write, and many speak the Arabic language. For the most part, these aboriginal tribes live in towns or villages of from 200 to 5,000 inhabitants, and in communities of eight or ten villages. In these communities, excepting the Mandingos, they have no written forms of law, but are generally governed by certain traditional usages handed down from generation to generation. Nominally, monarchy is the only form of government acknowledged among them, but, when closely scrutinized, their systems show much more of the popular and patriarchal than of the monarchical element.

In 1875 a war broke out with the Grebos. It arose from a dispute about the colony of Maryland. This colony was annexed to the Republic of Liberia in 1857, since which time the Government labored with singular abortiveness of purpose for the settlement of the perplexing question of the right of territorial possession and jurisdiction at that point of the republic. In the beginning of August, 1875, the Government sent James S. Payne as commissioner to the Grebos for the purpose of learning the most satisfactory manner in which it might be possible to settle the long series of complaints alleged by that tribe against Liberia. Having failed to come to a satisfactory agreement with Mr. Payne, the Grebos decided to appeal to arms, and to wring from Liberia forcibly a concession of that territory, the right to which the Grebos claim never to have ceded to any one. On the other hand, the Liberians claim to have acquired the right to the disputed territory by treaty and purchase, entered into with the Grebos by the first American settlers, and by the annexation of April, 1857. On September 8th or 9th Cape Palmas was at-

tacked by the Grebos, simultaneously at four different points. After a determined contest lasting eight hours the Grebos were repulsed, with considerable loss, at all points. The loss of the Liberians was six killed and an unknown number wounded. In another battle, on October 10th, at Harper, the Liberians were totally routed, abandoning their artillery and ammunition. The American minister resident, Mr. J. M. Turner, reported that the Grebos were armed with excellent Snyder rifles, and it is reported from other sources that the British ships trading in those waters were supplying the natives with munitions of war. Mr. Turner also expressed the opinion that the Grebos could raise from 5,000 to 7,000 able fighting men, while the Government troops numbered about 1,000 men. In December several native tribes, encouraged by the success of the Grebo tribe, made an attack on the settlers in another part of Liberia, but were vigorously repulsed. A private letter said that the peace of the republic was somewhat disturbed by the question of color. President Roberts was much embarrassed on this account, the fact of his not being of pure African blood being objectional to many who are. An intelligent negro from the West Indies was the principal agitating spirit, who sought to establish a political color-test, taking the side of the blacks against those of light complexion. The more orderly of the Liberians would rejoice if they could be relieved of the leader in this course of mischief.

An election for President took place on May 4th. The candidates were ex-President James S. Payne, and the Vice-President, J. W. Gardner. James Spriggs Payne was born in 1815, in Virginia, and went to Liberia when about ten years of age. He received a good education in the mission-schools of Liberia, then under the control of the Methodist Episcopal Church of the United States. He became a minister in that church, and enjoys the reputation of being the most eloquent doctrinal preacher in Liberia. He was President from 1868 to 1870. Mr. Gardner was also born in Virginia, and has been Vice-President four years. The election resulted in the choice of Mr. Payne.

LIGHTNING-RODS. In a valuable paper on this subject, published in the *Journal of the American Electrical Society*, Mr. G. N. Miller points out certain grave defects in the present methods of erecting rods, and how these may best be remedied. As commonly put up, lightning-rods are defective—1. In being insulated from the building; 2. In the lack of perfect joints where the sections come together; 3. In failing to connect with the metallic fittings of the building; 4. In the character of the ground-connection. The purpose of the rod is to furnish an easier route for lightning to pass to the earth than that afforded by the building. A good metallic conductor, such as iron or copper, properly erected, practically secures this without the costly refinements

ordinarily attached. Regarding the polished points which terminate the rod above, the author gives good reasons for doubting their value. If the rod provides an easier track to the ground than the building, the lightning will follow it, whether it passes a cluster of fancy points or not, and if these really invite the discharge from a passing cloud, when it would not otherwise occur, that is a sufficient reason for leaving them off, terminating the rod in a single blunt point. As for insulators, if the track made by the rod is not a perfect one, they will not perceptibly hinder the passage of electricity into the building, a discharge of such high tension as that from a thunder-cloud penetrating an inch or two of glass with the greatest ease; while if the rod is a good one there is no need of insulation, as the electrical discharge never leaves an easy line of transit to take a more difficult one. Concerning the presence of joints in the rod the author says:

Some discussion has arisen as to the effect of joints in lightning-conductors, whether a riveted joint best answers the purpose or a soldered one. There is this difference between electricity of low and electricity of high tension: the latter has a peculiar power of overcoming resistances that the former does not possess. A current of low tension, for instance, will pass over a telegraph-wire hundreds of miles, and enter the earth in preference to leaping across the shortest conceivable space of air to an "earth" in the immediate neighborhood, while a current of high tension will often leap several feet through the air to earth, in preference to following the wires that are connected to the earth a few miles distant. If we measure the conductivity of a joint by employing a current of low tension, and obtain a certain result, as we increase this tension, the conductivity of the joint also seems to increase, and when the tension approximates that of a lightning-discharge, the joint appears to offer little or no resistance at all. If the joints are made in such a manner as to prevent the different sections of the rod from separating, that I think is all that is required.

The object of connecting the rod with a metallic roof, if such is present, gutters, conductors, etc., is to relieve the building through the rod of any electricity accumulated by induction, and which might cause damage in its passage to the earth if some easy outlet were not provided.

The ground connection, as usually made, is totally inadequate, and vitiates every excellence the rod may in other respects possess. Concerning it Mr. Miller writes thus:

The important point involved in the construction of lightning-rods, and the one which in practice has been so much neglected, is that of proper earth-connections. To illustrate a perfect joint between two conductors unequal in size and conductivity, let us take two rods, each one foot in length, one copper and the other iron, the latter having a sectional area seven times as great as the former. Now, as copper is about a seven times better conductor than iron, these two rods would be equal as conductors, the better conductivity of the copper compensating for the increased size of the iron. Let us join these two rods, forming a perfect joint. If the joint is perfect, the compound rod will be equal in conductivity to a copper rod two feet long, and of the same

diameter as the copper portion of the compound rod, or equal to an iron rod two feet long and of the same diameter as the iron portion of the compound rod. By joining the rods end to end, the joint will not be perfect. The iron rod being larger than the copper one, the copper end will only be in contact with one-seventh of the sectional area of the iron end, and consequently a current, in passing from the copper to the iron, will have to pass through a sectional area of iron equal to the sectional area of the copper end; or, in other words, it will have to pass through a section of iron only one-seventh of its entire section. This reduced section will offer increased resistance. To make a perfect joint between them it would be necessary to increase the size of the copper end in contact with the iron, so that the copper would come in contact with the entire surface of the iron end. Suppose we wish to make a joint between a copper rod and the earth, the copper rod having a sectional area of one inch. If the joint is made perfect, there will be no greater resistance to the passage of the current at the joint than through any other portion of the copper rod. For simplicity, consider the ratio of conductivity between earth and copper as 1 to 2, then it would be necessary to have two square inches of earth-surface in connection with the copper to make the joint perfect; but, instead of the ratio being as 1 to 2, it is 1 to over 1,000,000,000; therefore it would require over 1,000,000,000 square inches of earth in connection with the rod, or, in other words, the copper rod would have to be connected to a metallic plate buried in moist earth and having a surface area of 1,000,000,000 square inches, or a plate over 2,500 feet square. These estimates are based upon low-tension currents; for currents of high tension, such as lightning, it would not require plates near so large. As we have no means of testing the conductivity of earth by using currents of such high tension, we must leave it to the reader's imagination. In practice, it is impossible to obtain so great a surface by burying plates in the earth, gas-pipes and water-pipes being in contact with a system of large iron pipes extending throughout a city; the surface of metal in contact with the earth is great enough to fulfill the conditions above, and consequently forms a perfect joint. If we were to place a copper rod one inch in diameter, having the usual defective earth-connection, upon a building, it would not conduct so great a quantity of electricity to earth as would a wire the size of a silk-fibre having a gas or water pipe connection. This can easily be proved by experiment. It may be safely accepted as absolutely certain that any building having rods such as ordinarily used, extending from its projective points to the earth, and there connected with gas or water pipes, also connecting with metallic roofs and spouting, if there be any, is perfectly safe from the effects of lightning. Where gas or water pipes are not available, it becomes a very difficult matter to secure good earth-connections. Coke being a good conductor, it is a good plan to dig trenches several feet long, leading from the building, and deep enough to reach moist earth (dry earth not being a conductor), and fill them with this material. Some earth should be placed above the coke. The rod should be placed upon the bottom of the trench. Coke and charcoal retain moisture, but its principal advantage is in its large surface-connection with the earth. When charcoal is used it should be mixed with something to improve its conductivity. Charcoal of itself is a very poor conductor, but an excellent article to retain moisture. The trenches should be dug near the water-spouts, so they would be kept soaked with the water passing from the roof. If wells or ponds of water are available, the trenches or rods should reach them. A very good rule would be to connect the rods with every available piece of metal in the vicinity that has any connection with the ground.

A recent examination of the lightning-conductors of Paris, undertaken by R. F. Michel, shows that rods may wear out, the joints become imperfect, and the whole apparatus become converted into an actual source of danger to the building. Michel believes in a number of sharp terminals for the upper end of the rod, and in many cases he found these fused and blunted, and in every instance where this had occurred there was a defective ground-connection. His reasons for insisting on a number of sharp terminal points are thus stated:

Experience teaches that, on the approach of an electrified cloud, the more points there are the greater (within a certain limit) will be the neutralizing effect. When a stem, according to old usage, has but one point, it acts only in one direction. But if there is a large number of stems branching in all directions, the preventive effect will be considerably increased. This arrangement may be easily carried out by having the ordinary conical-trunk copper arrow on the top of the stem melted down and fashioned so that, at about half its height, it will present a tolerably distinct circular swelling. Into this swelling let arrows be fixed, inclined at each side of the horizontal plane to an angle of 45°.

By using six arrows or points for each inclination, there will be twelve alternately in each direction. Radiating in all directions they will hasten the neutralization of the electrified cloud; and, in the event of a discharge, the discharge, by dividing among them, will prevent their fusion.

On the subject of insulation he writes:

M. Perrot considering it necessary to isolate, with great care, lightning-conductors from metallic masses which form part of the building, recommends the use of a glass insulating ring. Now, the elementary laws of physics prove clearly that, when a lightning-conductor is in action, we may freely approach it and even touch it, since all the electric fluid runs through it alone. There can, therefore, be no inconvenience if we bind the conductor to these metallic masses: there is found, on the contrary, a great advantage therefrom; for these masses, being in connection with the earth themselves, give a certain amount of preventive effects. Besides, if we assume, as an extreme case, that they are struck, being in communication with the earth, the building will be saved.

His recommendations for forming ground-connections are substantially in accord with those of Mr. Miller, given above. In the formation of joints he holds that it is not enough to simply rivet the sections together with a lap, or other style of adjustment, but that in every case the joint should be completely and thoroughly covered with solder. The fewer joints in the rod, according to this authority, the better; he therefore recommends the use of galvanized iron cables, as these may be obtained in greater lengths than iron in other forms, thus doing away with a large number of joints.

LITERATURE, AMERICAN, AND LITERARY PROGRESS IN 1875. The last year was a period of continued business depression, and was marked by a diminished production of books. The reduction in quantity was not made up by improvement in quality. In the higher walks of literature little was visibly accomplished. Our veterans plead no exemp-

tion for age, but act on the maxim so effectively uttered by one of the most honored of them, that "age is opportunity no less than youth." But they are in no apparent danger of being jostled by younger aspirants. We must not, indeed, judge too absolutely from appearances. Comparative inactivity in publishing does not authorize the positive conclusion that there is a corresponding inactivity in literary production. What is going on in men's minds, or may be hidden in their portfolios, cannot be conjectured. More, we may hope, than the press gives signs of. But, tried by the only test it is in our power to apply, the year 1875 must be pronounced a season of comparative barrenness. A good deal of intellectual activity goes to the furnishing of our magazines and journals. Our satisfaction at the excellence attained by some of these ephemera does not diminish our concern lest too many vigorous and cultured minds should be content with a too easily-won success, and fall short of that sustained effort which is required in order to attain the higher honors of authorship.

HISTORY.—The centenary of American Independence has naturally suggested increased attention to our country's history, not merely of the epoch of the Revolution, but of its entire historic period. It is gratifying to notice that the national commemoration has called forth very little of that style of patriotic effervescence that was once inseparable from the Fourth of July. A soberer self-consciousness gives character to our review of the past. The chastened eloquence of Dr. Richard S. Storrs's historical address on "The Early American Spirit and its Genesis" worthily struck the key-note of our "centennial" oratory, and the addresses of Mr. Dana at Lexington, Mr. Curtis at Concord, and other occasional speeches that have at the present writing been evoked by anniversaries of events in 1775, have been worthy expressions of national feeling. Among the manuals for men of scanty leisure to refresh their memories withal, a very useful one, and creditable to the author, is the "Paragraph History of the United States, with Brief Notes on Contemporaneous Events," by the Rev. Edward Abbott (Roberts, Boston). The following books, completed or publishing in parts, and pamphlets, belong peculiarly to the department of centennial literature:

The History of our Country, from its Discovery by Columbus to the Celebration of the Centennial Anniversary of its Declaration of Independence. By Abby Sage Richardson. (H. O. Houghton & Co., Cambridge, Mass.) Illustrated.

Our Country. A Household History for all Readers, from the Discovery of America to the One Hundredth Anniversary of the Declaration of Independence. By Benson J. Lossing, LL. D. Illustrated by F. O. C. Darley. Publishing in parts. (Johnson, Ward & Co.)

Pictorial History of the United States. With Maps and Illustrations. By John A. Stewart. (J. H. Butler & Co., Philadelphia.)

Ballad History of the American Revolution, by

Contemporary Poets and Prose Writers. Collected and arranged by Frank Moore. Publishing in parts. (Johnson, Ward & Co.)

The German Element in the War of American Independence. By George W. Greene. (Hurd & Houghton.)

Proceedings at the Centennial Celebration of the Battle of Lexington, April 19, 1875. Illustrated. (Lockwood, Brooks & Co., Boston.)

A Brief Narrative of the Principal Transactions on the Morning of the 19th of April, 1775. By Jonas Clark Pastor of the Church in Lexington. With Heliotype Fac-similes of Four Engravings of Scenes in Lexington and Concord, made and published in 1775. (Osgood, Boston.)

History of the Battle of Lexington, on the Morning of the 19th of April, 1775. By Elias Phinney. Boston, 1825. Reprinted. (Noyes, Holmes & Co., Boston.)

Concord Fight, April 19, 1775. By Rev. Grindall Reynolds, Concord, Mass. (A. Williams, Boston.)

The Address of the Hon. William A. Graham, on the Mecklenburg Declaration of Independence of the 20th of May, 1775. Delivered at Charlotte, on the 4th day of February, 1875, by Request of the Citizens of Mecklenburg County. With Accompanying Documents. (Hale.)

Celebration of the Centennial Anniversary of the Battle of Bunker Hill. With an Appendix containing a Survey of the Literature of the Battle, its Antecedents and Results. By J. M. Bugbee. (Williams, Boston. 180 printed.)

The Battle of Bunker Hill. With a View of Charlestown in 1775, Page's Plan of the Action, Boman's Exact View of the Battle, and other Illustrations. By Richard Frothingham. (Little, Brown & Co., Boston.)

Bunker Hill Memorial.—Grandmother's Story of Bunker Hill Battle, as she saw it from the Belfry. (Poem.) By Oliver Wendell Holmes. And, A Narrative of the Battle. By James M. Bugbee. (Osgood.)

Brochure of Bunker Hill. With Heliotype Views. Compiled by George A. Coolidge. (Osgood.)

History of the Battle of Bunker's (Breed's) Hill, on June 17, 1775; from Authentic Sources in Print and Manuscript. By George E. Ellis. With a Map of the Battle-Ground. (Lockwood, Brooks & Co.)

An Account of the Battle of Bunker Hill. Compiled from Authentic Sources, by David Pulsifer. With General Burgoyne's Account of the Battle. With Maps. (Williams, Boston.)

Bunker Hill. The Story told in Letters from the Battle-Field by British Officers engaged. With an Introduction and Sketch of the Battle. By Samuel Adams Drake. With an Illustration of the Battle from an Old Engraving never before published in this Country. (Nichols & Hall, Boston.)

General Israel Putnam, the Commander at Bunker Hill. By Samuel Adams Drake. (Nichols & Hall, Boston.)

Colonel William Prescott, Commander in the Battle of Bunker Hill. Honor to whom Honor is due. A Monograph. By Francis J. Parker. (Williams, Boston.)

Of works bearing on the civil war, the most important, perhaps, is the "Memoirs of General W. T. Sherman" (D. Appleton & Co.). The indisputable authenticity of his narrative, founded as it is upon the most trustworthy materials, will make it indispensable to the future historian of the war, while the vigor and soldierly frankness of the style must make it permanently attractive to the general reader. The attacks that have been made upon it—notably in the volume entitled "Sherman's Historical Raid," by General H. V. Boynton

(Wilstach, Baldwin & Co., Cincinnati)—have not, it is thought by good judges, impeached successfully the distinguished author's credit as an accurate annalist of the events in which he bore so great a part. The "History of the Civil War in America," by the Comte de Paris, has been, so far as published, admirably translated by Mr. L. F. Tassistro, with the editorial supervision of Prof. Henry Coppée (Coates, Philadelphia), with the exception of the ill-advised retention of the metric measurement of distances and quantities. The system may be legal in this country, but is not generally intelligible. But for this peculiarity, it would have little to denote that it is a translation. The history itself it hardly comes within the compass of this article to criticise, but it is only justice to the author to say that his work in its proper character, as a military history, is superior to any account of the war produced by native authors. Other works relating to the war are worthy of mention:

Reminiscences of Forts Sumter and Moultrie in 1860-'61. By Abner Doubleday, Brevet Major-General U. S. A. (Harpers.)

The Siege of Savannah, in December, 1864, and the Confederate Operations in Georgia and the Third Military District of South Carolina, during General Sherman's March from Atlanta to the Sea. By Charles C. Jones, Jr., late Lieutenant-Colonel, Artillery, C. S. A., etc. (Munsell, Albany.)

History of the Second Massachusetts Regiment of Infantry. By George H. Gordon. (A. Williams, Boston.)

Battles for the Union. Comprising Descriptions of many of the most Stubbornly-contested Battles in the War of the Great Rebellion; together with the Incidents and Reminiscences of the Camp, the March, and the Skirmish Line. By Willard Glazier. (Dustin, Gilman & Co., Hartford.)

Also the following publications in general, local, or special history:

Historical Scenes from the Old Jesuit Missions. By the Rt. Rev. William Ingraham Kip, D. D., LL.D. (Randolph.)

Public Men and Events. From the Commencement of Mr. Monroe's Administration, in 1817, to the Close of Mr. Fillmore's Administration, in 1857. By Nathan Sargent ("Oliver Oldschool"). Two volumes. (Lippincott, Philadelphia.)

Antiquities of Long Island. By Gabriel Furman. To which are added, Notes on the Town of Brooklyn, by the same Author, and a Bibliography, by Henry Onderdonk, Jr. Edited by Frank Moore. (Bouton.)

Historical Collections of Louisians and Florida. Second Series. By Colonel B. F. French. (A. Mason.)

The Pioneers of Maryland. By Joseph Banvard, D. D. (Lothrop, Boston.)

East Jersey under the Proprietary Governments. A Narrative of Events connected with the Settlement and Progress of the Province until the Surrender of the Government to the Crown in 1708. By W. A. Whitehead. With an Appendix, containing the Model of the Government of East New Jersey in America, by George Scott, of Pitlochrie, from the Original Edition of 1685. (M. R. Dennis & Co., Newark, N. J.)

Fusang; or, The Discovery of America by Chinese Buddhist Priests in the Fifth Century. By Charles G. Leland. (Bouton.)

General Sullivan not a Pensioner of Luzerne. (A. Williams & Co., Boston.)

History of the United States Marine Corps. By M. Almy Aldrich. From Official Reports and other Documents, compiled by Captain R. S. Collum. (Van Nostrand.)

A Legacy of Historical Gleanings, compiled and arranged by Mrs. Catharine V. E. Bonney. With Illustrations and Autographs. Two volumes. (Munsell, Albany.)

A History of the Town of Northfield, Mass., for One Hundred and Fifty Years. With Genealogies, Portraits, and Engravings. (Munsell.)

History of the American Missionary Association: its Churches and Educational Institutions among the Freedmen, Indians, and Chinese. With Illustrative Facts and Anecdotes. (Missionary Association.)

American State Universities: their Origin and Progress. A History of Congressional University Land-Grants; a Particular Account of the Rise and Development of the University of Michigan, and Hints toward the Future of the American University System. By Andrew Ten Brook. (Clarke, Cincinnati.)

The Disruption of the Methodist Episcopal Church, 1844-'46. Comprising a Thirty Years' History of the Relations of the Two Methodisms. By Edward H. Myers, D. D. With an Introduction by T. O. Summers, D. D. (Southern Methodist Publishing House.)

The Early History of the Disciples in the Western Reserve, Ohio. By A. Sutton Hayden. (Chase & Hall, Cincinnati.)

BIOGRAPHY.—A few works of a high order of merit have appeared in this department of literature, including some that are of historical value. Of the "Memoirs of John Quincy Adams," noticed last year, additional volumes have appeared, forming a comment by a most vigilant and sagacious observer on the public events in which he was a leading actor. Mr. Charles Francis Adams has also published the familiar letters of John Adams, together with a reprint of those of Abigail Adams, the wife of John Adams, and a memoir of Mrs. Adams (Hurd & Houghton). Another Revolutionary biography is the "Life and Times of Joseph Warren," by Richard Frothingham (Little, Brown & Co., Boston). In ecclesiastical biography the "Life of the Rev. Ezra Stiles Gannett" (Roberts), and of the "Rev. John Todd" (Harpers), each records the career of a typical divine, of a type that has disappeared, or has, at any rate, few representatives extant, and is thus an historical monument; and both, it may be added, exhibit, in different styles, a high order of biographical skill. Some in the following list merit more than a mere mention, with which we must be content:

A Memoir of Commodore David Porter, of the U. S. Navy. By Admiral David D. Porter. (Munsell, Albany.)

From Everglade to Cañon with the Second Dragoons (Second U. S. Cavalry). An Authentic Account of Service in Florida, Mexico, Virginia, and the Indian Country. Compiled by Theodore F. Rodenbrough, Colonel and Brevet Brigadier-General U. S. Army, and late Captain Second Cavalry. (Van Nostrand.)

Life and Public Services of Henry Wilson. By Rev. Elias Nason and Thomas Russell. (B. B. Russell, Boston.)

Memorials of Charles Stoddard. By his Daughter,

May Stoddard Johnson. (Congregational Publishing Society.)

The Story of a Working Man's Life, with Sketches of Travel in Europe, Asia, Africa, and America, as related by Himself. By Francis Mason, D. D. With an Introduction by William E. Williams, D. D. (A. Mason.)

The Life and Writings of John Howard Payne. By Gabriel Harrison. (Munsell.)

Life of Rev. Thomas A. Morris, D. D., late Senior Bishop of the Methodist Episcopal Church. By Rev. John F. Marlay, A. M. With an Introduction by Bishop Janes. (Hitchcock & Walden, Cincinnati.)

Wild Life in the Far West, being the Life and Personal Adventures of Captain James Hobbes. Narrated by Himself. (F. & A. Hutchinson & Co., St. Louis.)

Life and Adventures of a Quaker among the Indians. By Thomas C. Battey. (Lee & Shepard, Boston.)

Pestalozzi: His Life, Work, and Influence. By Hermann Krüsi, A. M. (Wilson, Hinkle & Co., Cincinnati.)

Brief Biographies. European Contemporaries. Vol. I. English Statesmen. By T. W. Higginson. —Vol. II. English Radical Leaders. By R. J. Hinton. (Putnam.)

Personal Recollections of the Wreck of the Ville du Havre and the Loch Earn. By N. Weiss, Delegate to the Evangelical Alliance Conference in 1873. Translated from the French. (Randolph.)

The Life of Father Bernard, Missionary Priest of the Congregation of the Most Holy Redeemer. The Apostolate of a Redemptorist. By P. Claessens. Translated from the French. (Catholic Publishing Society.)

Lives of the Clergy of New York and Brooklyn, embracing Two Hundred Biographies of Eminent Living Men in all Denominations; also, the History of each Sect and Congregation. By J. Alexander Patten. (Atlantic Publishing Co.)

Prince Bismarck. A Biographical Sketch. By Wilhelm Görlach. Translated from the German by Miss M. E. Von Glehn. (Holt.)

Madame Récamier and her Friends. From the French of Madame Lenormont. By the Translator of Madame Récamier's Memoirs. (Roberts.)

The Biographical Encyclopædia of Pennsylvania of the Nineteenth Century. (Galaxy Publishing Co., Philadelphia.)

POETRY.—One new poet, at least, has been added to the choir of American singers. "The New Day; a Poem in Songs and Sonnets," by Richard Watson Gilder (Scribner), reveals the possession by the author of some elements of poetical genius—a blending of imagination and passion with a certain subtlety of conception which veils the purpose by which unity is supposed to be given to the series of "songs and sonnets" constituting it "a poem." He has too much power to be lightly regarded, yet it has not adequate manifestation. Our poetic veterans still earn new laurels. Mr. Longfellow's volume, "The Masque of Pandora," etc. (Osgood), exhibits, in the sonnets especially, some of the choicest work his practised pen has effected. Mr. Whittier's "Mabel Martin" (Osgood) may not add to his fame, but will support it, while its adaptation to the illustrator's pencil permits it to be enshrined in an exceedingly attractive volume. "The Ship in the Desert," by Joaquin Miller (Roberts), while it is not wanting in the qualities that won so

warm a welcome to his first published poems, shows no such advance upon his earlier productions as to save the public from a shade of disappointment. The flow of verse for the year is not very copious, but includes a number of volumes of considerable worth:

Leisure Day Rhymes. By John Godfrey Saxe. (Osgood.)

Home Pastorals and other Poems. By Bayard Taylor. (Osgood.)

Songs of Yesterday. By Benj. F. Taylor. (Griggs, Chicago.)

The Bird and the Bell, with other Poems. By Christopher Pearse Cranch. (Osgood.)

Poetic Studies. By Elizabeth Stuart Phelps. (Osgood.)

Cartoons. By Margaret J. Preston. (Roberts.)

Rose and Root-tree. A Volume of Poems. By George F. Lathrop. (Osgood.)

Farm Legends. By William J. Carleton. (Harpers.)

An Idyl of Work. By Lucy Larcom. (Osgood.)

The Poetical Works of Ray Palmer. (Barnes.)

Point-Lace and Diamonds. Poems by George A. Baker, Jr. (Lee & Shepard.)

Several volumes of translations, and apparently of new candidates for poetic honors, are included in the following:

Exotics. A Volume of Poems translated from the German, French, Latin, and Persian. By J. F. C. and L. C. (Osgood.)

Alpine Lyrics. A Selection from the Poems of Meta Heusser-Schweitzer. Translated by H. L. S., one of the authors of "Hymns from the Land of Luther. (Randolph.)

English Gypsy Songs in Romany. With Metrical English Translations. By Charles G. Leland. Prof. E. H. Palmer, and Janet Tuckey. (Lippincott, Philadelphia.)

Carmina Yalensis. A Collection of Yale College Songs, with Music and Piano-forte Accompaniment. Compiled by Ferd. V. D. Garretson. Enlarged Edition, with Popular New Songs, arranged by J. O. Heald and S. T. Dutton. (Taintor.)

A Wayside Flower, and other Poems. By Charlotte Lenox. (Kelly, Piet & Co., Baltimore.)

A Few Thoughts for a Few Friends. By Alice Arnold Crawford. (Jansen, McClurg & Co., Chicago.)

The Mirror of a Mind. A Poem. By Algernon Sydney Logan. (Putnam.)

The Mountain of the Lovers; with Poems of Nature and Tradition. By Paul H. Hayne. (Hale.)

The Woman and the Queen: A Ballad, and other Specimens of Verse. By Arthur W. Austin. (Williams, Boston.)

Roland of Algernon, and other Poems. By Albert Bradburn Barrows. (Williams.)

Ensensore, and other Poems. By P. H. Myers. (Dodd & Mead.)

Songs of the Year, and other Poems. By "Charlton." (Clarke, Cincinnati.)

The Roll-Call, and other Poems. By George Johnson. (Lippincott.)

American Boyhood, a Poem. By Horace P. Bidle. (Lippincott.)

Heart Echoes. Poems. By Helen A. Mannville. (S. R. Wells & Co.)

The Poems of Duvall Porter. (J. P. Bell & Co., Lynchburg, Va.)

Poems and Essays. By Edgar A. Poe. Containing the late Ingram Memoir and Vindication. (Wideton.)

FICTION.—In prose fiction the product of the year was scanty. Mrs. Stowe, in "We and our Neighbors; or, The Records of an Unfashion-

able Street" (Ford), showed her rare skill as a story-teller, with glimpses of her more commanding power over her readers' sensibilities. It is a remarkable instance of what genius can make out of what would seem scanty materials for a tale. Mr. Henry James, Jr., whose short stories have been much and justly admired, has essayed a longer flight. His novel "Roderick Hudson" (Osgood), fulfills in a good degree the promise that was discerned in his minor fictions. He has also collected a volume of stories entitled "A Passionate Pilgrim, and other Tales." In "A Norseman's Pilgrimage," by H. H. Boyesen (Sheldon), the author tries his hand at the delineation of American character. His American girls are partly drawn from observation; partly, it may be suspected, from the conventional lay-figures in contemporary literature. Still, there are so much freshness and reality in the book as to produce a pleasing effect, and give promise of still better things. Mr. J. W. De Forest, in "Playing the Mischief" (Harpers), has made fiction the medium of satire upon the abuses of public life. "Tales of the Argonauts," by Bret Harte (Osgood), takes the reader back to the scenes and characters of the first California emigration, in the delineation of which Mr. Harte first gained the public attention. "Castle Nowhere; Lake Country Sketches," by Constance Fenimore Woolson (Osgood), may be said to have broken fresh ground for the purposes of fiction, and with encouraging success. Dr. Holland's "Sevenoaks" (Scribner) better deserves its immense popularity than either of the author's previous works. The same may be said of the Rev. E. P. Roe's "From Jest to Earnest" (Dodd). The author has the ear of a large public, for whom we might wish a more exacting taste, making success more difficult to the author, and compelling him to a higher style of work. "Mrs. Limber's Raffle; or, a Church Fair and its Victims" (D. Appleton & Co.), is a *brochure* rather than a novel, but it is an exceedingly happy one in idea and execution. The following are of various and some of very considerable merit:

Victor La Tourette. A Novel. By a Broad Churchman. (Roberts.)
 Hearts and Hands. A Novel. By Christian Reid. (D. Appleton & Co.)
 The Rainbow Creed. A Story of the Times. (Gill, Boston.)
 Mr. Vaughan's Heir. A Novel. By Frank Lee Benedict. (Harpers.)
 Oakridge. An Old-Time Story. By J. Emerson Smith. (Osgood.)
 Jetatrice; or, The Veil withdrawn. By Madame A. Craven. Translated by Frances A. Shaw. (Estes & Lauriat, Boston.)
 Love Adrift. A Story of the American Navy. By F. H. Sheppard, U. S. N. (Sheldon.)
 A Question of Honor. By Christian Reid. (D. Appleton & Co.)
 St. Simon's Niece. By Frank Lee Benedict. (Harpers.)
 The Abbé Tigrane, Candidate for the Papal Chair. By Ferdinand Fabre. Translated from the French by the Rev. Leonard Woolsey Bacon. (Ford.)
 The Years that are Told. By Rose Porter. (Randolph.)

Buffets. By Charles H. Doe. (Osgood.)
 Mae Madden. A Story. By Mary Murdock Mason. With an Introductory Poem, by Joaquin Miller. (Jansen, McClurg & Co., Chicago.)
 Starting Out. A Story of the Ohio Hills. By Alexander Clark. (Lippincott.)
 The Clandestine Marriage. By Eliza A. Dupuy (Peterson, Philadelphia.)
 Annette; or, The Chronicle of Bellevue. A Novel. By Charlotte Walsingham. (Claxton, Philadelphia.)
 The Fair Puritan. An Historical Romance of New England in the Days of Witchcraft. By Henry William Herbert. (Lippincott.)
 Alice Brand. A Romance of the Capital. By A. G. Biddle. (D. Appleton & Co.)
 Geier-Wally. A Tale of the Tyrol. By Wilhelm von Hillern. (D. Appleton & Co.)
 Brigadier Frederick. By M. M. Erekman-Chatrion. (D. Appleton & Co.)
 Perfect Love casteth out Fear. By Katharine Sedgwick Washburn. (Lee & Shepard.)
 Richard Ireton. A Legend of the Early Settlement of New England. By Martha Remick. (Loring, Boston.)
 Caring for No Man. A Novel. By Linn Boyd Porter. (Gill, Boston.)
 The Calderwood Secret. By Virginia W. Johnson. (Harpers.)
 Hoosier Mosaics. By Maurice Thompson. (Hale.)
 Danger; or, Wounded in the House of a Friend. A Temperance Novel. By T. S. Arthur. (J. M. Stoddard & Co., Philadelphia.)
 Irene of Armenia. A Tale of the Time of Clovis. By J. C. Bateman. (Sadlier.)
 Afraja; or, Life and Love in Norway. Translated from the German, by Edward Joy Morris. (Coates, Philadelphia.)
 Claude Melnotte as a Detective, and other Stories. By Allen Pinkerton. (Keen, Cooke & Co., Chicago.)
 Bertha's Engagement. A New Society Novel. By Mrs. Ann S. Stephens. (Peterson.)
 The Old Chest; or, The Journal of a Family of the French People, from the Merovingian Times to our Own Days. Translated from the French by Anna T. Sadlier. (Sadlier.)
 Infelice. A Novel. By Augusta Evans Wilson. (Carleton.)
 Betty's Bright Idea. Also, Deacon Pitkin's Farm, and, The First Christmas in New England. By Harriet Beecher Stowe. (Ford.)
 On the Heights. By Berthold Auerbach. Translated by Simon Adler Stern. (Holt.)
 The Woman of Honor. Translated from the French of Louis Enault, by Mrs. Rebecca L. Tutt. (Peterson.)

ESSAYS AND CRITICISM.—Mr. Emerson will always be "caviare to the general," but to his own public—which has for some years been growing in extent, both at home and abroad—the issue of one of his volumes is an event. As usual, the title, "Letters and Social Aims" (Osgood), is not very descriptive of the contents. But the essays are in his best vein. "Nature and Culture," by Harvey Rice (Lee & Shepard), is a volume made up of papers hardly worth republication. The following deserve notice:

Winter Sunshine. By John Burroughs.
 Essays Æsthetical. By George H. Calvert. (Lee & Shepard.)
 A Sheaf of Papers. By T. G. A. (Roberts.)
 Pictures of Life in Camp and Field. By Benj. F. Taylor. (Griggs, Chicago.)
 Library Notes. By A. P. Russell. (Hurd & Houghton.)

TRAVEL AND EXPLORATION.—Of books of travel, in the estimate of which literary qualities take precedence of the information imparted, two or three deserve especial mention. "Impressions of London Social Life," by E. S. Nadal (Scribner), is the work of a keen observer, and the vigor of his descriptions shows how much the value of observation depends on the qualities of mind that are brought to the task. A less brilliant but still very suggestive volume, giving the results gathered in a residence of years in Paris, is "The French at Home," by Albert Rhodes, possibly too tolerant of French "ways." "Transatlantic Sketches," by Henry James, Jr. (Osgood), and "Switzerland and the Swiss, by an American Resident" (D. Appleton & Co.), give to him who, like Charles Lamb, "travels only by map or card," the advantage of very pleasant company. "The Great South," by Edward King, with its numerous and beautiful illustrations (American Publishing Co.), divides the reader's admiration between the information communicated and the rich medium of communication. "Our Barren Lands," by W. B. Hazen, Colonel of the Sixth Infantry, U. S. A. (Clarke, Cincinnati), is a valuable though by no means flattering contribution to our knowledge of the national resources. "Home Sketches in France, and other Papers, by the late Mrs. Henry M. Field, with some Notices of her Life and Character" (Putnams), besides its intrinsic value, has a pensive biographical interest. We give the following titles:

Africa. The History of Exploration and Adventure, as given in the Leading Authorities from Herodotus to Livingstone. By C. H. Jones. (Holt.)

My Danish Days. With a Glance at the History, Traditions, and Literature of the Old Northern Country. By George H. Griffin, late U. S. Consul at Copenhagen, etc. (Claxton.)

A Summer in Norway. By John Dean Caton, LL. D. (Jansen, McClurg & Co., Chicago.)

Our Next-door Neighbor. A Winter in Mexico. By Gilbert Haven, D. D., Bishop of the Methodist-Episcopal Church. (Harpers.)

Journey to Honduras, and Jottings by the Way. Interoceanic Railway. By R. G. Huston, C. E. (Clarke, Cincinnati.)

Notes on Paris. By H. Taine, D. C. L., Oxon., etc. Translated, with Notes, by John Austin Stevens. (Holt.)

The Economical European Tourist. A Journalist Three Months Abroad for \$430, including Ireland, Scotland, England, France, Switzerland, Italy, Austria, Prussia... showing what was enjoyed and what it cost, etc. By William Hemetrest. (American News Co.)

Europe for Two Dollars a Day. A Few Notes for the Assistance of Tourists of Moderate Means. With some Personal Reminiscences of Travel. By M. F. Sweetser. (Osgood.)

Three Months in the Orient; also, Life in Rome, and the Vienna Exposition. By Orville Justus Bliss. (Griggs, Chicago.)

Four Thousand Miles of African Travel. A Personal Record of a Journey up the Nile, through the Soudan, to the Confines of Central Africa, embracing an Examination of the Slave-Trade, and a Discussion of the Problem of the Sources of the Nile. By Alvan S. Southworth, Secretary of the American Geographical Society. (Baker, Pratt & Co.)

Arabistan; or, The Land of "The Arabian Nights." Being Travels through Egypt, Arabia, and Persia, to Bagdad. By Wm. Perry Fogg, A. M. With an Introduction by Bayard Taylor. (Dustin, Gilman & Co., Hartford.)

An American in Iceland. By Samuel Kneeland, A. M., M. D. (Lockwood, Brooks & Co.)

Illustrated Rambles in Bible-Lands. By Rev. Richard Newton, D. D. (S. S. Union.)

Backsheesh; or, Life and Adventures in the Orient. By Colonel Thos. W. Knox. (A. D. Worthington, Hartford.)

The Thrones and Palaces of Babylon and Nineveh, from Sea to Sea. A Thousand Miles on Horseback. By John P. Newman, D. D. (Harpers.)

Winter and Spring on the Shores of the Mediterranean. By J. H. Bennet. (D. Appleton & Co.)

Spain: Art Remains and Art Realities. Notes during nearly Three Years' Residence. By H. Willis Baxley. (D. Appleton & Co.)

SCIENCE AND PHILOSOPHY.—Of philosophy, in the original sense of that word, not much was given to the public. One adventurous treatise indeed appeared, proposing nothing less than entire reconstruction of metaphysics and ethica. "Metaphysics; or, The Science of Perception," by the Rev. John Miller, of Princeton, N. J. (Dodd), embodies the results of the author's thought for many years. It is acute, suggestive, interesting to an unusual degree, considering the subject; but that readers will be convinced by it is more than can be affirmed with much confidence. Other works, including some dealing with questions on the border-line between science, philosophy, and religion, have been contributed to our apparatus for intellectual gymnastics:

Thoughts on Causality, with References to Phases of Recent Science. By Alexander Winchell, LL. D., Professor in Syracuse University. (Munsell, Albany.)

The Sensualistic Philosophy of the Nineteenth Century considered. By Robert L. Dabney, D. D., LL. D., Professor in the Union Theological Seminary, Va. (Randolph.)

Outline of the Evolution Philosophy. By Dr. M. E. Cazzelles. Translated from the French by Rev. O. B. Frothingham. With an Appendix by E. L. Youmans, M. D. (D. Appleton & Co.)

Ideas in Nature overlooked by Dr. Tyndall: being an Exposition of Dr. Tyndall's Belfast Address. By James McCosh, D. D., LL. D., President of the College of New Jersey. (Carters.)

Elementary Philosophy. Part I. Being the Science of Reasoning and the Art of Correct Reasoning according to Science; or, Logic critically treated and applied. With a Chapter on the Division and Definition of Sciences. By James M. Willcox, Ph. D. (Coates, Philadelphia.)

Religion and Science in their Relations to Philosophy. A Paper suggested by Dr. Tyndall's Address at Belfast, and read before the Philosophical Society at Washington. By Prof. Charles W. Shields, D. D. (Scribner.)

The Mosaic Account of Creation the Miracle of To-day; or, New Witnesses to the Oneness of Genesis and Science. To which are added an Inquiry as to the Cause and Epoch of the Present Inclination of the Earth's Axis, and an Essay on Cosmology. By Charles B. Warring. (Schermerhorn.)

Nature and the Bible. By J. W. Dawson, LL. D. (Carters.)

Principia; or, Basis of Social Science. By E. J. Wright. (Lippincott.)

Among works on particular branches of science, an American contribution to the "In-

ternational Scientific Series" (D. Appleton & Co.) deserves special reference: Prof. Whitney's "The Life and Growth of Language: an Outline of Linguistic Science," and a translation prepared for the "Popular Science Library" of the same publishers: "The Natural History of Man; a Course of Elementary Lectures," by Prof. A. de Quatrefages, translated from the French by Eliza A. Youmans. The translation and publication by Mr. B. R. Tucker, of Princeton, Mass., of Proudhon's "What is Property?" seem to imply an expectation of some popular interest in the doctrines of French communism. The issue of two additional volumes of Mr. Hubert Howe Bancroft's "Native Races of the Pacific States of North America" (D. Appleton & Co.) carries forward toward completion a very interesting contribution to ethnography. The essays, posthumously published, of Mr. Isaac Butts, on "Protection and Free Trade," including "An Examination into the Nature of Value, and the Agency of the Natural Forces in producing it" (Putnams), deserve the attention of political economists. The following list embraces some works more popular than scientific, though upon scientific topics:

A History of North American Birds. By Spencer F. Baird, Thomas M. Brewer, and Robert Ridgway. The Land-Birds. Illustrated by 598 Woodcuts and 64 Plates of Life Size, illustrative of the Head of each Species. In three vols. Vol. III. (Little, Brown & Co., Boston.)

Annual Record of Science and Industry for 1874. Edited by Spencer F. Baird, with the Assistance of Eminent Men of Science. (Harpers.)

The Science-Record for 1875. A Compendium of Scientific Progress and Discovery during the Past Year. Edited by Alfred E. Beach. (Munn.)

Astronomy. By J. Rambosson. Translated by C. B. Pitman. With 63 Engravings, 8 Maps of the Celestial Bodies, and 10 Colored Plates. (D. Appleton & Co.)

What is Music? By Isaac L. Rice. (D. Appleton & Co.)

The Population of an Apple-Tree. By A. S. Packard, Jr. (Estes & Lauriat, Boston.)

A Catalogue of Plants growing without Cultivation within Thirty Miles of Amherst College. By Edward Tuckerman, M. A., and Charles C. Frost, M. A. (Nelson, Amherst.)

Ancient Faiths and Modern. A Dissertation upon Worship, Legends, and Divinities in Western Asia, Europe, and elsewhere, before the Christian Era. By Thomas Inman, M. D. (Bouton.)

On the General Integrals of Planetary Motion. By Simon Newcomb. (Smithsonian Contributions.)

A New Treatise on the Elements of Mechanics, establishing Strict Precision in the Meaning of Dynamical Terms, accompanied with an Appendix on Duodenal Arithmetic and Metrology. By John W. Nystrom, C. E. (Porter & Co., Philadelphia.)

Outlines of Proximate Organic Analysis. For the Identification, Separation, and Quantitative Determination of the more commonly-occurring Organic Compounds. By Albert B. Prescott, M. D., Professor of Organic and Applied Chemistry in the University of Michigan. (Van Nostrand.)

Manual of Determinative Mineralogy, with an Introduction on Blowpipe Analysis. By George J. Brush, Professor of Mineralogy in the Sheffield Scientific School [Yale College]. (Wiley.)

A Course of Lectures on Physiology, as delivered by Prof. Küss at the Medical School of the University of Strasburg. Edited by Matthias Duval, M. D.

Translated by Robert Amory, M. D. (J. Campbell, Boston.)

Chemical Examination of Alcoholic Liquors. A Manual of the Constituents of the Distilled Spirits and Fermented Liquors of Commerce, and their Qualitative and Quantitative Determination. By Albert B. Prescott, M. D. (Van Nostrand.)

Reports and Papers presented at the Meetings of the American Public Health Association in the Year 1875. (Hurd & Houghton.)

The Sexes through Nature. By Antoinette Brown Blackwell. (Putnams.)

Elements of the Differential and Integral Calculus, by a New Method, founded on the True System of Sir Isaac Newton, without the Use of Infinitesimals or Limits. By C. P. Buckingham, Professor in Kenyon College, O. (Griggs, Chicago.)

Social Science and National Economy. By Robert Ellis Thompson, Professor in the University of Pennsylvania. (Porter & Co.)

Projectiles and Rifled Cannon. Systems of Projectiles and Rifling, with Practical Suggestions for their Improvement, as embraced in a Report to the Chief of Ordnance, U. S. A. By Captain John G. Butler, Ordnance Corps, U. S. A. With an Appendix containing the Report of the Board on Experimental Rifled Guns on the Proof of an Eight-inch Converted Rifle. Illustrated by 36 Lithographic Plates. (Van Nostrand.)

Contributions to Barometric Hypsometry. With Tables for Use in California. By J. D. Whitney, State Geologist. (Little, Brown & Co., Boston.)

The Geology of New Hampshire. A Report comprising the Results of Explorations ordered by the Legislature. By C. H. Hitchcock, State Geologist, and J. H. Huntington, Principal Assistant. In Two Parts. Part I. Physical Geography. (E. C. Eastman, Concord, N. H.)

The Recent Origin of Man, as illustrated by Geology and the Modern Science of Prehistoric Archaeology. By James C. Southall.

Storms: their Nature, Classification, and Laws, with the Means of predicting them by their Embodiments, the Clouds. By William Blasius, formerly Professor of Natural Sciences in the Lyceum of Hanover. (Porter & Coates.)

Appendix to Dana's Mineralogy, by George J. Brush, Professor in the Sheffield Scientific School, and Edward S. Dana, Curator of the Mineral Department of the Peabody Museum. (J. Wiley.)

Key to the Hebrew-Egyptian Mystery in the Source of Measures originating the British Inch and the Ancient Cubit, by which was built the Great Pyramid of Egypt and the Temple of Solomon, and through the Possession and Use of which, Man, assuming to realize the Creative Law of the Deity, set it forth in a Mystery among the Hebrews, called Kabbala. By J. Kalston Skinner. (Clarke, Cincinnati.)

The Birds and Seasons of New England. By Wilson Flagg, author of "Woods and By-Ways of New England." With Heliotype Illustrations. (Osgood.)

Geological Survey of Missouri. By Ralph Pumphrey, G. C. Brodhead, F. B. Meek, and B. F. Shumard. Three vols. and two atlases. (Van Nostrand.)

The Primer of Political Economy. By Alfred B. Mason and John J. Lalor. (Jansen, McClurg & Co., Chicago.)

Manual of Qualitative Chemical Analysis. By Dr. C. Remegius Fresenius. Translated into the New System, and newly edited by Prof. S. W. Johnson. (Wiley.)

Histology and Histo-Chemistry of Man. By Heinrich Frey. (D. Appleton & Co.)

Text-Book of Physiology. By Austin Flint, Jr. (D. Appleton & Co.)

RELIGION AND THEOLOGY.—A few works worthy of particular consideration, as bearing upon theological science, or giving promise, in their range of thought or by their grace of

style, of more than ephemeral repute, rise above the general level of moral or pietistic mediocrity. Such are "The Theistic Conception of the World," by B. F. Cooker, D. D., LL. D., Professor in the University of Michigan (Harpers); "Monumental Christianity; or, The Art and Symbolism of the Primitive Church," by John P. Lundy (Bouton); "The Sacred Tabernacle of the Hebrews, its History and Significance," by Rev. E. E. Atwater (Dodd); "Philosophy of Trinitarian Doctrine," by Rev. A. G. Pease (Putnams); "Christ and Humanity; with a Review, Historical and Critical, of the Doctrine of Christ's Person," by Henry M. Goodwin (Harpers); "A Dictionary of Religious Information for Popular and Professional Use," edited by the Rev. Lyman Abbott, assisted by the Rev. T. J. Conant, D. D. (Harpers); the sermons of the late Rev. Frederick Brooks (Osgood); "Bible Lands: their Modern Customs and Manners illustrative of Scripture," by the Rev. Henry J. Van Lennep, D. D. (Harpers); "Christian Belief and Life," sermons by the Rev. A. P. Peabody, D. D., LL. D. (Roberts); "Christian Missions," by Julius H. Seelye, Professor in Amherst College (Dodd); "God's Word through Preaching," lectures by John Hall, D. D. (Dodd); "Conditions of Success in Preaching without Notes," by Richard S. Storrs, D. D., LL. D. (Dodd); "Elijah, the Prophet," by Rev. William M. Taylor, D. D. (Harpers); and "Patmos; or, The Kingdom and Patience," by Rev. Justin A. Smith, D. D. (Griggs, Chicago). The titles that follow are arranged in the order of their dates of publication, and not of their topics or relative importance:

Congregational Worship. By Rev. A. J. Gordon. (Young, Boston.)

The Book of Common Prayer of the Reformed Episcopal Church, adapted and set forth for Use by the Second General Council of the said Church, held in the City of New York, May, 1874. With and without Hymns; also, Hymnal separate. (J. H. Moore, Philadelphia.)

The Book of Common Prayer of the Reformed Episcopal Church, compared with that of the Protestant Episcopal Church in the United States. (Moore, Philadelphia.)

Odd-Fellowship. Its Doctrine and Practice examined in the Light of God's Word, and judged by its own Utterances. Translated from the German of Rev. J. H. Brookman, Pastor of the German Lutheran Church, Fort Atkinson, Wis. (Published by the author.)

Needed Phases of Christianity. By James H. Fairchild, D. D. (Pratt & Brattle, Oberlin, O.)

Preparing to Teach. For Study by Sunday-School Teachers and Training-Classes. By John Hall, D. D., Edward P. Humphrey, D. D., LL. D., Wm. Henry Green, D. D., LL. D., Francis L. Patton, D. D., and Rev. J. Bennett Tyler. (Presbyterian Board of Publication.)

The Social Law of God. Sermons on the Ten Commandments. By Edward A. Washburn, D. D. (T. Whittaker.)

Lost Forever. By L. T. Townsend, D. D., author of "Credo," etc. (Lee & Shepard.)

A Christian. What! How! Why! By Rev. Wm. H. Willcox. (Congregational Publication Society.)

Spiritual Struggles of a Roman Catholic. An Auto-

biographical Sketch, by Louis N. Beaudry. With an Introduction by Rev. B. Hawley, D. D. (Nelson & Phillips.)

Together; or, Life in the Circuit. By Mrs. E. E. Boyd. (Nelson & Phillips.)

In Inquiry into the Use of Baptism, and the Nature of Christic and Patristic Baptism, as exhibited in the Holy Scriptures and Patristic Writings. By James W. Dale, D. D. (Rutter, Philadelphia.)

Fraternal Camp-Meeting Sermons, preached by Ministers of the Various Branches of Methodism, at the Round Lake Camp-Meeting, N. Y., July, 1874. With an Introduction by Bishop Peck. (Nelson.)

Lessons in Bible-History. In Three Parts. Prepared for the Use of Catholic Schools. By a Teacher. With the Approbation of the Most Rev. J. McCloskey, D. D., Archbishop of New York. (P. O'Shea.)

The Abiding Comforter, a Necessity to Joyful Piety and Eminent Usefulness. By Rev. Anthony Atwood, of the Philadelphia Annual Conference. (A. Wallace, Philadelphia.)

No Room for Jesus. By Charles F. Deems. (Dutton.)

Church-Members' Handbook of Theology. By the Rev. Norvell Robertson. (Southern Baptist Publication Society.)

Bishop Seabury's Communion-Office. Reprinted in Fac-simile. With an Historical Sketch and Notes by the Rev. Samuel Hart, A. M. (Whittaker.)

Sports that Kill. By T. DeWitt Talmage. (Harpers.)

Lectures on Revivals. By Edward Norris Kirk, D. D. Edited by Rev. David O. Mearns. (Congregational Publication Society, Boston.)

The Baptismal Catechism. By the Rev. A. Nettles, of the South Carolina Conference. (Southern Methodist Publication House.)

The Person and Character of Jesus Christ. By Thomas Armitage, D. D. (American Baptist Publication Society.)

The Mistress of Novices enlightened upon her Duties; or, Method of Direction for the Use of Persons charged to form Souls to Christian and Religious Perfection. By M. Abbé Leguay. Translated by a Member of the Order of Mercy. (Catholic Publication Society.)

The Manual of the Queen of Angels. A Prayer-Book for Daily Use. Compiled by the Sisters of Mercy. With a Preface by the Very Rev. T. S. Preston, V. G. Approved by the Most Rev. J. McCloskey, D. D., Archbishop of New York.

Authorized Report of the Proceedings of the First Congress of the Protestant Episcopal Church in the United States, held in the City of New York, October 6 and 7, 1874. Compiled by the Secretary. (Whittaker.)

Seeking and Finding. From the German. By Lewis Henry Steiner. (Reformed Church Board of Publication.)

Nature, Order, and Fellowship of the Church. By W. W. Everts, D. D. (Ward.)

Covenant Prayers: Short Forms for Family Prayer, with Special Reference to the Christian Covenant and the Promises of our Saviour. By A. Cleveland Cox, Bishop of Western New York. (M. Taylor, Buffalo.)

"Our Bible:" Three Lectures by Rev. J. O. M. Hewitt. (Jansen, McClurg & Co., Chicago.)

Christ and the World: Secularism the Enemy of the Church. By Right Rev. F. D. Huntington, S. T. D., Bishop of Central New York. (Dutton.)

Divine Pictures of the Christian Centuries. By Rev. Ezra D. Simons. (W. H. Young, Troy, N. Y.)

Via Sacra; or, Footprints of Christ. A Book for Holy Week. By the Rev. William A. Leonard. With an Introduction, by the Rev. Charles H. Hall, D. D. (Dutton.)

God's Rule for Christian Giving: A Practical Essay on the Science of Christian Economy. By William Speer. (Presbyterian Board of Publication.)

Shams in Lent; or, The Real and the False in Lenten Duties. Henry C. Potter, D. D. (Dutton.)
 Love Enthroned: Essays on Evangelical Perfection. By Daniel Steele, D. D. (Nelson & Phillips.)
 The Church identified by a Reference to the History of its Origin, Extension, and Perpetuation, with Special Reference to the Protestant Episcopal Church in the United States. By William D. Wilson, D. D., LL. D. (Dutton.)

Our King and Saviour; or, The Story of our Lord's Life on Earth. By Daniel Wise, D. D. With 88 Illustrations. (Nelson & Phillips.)

Convert Culture. By Granville S. Abbott. (American Baptist Publication Society, Philadelphia.)

The Criterion; or, How to detect Error and arrive at Truth. By Rev. J. Balme. Translated by a Catholic Priest. (O'Shea.)

A Tract for the Missions on Baptism as a Sacrament in the Catholic Church. By Rev. M. S. Gross. (Catholic Publication Society.)

Prayer and its Relation to Modern Thought. A Course of Lectures delivered before the Theological Seminary and Rutgers College at New Brunswick, N. J. By Isaac S. Hartley, D. D. (Reformed Church Board of Publication.)

The Story of a Convert as told to his Former Parishioners after he became a Catholic. By B. W. Whitcher, A. M., late a Clergyman of the Protestant Episcopal Church, and joint Author, with his late wife, of the "Widow Bedott Papers." (O'Shea.)

Famous Painters and Paintings. By Mrs. J. H. Shedd. Illustrated with Heliotypes of Engravings from Works by Raphael, Correggio, Titian, etc. (Osgood.)

Child-Life in Pictures. Containing 24 Heliotype Plates from Correggio, Copley, Reynolds, Greuze, Lawrence, Murillo, Landseer, Raphael, and other Painters. (Osgood.)

USEFUL ARTS.—This is a comprehensive division, covering a wide range, from architecture to cookery, and not excluding even the destructive art of war:

Fret-Sawing and Wood-Carving, for Amateurs. By George A. Sawyer. Illustrated from Numerous Drawings by the Author. (Lee & Shepard.)

Guillaume's Interior Architecture. Containing Twelve Folio Plates, showing Twelve Designs and Eight Sections of Doors, Stairs, Window-Finish, Mantels, Wainscoting, etc., and Two Elevations for Dwellings in French and Italian Style. (Bicknell.)

Graphical Method for the Analysis of Bridge-Trusses: extended to Continuous Girders and Draw-Spans. By Charles E. Greene, A. M., Professor of Civil Engineering, University of Michigan. (Van Nostrand.)

The Progressive Shipbuilder. By John W. Griffiths. Vol. I., with 20 Lithographic Plates and 14 Woodcuts. (Published by the Author.)

Ceramic Art: A Report on Pottery, Porcelain, Tiles, Terra-Cotta, and Brick, with a Table of Marks and Monograms, etc. By William P. Blake, U. S. Centennial Commissioner at Vienna. From the Volume of Reports of the Massachusetts Commission to Vienna, 1873. (Van Nostrand.)

Narrow-Gauge Railways in America: embracing a Sketch of the Rise, Progress, and Success of the New System, and Valuable Statistics, etc. Also a Directory of Narrow-Gauge Railways in North America. By Howard Fleming. Illustrated. (Van Nostrand.)

Knight's American Mechanical Dictionary: being a Description of Tools, Instruments, Machines, Processes, and Engineering; History of Inventions; General Technological Vocabulary and Digest of Mechanical Appliances in Science and the Arts. By Edward H. Knight. Illustrated with upward of 5,000 Engravings. In 3 volumes. Vols. I. and II. (Ford.)

Lahey's Village and Country Houses; or, Cheap Homes for All Classes. Comprising 84 Pages of Designs. (Orange Judd Co.)

Catechism of the Locomotive. By M. N. Forney. Mechanical Engineer. (Railroad Gazette.)

Breakfast, Luncheon, and Tea. By Marion Harland. (Scribner.)

Illustrated Homes. A Series of Papers describing Real Houses and Real People. By E. C. Gardner. (Osgood.)

Progressive American Architecture: presenting in Illustration an Extensive Collection of Original Studies for Dwellings, Banks, School and Office Buildings, etc. By G. B. Croff, Architect. (Orange Judd & Co.)

The Manufactories and Manufacturers of Pennsylvania of the Nineteenth Century. With 173 Steel Engravings. (Galaxy Publishing Co., Philadelphia.)

Mineral Deposits in Essex County, Massachusetts, especially in Newbury and Newburyport. With Map. By Chas. J. Brockway. (Williams, Boston.)

A Manual of Architecture for Churches, Parsonages, and Schoolhouses. (Bicknell.)

The Origin and Antiquity of Engraving. With Some Remarks on the Utility and Pleasures of Printing. By W. S. Baker. With Heliotype Illustrations. (Osgood.)

The Pistol as a Weapon of Defense in the House and on the Road. How to choose it and how to use it. (Industrial Publishing Co.)

Church Decoration. A Practical Manual of Appropriate Ornamentation. Edited by a Practical Illuminator. With 16 Full-page Colored Illustrations. (Dutton.)

Stereotomy. Problems in Stone-Cutting. By S. Edward Warren, C. E. (J. Wiley.)

The Amateur Trapper and Trap-Maker's Guide. By Stanley Harding. (Dink & Fitzgerald.)

How to Make Candy. A Manual of Plain Directions for the more Popular Forms of Confectionery. (Dustin, Gilman & Co., Hartford.)

Monumental Designs. By C. and W. H. Foggett. (Van Nostrand.)

Hand-Book for Charcoal-Burners. By G. Svedelius. Translated from the Swedish by R. B. Anderson, A. M. With Notes by W. J. L. Nicodemus. C. E. (Wiley.)

Weights, Measures, and Money. By F. W. Clarke. (D. Appleton & Co.)

JUVENILE.—The mental provender offered to young readers, like that which their seniors enjoy, is good, bad, and indifferent; and severe, and deservedly so, as has been the criticism directed upon it, we are not certain that the

proportion of ill-deserving books is larger among juvenile publications than in those prepared for maturer minds. The standard of excellence in this department of literature has been noticeably raised within the last few years. Colonel Higginson's "Young Folks' History of the United States" (Lee & Shepard) is better than folks of any age had, not so many years ago. Miss L. M. Alcott is at her best in "Eight Cousins; or, the Auntie" (Roberts), and her best is second to none. Mr. Trowbridge completes his "Jack Hazard" series in "The Young Surveyor;" the dog "Lion" comes near being the real hero of all the books, which, however, are wholesomely entertaining throughout. Mrs. A. M. Diaz, whose "William Henry" is a genuine creation of genius, favors the youngsters with such "A Story-Book for Children" (Osgood) as nobody else could write. The lady who writes under the name of "Susan Coolidge," in her "Nine Little Goslings" (Roberts), skillfully links her stories to the nursery legends of "Mother Goose." "The Catskill Fairies," with its wealth of illustrations (Harpers), opens indeed a fairy world. And of kindred excellence are the following:

Doings of the Bodley Family in Town and Country. 77 Illustrations. (Hurd.)
 Jolly Good Times; or, Child Life on a Farm. By P. Thorne. (Roberts.)
 The Big Brother. A Story of Indian War. By George Cary Eggleston. (Putnams.)
 Mice at Play. A Story for the Whole Family. By Neil Forrest. (Roberts.)
 Tales out of School. By Frank R. Stockton. (Scribner.)
 The Asbury Twins. By Sophie May. (Lee & Shepard.)
 Stories. By Mrs. L. C. Moulton, E. Stuart Phelps, Ella Farman, Rossiter Johnson, and other Story-Tellers. (Lothrop.)
 There's no Place like Home. By Amanda M. Douglas. (Gill, Boston.)
 The Horn of Plenty of Home Poems and Home Pictures. By Sophie May. (Gill.)
 Frisk and his Flock. By Mrs. D. P. Sanford. (Dutton.)

A useful and entertaining form of juvenile literature is compends of history, biography, travel, and adventure, descriptive zoölogy, and the like:

The Island of Fire [Iceland]; or, A Thousand Years of the Old Northern Home, 874-1874. By Rev. P. C. Headley. (Lee & Shepard.)
 The Adventures of the Chevalier de La Salle and his Companions in their Explorations of the Prairies, Forests, Lakes, and Rivers of the New World, and their Interviews with the Savage Tribes Two Hundred Years ago [series of "American Pioneers and Patriots"]. By John S. C. Abbott. (Dodd.)—Also in the same series:
 Life of Christopher Columbus. By John S. C. Abbott. (Dodd.)
 Life of George Washington. By John S. C. Abbott. (Dodd.)
 Arctic Heroes; Facts and Incidents of Arctic Exploration, from the Earliest Voyages to the Discovery of the Fate of Sir John Franklin. By Rev. Z. A. Mudge. (Nelson.)
 African Adventure and Adventurers. Edited by Rev. G. T. Day, D. D. New Edition, enlarged by

Extracts from Dr. Livingstone's Last Journal. (Lothrop.)

Uncrowned Kings; or, Sketches of some Men of Mark, who rose from Obscurity to Renown. By Rev. Daniel Wise, D. D. (Hitchcock, Cincinnati.)

John Winthrop and the Great Colony. By Charles K. True, D. D. (Nelson & Phillips.)

Hoofs and Claws. By Rev. Sidney Dyer, A. M. (American Baptist Publication Society.)

Summer Days on the Hudson. The Story of a Pleasure Tour, from Sandy Hook to the Saranac Lakes, including Incidents of Travel, Legends, Historical Anecdotes, Sketches of Scenery, etc. By Daniel Wise, D. D. (Nelson & Phillips.)

Life of Benjamin Franklin. By Rev. J. Chaplin. (Lothrop.)

Of the different grades of fiction, moral or otherwise, and books designed to inform, to instruct, or to entertain, there is the usual variety.

Parlor Amusements for the Young Folks. By G. B. Bartlett. (Osgood.)

Wedding-Garments; or, Beattie Morris's Diary. By Mary W. McLain, Author of "Lifting the Veil," etc. (Scribner.)

The Old House on Briar Hill. By Isabella Grant Meredith. (Dodd.)

The Three Bank Notes. From the German of Franz Hoffmann. By Miss R. H. Shively. (Lutheran Board of Publication.)

Chauncey Judd; or, The Stolen Boy. A Story of the Revolution. By Israel P. Warren. (Warren & Wyman, Boston.)

The Dawn of Light. A Story of the Zenana Mission. (Presbyterian Board of Publication.)

The Royal Road to Fortune. By Emily Huntington Miller. (Nelson & Phillips.)

The Bible for the Young; being the Precepts and Narratives of the Holy Scriptures, presented with Comments in Simple and Attractive Language for the Young, from the Writings of the Rev. Ingham Cobbin, the Rev. Matthew Henry, and others. Edited and partly rewritten by the Rev. George Alexander Crooke, D. D., D. C. L. (Ashmead, Philadelphia.)

Jesus of Nazareth, His Life, for the Young. By Joseph P. Thompson, D. D. (Osgood.)

Our Three Boys. By Sarah E. Chester. (American Tract Society.)

The Young Outlaw. A Story of Street-Life in New York. By Horatio Alger, Jr. (Loring, Boston.)

Little Folks at Redbow. By Mary A. Denison. (Young, Boston.)

A Spirit in Prison. By Clara F. Guernsey. (Young.)

Ocean-Born; or, The Cruise of the Yachts (completing the "Yacht Series"). By Oliver Optic. (Lee & Shepard.)

Wolf Run; or, The Boys of the Wilderness. By Elijah Kellogg. (Lee & Shepard.)

The Old Mill. By Mary Dwinell Chellis. (Congregational Publication Society.)

Grandmother Brown's School Days; or, Education as it was Seventy Years ago. By Lucy Ellen Guernsey. (American Sunday-School Union.)

Barbara. By the Author of "Silent Tom." (Lothrop.)

Bread and Oranges. By the Author of "The Wide, Wide World." (Carters.)

The Rapids of Niagara. (Same author and publishers.)

Gipsy's Adventures. By Josephine Pollard. (Nelson & Phillips.)

How Tiptoe Grew. By Katharine Williams. (American Tract Society.)

Eugene and his Friends. From the French of Mme. E. de Prepensé. By Mrs. Julia Goodfellow. (American Baptist Publication Society.)

Wide-Awake Pleasure-Book. By the Best American Authors. (Lothrop.)

Word-Pictures. Thoughts and Descriptions from Popular Authors. (Lothrop.)
 Going West; or, The Perils of a Poor Boy. By Oliver Optic. (Lee & Shepard.)
 Young Rick. By Julia A. Eastman. (Lothrop.)
 Brought to the Front; or, The Young Defenders. By Elijah Kellogg. (Lee & Shepard.)
 Hymns and Rhymes for Home and School, collected by Mrs. S. C. Guild. (Nicholas & Hill, Boston.)
 The Nursery Rattle for Little Folks. By Anne Huber. Twelve Chromo Illustrations. (Lippincott.)

SCHOOL TEXT-BOOKS.—It is to be presumed that the supply of these is regulated by the demand, economically considered, but how far the demand is artificially created admits of a question. Among the numerous and competing manuals of instruction, there are enough of a high order to justify the belief that on the whole the tests of success in teaching are become more exacting. An indication that the art of teaching itself is felt to be in need of express cultivation is given in the publication of "The Teachers' Handbook for the Institute and the Class-Room," by William F. Phelps, M. A. (Barnes). The interest that is felt in the study of the Greek and Latin classics is apparent in the thorough editing of the text-books provided for the student, of which the following are examples:

A Method of Instruction in Latin; being a Companion and Guide in the Study of Latin Grammar. By J. H. Allen and J. B. Greenough. (Ginn Bros., Boston.)

Selections from the Poems of Ovid, chiefly Metamorphoses. (Same editors and publishers.)

Latin Composition. By J. H. and W. F. Allen, and J. B. Greenough. (Ginn.)

Preparatory Latin Course. Nos. 1 and 2. (Same editors and publishers.)

The Select Oration of Lysias. Edited by James Morris Whiton, Ph. D. (Ginn.)

A Latin Primer. By B. L. Gildersleeve. (University Publishing Company.)

Latin Reader. (Same author and publishers.)

A New and Concise Method of Reciting Latin Verbs. Adapted to any Latin Grammar. By Martin Bähler, A. M. (Dennis & Co., Newark, N. J.)

The Satires of A. Persius Flaccus. Edited by B. L. Gildersleeve, Ph. D., LL. D., Professor in University of Virginia. (Harpers.)

The Germania, Agricola, and Dialogus de Oratoribus, of Tacitus. With Explanatory Notes by Prof. George Stuart. (Eldridge, Philadelphia.)

The Oration of Demosthenes on the Crown, with Extracts from the Oration of Æschines against Ctesiphon, and Explanatory Notes. By Martin L. D'Ooge, Ph. D., Professor of Greek, University of Michigan. (Griggs, Chicago.)

Some of the text-books for the study of modern languages deserve like commendation:

German Classics for American Students. Vol. I. Goethe's Hermann und Dorothea. Edited, with an Introduction, Commentary, etc., by Prof. James Morgan Hart. Vol. II. Schiller's Die Piccolomini. Edited by Prof. Hart. (Putnams.)

A First German Book. By Charles A. Schlegel, Professor of Modern Languages in the Normal College, City of New York. (L. W. Schmidt.)

Introductory German Reader. By Dr. Emil Otto. With Notes and Vocabulary by Edward S. Joynes, M. A., Professor in Washington and Lee University, Virginia. (Holt.)

German Grammar. A Text-Book for the Practical Study of the German Language. By J. Adolph

Schmidt, A. M., and Hermann J. Schmidt. (Lippincott.)

The Rudiments of German Etymology. A Necessary Appendix to Every German Class-Book. By Henry Klein, A. M. (M. Taylor, Buffalo, N. Y.)

Introduction to Anglo-Saxon. By Stephen H. Carpenter. (Ginn, Boston.)

An Illustrated Child's First Book in French. By Professor Jean Gustave Keetels. (Clark & Maynard.)

French Children at Home. An Introduction to "Comment on parle à Paris." By Madame de Peyrac. (D. Appleton & Co.)

A Practical Course with the Spanish Language. On Woodbury's Plan with German. By H. M. Monsanto, A. M., and Louis A. Languehler, LL. D. (Iverson.)

Text-books in science engage the ability and zeal of some of the most successful scientific investigators, and the skill of instructors in our highest institutions:

The Geological Story Briefly Told. An Introduction to Geology for the General Reader and for Beginners in the Science. By James D. Dana, LL. D. (Iverson.)

First Book of Zoology. By Edward S. Morse, Ph. D., formerly Professor of Comparative Anatomy and Zoology of Bowdoin College. (D. Appleton & Co.)

Class-Book of Chemistry. By Professor E. L. Youmans. Revised. (D. Appleton & Co.)

The Text-Book of Human Physiology. By Austin Flint, Jr., M. D. (D. Appleton & Co.)

Elements of Zoology. A Text-Book. By Sanborn Tenney, Professor of Natural History in Williams College. (Scribner.)

Manual of Introductory Chemical Practice, for the Use of Students in Colleges, and in Normal and High Schools. By George C. Caldwell, S. B., Ph. D., Professor of Agriculture and Analytical Chemistry, and A. A. Brennan, S. B., Assistant Professor of Applied Chemistry of Cornell University. (Finch & Appar, Ithaca.)

The following works in the departments of literature, ethics, and politics, are noticeable:

Christian Ethics; or, The True Moral Manhood and Life of Duty. A Text-Book for Schools and Colleges. By D. S. Gregory, D. D. (Eldridge, Philadelphia.)

Manual of English Rhetoric. By A. S. Hepburn, Professor in Davidson College, North Carolina (Wilson, Hinkle & Co., Cincinnati.)

Representative Names in the History of English Literature. By Horace H. Morgan. (Ginn.)

Practical Ethics for Schools and Families. By Matilda Fletcher. (Barnes.)

Text-Book of Poetry, from Wordsworth, Coleridge, Burns, Beattie, Goldsmith, and Thomson. With Sketches of the Poets' Lives, Notes, and Glossaries. For Use in Schools and Classes. By the Rev. H. N. Hudson. (Ginn.)

A Shorter Course on Civil Government. By Caleb Townsend. (Iverson.)

In arithmetic and the mathematics generally the number of new claimants for the favor of teachers was less than usual:

First Lessons in Numbers. By William G. Peck, LL. D. (Barnes.)

Manual of Algebra. (Same author and publisher.)

A Junior Class Arithmetic, Oral and Written. By Daniel W. Fish. (Iverson.)

First Book in Arithmetic. Complete Arithmetic. (Same author and publisher.)

Algebraic Problems. — Arithmetical Problems. (Iverson.)

Complete Algebra. A Practical Work so graded as to meet the Wants of Both Elementary and High

Grades. By Joseph Ficklin, Ph. D., Professor of Mathematics, University of Missouri. (Iverson.)

A Primary Arithmetic and Teacher's Manual. By Edward Olney, Professor of Mathematics, University of Michigan. (Sheldon.)

The Elements of Arithmetic for Intermediate, Grammar, and Common Schools. (Same author and publisher.)

New Intermediate Arithmetic, containing Oral and Written Problems, and Drill Card Exercises. By S. A. Felter, A. M., and S. A. Farrand, A. M. (Scribner.)

Elements of Geometry after Legendre, with a Selection of Geometrical Exercises, and Hints for the Solution of the Same. By Charles S. Venable, LL. D. (University Publishing Co.)

Elements of the Infinitesimal Calculus. With numerous Examples and Applications to Analysis and Geometry. By James G. Clark, A. M., Professor in William Jewell College, Missouri. (Wilson, Hinkle & Co., Cincinnati.)

Plane and Spherical Trigonometry and Mensuration. By A. Schuyler, LL. D., Professor of Mathematics in Baldwin University. (Wilson, Hinkle & Co.)

The remaining titles under this head are thrown together without particular classification:

Easy Lessons in Language. With Illustrations and Diagrams. By S. W. Clark, A. M. (Barnes.)

First Lessons in Physiology. By C. L. Holtze. (Central Publishing Co.)

Map Drawing made Easy, and adapted to any Geography or Atlas, with Written Exercises and Comparative Geography. By James Monteith. (Barnes.)

History of the United States for Intermediate Schools. By Joseph T. Derry. (Lippincott.)

A Text-Book of Naval Ordnance and Gunnery. Prepared for the Use of the Cadet Midshipmen at the U. S. Naval Academy. By A. P. Cooke, Commander U. S. N. (Wiley.)

An Outline History of the United States for Public and other Schools. By Benson J. Lossing, LL. D. (Sheldon.)

Complete Course in Geography, Physical, Industrial, and Political, with a Special Geography for Each State in the Union. By William Swinton. (Iverson.)

Elementary Course in Geography. (Same author and publisher.)

The Elements of Physical Geography. By E. J. Houston, A. M. (Eldridge, Philadelphia.)

The Fifth Reader. By E. A. Sheldon. (Scribner.)

A History of England for the Use of Schools. By M. E. Thalheimer. (Wilson, Hinkle & Co., Cincinnati.)

High School Music Reader, for the Use of Mixed and Boys' High Schools. (Ginn.)

Outline Lessons in Hebrew. By S. M. Vail, D. D. (Nelson & Phillips.)

A Brief Treatise on Punctuation. Containing the more Important Rules, and an Exposition of Principles upon which they depend. By Joseph A. Turner, A. M. (Lippincott.)

History of the United States. By John Clark Redpath. (Jones, Cincinnati.)

A Brief History of France. (Barnes.)

Law.—Omitting statutes at large, reports, and digests, the following titles are recorded:

Cotenancy and Partition. A Treatise on the Law of Co-ownership as it exists independent of Partnership Relations between the Co-owners. By A. C. Freeman. (Whitney, San Francisco.)

A Treatise on the Law and Practice relating to Warrants and Attachments, with Forms, and a Reprint of the Reported Cases bearing upon the Subject. By Sidney J. Cowen. (Banks.)

Probate Practice. A Treatise on the Jurisdiction of the Surrogates' Courts and the Remedies offered thereby; comprising also the Law of Wills, Executors, Administration, Legacies, Guardians, and Dower, with Complete Forms for Practice. By Robert H. McClellan. (Gould & Son, Albany.)

Practice at Law, in Equity, and in Special Proceedings in all the Courts of Record in the State of New York, with Appropriate Forms. Vol. V. By William Wait. (Gould & Son.)

A Digest of Railway Decisions; comprising all reported American Cases in which a Railway is a Party, and all other Cases in which Railway Law is determined. By John F. Lacey, of the Iowa Bar. (Kay, Philadelphia.)

A Manual for the Information of Officers and Members of Legislatures, Conventions, Societies, Orders, etc., in the Practical Governing and Membership of all such Bodies, according to the Parliamentary Law and Practice in the United States. By William S. Robinson. (Lee & Shepard, Boston.)

The Law and Practice as to References, and the Powers and Duties of Referees, with numerous Forms. By Murray Hoffman. (Diossy.)

A Treatise on the Law of Nuisances. H. G. Wood. (Parsons.)

An Analysis of Kent's Commentaries. By Frederick S. Dickson. (B. Welsh, Philadelphia.)

A Treatise on the Law of Executions. By Henry M. Herman. (J. Cockcroft & Co.)

A Treatise on the Law of Trespasses, in the Two-fold Aspect of the Wrong and the Remedy. By Thomas W. Waterman. In two volumes. (Baker, Voorhis & Co.)

A Treatise on Equity Jurisprudence. By John Willard, LL. D. Revised, corrected, and enlarged, by Platt Potter, LL. D. (Banks & Brothers.)

The Law of Literature, reviewing the Laws of Literary Property in Manuscript, Books, Lectures, Dramatic and Musical Compositions, Works of Art, Newspapers, Periodicals, etc.; Libel and Contempt of Court by Literary Matter, etc. With an Appendix of the American, English, French, and German Statutes of Copyright. By James Appleton Morgan, A. M., of the New York Bar. Two volumes. (Cockcroft.)

An Introduction to the Constitutional Law of the United States. By John Norton Pomeroy, LL. D. Third Edition, enlarged by the Addition of an Appendix, bringing down Comments on Decisions of the Supreme Court since the Publication of the Previous Edition. (Hurd & Houghton.)

Leading Cases in the Law of Torts. By Melville M. Bigelow. (Little, Brown & Co.)

A Treatise on the American Law of Elections. By George W. McCrary, of the Iowa Bar. (Myers, Chicago.)

A New Law Dictionary for the Use of Students, the Legal Profession, and the Public. By Archibald Brown. With an Appendix of Legal Maxims and Abbreviations used in Reference to Law Books. By A. P. Sprague. (J. D. Parsons, Albany.)

Two Lectures upon the Relations of Civil Law to Church Polity, Discipline, and Property. By Hon. William Strong, LL. D. (Dodd & Mead.)

A Treatise on the Doctrine of Ultra Vires. Being an Investigation of the Principles which limit the Capacities, Powers, and Liabilities of Corporations, and more especially of Joint-Stock Companies. By Seward Price, LL. D., Barrister-at-Law. With Full Notes and References to American Cases, by Ashbel Green, Esq. (Baker, Voorhis & Co.)

Commentaries on the Law of Married Women, under the Statutes of the Several States, and at Common Law and in Equity. By Joel Prentiss Bishop. Vol. II. (Little, Brown & Co.)

The Law of Taxation. By Francis Hilliard. (Little, Brown & Co.)

MEDICINE.—A small number of medical

works has appeared. The Faculty does not seem to be, just at present, strong in literature:

Contributions to the Annals of Medical Progress and Medical Education in the United States before and during the War of Independence. By Joseph M. Toner, M. D. (Government Printing-Office.)

Pulmonary Tuberculosis. Its Pathology, Nature, Symptoms, Diagnosis, Prognosis, Causes, Hygiene, and Medical Treatment. By Addison P. Dutcher, M. D. (Lippincott, Philadelphia.)

Diseases of the Stomach. By Wilson Fox, M. D. (Lea, Philadelphia.)

The Influence of Music on Health and Life. By Dr. H. Chomet. Translated from the French, by Laura A. Flint. (Putnams.)

The Encyclopædia of Pure Materia Medica. A Record of the Positive Effects of Drugs upon the Healthy Human Organism. Edited by Timothy F. Allen, A. M., M. D., etc. With Contributions from Dr. Richard Hughes, of England; Dr. C. Hering, of Philadelphia; Dr. Carroll Dunham, of New York; Dr. Ad. Lippe, of Philadelphia, and others. Vols. I., II. (Boericke & Tafel.)

A Series of American Clinical Lectures. Edited by E. C. Seguin, M. D. (Putnams.)

Analytical Therapeutics. By C. Hering. Vol. I. (Boericke & Tafel.)

Diseases of the Horse, and How to Treat Them. A Concise Manual of Special Pathology, for the Use of Horsemen, Farmers, Stock-Raisers, and Students in Agricultural Colleges in the United States. By Robert Chawner, Veterinary Surgeon. (Porter & Coates, Philadelphia.)

The History of the Philadelphia School of Anatomy, and its Relations to Medical Teaching. A Lecture, by W. W. Keen, M. D. (Lippincott.)

Vision: Its Optical Defects, and the Adaptation of Spectacles. With 74 Illustrations on Wood. By C. S. Fenner, M. D. (Lindsay & Blakiston, Philadelphia.)

Phthisis: Its Morbid Anatomy, Etiology, Symptomatic Events and Complications, Fatality and Prognosis, Treatment and Physical Diagnosis; in a Series of Clinical Studies. By Austin Flint, M. D., Professor in Bellevue Hospital Medical College. (H. C. Lea, Philadelphia.)

ILLUSTRATED BOOKS.—Illustration is now so largely employed as an embellishment of books, as well as an aid to the exposition of subjects, that we can properly place under this head only those books in which the ordinary relation of the letter-press to the engravings is reversed, or is nearly that of equality in importance. The publication of such books is less called for by popular demand than heretofore, the taste of purchasers inclining more to works in which matter is paramount to ornament. Perhaps our definition does injustice to some of the works named below:

Old New York, from the Battery to Bloomingdale. Etchings by Eliza Greastorex. Text by M. Despard. In Parts. (Putnams.)

The Hudson River, by Pen and Pencil. Illustrated by J. B. Woodward. (D. Appleton & Co.)

Nooks and Corners of the New England Coast. By Samuel Adams Drake. (Harpers.)

A Century After. Picturesque Glimpses of Philadelphia and Pennsylvania. Edited by Edward Strahan. Illustrated by Thomas Moran, F. O. C. Darley, and others. In Parts. (Allen, Lane & Scott, Philadelphia.)

Sunshine for Babyland. With over 100 Full-page Illustrations. (Lothrop.)

Christmas in Song and Story. By Milton, Long-

fellow, Tennyson, Thackeray, Dickens, Irving, etc. Illustrated by Doré, Nast, Leech, Birkot Foster, and others. (Cockcroft & Co.)

Poetic Localities of Cambridge. Edited by W. J. Stillman. Illustrated with Heliotypes from Nature. (Osgood.)

The Book of American Interiors. By Charles W. Elliott. Containing Views of Twenty-four Striking Interiors now existing in this Country, and about Thirty other Illustrations, with Descriptive Letter-press. (Osgood.)

Ballads of Home. Edited by George M. Baker. 40 Full-page Illustrations. (Lee & Shepard.)

Gallery of English and American Women famous in Song. Edited by Henry Coppée, LL. D. (Stoddard, Philadelphia.)

Centennial Book of the Signers of the Declaration of Independence. By William Brotherhead. (Stoddard.)

Golden Treasures of Poetry, Romance, and Art. By Eminent Poets, Novelists, and Essayists. (Gill.)

Historical and Legendary Ballads and Songs. By Walter Thornbury. (Gill.)

Silhouettes of the Seasons in Art and Song. Twelve Designs in Silhouette of the Months of the Year, with Original Poems by the most Popular Writers. (Lockwood, Brooks & Co., Boston.)

Christ in Art: The Glory of the Words and Acts of Jesus Christ, as related in the Language of the Four Evangelists, arranged in one Continuous Narrative. By Edward Eggleston, D. D. Illustrated with 100 Full-page Plates on Steel and Wood, executed by Brendamour, of Düsseldorf, after the famous Designs of Alexander Bida; together with numerous Expository Engravings in the Text, by American Artists. (Ford.)

Nuts for Christmas Cracking. By Theresa Oakley Hall. (Whittaker.)

Paws and Claws. Being True Stories of Clever Creatures, Tame and Wild. (Dutton.)

The Gypsy Series. By E. Stuart Phelps. Four volumes. (Dutton.)

MISCELLANEOUS.—Of the American Cyclopædia, referred to last year, fifteen volumes have appeared; and the sales, it is believed, have exceeded those of any equally extensive work in this country. The fact is interesting, as an indication of the large demand that exists and is likely to exist in this country for books of solid and permanent value. The amount of flashy literature that is circulated may seem ominous, but there are important facts of another aspect to be set over against it. "Johnson's Cyclopædia," which embodies the features of gazetteer and dictionary, is a similar "sign of the times." Duyckinck's "Cyclopædia of American Literature," reëdited, has appeared in a new edition. We have no other work to compare with this, though one might conceive of a possible advance upon it. The books named below are, in part, such as seemed irreducible to any of the heads of division, and in part such as, having, in legislative phrase, been read only by their titles, do not disclose to the titular reader the nature of their contents:

The Example of France. Two Essays on the Payment of the Indemnity and the Management of the Currency since the German War, 1870-74. By Victor Bonnet. Translated by George Walker. (D. Appleton & Co.)

A National Constitution the only Road to National Peace. A Letter to the President of the United States. By William Giles Dix. (Estes & Lauriat, Boston.)

The Bazar-Book of the Household: Marriage, Establishment, Servants, Housekeeping, Children, Home-Life, Company. (Harpers.)

Educational Reminiscences and Suggestions. By Catharine E. Beecher. (Ford.)

Grand Transformation Scenes in the United States; or, Glimpses of Home after Thirteen Years Abroad. By Hiram Fuller. (Carleton.)

Dramas and Dramatic Scenes. Edited by W. H. Venable. Illustrated by W. H. Farny. (Wilson, Hinkle & Co., Cincinnati.)

Ten Years with Spiritual Mediums. By Francis Gerry Fairfield. (D. Appleton & Co.)

The Proof Palpable of Immortality: being an Account of the Materialization Phenomena of Modern Spiritualism, with Remarks on the Relation of the Facts to Theology, Morals, and Religion. By Epes Sargent. (Colby & Rich, Boston.)

Secrets of the Sanctum. An Inside View of an Editor's Life. By A. F. Hill. (Claxton, Philadelphia.)

In the House of the Presidents. By Laura Carter Holloway. (United States Publishing Co.)

Money. By Henry Carey Baird. Reprinted from the American Cyclopædia. (D. Appleton & Co.)

The Morality of Prohibitory Liquor Laws. An Essay. By William B. Weeden. (Roberts, Boston.)

The Cremation Theory of Specie Resumption. By David A. Wells. (Putnam.)

Fears for Democracy regarded from the American Point of View. By Charles Ingersoll. (Lippincott.)

The Romance of the Association; or, One Last Glimpse of Charlotte Temple and Eliza Wharton. A Curiosity of Literature and Life. By Mrs. C. H. Dall. (Williams, Boston.)

American Educational Cyclopædia. A Reference-Book for all Matters pertaining to Education. Vol. I. To be published annually.

How to Make a Living. By George Cary Eggleston. (Putnam.)

The Best Reading. Hints on the Selection of Books; on the Formation of Libraries, Public and Private; on Courses of Reading, etc. With a Classified Bibliography for Easy Reference. Revised, enlarged, and continued to December, 1874. (Putnam.)

Speeches of Daniel W. Voorhees, of Indiana, embracing his most Prominent Forensic, Political, Occasional, and Literary Addresses. Compiled by his Son, Charles S. Voorhees. With a Short Biographical Sketch. (Clarke, Cincinnati.)

The American Temperance Cyclopædia of History, Biography, Anecdote, and Illustration. By Rev. J. B. Wakely, D. D. (National Temperance Society.)

Sex in Industry. A Plea for the Working-Girl. By Azel Amer, Jr., M. D. Special Commissioner of the Massachusetts Bureau of Labor. (Osgood.)

Whip and Spur. By George E. Waring, Jr. (Osgood.)

Prohibition a Failure. By Dio Lewis, M. D. (Osgood.)

A Discourse on the Nature of the American Union, as the Principal Controversy involved in the Late Civil War. By George Ticknor Curtis. (Dutton.)

The Morals of Abou Ben Adhem. Edited by D. R. Locke [Petroleum V. Nasby]. (Lee & Shepard.)

Socialistic, Communitic, Mutualistic, and Financial Problems. By William B. Greene. (Lee & Shepard.)

What and How to Read: A Guide to Recent English Literature, containing a Minutely Classified List of the Best Books published in England and America during the Past Five Years. With Critical Remarks and Suggestions, and an Introduction. By G. A. F. Van Rhyn. (D. Appleton & Co.)

The Abuse of Maternity, through its Rejection and through its Unwise Acceptance. By Mrs. Elizabeth E. Evans. (Lippincott, Philadelphia.)

Views and Interviews on Journalism. Edited by Charles F. Wingate. (Patterson.)

Norse Mythology; or, The Religion of our Forefathers. Containing all the Myths of the Eddas, systematized and interpreted. By R. B. Anderson, A. M., Professor of the Scandinavian Languages in the University of Wisconsin. (Griggs.)

Eli Perkins (at Large), his Sayings and Doings. By Melville D. Landon. (Ford.)

Bees and Hornets in Human Guise. By D. S. Erickson. (Congregational Publishing Society.)

A Domestic Problem. Work and Culture in the Household. By Mrs. A. M. Diaz. (Osgood.)

European Lighthouse Systems. Being a Report of a Tour of Inspection made in 1873, by Major George H. Elliott, Corps of Engineers, U. S. A. (Van Nostrand.)

Manual of the Railroads of the United States for 1875-'76. Showing their Mileage, Stocks, Bonds, Cost, Traffic, Earnings, Expenses, and Organizations. With an Appendix, containing a Full Analysis of the Debts of the United States and of the Several States. By Henry V. Poor. (H. V. & H. W. Poor.)

Two Thousand Years After; or, A Talk in a Cemetery. By John Darby. (Claxton, Remsen & Haffelfinger, Philadelphia.)

Everyday Facts for Everyday Life. A Book for the Household. (Dodd & Mead.)

Our Wasted Resources. The Missing Link in the Temperance Reform. By William Hargreaves, M. D. (National Temperance Society.)

The Little Street-Sweeper; or, Life among the Poor. By Rev. Samuel B. Halliday. (Ford.)

Weights, Measures, and Money, of All Nations. Compiled by F. W. Clarke, S. B. (D. Appleton & Co.)

Opium-Eating. An Autobiographical Sketch. By an Habitue. (Claxton, Remsen & Haffelfinger, Philadelphia.)

A Texas Scrap-Book. Compiled by D. W. C. Baker. (Barnes.)

The Great Bonanza. By Oliver Optic, R. M. Ballantyne, and others. 200 Illustrations. (Lee & Shepard.)

The Story of the Stick in all Ages and Lands. Translated and adapted from the French of Antony Réal [Fernand Michel]. (Bouton.)

The American State and American Statesmen. By William Giles Dix. (Estes & Lauriat, Boston.)

On the Road to Riches. By William H. Maher. (T. J. Brown, Eager & Co., Toledo, O.)

The Works of Count Rumford. Carefully collected and edited by a Committee of the Academy. Together with a Life of Count Rumford, by the Rev. George E. Ellis. (Estes & Lauriat, Boston.)

Reminiscences of Saratoga and Ballston. By William L. Stone. (Virtue & Vorston.)

A Farmer's Vacation. A Series of Papers describing and illustrating the Life and Methods of Farmers in Several Countries. By George E. Waring, Jr. (Osgood.)

Florida: its Scenery, Climate, and History. With an Account of Charleston, Savannah, Augusta, and Aiken; a Chapter for Consumptives, and Various Papers on Fruit-Culture, etc. By Sidney Lanier. (Lippincott.)

Five Essays relating to the Construction, Organization, and Management of Hospitals. Contributed by their Authors for the Use of the Johns Hopkins Hospital of Baltimore. (Wm. Wood & Co.)

Gardening for Pleasure. A Guide to the Amateur in the Fruit, Vegetable, and Flower Garden; with Full Directions for the Greenhouse, Conservatory, and Window-Garden. By Peter Henderson. (Orange Judd & Co.)

Household Elegancies. By Henry T. Williams and Mrs. C. S. Jones. (H. T. Williams.)

How to Live Long; or, Health Maxims, Physical, Mental, and Moral. By W. W. Hall, M. D. (Hurd & Houghton.)

Absolute Money. A New System of Finance under a Coöperative Government. By Britton A. Hill. (Soule, St. Louis.)

The Literature of Kissing, gleaned from History, Poetry, Fiction, and Anecdote. By C. C. Bombaugh, M. A., M. D. (Lippincott.)

Laurel Leaves. Original Poems, Stories, and Essays. By Eminent Authors. (W. F. Gill & Co., Boston.)

Gleanings for the Curious from the Harvest Fields of Literature. Collated by C. C. Bombaugh, M. A., M. D. (H. D. Worthington & Co., Hartford.)

Annals of a Fortress. By E. Viollet-le-Duc. Translated by Benjamin Bucknall, Architect.

REPUBLICATIONS.—The sale of English books in this country increases year by year, partly through the establishment by London houses of agencies here, partly because English authors and publishers have more faith in cheap editions than they formerly had, manufacturing them both for home use and for exportation. It seems also to be found profitable to import the sheets of English books, which are thus republished without reprinting. In one or another form of publication, or by importation, all the more important English works are placed within reach of American readers. The most popular authors in either country may be presumed to address readers in the other, and it is true to an increasing extent that "the reading public" in both constitutes one community. The fact does not make American authors less distinctively American, any more than the study of the Greek and Latin classics is likely to counteract the force of the modern spirit.

With the exception, perhaps, of works of fiction, of which the influx is perpetual, it is a sign of the tendency of thought that works of science and philosophy outnumber all others. To the "International Scientific Series" (Appletons) have been added "The Doctrine of Descent and Darwinism," by Oscar Schmidt, Professor in the University of Strasburg; "The Chemistry of Light and Photography," by Prof. Vogel, Berlin; and "Fungi: their Nature and Uses," by M. C. Cook, M. A., edited by the Rev. M. J. Berkeley, M. A. In the "Popular Science Library" (of the same publishers) are included "Health," by Edward Smith, M. D., F. R. S., and "English Men of Science, their Nature and Nurture," by Francis Galton, F. R. S. The same house gives us Darwin's "Insectivorous Plants," and the new enlarged edition of his "Descent of Man;" "Heredity," from the French of Ribot; "The Science of Music," by Sedley Taylor, M. A.; "Currency and Banking," by Prof. Bonamy Price; "Money and the Mechanism of Exchange," by Prof. Stanley Jevons; "Nature and Life," by Ferdinand Papillon, translated by A. R. Macdonough; "Climate and Time in their Geological Relations," by James Croll; "Boys and Girls in Biology; or, Simple Studies of the Lower Forms of Life, based upon the Latest Lectures of T. H. Huxley," by Sarah Hackett Stevenson; "The Childhood of Religions," by Edward Clodd, F. R. A. S.; a new edition of Mill's "Political Economy," with the author's final revisions; a revised edition of Prof. Tyndall's "Belfast Address," with a

preface replying to his critics, and an appended article on "Scientific Materialism;" "On Paralysis in Brain-Disease," by H. Charlton Bastian, M. D.; "Clinical Essays and Lectures," by Sir James Paget, Bart.; Steiner's "Compendium of Children's Diseases;" "Our Place among Infinities," by Richard A. Proctor; and a Science Primer on "Astronomy," by Prof. Norman Lockyer. If no other publishing-house makes so marked a specialty of scientific and philosophical books, others show no little enterprise in the same direction. A new volume—the fifth—of "Dissertations and Discussions," by J. S. Mill (Holt), includes the Posthumous Essays. A new edition of Sir H. S. Maine's "Ancient Law," and the "Lectures on Jurisprudence," by the late John Austin, abridged for the use of students, by Robert Campbell, have the same publishers. "The Border Lands of Insanity," by Andrew Wynter, M. D., and "Navigation in Theory and Practice," by Henry Evers, LL. D. (Putnams); "The Character and Logical Method of Political Economy," by J. E. Cairnes, LL. D.—the author's final edition—and "Man and Beast, Here and Hereafter," by the Rev. J. G. Wood (Harpers); Schiller's "Æsthetical Essays," containing also his "Philosophical Letters," and the "Essay on the Connection between the Animal and Spiritual Nature in Man;" "Science By-Ways," by Richard A. Proctor, and the "Log-Book of a Fisherman and Zoologist," by Frank Buckland (Lippincott); "How to Teach Chemistry," by Edward Frankland, summarized and edited by George Chaloner, F. C. S., and "The Philosophy of Marriage in its Social, Moral, and Physical Relations," by Michael Ryan, M. D. (Lindsay & Blakiston, Philadelphia); "Problems of Life and Mind," by G. H. Lewes, first series (Osgood); "Popular Physiology," by R. T. Trall, M. D. (Wells); "Practical Guide to the Determination of Minerals by the Blowpipe," by Dr. O. W. C. Fuchs, translated by C. W. Danby (Claxton); with the various "Primers," "Recreations," etc., in science, and the contributions before recorded of our own authors, must be regarded as marked indicia of the direction of the popular mind to scientific and philosophical investigation.

In the departments of history, antiquities, biography, and memoirs, the following have been republished:

Merivale's General History of Rome. (D. Appleton & Co.)

History of Greece. By C. A. Fyffe.—History of Rome, by M. Creighton.—Historical Primers, edited by J. R. Green. (Ib.)

The Life of the Greeks and Romans, described from Antique Monuments. By E. Guhl and W. Koner, translated by F. Hueffer. Illustrated. (Ib.)

The Eighteenth Century: Manners, Customs, and Costumes in France, 1700-1789. By Paul Lacroix. Richly illustrated. (Ib.)

Martin's Life of the Prince Consort. (Ib.)

Greville's Journal of the Reigns of George IV. and William IV. (Ib.)

Ancient History from the Monuments. 3 Vols.: Egypt, Assyria, Persia. (Scribner.)

Epochs of History. Edited by Morris. In course of publication. (Ib.)

Kinglake's Invasion of the Crimea. Battle of Inkerman. (Harpers.)

A Short History of the English People. By J. R. Green. (Ib.)

Forster's Life of Jonathan Swift. Vol. I. (Ib.)

Early Kings of Norway. By T. Carlyle. (Ib.)

Macready's Reminiscences. Edited by Sir F. Pollock. (Ib.)

Life of Lord Byron, and other Sketches. By Castelar. (Ib.)

Earl Russell's Recollections and Suggestions. (Roberts.)

Autobiography of Mrs. Fletcher. (Ib.)

Musical Composers and their Lives. By Sarah Tytler. (Ib.)

The History of Lawyers. By William Forsyth. (Cockerfoot.)

Autobiography and Memoir of Dr. Thomas Guthrie. (Carters.)

The Epworth Singers and other Poets of Methodism. By Rev. S. W. Christophers. (Randolph.)

The abridgment of the literature of recent and contemporary memoirs in the "Bric-à-Brac Series," edited by Richard H. Stoddard (Scribner), has proved a popular undertaking, and by the skill of the editor the time of readers has been saved, at no loss of interest. The usual discursiveness and minuteness of personal memoirs afford scope for judicious condensation.

Works of travel and exploration have a high place in international regard:

India and its Native Princes. By Louis Rousselot. Edited by Lieutenant Buckle. Copiously illustrated. (Scribner.)

Assyrian Discoveries. By George Smith. (Ib.)

The Last Journals of Dr. Livingstone. (Harpers.)

The Straits of Malacca, Indo-China, and China. By J. Thomson. Illustrated. (Ib.)

The Abode of Snow. By Andrew Wilson. (Putnam.)

Notes of Travel in Southwestern Africa. By C. J. Anderson. (Ib.)

Twelve Months in Madagascar. By Joseph Mulhens, D.D., of the London Missionary Society. (Carters.)

In the Holy Land. By Rev. Andrew Thomson, D.D., F. R. S. E., etc. (Randolph.)

The Amazon and Madeira Rivers. By Franz Keller. (Lippincott.)

Days near Rome. By Augustus J. C. Hare. (Coates.)

Spain and the Spaniards. By N. L. Thieblin. (Lee & Shepard.)

Of religious reprints we find the following noticeable:

Strivings for the Faith. Christian Evidence Society Lectures. (Randolph.)

Fireside Homilies. By the late Dean Henry Alford, D. D. (Ib.)

The Philosophy of Natural Theology. An Essay in Confutation of the Skepticism of the Present Day, which obtained a prize at Oxford. By the Rev. William Jackson, M. A., F. S. A. (Ib.)

Rome and the Newest Fashions in Religion. By W. E. Gladstone. (Harpers.)

Mohammed and Mohammedanism. By R. Bosworth Smith, M. A. (Ib.)

Home Truths. By the Rev. J. C. Byle. (Carters.)

Earth's Morning; or, Thoughts on Genesis. By Horatius Bonar, D. D. (Ib.)

The Rent Veil. By H. Bonar, D. D. (Ib.)

Types and Emblems. By C. H. Spurgeon. (Sheldon.)

The "Speaker's Commentary." Vol. V. (Scribner.)

The Bible Educator. Edited by E. H. Plumptre, M. A. (Dutton.)

Glimpses of the Supernatural. Edited by the Rev. Frederick George Lee, D. C. L. (Carlton.)

God and the Bible. By Matthew Arnold. (Osgood.)

Thoughts on Revelation. By J. McLeod Campbell. (Claxton.)

A Critical and Exegetical Commentary on the Book of Psalms. By James G. Murphy, LL.D. (Draper, Andover.)

The Temperance Reformation, and its Claims upon the Christian Church. By the Rev. James Smith, of Scotland. (Lothrop.)

In poetry the importation is not large. But it is of the best that is to be had:

Queen Mary. By Tennyson. (Osgood.)

The Æneids of Virgil. Done into English Verse. By William Morris. (Roberts.)

Dante and his Circle: with the Italian Poets preceding Him. A Collection of Lyrics. Edited and translated in the Original Metres. By Dante Gabriel Rossetti. (Ib.)

The Shepherd Lady, and other Poems. By Jean Ingelow. Illustrated. (Ib.)

Aristophanes's Apology. By Robert Browning. (Osgood.)

The Poetical Works of Owen Meredith [Robert Lord Lytton]. (Ib.)

Hymns. By Frederick William Faber, D. D. With a Sketch of his Life. (Dutton.)

The "Concordance to the Works of Alexander Pope," by Edwin Abbott, with an Introduction by Edwin A. Abbott, D. D. (Appleton), is not poetry, but is the indispensable aid to the enjoyment of a poet now rated by critics as much below his worth as he was once rated above it. This work may fitly intervene between the poets and the essayists:

English Poets. Twelve Essays, with Photographs. By Joseph Gostwick. (D. Appleton & Co.)

Poets and Novelists. By George Barnett Smith. (Ib.)

Hours in a Library. By Leslie Stephens. (Scribner.)

Social Pressure. By Sir Arthur Helps. (Roberts.)

A Group of Poets and their Haunts. By James Albert Harrison. (Hurd.)

The Better Self. By J. Hain Friswell. (Porter & Coates.)

Lectures delivered in America. By Charles Kingsley. (Ib.)

Thrift. By Samuel Smiles. (Harpers.)

Sermons out of Church. By the Author of "John Halifax." (Ib.)

Among works on (and of) art should be mentioned:

Our Sketching Club. By R. St. John Tyrwhitt. (Roberts.)

The Sylvan Year. Leaves from the Note-Book of Raoul Dubois. By Philip Gilbert Hamerton. With Twenty Etchings. (Ib.)

Examples of Modern Etching, with Notes by P. G. Hamerton. (Bouton.)

The Aërial World. By G. Hartwig. (D. Appleton & Co.)

Examples of Mediæval Foliage and Colored Decoration, taken from Buildings of the Twelfth to the Fifteenth Century. With Descriptive Letter-press. By James K. Collins. (Osgood.)

Narrative of La Moyné, the Artist who accompanied the French Expedition into Florida in 1664. From the Latin of De Bry. With Heliotypes of the

Engravings taken from the Artist's Original Designs. (Osgood.)

A few juvenile books may be named. These are exclusive of a large number reprinted for Sunday-school libraries, of various degrees of merit:

Higgledy-Piggledy. By E. H. Knatchbull-Hugesson, M. P. (D. Appleton & Co.)

History of my Friends; or, Home Life with Animals. From the French of Emile Achard. (Putnam.)

Harry Blount: Passages in a Boy's Life. By P. G. Hamerton. (Roberts.)

Six to Sixteen. A Story for Girls. By Juliana Horatia Ewing. (Ib.)

Adventures of Captain Hatteras. By Jules Verne. (Osgood.)

In fiction, besides the various editions of standard writers, as Scott, Dickens, Thackeray, not to set out the titles of books, our public has absorbed tales by Mrs. Alexander, William Black, R. D. Blackmore, Miss Braddon, M. Cherbuliez, Mrs. Charles, Mary Cowden Clarke, Wilkie Collins, M. Daudet, Frances Elliot, C. C. Fraser-Tytler, Lady Georgiana Fullerton, "Edward Garrett," Mary Cecil Hay, Mrs. Cashel Hoey, Jean Ingelow, Mrs. C. Jenkin, Julia Kavanagh, Annie Keary, Katharine King, Henry Kingsley, Katharine S. Macquoid, George Macdonald, C. Welsh Mason, Mrs. Newman, Mrs. Oliphant, James Payn, Charles Reade, J. A. Skeretchly, J. F. Smith, Mrs. J. K. Spender, Eliza Taber, Miss Thackeray, Anthony Trollope, Jules Verne, Charlotte Walsingham, Wachenhusen, and Whyte-Melville.

On the whole, the year 1875 in the United States will not be judged to have been a period of literary progress. Our periodicals have reached a high standard of excellence, and the tendency is upward. Whether development in this direction diverts men from more sustained effort in authorship, or the currents of national energy have been more and more turned into the channels of traffic and material production—channels that are now choked and comparatively stagnant; or whether the decline of literary activity is only apparent—a check upon the publication, and not upon the undertaking, of books—it is not easy to form a probable conjecture. It may be permitted us to hope that what seem indications of diminishing force are rather tokens of a pause in which to gather up the energies for a fresh and vigorous advance, and that American literature will fulfill in its maturity the fair promise of its spring-time.

LITERATURE, CONTINENTAL, IN 1875.
The activity in Continental literature in 1875 will be seen by the following extracts from the correspondence of the London *Athenæum*:

BELGIUM.—The year 1875 has witnessed the appearance of the third volume of the "*Patria Belgica*," a work that is an honor to Belgium. It has been published under the editorship of the Prof. Eug. van Bommel, assisted by the best writers of the country. This third volume, which has for its title "*Belgique Morale*

et Intellectuelle," contains, like the two previous ones, a series of remarkably interesting monographs, which will be read in other countries, with much profit, by all who desire to know and understand Belgium and her past history. They will find contained in it the history of her religions, of her philosophies, of her sciences, of her public instruction, of her printing, and of her press; of her various dialects, of her French, Flemish, and Walloon literature; of her architecture, painting, sculpture, engraving, and numismatics; of her industrial arts, of the costumes, theatres, music, popular and national airs in Belgium. In a word, "*Patria Belgica*" constitutes a Belgian encyclopædia, the use and value of which will be real and permanent.

Romance-writers and novelists have produced a plentiful crop this year. X. de Keul has published "*Le Roman d'un Géologue*;" and he has also translated, with remarkable delicacy and elegance, several of the Flemish novels of Tony Bergmann. D. Keiffer has published a novel dealing with life in Luxembourg, which is rather picturesque ("*Monsieur Louis*"), and in his "*Hyères*" he has given a subtle analysis of the impressions and sensations experienced by a patient given up by the doctors, who goes to seek, on the shores of the Mediterranean, a miraculous restoration to health. "*Derrière le Rideau*," by Camille Lemonnier, exhibits a delicate and refined touch, which reminds one of Gustave Droz. Justin, in "*La Vie Urbaine de M. Alfred Nicolas*," is full of geniality and good sense. Hermann Pergameni shows that he has made wonderful improvement in "*Andrée*." Em. Greyson has reached his third edition of "*Juffer Daatje et Juffer Doortje*," and other novels devoted to giving pictures of modern Dutch life.

The labors in the field of musical erudition are this year most remarkable; notably so is the brilliant "*Histoire et Théorie de la Musique de l'Antiquité*" (1 vol.), by the composer F. A. Gevaert, who has, so to speak, resuscitated the music of the Greeks. This work has made a sensation in the musical and learned world of Europe; it is, moreover, a miracle of typography, printed at Ghent by Annot-Braeckman.

As regards history, the first place is unquestionably due to the "*Études Politiques sur l'Histoire Ancienne et Moderne, et sur l'Influence de l'État de Guerre et de l'État de Paix*," by Paul Devaux. Lofty views and an admirable lucidity are the most striking merits of this great work. A new and complete edition of the political and historical works of the late Baron de Gerlache, the most remarkable man whom the Catholic party possessed in Belgium, and one of the very best writers of the clerical school, has appeared. The indefatigable Théodore Juste has published "*Le Coup d'État du 18 Juin, 1789*," and some new "*Notes Historiques et Biographiques sur quelques Fonda-*

teurs de la Monarchie Belge ;" also two curious monographs upon Le Baron Nothomb and Le Comte Vilain XIV., both of whom took leading parts in the Revolution of 1830.

The military history of the Belgian Revolution has this year given rise to very contradictory and passionate debates, which have been raised by the work of General Eenens, "*Les Conspirations Militaires de 1831.*" The author, without having taken sufficient pains to verify his assertions, attributes to treachery the defeats inflicted by the Dutch on the Belgians. A reply, by General Kessels, appeared immediately; also a "*Mémoire Explicatif,*" by General Baron de Faily, who was Minister of War in 1831; and we have had even an *étude* on the same subject by a Dutch officer of distinction, General Booms, which is entitled "*Le 12 Août, et la Campagne de Dix Jours.*" General Eenens has attempted to refute the objections of his opponents, in his "*Quelques Observations sur les Réponses de MM. Kessels, de Faily et Booms (avec Carte).*" Among the numerous historical dissertations upon special points of national history, we may call attention to "*Les Pagi de la Belgique et leurs Subdivisions pendant le Moyen Âge,*" by Charles Piot; "*Les Bibliothèques de Madrid et de l'Escurial,*" from the point of view of the history of Belgium, by the learned archivist Gachard, who has already made so many discoveries. The librarian of the University of Ghent, Ferd. Vanderhaeghen, has published a brief but excellent "*Notice sur la Bibliothèque Plantinienne à Anvers.*" It is well known that the family of Plantin-Moretus has religiously preserved and enriched by continual augmentations the printing-shops established by Christopher Plantin in 1555, at Antwerp, with the presses, the type, and the foundries and all the tools, the library, and the collections of the various modes in which authors have corrected their proofs. It is a unique fact in the annals of typography. There are, besides, portraits and other pictures by some of the great masters; collections of original antique furniture, china, and earthenware; etchings on copper by Rubens and others, and engravings on wood; all the typographical materials used by Plantin and his heirs, down to the present day. By the side of all these things there are 200 manuscripts of ancient authors—authors of the middle ages and of the Renaissance; some of these MSS. are unpublished, and others are adorned with exquisite miniatures—some sixty of the very rarest enamels; from eight to nine thousand books, a great number of which issued from the printing-press of Plantin and of his successors, constitute the library.

Traveled Belgians are rare; we have, however, this year to notice three interesting works of travel. "*Un Voyage dans le Nord de l'Europe (Norwège et Mer Glaciale),*" by Jules Leclercq; also "*Souvenirs d'une Exploration au Bassin de la Yellowstone,*" the splendid

Federal Park of the United States, by Paul Lehardy de Beaulieu; and especially we must note the curious "*Notes d'un Voyage au Brésil,*" by W. de Sélys-Longchamps.

In the domain of social sciences, Eug. van der Rest has published a great *étude*, entitled "*Platon et Aristote: Essai sur les Commencements de la Science Politique.*" I must also not forget a small work by one of the most distinguished writers in Belgium, "*Montesquieu et la Constitution Belge,*" by Ch. Faider. The religious question—this problem now become so important toward the close of our century—has been handled by Goblet d'Alviella, in "*Le Catholicisme Libéral Autrefois et Aujourd'hui,*" and by Émile de Laveleye, in an essay "*Sur le Protestantisme et le Catholicisme, dans leurs Rapports avec la Liberté et la Prospérité des Peuples.*"

Among the works on law and jurisprudence we must mention "*Les Principes du Droit Civil,*" by Prof. F. Laurent. Of this work, the fourteenth, fifteenth, and sixteenth volumes have come out during the year 1875; they are in every respect equal to the volumes which preceded them. We may say with truth that this great work is a masterpiece.

All the journals of Europe have occupied themselves about the ecstasy and the so-styled miraculous illness of a young girl living in Hainault—Louise Lateau by name. Our bishops, all our clergy, all the Ultramontane party to a man, have made the most of this painful pathological case. At last the Catholic medical men joined their voices to this concert, which is at once polemical, scientific, religious, and political. One of those whimsical religious controversies, that can only arise in a country where the Romish Church has long been dominant, has been raging between the Drs. Boëns, Charbonnier, Lefèvre, and Warlomont, and the Abbé Cornet. It is needless to say that while, for some persons, medical science can explain the phenomenon, others believe it to be a manifest case of the miraculous intervention of Heaven.

Prose has this year, as in most others, furnished a strong contingent. Hendrik Conscience, whose stories have been translated even into modern Greek, has published a touching tale, entitled "*Schandevrees*" ("*The Fear of Shame*"). Prof. Heremans has collected the scattered stories of Tony (Anton Bergmann), under the title of "*Verspreide Schetsen en Novellen.*"

Emil van Goethem has published a little masterpiece, a play entitled "*Het Wiegie*" ("*The Cradle*"), and a play called "*Vriend Kobus*" ("*Friend James*"), which, without being equal to "*The Cradle,*" is still a good piece, containing several well-delineated characters.

BOHEMIA. — Although Bohemian literature has sustained serious losses in the past year—a whole series of writers have followed the celebrated poet Hálek to an early grave—and although the unfortunate political situation of

the country and the consequent disputes have by no means been propitious in their influence, still our literary activity remains as great as ever.

Of original work in the way of poetry the more important may be singled out. Heyduk's "Cymbal a Housle" ("The Cymbal and the Fiddle") consists of a series of admirable pieces, which depict with great force the life and sufferings of the North Slav of Hungary. The striking descriptions, deep feeling, astonishing naturalness, and the national tone the author exhibits, combine to stamp this volume as the most remarkable of the year.

In history there is most to report. The collections of "sources" go on which I mentioned last year. Of Palacky's great work another volume has appeared; and so, too, of B. Durdik's "History of Moravia." There is no need dwelling on the high value of both these publications for the history of Central Europe. A model of historical research is furnished by W. W. Tomek's "History of the City of Prague." The publishing firm of T. L. Kober is continuing the popular "Českomoravská Kronika." The young scholar, Konstantin Jirecek, has published a "Dejiny národa Bulharskeho" ("History of the Bulgarians"), founded upon original researches. It is the first attempt of the kind, and is all the more important just now that the eyes of politicians are fixed on the Balkan Peninsula. I hear that a French translation is in preparation.

In philosophy, besides minor publications, we have Dr. J. Durdik's "Všeobecná Aesthetika" ("Universal Aesthetics"), which has at last appeared. The author has striven to keep abreast of the newest results, and has based his theories on those of Herbart, and the subsequent labors of Zimmermann, Helmholtz, and Hanslick.

In philology I may mention that a large English-Bohemian and Bohemian-English dictionary, compiled by Prof. Mourek, is printing.

DENMARK.—Since last Christmas the literature of Denmark has lost one of its chief ornaments, the renowned Hans Christian Andersen, who died in the month of August, seventy years old.

In the field of poetry, our literature of the past year has given us but little.

In novels, the year has been more fertile, even if it cannot boast of any work of great and lasting significance. This branch of literature seems to be that in which our authors, especially the younger, feel most inclined to exercise their powers—a circumstance owing, no doubt, partly to the large number of foreign novels which have in later years been translated into Danish.

To turn to history, Bishop Monrad has added to Church history by describing "The First Combat about the Origin of the Apostolic Creed." From Prof. E. Holm we have a work, in two volumes, on "The External History of Denmark and Norway during the French Rev-

olution and the Wars of Napoleon (1791-1807)," giving valuable information about the situation of the united kingdoms in those eventful times. Another of the Professors of History in our Danish University, F. Schiern, has just published the first of two volumes of "Later Historical Studies," containing, among other things, an essay on the Scottish Earl of Bothwell. T. Lund has given us a collection of four historical sketches.

In criticism, Kr. Arentzen has continued his valuable work, "Baggesen and Oehlenschläger," so abundant in literary materials, and given us the fifth volume. But of greatest and most lasting importance is volume four of G. Brandes's "Main Currents of the Literature of the Nineteenth Century," lately published, with the separate title of "Naturalism in England: Byron and his Group." Having in the earlier volumes gone through the literature of France and Germany at the opening of this century, the author in this volume, besides Byron, treats the whole contemporary poetical literature of England—the Lake-School, Scott, Keats, Moore, Landor, and Shelley.

FRANCE.—It is impossible to run through the catalogue of French books published during the last twelve months without a feeling of deep melancholy. The press is as active as ever, but the works registered in the *Bulletin de la Librairie*, or criticised in the reviews and newspapers, are sadly deficient in character and originality.

If metaphysical literature has sunk to a state of decay which we never had to notice before, theology in all its branches, exegetical and apologetical, is lower still. M. Louis Veuillot's splendidly illustrated "Life of Jesus" is a work absolutely destitute of criticism, and thoroughly leavened with the spirit of bitterness so characteristic of the author. The Renaissance and Protestantism are denounced as equally responsible for the corruption which is eating up society, and Calvin is represented as walking hand in hand with Rabelais in an attack upon Christianity. If M. Michelet's theological views are rather wild, the journalist of the *Univers* is equally startling in his theories of Church history, and the famous axiom about extremes meeting finds here a most amusing realization.

The publication of state papers and political documents naturally reminds me of the efforts made by M. Armand Baschet to open up the arcana of the French Foreign Office. Thanks to M. Baschet, the restrictions imposed by over-cautious ministers have been partly removed, and his interesting octavo on the papers of the celebrated "Duc et Pair" gives us an idea of the treasures now at the disposal of competent editors. Let us also name the same gentleman's monograph on the origin, formation, and development of the "Archives des Affaires Étrangères;" it is full of most valuable information, and it shows that, whatever may have been the faults of the *ancien régime*,

it never allowed the foreign relations of France to be under the influence of unworthy or incapable statesmen. Among the various publications of real value bearing upon the Revolutionary epoch, the Empire, and the Restoration, we may name the "Souvenirs of Colonel de Gonneville," the last two volumes of M. Michelet's "History of France," the new and revised edition of "Malouet's Memoirs," M. Jules Claretie's "Biography of Camille Desmoulins," including a detailed notice of all the members of the Dantonist party, and M. Daudet's account of M. de Martignac's administration. There is no doubt whatever that, if we study dispassionately the history of France since 1815, we must come to the conclusion that the fall of the Government, founded upon the declaration of Saint-Ouen and upon the charter which followed it, was an irreparable misfortune both for the country and for the cause of liberty. Certain critics are never weary of quoting the names of M. de Polignac, Marshal Marmont, and M. de Villèle, to those who venture to plead the cause of the Restoration; but they forget that M. de Martignac, M. Laine, and M. Royer-Collard also lived in those eventful days, and that the noble banner of constitutional freedom was upheld then by the Duke de Richelieu, M. de Serre, Benjamin Constant, and M. Decazes, in the face of a spurious liberalism, which condescended to purchase success by an alliance with the admirers of imperial despotism.

On the history of the middle ages we have to notice a large number of excellent publications, and we would mention in the first rank M. Wallon's "Histoire de Saint-Louis." Besides the large work of Lenain de Tillemont, we have also two volumes, by M. Félix Faure, on the same interesting subject; but both these monographs are far from being complete, and the intellectual development of France, left entirely unnoticed by Tillemont, occupies a comparatively small portion of M. Faure's otherwise estimable monograph. M. Wallon has been able to study documents which his predecessors could not avail themselves of; his account of the Crusades thoroughly supercedes that of Michaud; and his appreciation of Saint-Louis as a legislator is a remarkable feature of his work. M. Jules Grauthier's "Histoire de Marie Stuart" is another work of rehabilitation; like M. Wiesener, this new champion of the unfortunate Queen of Scots makes the best of the documents produced by MM. Hoesack and Charles de Flandres, and attempts, with a great deal of vigor, to refute not only Knox, Buchanan, and Robertson, but the statements given by Mr. Froide and M. Mignet. Public opinion is certainly beginning to be shaken in its estimate of Mary Stuart; there are other historical characters respecting whom no doubt seems possible, and we must not suppose that M. de Barthélemy's "Filles du Régent" is a brief for the daughters of the Duke of Orleans.

M. Guizot's "Histoire de France racontée à mes Petits-Enfants" was left incomplete by the author, and the last volume is the work of Madame de Witt; let us hope that another of the most distinguished French historians will be spared to finish the important publications long ago begun by him; we allude to M. Mignet, whose masterly account of the negotiations connected with the Spanish succession is still imperfect. The sixteenth century is another epoch which M. Mignet has studied thoroughly; he has given us, at various times, installments of a history of it, and we should like to see him carry on his work as far at least as the treaty of Chateau-Cambrésis. This book is certainly the most remarkable historical work published during the last year, and many persons will consider it the best of M. Mignet's productions.

The political events of the last five years still continue to be discussed with much bitterness, and all those who have taken part in the Prussian War or the Revolution which followed it are anxious to justify themselves, and to prove satisfactorily that they were amply warranted in the course of action they adopted. M. Saint-René Taillandier's "Dix Ans de l'Histoire d'Allemagne" is a masterly analysis of Baron de Bunsen's correspondence with Frederick William IV.; it takes us back to the year 1847.

Works of erudition are plentiful this year, and the various branches of criticism are excellently represented, with the single exception of Biblical literature, which is still neglected: neither M. Renan nor M. Nicolas has entered the lists; on the Roman Catholic side, we can only notice a few reprints of the Fathers; and orthodox Protestantism still preserves the silence in which it has persisted for so many years.

Next to history let us name geography, and notice at once M. Elisée Reclus's "Géographie Universelle," with its liberal amount of pictorial illustrations, woodcuts, colored maps, etc. The popular newspaper, *Le Tour du Monde*, still pursues its successful career, supplying materials for the splendid volumes of travels which Messrs. Hachette issue every year, and which are almost immediately translated into English. Greece is the land which M. Reclus has taken as the subject of the early chapters in his geographical work; his description of that country is particularly interesting at the present time, and the author's remarks on the political complications of the East will be attentively studied.

In the less explored field of mediæval Greek we have still to praise the unflagging energy of M. Legrand, who, assisted by M. Sathas, has lately published, from the unique Trebizond MS., a Greek epic of the tenth century, celebrating the exploits of Digénis Akritas—a kind of Eastern Robin Hood. The introduction and notes to this magnificent volume throw greater light upon the history of the

Byzantine Empire and the question of iconoclasm. M. Legrand gives besides numerous specimens of the popular songs composed in honor of Digénis Akritas, and readers who are curious about ballad literature cannot do better than turn to M. Auguste Dozon's "Recueil de Poésies Bulgares;" they will find there, as well as in the mediæval Greek epic, a fund of useful information.

M. Lemerre's artistic publications are still continued with undiminished energy; the second and third volumes of Montaigne's Essays and the third volume of Agrippa d'Aubigné's complete works being the latest installments.

The biography and bibliography of classical French authors have been exhaustively treated by numerous *savants*: to say nothing of the prefaces and introductions to the various parts of Messrs. Hachette's "Grands Écrivains," we may just mention the persevering researches of M. Paul Lacroix. The "Bibliothèque Moliéresque," we find, is to be followed closely by a "Bibliographie La Fontainienne;" Cornille and Racine will, in course of time, be similarly illustrated.

The archæology and literature of the mediæval Church never met with historians more competent to discharge their task than the joint authors of the "Nouveaux Mélanges d'Archéologie," the third volume of which has recently left the press. Ecclesiastical decoration is the subject of this elegant quarto—a real album, where architects, sculptors, and wood-carvers, can find models of the choicest and most varied description. The drawings are engraved from sketches taken by the late Father Martin; the surviving *collaborateur*, Father Cahier, is responsible for the letterpress, where the only defect we can notice is a want of method, which will render a copious index doubly necessary when the last volume of the series is sent to the printers. In a totally different order of topics, let us mention M. Paul Pierret's beautiful "Dictionnaire d'Archéologie Egyptienne," containing every important detail bearing upon the mythology, geography, history, and ethnography, of the ancient Egyptians. The volume comes from the French Imprimerie Nationale; it gives all the symbols and hieroglyphics, and is particularly rich in bibliographical details.

The sphere of literary criticism does not offer any production of very distinguished merit.

Fiction, both in prose and poetry, is still, as it was last year, the weakest part of the literary harvest.

In the domains of poetry there is almost an absolute dearth; and when we have named M. Coppée's "Le Cahier Rouge," Madame Blanche-Cotte's "Milites," and M. Déroulède's "Nouveaux Chants," our list of new works is exhausted; for M. André Lemoigne's "Poésies," collected in one volume, and M. de Banville's "Occidentales," have long been known to the reading public. We miss the powerful voice of M. Victor Hugo, and we

hope that we shall soon be able to welcome some fresh outpouring of that genius which charms us all by a vigor and an originality as great now as they ever were.

GERMANY.—A German poet, Anastasius Grün, in some beautiful verses, has predicted that the "Last Poet" will quit the earth in company with the "Last Man." That this last Man and Poet will be a German he has not said; but the number of new poets that make their appearance every year—and this year has been no exception to the rule—suggests the consoling reflection that the existence of the human race is likely to be prolonged for some time to come. Not satisfied with repeated impressions of the standard poets and more or less ponderous "collected editions" of the singers of the day, poetry has this year vied with politics, and founded periodical organs of her own, which are dedicated to *belles-lettres* only. The simultaneous establishment of the fortnightly *Deutsche Dichterhalle* and the monthly *Neue Monatshefte für Dichtkunst und Kritik*, edited, the former by Ernst Eckstein and the latter by Oscar Blumenthal, furnishes a striking proof that the politico-military paroxysm to which, since the foundation of the new German Empire, everybody has been a prey, is abating, and that the preference formerly felt by the Germans for a tranquil poetic life is again gaining ground. In both these magazines are to be found the most brilliant names among our poets; but their verses are not so brilliant.

The dramatic seed has this year shot up wonderfully. A writer hitherto unknown to fame, Ewald Böcker, has published a classical trilogy, "Periander," and plays have appeared by Julius Grosse ("Tiberius"), Mosenthal ("Parisina"), Hans Herrig ("Friedrich Barbarossa"), Otto Roquette ("Der Feind im Hause"), F. Keim ("Sulamith"), Hermann Kette, and others. Heinrich Kruse, the author of the "Gräfin," a play distinguished by hard yet energetic characterization, has, in his "Brutus," ventured on an unequal contest with Shakespeare. Paul Heyse has published a new novel, "Im Paradies," the setting of which is a contrast to the gloomy tone of his last, "Die Kinder der Welt." He has found a rival in Marie von Ebner-Eschenbach, who, hitherto known only as a dramatist, has brought out a volume of "Erzählungen," distinguished for miniature-like portraiture and high morality. The dream-like fascination of the loneliness of northern forest and northern seas pervades Theodor Storm's new tales, "Im Waldwinkel" and "Psyche," to a degree unapproached by any other writer except Heyse. Let no one expect a sentimental Alpine idyll in Gottfried Keller's "Neue Leute von Seidwyla," for these "Tendenz" descriptions of the Swiss peasant-world are marked by a hard politico-social realism. On the other hand, another dweller in Switzerland, Johannes Scherr, has included in his new "Novellen" an

Alpine story, "Rose zur Flüh," which ranks high for the subtlety of its studies of character and splendor of its descriptions of scenery. P. K. Rosegger, a native of Styria, has lately proved himself, in his "Schriften des Waldschulmeisters," a masterly delineator of the home-life of his countrymen. In a tragic tale, that takes its wondrous title "Juschu" from the *naïve* heroine, who is, however, rendered clear-sighted by fidelity, the eccentric but *spirituel* Hans Hopfen has wasted his descriptive gifts on the painful problem of a righteous but quite accidental retribution. The romance of Ferdinand Kürnberger, "Der Haustyran," is a new proof of the splendid powers of portraiture possessed by this suggestive and penetrating yet odd writer, but also of his caprice.

The transition from novels to dull science may be aided by the mention of the creator of romantic philosophy. The centenary of the birth of Schelling (January 27, 1775) fell in this year, and, like Fichte's centenary in 1862 and Hegel's in 1870, called forth a little literature from friend and foe. The pantheist, who in his genial youth was close to the borders of atheism, turned, it was well known, in his old age into a monotheist who believed in revelation. As when barely five-and-twenty he expounded in his "Naturphilosophie" the idea of a gradual development of the whole organic and inorganic universe from an original opposition of an extending and contracting force, all the ablest followers of the natural sciences extol him, although he soon proved false to his method, which was rather fanciful than scientific. Of his "Philosophie der Mythologie und Offenbarung" only a few pietists have professed themselves adherents. His most loyal disciple, Prof. Hubert Beckers, of Munich, has in an academic oration gone through the entire series of his speculations, while others, such as Pfeleiderer at Jena, H. von Stein at Rostock, Robert Zimmermann at Vienna ("Schelling's Philosophie der Kunst"), have dwelt upon portions of his theories. His second philosophy, by him styled "Positive," has lately come again into notice, because Ed. von Hartmann, the Philosopher of the Unconscious, has laid hold of it, and declares it a means of mediating between the views of Hegel and Schopenhauer. Schelling sought by it to prop up Christianity, and proclaimed the "Johannine" form of Christianity the Religion of the Future. His new follower, Hartmann, in his most recent book, preaches "die Selbstzersetzung des Christenthums," and announces humanistic pessimism as the Religion of the Future. Johannes Huber, of Munich, one of the leaders of the Old Catholic movement, and a thinker who has been much influenced by Schelling, has answered Hartmann from a Christian standpoint in a pamphlet called "Die religiöse Frage."

In Jena, where Schelling and Oken taught, a new "Naturphilosophie," intended to take the place of "the old," is preached by the

genial apostle of Darwinism in Germany, the fiery Ernst Haeckel, first in his too little known "Generelle Morphologie," then in his most popular if also his most superficial work, "Natürliche Schöpfungsgeschichte," and lately again in his most recent work, "Anthropogenie;" but, after all, as E. von Hartmann has shown, this "Naturphilosophie" is but a "Naturwissenschaft." The indefatigable opponent of the theory of Natural Selection, Adolf Bastian the ethnologist, has lately published a volume, called "Schöpfung oder Entstehung," in which he both uncivilly and unjustly calls the theory of the Descent of Man, which Haeckel endeavors to establish upon numerous embryological facts, an "anthropogonische Missgeburt." Guelph and Ghibelline could not be more bitter.

The Nestor of German historians, Leopold von Ranke, has published an essay upon the "Ursprung und Beginn der Revolutionskriege 1791 und 1792." The cold objectivity of the writer prevents him from showing either hatred or favor to the object of his delineation.

The indefatigable veteran has, this time not without some slight satisfaction at the attainment of a long-sought end, remodeled his "Neun Bücher Preussischer Geschichte," and issued it under the title of "Genesis des Preussischen Staats." The first book of the old work has been extended into four. Now that the aim of Frederick's policy has been attained, and the Hapsburg dynasty driven out of the "New Empire" toward Pesth, there is redoubled interest in tracing the "genesis" of the Prussian state, and in Arneth's work (the seventh volume of which has appeared this year) the "genesis" of the Austrian state under Maria Theresa. We are thereby enabled to see still more clearly than before that it was impossible for the two rival powers to dwell under one roof. Out of their unavoidable antagonism have sprung the Austrian and the Prussian schools of history which take opposite views of nearly every event.

Let us turn to a couple who, in spite of disparity of age and different tastes, bore the heavy trials of poverty and suffering with unshakable fidelity and self-sacrifice. The correspondence of Schiller's sister, Christophine, with her future husband, Reinwald, the librarian of Meiningen, a man much older than herself, in narrow circumstances and hypochondriacal, and with her brother, the poet, brings before us a truly German and most noble woman. If she had not the high-soaring imagination of her great brother, yet she had fully as much moral dignity. Many of the ladies who are celebrated in the annals of literature as members of the Weimar circle, in which a woman's virtue was not always too highly esteemed, might have learned from the simple Swabian woman. The memory of one of the most seductive stars of that ducal court, the beautiful Corona Schröter, has been revived by Robert Keil on the occasion of the

hundredth anniversary of the day on which Goethe entered Weimar. Keil has also published a fragment of Goethe's Diary of that time, the complete text of which is kept by the poet's heirs shut up in Goethe's house at Weimar. The most important publication that the celebration called forth was that of S. Hirzel, the owner of the richest Goethe library in existence. Under the title of "Der junge Goethe," this Leipzig bookseller has brought out an edition, arranged in strict chronological order, of all that Goethe printed and wrote between 1764 and 1776. In the collected edition, which he himself revised, the poet altered many passages in his youthful writings of the "Sturm und Drang" period, and improved some, but weakened others. The edition I am speaking of adheres throughout to the original readings, and even reproduces its frequently curious orthography. All his letters are included, even those first printed a few months ago by L. Ulrichs, which were addressed to Johanna Fahlmer, a relation of Jacobi, and afterward the wife of Goethe's brother-in-law, Schlosser; and from them the reader can gain for the first time a complete idea of Goethe's whole private life and poetical activity. The one is explained by the other. The volume, which is distinguished by its philological exactness, has been supervised by M. Bernays, the critical editor of the Schlegel translation of Shakespeare. Another interesting contribution to Goethe literature is Eric Schmidt's book, "Richardson, Rousseau, und Goethe," which points out the influence of "Clarissa" on the "Nouvelle Héloïse," and the influence of the "Nouvelle Héloïse" on "Werther." A parallel is drawn between Goethe and Rousseau, Lotte Buff and Madame d'Houdetot.

Among books of travel, the most important are Von Thielmann's "Reise im Kaukasus und Persien," Marno's "Reise im Gebiete des Weissen und Blauen Nil's und im Sudan" (1869-1873), and Gerhard Rohlf's "Quer durch Afrika." Among periodicals, the *Deutsche Rundschau*, started a year ago by Julius Rodenberg, maintains an honorable position. Of books of reference, a class which do not come within the scope of this article, I may name the "Allgemeine Deutsche Biographie," commenced on the plan of the "Biographie Universelle;" the "Deutsche Plutarch," edited by Gottschall; and Meyer's "Illustrirtes Conversationslexicon," the third edition of which, now in course of publication, seems likely to surpass its predecessors and rivals.

Upon the whole, the literary position of Germany is not equal to its political. Unlike its neighbors, German literature was at its best before, not after, the political greatness of the nation.

HOLLAND.—The weeks preceding Christmas often give birth to the most important publications of the year. Two of the most remarkable contributions to our *belles-lettres* are Schimmel's "Sinjeur Semeys" and Pier-

son's "Opinions on Life and Living." The first is on the eve of publication; the other has but just appeared. Schimmel and Mrs. Bosboom-Toussaint, the wife of the painter, are the best historical novelists we have. Of Mrs. Bosboom-Toussaint's "Major Frana," published toward the end of last year, several editions have appeared, among them a large one, illustrated by the painter Rochussen. If not the most learned of her works, it certainly is the most attractive. Already a French translation, by M. Réville, has appeared in the *Revue des Deux Mondes*. Mr. Hazebroek's two volumes of "Poetry and Prose" were welcomed especially by those who rightly foster love and admiration for the triumvirate of about 1840—Jonathan (Hazebroek), Hildebrand (Beets), and Klikspaan (Kneppelhout)—who exercised so wholesome an influence on the development of Dutch prose. At that period Hazebroek published, under the pseudonym of "Jonathan," his "Truth and Fiction," or rather "Reality and Fantasy," a collection of humoristic essays in the style of Lamb. Beets, his fellow-student, wrote his inimitable "Camera Obscura" by Hildebrand, our best standard prose work, of which the tenth edition, an *édition de luxe*, illustrated by Carl Sierig, is in course of publication. Mr. Beets is, perhaps, better known in England than "Hildebrand." Many will remember the banquet in honor of Sir Walter Scott, at which the Utrecht minister, now professor of divinity, made such an agreeable impression, "being more dean than the dean himself," as the *Scotsman* of the day, in allusion to the English dean, had it. From the "Camera Obscura" only a couple of sketches have as yet been translated into English; they appeared some years ago in *Fraser and Chambers's Journal*. Besides the several translations into European languages, a Japanese translation is now in preparation. Beets, who, as poet, was for a time strongly influenced by Byron's works, as many other Dutch poets were, often reminds us in his prose works of Dickens. He is the greatest humorist in Dutch literature, and, if the language of the Netherlands were more generally known, he would be acknowledged by foreigners to stand high among European writers. Besides being a poet, he is the most elegant of our essayists and lecturers, as his inaugural address "On Character" has again proved. The third of the trio mentioned, Mr. Kneppelhout, whose principal works, containing humorous sketches of Dutch university life ("University Types" and "University Life," by Teltale), have gone through many editions, published this year a biography of the late De Graan, the young Dutch violinist, who already at an early age had acquired a European reputation.

Messrs. Emants, Koff, Kleine, and a few others, started last year a monthly, the *Banner*, termed *Young Holland's Periodical*, "Young Holland" being the favorite name assumed by, or given to, that part of the rising genera-

tion who do not like to follow the beaten track, and are not averse to a new order of ideas, either in politics, social relations, literature, or art. Though some good may be expected from this movement in the long-run, it lies in the nature of things that Parnassus cannot be stormed in a day. The first parts of the *Banner* were not favorably received by the press, which hinted that there was no need for a new periodical, unless it improved on the existing ones. Indeed, a greater dissemination of literary forces than already exists in our numerous periodicals is hardly imaginable. The work done by those who are perhaps looked upon as "the old fogies" is undoubtedly by far the best. The papers in *De Gids*, *De Tydspeegel*, and *De Nederlandsche Spectator* may be compared with the best periodical literature of England and Germany; I do not say France, as that nation has no rival in the art of combining excellence of form and solidity of matter. It must be admitted, however, that in the second year of the *Banner* a rapid progress has been visible. Mr. Emants also published a separate work, "Julian the Apostate," a drama in five acts, in verse, a work of some promise, parts of which one likes to peruse more than once. As a whole, however, it wants that concentration of thought and language so indispensable to a drama in verse. To Mr. Van Santen Kolff we are indebted for one of the most original books of the year, "Sketches about Music and Novelistic Sketches." We may safely expect something still better.

Since the formation of the Dutch Geographical Society, great interest has been taken in geography, and, above all, in arctic and other expeditions. Messrs. Posthumus, Kan, Veth, Versteeg, etc., have shown much zeal for this branch of science, and the papers edited by the society are as important as they are interesting.

Under the auspices of the Royal Institution for promoting the Knowledge of India, Dr. von Rosenberg edited a remarkable book on his travels in New Guinea, about Yellow-Finch Bay, with maps and plates. Important works were published on archæology, jurisprudence, Oriental and Dutch East Indian languages (Malay, Javanese, Bugis, Sunda, etc.), theology, natural history, and the study of languages.

Prompted by Motley's "Barneveldt," our statesman and historian, Groen van Prinsterer, published "Maurice et Barneveldt" in French, the modern language of the learned. He differs from Motley on some important points. Rogge's "Life of Nitenbogaert" is also a work of great importance.

Of the numerous works published on the 300th anniversary of Leyden University is the "Album Studiosorum Academiae Lugduno Batavae," a big quarto, giving the names and other particulars of the 80,000 students from 1575-1875. The 200th anniversary of Leeuwenhoek, the microscopist and discoverer of

infusoria, gave occasion for some publications. Mr. Zeeman's erudite "Dutch Proverbs and Sayings derived from Scripture;" Harrebomee's quaint "Bacchus: Dutch Proverbs and Sayings, illustrative of Tippling and Tipplers;" Oudemans's fifth volume of "Contributions toward a Middle and Old Dutch Dictionary;" Voogt's "History of Coinage in the United Provinces;" Prof. Quack's "Socialists: Persons and Systems;" Prof. Kuenen's "Prophets and Propheying in Israel;" Prof. Opzoomer's "On Art;" Scheffer's "Modern Pessimism"—each of these elaborate works would deserve a short notice by itself.

The movement in favor of art, described at some length in my report of last year, has entered a new phase. Government has created at the Home Office a Department for Art, and appointed Mr. de Stuers the chief officer.

HUNGARY.—In picturing the literary life of the past year, I shall begin as usual with the scientific achievements of the Academy, among which the cultivation of the Magyar language, and the investigation of the affinities of the latter, partly to the Finn-Ugrian, partly to the Turco-Tartar stock, occupy the chief place. Referring to the first, I may mention the publication of the "Monumenta Hungarica," consisting of three volumes, with the following contents: 1. The Vienna and Munich Codices, old Hungarian translations of the Bible and Gospels supposed to have been written in the fifteenth century. 2. The Vespémi, Sándor, Peer, Winkler, Gyöngyösi, Thewrewk, Kriza, and Bod Codices, Hungarian literary remains of the sixteenth century. 3. The Nagyszombat Codex, containing the life of Saint Doménicus and the Virginia Codex.

We cannot look at the books of this year apart from those of other years, but must consider them as part and parcel of the movement which has been going on since the Revolution, or at least since the reestablishment of the Constitution. And the most pressing question is, whether the Hungarian nation, while it draws ever nearer to other European peoples and assimilates much that is still strange to it, will be able to retain its own individuality, or will lose its national character in the endeavor to learn from foreigners. We Hungarians are in the habit of giving a cheerful answer to this question, and of taking a hopeful view of the future of our country; yet occasionally a certain amount of anxiety is evinced, as some of the novels published this year show. The hero of Maurice Jókai's "Mine, Thine, His," is, during the greater part of his career, a representative of all the best qualities of his nation—indeed, a personification of Hungary.

Two other novels by Jókai belong to this year, "The Comedians of Life," and "God is one God." The former, however, is not yet finished, and the second is only on the point of appearing, and will be published at the same time in several languages, English among others.

hundredth anniversary of the day on which Goethe entered Weimar. Keil has also published a fragment of Goethe's Diary of that time, the complete text of which is kept by the poet's heirs shut up in Goethe's house at Weimar. The most important publication that the celebration called forth was that of S. Hirzel, the owner of the richest Goethe library in existence. The movement in favor of art, described at some length in my report of last year, has entered a new phase. Government has created at the Home Office a Department for Art, and appointed Mr. de Stuers the chief officer.

HUNGARY.—In picturing the literary life of the past year, I shall begin as usual with the scientific achievements of the Academy, among which the cultivation of the Magyar language, and the investigation of the affinities of the latter, partly to the Finn-Ugrian, partly to the Turco-Tartar stock, occupy the chief place. Referring to the first, I may mention the publication of the "Monumenta Hungarica," consisting of three volumes, with the following contents: 1. The Vienna and Munich Codices, old Hungarian translations of the Bible and Gospels supposed to have been written in the fifteenth century. 2. The Vespémi, Sándor, Peer, Winkler, Gyöngyösi, Thewrewk, Kriza, and Bod Codices, Hungarian literary remains of the sixteenth century. 3. The Nagyszombat Codex, containing the life of Saint Doménicus and the Virginia Codex.

We cannot look at the books of this year apart from those of other years, but must consider them as part and parcel of the movement which has been going on since the Revolution, or at least since the reestablishment of the Constitution. And the most pressing question is, whether the Hungarian nation, while it draws ever nearer to other European peoples and assimilates much that is still strange to it, will be able to retain its own individuality, or will lose its national character in the endeavor to learn from foreigners. We Hungarians are in the habit of giving a cheerful answer to this question, and of taking a hopeful view of the future of our country; yet occasionally a certain amount of anxiety is evinced, as some of the novels published this year show. The hero of Maurice Jókai's "Mine, Thine, His," is, during the greater part of his career, a representative of all the best qualities of his nation—indeed, a personification of Hungary.

Two other novels by Jókai belong to this year, "The Comedians of Life," and "God is one God." The former, however, is not yet finished, and the second is only on the point of appearing, and will be published at the same time in several languages, English among others.

The novels I have mentioned are not nearly enough to meet the wants of the public, and there is a great deal of translation done—too much, indeed. Still many good, and some of the best, stories published abroad are translated, for instance, this year, "Middlemarch" and "Don Quixote." Both of these were translated under the auspices of the "Kisfaludy" Society.

In Hungarian poetry, the book most worthy of mention is the new edition of Francis Toldy's "Handbook of Hungarian Poetry." This work originally appeared in German, nearly fifty years ago, and in Hungarian, in two volumes (1855-'57), and now in five. The learned historian of our literature, who till comparatively recently showed himself somewhat hostile to modern Hungarian poetry, is now more graciously disposed toward its younger representatives.

ITALY.—The extraordinary events of the present year have been the centenary celebrations of Michael Angelo at Florence, of Ariosto at Ferrara, of Boccaccio at Certaldo. For the centenary of Boccaccio some ten new publications are announced, which will be subjects for the literary chronicle of next year; Ariosto has only inspired Pietro Cossa, of Rome, to write a bad comedy, and Signor Anselmi, a Piedmontese, residing at Ferrara, a middling one: neither the one nor the other will keep its place in the *répertoire* in which several other new Italian plays will be carefully retained.

Several works on Italian bibliography have been published this year in Italy. I will mention "La Bibliografia dei Libri di Prima Stampa e delle Edizioni Aldine e rare," which are possessed by the library of Palermo, by Antonio Pennino and Filippo Evola; the "Bibliography of Italian Journals," by G. Ottino; "La Bibliografia della Lunigiana," by G. Sforza; "La Bibliografia della città di Pistoia," by V. Capponi. The mere enumeration of works is quite enough to convey some idea of our activity in this literary department.

On the other hand, the Italian translation, by Prof. A. Severini, of a work on Japanese astrology, and the essay of Prof. G. I. Ascoli, entitled "Schizzi Franco-Provenzali," which carried off the prize at the Congress of the Romance Languages at Montpellier, bear witness to the depth and sagacity of Italian erudition. Japan has also been illustrated in a most interesting monograph by Pietro Savio, published by Messrs. Treves at Milan.

Those who are interested in popular literature will admire the persistent patience and learning of Giuseppe Pitré, who, alone and without any assistance, has succeeded in collecting, putting into good order, and writing a judicious commentary upon four volumes of Sicilian popular tales. They will also be pleased with the second edition of Sicilian popular songs, in one large volume, containing many additional songs, collected by Lionardo Vigo, a learned man of respectable erudition, who

lives in Acireale, and whom the King of Bavaria has recently decorated for his work. In like manner the Emperor of Brazil has just created Prof. Giacomo Bertini, the diligent translator of Herodotus and of Theocritus, a Chevalier of the Order of the Rose.

The magnificent promise of a good translation of Lord Byron's "Don Juan" brings us to a poet of Verona, Vittorio Betteloni, who has given the episode of Haidée in eight-line verses, which are as harmonious as they are faithful. Among the new Italian poetical works, marked with vigor and originality, are the "Nuove Poesie" of Giosuè Carducci, published at Bologna; "In Memoriam," by Giuseppe Chiarini, President of the Lyceum of Leghorn; "Erbuocie," by G. L. Patuzzi, of Verona; the poems of Luigi Morandi, an Umbrian, who is a professor at Forlì; and the poems of Arturo Graf, son of a German father and Italian mother, born at Athens, brought up in Italy—a man full of strength and independence, and perhaps destined one day to make his mark in the world.

I must not omit to notice the wonderful improvement which has shown itself within the last few years in Italian fiction; the publishers who have encouraged this have their share in the merit. Without pausing to speak of novels of which the object is strictly educational, and which are published at Milan, with success, by Signor B. E. Maineri, and of historical novels of which he has quite recently given a remarkable specimen, Signor Pier Ambrogio Curi's "Madama di Celan," we may consider that we have half a dozen good novelists and some good Italian novels to bring under notice. The worthy veteran of Treviso, Antonio Caccianiga, has given us an agreeable novel, "Il Bacio della Contessa Savina." The veteran Piedmontese, Vittorio Bersezio, has written two novels, each on a different subject; one of them is called "Cavalieri, Armi, ed Amori;" the other, "Il Segreto d'Adolfo;" they prove that he has lost nothing of his masterly power and spirit. Anton. Giulio Barrili, the well-known Genoese novelist, who owing to his elegant style and finished wit requires a more cultivated public, has this year given us a charming story, called "Come un Sogno." Salvatore Farina, who may be said, justly, to be the Italian novelist who comes nearest to Dickens, is our subtlest, tenderest, and most delicate writer; he it is who writes with the most exquisite touches of Nature. He has this year treated us royally, and given three delightful novels—"Un Tiranno ai Bagni di Mare," "Amore Bendato," and "Capelli Biondi." I must also notice "Virtù d'Amore," by G. L. Patuzzi, the author of the charming collection of verses called "Erbuocie;" he is, too, in concert with Logia Sadler, the translator of "Il Principe Serbrianni," by the late Count Tolstoi.

I cannot say much of the literary, artistic, and political history of Italy, although each contributor has furnished notices that are not

without interest—monographs written by Sat. Ciuffa, upon the grammarian Marco Mastrofini; by Antonio Zanolini, upon Gioachino Rossini; by Ernesto Marsi, upon Camillo Casarini. Speaking of biography, I must not forget to name the "Ricordi," an autobiography of the celebrated physician Maurizio Bufalini, published by Le Monnier at Florence, under the care of Deputy F. Mariotti. I am told that the venerable Gino Capponi is also occupying himself in writing the recollections of his long and glorious existence, while enjoying the legitimate success of his great work, "Storia della Repubblica di Firenze," written in the style of a master, and worthy henceforth to take its place beside the classic histories of Florence. Perugia will also have her own eminent historian, as the first volume of "La Storia di Perugia," by Luigi Bonazzi, which has just appeared, amply proves. The learned history of Casteltermini in Sicily, by Gaetano di Giovanni, continues to be published. Father Raph. Garrucci continues his monumental "Storia dell' Arte Cristiana nei Primi Otto Secoli della Chiesa." I shall content myself with announcing two recent works which treat history from a high point of view, and which prove that in Italy there are noble thinkers as well as skillful writers. Tullo Massarani, a man of a high order of intellect and an admirable type of a Lombard citizen, has published at Florence, through the publisher Le Monnier, under the title "Studi di Politica e di Storia," a work that will convey an idea of what have been the thoughts and opinions of the best and noblest Italian patriots of the present century. The mere fact that certain scientific works are now published in Italy, and can command a public, attests the great progress of Italian culture during the last twenty years. Perhaps there is in the present day less regard to elegance of style and form, which is to be regretted; but that is compensated by the tone of thought, which is now much higher, and the works in which the public take an interest are of a higher class.

NORWAY.—In *belles-lettres* the most remarkable productions issued during the year are two dramatic works by B. Björnson, which appeared at the same time, "En Fallit" and "Redaktören." The former of these pieces has been received with great applause throughout Scandinavia, and also met with success on the stage of Vienna; but "Redaktören," no doubt with good reason, has been regarded as a failure.

To turn to historical literature, I may mention that the two great collections of original materials, called "Diplomatarium Norvegium," and "Norske Rigsregistranter," are still being continued. Of the former work, edited by Prof. O. R. Unger and H. J. Huitfeldt, nine bulky volumes have appeared, containing documents illustrative of the history of Norway up to the middle of the sixteenth century. Of

the latter, which may be said to correspond to the so-called "Domestic Series" of the English State Papers, the sixth volume is printing. M. Yngvar Nielsen has published "Grev v. Platens Statholderskab (1827-'29)," an interesting contribution to the political history of the kingdom during the reign of Bernadotte (Carl Johan XIV.). Another important addition to our knowledge of the same period is to be found in the memoirs of the renowned statesman P. C. Holst.

The greatest theologian of Norway, Prof. C. P. Caspari, has lately published the third part of his ample collection, "Ungedruckte, unbeachtete und wenig beachtete Quellen zur Geschichte des Taufsymbols und der Glaubensregel," the result not only of extensive studies, but also of the numerous visits he has paid to almost every library of importance on the Continent. A juridical work of high value is "Norges offentlige Ret," by Prof. J. H. Aschehoug: the first part, published in the year 1866, treated of the constitutional history of Denmark and Norway; the second, which has appeared this year, contains a commentary on the present fundamental law of Norway.

An important volume, with numerous illustrations, "Die Pflanzenwelt Norwegens, ein Beitrag zur Natur- und Culturgeschichte Norwegens," by Prof. F. C. Schübeler, has been published at the expense of the University. Prof. Ossian Sars has likewise published, in English, an essay entitled "On some Remarkable Forms of Animal Life from the Great Deepes of the Norwegian Coast." M. Robert Collett has, under the auspices of the Scientific Society at Christiania, brought out "Norges Fiske" ("The Fishes of Norway"). Lastly, I may mention a couple of pictorial works, the highest value of which consists in their illustrations, viz., "Billeder fra Norges Natur og Folkeliv" ("Pictures from the Nature and National Life of Norway"), edited by Chr. Tønsberg; and "Norsk Portræt Galleri" ("Norwegian Portrait-Gallery").

RUSSIA.—Among all the 3,141 books which have been published in Russia during the last year, to say nothing of the literary journals, how little is there deserving of notice for its literary merit! And yet we cannot quarrel wholly with the year 1875 in literature, when it has given us even the half of such a work as the new novel of Count Leo Tolstoi, "Anna Karenina." For once all parties are agreed, and even the most hostilely disposed critics have been compelled to bow in admiration to the talent of a great writer. The key-note of this remarkable book is probably struck in the opening sentence, "All happy families are alike; every unhappy family is unhappy in its own way;" and it is one of these unhappy families which the author at once presents to us.

But this gain to Russian literature is perhaps more than counterbalanced by the loss sustained in the death of Count Alexis Tolstoi, not only because he might have yet done much—

for he died in the maturity of his powers—but because he was a support to the cause of art for art's sake, and his literary brethren found in him ready sympathy and quick encouragement, and were cheered on to fight for the sake of truth. He himself had written from the need of expressing the poetic ideas which thronged into his brain, and was averse to popularity and seeking for an audience. But a few days before his death his last poem, "The Dragon," appeared in the *European Messenger*. It is on an Italian subject, in the Italian style, in *terza rima*, and is headed "From the Italian" simply, as the author said in a letter, to puzzle his friend De Gubernatis.

Of other works of fiction there are some charming little sketches by V. Krestofsky (Madame Khvostchinsky), entitled "An Album," and two tales by Melnikof (novels they can hardly be called), "In the Forests" and "Among the Mountains," devoted to careful studies of life among the Dissenters, especially those sects which keep apart from the main body of Russians and are hardly known.

Poetry, we fear, has for a time disappeared from materialistic and socialistic Russia. In the drama there are two new plays by Ostrofsky, "Bread gained by the Sweat of the Brow," and "Wolves and Sheep:" the former feeble; the latter on a fresh subject, and interesting, but still not thoroughly good.

In other departments of *belles-lettres* there are some new satirical sketches by Stchedrin, which show that he is wearing out both his subject and his style: some reprinted *feuilletons* of Suvorin distinguished by a sparkle which shows the author capable of something better; some new critical studies of Pypin on the history of Russian literature, treated according to the comparative method.

The modest title of "Compte Rendu of the Imperial Archaeological Commission for 1872" covers a book of great value for the history of art. It contains an essay, by the well-known Prof. Ludolf Stephani, on the group which filled the western pediment of the Parthenon, founded on some medals and works of art found in the neighborhood of Kertch in 1872, and now in the Hermitage Museum; descriptions of vases found in the Crimea; and an essay, by Vladimir Stasof, on a sepulchral chamber with frescoes laid bare at Kertch in the same year. The book, which is printed with a luxury which only Government publications can afford, is plentifully illustrated with cuts and lithographs in the color of the frescoes, and is accompanied by a large atlas containing supplementary plates.

In political and legal literature by far the most important book is the second volume of "Essays in Political Science," published under the direction of the academician Bezobrazof. Prof. A. Gradofsky has published the first volume of "The Basis of Russian Constitutional Law," and a book on the "German Constitution." Prof. A. Stoyanof keeps up the tra-

ditional reputation of the University of Kharkof by his interesting "Sketch of the History and Dogmas of International Law."

The last year has not been so fertile either in historical works or in collections of historical material as those which have immediately preceded it. In this department the most interesting book is, without doubt, "The First Forty Years of Intercourse between England and Russia, 1553 to 1593," by Yurii Tolstol. The introduction and all the documents, eighty-two in number (thirty-three of which are published for the first time), are printed both in Russian and in English; and some of the letters exchanged between Queen Elizabeth, Ivan the Terrible, and Boris Godunof, as well as the reports of their respective envoys, are curious and valuable. The fourteenth volume of the "Collections of the Imperial Russian Historical Society" is filled with the continuation of the reports of the great Diet held by Catharine II. The veteran historian, Pogodin, has presented, in his usual discursive and polemic manner, "The First Seventeen Years of the Life of Peter the Great;" and N. A. Popof has published an interesting volume on "The Free City of Cracow."

Books of geography and travel, as is but natural, relate mostly to Asia; the exhaustive work on Lake Ladoga, by Colonel Andreief, being the single exception of note. The only really remarkable account of travel is Captain Prezhvalsky's "Mongolia and the Country of the Tanguts," a relation of his notable journey to the edge of Thibet, which, it is announced, will appear in an English translation. "England and Russia in Central Asia" is full of interest, as the author had access to the chancery of General Kaufmann, and has published many extracts from official documents. Another book, "Russia and Asia," by Prof. Grigorief, is one that all who are interested in the East and in Russia will be glad to get.

A little book published in Paris, "Histoire de la Littérature Contemporaine en Russie," by C. Courrière, should not be forgotten. Although by no means perfect, it is the best sketch of modern Russian literature published abroad, and will be of great use to any one desiring to know what the Russian authors have thus far done.

SERBIA AND CROATIA.—This year the literary activity displayed by the two nations has been quite equal to that of last year: in many points it has been greater. Besides the Learned Society in Belgrade, the Matica Srbska in Neusatz, and the Academy of Science at Agram, which published their transactions under the names of *Glasnik Ljetopis*, *Rad Jugoslavenske Akademije*, and *Magazin Dalmatinski*, which are mainly taken up with history and philology, other branches of knowledge are the objects of the labors of individuals.

In poetry, matters are at a standstill. Some songs have been called forth by the events of the year, and some dramatic trifles have ap-

peared, but no original work that is worth mention.

Of historical works I may mention Dr. F. Rački's historical memorials, belonging to the first quarter of the eleventh century, which is now in process of publication, and deals with the glorious epoch of the Croatian King Peter Vresimir; and the publication of the letter addressed to the Servian King Stefan by Pope Honorius III., from which it appears that the Servian monarch received his crown from the Pope—a fact which confirms the previous theories of Servian and Russian historians. The works of Oedomilj Myatovic', "Historical Studies regarding George Brankovic," and Ivan Tkalčić, "Notes on the Foreign Relations of the Ragusan Republic," are worth mention; and an honorable place is due to the collection of Old Croatian (Dalmatian) writers, the seventh volume of which contains the works of Marin Držić'.

SPAIN.—On examining the books which have been published in Spain during the present year, we find the number far smaller than in former years.

The academies, which occupy the first place among scientific societies, have suspended the publications and memoirs which they began some years back. Their only outward signs of life consist in the memoirs read and published by the members on the day of their reception or at the yearly opening of the academies.

In history there are a greater number of publications this year than in other branches of literature. Señor Millares has written a history of the Inquisition in the Canary Islands—an excellent work, full of details of the Holy Tribunal in those islands and in other localities in Spain, illustrated by many historical details. Don Alexandro Pidal has published a life of St. Thomas Aquinas, in which he has collected several new facts concerning St. Thomas and his writings which have been hitherto neglected. This book is valuable to students of theology, although the exaggerated opinions of the author are, in many instances, to be deplored.

Señor Rodriguez Villa has brought out an historical study, founded upon extracts taken from original documents at Simancas and elsewhere, on the sack of Rome by the Imperial army in 1527. The documents from which this book has been compiled are known to English readers of the "State Paper Calendar," edited by Señor Gayangos, for the reign of Henry VIII. Señor Cruzada Villamil gives us a book which will be read with pleasure by those who are interested in the life of the great Flemish painter—"Rubens considered as a Spanish Diplomat, his Different Journeys to Spain, and Notices of his Pictures."

Very few works have appeared this year on scientific subjects. Señor Piernas gives us the "Manual de Instituciones de Hacienda," in which, for the first time in Spain, finance is treated from a scientific and philosophical point of view, although the German doctrines quoted

and commented upon by the author do not appear to have been studied from original sources.

The dramatic works which have been brought out this year at the Spanish theatres have been very numerous. That is almost always the case. This year translations from the French have abounded, and the only first-rate original dramatic work has been one by Señor Echegaray, which justly deserves the enthusiasm with which it has been welcomed by the public.

Very few novels worthy of mention have been brought out this year. Señor Alarcon has published two—"El Escándalo" and "Amores y Amorios." "El Escándalo" is a novel which treats of contemporary life. This book contains several dramatic scenes of Spanish life, which are full of interest. The style is good, and some of the characters are drawn in a masterly manner.

Señor Valera, who published "Pepita Gimeñez" last year, has brought out, in the *Revista de España*, "Las Ilusiones del Dr. Faustino." The chief interest of this book consists in the description of provincial life in Spain. Señor Valera brings before us, in delightful pictures, scenes of old Spanish life which are daily disappearing. His pleasant and slightly Voltairean style makes us forgive certain eccentricities into which he too often falls.

LITERATURE, ENGLISH. The community of literary interest between the English and American people leads to a free circulation in either country of the best things published in the other. This liberal interchange tends to the recognition of the two literatures as virtually one. There is essential unity in respect to works of conspicuous merit or popularity in both. The leading authors of England seem to be conscious that they address an American as well as an English public. Our favorite authors have also their English admirers. In a preceding article, under the sub-title *REPUBLICATIONS*, we have noticed the more important English books that during the past year were reproduced here. The statement includes notices of the choicest publications in general literature and science that appeared in England. But English literature, for obvious reasons, is produced with an affluence of supply which is not adequately represented in the portion that enters into circulation among us. Books of travel, for example, are increasingly numerous. Every year some new region offers itself for exploration, and more holiday tourists report their "views" of routes already well traveled. Classical philology and literature have numerous cultivators ready to welcome works on their favorite studies. History and biography, especially British history and biography, yield to the press the fruits of extensive and minute research. The enthusiasm of scientific pursuit, the earnestness of religious faith, and the excitements of conflict between opposing schools of thought, find copious literary expression. In surveying the mass of books not republished here, some that

claim our attention will doubtless find American publishers hereafter.

HISTORY.—In English history a work of first-rate interest is "England under the Duke of Buckingham and Charles I." by Samuel Rawson Gardiner. With the volumes preceding it in the series, and those which we may hope will follow, a history of England in the sixteenth and seventeenth centuries will be produced, to the composition of which rare thoroughness of research and still more rare soundness of judgment have both contributed. Other works in the same general class are: "Memoirs of the Civil Wars in Wales and the Marches, 1642-1649," by John R. Phillips; "The Troubles of our Catholic Forefathers related by Themselves," edited by J. J. Morris, S. J.; the first volume of a valuable "History of Coöperation in England," by G. J. Holyoake, a writer whose chief repute has been gained by works that have not commended themselves to the public at large; "History of English Dramatic Literature to the Death of Queen Anne," by Adolphus William Ward; "Incidents of the China War of 1860," from the private journals of the late General Sir Hope Grant; and "A-Kim-Foo: the History of a Failure" (the Aahantee War), by Major W. F. Butler, C. B. In ancient, ecclesiastical and general history we note the following works:

The Age of Pericles: a History of the Politics and Arts of Greece, from the Persian to the Peloponnesian War. By W. Walkies Lloyd.

Social Life in Greece. By the Rev. J. P. Mahaffy.

Renaissance in Italy: Age of the Despots. By J. Addington Symonds.

Church Memorials and Characteristics: being a Church History of the First Six Centuries. By the late W. Roberts, M. A.

Gnostic Heresies of the First and Second Centuries. By the late Dean Mansel.

The Map of Europe by Treaty, showing the Various Political and Territorial Changes which have taken place since the General Peace of 1814. By Edward Hertslet, C. B. Three volumes.

A Sketch of the German Constitution and of the Events in Germany from 1815 to 1871. By O. Nicholson.

BIOGRAPHY.—Of works in this department some have an historical and national significance. Such are the life and correspondence of William Earl of Shelburne, afterward the first Marquis of Lansdowne; "The Annals and Correspondence of the Viscount and First and Second Earls of Stair," by John Murray Graham; "The Life and Times of the Prince Charles Edward, Count of Albany, commonly called the Young Pretender," by Alexander Charles Ewald; Dean Hook's "Lives of the Archbishops of Canterbury," the last volume he lived to complete containing the life of Archbishop Laud. Of those that illustrate the history of literature or of art, or are studies of character, may be named: "Isaac Casaubon," by Mark Pattison, Rector of Lincoln College, Oxford; "Life of Allan Cunningham," by the Rev David Hogg; "Life of Erasmus," by the Rev. A. R. Pennington; "Life of Sir

Roderick I. Murchison," by Archibald Geikie, LL. D.; "Recollections of Colonel de Gonville," edited from the French, by Charlotte M. Yonge; "A Christian Painter of the Nineteenth Century: being the Life of Hippolyte Flandrin," by the author of "A Dominican Artist;" and "A Fine Old English Gentleman, exemplified in the Life and Character of Lord Collingwood," by William Davies.

SCIENCE.—Interest in the progress of science advances with nearly equal pace in this country and in England. Hence, with few exceptions, works of that nature are very promptly republished here, as the contributions of American research are sure of finding their way across the Atlantic. And we should hesitate to regard it as anything more than a question of time—not *whether*, but *when*, any meritorious work originated abroad is to be brought before the American public. Such are Prof. Sidgwick's "Methods of Ethics;" Sir H. S. Maine's "Lectures on the Early History of Institutions" (which, while we write, is announced for an American edition); that remarkable anonymous production, "The Unseen Universe;" a translation of Comte's "System of Positive Polity;" a treatise on "The Logic of Style: being an Introduction to Critical Science," by William Renton; "Sensation and Intuition," by James Sully. The Dictionary of the Pali Language," by Prof. R. C. Childus, will be invaluable to the student of comparative philology, and the related science of comparative religion. "Christian Psychology: the Soul and the Body," by T. M. Gorman, is a treatment of intellectual philosophy analogous to a once very common way of dealing with physical science—a method adopted in disregard of the very different principles addressed by science and revealed religion; a difference which forbids an attempt to control one by the other.

THEOLOGY AND RELIGION.—As every religious body in Great Britain has its corresponding church or denomination in America, the literary fellowship on these subjects is as much closer as religious conviction and emotion are more profound than those produced by any other subject of thought. But, for the same reason, the literary product is more exuberant, and republication does not as nearly keep up with publication. We note the following:

St. Paul's Epistles to the Colossians and Philemon. A Revised Text, with Introductions, Notes, and Dissertations. By J. B. Lightfoot, D. D.

The Bible Educator. By E. H. Plumtre, D. D. 4 volumes.

The Psalms: with Introductions and Critical Notes. By A. C. Jennings and W. H. Lowe.

The Gradual Psalms: a Treatise on the Fifteen Songs of Degrees, with Commentary, etc. By the Rev. H. T. Armfield, M. A.

The Doctrine of Retribution. The Bampton Lectures for 1875. By the Rev. William Jackson, D. D.

John the Baptist. The Congregational Lecture for 1874. By H. R. Reynolds, D. D.

The Atonement. By the Rev. R. W. Dale, M. A.

The Congregational Lecture for 1875.

The Nicene and Apostles' Creeds: Their Literary History; together with an Account of the Growth and Reception of the Sermon on the Faith commonly called the Creed of St. Athanasius. By C. A. Swainson, D.D.

The Primitive and the Catholic Faith. By the Rev. B. W. Savile.

Before the Table. By J. S. Howson, D.D.

Mystery of the Temptation. By the Rev. W. H. Lutchings.

Dictionary of Christian Antiquities. By Dr. William Smith and Prof. Cheetham.

The Parliamentary History of the Act of Uniformity. By C. A. Swainson, D.D.

Remains of the late Bishop Thirlwall.

The Hopes of the Human Race, Here and Hereafter. By Frances Power Cobbe.

God and the Bible. A Reply to Criticisms on "Literature and Dogma." By Matthew Arnold.

An enumeration of books and pamphlets on the controversies flagrant in the Established Church would of course swell the above list to such greater length. A "Theological Translation Fund" has been organized for the purpose of introducing to English readers the works of radical writers, the "vigorous and vigorous" critics, so named by Matthew Arnold—such as the "Foreign Theological Library" and similar series do not include. Several volumes have been issued.

ESSAYS AND CRITICISM.—A work of no small value is "Shakespearean Hermeneutics: or, The Still Lion: being an Essay toward a Restoration of Shakespeare's Text," by C. M. Ingleby, LL.D. "The Three Devils: Luther's, Milton's, and Goethe's," by Prof. David Masson, is an interesting comparison made by a diligent and discerning critic; and the "other Essays" of the same volume are of kindred merit. Of Milton, indeed, Prof. Masson has a more thorough knowledge than has been shown by any contemporary critic. His "Life of Milton," of which another volume has appeared, is in truth a series of essays on important topics in English history more or less associated, or capable of being associated, with the personal history of the poet, including expositions of his poems and other writings. The introductions and appendixes to Milton's poetical works, of which he has edited two editions, are of great assistance for the intelligent appreciation of them. "Papers of a Critic, with a Biographical Sketch," by Sir O. W. Dilke, is made up of papers by his father, contributed to the *Athenæum*, of which he was editor. The selection is judiciously made, and the publication is well received. "The Prose Works of Wordsworth," edited by the Rev. Alexander B. Grosart, are well worthy to be collected and published. Wordsworth does not seem likely to hold the place claimed for him by his admirers, and apparently conceded by the general suffrage of critical opinion a few years ago. But neither can he be depressed to the low degree assigned him by an earlier generation of critics, especially if his works in prose as well as in verse receive considerable perusal. Mr. Grosart has contributed little directly to this desirable

result, much as he admires and reveres the poet.

GEOGRAPHY, TRAVELS, ETC.—Dr. William Smith, in his "Historical Atlas of Ancient Geography, Biblical and Classical," has added to the obligations the public owes to his well-directed diligence. "Travels in Portugal," by J. Latouche, breaks new ground. But though it is pleasant, through his book, to travel ideally in that country, even the geniality of the author could hardly make it a pleasure actually to take the trip. Another work that has an effect of disclosure is "Untrodden Spain and her Black Country," by Hugh James Rose, with which may be compared "Cositas Españolas, or Every-Day Life in Spain," by Mrs. Harvey. "White Conquest," by W. H. Dixon, like his previous works on this country, judges of the importance of events by their fitness for sensational treatment. A good example of home-travel is given in "The River Dee: its Aspect and History," by Dean Howson. To "Last Letters from Egypt," by Lady Duff Gordon, are added "Letters from the Cape," and a memoir by her daughter, Mrs. Ross.

The Land of the Pharaohs, Egypt and Sinai. By the Rev. S. Manning.

Leaves of a Sketch-Book; Pencilings of Travel, at Home and Abroad. By Samuel Read.

The Land of the Czar. By O. W. Wahl.

Ultima Thule; or, A Summer in Iceland. By Richard F. Burton.

Two Trips to Gorilla-Land and the Cataracts of the Congo. By Richard F. Burton.

The Hawaiian Archipelago. By Isabella Bird.

The Philippine Islands. By F. Jager.

A Walk in the Grisons. By the Rev. F. Barham Zincke.

The Land of the North Wind [Lapland]. By Edward Rae.

The Frosty Caucasus. By F. C. Grove.

Italian Alps. By D. W. Freshfield.

Two Years in Fiji. By L. Forbes.

Twelve Months in Madagascar. By Joseph Mullens, D.D.

Italy Revisited. By A. Gallenga.

MISCELLANEOUS.—The ninth edition of the Encyclopædia is to a large extent rewritten, especially in respect to matters of science. The change that has taken place since the issue of the previous edition, in almost every department of knowledge, is profoundly impressed by the comparison of articles in the two. "England and Russia in the East," by Sir Henry Rawlinson, discusses questions that may pass beyond the stage of argument sooner than so "practical" a people as the English will discover its imminence. Dr. Schleimann's "Troy and its Remains," besides the light shed by his discoveries on a question of ancient geography, opens a discussion on the question of an historical ground of the Homeric legend. "Speeches and Public Letters of the Liberator [O'Connell], with Preface and Historical Notes," by M. F. Cusack, recalls agitations that are as nearly forgotten as anything of Homeric origin. "International Vanities," by Theodore Marshall, is curious and interesting.

LONDON UNDERGROUND RAILWAY.
 —Brunel's famous Thames Tunnel, 1,300 feet long, was opened, although not for railway purposes, on the 25th of March, 1843. In 1863 a select committee of the House of Lords on Metropolitan Railway communication reported in favor of the construction of the East London line, as part of an outer circle of railway communication within the Metropolitan District. In the year 1865 the company obtained their act of corporation for the construction of a line of about eight miles in all, to form a junction with the Great Eastern Railway at or near Shoreditch, to pass thence, principally in tunnel, under the docks at Wapping, and through the Thames Tunnel to Rotherhithe, thence to junctions with the London & Brighton and the Southeastern Railways at their respective stations at Newcross. In December, 1869, the line was opened from the north end of the Thames Tunnel at Wapping to a junction with the Brighton line at Newcross. Other junctions with the lines on the south side are almost complete (September 18th), and the heavy works between the Wapping shaft and the junction with the Great Eastern are in a very advanced state. The curves and gradients are favorable, the quickest of the one being on a radius of fifteen chains, and the sharpest of the other a short length of one in sixty. The road is level under the docks, and then rises for a short length to Shadwell Station. The rails are to be double-headed, and of steel, weighing 75 lbs. to the yard. The heavy works on the north side from the Wapping shaft are completed, including the covered way under the dock-basin. They are of pretty much the same character as the works of the Thames Tunnel, separate up-and-down lines, with a four foot six inch wall between. The arches are of the ordinary horseshoe shape built with seven rings of brick, and are surrounded with three feet of puddled clay. They have also inverts of brick or concrete. The height of the arches from the rail-level to the crown of the arch is twenty feet, and the greatest width twenty-five feet. Much of the property required for the railway between the river and the dock-basin was of an inferior character, and was swept away, to the improvement of the locality. The most important works in underpinning are of the workhouse of St. George's-in-the-East, one of the London Dock warehouses, and of the piers under it, and of the groined arches forming the rum-vaults, which were carried down to the level of the railway foundations. Farther on the foundations of the Blackwall Railway viaduct were carried down to the London clay, to fifty feet below the original depth.

There will be a goods-station at Whitechapel, on the north side of the main thoroughfare, where the rail-level is as near the surface as it can be without altering the levels of important thoroughfares. There will be a goods-station at Shadwell also.

The most interesting engineering exploit on

the section is the covered way under the London Dock eastern basin. Operations were carried on, in the first instance, from the surface, and consisted in dredging trenches in the bottom of the dock until the London clay was reached. The next process was the driving of the piles, clean-squared, and driven as closely jointed as possible. These are about fourteen inches on the side, and about a minimum of forty feet long. Fourteen steam pile-drivers were employed in sending them home. There are two rows of coupled piles outward toward the dock, and one row on the inside toward the railway works. These, placed at four feet six inches apart inside, and the clay-puddle hard-rammed between the two wooden walls, are the coffer-dams for the protection of the workmen in constructing the covered way under the dock-basin. Some idea of the resistant powers that had to be provided in the construction of the works, as well as for their enduring power, may be formed from the statement that the ordinary depth of water in the dock is twenty-one feet; under this is a bed of three feet of clay-puddle, followed by four feet six inches of brickwork, being the crown of the arch, under which is the covered way, of about fifteen feet clear headway under the dock. In one part of the basin the water communication between one side and the other, and over the railway, has been restored. In the construction of these exceptionally heavy works at such low levels, of fifty feet to sixty feet below Trinity datum line, powerful mechanical appliances have been necessary, that have included twelve pumping-engines, working night and day; three of these, of fifty-six horse-power nominal, employed at the London Docks, are equal to lifting fifty feet, eight thousand gallons per minute. The whole of the water pumped is from the Thames, or from springs, not a drop percolating from the docks through the finished works. A large number of powerful steam-cranes have also been employed for lifting the excavated earth from the workings. Recently a million bricks have been used, and six hundred tons of Portland cement per week, besides a large quantity of blue-lias lime. The large quantity of puddled-clay required for the works has been brought from the neighborhood of Rochester, as the London clay is totally unsuited for puddling.

The engineering works of the East London line have been designed by Sir John Hawkshaw, as engineer-in-chief, Mr. W. Hunt being the resident engineer. Costly although the line has been (£500,000 per mile), its cost is much lower than that of any other metropolitan line, some of which have cost from £850,000 to more than £1,000,000 per mile.

The completion of the East London Railway will supply the missing link in the connection between railways separated by the Thames, and greatly facilitate intercourse between Middlesex and Essex, and Kent, Surrey, and Sussex, and Dover.

LOUISIANA. The second Congressional Committee to investigate affairs in Louisiana, consisting of Representatives George F. Hoar, of Massachusetts, William A. Wheeler, of New York, William P. Frye, of Maine, and Samuel S. Marshall, of Illinois, reached New Orleans and organized for their work on the 22d of January. They were in session at the St. Charles Hotel fourteen days, examining witnesses and receiving statements, and completed their labors and left for Washington on the 9th of February. Before they left, negotiations had been set on foot for an adjustment of the difficulties on the basis of an acquiescence in the government of Kellogg, and a submission of the claims of those members of the Legislature who had been excluded from seats to the Congressional Committee for their decision. Mr. Wheeler acted on the part of the committee, and the agreement was known as the "Wheeler adjustment." The negotiations originated with a caucus of the Conservative members of the Legislature, held on the 23d of January, at which these resolutions were adopted:

Resolved, By this House caucus, composed of the Conservative members returned by the Returning Board and those claiming to have been undoubtedly elected but defrauded by the board, That, desiring in the interest of our afflicted State to have a solution of our political troubles, and relying on the integrity and fairness of the four gentlemen members of the Congressional Committee now in New Orleans, and in advance of any investigation on their part, we, as a body, hereby ask them, if the task is not considered too onerous, to take the returns of the election of 1874, together with all fair and relevant testimony, and upon such returns and evidence declare what members of the Legislature were fairly elected.

Resolved, That Hon. Louis A. Wiltz, Speaker of the House, be requested to wait upon said gentlemen and present to them a copy of this resolution.

There were various consultations between the committee and prominent Conservatives; and finally, in response to the resolutions of the caucus, the following plan of adjustment was submitted by Mr. Wheeler:

Whereas, It is desirable to adjust the difficulties growing out of the general election in this State in 1872; the action of the Returning Board in declaring and promulgating the results of the general election in the month of November last and the organization of the House of Representatives on the 4th of January last; such adjustment being deemed necessary to the reestablishment of peace and order in the State:

Now, therefore, the undersigned members of the Conservative party, and claiming to have been elected members of the House of Representatives, and that their certificates of election have been illegally withheld by the Returning Board, hereby severally agree to submit their claims to seats in the House of Representatives to the award and arbitrament of George F. Hoar, William A. Wheeler, William P. Frye, and Samuel S. Marshall, members of the Congressional Committee now in New Orleans, who are hereby authorized to examine and determine the same upon the equities of the several cases; and when such award shall be made we hereby severally agree to abide by the same, and such of us as may become members of the House of Representatives under this arrangement hereby severally agree to

sustain, by our influence and votes, the joint resolution hereinafter set forth. And the undersigned, claiming to have been elected Senators from the Eighth and Twenty-second Senatorial Districts, hereby agree to submit their claims to the foregoing award and arbitrament, and in all respects to abide the results of the same; and the undersigned holding certificates of election from the Returning Board hereby severally agree that, upon the coming in of the award of the foregoing arbitrators, they will, when the same shall have been ratified by the report of the Committee on Elections and Qualifications of the body in session at the State-House, claiming to be the House of Representatives, attend the sittings of said House for the purpose of adopting said report, and if said report shall be adopted and the members embraced in the foregoing report shall be seated, then the undersigned severally agree that immediately upon the adoption of said report they will vote for the following resolution:

Whereas, Doubts have existed, and still exist, as to the legal results of the election in this State in the month of November, 1872; and—

Whereas, It is alleged, and by a large portion of this State believed, that the result of the election for members of the House of Representatives and for Treasurer, in the month of November last, was illegally determined and promulgated by the Returning Board; and—

Whereas, These doubts, allegations, and belief, have tended greatly to disturb the public mind and unsettle confidence and injuriously to affect the material interests of the State; and—

Whereas, It is deemed necessary to the welfare of the State that an adjustment of the foregoing difficulties should be effected: therefore be it hereby

Resolved by the General Assembly of the State of Louisiana, That said Assembly, without approving the same, will not disturb the present State government, claiming to have been elected in 1872, known as the Kellogg government, or seek to impeach the Governor for any past official acts, and that henceforth it will accord to said Governor all necessary and legitimate support in maintaining the laws and in advancing the peace and prosperity of the people of this State; and that the House of Representatives as to its members, as constituted under the award of George F. Hoar, William A. Wheeler, William P. Frye, and Samuel S. Marshall, shall remain without change, except by resignation or death of members, until a new general election; and that the Senate as herein recognized shall also remain unchanged, except so far as that body may itself make changes on contests.

This was agreed to in a caucus of the Conservative members by a vote of 89 to 27, and the following conditions were appended by consent of both sides:

1. That the Conservatives were not to be bound by their acceptance unless the propositions were also accepted by the Republicans, and satisfactory guarantees given.

2. That the Congressional Committee, or Judge Wheeler, should remain in New Orleans for the purpose of having the adjustment practically effected.

The proposition had been accepted by the caucus on the 5th of February; and on the 6th, when the fact was known, but the exact terms of the adjustment had not been published, there was a public demonstration in New Orleans against its acceptance, and the act of the caucus was formally denounced. The excitement continued next day, when the adjustment was published. On the 8th another caucus was held for the purpose of reconsideration. There was a long discussion, but the former

vote was not rescinded. A new proposition was drawn up, however, and adopted by a vote of 59 to 7, which ran as follows:

1. The election of 1872, now before Congress, not to be included in the adjustment.
2. The election of Treasurer and members of the General Assembly in 1874 to be submitted to Messrs. Hoar, Wheeler, Frye, and Marshall. It being distinctly understood that those returned both by the Returning Board and the Conservative Committee to be accepted as legally elected.
3. The House of Representatives to be organized *de novo* on the basis of the committee's award.
4. The House of Representatives when organized to send to W. P. Kellogg, acting Governor, and to the Senate, as constituted by award of the committee, a message, informing them that the House is organized and ready to proceed to business.
5. The Conservative members to sign an agreement that, while not approving or recognizing the legality of the government known as the Kellogg government, we agree not to disturb the Executive, because of his past political acts, so long as he is sustained by the President.
6. Members of the House of Representatives returned by arbitration not to be changed except by death, resignation, or expulsion for just cause.
7. The Senators returned by arbitration to be seated.

This was handed to Mr. Wheeler just as the committee was leaving by the railroad-train on the morning of the 9th. He telegraphed back from Mobile, "Propositions not accepted." The negotiations were then transferred to Washington. A committee of the Conservatives, consisting of E. A. Burke, F. C. Zacharie, and A. H. Leonard, proceeded to that city, to endeavor to obtain some modification of the adjustment submitted by Mr. Wheeler, which would make it more acceptable to the people of Louisiana. In this they failed, and reported to a caucus of the Conservative members early in March that these were the best terms that could be obtained and recommended their acceptance. Mr. Wheeler required that the adjustment be signed by the members of the caucus and forwarded to him. A committee was appointed to obtain the signatures, and the agreement was signed by forty-four Conservative members and sent to Washington. The Congressional Committee immediately entered upon the task of arbitration and award in the cases of those claiming seats in the Legislature, from which they had been excluded. To make the adjustment effectual, Mr. Wheeler undertook to secure an extra session of the Legislature, the body sustained by General Sheridan having adjourned. Meantime the national House of Representatives had adopted resolutions recognizing Kellogg as the Governor of Louisiana, and afterward, on the 20th of March, the Senate, then holding an extra session, adopted the following by a vote of 28 to 25:

Resolved, That the action of the President in protecting the government of Louisiana of which W. P. Kellogg is the Executive, and the people of that State against domestic violence, and enforcing the laws of the United States, is approved.

Governor Kellogg issued a proclamation on the 24th of March, summoning the Legislature

to convene in extra session on the 14th of April, and limiting its sittings to ten days. The following objects of legislation were specified to take precedence of all other business:

1. Joint resolution in relation to the adjustment of the political difficulties heretofore existing in this State.
2. Revenues of the State and the mode of collecting and disbursing the same.
3. Amendment of the funding law with respect to the number of members composing the funding board, and with respect to the manner of preventing the funding of illegal obligations of the State.
4. Revenues, financial condition, and government of the city of New Orleans.
5. Relief of the commerce of New Orleans from excessive port charges, fees, etc.
6. To consider the incorporation of the Board of Trade of New Orleans.

On the first day of the extra session the case of twelve persons who claimed to have been elected to the House, but who had been excluded by the Returning Board, was referred to the Committee on Elections and Qualifications. The next day the committee reported in favor of admitting them to seats, in place of those to whom they had been awarded by the Returning Board. This action was in accordance with the award made by the Congressional Committee. The report was adopted by a vote of 89 to 15. The resolution forming a part of the Wheeler adjustment was next passed in the House by a vote of 89 to 18. On the third day of the session Mr. Wiltz withdrew as a candidate for Speaker, Mr. Hahn vacated the chair, and Mr. Estilette, a Conservative, was chosen to preside over the House. All the Conservative members had taken their places, and both branches of the Legislature proceeded to the work before them.

The legislation of the two sessions was of little general importance, being confined chiefly to appropriations, and the relief of tax-payers. The annual expenditures for the Metropolitan Police were reduced from \$600,000 to \$490,000. A bill for the relief of delinquent tax-payers remitted all penalties for non-payment in case the taxes were paid by the 1st November; and where they were levied on lands that were overflowed in 1874, until December 1st was allowed for payment without penalties. A bill which made all valid warrants, scrip, and bonds of the State, receivable for taxes due prior to 1875, was vetoed by the Governor, on the ground that it would be a diversion of the taxes from the funds to which they were pledged, for the purpose of paying certain outstanding obligations, and further, because some of the warrants being depreciated, it would be a virtual remission of a portion of the taxes and a premium on delinquency. The general appropriation bill passed at the regular session was found to have been changed in many of its items, after receiving the signatures of the presiding officers of the two Houses. An injunction was accordingly granted by the Superior District Court, restraining payment of certain specified items.

At the regular session, or that of the "Hahn Legislature," a joint committee had been appointed to investigate the accounts of the Auditor and Treasurer. A report was made during the extra session exonerating the Treasurer, but charging the Auditor with keeping his accounts in a confused and irregular manner, issuing warrants for fraudulent claims, distributing money among the various funds in an arbitrary and unauthorized way, and not properly accounting for considerable sums which had come into his hands. The committee recommended that "Charles Clinton, Auditor of Public Accounts, of the State of Louisiana, be impeached for high crimes and misdemeanors." A resolution to this effect was adopted, the proper committees were appointed, and a concurrent resolution passed the House suspending the Auditor, pending his trial before the Senate. He was not brought to trial, however, and the subject was disposed of by the adoption of the following resolutions:

Whereas, At the regular session of 1875, the General Assembly of the State of Louisiana appointed a joint committee to examine the books, accounts, vouchers, and other official documents in the office of the Auditor of Public Accounts; and—

Whereas, Said joint committee have made at this present session a full and detailed report of their said examination to both Houses of the General Assembly; and—

Whereas, The said committee have made an unfavorable report, and found that the said Auditor of Public Accounts, to wit, Charles Clinton, has not performed the duties required of him by law, and that he has been guilty of high crimes and misdemeanors in office; and—

Whereas, Said report has been duly approved by both Houses of the General Assembly, it is therefore ordered by the Senate and House of Representatives of the State of Louisiana, in General Assembly convened, that the Governor be, and he is hereby, directed to cause suit to be brought against Charles Clinton on his official bond as Auditor of the State, and to cause the said Charles Clinton to be prosecuted for a misdemeanor.

Suit was accordingly brought by the Governor in the Superior District Court, before Judge Hawkins. The charges against the Auditor were eleven in number, including the retention in his possession for some months of moneys paid by collectors, instead of turning them over to the Treasurer as required by law, misapplying money belonging to the school and other funds, and illegally issuing warrants for the payment of claims for which no appropriations had been made. The trial began on the 18th of June, and, after continuing five days, and the evidence being all in, the court decided to leave the question open until November, before hearing the arguments. A criminal indictment was also found against Mr. Clinton at the June term of the Superior Criminal Court. In this he was charged with misdemeanor in refusing to issue a warrant when required by law, and in taking \$2,000 from the special loan fund and crediting it to the general fund; with extortion in corruptly receiving a fee of \$1,000 for issuing a certain warrant, and with

embezzlement of \$20,000 of the public money. His trial on this indictment resulted in a disagreement of the jury on the 8d of July. On the 21st of July Mr. Clinton tendered his resignation of the office of Auditor, to take effect on the 15th of December.

In accepting his resignation, Governor Kellogg wrote:

I desire to state that though in the discharge of my official duty I ordered investigation to be made into your accounts, and directed the law officers of the State to prosecute the charges preferred against you, I have never for one moment believed you to have been personally guilty of dishonesty or corruption in the administration of your office. Before the experts made their report I had examined into many of the charges urged against you, and was satisfied they were for the most part groundless. The official report of the experts, whose capacity and disinterestedness no one can doubt, and especially the views and information with regard to yourself conveyed to me personally by these gentlemen, together with the testimony adduced in the civil and criminal cases recently tried, have only confirmed my previous opinion. You have had very difficult duties to discharge. Under the extraordinary circumstances surrounding your office during the past few years, it would have been almost impossible for any one to fill your position without incurring hostility. Possibly a greater amount of political experience and tact might have enabled you to avoid some of the antagonism and difficulties you encountered, but I have not failed to recognize the fact that your official acts have been mainly actuated by a singleness of purpose to serve the interests of the State.

The committee of experts alluded to was appointed by the Governor for the purpose of examining the books and accounts of the Auditor. They found these very imperfectly kept and containing many errors, but not such as to impeach the integrity of the Auditor. Many of the discrepancies were due to clerical carelessness and the lack of systematic book-keeping. The interception of money, and its use in buying up depreciated warrants, were declared to be a benefit to the State, whether strictly legal or not, and in no way to the personal profit of the Auditor. The division of funds was also declared to have been intended for the public interest where payments on behalf of certain funds were required, and the special resources to meet them were wanting on account of delays in the collection of taxes. The conclusion appeared to be that while there were much looseness and carelessness in the Auditor's accounts, and wide discretion had been exercised by him in the performance of his duties, there was no evidence of intentional fraud or criminality.

No formal action was taken by the political parties of the State during the year. The Democratic and Conservative State Central Committee, however, held a meeting in October for the purpose of calling a State Convention of the party. After some discussion as to whether it should be in December, January, or February, the following was finally adopted:

Resolved, That, without reference to past party affiliations, all who are now opposed to radicalism in

Louisiana, and to the present usurpatory State government, are earnestly invited to cooperate for the purpose of holding a State Convention at New Orleans on the first Wednesday of January, 1876.

Resolved, That in making said call this committee disclaims any intention to revive the question of the Wheeler adjustment, so far as it has fixed the status of the present House of Representatives.

The following resolutions were also unanimously adopted by the committee:

Resolved, That it is the sense of the Democratic and Conservative people of the State that all constitutional means should be taken, both in the Senate and House of Representatives in Congress, for the decision of the Louisiana question, and the recognition of the McEnery government.

Resolved, That these resolutions be forwarded to our members of Congress, to be submitted to both Houses of Congress.

The Democratic-Conservative Convention gathered at St. Patrick's Hall, New Orleans, January 5, 1876, and continued in session two days. The following platform was unanimously adopted:

Whereas, The usurpation of the government of the State of Louisiana, through the perversion of functions of the General Government, is an evil which weighs heavily on the people of this State, and while it is a constant menace to the perpetuity of representative institutions; and the Federal Congress, whose duty it is to guarantee to the several States a republican form of government, cannot ignore the present condition of despotism and anarchy, so detrimental to the material interests of Louisiana;

Whereas, The Wheeler adjustment had no reference whatever to the elections of November, 1872; nor did it ever extend to all the contested elections of November, 1874; but was expressly limited to the investigation of seventeen contested seats in the House of Representatives, and to two contested seats in the Senate, among the newly-elected Senators;

Whereas, The said adjustment never pretended to ascertain or determine anything beyond the status of these contested seats of the General Assembly, and inasmuch as the powers of the Legislature are strictly defined and limited by constitutional provisions, and it was not competent for them to submit to arbitration the conflicting claims of the rival State governments, and as those who supported said adjustment never intended or contemplated that, by any possibility, said adjustment should embrace any question beyond that of the contested seats in the Legislature;

Whereas, The radical party of Louisiana, at whose promptings the said usurpation has been foisted upon this State, has devised the most comprehensive system of measures, through iniquitous election and registration laws, arbitrary Returning Board with unlimited prerogatives, and through fraudulent census returns, measures devised for the purpose of perpetuating the existence of this usurpation, with which it is thoroughly identified; and

Whereas, The said usurpatory government has never been acknowledged by the people of Louisiana: and it does not maintain its precarious tenure of power with their consent or willing support:

Be it resolved by the Democratic-Conservative party of the State of Louisiana, in convention assembled—

1. That the memorial of the people of Louisiana, praying for relief at the hands of Congress, be again presented for their consideration by our Representatives in Congress.

2. That the primary test of membership of the Democratic-Conservative party of Louisiana is an unrelenting opposition of the usurpation, and, without regard to past political affiliations, all those who

join in the crusade against the usurpation are in full fellowship in the party.

3. That we advocate the abolition of useless offices, more especially those of tax-collectors, which offices should be remitted to the sheriffs, and a reduction of salaries, fees, and perquisites of office, and a vigorous retrenchment in the expenses of the various departments of the city and State governments.

4. We advocate a substantial reduction of taxation, State and municipal, and, while we are in favor of meeting punctually the payment of the legitimate debt of Louisiana, we are immovably opposed to the recognition of the dishonest and fraudulent obligations, issued in the name of the State; and we pledge ourselves to make a searching investigation in the matter.

5. We advocate the reduction of the exorbitant appropriations for public printing and metropolitan police purposes, and demand that the whole system of police and public printing be remodeled.

6. We declare our hearty opposition to all monopolies whatever.

7. We recognize and reaffirm the democratic doctrine that gold and silver be the legal currency, and favor a return to a specie basis as soon as it can be done without injury to the material interests of the country.

The memorial to Congress, which was adopted, sets out with several assumptions. It is assumed that "it has been established before both Houses of Congress that the acting government in the State of Louisiana is a usurpation; that the individuals personating it were never elected by the people of the State, but, on the contrary, were unquestionably defeated at the elections held for the offices which they fill in 1872 and 1874." It is further assumed as equally well established that the lawfully-elected Governor and other State officers, and some of the Senators, Representatives, and local officers, "were and are excluded from said official positions by the unlawful interference of the Federal authority, through its courts, and through its military power." It is also assumed as established "that the right of the people to elect their officers and representatives has been taken from them, and vested in a partisan State Returning Board of five members, chosen by the usurping State Senate, and having the power within itself to fill vacancies that may occur in its membership;" and it is finally assumed that "it has been demonstrated that this usurpation can exist only as it is supported by the military power of the Federal Government." It is then declared that the people did not, by the acceptance of the Wheeler adjustment, acquiesce in the "usurpation," for the following reasons:

1. Because the people of Louisiana did not submit, for the adjudication of the Wheeler committee, their constitutional right of self-government.

2. Because the persons who submitted their claims to seats in the State Legislature to the decision of the Wheeler committee, never submitted, nor intended to submit, the conflicting claims between the lawfully-elected McEnery government and the usurpation, and said latter claims are not covered by, and embraced in, the award of said committee.

3. That the rival claims of the *de jure* and *de facto* State governments were never submitted to said committee, and said committee, in their official report, expressly state that their investigations were restricted to the legislative difficulties of 1874 and

1875, and that they took no evidence in regard to the election of 1872.

4. That on its face the Wheeler adjustment expressly withholds any approval of the Kellogg government, and it does not and cannot bind the people's lawfully-elected, but excluded, Governor, officers, and Senators, nor the people themselves, who were not parties to the Wheeler resolution, nor prevent their appeal to the General Government for the guarantee of a republican form of government.

The following declaration is then made:

And now, speaking for themselves, the people of the State of Louisiana do solemnly affirm that they have not acquiesced, and never will acquiesce, in the Kellogg usurpation; that it is as repugnant to their wishes, and interests, and sense of justice, as it was on the day of its lawless establishment over them by force; that they recognize as the only government elected by the people of the State, as the only government entitled to their support, respect, or confidence, that of which John McEnery and D. B. Penn are the official heads; and they affirm that they have been patient and silent since the adjournment of the last Congress, in the hope and belief that the present Congress would listen to their grievances and grant the proper relief.

This is not only their right, but, under the positive direction of the Constitution, it is the duty of the General Government to guarantee to Louisiana, as a State in the Union, the government of its choice, and thereby a republican form of government.

And the people of Louisiana do solemnly swear that they will not abandon their struggle for the right of self-government. In urging this right they feel that they discharge a duty not only to their own self-respect, to themselves, and to their children, but also a duty to the Constitution, to the Union, and to every State of the Union, whose rights and liberties have been overthrown, violated, and trampled upon, by and through the outrages heaped upon the State of Louisiana.

The memorial closes with this appeal:

To you, the President and Representatives of the States and of the people of the Union, we, the people of the State of Louisiana, do present our grievances, and ask you—in the name of our common country, in the name of our common civilization, in the name of the sacred memories that cluster around this centennial year, in the name of liberty and of justice—that you blot from our national history this shameful record of usurpation and of crime committed against our State, and permit it no longer to remain a precedent for the overthrow of other States.

And this we urge, not only that we may be released from the grasp of the lawless usurpation, but that, as a people, we may present to the nations of the earth the spectacle of a republic, perfect, not only in form, but breathing the spirit of democratic government through all of its members.

The convention chose four delegates at large to the National Democratic Convention, and authorized the congressional delegates to select their candidates, the choice being ratified in advance by the convention.

At the beginning of the year 1873, the bonded and floating debt of Louisiana amounted to \$24,093,407.90, and contingent liabilities had been incurred to the amount of \$21,090,500. The latter consisted chiefly of bonds authorized in aid of public works and improvements. The bonds were never issued, and the constitutional amendments and funding act of 1874 swept away this whole mass of contingent liabilities, and prohibited their revival "in any form or

under any pretext." At the beginning of 1874 there was a total bonded debt of \$22,480,800, and a floating debt of \$1,790,758.80. On the 1st of January, 1875, the bonded debt amounted to \$21,978,954.96, and the floating debt was \$1,857,705.86, making a total of \$23,336,660.82. During the year \$9,804,400 of the old bonds were funded, and \$5,882,640 of new consolidated bonds issued; \$582,477.75 of old warrants were funded in \$349,486.65 of new bonds, and \$104,400.53 of past-due coupons were funded in \$65,762.31 of new bonds. This made the total bonded debt January 1, 1876, \$18,472,448.92. There was also a floating debt of \$592,201.33, consisting of warrants and certificates of indebtedness, issued prior to 1875. Thus the total indebtedness of the State at the beginning of 1876 was \$19,061,645.25. The expenditures of the year, up to December 20th, were \$2,955,645.08. The validity of several series of the State bonds was called in question by the supplemental funding act passed at the extra session of the Legislature, and it was provided that these bonds should not be funded until their validity was affirmed by the Supreme Court. In some cases this has been done, and others are still pending. After all old bonds and outstanding warrants have been funded, the consolidated debt of the State will not exceed \$14,015,182.51, and its increase is prohibited by the amendments of the constitution.

The finances of the city of New Orleans are in a very unsatisfactory condition. For several years the annual expenses have exceeded the income, and a debt of \$23,288,900.80 has been accumulated. Delinquent taxes are due to the amount of \$2,352,175.66 levied during the past six years. The estimated revenues of the city for the current year amount to \$2,349,182.72, and the expenses to be provided for are such as to leave a deficiency of \$1,398,770 for 1876 alone, while including that of 1875 would raise it to \$2,693,777. The taxable value of real and personal property in the city is \$124,582,002. The State valuation of property in the city is \$135,000,000. The State tax is fourteen and a half mills to the dollar, or nearly one and a half per cent., and the city tax is nearly twice as much.

Judge Durell, of the United States District Court for the District of Louisiana, having resigned during the session of Congress, the President appointed Don A. Pardie as his successor, but the Senate after considerable discussion refused to confirm the appointment. No one else was named, and the position was vacant throughout the rest of the year.

Mr. P. B. S. Pinchback, who was elected to the United States Senate, by the body known as the Kellogg Legislature, in 1873, and again by the "Hahn Legislature," at the "regular session" of 1875, has not yet (February 1, 1876) been admitted to a seat. Mr. W. L. McMillen, who had been chosen by the "McEnery Legislature," in 1873, and had claimed the seat, withdrew his credentials at the be-

ginning of the sessions of 1875-'76, on the ground that by the adjustment accepted by the Legislature, and the admission of representatives whose credentials were signed by Kellogg, the issues represented by him had been substantially determined by parties and causes outside of and above his control, and the conservative people of the State and nation through their representatives had recognized the permanency of the existing State government, so that a further contest could have "no practically beneficial result for the people of the State, but might serve to aggravate evils it would be powerless to relieve."

LUTHERANS. The following are the statistics of the different bodies of the Evangelical Lutheran Church in North America, as given in the *Church Almanac*, published at the Lutheran Bookstore (General Council), Philadelphia, for 1876:

The *Church Almanac* gives a list of three theological seminaries connected with the General Council: The Theological Seminary of the Evangelical Lutheran Church, Philadelphia, 47 students; Theological Department Augustana College, Rock Island, Ill., 18 students; Wartburg Seminary, Mendota, Ill., 32 students; two connected with the Synodical Conference: Concordia Theological Seminary, Theoretical Department, St. Louis, Mo., 83 students; Practical Department, Springfield, Ill., 82 students—in all 170 students; Theological Department, Capital University, 32 students; one connected with the General Synod South: the Theological Seminary of the Evangelical Lutheran Church, Salem, Va., 11 students; four connected with the General Synod North: the Theological Seminary of the General Synod, Gettysburg, Pa., 83 students; Theological Department of Hartwick Seminary, Hartwick, N. Y., 2 students; Theological Department of Wittenberg College, 24 students; Missionary Institute, Selinsgrove, Pa., 12 students; the Theological Department of North Carolina College, connected with the North Carolina Synod, 5 students; and the Augsburg Seminary, Minneapolis, Minn., connected with the Conference of the Norwegian-Danish Evangelical Lutheran Church.

The *Church Almanac* gives the names of four colleges connected with the Northern General Synod, of which three report 501 students; four connected with the Synodical Conference, reporting 689 students; two connected with the General Synod South, reporting 271 students; five connected with the General Council, reporting 457 students; one connected with the North Carolina Synod, reporting 105 students; one connected with the Synod of Iowa, reporting 25 students; and one connected with the Buffalo Synod (Grabau's). The same work gives a list of fourteen classical schools and seven seminaries for young women.

Fifteen English, twenty-two German, one Danish, three Swedish, and four Norwegian

periodicals are published in the interests or under the auspices of the various branches of the Lutheran Church.

Fifteen orphans' houses, one deaf and dumb institute, four hospitals, four immigrants' missions, one immigrants' home, and one seamen's mission, are cared for by Lutheran Synodical organizations or Lutheran pastors.

The *General Synod* of the Evangelical Lutheran Church in the United States met at Baltimore, May 26th. The Rev. F. G. Stelling, D. D., of the East Pennsylvania Synod, was chosen president. The Treasurer of the Board of Foreign Missions reported that the receipts of the board for the past two years had been \$29,167.09, and its disbursements \$28,208.43, of which \$4,872.44 had gone toward the support of the African mission. The liabilities of the board amounted to \$1,800. The amount of money necessary to carry on the work of the board for the next two years was estimated at \$41,175. Five missionaries were employed in the missions at Guntur and Paland, India, and one at Uhlemberg, Africa. There were also connected with these missions three female missionaries, thirteen itinerant teachers, one Bible colporteur, one evangelist, and twelve school-teachers. During 1873 there had been a decrease of nearly seventy in the number of members in India. Reports for 1874 had not been received. The mission district of Guntur had been organized thirty-three years, and now had 781 members, one-half of whom were baptized children. The establishment of a permanent missionary in Japan was recommended by the board and approved by the Synod. The Children's Missionary Society, which was first organized at Baltimore, reported 21,186 members and 315 schools, and had collected \$5,831.08 of funds. The Board of Home Missions reported that their receipts from the Synod had been \$19,696.06, and their total receipts for two years \$26,227.01. They had had fifty-three missions under their care, none of which had become self-sustaining. The net gain of membership was estimated at 1,041, and of catechumens 1,611. The amount expended in the salaries of ministers had been \$21,908.60; in church property, \$35,608.07; contributed to home missions, \$868.14; to foreign missions, \$564.70; to church extension, \$570.87; for education, \$308.26; and for other objects, \$8,435.02. The receipts for the German Home Missions were reported to have amounted to \$951.44, and the expenditures to \$677.04. The board had been organized twenty-two months. The board asked the appropriation of \$17,000 a year, and the Synod determined to try to raise \$20,000 a year for each of the next two years. The full receipts of the Board of Church Extension for two years had been \$27,972, and the disbursements \$27,512. The Board of Publication reported its assets to be \$54,082.03, and its liabilities \$12,608.16. A proposition to change the character of the

board from that of an independent body to one dependent upon the General Synod was not accepted.

The General Synod of 1873 had, through its Committee on Ecclesiastical Correspondence, addressed communications to the other Evangelical Lutheran bodies in the United States, inviting an interchange of correspondence and of fraternal greetings with it, by an interchange of delegates. The General Council, which met later in the same year, declined to accept the plan of an interchange of delegates, as not adapted to bring about the closer relations and eventual union of the bodies which were sought, but proposed instead of it a *colloquium*, to be composed of commissioners appointed by the different bodies, which unreservedly accepted the unaltered Augsburg Confession, to meet from time to time for a comparison of views. To this proposition the following answer was adopted by the General Synod:

1. This General Synod appreciates the courtesies and fraternal spirit and words in which, while declining fraternal correspondence with this body, a colloquium on the points of doctrinal difference is proposed as a means by which a better understanding and unity may be brought about between the different parts of the Lutheran Church; and desires to assure the General Council of its readiness to co-operate in any and every way proper and practicable, affording promise of success in promoting that concord and fellowship in the Church to which the constitution and history of this body have committed it.

2. Inasmuch, however, as the doctrinal positions of the general bodies invited to concur in arranging for the colloquium are clearly defined and set forth in their constitution and official acts, by which alone they are willing to be judged, and that this body, especially, is fully and unmistakably settled in its adoption of the unaltered Augsburg Confession, a position which it entertained no idea of changing; we cannot see, either, any need of such colloquium between these different parts of our Church, as a necessary preparation for the mutual "recognition by each body of the position of the other" as Lutheran, or any advantage from it in the way of attaining a better understanding or interpretation of their doctrinal differences, since its members cannot interpret authoritatively those official utterances which state the relations of their respective bodies to the Augsburg Confession. We do not regard the proposed colloquium, in the present state of the Church, suited to promote the cause of peace and union, nor as an equivalent for the mutual recognition and fellowship implied in regular inter-synodical correspondence.

3. While, therefore, we decline to take part in the arrangements for the proposed colloquium, we reiterate our proposal for correspondence by accredited delegates, as the most fitting thing, in this respect, between these general bodies of our Lutheran Zion, and as promising most for the future unity of the Church.

A constitution for district synods, and for defining their relation to the General Synod, was adopted. Applications were received from the Synods of Nebraska and Maryland (German), and the Ansgari (Swedish) Synod, for admission to the General Synod, and were accepted.

The *National Lutheran Sunday-school Convention* (General Synod) met at Wooster, Ohio, October 27th. It continued three days in ses-

sion, and discussed a number of questions pertaining to the interests and management of Sunday-schools. Resolutions were adopted condemning the desecration of the Lord's Day "by railway and steamboat and street-car companies, by beer-saloons, by excursion-parties, by Sunday newspapers, post-office clerks, and government officials," and sanctioning the efforts that were being made for its better and more general observance; and protesting "against the use of money raised by public taxation, or pertaining to the people in common, whether by grant, loan, or subsidy, for the furtherance of the interests of any institution of education or charity controlled in whole or in part by any sect or denomination." It was decided that the convention should hereafter be held every two years. The district synods were invited to hold district conventions in the alternate years.

The annual meeting of the *Synodical Conference* of North America was held at Cleveland, Ohio, beginning July 14th. The most important business of the Conference was the discussion and adoption of the sixth, seventh, eighth, and ninth theses on church-fellowship, the theses previously numbered having been considered at former meetings of the Conference. The new theses are as follows:

VI. "From the nature and character of this orthodox confession (the Lutheran confession) it follows necessarily that the Church practice must be in harmony with it. For every ecclesiastical action is either an immediate expression of the confession, or it is one that dare not be in conflict with it."

VII. "From this necessary connection between the confession and the practice it logically follows that a truly Lutheran synod dare not unite to form one ecclesiastical body with another nominally Lutheran synod, in which the prevailing practice contradicts the confession."

VIII. "This contradiction may take place in various ways. It takes place, first, when a Lutheran ecclesiastical body, which expressly and emphatically adopts the symbolical books, still tolerates, or even sanctions and approves, exchange of pulpits with ministers who are not Lutherans, and fellowships at the altar with communicants who are not Lutherans, and which does not decidedly oppose every form of chiliasm."

IX. "This contradiction takes place, furthermore, when members of their congregations continue to be members of secret societies, and the respective pastors neither in a thorough manner bear public testimony against these societies in their preaching, clearly setting forth their antagonism to the Scriptures and to the faith, nor give that instruction and attention to the individual members of the lodge which a proper care for their souls requires."

The rest of the theses were laid over to the next year. The publication of an English primer, prepared by Pastor Lange, of Chicago, was ordered. Measures were taken toward the completion and publication of an English reader, by Prof. Selle, and toward the translation of the Biblical history of Zahn, as published at St. Louis. A mission among the Chinese in St. Louis, which had been partly supported by the Conference, was given up to the superintendence of its founders. The following reply was

made to the invitation of the General Council to take part in a colloquium of Lutheran Churches:

To the General Council of the Evangelical Lutheran Church of North America:

REV. BODY: Through your corresponding secretary, Pastor G. A. Wenzel, six resolutions touching the holding of a colloquium have been officially communicated to the Evangelical Lutheran Synodical Conference of North America. After mature deliberation, lasting through several sessions, the Synodical Conference came to an agreement, on the four following resolutions, which are hereby officially transmitted to you as a reply to your communication:

1. The Synodical Conference cheerfully declares its readiness to participate in the proposed free conference of such Lutherans as unqualifiedly hold to the Augustana, with the view of coming to an understanding.

2. The Synodical Conference, however, at the same time declares itself unable to acknowledge in advance such bodies whose members may participate in such a conference as bodies which unqualifiedly accept the Augustana.

3. The Synodical Conference leaves to the Reverend General Council the necessary arrangements as to the time and place of the proposed conference.

4. The Synodical Conference suggests that those individuals who may appear as participants in the proposed conference shall themselves determine the manner in which it is to be conducted.

In the name of and by the authority of the Evangelical Lutheran Synodical Conference:

W. LEHMAN, President.

E. JOH. GROSSE, Secretary.

A committee was appointed to draw up a plan for the division of the synods according to State boundaries. St. Paul, Minn., was chosen as the place for the next meeting of the Conference.

The *General Council* of the Evangelical Lutheran Church met at Galesburg, Ill., October 7th. The Rev. C. P. Krauth, D. D., LL. D., was chosen president. The replies of the different Lutheran bodies in the United States to the invitation of a previous General Council to participate in the holding of a colloquium for the comparison of views, and other papers relating to the subject, were referred to a committee. The committee presented the following report, and it was adopted:

Your committee report the invitation issued by the General Council at its meeting in Erie, 1873, has been officially responded to by the following bodies, viz.: The Southern General Synod, the Synod of North Carolina, the Holston Synod, and the Synod of Tennessee, which bodies have appointed committees of arrangements to act with the committee appointed by the General Council; also from the Synodical Conference. . . . The above responses to the invitation of the General Council make it evident that it is the desire of a large portion of the Church that the colloquium shall be held. Your committee recommend that the Committee of Arrangements appointed by the General Council, in connection with the committees appointed by the other bodies, proceed at once to make all the necessary arrangements for holding the colloquium under the resolution of their appointment, with the understanding that those who attend, or the participants in the colloquium, shall themselves determine the manner in which it shall be conducted.

The following resolution on the subject of communion and fellowship was adopted:

The General Council expresses its sincere gratification at the progress of a truer Lutheran practice in the different synods since its action on communion, and interchange of pulpits with those not of our Church, as well as the clear testimony in reference to those subjects so lately officially expressed by the Augustana Synod. We nevertheless hereby renewedly call the attention of our pastors and churches to the principles involved in that testimony, in the earnest hope that our practice may be conformed to our united and deliberate testimony on this subject, viz.: The rule which accords to the word of God and the confessions of the Church is, *Lutheran pulpits for Lutheran ministers only; Lutheran altars for Lutheran communicants only.*

In regard to this action the President of the Council made an official declaration to the effect that the sole change made by it is that it declares whence the rule is got, to wit:

Out of the word of God and the confession of our Church. It only makes explicit what was implied before. And in the practical application of it, all pretense that the rule is only a human rule, or rule of order, is precluded.

The Treasurer reported that the receipts on account of foreign missions had been \$3,385.13, and the expenditures on the same account, \$2,971.66. From the report of the Executive Committee on Foreign Missions, it appeared that two missionaries had been in the field in India during the year, and that failing health made it probable that they might be obliged to quit the mission. The mission was, however, in a flourishing condition. The sum of \$3,655 had been spent upon it. The Synod invited the attention of the district synod to the need of enlarging the mission.

The subject of encouraging, organizing, and sustaining young men's societies in the Church was recommended to the favorable attention of the district synods. A report of a Committee on the Constitution and By-Laws of the Lutheran Mission and Church-Extension Society was approved.

The Committee on the New York Immigrant Mission were instructed to connect the work of their missionary with the Immigrant Home.

The Executive Committee on Home Missions reported that the missions at Chicago, Ill.; Columbus, Ohio; Vandalia, Ill.; Chattanooga, Tenn.; and Atlanta, Ga., were in a flourishing condition. The sum of \$34,200 had been spent in the support of the missions during the year. Lack of funds had prevented the committee from extending aid to many places which sought it. Reports were made of the mission-work which was carried on by several district synods. The Pennsylvania Synod had supported 22 missions; the New York Ministerium, 14; the Pittsburg Synod, 14; and the Swedish Augustana and Ohio Synods had each done much work within their respective bounds. Other synods had not been heard from. A change in the constitution was agreed upon, to provide that the General Council shall meet every three years.

An extraordinary conference of delegates of the different German church governments was

held at Eisenach, in September, to consider what course to pursue in reference to the new marriage act, which was to take effect January 1, 1876. It was agreed—1. That the Church must recognize the validity of civil marriage, and should therefore eliminate from the ritual such parts of the former as involve the idea that marriage is contracted in a church; and, 2. That the changes should be made with the utmost precaution, so as not to hurt the religious condition of the people.

The Conference of the Lutherans of Germany was held at Berlin, October 7th and 8th. About 600 pastors and 200 laymen were present. Especial attention was given to the discussion of the new civil marriage act. The Conference agreed that, the state having separated itself from the Church in this matter, the Church had regained her full liberty. She ought, therefore, to give her blessing to a marriage only when it was in accordance with Holy Scripture; she ought also to exclude from her ordinances all those who neglect to have their marriage solemnized with a religious service. The Conference discussed the struggle of the state with the Roman Catholic Church. On this subject it disclaimed all sympathy with the Roman Catholic Church, but at the same time affirmed that the tendency of the Liberal party was directed against all religion, therefore equally against the Protestant Church; and that any sympathy with that side was just as impossible as with its adversary.

LYCURGUS, ALEXANDER, Archbishop of Syra and Tinos, died October 29, 1875. He was a native of Tarsus, Cilicia. He went to the University of Halle to finish his studies, where he was a pupil of the distinguished Dr. A. Tholuk. Upon the occasion of his visit to England in 1870, he received the honorary degrees of D. D. from Oxford, and LL. D. from Cambridge. He was Vice-President of the Sacred Synod of Greece, and his archiepiscopal see embraced Syra, Tinos, Melos, and Delos. At the Union Conferences of the Old Catholic, Eastern, and Anglican Churches, held at Bonn, in 1874 and 1875, he was one of the most prominent representatives of the Greek Church.

LYELL, Sir CHARLES, a British geologist, was born at Kinnordy, Scotland, November 14, 1797; died at London, February 23, 1875. He graduated at Oxford, and, having practised law for a short time, he turned his attention to geology. In 1831 he was appointed a professor in King's College. In the following years he traveled through France, Germany, and Italy. His first work of importance was his "Principles of Geology" (3 vols., London, 1830-'33), which was followed in 1838 by the "Elements of Geology." In the edition of 1851, the "Elements" appeared with the title of "Manual of Elementary Geology," which was again changed in 1870 into "Student's Manual of Geology." In 1841-'42 he visited the United States on a lecturing tour. During this journey he gathered a vast amount of information,

which he presented in "Travels in North America in the Years 1841-'42" (2 vols., London, 1845). In 1845 he paid a second visit to the United States, traveling chiefly through the South, which he described in the work, "A Second Visit to the United States" (2 vols., London, 1849). His next visit to the United States, in 1852, was of too short duration to be of any importance. In the following year he was appointed on the British Commission to the Industrial Exhibition in New York. He also wrote "Geological Evidences of the Antiquity of Man" (London, 1868). He was elected President of the Geological Society in 1836, and again in 1850; was knighted in 1848; created a baronet in 1864, and in 1855 received the degree of D. C. L. from Oxford. The following extracts from an article of the eminent geologist, Prof. B. von Cotta, in the *Leipsic Illustrirte Zeitung*, of March 20, 1875, refer to the merits of Lyell in behalf of geological science:

In the early part of the century a bitter struggle was going on between the Neptunists and the Volcanists. When Lyell entered upon the scene the victory had been decided in favor of the latter, particularly as far as they maintained the difference between volcanic and Plutonic as put forth by Hutton. But all parties were still governed by many prejudices, as they regarded the prehistoric world as an epoch completely finished and independent of all others, for which an entirely different measure of the forces of Nature and their effects was to be applied from that observed at present. In consequence the most extravagant hypotheses were brought forward. Sudden and terrible floods were supposed to have devastated large areas; high mountains and entire mountain-ranges were said to have been created by momentary risings, erratic blocks were thought to have been scattered by the explosion of gases, and climatic changes to have occurred without any known cause. Some attempted to account for these presumed changes by imagining comets to have crossed the earth's orbit, and caused a divergence of its axis. The prehistoric times were divided into different periods, each one of which was supposed to represent a creation to a certain degree independent, and which were separated from each other by terrible catastrophes, destroying everything in existence at the time. It was Charles Lyell who first successfully opposed this violent geological method, after a similar attempt of Von Hoff, in Germany, had remained almost entirely unnoticed. Lyell showed that the causes now at work sufficed to explain the inner and outer construction of the earth, provided that they repeated themselves often enough in unmeasurably large spaces of time, and their results were added together; that is, he put in place of unaccountable forces, unmeasured time. This new theory, although bitterly opposed at first, gained ground with sur-

prising rapidity, and is at present accepted with its more general features by all geologists of note. This theory was in decided opposition to the geological doctrines prevailing at that time. It was clearly connected with the theories of Darwin, who, as a geologist, himself a pupil of Lyell, explains the creation of organic species by a slow transformation. Lyell's new theory was supported by a number of special observations and inferences made from them, of which a few are brought forward as examples. The advocates of the theory of "elevation craters" alleged, in support of their hypothesis, that streams of lava could never congeal into a solid, compact mass on hills having an inclination of more than 5°. Consequently, whenever they found, in a volcanic mountain, sheets of stony materials inclined at greater angles than these, they thought themselves warranted in assuming that such rocks had been originally horizontal or very slightly inclined, and had acquired their high inclination by subsequent upheaval. To a certain class of mountains exhibiting such formations they gave the name of "elevation craters." Lyell, however, showed that at Mount Vesuvius, Mount Etna, and on the Canary Islands, lava had flowed down slopes of an inclination of 45°, and had nevertheless solidified compactly. He also pointed out that these so-called elevation craters were in most cases the truncated remains of cones of eruption, which had been thrown up by paroxysmal explosions. The gradual retreat of the Niagara Falls up the stream, producing in the course of ages the gorge between the Falls and Queenstown, already clearly proved and verified by careful personal examination, served him as a good example of the manner in which deep and broad ravines are formed by the slow action of running water. From a careful study of the tertiary formations and their petrefactions, in France, Belgium, and England, Lyell reached the conclusion that in the oldest strata of these formations the remains of molluscs of extinct and still existing species occur in unequal numbers, and that, going from the lowest strata upward, the ratio of the existing species to the extinct constantly increases; that is to say, that in the lowest, and consequently the oldest, of these strata are found almost exclusively the remains of extinct species, while the centre strata contain living and extinct in almost equal ratios, and the highest, that is, the latest, strata have almost exclusively fossils of still existing species. This important fact he used as a basis for the classification of the tertiary formations in general, according to the approximate number of existing or extinct species found in them, into three divisions or formations, which he called Eocene, Miocene, and Pliocene. This division has since then been accepted by all geologists, and has been in many instances, supplemented. It was, however, another striking illustration of his theory of the gradual and not the spontaneous geological changes of the earth. In his last work on the "Antiquity of Man," Lyell gave numerous proofs that human life has extended much farther back than was generally supposed. These researches are also closely connected with Darwin's theory of the origin of the organic species and of man.

M

MAINE. The fifty-fourth annual session of the Maine Legislature began at Augusta on the 6th of January, and came to a close on the 24th of February. The acts of a public character were few, and for the most part unimportant. Among those worthy of mention was a compulsory-education act, requiring par-

ents and guardians, and others having control of children between the ages of nine and fifteen years, to send them to a public school at least twelve weeks in each year, unless excused by the school-officers of the town on account of the mental or physical disability of such children, or unless taught at home or in private

schools. A penalty not exceeding a fine of five dollars and the costs of prosecution is imposed for violation of this provision. Among the other acts of the session was one to enforce the collection of taxes on railroad companies by seizure and sale of their goods and chattels; one abating taxes on railroads where they have been decided to be illegally imposed, and directing repayment where they have been collected; one requiring the fencing of railroads; one renewing a portion of the public debt, discounting the sinking-fund of 1865, and abolishing the office of Commissioner of the Sinking Fund; one reviving the office of Land Agent, abolished in 1874, and providing for the completion of business connected with the State land-office; and one for the better protection of life and property, which provides for the annual survey and inspection of dams and reservoirs, by an engineer to be appointed by the Governor, and for compelling the owners or lessees to keep them in a safe condition. A bill for the abolition of capital punishment was defeated in the Senate by a vote of 15 to 15, and in the House by a vote of 69 against to 61 for it.

Near the beginning of the session a commission was appointed, of which ex-Governor Edward Kent acted as chairman, to prepare amendments to the constitution. Several of these were accepted by the Legislature, and submitted, in a joint resolution, to a vote of the people, to be taken at the regular election in September. Some of those recommended by the commission were not agreed to by the Legislature, including one changing the date of the State election to the Tuesday following the first Monday in November. Those which it was finally determined to submit for ratification were nine in number. The first provides that Senators shall be elected by a plurality of votes instead of a majority. The second relates to special legislation and corporations, and is as follows:

Amend Article IV., Part III., of the constitution, by adding thereto the following sections:

Sec. 13. The Legislature shall, from time to time, provide, as far as practicable, by general laws, for all matters usually appertaining to special or private legislation.

Sec. 14. Corporations shall be formed under general laws, and shall not be created by special acts of the Legislature, except for municipal purposes, and in cases where the objects of the corporation cannot otherwise be attained; and, however formed, they shall forever be subject to the general laws of the State.

The third modifies the pardoning power of the Governor by authorizing him to fix conditions to pardons, reprieves, and commutations, and requiring him to make a report of the case in which the power has been exercised during the year to the Legislature at each annual session. The fourth provides that judges of municipal and police courts shall be appointed by the Governor and Council, in the same manner as other judicial officers, instead of being

elected. The fifth requires the equal assessment and apportionment of taxes on personal property as well as real estate, and prohibits the Legislature from suspending or surrendering the power of taxation. The sixth abolishes the land agency. The seventh authorizes the Legislature, by a two-thirds concurrent vote of both branches, to call conventions for the purpose of amending the constitution. The eighth authorizes the Legislature to enact laws excluding from the right of suffrage, for a term not exceeding ten years, all persons convicted of bribery at any election, or of voting at any election under the influence of a bribe. The ninth requires the Chief-Justice of the Supreme Court to arrange and codify the constitution as amended, and submit the same to the next Legislature for its approval of his work, the entire instrument, with the amendments duly incorporated, to be the supreme law of the State after such approval.

The Republican State Convention was held at Portland, on the 15th of June. General Selden Connor was nominated as the candidate for Governor, and the following declaration of principle was adopted:

The Republicans of Maine, in convention assembled, as an exposition of their political aims and principles, declare in regard to national issues:

1. The union of the States must be maintained for all time, at all hazards, and at any cost.

2. The United States constitutes a nation, and not merely a confederacy. As such our soldiers fought for it; as such it must be preserved.

3. Citizenship is national. The allegiance of the citizen is due primarily to the nation, and the nation is bound to extend protection to the citizen, native or naturalized, white or colored, whether menaced by tyranny abroad, or by the heresy of State rights at home.

4. Local self-government in all matters that are local must be strictly adhered to. There can be no legitimate conflict between the powers of the nation and the powers of each State.

5. The great industries of the country, agricultural, manufacturing, mining, and commercial, are entitled to encouraging legislation and such incidental protection and development as wise systems of revenue may rightfully afford.

6. A sound currency, based on coin, and redeemable in coin, is essential to the prosperity of the people. We therefore approve all judicious legislation looking to that end.

7. The most kindly and fraternal relations should be cultivated between all sections of our common country; but prudence and patriotism alike demand that the administration of the Government should be kept in the hands of the political organization which has always been true to it, and not given to the control of the Democratic party which sought to destroy it.

Touching matters relating especially to our own State, this convention declares:

1. That economy, integrity, and fidelity distinguish all branches of public service in Maine; of which the strongest proof is the steady reduction of taxation, even under the pressure of burdens inherited from the War for the Union.

2. All systems of taxation must be equal to be just. Our Legislature is especially urged to examine and ascertain whether any forms of property, either corporate or individual, have escaped their legitimate share of the public burdens.

3. Our system of public education must be con-

tinued, improved, and advanced, so that every child in the State may have all the culture needed for honorable advancement and success in life.

4. Temperance among the people may be wisely promoted by prohibitory legislation; and it is a source of congratulation that the policy of prohibition, always upheld by the Republicans of Maine, is now concurred in by a vast majority of the people of the State.

5. Hon. Nelson Dingley, Jr., the able and upright Executive of Maine, is entitled to the thanks of the people of the State for the intelligence, the integrity, the fidelity, and the ability, with which he has discharged the responsible duties of his office.

6. General Selden Connor is presented to the people of Maine as a candidate eminently worthy of their admiration and support. A gentleman of unblemished character, of conceded ability, and a soldier of most heroic record, he combines in his person all the requisites to secure popular confidence and a successful administration.

The Democrats held their convention at Augusta, on the 22d of June. Their nominee for Governor was Charles W. Roberts, of Bangor, and their principles are set forth in the following platform:

The Democratic party of Maine renew their pledge of allegiance to the great principles they believe to be essential to the successful administration of the Government:

1. The Constitution of the United States—the people's shield against usurpation, the palladium of their rights—the sacred observance of its provisions, and the exercise of no unauthorized power, the only adequate security for the preservation of our republican institutions.

2. The rights of the people and the rights of the States must be sacredly preserved from the touch of military or congressional usurpation.

3. The supremacy of the civil authority in time of peace.

4. Equality of rights of all men under the law.

5. A sound currency, coin or its equivalent, essential to stability in business and a restoration of prosperity, steps toward specie payment, and no steps backward.

6. A tariff for revenue to meet the wants of the Government economically administered.

7. The honest preservation of the public faith to the public creditor and to the patriot soldier and his family.

8. A return to economy in the administration of the Government, national, State, and municipal.

9. The abolition of unnecessary offices, and the reduction of salaries (including that of the President) to a reasonable amount.

10. One term for the President, with a salary of \$25,000 per annum.

Resolved, That it is now evident from the experience of the past that there can be no reasonable hope of reform and a restoration of prosperity under a Republican Administration controlled by a ring of officeholders who are eating out the substance of the people to enrich themselves and their servile retainers. In contempt of every pledge, they have gone on from bad to worse until the extravagance, profligacy, and corruption that mark their course are viewed with astonishment and alarm. We believe the people demand a change.

Resolved, That the conduct of the Administration in setting up by the bayonet in a sovereign State a government having no title to authority, and in entering a legislative hall with armed soldiers and dragging out members elected by the people, is a daring outrage that should unite every patriot in the land in the common effort to drive from power the actors in so dangerous a crime against civil liberty.

Resolved, That the bold attempt of the Administration to force through Congress, at the recent session, a bill authorizing the suspension of the great writ of personal liberty, the *habeas corpus*, thus placing the freedom of the people at the mercy of despotic power, was a crime so desperate it demonstrates that it is no longer safe to intrust the Government in such hands.

Resolved, That the Administration is largely responsible for the present depressed condition of the country. It has held the Southern States prostrate since the close of the war, to be plundered by carpet-bag adventurers, preventing their return to industry and prosperity, and thereby destroying to a large extent a great market for Northern manufactures. It has by diverse legislation and a vitiated currency crippled our leading interest as a ship-building State, and driven from the ocean a large portion of the mercantile marine engaged in the foreign commerce of the country.

Resolved, That the people of Maine, suffering under the burden of oppressive taxation, demand reform in the State as well as the national Administration, and a return to the economy of the Democratic Administration of former days.

Resolved, That the Democracy of Maine appeal to all honest men, without regard to party names or past differences of opinion, who concur in the foregoing principles, to unite with them in the effort to secure their triumph.

The election took place on the 13th of September. There were 110,298 votes cast for Governor, of which Connor received 57,065, and Roberts 53,213, making Connor's majority 3,872. The Legislature of 1876, elected at the same time, consisted of twenty Republicans and eleven Democrats in the Senate, and eighty-six Republicans, sixty-one Democrats, three Independents, and one Liberal, in the House. This gave the Republicans a majority of nine in the Senate and twenty-one in the House, or thirty on a joint ballot. The constitutional amendments which were submitted to a vote were all ratified by large majorities, and on the 17th of November Governor Dingley issued a proclamation announcing the result, and declaring that the amendments would take effect on January 1, 1876.

At the beginning of the year the State Treasury held \$322,185.84 of cash on hand; the receipts during the year were \$1,563,775.44, and the expenditures amounted to \$1,513,867.45. This left a balance at the end of the year of \$377,093.84. The bonded debt on the 1st of January was \$7,088,400. It was reduced during the year by the payment of \$29,000 of matured bonds, and the cancellation of bonds in the sinking-fund of 1865, abolished by act of the last Legislature, to \$5,949,400. The actual reduction effected by payment of matured bonds and additions to the sinking-fund was \$301,689.72. After deducting the amount of the sinking-fund, the net indebtedness now stands \$5,272,688.28. Under the act abolishing the sinking-fund of 1865 the Treasurer canceled \$1,112,900 of State bonds contained therein, and transferred the balance, amounting to \$101,524.05, and consisting of other bonds and cash, to the sinking-fund of 1863, which now amounts to \$676,711.72.

Aside from the regular tax levy annually

fixed by the Legislature, a tax of one and a half per cent. is imposed upon the corporate franchise of railroad companies, one per cent. on deposits in savings-banks, and two per cent. on the premiums collected by foreign insurance companies, after deducting the amount paid for losses, sums repaid for return premiums, legal reserve on life-policies, and unused balances on notes taken for premiums on open policies.

Much difficulty has been experienced in collecting the tax on railroads, some of the companies resisting on the ground that such an assessment impairs the obligation of the contract contained in their charters. A temporary injunction has been granted in behalf of the Maine Central Railroad, and the right of the State to impose this tax is to be decided by the Supreme Court.

Several additions have been made to lines of railroad within the State during the year. The Aroostook River Railroad Company has completed and opened for traffic three miles of its road, from Fort Fairfield to the State line, where it connects with the New Brunswick Railroad. The Somerset Railroad has finished an extension of five miles, from Madison to North Anson. The Portland & Ogdensburg Railroad has perfected a through connection to the West.

There are sixty-four savings-banks in the State, five of which have been established during the year. The amount of deposits for the year ending November 30th was \$32,083,314.-28, an increase of \$1,021,350.55.

The important items of the school statistics, compared with those of 1874, are as follows:

	1875.	1874.
Whole number of scholars between four and twenty-one.....	221,477	225,219
Number registered in summer schools.....	117,821	122,458
Average attendance.....	95,078	93,744
Average length of summer schools....	10w. 2d.	10w. 5d.
Average length of winter schools.....	10w. 4d.	11w.
Number of districts.....	8,953	4,043
Number of schoolhouses.....	4,150	4,199
Number of schoolhouses built during the year.....	104	122
Estimated value of all school property.....	\$3,019,549	\$3,079,311
Number of male teachers employed in summer.....	171	161
Number of male teachers employed in winter.....	1,934	1,928
Number of female teachers employed in summer.....	4,426	4,366
Number of female teachers employed in winter.....	2,475	2,367
Average wages of male teachers per month.....	\$36 96	\$36 17
Average wages of female teachers per week.....	429	4 05
Amount of school-money voted by towns.....	\$662,558	\$673,314
Amount actually expended for public schools from April 1 to April 1.....	\$1,046,706	\$951,773
Aggregate amount expended for schools exclusive of free high-schools.....	\$1,268,896	\$1,191,719
Amount of school-fund.....	369,588	361,393

The College of Agriculture and Mechanic Arts had 115 students at the end of the year.

The number of inmates of the State Reform School was 142. The cost of its support was

\$24,803.40, of which \$18,000 was derived by legislative appropriation. The boys are employed on the farm belonging to the institution, and in making bricks, chairs, and shoes. The Industrial School for Girls was opened at Hallowell on the 20th of January, and 32 girls have been admitted, two of whom have been placed out in homes.

The Insane Hospital contained 403 patients at the close of the year, which was 53 more than the building was calculated to accommodate. The expenditures of the institution for the year amounted to \$91,414.81. The need of additional accommodations is severely felt, and a commissioner was appointed early in the year to consider the question of building a new hospital.

The Fish Commissioners have distributed 700,000 young salmon during the year in the waters of the State, the larger part being of the Penobscot variety, hatched at Bucksport. Something has also been done in stocking ponds with black bass and blue-back trout. Three new fishways have been constructed at Modomac, one at Presumpscot, two at Sacarappa, one at Windham, and three at Surry. The fish-breeding works at Bucksport produced about 2,000,000 salmon-eggs, an average of 8,400 for each female fish. In the opinion of the commissioners "the fish of the Penobscot or Kennebec is worth more than all the lumber on either of these rivers."

MANITOBA was formed out of the Hudson Bay Territory, and comprises what was formerly known as the Red River Settlement. It is situated between latitudes 49° and 50° 30' north, and longitudes 96° and 99° west, and is bounded south by Minnesota and Dakota, and on all other sides by the Northwest Territories, and is 135 miles long east and west by 104 miles in breadth, forming nearly a parallelogram; area, 14,340 square miles. It is divided into four counties, Lisgar, Marquette, Provencher, and Selkirk, which are subdivided into parishes. The capital and chief town is Winnipeg, on the north bank of the Assiniboine River, at its confluence with the Red, which has about 7,000 inhabitants, and contains within its limits Fort Garry, the American headquarters of the Hudson Bay Company. The population of the province in 1871 was 11,963, of whom 5,757 were French half-breeds, 4,083 English half-breeds, 1,565 whites, and 558 Indians; in 1874, about 20,000. The half-breeds include all having any intermixture of Indian blood, and are the descendants of Indian mothers and French-Canadian, English, or Scotch fathers, the Scotch element predominating over the English. The distinction of French and English in the census is based rather upon language than lineage. The half-breeds are a handsome race, large, strong, and well made; they are generally swarthy, but many exhibit no sign of Indian extraction. Intrepid and indefatigable travelers, they manifest the Indian instinct in the ability to find their way through

forests and across prairies. Many are employed by the Hudson Bay Company as boatmen, guides, and sledge-drivers; others are farmers; while a large proportion, especially of the French, pay comparatively little attention to agriculture, but pursue the buffalo in summer and winter on the plains west and southwest of the province. In general they are intelligent and hospitable, but prodigal of their earnings, fond of pleasure, inclined to drunkenness and indolence, and restive of restraint. Those engaged in farming, with a settled mode of life, have acquired more stable and provident traits of character than the hunters. A majority of the population are Roman Catholics; the other principal denominations are Episcopalians, Presbyterians, and Wesleyan Methodists.—The climate is healthy, but exhibits great extremes of temperature, the thermometer falling in winter to 40° below zero and even lower, and in summer rising as high as 100°. Wheat is the staple crop, and yields abundantly, forty bushels to the acre being commonly raised. The executive power is vested in a Lieutenant-Governor, appointed by the Governor-General of the Dominion in council, and an Executive Council of six members, appointed by the Lieutenant-Governor, and responsible to the Assembly. The Legislature consists of the Legislative Council of seven members, appointed by the Lieutenant-Governor for life, and the Legislative Assembly of twenty-four members, elected by districts for a term of four years.

MARTIN, JOHN, an Irish agitator and politician, was born in Longhorne, county of Down, on September 8, 1812, and died in Dublin, March 29, 1875. At twelve years of age he was sent to Dr. Henderson's school at Newry, where he first became acquainted with John Mitchel, with whom he remained on the closest terms of intimacy throughout his lifetime. He next studied at Trinity College as an extern student, and in 1833 took up his residence in Dublin, and devoted himself to the study of medicine. When in 1848 the British Government seized John Mitchel's newspaper, the *United Irishman*, Martin, who up to that time had taken no prominent part in politics, established at his own expense the *Irish Felon*. His paper was soon seized in turn, and he himself arrested, tried, and sentenced to transportation. Having been pardoned and returned to Ireland, his history was closely connected with that of the national agitation. In 1868 he married the youngest sister of John Mitchel, and in the same year sailed for America. During his absence the memorable Longford election took place, which brought him out prominently for a seat in the British Parliament. In December, 1869, he was elected to Parliament from Meath, where, though he never cast a vote, even his opponents acknowledged that, on any question that concerned the honor or welfare of his native land, he was the "member for all Ireland."

MARYLAND. The public debt of Maryland was, on the 30th of September, \$11,372,677.28; the productive assets of the State were \$6,068,509.35, besides which it had unproductive assets amounting to \$22,555,188.75. Most of these latter consisted of bonds, stock, and interest, in the Chesapeake & Ohio Canal, which for seven years has done little more than pay its running expenses and cost of repairs. It has debts amounting to \$2,923,140, which have priority over the claims of the State. The State Treasury held at the beginning of the last fiscal year, October 1, 1874, a balance of \$565,106.29; the receipts of the year were \$2,909,080.20, expenditures \$2,436,075.46, leaving a balance at the end of the year of \$1,058,111.33.

The number of pupils in the public schools of the State showed an increase of 4,109 over 1874; the average daily attendance had increased 2,585. Seventy-nine new schoolhouses were built during the year, at a cost of \$66,802.66. The total receipts from all sources for school purposes amounted to \$958,244.32, and the expenses aggregated \$924,758.19. This showed an increase for the year of \$52,130.55 in the receipts, and \$41,317.50 in the expenditures. The city of Baltimore is not included, as its school system is independent of that of the State. The Agricultural College has been reorganized on a new basis. The preparatory department has been abolished, and the number of students in attendance on the collegiate courses is only forty-seven. The institution has a debt of \$12,109.40. The State is half owner of the college, and the Board of Education recommends the purchase of the interest of individual stockholders. The State Normal School building in Baltimore is nearly completed, and is one of the finest structures in the city. It has a front of 120 feet on Carrollton Avenue and 105 feet on Lafayette Avenue, and at the intersection of the two fronts a tower rises to the height of 170 feet. It will accommodate 300 students. The site for a new House of Correction has been secured about fourteen miles from Baltimore, on the Baltimore & Ohio Railroad, and a contract has been entered into for the construction of the main building, and one wing and one cross-wing, at a cost of \$187,000. The site consists of 93½ acres, and cost \$13,000. The time specified in the contract for the completion of the building is September 1, 1876.

The Maryland Hospital for the Insane, at Spring Grove, which was placed under the charge of the president and directors as a private corporation by an act of 1870, is the property of the State, and the title has been formally declared by a proper instrument, constituting the corporation a charitable agency of the State. This institution is but half filled, though there are 462 insane paupers in the State, supported wholly at the public expense. The Maryland Inebriate Asylum, situated about five miles from Baltimore, has been compelled

to suspend on account of financial embarrassments. It has received State aid from time to time, and the trustees now propose to transfer the property to the State if provision is made for its support. The Institution for the Education of the Deaf and Dumb has been completed, and contains 89 pupils. It is capable of accommodating 150. The Institution for the Instruction of the Blind has 51 inmates, and the amount paid by the State for its support during the year was \$18,650. The State Penitentiary has been established on a self-sustaining basis, and during the year its earnings exceeded the expenses by \$1,417.96.

The subject of temperance reform and of putting more rigid restrictions on the sale of intoxicating liquors has occupied a good deal of attention in the State, but has not been made an issue in politics. The Annual Convention of the State Temperance Alliance was held at Baltimore on the 4th of May, and the following resolutions, adopted on that occasion, show the general purposes and policy of the organization:

Whereas, The experience of the past two years has developed the fact that the churches, temperance societies, and people generally, are willing to co-operate with the State Alliance in its endeavors to destroy the legal dram-trade of Maryland; and whereas, this united action on the part of the churches and people has resulted in securing local-option laws for six counties on the Eastern Shore, and a grand-jury law for twelve counties in the State; and whereas, the citizens where these laws have been obtained have generally voted against liquor license: therefore—

Resolved, That we reaffirm the position taken by the convention which organized this Alliance, viz.: That we recognize the Church as a divinely-appointed head and leader in the temperance reform; and as the liquor system is an open enemy of the Church, she should therefore take the advance in efforts to destroy the system.

Resolved, That as local option submits the question of the dram-trade license to the whole people as a question of public policy, thus taking the matter out of the hands of political parties so called, and making it simply one of morals, we will continue to press upon the masses the duty of supporting this effective method of overthrowing the traffic.

Resolved, That we regard with great satisfaction the action of the last Legislature in enacting local-option and grand-jury laws for several counties of the State.

Resolved, That in the conduct of the people in voting down liquor license, and in petitioning the grand-juries against said license, we witness the progress of popular sentiment in opposition to the dram-trade, and we most earnestly urge upon the citizens in local-option counties the importance of enforcing the laws against the traffic.

Resolved, That as the Court of Appeals has sustained the validity of existing local-option laws, we hereby pledge increased activity in the work of obtaining such statutes for each county in the State.

Resolved, That while we have neither intention nor disposition to form a temperance political organization, we do most fervently exhort all the people to appreciate the necessity of demanding from each political party the nomination of men for the next Legislature who are not opposed to local option.

Resolved, That in the woman's temperance movement we recognize a providential interposition in behalf of our reform, and we hail all women's temper-

ance organizations as most efficient helpers in the work of this Alliance.

Resolved, That our present license system not only makes a traffic legally right which public opinion declares to be morally wrong, but it protects the liquor-seller at the expense of all other citizens, and gives to a few persons the power to inflict the most terrible evils upon society in opposition to the wishes of a large majority of our citizens; and that, in continuing to legalize and protect the traffic in alcoholic drinks, the Legislature violates the fundamental principles of all good government, viz., "the right of society to protect itself."

The Democratic State Convention met at Baltimore on the 21st of July. A contesting delegation from three wards of that city caused a good deal of discussion and delay, and the business of the convention was not transacted until the following day. The candidates to be nominated were for Governor, Attorney-General, and Controller. There had been a pretty warm canvass going on for some weeks between the supporters of John Lee Carroll, James B. Groome, and William T. Hamilton, for the nomination for Governor. Mr. Groome was the incumbent of the office and Mr. Hamilton was an ex-United States Senator. On the second day of the convention Mr. Groome withdrew his name, leaving the contest to the friends of Carroll and Hamilton. Mr. Carroll was nominated on the first ballot by a vote of 60 to 50. The nomination was made unanimous. Levin Woolford was renominated by acclamation as candidate for Controller. Four ballots were taken for a candidate for Attorney-General, resulting finally in the choice of C. J. M. Gwinn. A new State Central Committee was then chosen, and Mr. Carroll, having been notified of his nomination, came in and addressed the convention at some length. The following platform was adopted:

We, the representatives of the Democratic-Conservative voters of the State of Maryland, in convention assembled, do hereby declare our unfaltering devotion to those cardinal principles of republican government enunciated by Thomas Jefferson, in language so clear that it cannot be improved, to wit:

Equal and exact justice to all men, of whatever State or persuasion, religious or political.

The support of the State governments in all their rights, as the most competent administrations for our domestic concerns, and the surest bulwarks against anti-republican tendencies.

The preservation of the General Government in its whole constitutional vigor as the sheet-anchor of our peace at home and safety abroad.

The supremacy of the civil over the military authority.

Economy in the public expense, that labor may be lightly burdened.

The honest payment of our debts, and the sacred preservation of the public faith.

The diffusion of information, and arraignment of all abuses at the bar of public reason.

Freedom of religion.

Freedom of the press.

Freedom of person, under the protection of the *habeas corpus*, and trial by juries impartially selected.

Pledged to this creed of political faith—

We do further resolve, That we protest against the burdens of a high protective tariff, as needless exactions from a people already intolerably op-

pressed by a gigantic national debt, and that we insist that the tariff be so regulated as to provide only a sufficient revenue for general uses, and not for the purpose of enriching the few at the expense of the many.

Resolved, That agriculture, manufactures, and commerce, should be the equal care of well-regulated governments; obstructions to any of them should be removed, but no favoritism should be extended to either at the expense of the others; that labor and capital are mutually dependent, and equal justice demands that legislation should, as far as practicable, harmonize their conflicts, and prevent the one from oppressing or obtaining undue advantage over the other; that we protest against the multiplication of Federal offices, the assignment to them of unusually high salaries, and the abuse of Federal patronage, which tends to dwarf the States and corrupt free institutions.

Resolved, That we protest against any increase of the circulating currency, but demand that such measures be adopted by Congress as will result in the resumption of specie payments at the earliest possible moment.

Resolved, That we are opposed to the granting of subsidies to railway or steamship companies, or other monopolies, as unwarrantable in law, corrupting in tendency, and utterly subversive of the principles of good republican government.

Resolved, That we point with just pride to the administration of our State affairs by the Democratic-Conservative party, in the firm maintenance of the law, for the pure administration of justice, for the advancement of public education, and for its strong support of our admirable system of public schools; for the financial skill displayed in keeping the evidences of our State debt in such high rank among public securities, and for the general good order prevailing throughout the limits of the State.

Resolved, That in the nominees of this convention the people will find gentlemen fit for the various positions for which they are named, whose past fidelity in public station is a pledge for the proper discharge of any new duties imposed on them; and we appeal to men of all shades of party opinion, for their support of these candidates, who embody in themselves those cardinal characteristics of faithful officials, "honesty and capacity," and we hereby pledge our most earnest efforts to secure their election at the polls.

After the action of the Democratic Convention, a movement in opposition was set on foot under the name of the "Citizens' Reform party." Several meetings were held in its interest, and various organizations of a secret character, alleged to be pledged to opposition to Roman Catholic power and influence, allied themselves with it. The avowed basis of the reform movement was the determination to secure a correction of abuses, extravagance, and irregularities in the State administration.

The Republican State Convention, which first met at Westminster, on the 8th of September, adjourned after adopting the following resolution:

Whereas, We have seen with profound satisfaction the uprising of the great masses of the people of Maryland, without regard to previous party ties, whose only object is to secure honest and equal government, and we shall best show our devotion to the highest public good by declaring our desire to co-operate cordially and heartily with such movement: therefore—

Resolved, That a committee of one from each county and one from each legislative district of Bal-

timore City be appointed by the delegates of each county and district to confer with all organized friends of reform, with the view to the selection of candidates for Governor, Attorney-General, and Controller, and that said committee shall report the result of their consultation for the action of this convention at an adjourned meeting to be held in Baltimore, on Wednesday, September 22d, at 12 M.

The committee of conference was appointed and immediately entered into consultation with representatives of the Citizens' party. When the convention reassembled at Baltimore on the 22d, the following report was made by this committee and unanimously accepted:

Your committee found that the "original friends of reform" consisted of the organization known as the "Citizens' Reform party" and the committee appointed by the meeting held at the Masonic Temple, Baltimore, on the 7th of September, known as the "Merchants' Committee." After a full, frank, and harmonious conference with the committees of said organizations, and the interchange of opinion very freely among the members of your committee at several sessions of their own body, the committees of the two reform organizations and your committee have agreed on the selection for the following candidates for Governor, Attorney-General, and Controller, as a reform ticket: For Governor, J. Morrison Harris; Attorney-General, S. Teackle Wallis; Controller, Edward Wilkins.

Your committee recommend the acceptance of this ticket, and the recommendation of it to the support of the voters of the Republican party, and propose to the convention the adoption of the accompanying resolution:

Resolved, That the report of the committee appointed to confer with the organized friends of reform is hereby accepted and adopted, and the reform ticket reported by them to the convention, consisting of J. Morrison Harris for Governor, S. Teackle Wallis for Attorney-General, and Edward Wilkins for Controller, is hereby recommended to the cordial support of the Republican voters of the State.

The following was adopted as the platform of the convention:

We, the representatives of the Republican party of the State of Maryland, in convention assembled, while adhering to those principles which that party has in the past so triumphantly vindicated before the American people, nevertheless being satisfied that it is the first and most imperative duty of every Republican to co-operate with those patriotic citizens of Maryland, who have so nobly ignored party ties and party questions, and are engaged in an earnest effort to restore honest and pure government to our State, do, therefore, declare and resolve that we earnestly in favor of an honest and economical administration of the Government, both State and national, of the fulfillment of every pledge as to the payment of our State and Federal obligations, of the return to specie payment at the earliest practicable moment, and the cessation of all further expansion of the currency; the equal taxation of all property of whatever kind in the State; the appropriation of State money for State purposes only, and the improvement and liberal support of the school system; that we deprecate the corruption existing in the administrations of the State government of Maryland, and hail with joy the uprising of the people to destroy the rings and cliques that have fastened their fangs on the vitals of the State; and we do hereby pledge ourselves to expose, denounce, and punish venality and corruption among public officials whenever and wherever it may be discovered, and to this end we invite the cordial co-operation of all Republicans throughout the State, with those who have nominated and secured the acceptance of J. Morrison

Harris for Governor of Maryland, S. Teackle Wallis as Attorney-General, and Colonel Edward Wilkins as Controller, and we heartily recommend them to our voters as men eminently suitable for their respective positions, being both honest and capable.

Mr. Harris, the nominee for Governor, was a Whig member of Congress at the breaking out of the civil war, and was a Union man. Mr. Wallis had been a Whig in former years, but supported Breckinridge in 1860, and was arrested while a Senator, during the war, and imprisoned in Fortress Monroe and Fort Warren for fourteen months. Since then he had acted with the Democratic party until this campaign. Mr. Wilkins had been a leader of the Republican party for some years.

The canvass which followed these nominations was quite excited, owing to the fact that religious prejudices were involved to some extent, and the "reform" movement was generally regarded as anti-Catholic in its purposes. The election was held on the 2d of November. The total vote cast for Governor, according to the official returns, was 157,991, of which Carroll received 85,447, and Harris 72,544, making the majority of the former 12,908. Woolford for Controller had a majority of 14,250 out of a total vote of 158,266, and Gwinn for Attorney-General a majority of 13,682 out of a total of 159,154. One-half of the Senate and the whole of the House of Representatives were chosen at the same election. The Legislature, as constituted at the session of 1876, consisted of 19 Democrats and 7 opposition in the Senate, and 58 Democrats and 26 opposition in the House, making the Democratic majority 12 in the Senate, 32 in the House, and 44 on a joint ballot.

On the 16th of November, or as soon as the full returns of the vote cast at the election were made known, Mr. S. Teackle Wallis wrote a letter to Governor Groome, giving notice that he should contest the election of Mr. Gwinn for Attorney-General, on the ground that the vote of the city of Baltimore was null and void on account of frauds and intimidation, and that he had received a majority of the votes outside of the city. The Governor replied on the 19th of November, expressing doubt as to his authority to hear and decide such a contest. He consented to receive the statements and arguments of Mr. Wallis and Mr. Gwinn, or of counsel in their behalf, on the question of his powers and duties in the premises. The hearing was given on the 24th of November. Mr. Wallis argued that, as the constitution made it the duty of the Governor to receive the returns from the clerks of the county courts and "decide on the election and qualification of the person returned," there could be no doubt as to his authority to pronounce on the validity of the vote in Baltimore, and declare which candidate was entitled to the office. With regard to the method of conducting the contest, he claimed that, as no specific provisions were laid down, it was for the Governor to decide this matter for himself.

The facts on which the contestant based his claim, and which he declared that he could prove, were stated as follows:

I propose and expect to show that a general system and scheme of intimidation and violence was begun in the city upon the 1st of November, and continued on through that day and night and during the day of election; that by means of such intimidation and violence large numbers of duly-qualified voters were prevented from seeking access to the polls, and other large numbers were driven therefrom, throughout the city, or prevented from voting by personal violence. I propose and expect to show that such violence and intimidation were general; that they were practised exclusively by those who supported the regular Democratic ticket against those who desired to vote the Reform ticket; that they were generally connived at, and in many cases encouraged, by the police force of the city, whose interference, so far as it occurred, was commonly on the side of lawlessness, and against the law. I propose and expect to show that by reason of such intimidation and violence, and the grossest dereliction of duty on the part of the Police Board, its officers and men, the elective franchise was trampled under foot, and the election in the city was not free, but was an election only in name. I propose and expect further to show that the grossest and most wholesale frauds were at the same time practised, for the most part with the participation and connivance, and in large part by the hands of the Democratic judges of election, so that, even if violence and intimidation had not occurred, as I have alleged, the vote which was taken throughout the city was so tainted with fraud that the truth could not be deduced from the returns. I propose and expect to show that large numbers of illegal votes were fraudulently given and accepted, and large numbers of legal votes were fraudulently refused, by said judges at almost all the voting precincts of the city; that in very many of said precincts the ballot-boxes were fraudulently stuffed, with the connivance of the Democratic judges, and large numbers of tickets were counted in excess of the number of votes actually polled. I further propose and expect to prove that not only was the vote thus fraudulently tampered with by the said judges in the polling and the count, but the returns themselves were fraudulently made and altered so that they do not represent even the truth of what the ballot-boxes were fraudulently made to show.

Mr. Gwinn in his statement took the ground that the Governor's duty was merely to declare the result of the election as it appeared from the returns made to him, and that he had no judicial power to revise the decisions of the judges of election. He maintained that there could be no contest of an election until the result had been declared, and that it was for the Legislature to make provision for all contested elections unless specifically provided for in the constitution. He denied the authority of the Governor to hear testimony on the subject of counting the vote of the city of Baltimore. The case was further argued by counsel on both sides. Governor Groome made his decision on the 6th of December. He decided that Mr. Gwinn had been elected Attorney-General according to the returns, and also that he was fully qualified for, and eligible to, the office. Yet as a grave constitutional question was involved—whether he could go back of the returns—he would leave that question to the courts, and would refuse to issue a commission

to Mr. Gwinn; and unless he took legal steps to enforce the issuing of a commission within a reasonable time, he would proceed to take testimony in the case upon the charges made by Mr. Wallis. Mr. Gwinn applied for a mandamus to compel the Governor to issue his commission. The matter was decided in his favor by the Court of Appeals on the 21st of December. The decision of the court was as follows:

The circumstances under which this appeal has been brought before us, and the nature of the questions involved, make it important that it should be decided without delay. We shall state in a few words only the conclusions we have reached, and shall hereafter express the grounds and reasons upon which the judgment of the court is based.

This court is unanimously of opinion—

1. That upon the facts admitted in the answer of the Governor, and the decision thereon made by him as expressed in his answer, the appellee is entitled to receive his commission as Attorney-General, and to take the oath of office.

2. That under the constitution and existing laws the Governor has not the power to enter upon an examination of the nature alleged in his answer, as a reason for withholding the commission, or to try and decide the contest referred to.

The *pro forma* order of the Circuit Court awarding the mandamus is therefore affirmed.

The case brought by the State against the Baltimore & Ohio Railroad Company, to recover the difference between the value of currency, paid from July 1, 1865, to January 1, 1870, by way of dividends on the State's preferred stock, and of gold, in which the State claimed should have been paid, has been decided by the United States Supreme Court adversely to the State's claim. In making the decision the court used the following language:

When it (the contract) was made, payment in coin was the only mode of payment recognized by the law; and doubtless in this case, as in all other cases of promises to pay money made at that time, the expectation of the parties was that the debt would be discharged in coin. So natural was this expectation that it was very rarely thought necessary to provide against the contingency of a debt becoming payable with anything else than coin.

Still, as no specific agreement was made for payment in coin, in view of the operation of the legal-tender acts, it was impossible for the courts to enforce this understanding.

The question of the authority of the State to impose the "capitation-tax" on passenger-traffic over the Washington branch of the Baltimore & Ohio Railroad has not yet been disposed of. The Supreme Court of the United States in May affirmed the judgment of the State Court of Appeals as to the constitutionality of the legislation requiring the payment of one-fifth of the receipts from passenger-fares on the Washington branch into the State Treasury. The company promptly paid the amount of the judgment rendered, but still refused to make further payments. Several new suits have been brought and are still pending. The counsel for the road have announced three new defenses: 1. That the Legislature of Maryland had no right to receive any portion of

the gross receipts upon that part of the Washington branch road lying within the District of Columbia, and chartered by Congress. 2. That the branch road on which the State has a right to receive a share of the gross passenger receipts begins at the Relay House, and not at Baltimore, as heretofore always conceded. 3. That under the act of 1831, chapter 380, section 8, the State reserved the power to incorporate another company only in case of the failure of the Baltimore & Ohio Railroad Company to complete its branch road within the time therein named, which was extended afterward by the act of 1832, chapter 75, section 12. The company contends that as the road was finished within the time, as extended, the State had no power to incorporate another company, and was bound by an implied contract not to do so, which it has violated by incorporating the Potomac Railroad Company. The State, having, as they contend, violated the contract, has no right to demand the consideration which the company agreed to pay for the monopoly.

A case was decided in the Superior Court of Baltimore, in January, involving the question of the State's right to impose a tax of one and a half per cent. on the gross receipts of the Northern Central Railroad Company. When the Baltimore & Susquehanna Railroad was chartered, in 1827, it was stated in the charter that "the shares of the capital stock of the said company shall be deemed and considered personal estate, and shall be exempt from the imposition of any tax or burden by the States assenting to this law." In 1854 the Baltimore & Susquehanna was consolidated with other roads to form the Northern Central, and all previous provisions, not specifically repealed or modified by the act of consolidation or inconsistent with it, were declared to remain in full force. In support of its right to lay the tax on gross receipts the State maintained before the court—

1. That the State has no power under the Bill of Rights of Maryland to exempt any property in the State from taxation.

2. That if the right to exempt be conceded, it is a right which carries with it the correlative duty to repeal the exemption whenever the State may think the public good demands such repeal, and that the passage of this taxing law must be taken to be an exercise of that duty.

3. That if the exemption existed as to the Baltimore & Susquehanna Railroad Company, its benefits were not transferred by the consolidation act to the new corporation, "The Northern Central Railway Company," and in no event could be extended beyond the original two millions of stock of the Baltimore & Susquehanna Railroad Company.

4. That this is not a tax or burden upon the capital stock, but is a tax upon the corporation, as distinguished from its shareholders, measured by its gross receipts, or is a tax upon its franchise, or is a tax upon its business, or is an excise-tax, or a license-tax, and therefore does not fall within the exemption.

5. That in this inquiry, in which a provision of the Federal Constitution is to be construed and applied, the decisions of the Supreme Court of the United States are controlling, and that by recent judgments of that tribunal such a construction has

been given to similar taxation as takes this case out of the claimed exemption.

The decision of the court was against the State on all these points.

A case involving the validity of the local-option law was decided by the Court of Appeals in May. The appellant had been indicted for selling liquor in a district where a majority of the citizens had voted against permitting such sale, and claimed that the law was unconstitutional and void because it delegated to the legal voters the power of making the law. The court admitted that the Legislature was the sole law-making power, and presented, as the point to be settled, whether the local-option law did delegate any part of that power. Chief-Justice Bartol said:

The voters have by the act neither power to make nor repeal laws. Their opinion is merely expressed on the subject-matter to which the law relates. They declare no consequences, prescribe no penalties, and exercise no legislative functions. The consequences are declared in the law, and are exclusively the result of the legislative will. The act is a perfect and complete law, as it left the halls of legislation and was approved by the Governor, but it was made to go into operation in any district upon the contingency of the approval of its legal voters. The question resolves itself into this: May the Legislature constitutionally enact a law and make its operation depend upon the contingency of the popular vote? The court says that it has never been denied that the Legislature can provide that an act shall take effect at some future day, or until the happening of some particular event, or in some contingency thereafter to arise.

After referring to various precedents the court further said that it could "discover no sufficient reasons to declare the act in question unconstitutional or inoperative. To pronounce so would, in their judgment, be contrary to sound reason, as well as at variance with the previous decisions of this court."

The arbitrators appointed to settle the boundary-line between Maryland and Virginia held several meetings during the year, the last being at Saratoga Springs, in July and August. The proceedings were interrupted by the death of the Hon. William A. Graham, one of the arbitrators on the part of Virginia, which made it necessary to await the further action of the Legislatures of the two States.

JOHN LEE CARROLL, elected Governor of Maryland for the term of four years from January, 1876, is a great-grandson of Charles Carroll of Carrollton, one of the signers of the Declaration of Independence, and resides in Doughoragan Manor, in Howard County, which has been the property of his family since the Revolution, and comprises 12,000 acres. He was born on his grandfather's estate of Homewood, near Baltimore, in September, 1830. He began his education at St. Mary's Seminary, whence he went to Georgetown College, and then to Mount St. Mary's, near Emmittsburg. Afterward he spent a year in the Law School of Harvard University, and, returning to Baltimore, entered the law-office of Brown & Brune, and was ad-

mitted to the bar in 1851. He subsequently went to New York to practise law, and accepted the position of Deputy Clerk and *ex-officio* United States Commissioner under Judge Betts. His father, Charles Carroll, died in 1862, leaving him sole executor of his estate. He then returned to his old home, after residing two years in New York. He began his public career in 1851, when he was a candidate for the Legislature, but was defeated by the Know-Nothing party. He was first elected in 1867 from his county to the Legislature, and, after serving four years, was reelected in 1871. He was president of the State Senate at the session of 1874. Mr. Carroll is a man of rare intelligence and cultivation, and has interested himself in all measures of public improvement.

MASSACHUSETTS. The regular session of the Legislature of Massachusetts began on the 6th of January, and occupied 134 days, coming to an adjournment on the 19th of May. Two hundred and forty-three acts and 78 resolves were passed, all of which received the approval of the Governor. Of the acts 186 were of a public and 57 of a special character. Very few were of general interest or importance. The subject which occupied the largest share of attention was the repeal of the acts prohibiting the sale of intoxicating liquors, and providing for a State constabulary force. This had been the leading issue in the election of 1874, in which the prohibitionists had been defeated. The two propositions before the Legislature on this subject were a bill repealing the constabulary act and providing for a State detective force; and another repealing the prohibitory law, and providing for the regulation of the liquor-traffic under a license system. The former was passed and received the approval of the Governor on the 18th of February. It provides for the appointment by the Governor of thirty State detectives, under the charge of a chief of the State detective force. These detectives have the powers of constables and police throughout the State, and are required to aid in the detection of crime and the pursuit of criminals. The Governor is authorized to call upon them to suppress riots and preserve the peace, and is also empowered to invoke the aid of the constables and police of towns and cities for the same purpose within their respective towns and cities. Other acts relating to a State police or constabulary are formally repealed. The act to regulate the sale of intoxicating liquors prohibits all such sale without license, and authorizes but does not require the mayor and aldermen of cities, and the selectmen of towns, to grant licenses to such persons as they may deem fit. Among the conditions of the license are these: that no liquor shall be sold between the hours of twelve at night and six in the morning, or on Sunday, except by innholders to their guests; no liquor shall be sold or kept except of good standard quality and free from adulteration; no liquor shall be sold or given to a

person known to be a drunkard, to an intoxicated person, or to a minor; no disorder, prostitution, or gambling, shall be permitted on the premises. Licenses are of five classes: To sell liquor of any kind to be drunk on the premises, the fee for which shall not be less than \$100 or more than \$1,000; to sell malt liquors, cider, and light wines, to be drunk on the premises, fee \$50 to \$250; to sell malt liquors and cider only to be drunk on the premises, fee \$50 to \$250; to sell liquor of any kind not to be drunk on the premises, fee \$50 to \$500, but not less than \$300 for distillers; to sell malt liquors, cider, and light wines, not to be drunk on the premises, fee \$50 to \$150 for venders, and \$200 to \$400 for brewers. A bond is required in the sum of \$1,000, with sufficient sureties for the fulfillment of all the requirements of the law, and severe penalties are provided for its violation. Persons selling liquor are made liable for damages caused by persons intoxicated by it, and are also subject to penalties for selling liquor to any one in the habit of drinking to excess when requested not to do so by the husband, wife, parent, child, guardian, or employer, of such person. Provision is made for the appointment of an inspector and assayer to make analyses and determine the purity of liquors offered for sale. Cities are authorized to delegate the duties of the mayor and aldermen, in the matter of granting licenses, to a Board of Commissioners. This act took effect on the 1st of May.

An act to provide for the management of the Hoosac Tunnel and the Troy & Greenfield Railroad, and for other purposes, was approved March 30th, and went into immediate effect. This provided for the appointment of a manager on behalf of the Commonwealth to take charge of the Hoosac Tunnel and the Troy & Greenfield Railroad. He was to have full charge of the property on the expiration of the charter of the corporation previously in charge, July 1st, and make monthly reports of his doings. All connecting roads were to be allowed to use the tunnel and the Troy & Greenfield Railroad, on the payment of just and reasonable tolls, to be prescribed by the Governor and Council. The sale of the property is prohibited in this act.

Another important act of the session regulates and limits municipal indebtedness. This requires cities and towns to assess taxes each year sufficient to cover all appropriations and expenditures, and with certain specified exceptions prohibits them from incurring debt, except in the form of temporary loans in anticipation of the taxes of the year and the next year ensuing, made payable therefrom by a vote of the city or town. Debts other than such temporary loans can be incurred only by a two-thirds vote of the legal voters of a town, or of both branches of the city council of a city, and must be paid in ten years, special taxes being levied to provide for such payment; provided that debts incurred for the

construction of general sewers may be made payable in twenty years, and those for supplying pure water in thirty years, with provision for an adequate sinking-fund.

The powers and duties of the Sinking Fund Commissioners, which must be chosen in such cases, are specifically laid down and the methods prescribed for raising a fund sufficient to liquidate the indebtedness within the required time. No city or town shall hereafter become indebted to an amount exceeding three per cent. on the valuation of its taxable property, and where such indebtedness already exceeds five per cent. on the valuation, a sinking-fund shall be established at once, sufficient for its liquidation in thirty years. The payment of debts at an earlier period than provided for in this act is expressly authorized, and the restrictions of the act are declared not to exempt any city or town from the payment of any debt contracted for any purpose for which such city or town may lawfully expend money.

The limit of municipal indebtedness is also made exclusive of debts created for supplying pure water, and subscriptions lawfully made to the capital stock or securities of railroad corporations. Authority is given to the Supreme Court to compel compliance with the provisions of the act.

Among the other acts of the session was one providing for the appointment of three agents to make contracts for the improvement, sale, or use of the Commonwealth lands, known as the Flats, in South Boston; one establishing the city of Pittsfield and providing for its government, subject to acceptance by a majority vote of the people of the town within two years; one authorizing the appointment of three commissioners by the government of the city of Boston, to locate one or more public parks for that city, acquire the lands therefor, and lay out, improve, and regulate the same; one to reorganize the School Committee of Boston, making it to consist of twenty-four members elected from the city at large, instead of six from each of the twenty-four wards; and one making the number of Associate Justices of the Superior Court ten instead of nine. Constitutional amendments were proposed, to be approved by the next Legislature, and then submitted to the people for ratification, which provide that sheriffs, district attorneys, and clerks of courts, shall be appointed by the Governor, instead of being elected by the people.

Early in the session Henry L. Dawes was elected to the United States Senate for the full term of six years from the 4th of March, to succeed William B. Washburn, who was elected in 1874 to fill the vacancy caused by the death of Charles Sumner.

The political campaign of the year was one of uncommon interest. The Republicans had been defeated in 1874 in consequence of the nomination of Mr. Talbot, who was identified with the policy of the prohibition of all sale of intoxicating liquors, and who was nominated

through the efforts of the prohibitionists in the party. They began early in the season to move again in his behalf, but were checked by a letter from him addressed to the Secretary of the Republican State Committee, declining to permit the use of his name. He said in this letter:

Regarding as I do the success of the Republican party as necessary to the pacification of the Southern States; to the restoration of our currency to a sound basis, as the only means of reviving trade and securing the continued prosperity of the country; and to an advancement of the standard of public virtue by furthering all the moral and religious efforts of the times, I consider it our paramount duty to make such a gubernatorial nomination as shall best conduce to the entire harmony of the party. Our Commonwealth has just entered upon an experiment in the treatment of the only question upon which a serious difference of opinion exists within our party. While I have seen no reason to change my often-expressed views upon the subject, my own judgment leads me to concur with those who believe that the best interests of temperance demand that the present law for the regulation of the liquor-traffic should receive a fair, thorough, and impartial trial, and though my whole influence and my honest efforts are pledged to secure this, yet I can but recognize the fact that my pronounced views upon this question might, were I put in nomination, create a doubt as to the sincerity of my purposes, and give rise to a suspicion that the experiment would not receive a fair trial at my hands. Should a wide-spread distrust, born of such doubts and suspicions, manifest itself at the election, the cause of temperance might not only receive a severe check, but a breach might thereby be opened in the ranks of the Republican party in this State, the consequences of which would be disastrous both at home and abroad. I desire to avert this so far as it may lie in my power to do so, preferring to sacrifice my personal aspirations rather than imperil a triumph dearer to me than my own individual success.

A warm canvass on the Republican nomination preceded the convention, a large portion of the party urging the claims of Alexander H. Rice, of Boston, and another portion those of Dr. George B. Loring, of Salem, while a third element advocated the selection of Charles Francis Adams, of Quincy. The Democrats conducted their canvass quietly and harmoniously. A new National Union party was organized in Boston, of which General N. P. Banks was announced as one of the leading spirits, and an address to the people was issued, but the organization developed very little strength or influence. Certain men who had been prominent in the "Liberal Republican" movement of 1872 also issued an address, announcing their formal union with the Democrats.

The Republican convention met at Worcester on the 29th of September, and organized by the selection of Vice-President Wilson as permanent chairman. He made a speech, counseling harmony and a hearty union of all the elements of the party for the accomplishment of the work of reform that was needed, and urging the necessity for the continued ascendancy of the Republican party. On the first ballot there were 451 votes for Alexander H. Rice, 332 for George B. Loring, 253 for Charles Francis Adams, 35 for Henry L. Pierce, 6 for Thomas Talbot, and 7 for other

candidates. On the second ballot there were 497 for Rice, 225 for Loring, 260 for Adams, 51 for Pierce, and 13 scattering. On the third ballot the supporters of Mr. Loring combined in a measure with those of Rice, and the latter was nominated, receiving 576 votes out of a total of 998, Adams receiving 249, Loring 99. On motion of Colonel Charles H. Taylor, leader of the Loring forces, the nomination of Mr. Rice was made unanimous. The rest of the ticket was made up as follows: Lieutenant-Governor, Horatio G. Knight, of Easthampton; Secretary of State, Henry B. Pierce, of Abington; State Treasurer, Charles Endicott, Jr., of North Brookfield; Attorney-General, Charles R. Train, of Boston; Auditor, Julius L. Clarke, of Newton. A State Central Committee was chosen in accordance with nominations made by a committee. The platform adopted was as follows:

The Republicans of Massachusetts, in convention assembled, reaffirm their allegiance to the great purposes and principles of the Republican party; they congratulate themselves that nothing in their record makes it necessary for them to give pledges that they accept and will abide by the settlement of war issues made in the thirteenth, fourteenth, and fifteenth amendments to the Constitution of the United States; and they congratulate the country that the Democratic party has at last formally professed to abandon its long, bitter, desperate, and unavailing struggle, first to prevent, and afterward to overturn, that settlement. This profession is both the most humiliating confession of past folly ever extorted from a political organization, and a signal tribute to the invincible righteousness of Republican principles. The accusation that the Republican party seeks to keep alive old issues in order to avoid new ones, is unwarranted. Our past, at least, is secure. Able to review the record without remorse, we cheerfully commit it to history, and with the courage inspired by success in a noble cause we address ourselves to the new duties of the new era of the nation.

It is therefore declared: That the Republican party of Massachusetts will support no man for official position whose personal character is not an absolute guarantee of fidelity to every public trust, and they invoke the condemnation of the ballot-box upon any candidate for office who fails of this test, whatever may be his party name or indorsement.

That reform in the civil service is a work which no party can give over or slacken, and for the elevation and purification of that service the Republican party will continually and faithfully strive, welcoming the coöperation of their opponents in whatever quarter it may appear, to the end that every corrupt and unworthy office-holder, without distinction of party, may be driven from place, and that official malfeasance may be hunted and punished, wherever the pursuit may lead or the blow fall.

That the Republicans of Massachusetts, in the administration of State affairs recognizing no privilege of class, no antagonism between labor and capital, but deprecating any attempt to arbitrarily fetter either, whether on the part of employed or employer, will support such measures as shall develop the resources of labor and of capital alike, stimulating one and diffusing the other into channels of common prosperity; as also all measures that regard the promotion of temperance, education, good morals, and the equal rights of all American citizens, irrespective of sex, the maintenance of order, the honest enforcement of existing laws, rigid economy and retrenchment in every department of the government of the Commonwealth, and reduction of taxation.

That the reduction of the national expenditures during the last fiscal year by more than twelve million dollars, following a constant reduction during the whole period of the present Administration, is a gratifying proof of the earnest endeavors of the Republican party by economy, frugality, and fidelity in the public service, to lighten the public burden.

That the President of the United States is entitled to the gratitude of the country for the independence, courage, and good sense with which, in urgent crises of affairs, he has assumed the great responsibilities of his office, and maintained the national honor and credit.

That the Republican party hails with exceeding joy the many evidences of reconciliation in spirit and in purpose, as well as of peace in fact, which have taken the place of bitterness and disturbance in the restored States, and makes haste to testify its anxiety to meet reconciliation with confidence, and every proof of peace with proof of affection and regard; that we have no more earnest desire than that our brethren at the South, without distinction or exception of race or party, may enjoy to the fullest extent those inestimable blessings to which we owe all our prosperity—universal free education and security of personal rights under local self-governments, without the necessity of any interference from abroad.

That the Republicans of Massachusetts welcome all auguries and evidences that the Centennial of American Independence will be celebrated by the complete restoration of fraternity, and they express the opinion that the time has come for the removal of all remaining political disabilities.

That sound reason as well as the wise and unbroken usage of the republic, illustrated by the example of Washington, requires that the tenure of the chieftainship of the United States should not exceed a second term.

That the national Government is sacredly bound in the interest of the common welfare, in good faith, in the light of all experience and history, to fulfill its promises by the speediest possible return to specie payment.

That an irredeemable currency is a national evil, and, when it continues beyond the necessity of its creation, a national reproach.

That the demoralization of values, caused by inflation of the national currency—while it tends to place the earnings of labor, which depend on steadiness and uniformity in the measure of value, in the power of speculators in gold and credit—also involves the demoralization of public and private conduct, credit and expenditure; speculation in the place of thrift, ultimate prostitution of trade and industry, risk of increasing crime and dishonor, and the whole train of evils which follow any departure from the homely virtue that keeps its word and pays as it goes.

That while we gladly count among the most significant assurances of the good work of the Republican party its regenerating influence upon our Democratic fellow-citizens, as shown in the better utterances of their recent convention in this hall, in their unreserved acceptance of the constitutional results of a Republican statesmanship, and in their nomination to office of men trained in Republican teachings and service, we protest that it would be the height of impropriety to commit all that has been achieved for union, freedom, and human rights, to the keeping of a party which had no heart for the work, and has no stake in the glory.

The Democratic Convention was held at Worcester on the 22d of September. It was characterized by a good deal of spirit and by general harmony. After organization had been effected, and some very hopeful speeches had been made, Governor William Gaston was nominated by acclamation, amid general enthu-

siasm. General William F. Bartlett, of Pittsfield, known in former years as a Republican, was nominated for Lieutenant-Governor by acclamation and with cheers and plaudits. The rest of the ticket was made up by a committee, and adopted as a whole as follows: For Secretary of State, George H. Monroe, a Liberal Republican; for Treasurer, Weston Howland, of Fairhaven; for Attorney-General, George F. Verry, of Worcester; for Auditor, John E. Fitzgerald, of Boston. A little contest sprung up as to the method of choosing the State Central Committee, which resulted in the election of one member from each senatorial district by the delegates therefrom, instead of the nomination, as usual, of the whole body by a committee consisting of one from each congressional district. Delegates at large to the National Convention were also elected in a report of a committee of thirteen appointed by the chair. The platform of the convention, which was unanimously adopted, was as follows:

The Democrats and Liberal Republicans of Massachusetts, assembled by their delegates in convention to consider the public exigency and organize for the great work of political reform, appealing to all honest men for cooperation in their efforts, declare and affirm as the basis of their action—

1. We reiterate the declarations comprehensively made by the National Convention at Cincinnati and Baltimore in 1873, accepting the recent amendments to the Federal Constitution as a full, final, and permanent adjustment of political controversies incident to the late war.

2. We demand for the Union the support in full vigor of all its constitutional powers as the supreme authority, utterly repudiating all claim of right by any State to secede from the Union or to nullify its laws; and we demand for each State as equally inviolable the right to govern itself at its sovereign pleasure, subject only to the limitations and obligations of the Federal Constitution.

3. In the interests of public morals, the nation's credit, and the common welfare, we oppose any further issue by the Government of a currency inconvertible with gold—the world's recognized measure of values; and we favor a speedy return to specie payments as essential to the revival of the commerce, business, and credit of the country, and to the welfare of the laboring masses.

4. We arraign the Republican party for its extravagant expenditures and profligate waste of the people's money; for its corruption; for its peculations; for its contempt of constitutional obligations; for its extortionate increase of sinecures and of the salaries of our public officers; for its oppressive, unjust, and defective system of taxation, finance, and currency, which have degraded public and private morality and brought upon us the present depression in the commercial and industrial interests of the country; for its centralization of powers and its encouragement of monopolies and corporate corruption; for its continuance of incompetent and dishonest men in office; and for its general mismanagement of both State and Federal Governments.

5. We view with alarm the increase in this Commonwealth, under Republican administration, of the public debt by prodigal appropriations for objects not demanded by the public interest. We denounce unnecessary taxation as a great crime. We demand a reduction of State expenditures, rigid economy, and the utmost limitation of the practice of mortgaging the industry of the future for purposes of doubtful expediency.

6. The interests of capital and labor are identical, and any attempts to produce antagonism between the two must be injurious to both. We favor such legislation as will secure to both an open field and fair play, and to both equal rights and just rewards under the law.

7. We congratulate the good citizens of the Commonwealth upon the removal of the odious prohibitory law from the statute-books, and we confidently expect that the present law, with such modifications as experience shall suggest, will tend to promote public order and morality, and the best interests of temperance.

8. The Democratic party believe in government of the people by the people for the people, and therefore oppose any constitutional amendments which limit or restrict the election of public officers by the people.

9. We take an honest pride in the cordial and enthusiastic approval by the people of the whole country on the 17th of June, 1875, of the policy of reconciliation, peace, and fraternity, advocated by the Democratic and Liberal Republican parties in 1872, and we welcome with especial satisfaction the assurance that that policy will be inaugurated by the Administration to be placed in power in 1876.

10. That our present Governor, by the wise and prudent execution of his high trust, the dignity and fairness which have distinguished his administration, has merited the approbation of the people; and we confidently point to his spotless record as the highest assurance that the continuance of the confidence reposed in him by this convention will redound to the best interests of this Commonwealth.

11. We have the satisfaction to commend to the people General William F. Bartlett, the gallant and modest soldier whose wounds in the war have hardly ceased to bleed. The ability in civil life and the stern uprightness of his principles on all matters of public life and policy make him peculiarly fit for the high office to which he has been nominated, and we delight to commend him to the people as one who has not sought the laurels of civil office, but on whom they have been spontaneously thrust by this convention as a tribute to his merit.

12. This convention commend to the people of this Commonwealth the upright and able gentlemen selected as candidates for the other State offices, in the confident belief that they will be found competent and honest in the trusts for which they have been nominated.

The Democratic State Central Committee received a letter from General Bartlett, dated October 8th, in which he stated that his nomination as Lieutenant-Governor was a surprise to him, inasmuch as he had refused in advance to allow his name to be used, and declared that he could not make the necessary sacrifice to accept any political office. "If the time for such sacrifice comes," he said, "I shall be ready to make it, whether it be with the Democratic party or the Republican party (or, better still, the honest half of both), so it shall be the party which the near future impetatively calls for to lead the way of true reform, pure administration, and intelligent progress; a party which shall neither be obliged to content itself with the recital of its past achievements nor atone for its past mistakes." The name of John Quincy Adams, of Quincy, was substituted for that of General Bartlett on the ticket, by the committee.

On the 6th of October conventions were held by the Prohibitionists and Labor Reformers. The former took place in Boston, and

was animated chiefly by hostility to Mr. Rice, the rest of the Republican ticket being regarded as acceptable. The only nomination made was that of John I. Baker, of Beverly, as a candidate for Governor. The following resolutions were adopted:

Resolved, That there can be no greater peril than party competition for the liquor vote; that any party not openly opposed to the traffic will engage in this competition, will court the favor of the criminal classes, will barter the public morals, the purity of the ballot, and every object of good government for party success.

Resolved, That the Republican party is divided on this question, and we can have no hope from a divided party representing the two extremes of license and prohibition; it can pronounce for neither the life nor death of the dram-shop system, and its opposing forces neutralize each other so that it can neither adopt any policy, execute any laws, nor make any issue on this question.

Resolved, That the present emergency, the safety of the Republican party and of the cause of prohibition, depends upon the amputation of the liquor wing of the party, making the party a unit for the right. That can most effectually be secured by defeating the license candidate for Governor, Alexander H. Rice.

The last resolution caused considerable discussion, but was finally adopted. An address to the people was also issued, denouncing Mr. Rice's nomination by the Republican party, and calling on all believers in temperance to vote against him.

The Labor Reformers met at Worcester. The attendance was very small and the proceedings characterized by a good deal of warm discussion. The following ticket was agreed upon: For Governor, Wendell Phillips, of Boston; Lieutenant-Governor, William F. Bartlett, of Pittsfield; Secretary, Israel W. Andrews, of Danvers; Treasurer and Receiver-General, Henry B. Coffin, of Fall River; Attorney-General, H. B. Maglathlin, of Duxbury; Auditor, John E. Fitzgerald, of Boston.

Among the resolutions adopted were the following:

Resolved, That the power and strength of the labor movement should be concentrated upon the single and simple legislation necessary to deal with the congregated and factory labor of the Commonwealth, by which the hours of labor shall be reduced, a system of factory inspection be adopted, and fire-escapes and protection from dangerous machinery be provided.

Resolved, That the manufacturers of Fall River, in the pitiless and unreasoning conditions they have imposed upon their help, are earning the execrations of all mankind; that they are treasuring up wrath against the day of wrath, and their success is demonstrating the fact that between them and their workmen is a slave-and-master relation, which means war, and a justification of all that will follow sooner or later, when an oppressed people find themselves able to overthrow their oppressors.

Resolved, That the Government should exercise the right to refund its bonded debt by the issuing of new bonds, payable on demand; the retirement of five-twenties and other bonds; the new issue to bear interest at the rate of 3.65 per cent., and receivable for deposits as the basis of circulation.

Resolved, That the currency of the country shall be a legal tender in payment for duties on imports

and all debts, except where an agreement has been made to pay in coin; said currency to be interchangeable into 3.65 registered bonds at the option of the holder.

Resolved, That the national-bank system is one of the greatest swindles ever perpetrated on a patient people, practically allowing aggregated capital to purchase Government securities at ninety per cent. discount from their face. We are in favor of the immediate retirement of the national-bank currency, with suitable provision for banks of discount and deposit.

Whereas, We recognize in the present depressed condition of industry, in the rapid growth of great monopolies, in the increasing disparity of classes, in the corruption of government, national, State, and municipal, and in the general demoralization of public opinion, the existence of some great fundamental evil that lies at the basis of our social and industrial system, which no merely remedial measures are able to reach:

Resolved, That we hereby invite the delegates of all labor organizations throughout the land to meet us at Philadelphia on the 3d day of July, 1876, to confer together on the state of the nation, especially in relation to the national industry, and to devise such means as are adequate for securing justice to all classes of our citizens; and—

Whereas, All the political parties and candidates now asking for public support are more or less in the interest of privileged classes, and inimical to the best interests of workingmen:

Resolved, That we advise all workingmen to abstain from voting for such candidates and from endorsing their platforms.

Resolved, That we recommend the adoption of a political platform to suit the just demands of labor, and the nomination of candidates who shall be selected solely and wholly in the interest of labor, and to give them unanimous confidence and support.

The election, which occurred on the 2d of November, resulted in the choice of the Republican candidates. The total vote for Gov-

ernor was 172,909, of which Rice received 88,689, Gaston 78,333, Baker 9,124, Adams 1,497, and Phillips 316, with 276 scattering. Rice's plurality over Gaston was 5,306. The largest Republican vote was 97,903 for Charles Endicott for Treasurer, giving him a majority of 23,136 over Weston Howland, the Democratic candidate. The Legislature of 1876, elected at the same time, consists of 80 Republicans and 9 Democrats in the Senate, and 182 Republicans and 58 Democrats in the House; Republican majority, 21 in the Senate, 124 in the House, and 145 on a joint ballot.

ALEXANDER HAMILTON RICE, Governor of Massachusetts, was born in Newton Lower Falls, August 30, 1818, his father being Thomas Rice, a paper manufacturer. He was educated at Union College, Schenectady, N. Y., and after graduating in 1844 went into business as a paper-dealer in Boston. In 1856 he was elected to the Common Council, and in 1857 held the office of president of that body; he became mayor of the city in 1857, and held that office until 1859. During his term of office as mayor, he was active in promoting the best interests of the city, and several important enterprises were successfully carried out by his personal influence and exertions. He was a member of the Thirty-eighth and Thirty-ninth Congresses, and held the position of chairman of the Committee on Naval Affairs during the civil war. Mr. Rice has continued in active business, being still a member of the firm which he entered over thirty years ago.

A State census of Massachusetts was made this year. The following table shows the statistics of population by counties:

COUNTIES.	Cities and Towns.	Dwelling-Houses.	Dwellings occupied.	Dwellings unoccupied.	Families.	Males.	Females.	Population.	Rateable Polls.	Legal Voters.	Non-rated Voters.	Alien.
The State.	19 cities. 822 towns.	267,228	255,518	11,705	353,951	794,284	857,868	1,651,652	449,683	351,066	69,267	73,991
Barnstable.	14 towns.	7,840	7,396	514	8,838	15,643	16,501	32,144	9,109	8,497	873	50
Berkshire.	31 towns.	12,023	11,496	527	14,167	33,684	34,561	68,245	17,369	14,135	2,701	206
Bristol.	3 cities. 16 towns.	19,728	18,870	858	23,557	68,948	67,704	136,652	35,383	26,576	6,057	674
Dukes.	6 towns.	1,070	1,029	41	1,135	1,949	2,122	4,071	1,205	1,117	18	25

Hampshire.	23 towns.	8,254	7,948	306	9,594	21,584	23,229	44,813	11,373	9,250	1,265	153
Middlesex.	4 cities. 50 towns.	49,772	47,347	2,525	60,714	135,304	148,768	284,072	75,323	59,085	12,571	13,291
Nantucket.	1 town.	1,003	870	133	938	1,389	1,312	2,701	904	890	30	7
Norfolk.	24 towns.	16,237	15,647	640	19,456	42,356	45,833	88,189	23,715	19,133	3,569	400
Plymouth.	27 towns.	14,447	18,719	728	16,369	34,339	35,113	69,452	19,792	17,439	1,296	160
Suffolk.	2 cities. 2 towns.	47,006	44,708	2,308	75,461	173,052	191,323	364,375	101,642	73,757	20,630	24,503
Worcester.	3 cities. 56 towns.	33,057	31,913	1,144	46,245	108,581	106,711	215,292	57,637	44,387	8,423	900

The population of the cities of the State is as follows: Boston, 341,919; Lowell, 49,677; Worcester, 49,265; Cambridge, 47,838; Fall River, 45,340; Lawrence, 34,907; Lynn, 32,600; Springfield, 31,053; Salem, 25,955; New Bedford, 25,876; Somerville, 21,868; Chelsea, 20,-

695; Taunton, 20,429; Gloucester, 16,754; Haverhill, 16,260; Newton, 16,105; Haverhill, 14,628; Newburyport, 13,823; Fitchburg, 12,389.

At the beginning of the year the funded debt of Massachusetts was \$29,465,204, to which the following additions were made:

SCRIP ISSUED DURING THE YEAR.

Troy & Greenfield Railroad loan (sterling).....	\$1,497,980 00
Troy & Greenfield Railroad loan (dollars).....	1,800,000 00
Worcester Hospital loan.....	750,000 00
Danvers Hospital loan.....	250,000 00
State-prison and Women's Prison.....	1,392,380 00

\$5,090,360 00

Payments were made amounting to \$669,000, leaving the debt at the end of the year \$38,886,-464, classified as follows:

Railroad loans.....	\$17,768,996 00
War loans.....	12,734,188 00
Ordinary loans.....	8,386,980 00

\$38,886,464 00

Net increase of funded debt in 1875..... \$4,431,360 00

The sinking-funds amount to \$11,725,309.12.

There was a balance in the Treasury at the beginning of the year of \$866,043.75; the receipts on account of revenue for the year were \$7,322,-696.37; balance at the beginning of the year belonging to funds and loans, \$1,607,812.25; receipts from funds and loans, \$8,658,408.76; total receipts from all sources, \$18,454,960.13. The payments on account of revenue amounted to \$7,227,914.24; payments on account of funds and loans, \$5,920,099.18; total payments, \$13,-148,013.42, leaving a balance at the end of the year of \$5,306,946.71, of which \$960,824.88 belonged to the revenue, and \$4,346,121.83 to funds and loans. The estimated expenditures for 1876, to be met from the ordinary revenues, are \$4,990,700; estimated receipts, \$3,593,-398.68, leaving a deficit of \$1,397,301.82. The total valuation of real estate for the year was \$1,311,031,526; personal estate, \$568,815,163. The total of county indebtedness is \$1,520,-645.40; municipal indebtedness, \$80,427,245. The number of corporations in the State is 1,389; the aggregate valuation of their stock and real estate is \$239,848,414.

There are 54 mutual fire-insurance companies in the State, with a capital of \$5,627,299; 9 mutual marine and fire, and marine insurance companies, with \$2,085,900 of capital; and 26 joint-stock companies, with \$6,567,000 capital: total capital of insurance companies, \$14,280,-199. There are 129 insurance companies doing business in the State, whose aggregate capital is \$69,226,546.

The number of savings-banks in the State is 180; amount of deposits, \$288,396,584; deposits made during the year, \$59,980,144; withdrawals, \$46,996,086. The total number of accounts was 720,639, an increase of 18,540; the average account for each depositor was \$144. Dividends were paid by 177 banks, varying from 5 to 8 per cent. The only new bank beginning business during the year was at Chicopee Falls.

There are now 65 railroad corporations in the State, with an aggregate stock of \$118,-261,385.90, and indebtedness amounting to \$53,355,052.92. The increase of stock for the year was \$1,194,487.88, increase of debt \$4,797,-714.27. The number of miles of track in use is 2,761, an increase of 47 for the year. The average cost of all the railroads in the State

for construction and equipment is \$64,657.06 per mile. The total earnings of all the roads for the year were \$32,589,485.63, a falling off of 5.9 per cent. The total net income reported is \$9,640,657.16, or 5.7 per cent. on the permanent investment. The number of passengers carried was 42,085,846; tons of freight moved, 10,927,812. There was a general decrease in business and receipts, and an increase in running expenses. There were very few casualties, and no person was killed, and only six injured from causes over which they had no control, or to which they did not contribute by their own carelessness. The whole number of casualties from any cause was 242, of which 119 resulted in death. The Hoosac Tunnel and its connections are not yet completed. It has been necessary to arch a large portion of the tunnel, and to change the grades and location of some of the connecting roads, besides laying additional track. The charter of the Boston, Hoosac Tunnel & Western Railroad Company, which was placed in charge of the work in 1874, expired on the 1st of July, and it passed into the hands of the manager, Jeremiah Prescott, appointed by the Governor and Council. The contracts for the completion of the line required the work to be finished by December 1st, but it has been necessary to extend the time. The appropriations made for it in 1874 and 1875 amount to \$2,200,000, of which all but \$758,552 had been expended before the 1st of January, 1876. The total cost of the tunnel and connecting railroads, from first to last, when the present appropriations are exhausted, will have been \$16,538,126.48. The line has been put in connection with through-routes for the West, and both passenger and freight traffic have begun through the tunnel. The receipts from tolls, from July 15th, when the "toll-gate" plan of management went into effect, to the end of the year, amounted to \$36,592.98; the expenses of operation, for the same period, were \$23,399.32, leaving \$13,193.66 for the net receipts.

The State militia now consists of 424 commissioned officers and 6,123 enlisted men. The cost of its support for the year was \$316,148.19, of which \$85,000 was for new uniforms.

The school-fund of Massachusetts amounts to \$2,117,732.82. There are five normal schools and one normal art-school in the State. The Normal School at Framingham had 127 pupils during the year, that at Bridgewater 210, that at Westfield 176, that at Salem 274, that at Worcester 99, and the Normal Art-School in Boston 330.

The institutions under the charge of the State Board of Charities are the State-prison at Charlestown; the State Workhouse at Bridgewater; Lunatic Hospitals at Worcester, Taunton, and Northampton; the State Almshouse at Tewksbury, with branches at the Bridgewater Workhouse, and the Primary School at Monson; the State Primary School at Monson; Reform School at Westborough;

Industrial School at Lancaster; and the School for Idiotic and Feeble-minded Youth at South Boston. The value of the real estate of these establishments is \$2,642,149.66, an increase of

\$241,238.27 within the year; personal property, \$605,705.42, a decrease of \$3,243.65. The cost to the State of these institutions for 1875 is shown in the following statement:

INSTITUTIONS.	Regular Appropriations for 1875.	Sum expended.	Surplus.
Worcester Hospital.....	\$95,000 00	\$9,325 60	\$14,507 07
Taunton Hospital.....		21,017 95	
Northampton Hospital.....		49,949 88	
Tewksbury Almshouse.....	98,000 00	96,298 47	1,701 53
Monson Primary School.....	44,000 00	44,000 00	00 00
Bridgewater Workhouse.....	42,000 00	42,986 87	986 87
Westborough School.....	55,000 00	54,651 44	348 56
Lancaster School.....	25,000 00	24,297 07	702 93
State-prison.....	145,000 00	134,630 79	10,369 21
Eye and Ear Infirmary.....	7,500 00	7,500 00	00 00
Massachusetts School for Idiots.....	20,000 00	20,000 00	00 00
Totals.....	\$597,500 00	\$506,587 07	\$90,912 93

The various agencies supported in connection with them, with their cost, are as follows:

AGENCIES.	Appropriations for 1875.	Amounts expended.	Surplus.
Board of Charities and its departments.....	\$42,700 00	\$36,635 44	\$6,064 56
Agent for discharged convicts.....	3,000 00	2,999 66	34
Discharged female prisoners.....	1,500 00	1,500 00	00 00
Soldiers' Employment Bureau.....	3,000 00	3,000 00	00 00
State paupers' support, including Indians and small-pox cases.....	46,500 00	24,821 44	21,678 56
State paupers' burial.....	5,000 00	2,853 50	2,146 50
" " removals.....	10,000 00	9,728 86	271 14
" " transportation.....	700 00	773 75	73 75
State pauper convicts' support.....	1,000 00	75 00	925 00
Totals.....	\$118,400 00	\$82,871 15	\$35,528 85

The number of convicts in the State-prison, on the 1st of October, was 689, an increase of six, 169 having been received and 163 discharged during the year. The total expenditures were \$24,264, receipts \$56,526, showing a deficit of \$67,738 against a deficit of \$42,574 in 1874, and a surplus of \$23,427 in 1873. The Workhouse at Bridgewater contained 422 inmates, against 375 in 1874, 570 having been admitted and 523 discharged, including 55 by death, during the year. The receipts were \$42,670.37; expenditures, \$42,823.31.

At the Worcester Insane Asylum there were 478 patients, a decrease of seven, 358 being admitted and 365 removed during the year. The total receipts were \$386,688.65; expenses, \$364,881.48. At the Taunton Asylum there were 602 patients, against 508 in 1874, 477 being admitted and 383 removed during the year. The receipts were \$133,227.43; disbursements, \$132,194.24. At the Northampton Asylum there were 476 patients, 143 being admitted and the same number removed; receipts of the institution, \$102,386.66; expenses, \$101,258.53. The Tewksbury Almshouse had 792 inmates, 286 of whom were insane and 506 not insane, against 805, including 319 insane and 486 not insane, in 1874. The receipts of the institution were \$104,909.23; expenses, \$104,130.90. The State Primary School at Monson for dependent and neglected children contained 512 inmates on the 1st of October, against 493 in 1874, 292 being received and 273 removed; receipts for the year,

\$46,115.98; expenditures, \$46,115.98. The Reform School at Westborough had 353 inmates, an increase of 87 during the year, 17 being received and 141 removed; receipts, \$79,920.51; expenditures, \$76,681.23. The Industrial School for Girls at Lancaster had 105 inmates, against 82 in 1874, the number received being 70, and discharged and otherwise removed 47; receipts, \$36,881.41; expenditures, \$33,451.83. The School for Idiotic and Feeble-minded Youth had 102 pupils at the beginning of the year, and 120 at the end. The total receipts were \$39,452.52; expenditures, \$29,327.57. The agency for the indigent poor attended to the cases of 2,409 patients during the year. The State agency for discharged convicts dealt with 365 cases, at a cost of \$3,053.66. The temporary asylum for discharged female prisoners at Dedham cared for 136 women and 41 children during the year, at a cost of \$5,715, only \$1,500 of which was derived from the State. The Massachusetts Infirmary at West Roxbury had 37 children under its care. Its expenses were \$10,866.09, of which \$6,000 were covered by State appropriation. The Disabled Soldiers' Employment Bureau at Boston furnished employment to 676 applicants, at a cost of \$3,355.12, the State appropriating \$3,000. The Eye and Ear Infirmary at Boston treated 8,122 cases. Its receipts were \$17,206.37, of which \$7,500 was derived from the State; expenses, \$15,595.31.

The average number of inmates in the courts

* Deficit.

prisons for the year was 2,264; total expenditures, \$66,417.96; total receipts from labor, \$94,373.36. The Boston House of Industry at Deer Island had an average of 809 inmates, and expended \$101,787.82. There are five private institutions for the insane in the State: the McLean Asylum at Somerville, with 159 inmates; the Boston Lunatic Hospital, with 202; the Essex County Receptacle at Ipswich, with 62; Herbert Hall at Worcester, with 12; and Shady Lawn at Northampton, with 6. The whole number of paupers fully supported by towns and cities was 4,736; partly supported, 21,268; vagrants, 1,225. Of the 341 cities and towns, 224 used the almshouse. The total cost of city and town pauperism is calculated at \$1,172,416. The construction of a new State-prison, with 750 cells, at a cost of nearly \$1,000,000, has been begun at Concord. A Reformatory Prison for Women is also in course of construction at Sherborn; the amount appropriated for the latter purpose is \$300,000. The question of repealing the act authorizing the new prison at Concord to be constructed is agitated, it being claimed that a much smaller one should be built, and that at Charlestown repaired and improved.

On the 19th of April the centennial anniversary of the opening of the Revolutionary struggle was celebrated at Lexington and Concord. At the former place the exercises began on the evening of Sunday the 18th with religious services in a pavilion on the common, the Rev. William Adams, D. D., of New York, delivering an appropriate address. At sunrise on the morning of the 19th a salute of one hundred guns was fired. The public exercises began at ten o'clock in the pavilion, Thomas Merriam Stetson officiating as president of the day. An oration was delivered by Richard H. Dana, Jr., of Boston, and hymns written for the occasion by John G. Whittier and Mrs. Julia Ward Howe were sung. Statues of Samuel Adams and John Hancock were unveiled, an address being pronounced on the occasion by the Hon. Charles Hudson, of Lexington. A monument, representing the minute-man of 1776, was also dedicated on the public green. These exercises were followed by a grand military and civic procession, and a public dinner was given at 2 P. M., in a tent on the common, at which provision was made for 3,500 guests. Addresses were made at the dinner by several prominent gentlemen in response to appropriate toasts. A promenade concert began at eight o'clock in the evening, followed by a grand levee and ball in the pavilion, one feature of which was a reception held by the President of the United States. A collection of Revolutionary relics was displayed at the Town-Hall, and all places of historic interest and many public and private buildings were tastefully decorated in honor of the occasion. A vast concourse of people from all parts of the country attended the celebration.

The celebration at Concord occurred simul-

taneously with that at Lexington, and was also largely attended, many of the visitors dividing the day between the two places. Here too a salute of one hundred guns was fired at sunrise, and a grand military and civic procession was formed at nine o'clock under the direction of General Francis C. Barlow as chief-marshal. Literary exercises took place in a pavilion on the provincial parade-ground, the Hon. E. R. Hoar acting as president of the day. After a brief address by Ralph Waldo Emerson, of Concord, an oration was delivered by George William Curtis, of New York, and a poem was read by James Russell Lowell, of Cambridge. At the conclusion of these exercises a public dinner was served in a tent on the same grounds, at which the President of the United States and several members of his cabinet and other distinguished guests were present. The proceedings closed with a ball in the evening at Agricultural Hall on the Fair Grounds. Fireworks, inscriptions, and decorations, were incidental features of the display.

The one hundredth anniversary of the battle of Bunker Hill was celebrated in Boston on the 17th of June, under the auspices of the city government, and the occasion drew together an immense throng of people from all parts of the country. The day was ushered in by the ringing of bells and firing of guns, and streets and buildings were profusely decorated, especially along the line of march of the procession. The most conspicuous feature of the celebration was the grand pageant, including prominent military and civic organizations from various States of the Union, and representations of the trades and industries of Massachusetts. A military review was held in the morning, after which the procession was formed. This was about ten miles long, and occupied four hours in passing a given point. It was greeted throughout the line of march with great enthusiasm from the vast congregation of spectators. After marching through some of the principal streets of the city, it disbanded at Bunker Hill, where commemorative exercises were held under a large tent. An oration was delivered by the Hon. Charles Devens, of Worcester, and addresses were made by George Washington Warren, General William T. Sherman, Vice-President Henry Wilson, Governor Hartranft, of Pennsylvania, and others. In the evening numerous dinners and receptions were given to the different military, masonic, and other organizations, and fireworks and illuminations were displayed on Boston Common and elsewhere.

On the 3d of July the centennial anniversary of Washington's taking command of the American armies was celebrated in Cambridge. Firing of guns, ringing of bells, music, and illuminations, accompanied the celebration. The commemorative exercises were held in a tent on the common, and consisted of a poem by James Russell Lowell, and an oration by the Rev. Andrew P. Peabody, of Harvard College.

A dinner in the Harvard Memorial Hall in the afternoon, and a promenade concert on the common in the evening, concluded the proceedings. Among the minor celebrations of the year was one at Gloucester on the 9th of August, in memory of an encounter between the citizens of that place and the British sloop-of-war Falcon.

MAUCH, KARL, a German explorer, born at Ludwigsburg in 1837; died April 5, 1875. He studied in London, traveled in 1860-'66 through the Transvaal Republic, crossed the water-shed of the Zambesi and Limpopo, and penetrated almost as far as the neighborhood of Tete on the Zambesi. In 1867 he journeyed in a more northwesterly direction, discovered two paying gold-fields, explored in 1868-'69 Maselikatse from Limpopo to Inyati, and in 1870 undertook a journey to the Delagoa Bay. In 1871 he found, in latitude $20^{\circ} 14'$ south, and longitude $31^{\circ} 48'$ east of Greenwich, 41 miles from the port of Sofala, the ruins of Zimbabwe, whose extreme antiquity is proved by the fact that the walls are made of hewn granite, without mortar. An account of these ruins, and the gold and diamond fields found in the neighborhood, caused Mauch and Petermann to believe that these plains were the land of Ophir spoken of in the Bible, where the Phœnicians obtained their gold, ivory, and precious stones. After returning to Germany, he engaged in commercial pursuits. His death was caused by a fall from the third story of his house to the pavement below.

METALS. Gallium.—This is the name given to a new metal discovered by M. Lecoq de Boisbaudran, of France. The discovery was first publicly announced in a note from M. Lecoq de Boisbaudran, presented by M. Wurtz to the Académie des Sciences at its meeting of September 20, 1875. Particulars were communicated under seal on the 27th of the previous August. This new element was first found in the chemical examination of a blende from the mine of Pierrefitte, in the Pyrenees. It has not yet been obtained by itself, traces of zinc and cadmium being constantly associated with it. From a study of the chloride and sulphate of gallium, salts that have been produced in a nearly pure state, the following properties, as detailed in *Nature*, have been made out:

1. Its spectrum consists of two lines, one much brighter than the other, both situated in the violet, the regions occupied by the brightest lines of the zinc, the place of the former line being at the 417th degree of the scale, and the other at the 404th. The electric spectrum of the chloride is very brilliant; the color of the spark is a beautiful clear violet.

2. In the gas-flame only the line Ga α 417, very faint, and fugitive even with a salt which gave a brilliant electric spectrum, was obtained.

3. The chloride and the sulphate of Ga are precipitated by NH_3 , but the precipitate is redissolved, in great part, in an excess of NH_3 . Taking up with HCl the portion not dissolved by NH_3 , and recommencing the operation, all the Ga is promptly obtained in ammoniacal solution.

4. An ammoniacal solution of sulphate of chloride of Ga is precipitated in the cold or hot state by an excess of acetic acid. The liquor must be extremely diluted.

5. The chloride and the sulphate of Ga are not precipitated in the cold state by the acid acetate of ammonia, but the reaction takes place on heating.

6. The sulphate of Ga is soluble in a 60 per cent. alcohol solution.

7. A salt was obtained which the author believes to be ammoniaco-gallic alum; though, in default of sufficient quantity, he was unable to analyze it or measure the angles.

8. The alum of Ga is soluble in cold water, but, on heating, the salt is decomposed, and the liquor becomes greatly troubled.

9. This alum is not decomposed in the hot state by water with addition of acetic acid.

10. It crystallizes very easily in cubes and octahedra, presenting exactly the aspect of ordinary alum; its solution, evaporated under the microscope, also presents the characteristic changes of known alums.

11. The crystals do not act on polarized light (between two Nicols giving extinction).

12. A small crystal was kept some time under a layer of water, then transferred to a slightly super-saturated solution of aluminio-ammoniacal alum; it immediately increased in it, and caused the crystallization of the liquor.

13. With ammonia in excess, the alum of Ga behaves like the other salts of this metal; a portion of the oxide is precipitated, the other portion remains in solution.

14. The very acid solution of Ga_2Cl_4 is precipitated by the yellow prussiate.

15. The ammoniacal solution of sulphate of Ga is decomposed by the voltaic current. Metallic gallium is deposited on the platinum plate serving as negative electrode. The positive electrode is covered at the same time, with a whitish pellicle, which is easily detached from the platinum, and is insoluble in a large excess of NH_3 . In a first operation 14 mgr. of Ga were deposited in $4^{\text{h}} 30^{\text{m}}$ on a platinum plate of about 185 square millimetres surface. The surface of the positive electrode was about 877 sq. mm. The battery consisted of five bichromate couples (since: 17 cm. $\times$ 10 cm.) coupled in tension. The author presented to the Academy a specimen weighing 8.4 mgr.; it was deposited in $5^{\text{h}} 40^{\text{m}}$ on a surface of about 128 to 124 sq. mm. The positive electrode 877 sq. mm.; the current furnished by the bichromate elements (as above) coupled in tension.

16. Electrolytic gallium forms a very adherent layer; it is hard; it is polished with difficulty by friction with an agate burnisher. A better polish is obtained by strong compression under the burnisher; the metal thus acquires great brightness, and appears whiter than platinum. When the electric current and the relative dimensions of the electrodes are properly regulated, the gallium presents a beautiful dull surface of silvery white, finely granulated, and interspersed with small brilliant points, which the microscope shows to be crystals.

17. Gallium deposited on a platinum plate is not much oxidized during washing in cold or boiling water, nor on being dried in free air raised to about 200° . It decomposes water acidulated with HCl in the cold state, and more rapidly in the hot state with a brisk liberation of hydrogen.

The salts of Ga which M. Lecoq de Boisbaudran has used in his researches have been from the blende of Pierrefitte; he has, however, found the new metal in other ores of zinc, and notably in a transparent blende from Santander. He believes Ga will be met with in all blendes. The Ga he extracted from the blendes comes really from these minerals, and not from metallic zinc.

The author's last researches have confirmed the rarity of gallium in blende. The extreme sensibility of the spectral reaction led him even to over-estimate

the quantities obtained. "I do not think I exaggerate," he remarks, "in saying that in my first observation I possessed at the most $\frac{1}{10}$ of a milligramme of the new substance dissolved in a very small drop of liquid. The spectral analysis of so small a quantity of matter would have been impracticable before the considerable reduction I made in the dimensions of the apparatus for obtaining electric spectra, and without using very small sparks. If, as I suppose, there is no error as to the nature of my alum of Ga, the existence of this salt fixes the atomicity of the new element, and attributes to its oxide the same chemical function as that of alumina. The oxide of gallium, then, will be written Ga_2O_3 ."

Separation and Purification of Metals.—The principle of Pattinson's process for the separation of alloyed silver and lead depends upon the fact that the one body crystallizes before the other, at the moment of partial solidification at a low temperature. The same principle has been found applicable to the separation of other metals whose degree of fusibility may be different. It may be taken as generally true that foreign metals will be held suspended in a crystalline condition in the liquid mass of any metal which may have a lower point of fusion than themselves, provided that the temperature of the liquid bath at the time be lower than the melting point of the foreign metals. The foreign crystallized metals may be then separated mechanically from the liquid bath by filtering. A foreign engineer, M. Curter, has sought to apply this principle to the purification of Bohemian tin, to enable it to compete successfully with the English or Australian qualities. He sought also for filtering material which should have a certain affinity for the liquid metal to be purified, without combining with it. As iron possesses a strong affinity for tin, without chemical combination, it seemed a most suitable material for the purpose. He, therefore, used leaves or sheets of white iron, very thin, measuring about 60 millimetres by 4 millimetres; 500 of these sheets were then driven tightly into an iron frame, by means of two wedges, and this frame was then fixed in the open bottom of a graphite crucible. These leaves would then form an effective filter, the liquid tin being able, by virtue of its affinity, to penetrate between the thin sheets, but the smallest crystal of foreign metals would be excluded.

The tin which was to be filtered was melted first in another crucible, and was allowed to cool until a thin coating of crystals had formed on the surface. After skimming back this skin, the liquid metal already becoming thick was poured into the filtering crucible. The liquid metal then percolated slowly through the capillary interstices of the plates, leaving behind a thick deposit, in which were found iron, arsenic, and copper, concentrated to a high degree, and mixed with a little tin. The metal which had filtered through was almost chemically pure tin. In this way as much as twenty-five quintals of Bohemian tin were perfectly purified in an exceedingly simple and inexpensive manner. Instead of the filter de-

scribed as above, a mass of wrought or cast iron shavings, or the borings submitted to a high pressure in the bottom of a cylindrical vessel, might be employed.

Spectra of Metallic Solutions.—Messrs. Delachanal and Mermet have devised an apparatus which they call a *spectro-electric tube*, for the observation of the spectra of metallic solutions. It consists of a capillary tube traversed by a platinum wire, which moves in it with sufficient freedom to allow the liquid to flow through drop by drop. The capillary tube, surmounted by a reservoir containing the solution for examination, passes through the cork of a second larger tube, placed immediately below it. Through the bottom of this latter passes the second platinum wire, the extremity of which is brought within a short distance of the extremity of the upper one, while the liquid drops between the two. The advantages claimed for this arrangement are that the spark has a fixed direction, and permits the prolonged observation of constant spectra; and, secondly, that the electrodes are inclosed in a tube, and the spectroscope thus secured from chance of damage. Finally, by a special arrangement, the liquid employed is collected as it drops.

Bronzes Incrustes.—This is the name given to a new style of bronze or copper work, ornamented with gold and silver, the manufacture of a Paris firm. The ornamentation is produced by etching and electro-plating, and consists, according to Dr. Meidinger, in the following operations: After the object, which may be of massive copper or bronze, has received the desired form, the drawings are made with water-colors, the body of which is white-lead. If several pieces are to have the same design, it may be printed on as in porcelain and *faïence* painting. Those portions of the surface not painted are colored with varnish. The article is then placed in dilute nitric acid, whereby the paint is dissolved and the surface of the metal is etched to a certain depth. When the etching is finished the article is washed with water, and immediately placed in a silver or gold bath, and a layer of the precious metal deposited by electricity on the exposed portions. When the latter operation is finished the varnish is perfectly removed, and the whole surface ground or polished, so that the ornamented portion is just even with the remainder of the surface. The contours are quite sharp. The surface is then bronzed, which does not change the color of the gold or silver. A specially fine effect is obtained by producing a black bronze of sulphuret of copper on portions of the surface between the silver ornaments. A copper vessel then has three colors, black and white drawings on a red-brown ground of suboxide of copper. The production of an incrustation requires a high degree of manual skill and patience, but no costly machinery; indeed, every brass foundry contains all the necessary tools for the mechanical operations.

A process for bronzing cast-iron, by means of which copper is made so closely adherent that, if chipped off, it takes a scale of iron with it, is also a recent Paris invention. The operation consists in first scouring and then dipping the articles that are to be coppered into a bath of melted chloride or fluoride of copper and cryolite, to which chloride of barium is added. The deposit of copper is perfectly even, not being thicker in the salient parts than in hollows or under-cuttings. A number of large statues have been covered with copper at Val d'Osne, and, among other works, two bulls, larger than nature, presenting each a surface of at least one hundred and thirty-two square feet, and with invariable success. Some of these objects have been exposed to the air, during one summer and two winters, without suffering any injury. The copper deposited on the works is never less than $\frac{1}{16}$ of an inch in thickness. The cost of the ornaments is not more than doubled by this application, and the copper, when carefully treated by a French bronzist, presents an appearance very little inferior to true bronze. The same process is applicable to the tinning of copper or cast-iron vessels; the adherence of the two metals is complete, and the coating of tin may be laid on any desirable thickness.

Purification of Quicksilver.—A new process for freeing quicksilver from the soot and other foreign matter which becomes mingled with it during the operations of condensing and reducing, has been adopted at the new Almaden, and other California mines. The apparatus is the invention of Mr. J. B. Randall and Mr. C. W. Wright. The draft which carries the mercurial fumes from the furnace where the ore is roasting, into and through the condensers takes with it a mixture of fine dirt, particles of carbon, some ash, some undecomposed cinnabar, with various other impurities. These are deposited in the condensers in a condition resembling lamp-black or paste, having been moistened by the steam arising from the fuel and the ore, and as a consequence they become intermingled with the quicksilver. The impure quicksilver is placed in an iron tank, and hot water is added, and the two intimately mixed. Wood-ash or other suitable alkali is added, which exerts a further purifying action. The quicksilver is then drawn off. The apparatus can be kept running continuously, and all the quicksilver is saved by the process.

A New Steel.—A new compound metal, the invention of Mr. Atwood, of Pittsburg, Pa., has been brought into notice during the year. It is made of cast, wrought, and scrap iron, that are melted and united in the presence of a flux that may consist of either carbonate of lime, quartz rock, or any of the silicic-acid compounds that are free from alkali. The combination of the ingredients forming the compound metal may be effected in crucibles, or in furnaces of most any form in which the requisite degree of heat can be obtained. The

proportion of the ingredients to be employed will vary somewhat, however, according to the means or apparatus used for making the combination. When melted and combined in a crucible, cast and wrought iron are combined in equal parts, but, if a cupola furnace is employed, the proportions are five-eighths of cast-iron to three-eighths of wrought-iron. The scrap may be added in any desired proportion to these ingredients. When a combination is conducted in a gas or air furnace, three-eighths of cast-iron, four-eighths of wrought iron, and one-eighth of scrap or old iron, are used. The product, according to the inventor, possesses many of the properties of steel. It is easily annealed, may be hammered, tempered, and fashioned into any desired shape, without crumbling or breaking, as is the case with ordinary malleable castings. It is sufficiently hard for all practical purposes, and is entirely free from porosity.

New Method of Treating Mixed Copper, Silver, and Gold Ores.—An important modification of the Hunt and Douglas copper process, by which it is made applicable to the production of gold and silver, is thus described in the *Engineering and Mining Journal*:

That the presence of copper in solution as chloride assists the extraction of silver from its ore is a fact which is well known and taken advantage of; but the peculiarity of the new process consists in using with the salt a solution of neutral protochloride of iron instead of copper pyrites or bluestone. Both chloride and dichloride of copper convert the sulphuret of silver into chloride of silver, but their use as reagents in the extraction of silver has hitherto been limited by their cost; if, however, these chlorides of copper can be obtained from the copper ores which are often mixed with the ores of silver, an important reagent is obtained without cost, while the copper is saved and becomes a valuable by-product instead of being objectionable. To secure these advantages, Messrs. Douglas, Hunt & Stewart treat silver ores containing copper with a bath of protochloride of iron, which reacts with oxide of copper, giving rise to chloride and dichloride of copper, the latter of which, like chloride of silver, though insoluble in water, is soluble in brine. The essential features of the new process are the choice of suitable ore, and the grinding, calcining, and chloridizing of it; the treatment of the oxydized or chloridized ore with a solution of protochloride of iron and salt, in order to dissolve out the copper and most of the silver, and the precipitation in the metallic state of the copper and the silver thus dissolved; the lixiviation of the sands thus deprived of their copper and part of their silver, with hyposulphite of lime to extract the remaining silver, and the precipitation of the silver thus dissolved by sulphide of calcium; and, if gold be present, leaching the sands exhausted of copper and silver with chlorinated brine and the precipitation of the dissolved gold from this by sulphuretted hydrogen or sulphide of calcium.

In this method of extracting silver the only reagent consumed is the protochloride of iron. The advantages of the system are numerous. In chlorinating in the furnace silver ores containing base metals, such as zinc and lead, a more perfect chlorination is effected by mixing them with ores holding copper and iron, and subsequent treatment with the bath of protochloride of iron. All the copper is recovered at a slight cost. As much copper is extracted from unroasted copper ore or regulus as is contained in the state of protochloride in the solution

from the roasted ore, and unroasted silver-bearing ore or regulus may be decomposed by this solution containing chlorides of copper. The metallic silver is obtained perfectly free from base metals by the precipitation with copper, the silver left undissolved in the residues yielding a much purer amalgam than if the roasted ore had not been previously treated with the bath. Gold, if present in the ore, is left in the best condition, either to be chlorinated or to be amalgamated with the chloride of silver remaining in the residues. By the removal of the base metals before amalgamation a saving of mercury is effected. A great saving of salt is effected through the recovery by evaporation of the chlorides usually thrown away in the waste liquors. In treating simple ores of silver, or ores of silver containing but little base metal, as lead or zinc, the costly operation of roasting with salt may be dispensed with, and the inexpensive protochloride of iron may be used to produce the chloride of copper necessary for their treatment.

METCALF, Hon. **THERON**, LL. D., died in Boston, Mass., November 18, 1875. He was born in Franklin, Mass., on the 16th of October, 1784, and educated at Brown University, where he graduated in 1804. He was admitted to the bar in 1808, and established himself at Dedham, Mass., where he remained for thirty years. During this time he added much to his reputation, not only by his able practice of his profession, but also by a number of legal works which proved peculiarly valuable on account of the thoroughness, accuracy, and clearness, that characterized all his writings. In 1823, he produced a digest of the decisions of the Supreme Court of Massachusetts. He has also been one of the editors of the United States Digest, and the author of the first half of it, which is unequalled by anything of the kind in America. In 1820 he published an edition of Yelverton's Reports with notes, which won him a high reputation, and he subsequently prepared for the benefit of his pupils at Dedham a remarkable series of papers on the law of contracts, which were published in the *American Jurist*. He was the editor of the Statutes of Massachusetts, and of editions of Maule and Selwyn's Reports, Russell on Crimes, and Starkie on Evidence. While at Dedham, Mr. Metcalf once or twice represented the county of Norfolk in the State Senate. In 1839 he was appointed reporter of the Supreme Court, when or soon after which he removed to Boston; and in 1848 he was appointed by Governor Briggs one of the justices of the Supreme Court. He filled this position for seventeen years. Owing to the effects of advancing years, he resigned his office in 1865, ending more than half a century of professional labor and authorship.

METHODISTS. The *Methodist Almanac* for 1876 gives the following general summary of Methodists throughout the world: itinerant ministers, 27,591; local preachers, 61,474; lay members, 4,189,105. Thirteen different denominations of Methodists in the United States have an aggregate of 20,458 itinerant ministers, 24,884 local preachers, 3,173,229 lay members.

I. METHODIST EPISCOPAL CHURCH.—The following is a summary of the statistics of this Church, as given in the "Minutes of the Annual Conferences" for 1875:

CONFERENCES.	Traveling Preachers.	Members.	Prelates.	Total.
Alabama.....	81	10,212	1,848	11,555
Arkansas.....	36	4,449	850	5,299
Baltimore.....	164	25,762	4,845	83,607
California.....	156	8,029	1,801	9,880

The following totals show the condition of the Church in respect to other statistical facts: Number of bishops, 12; of annual conferences, 81; of local preachers, 12,881; total number of preachers (traveling and local), 26,787; number of baptisms of children, 58,218; number of baptisms of adults, 66,712; number of church-buildings, 15,638; value of the same, \$71,353,284; number of parsonages, 5,017; value of the same, \$9,731,628; total value of churches and parsonages, \$81,084,862; number of Sunday-schools, 19,287; of officers and teachers in the same, 207,182; of Sunday-school scholars, 1,406,168.

The *General Missionary Committee* of the Methodist Episcopal Church met in the city of New York, November 10th, in its annual meeting, to consider the interests of the mission-work of the Church, and fix the appropriations to the different mission-fields, and apportion among the conferences and mission districts the amount of money to be asked from them for the ensuing year. The Treasurer reported that the receipts for the year just ended had been \$662,485.89, and the disbursements \$721,805.84. Appropriations were made for the ensuing year as follows. The appropriations for foreign missions include also the cost of exchange:

I. FOREIGN MISSIONS:	
1. Africa (Liberia).....	\$3,500 00
2. South America.....	9,000 00
3. China.....	41,709 00
4. Germany and Switzerland.....	27,600 00
5. Scandinavia.....	54,470 40
6. India.....	76,319 20
7. Bulgaria.....	9,600 00
8. Italy.....	20,970 00
9. Mexico.....	28,800 00
10. Japan.....	20,380 00
Total for foreign missions.....	\$297,749 20
II. MISSIONS IN TERRITORIES OF THE UNITED STATES TO BE ADMINISTERED AS FOREIGN MISSIONS:	
Arizona and New Mexico.....	\$11,000 00
III. DOMESTIC MISSIONS:	
Welsh missions.....	\$150 00
Scandinavian missions.....	16,000 00
German missions.....	40,050 00
Chinese missions.....	10,284 00
American Indian.....	8,500 00
English-speaking.....	335,400 00
IV. MISCELLANEOUS APPROPRIATIONS.....	75,000 00
V. FOR THE LIQUIDATION OF THE DEBT.....	185,000 00
Grand total.....	\$864,183 20

The *General Committee of Church Extension* met in Philadelphia, November 16th. The corresponding secretary reported that during about ten years in which the Society had been in operation it had collected and disbursed \$916,617.67, of which \$691,148.58 had been received by collections, etc., and disbursed (less the expenses of administration) in gifts to churches, and \$225,469.09 in special offerings to the loan-fund. Of the amount thus lent, \$49,485.03 had been returned to the treasury and lent to other churches. In this way the Society had assisted 1,647 churches in various parts of the United States and the Territories. Most of these churches had been built by the

aid afforded, and many others previously built but hopelessly involved had been rescued. The books of the Society at the end of the year showed that its receipts and disbursements from January 1 to December 31, 1875, had been:

Balance from 1874.....	\$3,021 54
Receipts on general account.....	26,377 85
Receipts on loan-fund account.....	66,573 22
Total receipts.....	\$155,371 62
Disbursements on general account.....	\$73,787 20
Disbursements on loan-fund account.....	62,517 00
Balance carried to January 1, 1876.....	4,016 64
Total.....	\$132,371 62

Of the disbursements, \$54,720.08 had been given and \$54,720.08 had been lent to churches. Applications for aid had been granted, to be paid when certain conditions should be complied with, of \$3,650 in donations and \$5,050 in loans to churches.

The anniversary of the *Freedmen's Aid Society* of the Methodist Episcopal Church was held at Washington, D. C., December 20th. The report stated that the total receipts of the Society, for the year ending June 1, 1875, had been \$86,562.88. The disbursements for the same time were: To the endowment funds of Central Tennessee College, Shaw University, and Clark University, \$17,370; invested in real estate, \$16,096.68; for salaries and board of teachers, and expenses of schools, \$41,358.12; leaving a balance of \$2.55 in the treasury. The Society was indebted to the amount of \$18,028.46. The total disbursements of the Society, during the eight years of its operation, are stated in the report to have been \$523,802.15. The Society has aided in the establishment and support of fourteen institutions of a higher grade in the Southern States. It has also aided in the support of many common schools. It is claimed that fifty thousand children have been taught in its day-schools, and a larger number in its Sunday-schools; that more than a hundred preachers, and more than a thousand teachers, have been instructed in the institutions it has established and sustained, and that more than forty thousand children have been taught by persons whom it has trained.

The General Conference of 1873 selected St. Louis as the place for the meeting of the General Conference of 1876. For satisfactory reasons it was judged best to change the place of meeting to Baltimore. The consent of the Church to the change was informally taken by consulting the annual conferences and the boards in charge of the benevolent interests of the connection. No objection was offered, and accordingly the bishops in November declared the change decided upon, and appointed the General Conference to meet in Baltimore, May 1, 1876.

II. METHODIST EPISCOPAL CHURCH SOUTH.—The following is a summary of the statistics of this Church, as they were officially published in August, 1875:

CONFERENCES.	Traveling Preachers.	Local Preachers.	White Members.
Baltimore.....	177	105	24,193
Virginia.....	168	180	46,481

Bishops.....	8		
Total in 1874.....	3,224	5,856	694,764
Total in 1873.....	3,184	5,944	659,677
Increase.....	90	12	87,087

Whole number of colored members, 2,663; of Indian members, 4,497; whole number of preachers and members, 712,765; number of Sunday-schools, 7,204; of teachers in the same, 48,825; of Sunday-school scholars, 328,634.

Amount of collections: For missions, \$101,-953.46; for conference claimants, \$64,294.20.

The *Board of Missions* of the Methodist Episcopal Church South held its annual meeting at Nashville, Tenn., May 7th to 10th. The collections made during the year for domestic and foreign missions amounted to \$107,570.80, and exceeded those of any previous year. The board determined to assess for the ensuing year \$100,000 for foreign missions, including in that category the weaker conferences that needed help from the board. Appropriations were made for the ensuing year as follows: For China, \$7,500; for Mexico, \$11,800; for the Indian Mission Conference, \$9,000; for the German Mission Conference in Texas and Louisiana, \$4,500; for the Western Conference, \$2,000; for the Denver Conference, \$3,000; for the Los Angeles Conference, \$3,000; for the Pacific Conference, \$5,000; for the Columbia Conference, \$4,000; for Florida, including the Cuban mission at Key West, \$2,000; for Brazil, \$1,000; for the Incidental and Contingent Fund, \$5,000.

The *Board of Trust of the Vanderbilt University* met at Nashville, Tenn., May 8d and

4th, and completed the organization of the faculties by the election of professors to the vacant chairs in the Literary and Scientific Department. The Medical Department was opened in 1874. The other departments (Philosophy, Science, Literature, Biblical, and Law) were put in operation during 1875. The building of the university was dedicated, with appropriate ceremonies, October 4th. In connection with this event Mr. Cornelius Vanderbilt, of New York, gave the institution an additional \$100,000, making the total amount of his gifts \$700,000.

The *General Conference* of 1874 authorized the Board of Bishops to appoint a delegation, consisting of two ministers and one layman, to bear its Christian salutations to the General Conference of the Methodist Episcopal Church, which was to meet at Baltimore in May, 1876. It also authorized the Bishops to appoint a commission, consisting of three ministers and two laymen, to meet a similar commission authorized by the General Conference of the Methodist Episcopal Church, and to adjust all existing difficulties. In accordance with these instructions of the General Conference, the Board of Bishops, at their annual meeting, held at Nashville, Tenn., in May, made the following appointments: Fraternal Delegates to the General Conference of the Methodist Episcopal Church, the Rev. Lovick Pierce, D.D., the Rev. James A. Duncan, D.D., and Landon O. Garland, LL. D.; commissioners for the adjustment of difficulties, the Rev. E. H. Myers, D.D., the Rev. R. K. Hargrave, D.D., the Rev. Thomas M. Finney, D.D., the Hon. Truett Polk, of Missouri, and the Hon. David Clapton, of Alabama.

III. THE METHODIST CHURCH.—The following are the statistics of this Church, as they were reported to the General Conference of 1875:

ANNUAL CONFERENCES.	Itinerant Ministers and Preachers.	Members.	Probationers.
New York and Pennsylvania.....	84	2,521	122
New Jersey.....	24	1,461	118
Onondaga.....	54	2,221	186

Minnesota.....	15	400	18
Nebraska.....	11	400	..
Missouri.....	43	2,100	5
North Missouri.....	28	1,000	22
Kansas.....	15	1,018	21
Oregon.....	9	150	..
Total.....	775	53,400	1,788

The reports make return of 507 unstationed ministers and preachers, 667 church edifices, and 171 parsonages, and give the total value of church property at \$1,767,140.

No reports were received from the California, Boston, and Tennessee Conferences, and the returns from several of the conferences named in the table were imperfect.

The third *General Conference* of the Methodist Church met at Princeton, IM., May 19th. The Rev. John Burns, of Cambridge, Ohio, was chosen chairman. The most important business which came before the body was the consideration of the subject of union with the Methodist Protestant Church. The General Conference of the latter Church, which met at Lynchburg, Va., in 1874, had signified its readiness to negotiate for union with such other Methodist churches as might respond to its invitation, and had appointed a commission of nine ministers and laymen to meet a similar commission appointed by any other Methodist body, to arrange the terms on which union could be had. This action, although general in its terms, had especial reference to the Methodist Church. A commission of nine ministers and laymen was appointed to meet the commissioners of the Methodist Protestant Church. Their authority to act was, however, limited by a resolution instructing them "to enter into no arrangement with the commissioners of the Methodist Protestant Church that shall not be subject to the decision of this General Conference at its next session—after the action of said commissioners said General Conference retaining the right to approve or reject the same." The commission was constituted as follows: Ministers, J. J. Smith, John Burns, E. A. Wheat, Alexander Clark, George B. McElroy; laymen, F. H. Pierpont, J. J. Gillespie, T. J. Finch, P. F. Rensburg. Five alternate commissioners were also appointed. The Committee on Methodist Union reported that there was no prospect of an immediate union with the Methodist Episcopal Church. The Board of Missions was directed to consist of nine members, elected by the General Conference, three of whom shall constitute the Executive Committee—the acts of the Executive Committee to be subject to revision by the board. Provision was made for the organization of missionary boards of the annual conferences, and of district boards within the annual conferences, and for the collection and disposition of missionary funds. The board was located at Springfield, Ohio. A Board of Church Extension was organized. A paper was adopted, advising increased interest in camp-meetings, and recommending the organization of a general camp-meeting association, to render aid to the annual conference and local camp-meetings and associations. The Rev. George Burns, D. D., one of the "fathers" of the Church, had been requested by the previous General Conference to prepare a volume of his sermons and recollections of the early

history of the Church, and had begun the work, but died before completing it. The Rev. John Scott, D. D., was selected to prepare this work for publication. A committee was appointed to take into consideration the subject of church property, and to suggest measures to make such property more secure to the denomination than it now is. A favorable report was made of the condition of Adrian College. The indebtedness of the institution had been provided for, but the endowment was not yet sufficient to afford provision for current expenses. The reliable assets of the college were estimated to amount to \$239,358. Arrangements were made for raising a "centenary offering" in connection with the celebration of the centennial anniversary of American independence. They contemplated the collection of a fund of \$200,000, of which \$100,000 should be appropriated to the endowment of Adrian College, and \$25,000 each to the publication interests, missions, and church extension. The Conference was visited and addressed by the Rev. Bishop E. S. Jones, of the Methodist Episcopal Church, and by the fraternal delegates appointed by the General Conferences of the Methodist Protestant and Methodist Episcopal Churches.

The *commissioners* appointed by the General Conferences of the Methodist Protestant and Methodist Churches, for the purpose of arranging the terms of a basis of union of the two Churches, met at Pittsburg, Pa., October 22d. L. W. Bates was chosen president of the meeting. Sixteen amendments to the Disciplines of the two Churches, designed to make them conform to each other, were agreed upon, as well as terms for the adjustment of minor details of the relations of the Churches, all of which are to be submitted to the convention which was afterward provided for, for ratification. A recommendation was agreed upon that the name "Methodist Protestant Church" be retained as the name of the denomination in case the union is consummated. A convention of the Methodist Protestant and Methodist Churches was called to be held in Baltimore, on the second Friday in May, 1877, "to consummate the whole work." A resolution was adopted recommending that a national camp-meeting of the two denominations, for the promotion of the cause of union, be held in the summer of 1876, and a committee was appointed to name a time and place for holding it.

IV. *WESLEYAN METHODIST CONNECTION.*—The ninth quadrennial session of the General Conference of the Wesleyan Methodist Connection of America was held at Sycamore, Ill., beginning October 20th. The Champlain, New York, Syracuse, Rochester, Lockport, Alleghany, Central Ohio, Miami, Indiana, Michigan, Illinois, Wisconsin, Iowa, Kansas, and Minnesota Conferences were represented by delegates. The Tennessee Conference had appointed delegates, who were not able to attend.

Much of the time of the Conference was given to the discussion of the rule on secret societies. Several amendments to this rule were offered, with the view to make it more stringent, and of wider application. A resolution was adopted "that we deem it inexpedient to change the law as embraced in the 22d section of our Book of Discipline, and recommend its application to all secret societies." The rule referred to in this resolution reads:

We will on no account tolerate our ministers and members in joining or holding fellowship with secret societies, such as Freemasonry and Odd-Fellowship, as, in the judgment of the Wesleyan Methodist Connection, it is inconsistent with our duties to God to hold such connection.

This action failed to give satisfaction to the more earnest opponents of secret societies, and the following resolution was afterward adopted, expressing the final action of the Conference upon the subject:

Resolved, That the 22d section of our Book of Discipline be changed on the concurrence of the requisite number of annual conferences, so that it shall read thus:

SECRET SOCIETIES.

Question. Have we any direction to give concerning secret societies?

Answer. We will on no account tolerate our ministers or members in joining or holding fellowship with secret societies, as, in the judgment of the Wesleyan Methodist Connection, it is inconsistent with our duties to God to hold such connection.

V. METHODIST CHURCH IN CANADA.*—The first anniversary of the Missionary Society of this Church was held in October. The Treasurer reported that the entire income of the society, from all sources, for the year had been \$147,168, and the expenditures for the same period had been \$185,268, showing an excess of expenses over income of \$38,100. The following summary presents the statistics of the missions of the society: 888 missions, 392 missionaries, 30,070 communicants in church-membership, 31 day-schools among the Indians, 31 teachers, 25 interpreters, 5 ministers supplying small bands of Indians, with 13 native assistants; making a paid agency in the missionary department of the Methodist Church of 466. Encouraging accounts of progress in the material and spiritual interests of their work were read from the missionaries laboring on the Pacific coast, in Japan, among the Indian, French, and German populations of the Dominion, and in the domestic fields of the Nova Scotia, New Brunswick, and Prince Edward Island Conference.

VI. METHODIST EPISCOPAL CHURCH IN CANADA.—The following is a general summary of the statistics of this Church, as reported at the meetings of the Annual Conferences for 1875: Number of ministers, 247; of members, 23,012; number of Sunday-schools, 882; of officers and teachers in the same, 2,736; of scholars, 17,654; value of church property,

\$888,805; amount contributed for missions, \$11,631.86; for the superannuates' fund, \$3,101.51; for the college, \$1,452.80. The returns show an increase from the previous year of 22 ministers and 512 members. The Church is divided into three conferences, the Niagara, Ontario, and Bay Quinte.

VII. PRIMITIVE METHODISTS IN CANADA.—The twenty-second Annual Conference of the Primitive Methodist Connection in Canada met at Guelph, June 4th. Robert Walker, Esq., was chosen president. The question of Methodist union was discussed, and the following conditions were adopted as constituting a basis of union, that must be accepted before the Conference would consent to union with any other Church:

A basis of union to be acceptable to us shall admit an equal number of laymen with ministers in all Church courts, and give them equal rights with ministers to take part in all the business of said courts. It shall also provide that all business meetings be allowed to elect their own chairmen, and circuit quarterly meetings to nominate their own officers.

The Conference directed that this paper be sent to the union committee of the Methodist Church of Canada; that the reply of this committee, if in any way favorable, be sent to the General Committee of the convention, and be by it submitted to all the members of the Connection, who shall send their views of it to the Conference of 1876.

VIII. BIBLE CHRISTIANS IN CANADA.—The twenty-first Annual Conference of the Bible Christians in Canada met at Bowmanville, June 8d. The Rev. J. Kenner was chosen moderator. The report of the Committee on Statistics showed that an increase had taken place during the year of six ministers, five churches, and 291 approved members, and a decrease of nine local preachers. The Committee on Finances reported that there were balances on hand of \$648.80 in favor of the beneficent fund, and of \$116.09 in favor of the Church loan fund. Debts stood against the other funds of the Church as follows: Contingent fund, \$288.57; missionary fund, \$8,354.45; children's fund, \$78.83. A collection was taken during the meetings of the Conference for the reduction of the debt of the Missionary Society, when \$6,100 were subscribed. Eight churches had been built, and four parsonages added, during the year. The increase in the value of church property during the year had been \$41,467.26, making the total present value of church property within the Conference \$347,846.26. The property was subject to debts not yet provided for amounting to \$59,749.01. The English Conference was requested to take such steps as would secure an equal representation of laity and clergy in the Conferences.

IX. WESLEYAN CONNECTION (BRITISH).—The following is the general review, published officially, of the British and affiliated Conferences of this Church:

* On the origin of this Church, see ANNUAL CYCLOPEDIA for 1874.

CONFERENCES.	Members.	On Trial.	Ministers.	On Trial.	Superintendents.
I. British Conference:					
Great Britain.....	858,069	26,719	1,856	228	220
Ireland and Irish missions.....	20,394	979	188	24	22
Foreign missions.....	74,968	7,989	268*	104*	11*
II. French Conference.....	1,908	181	24†	3†	1†
III. Australasian Conferences.....	60,165	7,747	812	50	25
Totals.....	515,892	48,515	2,095	404	296

In the above table the number of ministers and members in connection with the Conferences of Canada and Eastern British America—now combined in the Conference of the Wesleyan Methodist Church in the Dominion of Canada—is not given.

The reports of the committees having charge of the various trusts and funds of the Connection were made to the Committees of Review, which met at Sheffield during the week preceding the meeting of the Conference, to hear the reports and consider the interests committed severally to their charge.

The income of the *Home Mission and Contingent Fund* for the year had been £81,257; 612 persons of all classes were engaged in the work, under the charge of the committee, under whose labors an increase for the year of 900 members was reported in the Home Mission districts or stations.

The total ordinary income of the *Chapel Fund* was reported to have been £9,204, an increase of £167 over the income of the previous year. The entire number of cases of enlargements and erections of chapels, ministers' houses, etc., sanctioned, was 333, the total cost of which was estimated at £305,054. Grants of £2,147 and loans of £11,795 had been made from the fund, and £51,069 of debts had been allowed. The total number of "erections completed" was 261, at a cost of £275,651. Grants of £2,485 and loans of £4,650 had been made, and debts of £52,927 had been sanctioned upon them. In the relief department debts had been discharged during the year by the combined aid of grants, loans, etc., to the amount of £54,548. The amount of debts discharged since 1854 was £1,072,540. Four hundred and ninety-three loans were now in operation. The capital of the relief loan fund was £42,087 8s. 8d.; of the erections loan fund, £88,981 9s. 5d. A total amount of £328,343 had been expended on new erections and in the reduction of debts. The net amount actually raised by contributions, including grants, during the year, was £362,292.

Report was made to the *Theological Institution Committee of Review*, that the contributions for the year received up to the time of the meeting of the committee had amounted to £6,400. Between £700 and £800 more were expected, with the addition of which the income would still be about £1,000 less than that of the preceding year. Upward of £10,000 belonging to what was called "the

Midland Trust" was safely and profitably invested.

The report to the *Education Committee of Review* showed the number of schools to be 890; of scholars, 178,550; average attendance, 116,038. The number of schools was sixteen less than during the previous year, the decrease having been occasioned by transfers to the national school boards. The number of scholars had increased 227. The committee expressed its gratification that the increase in the means of public education effected by recent legislation had not interfered to any considerable extent with the maintenance of the connectional day-school system, while it regretted that school boards were not everywhere established.

The number of Sunday-schools was 5,893; of officers and teachers in the same, 111,003; and of scholars, 700,210. The report of the secretary of the Connectional Sunday-School Union gave an account of the organization of the Union with its several departments, agencies, and local branches, which had been mostly accomplished within the year, and of the increasing recognition of the Sunday-school as an important instrument of the Christian Church. About 1,000 schools had joined the Connectional Union. The past year had been distinguished by the amount of practical interest in Sunday-school work shown by members of all religious denominations. The operations of the Church of England, the Congregationalists, and the Primitive Methodists, in this department, were particularly mentioned. This work had also made progress on the Continent.

The one hundred and thirty-second annual session of the *Conference* of the Wesleyan Connection met at Sheffield, July 28th. The Rev. Gervase Smith was elected president. Ninety-four persons were presented as candidates for the ministry, of whom 82 were accepted.

The Conference of 1873 had appointed a committee to consider the question how far the constitution of the Committees of Review might be improved. This committee reported to the Conference of 1874 a plan for the reorganization of the Committees of Review by consolidating them into a single General Committee, composed of ministers and laymen, to be appointed annually by the Conference, before whom the reports of all the departments

* Exclusive of missionaries in Ireland.

† The French ministers who are employed in the Channel Islands District are not included in these returns.

managed by mixed committees should pass consecutively in review. The report was referred to a special committee of ministers, with instructions to consider it and submit their report to the annual meetings of the district committees when the lay members were present, and to submit the returns of the action of the district meetings to a meeting to be held in July of themselves, together with the chairmen of the districts and the gentlemen who should have been chosen lay members of the Home Mission and Contingent Fund Committee. The special committee met early in the year, and, after careful inquiry into the subject—

Resolved, That we are of the opinion that the time is approaching when a comprehensive plan should be devised for some direct and adequate representation of the laity in the transaction of the business of the Conference, in consistency with the recognized principles of our economy and the provisions of the Poll Deed; but the difficulties which present themselves, after much deliberation, are so serious that we recommend the ensuing Conference to appoint a large committee to further consider the whole subject, and that the committee should also be empowered to take such counsel as it may judge expedient on the legal aspects of the case, and report to another Conference.

The united committee, consisting of the special committee, the chairmen of districts, and lay members, met July 24th. The action of the district meetings upon the propositions submitted to them for the reorganization of the Committees of Review was reported to have been almost unanimously adverse. A majority of the meetings had expressed themselves in favor of the admission of laymen to the Conference as a preferable measure. The committee, accordingly, "recognizing the fact that a large number of districts had expressed opinions in favor of a more direct and formal association of representatives of the laity with the Conference during such of its sessions as do not relate to matters purely ministerial," resolved to request the Conference to appoint a mixed committee to consider the whole question of lay representation, to whom also should be referred the report on the constitution of the Committees of Review, and the minutes of the district meetings upon it. The Conference adopted the resolution of the special committee for the appointment of a large committee to consider the whole subject of lay delegation, and decided, in order to carry out its objects—

To appoint first a committee of ministers, who shall carefully consider the whole subject, and lay their report before the ministers when assembled in their annual district meetings, and before the Conference. Secondly, a mixed committee of themselves and laymen, whose mode of selection shall be subsequently determined, before whom shall be laid the reports of the ministerial committee, and this mixed committee shall prepare their report thereon; and that the whole of these reports be laid before the next Conference.

The committee was constituted of thirty-four ministers and thirty-four laymen, appointed by the Conference on the nomination of

the president; one minister to be elected for each district by the ministers attending the district meetings in September; and the thirty-four laymen should be elected district representatives at the district meetings in May, 1876; the ministers appointed on this committee to constitute the members of the first or ministerial committee. The subject of lay representation came up upon the application of the Irish Conference to have itself so constituted that laymen should be admitted to it. The committee to whom this subject was referred, reported to the effect—

That, the principle of associating laymen and ministers having been recognized, the committee at present sees no sufficient reason why such association should not be permitted in the Irish Conference, provided that a scheme can be framed which will be reasonably practicable, which will preserve intact the ministerial functions, and will be in strict harmony with the provisions of the Poll-Deed.

This report was not adopted, but the Conference

Resolved, That having appointed committees to consider the question of lay representation, which committees cannot report until the Conference of 1876, it feels itself unable to enter into a full consideration of the proposals of the Irish Conference at present, and therefore regrets to be under the necessity of postponing this question for another year; and that this resolution be transmitted to the Irish Conference, with an affectionate letter.

A question was presented to the Conference in the case of the Rev. John Bond, as to the part which ministers should be permitted to take in public affairs, particularly in the discussion of political topics. Mr. Bond had attended a meeting of the Liberation Society in May. His action was discussed in the district meeting of the Second London District, to which he was attached, and was regarded as inconsistent with an ancient regulation of the Connection. The meeting adopted the following minute: "A conversation having arisen on the subject of Wesleyan ministers taking part in political meetings, this meeting is of opinion that the principle of non-interference in such cases should be honorably observed on all sides until the Conference shall otherwise determine."

The following minute was accepted by almost unanimous agreement, and entered upon the record:

The Conference having considered a resolution called forth by a minute of the Second London District meeting on the subject of non-interference in political matters on the part of Wesleyan ministers: *Resolved*, That the minute of the Second London District meeting be canceled; that the resolution be withdrawn; that the Conference recognizes on the one hand the individual freedom of its ministers as Christian citizens, and on the other hand their responsibility to each other and to the Conference as members of a non-political body, and confides in their loyalty and honor so to regulate and control their public actions as not to imperil the unity of the ministerial brotherhood or disturb the peace of the Connection at large.

A petition was adopted for presentation to Parliament, against the bill designated as the

"Restriction of Penal Actions and Remission of Penalties Bill, 1875," and against the removal of the legal obstacles to the opening of the Brighton Aquarium on Sundays, which would be effected by its passage. A plan was adopted for the establishment throughout the Connection of schools for the education of children of the middle classes.

The anniversary of the *Wesleyan Missionary Society* was held in London, May 3d. The Right Hon. James Falshaw, Lord Provost of Edinburgh, presided. The annual report, presented on this occasion, showed the receipts for the year to have been: from home contributions and resources, £136,409 2s. 3d.; from the affiliated conferences and mission districts, £47,630 6s. 3d.; total, £184,039, 8s. 8d. The total expenditures had been £179,946 4s. 4d. The Ladies' General Committee for Female Education in Foreign Countries and other benevolent purposes had also expended £1,850 15s. 8d., besides furnishing school materials, clothing, and other gifts, to many parts of the missionary field.

The fact was mentioned that there had been a steady addition to the receipts of the society from the various districts of the United Kingdom, averaging for the past few years £3,000 annually. The report classified the mission-fields, for the purpose of presenting a survey of them, into five groups, and gave the following facts respecting their condition:

1. MISSIONS TO NOMINALLY CHRISTIAN COUNTRIES. *Ireland*.—Thirty-five missionaries were employed in connection with the Irish Conference, who had under their charge twenty-four day-schools, with 1,770 scholars. *France and Switzerland*.—Thirty ministers under the French Conference reported 1,857 members, and fifty-nine Sunday and day schools, with 2,872 scholars. Three ministers were employed in behalf of the English, in Paris, Boulogne, and Rheims. The society had accepted an invitation to occupy a chapel at Brussels, in Belgium. *Germany*.—Nineteen ministers employed reported 2,103 members, 2,028 scholars. The Institution for the Training of Ministers had been enlarged. Two stations had been occupied in Bavaria, and one in Austria. *Italy and Sicily*.—Two districts had been formed, with centres at Rome and Naples. Twenty missionaries, of whom eighteen were Italians, were employed, who occupied twenty-four stations, and reported 1,016 members, and twenty day and Sunday school scholars. *Spain and Portugal*.—Three ministers and one lay agent were employed at Gibraltar, Barcelona, Port Mahon, and Oporto; they reported 209 members, seventeen day and Sunday schools, and 1,071 scholars. In all the Continental missions, seventy-five ministers were employed, the church-members numbered 5,269, and the schools contained 6,926 pupils.

2. MISSIONS TO THE EUROPEAN NATIONS BEYOND THE BOUNDS OF EUROPE.—A large part of the missions had been organized into the Ca-

nadian and Australasian Conferences. It was difficult to separate the mission-work of these conferences from the ordinary home-work of their churches. They reported, in 1874, 881 ministers, 99,851 members, and 193,762 scholars. In South Africa the colonial and mission districts returned ninety-three missionaries, 14,638 members, and 16,603 scholars.

3. MISSIONS TO THE AFRICAN RACES IN THE WEST INDIES AND WEST AFRICA.—There were returned 113 ministers, 53,139 members, and 35,700 scholars.

4. MISSIONS IN HEATHEN COUNTRIES.—In India and Ceylon the society had eighty missionaries, 3,541 church-members, and 17,095 children in the schools. In China it had twelve missionaries, 254 members, and 478 scholars. A medical mission was connected with the mission at Wuchang.

5. THE POLYNESIAN MISSIONS.—These were under the care of the Australasian Conference. The Friendly Islands were already Christian in profession, and the distinction was made between the regular pastorate and the missionary staff. The Feejee Islands had become a British possession. The Australian Committee contemplated establishing a mission on either New Britain, New Ireland, or some other island on the east coast of Guinea, to be carried on mainly by native agents. On these missions there were, in 1874, eighty-eight missionaries, of whom sixty-five were natives, 84,169 members, and 55,721 scholars.

Schools adapted to the condition of the population form part of the society's system of operation in all the mission circuits. High-schools, and training-schools for teachers and for students preparing for the ministry, have been established in Germany and Italy. One at Padua, in the latter country, was particularly spoken of. A school was maintained in efficiency at Nimes, in France, and the Lausanne College was about to be revived. The society had a high-school in Sierra Leone, and a better-class school at Cape Coast, and was about to establish a high-school at Lagos. It had a school of the higher class in the Bahamas, and was preparing to form another in Jamaica. Several schools of a higher character in Ceylon and India were under the management of natives. In South Africa, the school at Heald Town had been enlarged, and attempts were being made to establish preparatory training-schools, under ministers set apart for that work, in all the South African districts.

X. PRIMITIVE METHODIST CONNECTION.—The following is a summary of the statistics of the Primitive Methodist Connection, as they were reported to the Conference at its meeting in June: Number of members, 169,716; of ministers, 1,045; of local preachers, 14,890; of class-leaders, 10,112; of connectional chapels, 3,913; of other chapels, 3,536; of Sunday-schools, 3,647; of teachers in the same, 50,932; of scholars, 316,859; of day-schools, 82; of teachers in the same, 64; of

scholars, 3,122. The increase in the number of members during the year had been 5,022.

The incomes of the *benevolent funds* were reported to have been as follows: General Chapel and Loan fund, £1,021 15s. 7d.; Metropolitan Chapel Building fund, £237 8d.; Chapel Loan fund, £502 5s. 6d.; Superannuated Ministers', Widows', and Orphans' fund, £5,107; Sunday-school Union fund, £1,235; Auxiliary fund, £231; Missionary Society, total income, £47,239. The *Book-Room* had done business during the year to the amount of £22,247 14s. 2d. The income of the Sunday-schools was represented to have been £45,250; their expenditures had been £33,746, leaving a balance in hand of £10,509.

The Elmfield College, York, and the Theological Institution, were reported to have enjoyed a prosperous year. Twenty-two students had attended at the Theological Institution.

The forty-sixth *Annual Conference of the Primitive Methodist Connection of Great Britain* met at Leicester, June 2d. The Rev. Robert Smith was chosen president. The Conference of the previous year had decided to ask the views of all the stations upon the expediency of changing the rules for the stationing of ministers, so that the transfer of ministers from one district to another could be made more easy. Under the prevailing rule, ministers were made to labor most, or all, of their lives in a single district. It was sought to give them liberty to be stationed at any point in the Connection, without regard to the district in which they had previously served. A majority of the stations had declared against the proposed modification, and it was not made. The Conference decided to establish a school for young women at Olapham Common, London, and appointed the Rev. W. Rowe, of Canada, governor of the institution. A committee was appointed to prepare a scheme for the representation of the several districts in the Conference by delegates chosen in proportion to the number of members in connection, to be submitted to the consideration of the next Conference. The churches in Canada were represented to be in an unsettled state in consequence of the agitation of the subject of the Union of the Methodist Churches. The Rev. G. Lamb was appointed a representative to visit them in 1876.

The annual meeting of the *Primitive Methodist Missionary Society* was held in London, April 27th. George Hodge, of Hull, presided. The income of the society for the year was reported to have been: Home stations, £25,185 10s. 8d.; Australian stations, £1,087 5s. 6d.; Canada, £5,166, 12s.; Africa, £317 10s. 9d.; contributions of the mission stations, for the sustentation of missionaries, £4,542, 18s. 8d.; contributed on the mission stations for the building and enlargement of chapels and schools, £10,406 7s. 10d.; total, £46,706 5s. 6d.: showing an increase over the contributions of the previous year, or any preceding

year in the history of the society, of £11,498 6s. 10d. Sixty-seven home missions were reported, of which forty-nine were in England, five in Wales, six in Scotland, five in Ireland, and five were in connection with circuits in large towns. One hundred and thirty-seven missionaries were employed upon them. Twenty-five new chapels and fifteen new schools had been built. Congregations had been gathered and societies formed at thirty-eight new places, and twenty-seven new Sunday-schools had been begun. The society had also in South Australia sixteen stations, seven of which were missions, with eight missionaries; in Victoria and Tasmania, twenty-six stations, fourteen of which were missions, with fourteen missionaries; in New South Wales, fifteen stations and seventeen missionaries; in Queensland, five stations and five missionaries; in Canada, sixty-four stations and seventy-nine preachers; in Africa, four stations and seven missionaries; in all, in the home and colonial fields, 176 stations and 267 missionaries. An increase of 1,134 members was reported in the mission stations.

XI. *METHODIST NEW CONNECTION.*—The seventy-ninth *Conference of the Methodist New Connection* met at Dudley, June 14th. The Rev. Henry Pigginn, of York, was chosen president. The present Conference was one of those appointed on which the septennial revision of the connectational rules should take place. A proposition had been made for a change in the name of the Connection, and submitted to the circuits for their opinion. Twenty-nine circuits had disapproved of any change, twenty-eight circuits had recorded themselves in favor of some change, eleven of them favoring the name "Methodist Connection," nine "Methodist Church," and eight "Presbyterian Methodists." The Conference decided to make no change. A proposition had been submitted for a modification of the rule in regard to attendance upon class-meetings. Thirty-two circuits, representing 10,222 members, had voted in favor of a change, and twenty-six circuits, representing 10,722 members, had voted against it. The change was not made, but it was resolved unanimously—

That this Conference, while resolving to continue the class-meeting in its present rank and authority among us, deems it expedient, in harmony with the purport of the returns from a large number of circuits, to appoint a committee to consider whether any improvement can be effected in the mode of conducting the class-meeting, such as would be likely to dispose persons who stately worship and communicate with us to become members.

The income of the *Home Missionary Society* for the year was reported to have been £1,697 5s. 10d., and the expenditures had been £1,930 7s. 11d. The *Chapel Committee* reported the total amount raised during the year for building new churches, furnishing, and improvements, to have been £37,075. Eighteen chapels had been built or enlarged, and eleven

were in course of erection. The *Book-Room Committee* reported their total receipts to have been £2,798 5s. 7d., and their expenditures £2,570 8s. 11d., leaving a profit of £227 16s. 8d.; 16,916 books had been sold during the year. The financial statement of the *Foreign and Colonial Missions* showed the total income for the year to have been £6,148 11s. 8d., besides which the fund had a balance in hand at the beginning of the year of £3,626 19s. The expenditure had been £4,849 19s. 1d.

XII. UNITED METHODIST FREE CHURCHES.—The following is a summary of the statistics of this body as they were reported to the Annual Assembly in July, 1875: Number of itinerant preachers, 828; of supernumeraries, 26; of local preachers, 8,243; of leaders, 4,293; of members, 68,652; of members on trial, 6,193; of chapels, 1,309; of other preaching-rooms, 249; of Sunday-schools, 1,268; of teachers in the same, 25,281; of Sunday-school scholars, 170,718. The reports showed an increase from the previous year of 1,981 members, 83 Sunday-schools, 664 Sunday-school teachers, and 5,190 Sunday-school scholars. Thirty-one chapels had been built during the year, and eleven chapels enlarged.

The *Annual Assembly of the United Methodist Free Churches* met at Nottingham, July 28th. The Rev. Joseph Kirsop was elected president. The death of the Rev. Charles New, a missionary of the Connection in Eastern Africa, was reported from the Missionary Committee, together with an account of outrages and robberies which had been committed upon him by the chief of Ohaga. A resolution was adopted by the Assembly, calling the attention of the Government to the facts as narrated, and asking it to secure, if possible, greater protection to the lives of British subjects while traveling in Eastern Africa. An address was read from the native members of the Church connected with the Chinese mission of the Connection. A plan for the establishment of a connectional school for the education of the sons of ministers and laymen was approved, and a committee was appointed to take such preliminary steps as may be needful for the accomplishment of that object, and report to the next Annual Assembly. A plan was approved for the organization of a special fund for the purchase of sites and the erection of chapels, in aid of home-mission work, and efforts were advised for the raising of £10,000 in five years, said fund to be under the management of the Connectional Committee, and to be applied conditionally, according to the recommendations of the Annual Assembly of each year, in furthering the objects for which it was instituted. The Assembly recommended to the churches the practice of total abstinence from the use of intoxicating drinks; expressed a desire for "more rigid legislation on the subject of the liquor-traffic;" voted thanks to Mr. Gladstone for his pamphlets on the Vatican Decrees; and *resolved*, "That the most stren-

uous efforts of the Christian Church should be exerted until the separation between church and state should be complete."

The eighteenth annual *Missionary Meeting of the United Methodist Free Churches* was held in London, April 26th. Alderman Green, J. P., of Tynemouth, presided. The home receipts for the missions were reported to have been for the year £11,119 12s. 5d., or £1,617 7s. 11d. more than those of the previous year. The expenditures had been £10,897 13s. 5d. The number of church-members on the foreign stations was 6,112, showing an increase during the year of 224 accredited members, besides whom there were 545 persons on trial for membership. Adding the number of members on the home circuits to the number reported from the home fields, the total number in all the missions was shown to be 67,371, with 6,193 probationers. The Missionary Committee had aimed at the development of the native agency, and native laborers had been employed in China, West Africa, and East Africa. The Chinese mission circuit now comprised six preaching-places, with Wingo for the centre. Premises suitable for the work had been bought at this place. An increase of 117 members and financial prosperity were reported in the Jamaica mission. Several new chapels had been built, one of them at Kingston. An increase of 63 members was reported in the New Zealand mission. A decrease in the number of members had taken place in the Australian mission. The death of the Rev. Charles New, a missionary of this Church, which took place at Dummer, Africa, February 18th, was spoken of as that of an heroic, intrepid, and devoted laborer, whose contributions to science, discoveries in geography, and explorations in the interests of civilization and Christianity, had been very good and great.

XIII. WESLEYAN REFORM UNION.—The following is a summary of the statistical returns of this denomination as made to the delegate meeting of 1875: Number of chapels and preaching-places, 242; of preachers, 538; of preachers on trial, 89; of ministers, 15; of leaders, 465; of members, 7,587; of members on trial, 506; of Sunday-schools, 180; of teachers in the same, 2,944; of Sunday-school scholars, 18,760. The report of the *Book-Room* showed that a slight decrease had taken place in its business within the year. The accounts of the *Chapel Relief Fund* showed that there was a balance of £96 15s. 1d. in the hands of the treasurer, and that the loans out amounted to £255. The net increase for ~~home~~ missions for the year was reported to have been £394 9s. 8d. Three home missionaries had been employed at the beginning of the year, and two in the latter part.

XIV. AUSTRALASIAN METHODIST CHURCH.—The *General Conference of the Australasian Methodist Church* met at Melbourne, May 12th. The Rev. S. Wilkinson, President of the New South Wales and Queensland Conference, as

senior minister, presided at the opening session, but was relieved by the presidents of the other annual conferences in alternation. The principal business before the body was the discussion of the provisions of an amended constitution. It was decided that the annual conferences should be composed of equal numbers of ministers and laymen. Coördinate power and authority were given to ministers and laymen in the General Conference, excepting that it was required that the president of that body must be a minister. A draft of a model deed, and drafts of bills to be passed through the several Colonial Parliaments, with a view to legalizing the positions of the several annual conferences and the General Conference, were prepared. The constitution and the drafts were ordered to be submitted to the British Conference for its approval, to be of force when it is ascertained that they have not been disallowed by that body. The British Conference was also requested to ascertain and advise as to whether an act of the British Parliament might be obtained which would render unnecessary colonial legislation.

MEXICO (ESTADOS UNIDOS DE MÉJICO), a federal republic of North America, extending from latitude 15° to 32° 27' north, and from longitude 86° 34' to 117° west. It is bounded north by the United States; east by the Gulf of Mexico, the Caribbean Sea, and Balize; south by the republic of Guatemala; and south and west by the Pacific Ocean.

The territory of the republic, comprising an area of 702,990 square miles, is divided into twenty-seven States, one Federal District, and one Territory, which, with their populations (mostly) according to a statistical publication of Señor García Cubas in 1874, and their capitals, are as follows:

STATES.	Population.	Capitals.
Agua Calientes.....	89,715	Agua Calientes.
Campechy.....	80,366	Campechy.
Chiapas.....	198,937	Chiapas.
Chihuahua.....	180,668	Chihuahua.
Columbia.....	98,897	Saltillo.
Colima.....	66,827	Colima.
Durango.....	190,846	Durango.
Guanajuato.....	729,938	Guanajuato.
Guerrero.....	823,069	Guerrero.
Hidalgo.....	404,207	Pachuca.
Michoacan.....	966,659	Guadalajara.
Morelos.....	668,557	Toluca.
Nuevo Leon.....	618,240	Morelia.
Oaxaca.....	150,884	Oaxaca.
Puebla.....	178,672	Monterrey.
Queretaro.....	662,468	Oajaca.
San Luis Potosi.....	697,738	Puebla.
Sinaloa.....	171,666	Queretaro.
Sonora.....	525,110	San Luis Potosi.
Tabasco.....	168,081	Culiacan.
Tamaulipas.....	109,888	Ures.
Tlaxcala.....	88,707	San Juan Bautista.
Veracruz.....	140,000	Ciudad Victoria.
Yucatan.....	121,668	Tlaxcala.
Zacatecas.....	504,050	Jalapa.
Federal District.....	422,865	Mérida.
Lower California (Territory).....	397,945	Zacatecas.
	315,996	México.
	28,195	La Paz.
Total.....	9,276,079*	

The number of pure-blooded Indians in Mexico is commonly set down at 6,000,000, of whom not more than one-half have fixed habitations, the other half being still, for the most part, in a state of comparative savagism.

The capital, Mexico, has a population variously estimated at from 230,000 to 250,000.

The President of the Republic is Señor Don Sebastian Lerdo de Tejada, elected November 21, 1872; the Minister of the Interior (*Ministro de Gobernacion*) is Señor Don O. G. Pérez; the Minister of Foreign Affairs, Señor Don José María Lafragua; the Minister of Finance, Señor Don Francisco Mejía; the Minister of War, General of Division Ignacio Mejía; the Minister of Justice, Public Instruction, and Public Worship, Señor Don José Díaz Covarrubias; and the Minister of Public Works, Señor Don Blas Balcárcel.

The Treasurer-General of the Republic is Señor Don Manuel Izaguirre; the President of the Supreme Court of Justice (virtually Vice-President of the Republic) is Señor Don I. M. Iglesias; and the Postmaster-General is Señor Don Pedro Garay y Garay.

Each State in the republic has its separate government, the legislative power being exercised by an Assembly styled the State Congress, and the executive by a Governor (gobernador constitucional).

The Governors of the several States, etc., were as follows in 1875:

States.	Governors.
Agua Calientes.....	Señor Don J. Baranda.
Campechy.....	" " P. Dominguez.
Chiapas.....	" " M. Samaniego.
Chihuahua.....	" " " "
Columbia.....	" " " "
Colima.....	Señor Don F. Santa Cruz.
Durango.....	" " F. Hernández Marín.
Guanajuato.....	" " F. Antillon.
Guerrero.....	" " D. Alvarez.
Hidalgo.....	" " J. Fernández.
Michoacan.....	" " Camarena.
Morelos.....	" " Enriquez.
Nuevo Leon.....	" " F. Leyva.
Oaxaca.....	" " Garza Ayala.
Puebla.....	" " Esperon.
Queretaro.....	" " J. Romero Vargas.
San Luis.....	" " B. de Zenea.
Sinaloa.....	" " Hernández.
Sonora.....	" " E. Buelna.
Tabasco.....	" " M. Pesquera.
Tamaulipas.....	" " V. Dueñas.
Tlaxcala.....	" " S. Canales.
Veracruz.....	" " M. Carvajal.
Yucatan.....	" " F. de Landero y Cos.
Zacatecas.....	" " General Palomino.
Federal District.....	Señor Don O. Pérez.
Lower California (Terr'y).....	" " B. Dávalos.

The Archbishop of Mexico is Monseñor P. A. de Labastida; of Michoacan, Dr. Arciga; of Guadalajara, Dr. P. Loza.

The Mexican minister plenipotentiary to the United States is Señor Don Ignacio Mariscal; and the Mexican consul-general at New York, Dr. Juan N. Navarro. The United States minister plenipotentiary to Mexico is the Hon. John W. Foster; and the United States consul-general at the capital, Dr. Julius A. Skilton.

The annexed table shows the financial position of the country for the year 1873-'74:

* See ANNUAL CYCLOPEDIA for 1874.

REVENUE.	
Import duties	\$10,854,159
Transit "	1,225
Tonnage dues	50,917
Lighthouse "	14,488
Export duties on gold and silver	881,042
" " on timber	86,949
" " on orchilla	4,500
" " on foreign merchandise	2,917
Revenue office	1,288,969
Stamped paper	2,812,077
Direct contributions (Federal District)	524,495
Nationalized property	852,511
Mint	410,861
Public instruction	89,440
Post-Office	528,583
Sundries	851,007
Arrears	816,998
Total	\$18,465,688

EXPENDITURES (AS ESTIMATED IN BUDGET).

Legislative	\$677,100
Executive	48,173
Supreme Court, Circuit Courts, District Courts	291,680
Ministry of the Interior	1,778,887
Foreign Affairs	280,860
Justice, etc.	873,128
Ministry of Finance	5,031,689
War and Navy	10,252,622
Public Works	4,567,888
Total	\$28,956,491

In an official publication for the year 1875 the revenue for the fiscal year above referred to is set down at \$22,197,802.02, and the expenditures were the same sum precisely. The disappearance of the large deficit observable on comparing the two detailed tables above given is accounted for by the swelling of the revenue by numerous incidental unclassified receipts on the one hand, and the limitation of the expenditure on the other, in such a manner as to precisely balance the revenue.

For details concerning the national debt, and the army, reference may be made to the article Mexico, page 552 of the ANNUAL CYCLOPEDIA for 1874. In that same article will likewise be found comprehensive remarks relative to the commodities chiefly exported and imported by the Mexican Republic; while in the following table are exhibited the several countries with which the foreign trade is for the most part carried on, and the respective values of the exports thereto and the imports therefrom, for the whole of the year 1873:

Value of the Exports to	Value of the Imports from	COUNTRIES.
\$12,480,000	\$10,181,000	Great Britain.
11,867,000	7,420,000	United States.
4,604,000	4,817,000	France.
1,579,000	1,283,000	Colombia.
508,000	8,890,000	Germany.
758,000	1,894,000	Cuba.
81,000	103,000	Central America.
25,000	21,000	Various.
\$81,691,000	\$29,062,000	

By comparing with the totals of the foregoing table the mean annual value of the exports (\$10,000,000 approximately), and of the imports (\$14,500,000 nearly), for the four years 1825-'28, it will be seen that, while the latter have about doubled, the former have more than tripled.

The number of vessels entered at the several ports of the republic in the year 1873, and their respective flags, are set forth in the subjoined table:

Flags.	Number of Vessels.
Mexican	2,377
United States	892
British	168
French	115
German	112
Spanish	64
Norwegian	46
Danish	38
Dutch	19
Others	26
Total	3,131

Estimated tonnage, 1,000,000. The Mexican merchant navy is composed of 357 sea-going and coasting vessels, and 672 small craft exclusively engaged in the coasting traffic.

Early in the year, the reactionary periodicals of the capital echoed in menacing tones the traditional inimical sentiments of the conservative or clerical party toward the present Government. This renewed manifestation of hostility was provoked by the decree, issued late in 1874, for the suppression of the order of the Sisters of Charity, the only monastic order then remaining in the republic, all the others having been abolished by Juarez long before the establishment of Maximilian's short-lived empire. The opposition principles were most strikingly revealed through the medium of certain documents entitled "Protests of the Ladies," signed by, and purporting to have been drawn up by, a number of ladies, many of them the wives of influential citizens and Senators, and, in form, the expression of their regret for the departure of the Sisters of Charity, but, in fact, a denunciation of the liberal measures especially characteristic of the present administration, and that of the late President, Juarez. Mr. Foster says:

The subject has been discussed with much acrimony in the daily press of this capital, by the Conservative or Catholic organs on the one side, and the combined Liberal press on the other, the discussion having had the effect to unite the Liberal opposition newspapers with the supporters of the administration in the defense of the law, which law is regarded as the natural sequence of the constitutional principles of 1857, and not peculiarly an administrative measure.

Strenuous were the efforts of the Conservative or church party to form a union with the Liberal opposition, with the design, as it has been rumored, of bringing about a revolution; but such a coalition was unconditionally rejected by the Liberal opposition press and party. One of the most pronounced of the Liberal opposition papers indorses, in most enthusiastic language, the action of the President, and quotes approvingly an editorial from the official Government organ, referring to the "Protests" and the treatment of the officials whose wives signed them. But, to fully comprehend the political situation of the country, it is proper to refer to other matters.

The long and, for Mexico, profound peace which the country has enjoyed has not fully realized the natural expectation of a revival of business, a rapid development of industries, and an era of prosperity. For the past two years the leading industry of the country, silver-mining, has been much depressed,

many of the mines being at present only nominally worked, among which is that of the largest company in the republic, the "*Real del Monte*," and there are many laborers without employment. There is a general complaint in mercantile circles of a lethargy and dullness in trade. There has been a repeated delay in the promised construction of railroads to the interior, to the Pacific, and to the American frontier, which has been the greatest industrial demand of the country. Immigration has not set in, as was hoped, with the restoration of peace and a stable government. As a consequence, many experience a feeling of disappointment, and others a spirit of restlessness, which to some observers of the situation forebodes *pronunciamientos* and revolution; and of this state of the country the Conservative party has been very ready to take advantage. The departure of the Sisters of Charity and the "Protests of the Ladies," added to the Pope's denunciation of the Mexican laws of reform, have revived much of the old religious fanaticism and hatred of the present Government, which was believed to be dying out. This spirit has developed itself in the number and strength of the bandits in different parts of the republic, and in attacks upon Protestant churches and adherents. Inappropriate as it may seem, the rallying-cry and professed object of the robber-bands and guerrillas is that of the defense of the Church. These bands, whose numbers are swelled by the numerous unemployed laborers, have become so formidable in the States of Michoacan and Jalisco as to give currency to the report of an organized revolution. But, in view of the recent vigorous measures ordered by the authorities, it is anticipated that these bands will soon be suppressed or scattered. Frequent notices of outrages upon Protestant congregations or individuals appear in the daily papers, or are reported to the superintendents of missions in this city.

The common remark is, that the country was more prosperous in the times of revolution than in these days of peace. The army then gave employment to the idle laborers, their subsistence occasioned a large expenditure of money, and their movement created life and animation. The people, accustomed to war and changes of government, become restless under the present comparatively long peace. But the administration of Mr. Lerdo is impressed with the necessity to the nation of a continuance of peace, satisfied that, under its influence, the republic will, in time, experience such a revival of business, mining, and agricultural and manufacturing interests, as will give the country an era of prosperity never before enjoyed; and it will be successful in repressing outbreaks so long as the army remains faithful. The latest official report of the army places its strength at 23,000, and it is better armed, equipped, and disciplined, than in any former period in the history of the country. There are just now rumors of a threatened *pronunciamiento*, and of the discovery of a plot, the chief instigator of which was General Rocha, division-general and commander of the Federal troops in this capital, which had for its object the deposition of President Lerdo. While there has been some basis for the rumors, the conspiracy does not appear to have had any definite organization or well-settled plan, and the Executive authority was not greatly endangered by it. It is doubtless sufficiently grave, however, to require the removal of General Rocha from his command.

Within the Liberal party there are no differences of principles sufficiently marked upon which to organize an armed opposition to the present administration. It could only be of a personal character, without justification or palliation. Revolution at present can be organized only upon a reactionary basis, and that does not appear probable.

A comprehensive view of the general state of affairs in Mexico, in the first half of the

year, is afforded by the following extract from President Lerdo's speech, delivered at the opening of Congress, on April 1st:

... In order to strengthen them more with Guatemala and Italy, representatives of the republic have been sent* especially charged with expressing to those Governments the wishes which that of Mexico entertains for the prosperity of the people over whose destinies they preside.

Among the amendments to the Constitution recently made, with all the requisites which the same provides, the creation of the Senate, which will be realized in September next, will become, in the composition of the executive power, the complement of our constitutional organization.

The Executive has strictly observed the organic law of the constitutional additions and reforms. The remains of old prejudices in the religious sentiment of some persons, artfully and unreasonably excited, have given occasion or pretext for the formation of small armed bands in a limited section of the States of Michoacan and Jalisco. These small bands, which will soon be dispersed, have not had it in their power to compromise the peace of the nation.

The Executive has submitted, and recommends to the consideration of Congress, a bill of a new and important mining ordinance, so useful in a country in which that branch of industry is one of the principal sources of wealth.

The project of the code of commerce having been completed, it will be submitted to Congress as soon as the observations of the Chamber of Commerce of this city are examined.

Instruction in the art of teaching, etc., being now given in the National Secondary School for Girls, that institution now partakes of the character of a normal school, in order that there may be furnished a good corps of female teachers. The Executive is also occupied in organizing a normal school of male teachers, the project for which will be duly presented to Congress for its examination and approval.

The project of a law for compulsory primary instruction, which the Executive has presented to Congress, has the highest and most important interest for making education general and elevating the moral condition of society.

The commission sent to observe in Asia the transit of Venus reported that it had complete success in the observation.

For the important work of the railway from Mexico to Leon, the investigations and surveys necessary for the entire distance from Mexico to Querétaro have already been commenced.

Near the end of the last period of sessions, the Executive submitted to Congress a project for a railway from Leon to the Rio Bravo (Rio Grande), and another for a railway from Guaymas to the Sonora and Arizona frontier.

The basis of a project is already settled, which will soon be presented to Congress, for a railway from Matamoras to the Laguna de Jesus Maria, and for the necessary work in said lake for the purpose of forming therein an excellent port, which shall offer to vessels ample space and security.

The funds necessary for the lighthouses of Anegada de Afuerza, in Vera Cruz, and of Tampico, have been deposited. These improvements in the two harbors will be of great utility.

The labor for completing the canal from the lake of Tamiahua to Tampico is well advanced, as also that on the canal which will convey the waters of the Rio Armeria to the lagoon of Cuyetlan.

No effort is omitted for pushing forward to completion the several extensive telegraphic lines now in process of construction. Already all the material for the line from Tampico to Matamoras, *via Ciudad*

* For the first time since the days of the late empire.

Victoria, has been received, which communicates with the city just named. Since the establishment of peace, in 1872, over 1,600 miles of Government telegraph-lines have been constructed.

The commission charged with the arrangements for the national exposition, and the preparations for the part Mexico is to take in the Philadelphia Exposition, continues its labors satisfactorily.

The law of November 10, 1874, for continuing the recognition and liquidation of the claims of the public debt is punctually observed.

The stamp law, promulgated December 31, 1871, was not carried into effect at once, owing to the lack of printing apparatus for the stamps. The want having been supplied, it was determined on the 1st of last December that the law should take effect. It is now in force in the Federal District and in most of the States, and, thanks to certain modifications introduced by the Executive, in favor of the public, is unattended by the difficulties which other similar laws are wont to give rise to.

In pursuance of the decree of Congress permitting vessels from foreign ports to enter our coasting ports, for the purpose of taking on board cattle and wood, the Executive has issued a system of rules for the prevention of smuggling, without weakening the effect of the laws in favor of exportation.

To encourage the extensive traffic induced by increasing mineral products in the district of Muligé, Lower California, and the fisheries along the coasts, a port has been established there for the coasting-trade.

The Executive has been careful to keep the military colonies in the frontier States well provided with arms, equipments, and other elements necessary to their proper organization, and to enable them to fulfill their important mission of protecting the persons and property of the inhabitants of those States.

The term of the session of Congress which was opened on April 1st expired, by limitation, on May 31st. We subjoin a translation of the more important passages of the President's speech at the opening of the fall session, September 16th:

Citizen Deputies and Senators: For the first time, under the political regimen established in 1857, the legislative power of the Union comes to exercise its functions composed of two Chambers. The institution of the Senate completes our constitutional system, offering new hopes of prosperity, not only as the equal representation of the States is now combined with the proportionate representation of the population, but also because the greater concentration of intelligence and the double discussion of the laws will make of the Federal Congress a fruitful centre of prosperity for the republic.

This reform, initiated eight years ago, is now realized, after being considered by various Congresses, approved by the Legislatures of the States, and sanctioned by all the requisites of the fundamental code.

Our relations with the friendly powers continue to be cordially and happily cultivated.

The necessary data are now collected upon which to base the project of a treaty of limits between Mexico and Guatemala, the conclusion of which will be sought with zeal, it being desirous to hasten to a satisfactory termination this subject, which has for half a century occupied the attention of both countries.

The reestablishment of the monarchy in Spain having been communicated to the Executive, the representative of Mexico in Madrid has been accredited anew.

The work of the mixed commission established in Washington is nearly terminated, the decision in a few cases only being wanting, as also the decision

of the arbiter in several cases in which the commissioners were not agreed.

The investigating commission in the States of Chihuahua and Sonora has terminated its labors satisfactorily, of which result the report has recently been made, which will soon be published.

Elections for magistrates of the Supreme Court of Justice having been held in all the republic, the final declaration of Congress is only wanting to constitute that high tribunal complete.

Under the authority conferred by Congress upon the Executive, a law has been formed for the reorganization of the tribunals of the Federal District.

The project of reform of the respective commissions appointed in compliance with the law which ordered the revision of the code of civil proceedings will be sent to Congress at once.

Public instruction has continued to merit particular attention. Both in the primary and in the professional schools efforts have constantly been made to increase the elements of instruction, by establishing new professorships as well as by providing all the instruments and other useful apparatus for practical teaching. With the same desire of obtaining the most perfect practical instruction, various pupils of the national schools have continued to be sent abroad upon the successful conclusion of their studies.

The Executive sent an initiative to Congress, at its last session, for the establishment of a normal school for teachers. This subject is very worthy to be recommended, in order to meet the growing want of primary instruction.

In the conservatory of music and declamation, practical instruction in the latter branch has been inaugurated, in order to encourage advancement in national art and dramatic literature. The Executive has ordered a dramatic company to be subsidized, which is intrusted with the instruction of Mexican dramatic authors, and the bringing out upon the stage the plays of those authors, the latter sharing in the pecuniary benefits.

Notwithstanding certain difficulties, care has been taken to continue with regularity the ordinary payment of the civil and military lists.

On account of the imperious necessity of obtaining some increase in the receipts of the national Treasury, in order not to neglect improvements of great interest and to meet the obligations of the Administration, the Executive, as authorized by Congress, has ordered a time to be fixed when the reduction of ten per cent. in the tariff shall cease and the entire collection of the import duties shall be made. In the last session of Congress the propriety of this measure had already been indicated, which has not been repugnant to public opinion, considering it as the most equitable and least onerous mode of obtaining additional resources.

According to the direction of Congress, more than \$200,000, representing almost the total of the copper money in circulation in Sinaloa, have already been withdrawn from circulation. It is expected soon to be possible to withdraw the rest of this money, which, on account of its depreciation in that State, has occasioned serious injury to commerce and to all social interests.

The insurrectionary bands in the State of Michoacan, although they have not been entirely suppressed, having been favored by the rugged character of the country, have very notably diminished. A competent Federal force constantly pursues them, and frequently defeats them, it being expected that very soon order will be entirely restored in that State. It is also to be believed that the disturbances which have occurred in Nuevo Leon, on account of local questions, will soon disappear, with a happy termination to those difficulties.

The insurrection against the local government of Chiapas has been effectually resisted by that government. As a sufficient Federal force was also sent

immediately, it is certain that no element of disorder in that State can be maintained.

In the rest of the republic the benefits of peace are enjoyed, solidly supported by public opinion, which, with the experience of former revolutions, condemns all sorts of rebellious movements.

It is gratifying to the Executive to state to Congress that he has hardly had occasion to make use of the extraordinary faculties which were conceded to him. He has sought duty to reciprocate the confidence of Congress by abstaining from the use of them in so far as his own faculties were sufficient. Nevertheless, the concession of these extraordinary powers has not been fruitless, as it has prevented the extension of disorder, and also because the simple fact of investing the Government with all necessary power has restrained those who wished to create public disorder.

Without neglecting the other branches of the Administration, the development of public improvements has been zealously sought, under the conviction that these will assure peace, being the most efficacious element of social progress.

The contract has been renewed with the steamship company engaged in the traffic between certain of our Pacific ports, for the benefit of the trade carried on between them.

The new telegraph-lines are completed between the following places: San Luis Potosi and Tampico; Mexico and Vera Cruz; Cuernavaca and Cuautla; and Tepeje and Tula in the State of Hidalgo.

The work at the ports of Frontera and Tabasco are rapidly advancing toward completion; and those at the mole of Mazatlan have been commenced.

The railway line from Vera Cruz to Zamorana is completed; and that from Vera Cruz to Jalapa has been in operation since June last. The line from Merida* to Progreso is in rapid course of preparation; as is also the wagon-road from Tehuacan to the capital of Oajaca. The surveying has been completed for more than 200 kilometres of the Central Railway.

MICHIGAN. The only general election for the year was for judges and Regents of the University, and it resulted as follows: For Justices of the Supreme Court, Benjamin F. Graves was reelected for the regular term without opposition. To fill the vacancy occasioned by the election of Judge Christianity to the United States Senate, the vote was: for Isaac Marston, Republican, 117,951; for Lyman D. Norris, Democrat, 91,876: Republican majority, 26,075. For Regents of the University, Samuel S. Walker and Byron M. Cutcheon, Republicans, were chosen over Samuel T. Douglass and Peter White, Democrats, by an average majority of 21,163. The following persons were chosen Circuit Judges in the several circuits:

- | | |
|-------------------------|---------------------------|
| 1. D. L. Pratt, Ind. | 11. D. Goodwin, Ind. |
| 2. H. H. Cooledge, R. | 12. W. D. Williams, Ind. |
| 3. C. J. Reilly, D. | 13. R. Hatch, Jr., Ind. |
| 4. M. D. Huntington, D. | 14. A. H. Giddings, R. |
| 5. P. T. Vanzile, R. | 15. E. W. Kelghtley, Ind. |
| 6. A. C. Baldwin, D. | 16. E. W. Harris, Ind. |
| 7. J. Turner, Ind. | 17. Birney Hoyt, R. |
| 8. L. S. Lovell, R. | 18. S. M. Green, Ind. |
| 9. J. L. Hawes, D. | 19. H. H. Wheeler, Ind. |
| 10. W. S. Tenant, Ind. | 20. H. Hart, R. |

Those are classed as independent who were chosen either without opposition or against party candidates.

The most important legislation for the year

* Merida is the capital of Yucatan, and Progreso the chief resort of shipping in that State.—V.

was that relating to intoxicating liquors. This was contained in several acts. The first imposed heavy penalties on persons preparing or selling liquors adulterated with any deleterious drug, substance, or liquid, which is poisonous or injurious to health. The second required the payment of an annual tax of \$300 by every non-resident selling or taking orders for distilled liquors in the State, and \$100 by every one selling or taking orders for malt, brewed, or fermented liquors. The third repealed the prohibitory liquor law, and imposed an annual tax on dealers in liquors as follows: On retail dealers in spirituous or intoxicating liquors, \$150; on retail dealers in brewed or malt liquors, \$40; on wholesale dealers in spirituous or intoxicating liquors, \$300; on manufacturers of brewed or malt liquors not manufacturing over 1,500 bbls., \$50; over 1,500 and not exceeding 5,000, \$100; over 5,000, \$200; on manufacturers of spirituous or intoxicating liquors, \$300. The tax was to be paid over for the benefit of the contingent fund of the township, village, or city, in which the business was carried on. The third made stringent provisions to prevent the sale or delivery of intoxicating liquors, wine, and beer; to minors, and to drunken persons or habitual drunkards, and gave an action for damages to the wife, child, parent, guardian, husband, or other person, who should be injured in person or property, or means of support, by unlawful sales. The enforcement of the second of these acts was resisted on various grounds, the most important of which was, that it was in violation of a provision of the State constitution, which prohibits the legislature from authorizing any license for the sale of spirituous or intoxicating liquors; the argument being that the taxation of the business implied a protection of the business, and was thus equivalent to a license. This position was judicially held to be unsound, the Supreme Court holding that, as the business was no longer prohibited, and its lawfulness did not in any manner depend on taxation, the tax could not be a license, or equivalent to a license; and, moreover, that it was perfectly competent to tax a business for the purpose of discouraging it, or even to make an illegal business the measure of the tax a man should pay if he persisted in continuing it. The third act above mentioned was also contested on various technical grounds, but was fully sustained. The result of a change in the system from a prohibition of the liquor-traffic to the taxation of it, so far as the same is shown by the licenses issued by the Internal Revenue Bureau, is as follows: number of dealers in 1874, 6,164; number in 1875, 4,991; decrease, 1,173. Before the legislation above given, dealers were not taxed at all by State authority, except in a few places under municipal by-laws.

The State Agricultural College has property consisting of buildings and farm, in and upon which instruction is given, appraised at \$240,-

861.75; land in the vicinity, valued at \$7,000; agricultural fund in the State Treasury, on which the State pays the college 7 per cent. interest, \$281,377.46; lands donated by the General Government, and remaining unsold, 165,154.57 acres. The State makes to the college a yearly appropriation in addition to its interest, and this in 1875 was about as usual. The college farm is near Lansing, and consists of 676 acres, watered by a small river, and possessing a great variety of soil, and considerable natural beauty. The chemical laboratory is quite complete, and the other buildings suitable to the general working of the institution. Number of graduates, 123; instructors, 13; pupils, 156; T. C. Abbott, president. The institution is under the general charge and supervision of the State Board of Agriculture.

The course of study is four years in length.

Agriculture is taught by extended courses of lectures by three professors, assisted in practical instruction by several assistants especially educated for their work. The various sciences, modern languages and literature, history, and philosophy, find a place in its course of study.

The distinguishing feature of the college is its labor system. Every student works three hours each of five days of the week upon the farm, receiving a small compensation for his labor. The labor system is so interwoven with the instruction given, and so managed under the skillful care of professors and foremen, as to keep up the interest of students in it, and make it no loss to the institution. The labor system has been in continued operation since the opening of the college nineteen years ago, and never was more efficient than now.

Three new schools were added to the State University at Ann Arbor during the year—a school of mines, a school of dentistry, and a school of homœopathic medicine. A hospital building was also erected for the medical department. Additional buildings were also provided for the State Charitable School at Coldwater; and the State House of Correction, provided for by the Legislature of 1878, was located at Ionia, and its construction proceeded with.

The report of S. S. Cobb, Railroad Commissioner, bearing date of October 30, 1875, contains the following statistics:

At the close of the year 1874, the railroad interests of Michigan were represented by thirty-four corporations, which owned a total of 5,278.36 miles of road, of which 3,314.93 miles were within the State. In addition to this, there were 7,375 miles of double track, and 512 miles of sidings. The increase for the year shows 61.6 miles of road built in 1874.

The several corporations represented in the above railroads had a capital stock of \$188,850,378.61, or \$26,529.76 per mile of road owned. The proportion of capital stock for

the miles of road lying in the State was \$63,-539,917.86.

The total debt liabilities of these roads were \$156,468,868.46, of which \$95,674,287.07 is applicable to the miles of road in the State, or \$30,128.56 per mile.

The combined stock and debt amount to \$58,862.77 per mile of road.

The cost of these railroads and the equipment with which they are operated amounts to \$54,453.91 per mile.

Earnings and Expenses.—The gross earnings of the thirty-four roads were \$45,899,289.74, or \$3,179.94 per mile of road operated. Of this, 27 per cent. was from passengers, 2 per cent. from mail, $1\frac{1}{4}$ per cent. from express, 69 per cent. from freight, and $\frac{1}{10}$ per cent. from miscellaneous sources.

The total of operating expenses was \$30,543,-249.13, or \$5,442.52 per mile of road. This shows a decrease, as compared with the previous year, of $8\frac{1}{10}$ per cent.

The earnings per train per mile were, for passenger-trains, \$1.59; freight-trains, \$1.71; or an average, for all trains earning revenue, of \$1.65.

The average expense for operating, per train per mile, was, for all trains, \$0.91.7; and for trains earning revenue, \$1.10. The interest expense per revenue earning train per mile, was 39 cents; or a total of train per mile expense of \$1.49.

The interest liability of these roads for the year was (approximately) \$10,904,490.46, of which \$2,231,044.76 remained unpaid. Eight companies failed to pay any part of their interest, and seven companies paid but part of their interest.

The operating expenses and interest of twenty-three companies exceeded their gross earnings by a total of \$2,469,977.26.

The net earnings for all the roads show a total of \$15,356,040.61, or \$2,737.42 per mile of road operated.

The above amount is equal to $5\frac{1}{10}$ per cent. on the total cost of roads and equipment, and $5\frac{1}{10}$ per cent. on the investment represented by the paid-up stock and debt.

But one company paid any dividends during the year—the Lake Shore & Michigan Southern having paid one of 10 per cent. on their preferred stock, and one of $3\frac{1}{2}$ per cent. on the common stock.

The train mileage for the year was 9,352,272 miles for passenger-trains, 18,119,684 miles for freight-trains, 257,173 for mixed trains, and 6,068,199 miles for construction and other trains: a total train mileage of 33,824,000, or of trains earning revenue, 27,155,802 miles.

The number of passengers carried was 10,-268,373; and the passengers carried one mile were 430,392,230.

The aggregate tons of freight moved were 14,318,317, and the tons carried one mile, as reported by twenty-two roads, were 1,932,955,-796.

The character of the business done may be seen from the following table:

CLASSES OF FREIGHT CARRIED.

	Per Cent.
Cereals	15.15
Agricultural products, except grain	1.94
Flour	3.98
Provisions	3.27
Manufactures	2.18
Animals	5.17
Lumber and forest products	17.17
Coal	6.61
Iron and other ores	9.77
Stone and brick	1.46
Merchandise and other articles	29.54

There were in the State 759 stations, or one for each $4\frac{1}{2}$ miles of road. The thirty-four companies employ in the State 15,608 persons—an average of four men to each mile of road.

Mr. Samuel H. Row, the State Insurance Commissioner, furnishes the following abstract of the insurance within the State for the last five years preceding 1875, the returns for that year not being yet received.

FIRE INSURANCE.

The mutual fire-insurance companies of the State are limited in territory to two counties, contiguous to each other; said companies numbered, December 31, 1874, thirty-five separate organizations. Abstracts of annual reports show (December 31st):

TOTALS.	1870.	1871.	1872.	1873.	1874.
Amount at risk	\$68,261,456	\$69,664,190	\$75,503,968	\$80,525,998	\$85,618,731
Memberships	92,061	85,576	89,378	41,567	54,068
Assessments	\$112,911	\$111,247	\$140,719	\$119,450	\$135,678
Losses paid	\$90,647 00	\$85,164 88	\$104,096 56	\$95,925 69	\$109,580 55

The aggregate Michigan business of stock, fire, and fire-marine insurance companies for the same term of years is as follows:

YEAR.	Risks written.	Premiums received.	LOSSES.	
			Paid.	Incurred.
1870	\$181,607,188 00	\$1,618,241 58	\$978,599 08	\$999,049 68
1871	186,469,945 00	1,647,507 24	942,946 22	1,085,951 54
1872	183,804,735 00	2,208,735 00	1,366,517 76	1,893,407 91
1873	164,478,795 00	2,566,889 28	1,384,806 47	1,494,451 81
1874	162,258,006 78	2,570,667 68	1,923,873 68	1,373,329 66
Totals	\$758,118,637 78	\$10,545,504 68	\$5,750,782 91	\$6,068,128 60

The number of Michigan stock, fire, and fire-marine insurance companies is three; the companies of other States, and foreign governments, reporting to the Insurance Bureau during the years above given, varied from 96 to 109.

LIFE INSURANCE.

The following is a compilation of the new business done in Michigan, embracing policies issued and the amount and claims paid, for the years 1871, 1872, 1873, and 1874:

YEAR.	No. of Companies.	NEW POLICIES ISSUED.		Total Premiums. (Old and New Business.)	Losses paid.
		Number.	Amount.		
1871.....	56	10,156	\$17,889,265 00	\$1,824,975 80	\$482,190 00
1872.....	45	7,852	15,472,579 00	1,966,492 91	432,206 00
1873.....	44	7,075	15,164,597 00	1,844,262 92	542,567 00
1874.....	87	5,485	10,766,048 00	1,780,857 28	568,622 35

The amounts stated above as losses paid for the years mentioned are very largely below the actual sums returned to policy-holders, as they do not include any return-premiums or dividends. The total of premium receipts is the

actual amount of nominal premium charged, but in the mutual dividend-paying companies a large rebate is really made, which, properly separated, would decrease the premiums or add to the amount received by the policy-holders.

SYNOPSIS OF NUMBER OF LIFE COMPANIES IN MICHIGAN AND PREMIUM RECEIPTS FROM 1861 TO 1874, BOTH INCLUSIVE.

YEAR.....	1861.	1862.	1863.	1864.	1865.	1866.	1867.
No. of companies	19	15	20	20	24	24	43
Premiums.....	\$63,335 00	\$97,730 00	\$215,191 00	\$365,363 00	\$542,356 88	\$500,207 00	\$1,005,612 36

YEAR.....	1868.	1869.	1870.	1871.	1872.	1873.	1874.
No. of companies	47	54	66	56	45	44	87
Premiums.....	\$1,186,520 90	\$1,388,889 76	\$1,690,577 05	\$1,824,975 80	\$1,966,492 91	\$1,844,262 92	\$1,780,857 28

The following shows the number and amount of policies *in force* in this State at the close (December 31st) of the years 1871, 1872, 1873, and 1874:

YEAR.	No. of Policies.	Amount in Force.
1871.....	29,213	\$59,498,951 00
1872.....	29,193	59,641,984 00
1873.....	29,421	61,548,167 00
1874.....	25,049	64,163,454 00

Only one of the life-insurance companies is a

Michigan corporation. The decrease in the number of foreign companies doing business in the State is due in part to the depression of business affecting insurance everywhere, and in part to the caution taken by the Insurance Commissioner to exclude all companies whose exhibits do not promise adequate indemnity to policy-holders.

The following is a summary exhibit of the financial transactions of the State Treasury during the fiscal twelve months closing on September 30, 1875:

Gross receipts into the State Treasury.....	\$2,306,929 35
Balance in Treasury October 1, 1874.....	1,070,274 22
Total for period.....	\$3,377,203 57
Gross expenditure during the same time.....	2,600,097 87
Balance September 30, 1875.....	\$1,230,106 30
Showing an increase in balance, and also an excess of receipts over expenditures during the period, of.....	\$126,205 15
As stated above, the gross Treasury receipts were.....	\$2,306,929 35
This covers the price of State swamp-land, expended in the construction of swamp-land State roads, being— not cash.....	72,223 20
Leaving for net cash receipts during the period.....	\$2,134,547 30
Of cash there was received as not revenue.....	\$425,141 64
And from refunding and reimbursements.....	48,065 75
	483,207 39
Leaving for net cash receipts from legitimate sources of revenue.....	\$1,651,339 91
To this amount should be added amount received to general fund, being a reimbursement of prior expenditure therefrom.....	15,416 19
Giving for entire receipts available for general purposes.....	\$1,666,756 10

The net cash revenue receipts were:

From direct taxes.....	\$970,504 99
From specific taxes.....	536,450 98
From trust funds.....	61,967 05
	\$1,568,952 97
Discellaneous.....	84,856 96
Total ordinary revenue receipts.....	\$1,653,809 98
To which add reimbursements as above.....	10,416 19

Giving for receipts for the fiscal period available for general purposes..... \$1,663,726 12

The amount of copper and iron ore reported from the Upper Peninsula for taxation in 1875 was:

Copper—tons, 15,919; lbs., 1,011; tax, 75c. per ton \$11,414 63
 Iron—tons, 793,158; lbs., 1,430; tax, 1c. per ton.. \$7,931 58

The tax is based on the reports of production in 1874.

The salt inspection for the year was 1,080,465 barrels. The business increases steadily, mainly in Saginaw Valley.

In Headley & McCall's annual statement of the business of that valley for the year, the following estimate is made of the pine-lumber:

Lumber cut in the State.....	2,691,965,888 feet
Shingles cut.....	1,338,870,000 "
Lumber on hand.....	804,254,858 "
Old logs on hand.....	695,194,671 "

The lumber business was greatly depressed in the year, and prices ruled low.

The report of the State-prison Inspectors for the year ending September 30, 1875, shows a balance of net earnings for the year of \$10,409.65. Number of convicts at beginning of year, 703; received, 391; discharged, 259; pardoned, 26; escaped, 5; died, 10; sentences reversed, 6; sentence commuted, 1; number remaining, 788. Average term of sentences, 15 years; life-sentences, 3. Since 1847 seventy persons have been sentenced to solitary confinement in the State-prison for life. Of these convicts the report says:

Of these, 26 have died; 7 were discharged for new trial and not reconvicted; 8 were pardoned; 2 have escaped; 2 have been committed to House of Correction; 3 are insane, and 23 have been committed to solitary confinement to imprisonment for life, having now in prison 24 whose sentence was solitary confinement for life.

Of the insane solitary convicts, one was convicted in 1848, and, with one or two intervals, has been in solitary confinement since his committal; was partially insane when he came, and has continued in about the same condition.

One was committed in 1854; was partially insane when committed, and for the last ten years has been completely and totally insane.

The third one was convicted in 1866; seemed to be partially insane when committed, and his insanity has continued to grow upon him since his arrival here.

Since 1847—the year in which the death-penalty was abolished—there have been 39 convicts sentenced to this prison to hard labor for life, and these are convicted of murder in second degree, rape, arson, robbery, etc., 16 of whom are now in prison.

And referring to certain tables accompanying the report, it is added:

It will be seen that a period of twenty-eight years has elapsed since the change in the law abolishing the death-penalty; and it will also be seen, upon examination, the same number were sentenced to

solitary confinement during the first half of this period as during the last half; while during the same time the convictions for other and lesser crimes increased nearly one-half, and the population of the State in the same ratio.

MIGNE, JACQUES PAUL ABBÉ, a French writer and publisher, born at Saint-Flour, October 25, 1800; died in November, 1875. He studied theology at Orleans, was for a time professor at the College of Chateaudun, and was ordained as priest in 1824. Long misunderstandings with the bishop of his diocese caused him to resign his position as curate in Puiseaux. In 1833 he went to Paris and founded the *Univers religieux*, afterward *l'Univers*, which, in a short time, became the leading Catholic organ. He soon possessed a large printing establishment, from which he published editions of the Latin and Greek Church fathers, and other collections of theological works, comprising many hundreds of volumes. In 1868 his printing establishment was destroyed by fire; the losses, which were covered by insurance, amounting to more than 6,000,000 francs.

MINNESOTA. One of the most important public matters to be noted in this State, for 1875, is the census, which shows the total population, on May 1st, to have been 597,278, being an increase of 57,572 since 1870. The population by counties was as follows:

COUNTIES.	Number of Families.	Males.	Females.	Total Population.
Aitken.....	29	144	89	205
Anoka.....	1,038	2,773	2,651	5,709

Wright.....	3,969	7,989	6,486	14,775
Yellow Medicine.....	630	1,324	1,166	2,490

The following are the totals of the above, together with the number of blacks, mulattoes, Indians, and half-breeds, not there included:

Number of white families.....	111,207
Number of males.....	814,743
Number of females.....	230,005
Total population.....	597,273
Males over twenty-one years.....	150,908
Persons between five and twenty-one.....	224,858
Number of negroes.....	506
Number of mulattoes.....	809
Number of Indians.....	319
Number of half-breeds.....	1,252

Of the total population, 376,000 were of native, and 217,429 of foreign birth; the nativity of the remainder was reported to be unknown. The States and foreign countries in which they were born were as follows:

Native born.	Foreign born.
Minnesota.....	205,949
Connecticut.....	2,597
Illinois.....	12,574
Indiana.....	7,170
Iowa.....	6,849
Kentucky.....	1,737
Maine.....	10,764
Massachusetts.....	8,890
Michigan.....	4,512
Missouri.....	1,580
New Hampshire.....	8,338
New Jersey.....	1,241
New York.....	41,344
Ohio.....	18,890
Pennsylvania.....	12,044
Vermont.....	7,080
Virginia and W. Va.....	2,080
Wisconsin.....	80,534
Other States.....	5,669
Canada.....	19,381
England.....	7,054
Ireland.....	22,888
Scotland.....	2,655
Wales.....	1,057
Sweden.....	20,507
Norway.....	58,766
Denmark.....	4,052
Holland.....	1,738
France.....	1,258
Switzerland.....	2,138
Austria.....	8,158
Bohemia.....	4,270
Baden.....	1,700
Bavaria.....	1,181
Hanover.....	2,117
Prussia.....	29,216
Württemberg.....	987
Germany.....	23,501
Other countries.....	3,938

Among the foreign-born people the Scandinavians take the lead, the Norwegians, Swedes and Danes, numbering 88,325. Germany follows with 59,602, and Ireland comes next with 22,888. The Dominion of Canada sent over 19,331 of her people. The nativity of the German-speaking people has not been satisfactorily settled by the assessors. The instructions of the Secretary of State required the German population to be registered under the different countries; but these instructions were disregarded in many counties, and since the unification of the German Empire there was a general disposition to ignore the old lines, and nearly all were anxious to put themselves down as hailing from "Germany." It is obvious, therefore, that the number of persons set down as having been born in Prussia, Hanover, Bavaria, Baden, and Württemberg, does not by any means cover all the immigrants from these divisions of the Fatherland.

In regard to agricultural productions the last has been one of the most prosperous years in the history of the State. The following statement exhibits the progress of the State in population and agriculture since 1860:

POPULATION AND CROPS.	1860.	1875.	Increase.	Percent.
Population.....	172,022	597,273	425,251	247%
No. of farms.....	18,081	60,000	41,919	232%
Tilled acres.....	845,000	2,816,413	2,471,413	292%
Wheat, acres.....	115,000	1,761,109	1,646,109	1,434%
Wheat, bush.....	2,186,998	81,475,000	79,288,002	3,629%
Corn, acres.....	119,000	864,668	745,668	626%
Corn, bushels.....	2,941,952	25,000,000	22,058,048	750%
Oats, acres.....	64,000	441,102	377,102	589%
Oats, bushels.....	2,176,000	15,776,000	13,600,000	625%
Six principal grain acres.....	805,500	2,622,324	2,816,824	350%
Six principal grain bush.....	7,564,000	57,486,500	49,922,500	660%
Val. of wheat-crop.....	\$1,192,845	\$27,738,750	\$26,545,905	2,223%
Value of six principal crops.....	\$3,740,950	\$24,588,450	\$20,847,500	557%

The area of the State in acres is 51,701,760, of which 14,106,269 have not been surveyed by the United States. In the 37,595,491 acres surveyed are 60,000 farms, of which, as above stated, 2,816,413 acres are under tillage.

The reports of the Surveyor-General show that 177,316,829 feet of lumber were scaled in the first or Stillwater district; 149,350,820 in the second or Minneapolis district; and 953,760 in the third or Duluth district.

The three State Fish Commissioners have made a report, showing that Minnesota has no less than 1,601,840 acres of inland lake surface exclusive of rivers and parts of Lakes Superior and Pepin; which is nearly three and a third acres of water to every hundred acres of land. In France 493,750 acres of lakes and ponds yield an annual rental of \$2,000,000. The commissioners are of opinion that if Minnesota should cultivate its lakes as France has done, the annual income would be not less than \$6,488,465. "It is capable of demonstration," they say, "that ten acres of water well cultivated with fish will produce a greater amount of food than ten acres of land."

nual yield than a like amount of land cultivated with its usual products. Both white-fish and lake-trout are natives of our waters, but those with which the trade is supplied here have been brought to us from outside of our own State, and might just as well have been produced and harvested in our own waters, giving employment to many of our own citizens, and being a source of considerable revenue."

White-fish is regarded as one of the best kinds with which to stock the lakes. This fish is a native in Minnesota waters, north of a line drawn through Lake Osakis in Douglas County; all the lakes and ponds of Michigan are stocked with it. It can be domesticated in all the lakes of Minnesota, where a depth of fifty or seventy-five feet can be found. Salmon is also an excellent fish for cultivation. Experiments with lake herring, fresh-water smelts, eels, and many other fish, are recommended. The plan proposed by the commissioners contemplates an expenditure of \$5,000 a year for three or four years. After the waters have become stocked, it will require about \$1,500 or \$2,000 a year to protect them.

By an act of the Legislature, approved March 9, 1875, a Board of Commissioners was constituted and named in the act for the following purposes: 1. To examine the country, rivers, and lakes, lying between the head of steamboat navigation on the St. Croix River and the waters of Lake Superior at the head of that lake, to determine the most feasible route for a canal connecting those points. 2. To make a careful and correct survey of the route which promises most for the future development of the country. 3. To make to the Legislature a report accompanied with maps and drawings, showing as nearly as practicable the features of the country over which such survey may pass, and a careful estimate of the cost for the construction of such water-channel or canal. They were also required to extend their survey so as to be able to include in their report a correct statement regarding the feasibility of a canal from Duluth to some point on the Mississippi River near Sandy Lake in Minnesota. In making their first report the commissioners stated that they had not had time or sufficient means to make a survey, and that they had performed only the first of the duties prescribed by the Legislature, viz., that of making a preliminary examination.

Three routes were examined, and the conclusion at which the board arrived is that the preferable one is *via* the Bois Brule and St. Croix Rivers, noting as the greatest and only objection to this route the fact that there is no natural harbor at the mouth of the Brule River—an objection which, without explanation, would seem decisive against the conclusion of the board—the report stating that this stream enters the lake where it has a straight line of shore for many miles, affording no natural harbor whatever.

Another route examined was from the Dalles, at Taylor's Falls, to the mouth of the Nameogon River, thence up that river and across the summit to the waters of White River, or some stream to be ascertained to be most feasible to connect with the waters of Lake Superior. This line is two hundred and fifty miles long. The report does not state explicitly how many miles of canal excavation will be required. It does state that it will involve the construction of nineteen dams and nineteen locks, and indeterminately speaks of "several more."

The third route examined lies *via* the St. Croix, Kettle, Black Hoof, and Left Hand Rivers, a distance of about two hundred miles. There is a fall of forty-five feet in nine miles above the mouth of Kettle River, to overcome which dams will be manifestly necessary, though how many the report does not state. The falls of Kettle River make a descent of nearly eighteen feet, and from the head of Lower Falls, so called, to the head of Upper Falls, a distance of four and one-half miles, the river falls a distance of twenty-five feet. How many dams or locks will be found necessary to overcome these obstacles is not stated.

"It is to be regretted," says the Governor, "that the board had not time and means to come to more explicit results. It is for the Legislature to consider whether the conclusions of the commission warrant further appropriations."

The finances of the State are reported to be in a sound condition. The Auditor states the actual value of taxable property to be at least \$300,000,000, making allowance for all exemptions. Finding that the special State tax of one-half mill, imposed by the act of last winter, would probably be unnecessary, he assumed the responsibility, with the approval of the Governor, of certifying to the county auditors two and one-tenth mills only. The amount which this will yield will be found sufficient, with delinquent taxes to be collected, and other sources of revenue, to meet all deferred appropriations, the expenses of the State government, and all other necessary public disbursements.

The question relating to the financial obligations of the State, arising out of the "Minnesota State railroad bonds," has been brought prominently before the public by the extended discussion of this subject in the recent messages to the Legislature of the retiring and the incoming Governor. "This subject," said Governor Davis, "has been a topic of reproach by our creditors, and recrimination, excuse, and defense, by many of our citizens, for more than fifteen years." The amount of the bonds outstanding against the State, the validity of which has been disputed, is about \$2,275,000. They are held by persons in all parts of the country, who are debarred from the ordinary remedy provided by the courts of justice, and are forced to rely wholly upon the power of

the State. A brief history of this question becomes important at this time.

By the constitution of Minnesota, as framed by the convention, it was prescribed that the credit of the State should never be given or loaned in aid of any individual, association, or corporation; and that the public debt of the State should never, in the aggregate, exceed \$250,000. When these provisions were framed, in 1857, the Territory had been invested by the United States with grants of lands in trust, to build certain specified railroads. These lands were granted to four companies. In consequence of the general panic which soon after occurred, no capital could be secured for the construction of the roads for which these munificent grants had been made. The lands were given to aid in the construction of about 1,300 miles of railroad, and the statute which conferred them provided for a reversion to the United States of a large part of them, unless the roads were completed within ten years. So strong was the desire of the people for the construction of the roads that the constitutional obstacles above referred to were removed by the adoption, in 1858, of an amendment to the constitution. It provided, in substance, that the credit of the State shall never be given or loaned in aid of any individual, association, or corporation, except for the purpose of expediting the construction of the railroads for which these lands had been granted. In other words, this amendment authorized the State to loan or give its credit in aid of these particular enterprises, and it limited the amount for which the State was authorized to become responsible to \$5,000,000. The amendment also provided, with great precision of direction, when and how the aid or loan was to be given, which provision was, that whenever either of the companies produced to the Governor satisfactory evidence, by affidavit of the chief-engineer, treasurer, and two directors of the company, that any ten miles of the road were actually completed and ready for placing the superstructure thereon, then the Governor should cause to be issued and delivered to the company the special bond of the State, bearing interest at seven per cent. per annum, payable in New York, as a loan of public credit, to the amount of \$100,000. Issues in the same amount were also required to be made upon the furnishing of like evidence that any ten miles had been actually completed and cars running thereon. By this amendment the faith and credit of the State were expressly pledged for the payment of the interest and the redemption of the principal of the bonds.

As this was merely a loan of the credit of the State, the amendment providently prescribed by what security the State should be indemnified in case the companies should default in payment. It was therefore provided that each company should make provision for the punctual payment and redemption of these

bonds, and for the punctual payment of the interest which should accrue thereon, in such manner as to exonerate the State from any advances of money for that purpose, and as security therefor the Governor was required to demand and receive from each of the companies, before issuing any of the bonds, a mortgage of the net profits of the road and a conveyance of the first 240 sections of land, free from prior incumbrances, in trust, to secure the State from loss on the bonds; and, as further security, the Governor was directed to exact of the companies an amount of first-mortgage bonds on their roads, lands, and franchises, corresponding to the State bonds issued, to be transferred to the Treasurer of the State at the time of the issue of the State bonds. It was also provided that in case the companies made default in payment of interest or principal due on the bonds issued to them, no more State bonds should be issued, and the Governor was required to sell the bonds of the defaulting companies, or to sell the said 240 sections of land, or to require a foreclosure of the mortgage which covered all the roads, lands, and franchises.

The companies accepted these provisions, and work upon the roads was begun immediately.

After the companies had earned a large amount of these securities, a warfare was made upon them, which was so far successful that distrust was excited; the companies were unable to negotiate them and obtain funds to carry on construction, and they ceased to be marketable. Work was therefore stopped, and the companies made default in the payment of interest. They have become insolvent. The State then proceeded to foreclose its securities. By these foreclosure proceedings it acquired about 250 miles of graded road, the franchises of the companies, the lands of the companies—in fact, it acquired the title to all the securities which it had taken for its indemnity, including nearly five million acres of land, as security for its liability upon \$2,275,000 of bonds with interest. Here, then, the State—a surety—became the owner of assets enough to satisfy all this claim over and over again.

In 1860 another amendment to the constitution was adopted, "expunging" the amendment of 1858, and providing that "no law levying a tax or making other provisions for the payment of principal or interest of the bonds denominated Minnesota State railroad bonds shall take effect or be in force until such law shall have been submitted to a vote of the people of the State, and adopted by a majority of the electors of the State voting upon the same." "The duty of the state at this stage," said Governor Davis, "was an obvious one. It was to make provision for an adjustment of the question by means of the securities which it held for that purpose. But this duty was wholly neglected. The lands and road-bed and franchises which it held for its indemnity

were granted by it to existing companies free and clear, and the result has been the development of our railway system to its present proportions."

In May, 1871, a popular vote was taken on a proposition for a settlement by arbitration of these claims, when 21,499 votes were cast against and 9,293 in favor of the proposition, the total vote being less than half the average vote of the State. Ex-Governor Davis is of opinion that the questions involved might be settled by a board of arbitrators. He says:

If a board of commissioners, composed of men of or not of this State, eminent for integrity and judicial wisdom, could be invested with jurisdiction to hear and determine the questions involved, by a consideration of every equity, legal or moral, existing on either side of the controversy, it cannot be presumed that our people would hesitate to perform the award. If these bonds were void in their inception for any reason; or if they were procured by fraudulent representations or unfaithful performance of conditions precedent; or if there is a class of unfortunate persons who invested in good faith, for value, without notice so that the last-named defense is not applicable to them; or if they are wholly due—let us meet each responsibility as becomes a great State, holding its honor dearer than anything else.

The political canvass was opened with the assembling of the State Reform Convention in St. Paul, on June 16th. In the call for this convention it was declared that "the time has come for the formation of a political party, including among other reformatory measures in its platform the suppression of the liquor-traffic, with its burden of taxation, the adjustment of the relations existing between capital and labor, and the honest and economical administration of government."

The following platform of principles was adopted:

1. We recognize the existence, power, and providence of Almighty God, and that without his blessing they who build do labor in vain. We would therefore be radically right in everything pertaining to good government, that we may consistently invoke and may confidently expect his blessing upon our endeavors.

2. In calling upon all good citizens to forsake their present political affiliations, and unite in a movement for the putting away of corruption and wrong, we would herein distinctly set forth the objects to be attained and the evils to be overcome.

3. History teaches us that corrupt political parties are never reformed, but must die, and make way for new parties with new issues, who can justly appeal to the moral conscience of the people for support.

4. In making this issue we demand competency, honesty, and sobriety, as indispensable qualifications for holding public office, and believe that rewards from public service for men of difference of political opinion is a practice opposed to sound policy and just principles.

5. That fixed and moderate salaries should take the place of official fees and perquisites, and every possible means be employed to prevent corruption and venality in office, and that the utmost economy should be practised and enforced in every department of the Government, to the material reduction of the expense of the same.

6. That we favor the election of President, Vice-President, and U. S. Senator, by direct vote of the people.

7. That we are in favor of a sound national currency adequate to the demands of business, and convertible into gold and silver at the will of the holder; and the adoption of every measure, compatible with justice and public safety, to appreciate our present currency to the gold standard.

8. That the producing, commercial, and industrial interests of the country should have the best and cheapest modes of transportation possible; and while capital invested in such means of transit, whether by railroad or otherwise, should be permitted the right of reasonable and just compensation, all abuse in management, excessive rates of toll, and all unjust discriminations against localities, persons, or interests, practised by them, should be prohibited by law, and the people should be protected from the improper and arbitrary use of the vast powers possessed by railroad and other transportation companies.

9. That an adequate public revenue being necessary, it may be properly raised by import duties and an equitable assessment upon the property and legitimate business of the country; nevertheless we are opposed to any discrimination of capital against labor, as well as to all monopoly and class legislation, and to the policy of sustaining the Government by a tax upon the sorrow, shame, misery, and crime of our people, resulting from the licensed sale of intoxicating liquors for that purpose.

10. Believing that the Sabbath is not only of divine origin, but also eminently beneficial to man, having a great power to restrain and to morally educate the people, it is therefore the duty of the Government to see that on that day quiet and good order are maintained.

11. We believe the enactment and execution of laws against the importation, manufacture, sale, and use of poisoned and intoxicating liquors, are distinctively the work of the Government in its organized capacity.

12. That the only consistent attitude for all temperance people to maintain toward this destructive business is that of a thoroughly organized and perpetual hostility.

A democratic or republican form of government necessarily involves the agency of political parties.

A political party is either strong or weak for handling a radical question according as its members are united or divided on such question.

ARGUMENT.

1. When members of the same political party are radically divided on any question it becomes impossible for that party to give positive and effective legislation on that question.

2. The members of the Republican and Democratic parties are radically divided on all questions concerning the liquor-traffic.

3. Therefore it is impossible for these parties to give positive and effective legislation on that question.

We therefore reach this

CONCLUSION.

That whereas, The allowed public traffic in alcoholic beverages sustains the relation of an efficient cause to temperance, and all its direful concomitants, acting as a powerful counter-educating force to all temperance agencies, the entire business being not only intolerably immoral, producing ignorance, idleness, debauchery, and crime, but is also a political wrong of unequalled enormity, in violation of the bound principles of political economy, as it represents only fictitious wealth, and supplies no real demand of society, and hence is prejudicial to every object of good government; and—

Whereas, Complete legal prohibition of the aforesaid useless and harmful branch of trade is the only proper and adequate remedy for the manifold and serious evils which it inflicts upon society, and to secure such legislation and to render it effective in-

volves the responsible agency of a political party united and distinctly committed to the prohibitory policy; and—

Whereas, Neither of the other political organizations either can or will accept this question as an issue: therefore—

Resolved, That it is the duty of all good citizens to give their moral and political support to the Reform party, forsaking all others and working zealously for it only until its victory is complete in all parts of our State and nation.

The convention then nominated R. F. Humiston for Governor, J. B. Tuttle for Lieutenant-Governor, John H. Stevens for Secretary of State, H. D. Brown for Treasurer, Asa B. Hutchinson for Auditor, O. M. McCarthy for Attorney-General, and Sherman Page for Chief-Justice.

The Democratic Convention assembled in St. Paul, July 7th, and nominated D. L. Buell for Governor, E. W. Durant for Lieutenant-Governor, Adolphus Bierman for Secretary of State, Michael Doran for Auditor, Albert Scheffer for Treasurer, L. Emmett for Chief-Justice, and R. A. Jones for Attorney-General. The following resolutions were adopted:

The Democratic-Republican party of Minnesota, in convention assembled, invite our fellow-citizens to consider whether the widely-prevailing corruption in the conduct of public affairs, in both State and nation, has not made it evident that the dominant party should be deprived of the powers which its leaders have of late years so prostituted and abused.

Believing that reform can only be inaugurated by selecting candidates and representatives not heretofore connected with any of these abuses, and who are known to be both honest and capable, we present to the people of Minnesota, as candidates for their suffrages, the gentlemen nominated to-day; and declare the following to be the principles they represent:

Resolved, 1. That the adoption of the fourteenth, fifteenth, and sixteenth amendments to the Federal Constitution closed a great era in our politics, and marked the end forever of human slavery, and of the struggles that grew out of that system. These amendments have been accepted in good faith by all political organizations and the people of all sections. Hereafter all parties must stand upon them, and our politics must turn upon the questions of the present and the future, and not upon those of the settled and final past.

2. That the national Government is a government of limited and delegated powers, supreme within its sphere; while the great bulk of the rights of the people must find their safeguard in the States and the people themselves.

3. That we are opposed to all attempts to limit the freedom of the press of the country.

4. A return to gold and silver as the basis of the currency of the country, with immediate preparation and effective measures to secure the resumption of specie payments.

5. A tariff for revenue only—consistent with an honest administration. None for protection. No government partnership with protected monopolies.

6. Equal and exact justice to all men; no partial legislation; no partial taxation.

7. Free men; uniform excise laws; no sumptuary laws.

8. Official accountability, enforced by better civil and criminal remedies; no private use of public funds by public officers, and the strictest economy in all public affairs.

9. The party in power responsible for the administration of the government while in power.

10. That all corporations chartered or recognized

by the State should be at all times supervisable by the State in the interests and for the protection of the people against unjust discriminations and extortionate demands.

The Republican State Convention was held in St. Paul on the 28th of July. John S. Pillsbury was nominated for Governor, John B. Wakefield for Lieutenant-Governor, John S. Irgens for Secretary of State, O. P. Whitcomb for Auditor, William Pfaender for Treasurer, and George P. Wilson for Attorney-General.

The convention made no nomination for Chief-Justice of the Supreme Court, but instead adopted the following resolution:

Resolved, That, believing it a duty to elevate the choice of judges above whatever is debasing in party contests, this convention will make no formal nomination for Chief-Justice of the Supreme Court, but, in recognition of the unanimous voice of the legal profession of the State, as well as the general judgment of men of all classes, which has found expression in executive appointments, we commend for election to that office the present incumbent, Judge James Gilfillan, a man preëminently qualified for the high position.

The following platform was adopted:

1. The Republicans of Minnesota reaffirm the cardinal principles of their party, which have become the established policy of both State and national Governments—the unity and insolubility of the nation, the equal rights and just protection of all men before the law.

2. That on the prominent questions of the day we favor that policy of finance which shall steadily keep in view a return to specie payments.

3. A tariff strictly for revenue, yet so adjusted as to be the least burdensome and the most favorable to the interests of home industry and labor.

4. We demand that all railway and other corporations shall be held in fair and just subjection to the law-making power constitutionally exercised.

5. That we cordially indorse the progressive and liberal policy of the Republican party in its well-defined and clearly-announced purpose to foster the agricultural, industrial, and commercial interests of the country by a judicious system of internal improvements, having for their object the enlargement of the facilities and a reduction in the cost of transportation for inter-State commerce.

6. That to the Republican party are justly due the honor and credit of securing, for the first time, the recognition by foreign governments of the full and complete rights of citizenship, in reversal of the monarchical doctrine that a subject cannot absolve himself from allegiance to his sovereign by naturalization under our laws.

7. We heartily commend the honesty and efficiency of the present State administration, and point with satisfaction to the fact that it has reduced the aggregate of State taxes twenty per cent. within the last two years.

8. That the example of Washington in refusing to be a candidate for a third presidential term, and the affirmance by President Grant of it as a principle, we sacredly cherish, and we should regard a departure from it a dangerous innovation.

9. That we approve of the present Republican national Administration, and especially the earnest efforts to collect the revenue, to prevent and punish fraud, to expose past violations and to guard against their recurrence in the future.

10. That we indorse the policy of adjusting difficulties between this and foreign nations by arbitration instead of war, and, as friends of justice, peace, and humanity, we shall hail the day when this policy shall be adopted throughout the world.

11. A grateful people can never forget the services of her soldiers, and it is due to them that liberality and generosity should be exercised in matters of back-pay, bounties, and pensions.

12. That since the purity and permanency of free institutions of government depend upon the universal diffusion of knowledge and virtue among the people, the Republican party of Minnesota reaffirms its convictions that it is the duty of the State, not only to maintain the integrity of the common-school system, but to do all that is needful so to increase its efficiency as to secure the blessings of a wise and generous education to any child within its borders.

The election was held on the 2d of November, and resulted in the success of the Republican ticket, the vote being as follows:

FOR GOVERNOR.		
	Total Vote.	Majorities.
Pillsbury.....	46,175	10,509
Basile.....	30,873	
Hamilton.....	1,669	
FOR LIEUTENANT-GOVERNOR.		
Wakefield.....	42,874	9,784
Durant.....	34,090	
Tuttle.....	2,905	
FOR SECRETARY OF STATE.		
Irgens.....	44,840	10,351

Baxter.....	4,192	849
Macdonald.....	3,253	
Brown.....	2,847	

At the same time four amendments to the constitution were submitted to the people; three were ratified and one rejected. The latter was intended to extend to the stockholders of other corporations the privilege of exemption from personal liability, which by a previous amendment had been granted to the stockholders of manufacturing and mechanical corporations. Owing to erroneous phraseology the new amendment was made virtually to repeal the one last referred to, and to except manufacturing corporations from the exemption intended, simply to be extended to others. This error is said to have caused the defeat of

the amendment. The other amendments are: That which empowers the Legislature to increase the number of judges in any judicial district; that which provides that any woman of twenty-one years of age and upward may vote at any election for school-officers, or on any measure relating to schools, and may be eligible to any office pertaining to the management of schools; and that which requires the Legislature to provide for the investment of the principal of the school-fund, in bonds of the United States, or of the State of Minnesota of a date subsequent to 1860, or of any other State, as the Legislature may direct. The constitution has hitherto contained no provision in regard to the investment of the school-funds further than the general requirement that the principal should forever remain inviolate.

The present State government is as follows: Governor, J. S. Pillsbury; Lieutenant-Governor, J. B. Wakefield; Secretary of State, J. S. Irgens; State Treasurer, William Pfaender; State Auditor, O. P. Whitcomb; Attorney-General, George P. Wilson; Railroad Commissioner, W. R. Marshall; Insurance Commissioner, A. R. McGill; Superintendent of Public Instruction, Dr. Burt. All of the above are Republicans.

The Legislature is classified as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans.....	24	65	89
Democrats.....	17	41	58
Republican majority.....	7	24	31

The State is represented in Congress by Senators William Windom, whose term expires March 8, 1877, and Samuel J. R. McMillan, whose term will expire March 3, 1881; and by Representatives Mark H. Dunnell, Horace B. Strait, and William S. King. All of these are Republicans.

Mr. McMillan was elected in February, 1875, after a protracted contest in the Legislature. He was born near Pittsburg, Pa., was graduated at Duquesne College in that city, in 1849, and was admitted to the bar in 1851. In the summer of 1852 he emigrated to Minnesota, and settled in Stillwater, where he commenced the practice of his profession with much success. In 1857 he was elected Judge of the District Court of the First District, and after the admission of the State (May 11, 1858) took his seat on that bench. He served in that position almost one full term, and on July 1, 1864, was appointed by Governor Miller as one of the Judges of the Supreme Court, *vice* Flandran, who had removed from the State. In the fall of the same year he was elected Supreme Judge for a term of seven years. In the fall of 1871 he was reelected for another term. In April, 1874, Chief-Justice Ripley having resigned, Judge McMillan was appointed in his place until the election last fall, when he was elected to that position, his opponent being Judge Wilkins, of St. Paul. He removed

to St. Paul after being appointed to the Supreme bench, and for ten years was a resident of that city. He has been a ruling elder of the Presbyterian Church in Minnesota for over twenty-three years, and has taken a prominent part in the various bodies and societies of that Church.

MISSISSIPPI. An organization of tax-payers was formed in Hinds County, in the latter part of 1874, and a general convention was called to meet at Jackson on the 4th of January, 1875. At this gathering, resolutions were adopted in favor of issuing an address to the people of the United States, "setting forth such trustworthy and indubitable information as shall be deemed right and proper to a just and impartial conclusion respecting the material interests and general prosperity of the State." A committee was appointed to prepare this address, consisting of three citizens of Jackson, and three from each of the congressional districts of the State. The tax-payers were called upon to form organizations in the various counties, "to secure thorough concert of action in all movements looking to a reduction of taxes, and the exposure of all peculations and frauds by public officers," and to appoint a committee in each county "to investigate and keep under constant watch the official acts of all county officers." A committee was also appointed "to confer with the Governor and Legislature in reference to the reforms recommended by this convention, and to assist in preparing bills to be submitted to the Legislature." A formal "petition and appeal" to the Legislature was adopted. This set out by declaring that "by reason of the general poverty of the people, and the greatly depressed values of all property, and especially of our great staple, the present rate of taxation is an intolerable burden and much beyond their ability to pay. To say nothing of the very large expenditures for common schools, the present rates of public expenditure greatly exceed the amounts deemed sufficient in former days of abounding wealth. To-day the masses of our people are very poor, and they naturally feel, as they may well demand, that all public expenditures should be greatly reduced and limited by the strictest rules of economy to the plain republican system made necessary by their impoverished condition." It was stated that the people had been constantly growing poorer, lands had diminished in value, wages had grown less, and industries had become more and more paralyzed. The results were attributed to extravagant expenditures and increasing taxation. It was shown that the tax-levy, which in 1869 was ten cents on the hundred dollars of the assessed value of lands, was four times as great in 1871, eight and a half times as great in 1872, twelve and a half times as great in 1873, and fourteen times as great in 1874. At the same time the assessment of property greatly exceeded its market value, and the public debt had been

increased over \$664,000 annually. It was further declared that a similar extravagance had been displayed in local expenditures in many of the counties. These statements were followed by an appeal for retrenchment and reform. It was shown that the public printing for five years had cost \$73,000 a year, while in 1861 it did not exceed \$8,000, and in Georgia in 1872 and 1873 it did not exceed \$10,000, and that a large saving could be effected in this matter. It was claimed that the number of circuit judges and chancellors was far greater than was required. The expenses of the Legislature were larger than was necessary, and could be reduced by having shorter sessions, and only one in two years. It was asked that the salaries of State and district officers be reduced to the rate of compensation paid before the war. The cost of collecting the revenue was unnecessarily great, the compensation of county treasurers too high, the fees of circuit and chancery clerks and sheriffs exorbitant, and jail-fees were a "great burden on the people." The fees and salaries of inspectors and trustees of public institutions were condemned as too large or altogether unnecessary, and it was demanded that State scholarships in the universities and normal school be abolished and the appropriations in this behalf greatly reduced. The free common-school system was commended, but it was claimed that the "present legislation in that respect is radically defective in theory, and in its practical working is a great wrong rather than benefit" to the citizens. It was said that the appropriations for educational purposes, amounting to the "enormous sum of \$675,000 annually," were "greatly more than is necessary for carrying on the State government." It was suggested that the tax for educational purposes be reduced, free education restricted to elementary grammar-schools, the pay of county superintendents cut down, and that "effort be directed to the gradual and economical building up of a common-school system which shall not by its enormous exactions excite the hostility of the citizen, but will rather attract to itself his support and affection." The Commissioner of Immigration was declared to be an unnecessary officer; the duties of county superintendents of education, it was said, might be united with those of sheriffs; the salaries of teachers should be diminished; sessions of the Legislature should be biennial and shorter, and there should be less legislation; and the boards of county supervisors should be restricted in their powers and their facilities for using the people's money. The conclusion of the petition was as follows:

In conclusion, we beg to assure your honorable bodies that in thus exercising the sacred right of petition we have not intended to cast any reflection upon this or former Legislatures, nor have we been influenced by any motive of gaining a party advantage. The members of the convention which presents this petition belong to all parties. We regard

the great interests of the State and her people, so much impoverished by the abuses we complain of, as too high and sacred to be made the subject of party contests. Mississippi has a soil unequalled in fertility and in the variety of its products. Our climate is genial and healthy. Every element of high prosperity and of material and moral advancement exists. But, notwithstanding all this, every business is depressed, the people discontented and paralyzed. We have the benumbing influence of despair and threatened ruin in lieu of the healthy and vigorous activity and energy of hopeful progress. And there yet remains the saddest truth of all. There are distrust and a want of mutual confidence between the different classes of our population, and a deep and wide gulf separating the rulers and the ruled. The tax-payers do not desire this, and they now make this respectful petition and appeal to the Legislature, in the hope that that body may receive it in the spirit in which it is made, and that such action may result as will speedily put Mississippi on the high-road to prosperity which shall bless all classes and conditions and extend to every section of the State.

The session of the Legislature, which began on the 5th of January, came to a close on the 6th of March. Numerous bills, intended to effect retrenchment of expenses, were introduced, but several of them were defeated, the colored members generally voting solidly against them. A strong effort was made to secure the adoption of a resolution providing for the amendment of the constitution so as to make elections and legislative sessions biennial, but it was defeated. An amendment reducing the number of chancellors was carried through. A bill making changes in the school law, and reducing the tax for educational purposes from four to two mills, passed both Houses, but was vetoed by the Governor. A bill abolishing the office of Commissioner of Immigration failed to pass. Every effort to reduce the compensation of members of the Legislature, which is \$500 a session and twenty cents for every mile of travel, was defeated. Bills to reduce the number of circuit judges, and to diminish salaries of county treasurers and school superintendents, failed to pass. Several measures modifying the salaries of State officials were discussed and variously amended. Finally, in the appropriation act, the salary of the Governor was fixed at \$4,750, that of Lieutenant-Governor at \$1,585, Secretary of State \$2,500, Auditor \$2,500, Treasurer \$2,500, Attorney-General \$2,700, Superintendent of Instruction \$2,500, and Commissioner of Immigration \$2,000. Various other appropriations were materially reduced from the sums formerly devoted to the same purposes. A bill making Treasury warrants receivable for taxes was vetoed by the Governor. A new registration act was passed, which required a complete registration of all the voters in each county before the election. Resolutions were adopted in both Houses approving of the conduct of General Sheridan in New Orleans, and sustaining the Federal Administration in its interference with the organization of the Legislature of Louisiana. A bill which occupied a large share of attention,

and excited bitter opposition on the part of most of the white members, provided for the establishment of a metropolitan police-force, under the control of the Governor, stationed in the city of Vicksburg but liable to be called on for service in other parts of the State. This passed the Lower House, but was finally defeated in the Senate. A new militia bill was then introduced and passed, making each congressional district a militia division and authorizing the organization of a considerable force, under the command of the Governor. It provides that there shall be no parade or rendezvous of the militia on any election-day or for five days preceding, "except in case of invasion, riot, insurrection, or imminent danger thereof." It also gives the commander-in-chief "full power to order into active service the militia force of this State, or any part thereof, and order them to any part of the State, when he is advised or deems it necessary to prevent or suppress riot or insurrection, or to aid the civil officers in the execution of the law."

An investigation into the affairs of Alcorn University was made, and it was found to be in a very unsatisfactory condition. There had been serious difficulties between the students and the officers and faculty, and many of the former had left the institution. The trustees had been very negligent, and there was no harmony between the superintendent and the president and faculty. The investigating committee recommended the abolition of the office of superintendent and treasurer, the duties of the latter being transferred to the State Treasurer, and the reorganization of the whole institution. A bill was passed removing all the officers and trustees, and providing for the appointment of new ones, and for the complete reorganization of the institution on a more economical and efficient basis.

According to the statement of Governor Ames to the Legislature of 1876, which is lacking in definiteness, "the condition of the State's finances is unprecedentedly favorable. . . . The real debt of the State," he says, "that is, its outstanding obligations beyond its ability to pay at once, with its current and available funds (the taxes received for 1875), amounts to about \$500,000. The common and Chickasaw school-funds, debts upon which the interest only is to be paid, amount to \$1,580,620. The expenses of the State government, during the past year, amounted to \$618,259.18. The amount paid to the two universities of the State, to normal schools, and interest on the Chickasaw school-fund, was \$186,896.87. The Mississippi State bonds paid amounted to \$250,000. Interest on bonds, \$37,664. Extra improvements, State buildings, \$56,017.44. The progress made during the past three years, in reducing the expenses of the State government, is found in the comparison of such expenses, to wit: the expenses in 1873 were \$953,080.18; in 1874, \$908,330.72; in 1875, \$618,259.18.

"The successful administration of State finan-

ces will be seen in the comparison of receipts and disbursements during the past five years: disbursements over receipts, for 1871, \$390,-895.86; for 1872, \$347,552.36; for 1873, \$674,-128.50: while, on the other hand, the receipts over disbursements were, for 1874, \$49,114.17; for 1875 (based on moderate estimate of taxes already received and due, over), \$400,000."

The charitable institutions of the State are represented to be in a prosperous and well-managed condition. A new wing has been added to the Insane Asylum, at a cost of \$25,000. The State Penitentiary is entirely inadequate for the accommodation of the convicts. With 513 on its register at the end of the year, it had only 175 cells, and 878 of the prisoners were leased out, working on railroads, levees, and buildings, and living altogether outside of the prison-walls. Scarcely any provision has been made for the employment of convicts at the penitentiary itself. A new building, designed for a factory or workshop, has been erected, but no machinery has been placed in it.

There was a very warm political canvass carried on during the fall, although the only State office to be filled was that of Treasurer, made vacant by the death of G. H. Holland. Members of the Legislature and of Congress were, however, chosen at the same election. The Democratic Convention was held at Jackson, on the 8d of August. There were over 250 delegates present, representing more than sixty counties. A stirring address was made by the Hon. L. Q. C. Lamar, and letters were read from A. G. Thurman, of Ohio, Thos. A. Hendricks, of Indiana, and B. H. Hill, of Georgia, expressing sympathy and encouragement. W. L. Hemenway, of Carroll County, was nominated for State Treasurer, and the following platform was adopted:

The Democratic and Conservative people of the State of Mississippi in convention assembled, invoking the blessing of Almighty God on their efforts, and inviting the coöperation of all citizens of the State who favor an honest, impartial, and economical administration, do adopt the following declaration of their aims and principles:

1. We recognize and will maintain the civil and political equality of all men as established by the Constitution of the United States and the amendments thereto.

2. We are in favor of the education of all the children of the State in public schools, sustained by adequate taxation, but we are opposed to extravagant or partisan administration of said schools.

3. The selection only of honest, faithful, and competent men, for all offices, from the highest to the lowest.

4. Economy in the administration of the government, the abolition of useless and unnecessary offices, and a reduction in the fees and salaries of those that are retained, and a strict and rigid accountability of all officers having the custody of public moneys, or charged with their collection.

5. Biennial sessions of the Legislature, and a reduction in the expenses of that department of the government; and we denounce the Republican party of the State for their violated pledges on this subject.

6. The selection of an able and competent judiciary, and a confining of the judges to judicial functions purely, so that all temptation to partisanship on the bench shall be removed.

7. A discontinuance of the enormous evil of special and local legislation, and in its stead the enactment of general laws under which local and private interests will be fully protected.

8. The encouragement of agriculture, by securing the farmer and the laborer the just rewards of the toil and capital, and by relief from the burdensome taxation which now consumes their substance.

9. The encouragement of manufactures in the midst.

10. The elevation of the standard of official character, so as to infuse into official life a sense of public duty, the spirit of patriotism and integrity, to the end that government, law, and public authority, may be invested with the moral influence and dignity which will insure respect and obedience.

11. We favor immediate action of the General Government for the protection of the Mississippi River lowlands against inundation.

12. The building up of partisan newspapers by legislation, the arming of the militia in time of peace the unconstitutional attempt to take from the people the election of tax-collectors, the attempted passage of the Metropolitan Police bill, the attempted corruption of the judiciary by the use of Executive patronage, we denounce as gross outrages upon constitutional liberty; while, as evidence of the utter incapacity of our present rulers to administer the affairs of the State, we point to the mass of confusion in which the revenue and registration laws of the State have become involved; the necessity of extraordinary sessions of the Legislature to cure the blunders and follies of the regular sessions, and to the repeated Executive and Legislative acts which have been, by the Supreme Court, declared unconstitutional and void.

13. That we cordially invite the voters of all the people of both races to unite vigorously with us in the approaching canvass in a determined effort to give success to the foregoing principles, and thus secure to ourselves and our posterity the blessings of an honest, economical government, administered by able, efficient, and competent public officers.

The Republican Convention was held at Jackson, on the 25th of August, and had a predominance of colored delegates. G. M. Buchanan was nominated for State Treasurer, and the following platform was adopted:

The Republican party of the State of Mississippi in convention assembled, thankful to an all-wise and bountiful Providence for a continuance of his kindly care and protection, do reassert our adherence to, and confidence in, those well-tried and time-honored principles to which alone we can look for the preservation of our liberties, and for all the blessings of civil government:

1. The preservation of the national Union.

2. The maintenance of the Constitution and the strict enforcement of the laws.

3. Equal rights and privileges to all.

4. Freedom of speech, freedom of the press, freedom of the ballot, and legal protection to the voter.

5. Universal education and free schools, presenting the benefits of education to every child in the State.

6. The most decided and emphatic opposition to the formation of political parties based upon race, color, or religious belief.

7. Rigid economy, equal and uniform taxation.

8. Opposition to fostering monopolies at the expense of the masses.

9. Honesty, capacity, and fidelity, the test of political preferment.

10. That we congratulate the party of the State on the successful and economical administration of Governor Ames, and we pledge him our earnest support in his efforts in the reduction of taxes and enforcement of the law.

11. We renew our advocacy of biennial sessions of

the Legislature, while we express our regrets that the acts of certain lawless persons, as well as other unfortunate circumstances, have served to thwart our purpose in this matter—thus demonstrating that it is much easier to destroy than it is to restore civil government.

12. We are most earnestly in favor of, and insist upon, the General Government extending its fostering care and protection to the vast agricultural interests of the Mississippi Valley, as it does to the commercial and mercantile interests of the country, by immediately taking charge of the levees.

13. We favor biennial elections, and to this end we advocate such amendments to the constitution and the enactment of such laws as will provide for the holding of all general elections at the same time that Representatives are elected to Congress.

14. We are opposed to loaning to railroads or other corporations the funds donated by Congress to this State for educational purposes, and we demand the repeal by the next Legislature of the law by which the Agricultural Strip and the Chickasaw school funds have been diverted from the sacred object contemplated by the donors.

15. We are opposed to burdening the reconstructed State of Mississippi with the payment of the old repudiated Union and Planters' Bank bonds, a debt (if debt it can be called) contracted by the Locofoco Democracy, and by them repudiated, and we pledge ourselves by every lawful means in our power to resist the assumption, by the State government, of any and all such pretended debts, and for this purpose we commend for ratification by the people, at the polls at the ensuing election, the following proposed amendment to the constitution of this State: Add to section 5 of Article XII. the following words, to wit: Nor shall the State assume, redeem, secure, or pay indebtedness, or pretended indebtedness, claimed to be due by the State of Mississippi, to any person, association, or incorporation, whatsoever, claiming the same as owners, holders, or assignees, of any bond or bonds now generally known as the Union Bank or Planters' Bank bonds.

16. We also favor the ratification of the amendment proposed to section 6, Article VIII. of the constitution, relating to fines, forfeitures, etc., in the support of public schools; and the proposed amendment to section 17, Article VI. of the constitution, relating to a division of the State into a convenient number of chancery districts.

17. One of the prime wants of our State is a greater population, for population is wealth. Through their possessions from foreign nations the North and West have become great, rich, and powerful. The State, as well as societies and individuals, should lend its aid to induce immigration from all parts of the world. We have millions of acres of unoccupied lands of unsurpassed fertility; our manufacturing interests are in their infancy; the trades, professions, and mechanic arts offer the most inviting attractions; and we favor immigration without regard to nativity, race, religion, or politics. There are room and welcome for all, with a soil capable of supporting a population of ten millions.

18. "Let us have peace." The war closed more than ten years ago, yet turmoil and violence keep us from the blessings of peace; they turn to the ungrateful prairies of the far West the great tide of immigration which would enrich Mississippi, as it has other States; and for the languishing condition of our commonwealth we arraign the Democratic elements, notoriously including the Ku-klux and White-Liners—as capital, like immigrants, shuns communities where Peace does not spread her wings.

19. In the maintenance of the principles above set forth, as well as to put into practical operation the purposes indicated, we extend an earnest invitation to all persons, without regard to race, color, or former political affiliation, in good faith, to unite with us.

There were several disturbances of the peace growing out of political hostility between white and colored citizens during the canvass. A disturbance occurred at a meeting in Yazoo City on the evening of September 1st, resulting in the death of one man, the severe wounding of another, and the slight wounding of three or four more. The speaker of the evening was Colonel A. T. Morgan, Sheriff of Yazoo County, and in the excitement which followed he left the county, and professed to believe that his life was in danger.

At Clinton, Hinds County, September 4th, a Republican barbecue was held, at which there was a discussion between a prominent Republican and a Democratic speaker. There was a great crowd present, consisting largely of negroes. A fight occurred on the outskirts, growing out of some trivial personal insult, and two negroes were shot. This was the signal for a general attack upon the whites, and in the course of the *mêlée* three white men were killed and several wounded. An alarm was given, and armed white men from Vicksburg, Jackson, and other quarters, concentrated at Clinton in anticipation of a general assault upon the place. In the course of the night seven or eight negroes were killed, but it was soon found that no serious conflict was likely to occur, and the armed men dispersed and quiet was restored. On the 7th of September Governor Ames sent the following communication to the President of the United States:

JACKSON, Miss., September 7, 1875.

To His Excellency U. S. GRANT, President, Washington.

SIR: Domestic violence, in its most aggravated form, exists in certain parts of this State. On the evening of the 1st instant unauthorized and illegal armed bodies overthrew the civil authorities of Yazoo County, and took forcible possession of said county, from which the sheriff, the peace-officer of the county, was compelled to flee for safety, and is still a refugee. The sheriff of this (Hinds) county reports that since the 4th instant he has been unable, after every effort, to maintain the peace and protect rights. He reports various murders by unauthorized armed bodies, who are scouring the county. Warren County is also reported as being in a state of terrorism, from the demonstrations of still other unauthorized armed bodies, and a feeling of insecurity pervades the other counties of the State.

After a careful examination of all the reports I find myself compelled to appeal to the General Government for the means of giving that protection to which every American citizen is entitled. I do not now make formal application under the provisions of the Constitution of the United States, but telegraph you to know if you can and will regard the proclamation issued by you in December last, on the application of the Legislature of this State, as still in force. The necessity of immediate action cannot be overstated. If your proclamation of December last is not in force, I will at once make a formal application in accordance with the provisions of the Constitution of the United States.

ADELBERT AMES.

This dispatch was submitted to the Attorney-General, and an answer given that the proclamation of December was not in force. The following dispatch was received next day:

JACKSON, MISS., September 8, 1875—5.30 P. M.
To President U. S. GRANT, Washington, D. C.

Domestic violence prevails in various parts of this State, beyond the power of the State authorities to suppress. The Legislature cannot be convened in time to meet the emergency. I therefore, in accordance with section 4, Article IV. of the Constitution of the United States, which provides that the United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and on application of the Legislature, or of the Executive when the Legislature cannot be convened, against domestic violence, make this my application for such aid from the Federal Government as may be necessary to restore peace to the State and protect its citizens.

ADELBERT AMES, Governor.

On the 9th, General J. Z. George, chairman of the Democratic State Executive Committee, telegraphed to Attorney-General Pierrepont, declaring that there were no disturbances in the State, and no obstruction to the execution of the law. "Peace prevails throughout the State," he said, "and the employment of United States troops would but increase the distrust of the people in the good faith of the present State government." W. H. Harney, Sheriff of Hinds County, signed a dispatch to the Attorney-General, declaring that perfect peace prevailed, and that the officers were not prevented from executing legal processes. This was immediately followed by another, saying that there was "no protection for life to colored men" in the county, and that the previous dispatch had been extorted from him by the captain of a military organization. This captain denied the statement, declaring that when the dispatch was signed he was the only white man present and was not armed, and had assured Sheriff Harney that he would be protected in not signing it if he could not do so conscientiously. General George also testified that the sheriff was under no duress when he signed his first dispatch. Ex-Senator Pease added his testimony, to the effect that the peace-officers were amply competent to prevent violence, and that Federal interference was unnecessary and would be unwise.

Governor Ames, having been asked for further information, made reply, under date of September 11th, in which he said:

The necessity which called forth my dispatch of the 8th inst. to the President still exists. Your question of yesterday asks for information, which I gladly give. The violence is incident to a political contest preceding the pending election. Unfortunately, the question of race, which has been prominent in the South since the war, has assumed magnified importance at this time in certain localities. In fact, the race feeling is so intense that protection for the colored people by white organizations is despaired of. A political contest made on the white line forbids it.

On September 14th Attorney-General Pierrepont sent the following letter to Governor Ames:

DEPARTMENT OF JUSTICE,
WASHINGTON, D. C., September 14, 1875. }
To Governor AMES, Jackson, Miss.

This hour I have had dispatches from the President. I can best convey to you his ideas by extracts from his dispatches:

The whole public are tired out with these annual outbreaks in the South, and the great majority are ready to condemn any interference on the part of the Government. I heartily wish that peace and good order may be restored without issuing the proclamation, but if it is not the prediction must be issued. But if it is, I shall instruct the commander of the forces to have no child's play. If there is necessity for military interference there is justice in such interference, to deter evil-doers. I would suggest the sending of a dispatch or letter, by means of a private messenger. Governor Ames, urging him to strengthen his own position by exhausting his own resources in restoring order before receiving Government aid. He might accept the aid offered by the citizens of Jackson and elsewhere. Governor Ames and his advisers can be made perfectly secure, many of the troops now in Mississippi as he deems necessary may be sent to Jackson. If he is betrayed by those who offer assistance he will be in a position to defeat them and punish them.

You see by this the mind of the President—w which I, and every member of the cabinet who I have been consulted, are in full accord. You see the difficulties, you see the responsibilities which you assume. We cannot understand why you do not strengthen yourself in the way the President suggests. Nor we see why you do not call the Legislature together and obtain from them whatever power, and money and arms, you need. The Constitution is explicit that the Executive of the State can call upon the President for aid in suppressing domestic violence only when the Legislature cannot be convened, as the law expressly says, "In case of an insurrection in any State against the government thereof, it shall be lawful for the President, on application of the Legislature of such State, or of the Executive when the Legislature cannot be convened," etc. I explain that the meaning of the Constitution and law when taken together, is that the Executive of a State may call upon the President for military aid to suppress domestic violence only in case of an insurrection in any State against the government thereof when the Legislature cannot be called together.

You make no suggestions, even, that there is an insurrection against the government of the State, or that the Legislature would not support you in any measures you might propose to preserve the public order. I suggest that you take all lawful means and all needed measures to preserve the peace by the forces in your own State, and let that country and its citizens of Mississippi, who are largely favorable to good order, and who are largely Republican, have the courage and the manhood to fight for their rights and to destroy the bloody ruffians who murder the innocent and unoffending freedmen. Everything in readiness. Be careful to bring yourself within the Constitution and the laws, and if there is such resistance to your State authorities as you cannot by all the means at your command suppress, the President will quickly aid you in crushing the lawless traitors to human rights.

Telegraph me on receipt of this, and state exactly what you need.

Very respectfully yours,
(Signed) EDWARDS PIERREPONT.

Another political outbreak occurred at Friar's Point, on the 5th of October, which was evidently incited by the colored Sheriff of Coahoma County, who had called together a large number of armed negroes for the purpose of supporting his action in the county convention. They were dispersed by the whites, who rallied under General Chalmers, and Sheriff Brown was driven out of the county. On this subject the following dispatch was sent to Attorney-General Pierrepont by Senator Alcorn:

Having read several incorrect and sensational dispatches touching the recent race troubles at Friar's Point, I beg to assure you there need be no alarm for the peace of this country. Several hundred armed

negroes, who had been incited by an ill-tempered sheriff, marched on our town, and were readily repulsed by the whites under the lead of the most prudent citizens, who have been following up the armed bands of negroes, and dispersing them with as little violence as possible, and urging them to go home. The mob has been dispersed, and I think will remain quiet. There is no question of politics in this excitement. The whites are to a man for defense. Those of the negroes who have been misled are fast being reconciled. A community of planters may be relied on for kind treatment of laborers. The whites have made no demonstration of hostility to the negroes of this county, but are anxious to cultivate the most friendly relations. My name has been most ridiculously associated in the matter. I trust you will not give credence to the share given me in this affair by telegrams.

Respectfully,

(Signed) J. L. ALCORN, U. S. Senator.

Governor Ames, having failed to obtain aid from the Federal authorities, began organizing companies of militia to aid the sheriffs and other local officials. This action was strongly objected to by his political opponents, and the Democratic committee issued an address, demonstrating against it, in which they said:

There can be no other reason for this than a wish, on the part of the Chief-Magistrate of the State, to incite that war which he said would be developed, and to bring disorder and confusion. For it is well known to all of you that there has not been the slightest disorder, not the pretense of a riot or insurrection, since the disturbance at Clinton, nor has there been any obstruction to the execution of the laws at any time, except such as may exist in the incompetency and willful neglect of Republican officials to discharge their duties. That there is crime in the State is true, but there is not more than exists in our sister States, and there is nothing that looks like insurrection, or an attempt on the part of our people to obstruct the enforcement of the laws. In fact, we can safely say that in no part of the Union does there prevail a more perfect peace, or a greater respect for law, or a greater desire to preserve order, than in Mississippi, and this is well known to the State Executive, if he knows anything of the disposition of the people over whom he rules. It is a subject of congratulation and of just pride to the people of the State that, cursed as we are with rulers alien to us in sympathy and interest, and utterly impotent to perform any good function of government, and with ability only to commit mischief, we have been able to preserve order and to hold society together. Under these circumstances we can regard the present efforts of the Chief-Magistrate of the State to put into active service the militia, and thus, in a time of profound peace, to organize a standing army in violation of the Constitution of the United States and of this State, in no other light than as a deliberate attempt to incite disturbances, so that there may be an imaginary insurrection, which he may suppress in blood. We deem it our duty to warn you against these machinations of the Chief-Magistrate of the State, and to urge you not to be betrayed, in a moment of passion and just resentment, into acts of violence not necessary for self-defense.

The Governor justified his course on the ground that he feared that there would be violence and intimidation for the purpose of preventing a fair election. Finally an agreement was entered into between him and a committee of the citizens, whereby he promised to disarm and disband the militia; and the committee, on behalf of white citizens, bound themselves to use their utmost influence to prevent

disturbances and preserve peace and good order, and to insure a fair election.

The election took place on the 2d of November, and resulted in a general defeat of the Republicans. The total vote for State Treasurer was 162,751, of which Hemenway received 96,596, and Buchanan 66,155, making the majority of the former 80,441. Six members of Congress were chosen at the same time. In the first district, L. Q. C. Lamar, Democrat, was elected without opposition; in the second, G. Wiley Wells, Democrat, received 19,250, to 13,149 for A. R. Howe, Republican; in the third, H. D. Money, Democrat, received 13,774, to 5,883 for R. C. Powers, and 5,114 for F. H. Little; in the fourth, O. R. Singleton, Democrat, received 19,890, to 9,914 for Jason Niles; in the fifth, Charles E. Hooker, Democrat, received 16,589, to 10,653 for James Hill; and in the sixth, John R. Lynch, Republican, was elected, receiving 13,741 votes, to 13,510 for Roderick Seal. The Legislature, elected at the same time, consists of 26 Democrats and 11 Republicans in the Senate, and 97 Democrats and 20 Republicans in the House, making the Democratic majority 15 in the Senate, and 77 in the House, or 92 on a joint ballot. As soon as the result was known, the Democratic State Executive Committee issued an address to the people congratulating them on the "glorious and decisive victory," and urging moderation and magnanimity.

We have gained (said the committee), by the election, the power and opportunity of reforming the administration of the government; retrenching in expenditures in State and county affairs; reducing the taxes; securing an honest, impartial, and able judiciary; enforcing accountability and responsibility on all who hold public trusts; elevating the character of all officials; redressing the enormous evil of special and local legislation, and of crude and unintelligible statutes, and a consequent shortening of the sessions of the Legislature; removing the prejudice of race against race, and providing for the administration of justice fairly and impartially to all; improving the common-school system, so that it may be at the same time more economical and less burdensome to the tax-payers, and yet more efficient; placing Mississippi, by a just and wise policy, in her normal relations with the other States of the Union, and with the Federal Government, whereby she may contribute her full share to the common prosperity and glory of the nation, and receive the equal protection of the Constitution and laws.

Regarding the result of the election, Senator H. R. Revels, colored, wrote to the President as follows:

Since reconstruction, the masses of my people have been, as it were, enslaved in mind by unprincipled adventurers, who, caring nothing for the country, were willing to stoop to anything, no matter how infamous, to secure power to themselves and perpetuate it. My people are naturally Republicans, but as they grow older in freedom so do they in wisdom. A great portion of them have learned that they were being used as mere tools, and, as in the late election, not being able to correct the existing evil among themselves, they determined by casting their ballots against these unprincipled adventurers to overthrow them. My people have been told by

these schemers, when men were placed upon the ticket who were notoriously corrupt and dishonest, that they must vote for them; that the salvation of the party depended upon it; that the man who scratched a ticket was not a Republican. This is only one of the many means these malignant demagogues have devised to perpetuate the intellectual bondage of my people. To defeat this policy at the late election, men, irrespective of race or party affiliation, united and voted together against men known to be incompetent and dishonest. I cannot recognize, nor do the masses of my people who read recognize, the majority of the officials who have been in power for the last two years as Republicans. We do not believe that republicanism means corruption, theft, and embezzlement. These three offenses have been prevalent among a great portion of our officeholders; to them must be attributed the defeat of the Republican party in the State, if defeat there was; but I, with all the lights before me, look upon it as an uprising of the people, the whole people, to crush out corrupt rings and men from power. The bitterness and hate created by the late civil strife have, in my opinion, been obliterated in this State, except, perhaps, in some localities, and would have long since been entirely effaced were it not for some unprincipled men who would keep alive the bitterness of the past and inculcate a hatred between the races, in order that they may aggrandize themselves by office and its emoluments to control my people, the effect of which is to degrade them. I give you my opinion that had our State administration adhered to Republican principles, and stood by the platform upon which it was elected, the State to-day would have been on the highway to prosperity. If the State administration had advanced patriotic measures, appointed only honest and competent men to office, and sought to restore confidence between the races, bloodshed would have been unknown, peace would have prevailed, Federal interference been unthought of, and harmony, friendship, and mutual confidence, would have taken the place of the bayonet.

Testimony to the same effect was given by other prominent Republicans, both white and colored; but Governor Ames, in his message to the Legislature of 1876, claimed that the election was carried by fraud and intimidation. After alluding in general terms to various instances, he said:

That the great evil which has befallen the State may be remedied, it first becomes necessary to inquire into its causes. The happy financial condition of the State, and the comparatively small amount needed for its support, preclude the possibility of a financial cause. Intimidation was not proportioned to counties in accordance with their indebtedness. Thorough intimidation was effected in some counties whose finances were in the most flourishing condition. The character of the events which have transpired compels the conclusion that the evil is to be attributed to a race question. It did not have its origin at this time. The inhabitants of the State are somewhat equally divided between the two races. They have, until recent years, borne the relations of master and slave. By a power external to the State, the slave has been made the civil and political equal of the master. The withdrawal of this restraining force leaves the formerly dominant race to reassert its supremacy. Though the complete supremacy of former days may not be possible, still the tendency is toward supremacy. The effort in this direction has heretofore and elsewhere resulted, as in this election, in violence, loss of life, and intimidation. How far this effort has resulted in the virtual disfranchisement of the one race, and revolutionized the State government, is a question worthy the most patient and careful inquiry. Unless every class of

citizens be thoroughly protected in the exercise of all their rights and privileges, our government proves unequal to its pretensions. The nation, recognizing race antagonisms, has anticipated them in the interests of liberty and equality by modifications of the fundamental law of the land, and I recommend, as both right and expedient, action in harmony with such modifications.

The following amendments to the constitution were ratified at the election. As an addition to section 5, of Article XII.:

Nor shall the State assume, redeem, secure, or pay, any indebtedness, or pretended indebtedness, claimed to be due by the State of Mississippi to any person, association, or corporation whatsoever, claiming the same as owners, holders, or signers of any bond or bonds, now generally known as Union Bank bonds or Planters' Bank bonds.

In amendment of section 6, Article VIII.:

All proceeds of lands now or hereafter vested in this State by escheat or purchase, for forfeiture, for taxes, and the clear proceeds of all fines collected in the several counties for any breach of the penal law, and all moneys received for licenses granted under the laws of the State for the sale of intoxicating liquor, or keeping of dram-shops, shall be collected in legal currency of the United States, and to be paid into the Treasury, to be distributed, *pro rata*, among the educable children of the State, in the manner to be provided for by law.

As a substitute for section 17, Article VI.:

The Legislature shall divide the State into a convenient number of chancery districts. Chancellors shall be appointed in the same manner as the Judges of the Circuit Courts. Their qualifications shall be regulated by law, and they shall hold their office for the term of four years. They shall hold a court in each county at least twice in each year, and shall receive such compensation as may be provided by law.

A proposition to investigate the election and occurrences connected with it has been introduced into the United States Senate by Mr. Morton, of Indiana, but with a very slight prospect of success.

MISSOURI. The twenty-eighth General Assembly of Missouri, which began its regular session on the 28th of December, 1874, brought it to a close on the 29th of March, but an extra session was called immediately by the Governor to complete certain unfinished business of importance, which adjourned *sine die* on the 1st of April. There were 166 acts and concurrent resolutions of a public nature passed, but only a very small number have any general interest or importance. A resolution of impeachment, presenting thirteen charges of misdemeanor against Judge Samuel A. Richardson, was referred to a committee, which made a report entirely exonerating the accused and showing that the charges were intended as a scheme of political persecution. The question of paying or renewing State bonds falling due in 1875, 1876, and 1877, occupied a large share of attention. The amount of such bonds was \$5,385,000, of which \$2,691,000 was payable immediately on maturity, and \$2,644,000 at the pleasure of the Legislature after maturity. Accruing interest to the amount of \$223,680 was also to be provided for. A funding bill was

finally passed by a vote of 23 to 4 in the Senate, and 83 to 10 in the House, authorizing the issue of \$5,000,000 new five-twenty bonds, to be made payable in gold or currency at the option of the funding commissioners, with interest at five per cent. if gold, and six per cent. if currency. These were to be used to take up the maturing bonds, or furnish funds for their payment. An act was passed providing for the appointment of three Railroad Commissioners, and fixing maximum rates for passenger fares and freight-charges.

The subject which occupied the largest share of attention related to the State Penitentiary. This institution was in the hands of lessees, and there was a strong opposition to the policy of leasing. A bill in the interest of the lessees was introduced, which authorized them to employ the convicts outside of the prison, in any part of the State not within ten miles of a city of 25,000 inhabitants or more, provided permission was first granted by the county court of the county in which it is desired to employ them. This bill passed, but was vetoed by the Governor. His objections were stated as follows:

1. It is contrary to popular sense, as may be judged from the expressions already given. The whole framework of the bill furnishes evidence that the Legislature itself doubted the propriety of the act by giving counties, cities, and incorporated towns power to exclude convicts from their midst.
 2. Cruel and inhuman treatment would be visited on convicts, not intentionally, perhaps, but incidentally from the want of permanent structures in which to house them.
 3. Large numbers would undoubtedly escape and many perhaps be shot in attempts to gain their liberty.
 4. Competition with mining and other labors in districts where the convicts should be carried.
 5. Close confinement within the penitentiary has been observed by the States generally as being the best system of prison management, and this is confirmed by our own experience.
 6. The preservation of the present leasing contract no doubt led to the passage of the bill.
- In my judgment, it will not effect the purpose, but prove fatally disastrous to the lessees. The same capital that will enable them to transfer convicts to distant points and provide for their employment and for housing them could be much more profitably used in applying the labor that would be withdrawn from the prison in manufacturing employments there. Such employments have proved lucrative in other States, and could and ought to be made so here.

An attempt to pass the bill over the veto failed. A bill appropriating \$800,000 for the construction of a new penitentiary in the vicinity of St. Louis was then introduced, also one providing for the erection of a hospital and workshops in connection with the old institution. It was also provided in the latter that \$6,000 a month be appropriated to support the penitentiary in case it reverted to the State. The proposition to provide for a branch institution was defeated after considerable discussion, and nothing had been done on the subject when the date fixed for adjournment was reached. In calling the extra session the Governor stated, as the objects for which it was summoned:

Providing for the management of the penitentiary and the extension of the system either by establishing a branch of the present one or increasing the capacity of both, and making appropriations for payment for the same, and making an appropriation for the support of the Industrial Home of the Orphans and Indigent Children of Missouri for the next two years and for heating the buildings thereof; and also for the support of the School of Mines and Metals at Rolla; and also for publication of the decisions of the Supreme Court, and also appropriations for the contingent expenses of the Superintendent of Public Schools, and also for making appropriations for a suitable representation of the interests of the State at the Centennial at Philadelphia, and amending laws regarding assessment and collecting of tax on railroads and individual property; and also establishing a tariff for services rendered in the office of Adjutant-General and Paymaster-General, and payment of the same.

The penitentiary question occupied nearly all the time of the extra session, which lasted only three days. A bill was finally agreed to, appropriating \$90,000 for the enlargement of the female prison, and the construction of a hospital and such other buildings as the inspectors might deem necessary. A separate bill allowing \$6,000 a month to the Governor to carry on the institution in case the lease was thrown up was defeated, \$4,000 a month being already allowed by existing laws. The Governor sent in a message insisting on the \$6,000, but the committee to which it was referred reported against the additional allowance. A commission, consisting of the Governor and Inspectors of the Penitentiary, who are the State Treasurer, Auditor, and Attorney-General, was authorized to examine into the claims of the lessees for certain work and improvements. This commission made its report on the 12th of April, allowing \$42,906.50 to the original lessees, and to the St. Louis Manufacturing Company, which had been the sub-lessee since April 17, 1874.

Among the other acts of the Legislature was one prohibiting under penalty of imprisonment not exceeding six months, or fine not less than \$10 or more than \$100, or both, the carrying of any deadly weapons "into any church or place where people have assembled for religious worship, or into any schoolroom, or into any place where people are assembled for educational, literary, or social purposes, or to any election precinct on any election-day, or into any court-room during the sitting of court, or into any other public assemblage of persons, and for other than militia drill or meetings called under the militia law of this State."

A bill abolishing the Geological Bureau, and transferring the collection in its possession to the School of Mines at Rolla, became a law without the Governor's approval.

A bill to repeal the act of the preceding session renewing the bonds for the Hannibal & St. Joseph Railroad failed to pass.

The Railroad Commissioners appointed under the new law were Mortimer McIlhenny, John Walker, and John S. Marmaduke. They met on the 8th of June and made the classification

required, and designated the maximum rates of charges. Railroads were classified into class A, including through or trunk lines; class B, including branch roads owned, leased, or occupied, by the trunk-line companies; and class C, including all other railroads or parts of railroads owned, leased, or occupied in the State. Freight was divided into seven special classes and four general classes, the latter including all merchandise not comprised in the special classes. The special classes were as follows:

Class D—All grain in car-loads.

Class E—Flour in lots of 50 barrels or more, and lime in lots of 24 barrels or more.

Class F—Salt in lots of 60 barrels or more, and cement, water-lime, and stucco, in lots of 24 barrels or more.

Class G—Lumber, lath, and shingles, in car-loads.

Class H—Live-stock in car-loads.

Class I—Agricultural implements, furniture, and wagons.

Class J—Coal, brick, sand, stone, railroad-ties, and cordwood, and all heavy fourth-class articles, in car-loads.

The rates for passengers were limited to three cents a mile on roads of class A, and four cents a mile on roads of classes B and C, with half-price for children twelve years old and under. The table of freight-charges fixed upon for the seven special classes was as follows:

Distance—Miles.	All Grain in Car-loads.	Flour in Lots of 50 Barrels or more.	Salt, 60 Barrels. Cement, Water-lime, and Stucco, 24 Barrels.	Lumber, Lath, and Shingles, in Car-loads.	Live-stock in Car-loads.	Agricultural Implements, Furniture, and Wagons.	Coal, Brick, Sand, Stone, Railroad-ties, Cordwood, Heavy Fourth-class Articles in Car-loads.
	100 lbs.	Bbl.	Bbl.	Car.	Car.	Car.	Car.
25	.06	.19	.15	8.00	10.00	11.00	8.00

500	.28	.40	.34	31.00	53.00	44.00	36.50
525	.29	.41	.35	32.50	55.00	45.50	37.50
550	.30	.42	.36	33.00	57.00	47.00	39.00

When rates are not shown in the above table for the exact distances, the rates given for the next greater distance should be used. In fixing rates the distance is to be computed from the point where the freight is received in this State, notwithstanding it may pass from one road to another.

The law provides penalties in case of its violation, and gives justices of the peace concurrent jurisdiction with the Circuit Court in all

cases of prosecution for a violation of this act, with full power and authority to impose fines, and to the same extent as the Circuit Court in all cases where the amount claimed does not exceed two hundred dollars.

In 1874 the question of holding a convention to revise the constitution of the State was submitted to a vote of the people, and decided in the affirmative. During the spring of this year delegates to this convention were elected in all the counties. They assembled at Jefferson City on the 5th of May, and Waldo P. Johnson was chosen to preside over their deliberations. The following standing committees were appointed: on executive and ministerial department; officers of the county and municipal government; judicial department; boundaries and political subdivisions; representation; organization of the militia; legislative department; printing and binding; education; banks and corporations; preamble and Bill of Rights, and future mode of amendment. The work proceeded very harmoniously, and was completed on the 2d of August. The only important subject which the convention took occasion to investigate was one which had previously been brought up in the Legislature regarding 1,918 \$1,000 bonds which were alleged to have disappeared from the Treasury, but had not been duly canceled or destroyed after payment. The committee reached the conclusion that these bonds were probably in existence somewhere, and submitted an ordinance prohibiting the Legislature from ever providing for their payment—the numbers and dates of issue being designated—on the ground that they had “been redeemed by the State of Missouri, deposited as securities available to the State in dealing with the Pacific Railroad in the vault of the Treasury, and while the same were in said vault, withdrawn from circulation as negotiable instruments, were criminally taken therefrom.”

Provision was made for submitting the constitution to the people for ratification on the 30th of October. The result was its adoption by a vote of about six to one.

The preamble is as follows:

We, the people of Missouri, with profound reverence for the Supreme Ruler of the Universe, and grateful for his goodness, do, for the better government of the State, establish this constitution.

Article I. confirms the boundaries of the State as previously established, and declares that the Mississippi River and the navigable waters leading to it shall be a free highway for the citizens of the State and the United States without tax or toll. Article II. is the Bill of Rights, and comprises thirty-two sections. All the proscriptive features of the old Bill of Rights were abolished. On the subject of State rights the following declarations were made:

Sec. 2. That the people of this State have the inherent, sole, and exclusive right to regulate the internal government and police thereof, and to alter and abolish their constitution and form of govern-

ment whenever they may deem it necessary to their safety and happiness: *Provided*, Such change be not repugnant to the Constitution of the United States.

Sec. 3. That Missouri is a free and independent State, subject only to the Constitution of the United States; and as the preservation of the States and the maintenance of their governments are necessary to an indestructible Union, and were intended to co-exist with it, the Legislature is not authorized to adopt, nor will the people of this State ever assent to any amendment or change of the Constitution of the United States which may in any wise impair the right of local self-government belonging to the people of this State.

Complete religious freedom and equality are guaranteed, and it is declared that no one shall be compelled to attend any place of worship or contribute to the maintenance of any form of religion. On the use of public funds for religious purposes the following declaration is made:

Sec. 7. That no money shall ever be taken from the public Treasury, directly or indirectly, in aid of any church, sect, or denomination of religion, or in aid of any priest, minister, or teacher thereof, as such; and that no preference shall be given to, nor any discrimination made against, any church, sect, or creed of religion, or any form of religious faith or worship.

On the subject of freedom of speech it is declared—

Sec. 14. That no law shall be passed impairing the freedom of speech; that every person shall be free to say, write, or publish whatever he will on any subject, being responsible for all abuse of that liberty; and that in all suits and prosecutions for libel the truth thereof may be given in evidence, and the jury, under the direction of the court, shall determine the law and the fact.

The usual guarantees regarding personal rights, privileges, and immunities, are set forth without any discriminations, and the following prohibition of slavery is included:

Sec. 31. That there cannot be in this State either slavery or involuntary servitude, except as a punishment for crime, whereof the party shall have been duly convicted.

Article III. distributes the powers of government into legislative, executive, and judicial, and declares their independence of each other.

Article IV. deals with the legislative department, and consists of fifty-six sections. The official style of the legislative body is "The General Assembly of the State of Missouri." The regular sessions are to begin on the first Wednesday after the first day of January in 1877, and every second year thereafter, and adjourned sessions are prohibited. The Senate consists of thirty-four members, chosen for a term of four years, one-half to go out of office every two years. The State is to be divided into "convenient" senatorial districts according to population as shown in the last decennial census of the United States. Until such division is made, the districts are to be as designated in the constitution itself. Representatives in the Lower House are to be apportioned as follows: The ratio of representation shall be ascertained by dividing the whole

number of inhabitants as shown by the last United States census by two hundred; a county having one ratio or less shall be entitled to one representative; a county having two and a half ratios shall be entitled to two representatives; a county having four ratios shall be entitled to three representatives; a county having six ratios shall be entitled to four representatives; and one additional representative shall be allowed for every two and a half ratios above six. Counties entitled to more than one representative must be divided into districts. Until the apportionment is made, the House of Representatives is to consist of 143 members, seventeen from the county of St. Louis, four from the county of Jackson, three from the county of Buchanan, two each from the counties of Franklin, Greene, Johnson, Lafayette, Macon, Marion, Pike, and Saline, and one from each of the others. A new apportionment is to be made at the first session after each Federal census. The following oath is prescribed for all members of the General Assembly:

I do solemnly swear (or affirm) that I will support the Constitution of the United States and of the State of Missouri, and faithfully perform the duties of my office; and that I will not knowingly receive, directly or indirectly, any money, or other valuable thing, for the performance or non-performance of any act or duty pertaining to my office, other than the compensation allowed by law.

The compensation of members is limited to \$5 a day for the first seventy days of the session and \$1 per day thereafter, with allowance for travel not greater than that already fixed by law, and \$30 per session for stationery, postage, and incidental expenses. Sections 24 to 42 inclusive prescribe the form and method of legislative proceedings. A revision of the statutes is required within five years after the adoption of the constitution, and every ten years thereafter. If a bill is returned by the Governor without his approval within ten days from the time he receives it, a two-thirds vote of both branches is necessary to make it a law. If it is not returned at all within ten days, it becomes a law without the Governor's approval. Sections 43 to 56 inclusive lay down the limitations of legislative power. The General Assembly can authorize no money to be drawn from the Treasury except to meet regular appropriations made by law. It is prohibited from contracting or authorizing any debt except in the following cases:

1. In the renewal of existing bonds when they cannot be paid at maturity out of the sinking-fund or other resources.

2. On the occurring of an unforeseen emergency, or casual deficiency of the revenue, when the temporary liability incurred, upon the recommendation of the Governor first had, shall not exceed the sum of two hundred and fifty thousand dollars for any one year, to be paid in not more than two years from and after its creation.

3. On the occurring of any unforeseen emergency, or casual deficiency of the revenue, when the temporary liability incurred or to be incurred shall exceed the sum of two hundred and fifty thousand dol-

lars for any one year, the General Assembly may submit an act providing for the loan, or for the contracting of the liability, and containing a provision for levying a tax sufficient to pay the interest and principal when they become due (the latter in not more than thirteen years from the date of its creation), to the qualified voters of the State, and when the act so submitted shall have been ratified by a two-thirds majority, at an election held for that purpose, due publication having been made of the provisions of the act for at least three months before such election. The act thus ratified shall be irrevocable until the debt thereby incurred shall be paid, principal and interest.

It is prohibited from giving or lending or pledging the credit of the State in any manner to any person, association, or corporation, municipal or other, and from making any grant of public money to any individual, association, or corporation, unless in case of public calamity. It is likewise forbidden to authorize any county, city, town, or other political subdivision of the State, to lend its credit in like cases. Subscriptions to stock in corporations on behalf of the State are also prohibited. Local and special legislation in a multitude of specified matters is prohibited, and no special or local law of any kind can be passed unless notice is published in the locality affected thirty days before the bill is introduced. The seat of government cannot be removed from Jefferson City.

Article V. relates to the executive department, which consists of a Governor, Lieutenant-Governor, Secretary of State, State Auditor, State Treasurer, Attorney-General, and Superintendent of Public Schools, all elected for terms of four years, beginning on the first Monday in January after their election. All but the Superintendent of Schools are to be chosen in 1876, and every four years thereafter; that officer in 1878, and every four years thereafter. The customary duties for such officers are prescribed in the twenty-five sections of this article.

Article VI. relates to the judicial department, and consists of forty-four sections. It establishes a Supreme Court of appellate jurisdiction throughout the State, to consist of five judges elected for a term of ten years, the oldest in commission being Chief-Justice; the St. Louis Court of Appeals, with appellate jurisdiction in the counties of St. Louis, St. Charles, Lincoln, and Warren, with control over the lower courts of those counties, but itself subordinate to the Supreme Court of the State, to consist of three judges, elected in those counties for a term of twelve years; circuit courts with civil and criminal jurisdiction; one circuit judge being elected in each circuit for a term of six years, except that the Circuit Court of St. Louis County shall consist of five judges, the State being divided into such circuits as shall be deemed most convenient; criminal courts may be established in counties having more than 50,000 inhabitants; a probate court must be established in each county, with one judge elected by the people; a county

court must also be established in each county, with one or more judges, but not more than three, elected by the people; and in each county as many justices of the peace may be elected or appointed as the public good may require. The Supreme Court and St. Louis Court of Appeals appoint their own clerks, but other clerks are to be elected. The compensation of judges and clerks is left to be fixed by law.

Article VII., consisting of two sections, provides for the impeachment of public officers before the Senate, through the action of the House of Representatives.

Article VIII., twelve sections, relates to suffrage and elections. The general elections are to occur biennially, on the Tuesday following the first Monday of November. All male citizens or male persons of foreign birth, who have declared their intention to become citizens not less than one year or more than five years before an election, who are twenty-one years of age, shall be allowed to vote if they have resided in the State one year and in the county, city, or town, sixty days preceding the election. The following provision is made regarding the process of voting:

Sec. 3. All elections by the people shall be by ballot; every ballot voted shall be numbered in the order in which it shall be received, and the number recorded by the election officers on the list of voters, opposite the name of the voter who presents the ballot. The election officers shall be sworn or affirmed not to disclose how any voter shall have voted, unless required to do so as witnesses in a judicial proceeding: *Provided*, That in all cases of contested elections the ballots cast may be counted, compared with the list of voters, and examined under such safeguards and regulations as may be prescribed by law.

The General Assembly is authorized to provide for the registration of voters in cities and counties having more than 100,000 inhabitants, and in cities having more than 25,000 and less than 100,000, but not otherwise. No person loses his residence for the purpose of voting by absence in the civil, military, or naval service, or while a student at any institution of learning, or kept at a poor-house, asylum, or prison. No person can vote while kept at the public expense in a poor-house or asylum, or confined in prison, and the Legislature may enact laws excluding altogether from the right to vote persons convicted of felony, or other infamous crime, or misdemeanors connected with the right of suffrage. Contested election cases, except of Governor or Lieutenant-Governor, must be tried by the courts of law according to provisions to be established by the General Assembly.

Article IX., consisting of twenty-five sections, relates to counties, cities, and towns. With the exception of a sheriff and coroner, who must be elected in each county for the term of two years, the county organizations are left to be provided for by a general law. Cities and towns are to be classified into not more than four classes, and provision made by general laws for the organization and government

of those of each class. Cities of over 100,000 inhabitants may frame their own charters of government and submit them to the people for ratification, but all such charters shall provide for a mayor and two houses of legislation, one of which shall be elected on a general ticket. The city of St. Louis is authorized to extend its limits and frame a new charter of government under certain restrictions. Counties, towns, and cities, are prohibited from subscribing to the capital stock of corporations, or loaning their credit by making grants or donations to them.

Article X., of twenty-one sections, relates to revenue and taxation. It is declared that the power to tax corporations and corporate property shall not be surrendered or suspended, and that railroad corporations doing business in the State shall be subject to taxation for State, county, school, municipal, and other purposes, on the real and personal property owned or used by them, and on their gross earnings, their net earnings, their franchises, and their capital stock. The State tax on property, exclusive of that necessary to pay the bonded debt, is limited to twenty cents on a hundred dollars, and, whenever the taxable property amounts to \$900,000,000, to fifteen cents on a hundred dollars. Limits are also fixed for county taxes. Counties, cities, and towns, and other political divisions of the State, are prohibited from incurring debt exceeding in any year the revenue of that year, without the assent of two-thirds of the voters at an election held for the purpose; and in no case shall indebtedness be incurred exceeding five per cent. of the value of taxable property, unless for the erection of a court-house or jail; and a sinking-fund shall be provided for the full payment of all indebtedness incurred within twenty years. A special tax is required sufficient to pay the interest on the public debt and reduce the principal not less than \$25,000 each year. The making of profit out of public funds or using them for any purpose not authorized by law is made a felony. The Governor, Auditor, Treasurer, Secretary of State, and Attorney-General, are constituted a Board of Equalization, to adjust and equalize the valuations of property among the several counties.

Article XI. relates to education, and contains eleven sections. The Legislature is required to establish and maintain free schools for the instruction of all persons between the ages of six and twenty years, but separate schools must be established for children of African descent. The last section of the article is as follows:

Sec. 11. Neither the General Assembly, nor any county, city, town, township, school district, or other municipal corporation, shall ever make an appropriation, or pay from any public fund whatever anything in aid of any religious creed, church, or sectarian purpose; or to help to support or sustain any private or public school, academy, seminary, college, university, or other institution of learning, controlled by any religious creed, church, or sectarian

denomination whatever; nor shall any grant or donation of personal property or real estate ever be made by the State or any county, city, town, or other municipal corporation, for any religious creed, church, or sectarian purpose whatever.

Article XII. contains twenty-seven sections, and relates to corporations. It requires all corporations to be organized under general laws. Railroads are declared to be public highways and railroad companies common carriers, and the General Assembly is required to "pass laws to correct abuses and prevent unjust discrimination and extortion in the rates of freight and passenger tariffs on the different railroads in this State; and shall, from time to time, pass laws establishing reasonable maximum rates of charges for the transportation of passengers and freight on said railroads, and enforce all such laws by adequate penalties." Consolidation of parallel or competing lines, and discrimination in charges or facilities, are prohibited. The following is a section relating to free passes:

Sec. 24. No railroad or other transportation company shall grant free passes or tickets, or passes or tickets at a discount, to members of the General Assembly, or members of the Board of Equalization, or any State, or county, or municipal officers; and the acceptance of any such pass or ticket, by a member of the General Assembly, or any such officer, shall be a forfeiture of his office.

The establishment of a State bank is forbidden, and no act authorizing or creating associations with banking powers can go into effect without the approval of a majority of the voters obtained at the next general election after its passage.

Article XIII., containing seven sections, provides for the organization, equipment, and discipline of a militia force.

Article XIV., twelve sections, consists of miscellaneous provisions, among which are the following:

Sec. 8. No person who shall hereafter fight a duel, or assist in the same as a second, or send, accept, or knowingly carry a challenge therefor, or agree to go out of this State to fight a duel, shall hold any office in this State.

Sec. 4. No person holding an office of profit under the United States shall, during his continuance in such office, hold any office of profit under this State.

Sec. 11. It shall be the duty of the grand-jury in each county at least once a year to investigate the official acts of all officers having charge of public funds, and report the result of their investigations in writing to the court.

Article XV. and last, consisting of three sections, provides for future amendments of the constitution. The General Assembly may propose amendments any time, which shall be submitted to a vote of the people at the next election, and, if ratified, shall become part of the constitution; and it may also authorize a vote to be taken on the question of holding a convention for the revision of the constitution, and provide for it in case the vote shall be in the affirmative.

The State debt on the 1st of January was \$17,839,000, of which \$300,000 was paid dur-

ing the year. Other bonds falling due in 1875 and 1876 are to be refunded, under the act of the last session of the Legislature, by a new loan of \$5,000,000. The \$701,000 falling due in 1877, and \$37,000 in 1878, will be paid out of the surplus revenues. The new constitution, in designating the order in which appropriations shall be made, makes it the first duty of the Legislature to provide for the "payment of all interest on the bonded debt of the State that may become due during the term for which each General Assembly is elected," and requires it in the next place to provide for an addition of not less than \$250,000 yearly to the sinking-fund. These objects must be provided for before any other appropriations are made.

The Supreme Court of the State decided in June that a railroad could not claim exemption from taxation beyond the amount provided for in its charter. In the act of incorporation of the Hannibal & St. Joseph Railroad Company, in 1852, provision was made for its taxation. In 1871 a law was passed, constituting a Board of Equalization for the assessment of railroad property, and requiring the president, or chief officer, of each company to make an annual report of the value of its property. In 1872 the Board of Equalization assessed the taxes of the Hannibal & St. Joseph road at \$30,648, of which it paid \$25,326, and refused to pay the rest on the ground that the assessment was illegal. It claimed that the charter constituted a contract with the State, under which it could be subject to no other mode of taxation than that provided for therein. The Circuit Court of Buchanan County sustained this view, and gave judgment for the company, but this was reversed by the Supreme Court, which held that the method of assessing the property of the railroad, provided for in the charter, was not a contract or franchise, but merely one method of taxation, which might at any time be changed for another. The supreme right of the State to lay taxes could not be surrendered by inference or implication, and the property of railroads, like all other property, was subject to taxation at all times under the general revenue laws.

The United States Circuit Court at St. Louis, in January, decided that securities taken in good faith by a creditor from a debtor may be held by the creditor, or one to whom he has assigned them, as against the assignee in bankruptcy of the debtor, in bankruptcy proceedings subsequently commenced. In this case, a bank in St. Louis held notes indorsed by the bankrupt and secured by a pledge of bonds. The assignee in bankruptcy brought suit to recover the securities on the ground that a fraudulent preference had been made within four months prior to the bankruptcy proceedings; but proof was given that neither the bank-officers nor the debtor believed the latter to be insolvent at the time of the transaction, and on this ground it was held that there was no fraudulent preference.

A convention, composed of 869 delegates from thirty-one States and Territories, gathered at St. Louis in the latter part of November, for the purpose of promoting the enterprise known as the Southern Pacific Railroad. A paper was read by Thos. A. Scott, President of the Texas Pacific Railroad Company, and a long series of resolutions was adopted, stating the grounds on which "a Southern transcontinental railway, from the waters of the Mississippi *via* El Paso to the Pacific Ocean, on or near the thirty-second parallel of latitude, is imperatively demanded," and should receive the aid of the Government. (*See RAILROADS.*)

Early in the year a conspiracy to defraud the Government of revenue on whiskey was discovered in St. Louis, and on the 10th of May thirty-two distilleries and rectifying-houses were seized by officers representing the Treasury Department of the United States. Subsequent developments showed that systematic frauds had long been carried on there and at other points, in which not only manufacturers and dealers in whiskey, but revenue officials and agents of the Government, were implicated. Numerous prosecutions followed, including those of John A. Joyce, special agent in the revenue service, and John McDonald, Supervisor of Internal Revenue, who were convicted and sentenced to the penitentiary. Indictments were also found against Wm. O. Avery, Chief Clerk in the Treasury Department at Washington, and General O. A. Babcock, private secretary of the President, for complicity in the frauds. Avery was convicted in December, and Babcock was acquitted in February, 1876. (*See PUBLIC DOCUMENTS.*)

MITCHEL, JOHN, an Irish revolutionist, born November 3, 1815; died March 20, 1875. He graduated from Trinity College, Dublin, in 1836, practised law for six years, and then assumed the editorship of the *Nation*. In this capacity, as well as editor of the *United Irishman*, he came in direct collision with the Government. After an existence of three months, the latter paper was suppressed and its editor sentenced to transportation for fourteen years. After passing ten months in the island of Bermuda, he was deported to Tasmania, where he met his former companions, Smith O'Brien, Meagher, Dillon, and others. They were allowed almost entire liberty, upon their parole not to escape. Mitchel resigned his parole in 1854, and escaped to America. Here he edited various newspapers, and in 1874 made a visit to Ireland, returning to the United States in October. On February 16, 1875, he was elected without opposition to the House of Commons from Tipperary County, Ireland. He landed at Queenstown on the 17th, and was enthusiastically received. On the 18th the House, by a large majority, declared him ineligible for a seat, as he had been adjudged guilty of felony and sentenced to transportation, and had neither endured the penalty nor received a pardon,

and ordered a new election. He was again elected by a large majority. But his death, occurring a few days after, disposed of the question entirely.

MOHL, ROBERT VON, a German jurist, born at Stuttgart, August 17, 1799; died November 4, 1875. In 1824 he was appointed Extraordinary Professor of Law, and in 1827 Ordinary Professor of Political Economy in Tübingen, to which position was added that of Librarian-in-chief of the University in 1836. Owing to difficulties with the Government he was deprived of these positions, and left the service of the state. Soon after he was elected to the Lower House of the Diet of Württemberg. He went to Heidelberg as professor in 1847, was elected to the National Assembly in 1848, and in August of the same year was appointed Minister of Justice in the Imperial Ministry. He resigned in 1849, and went back to Heidelberg. Here he was soon after elected a representative of the university to the Upper House of Baden, and was particularly active in procuring the repeal of the concordat in 1860. In 1861 he was appointed ambassador of Baden to the Bundestag, and retained that position until the dissolution of the German Confederacy in 1866. In 1874 he was elected a member of the German Reichstag. He was always a strong advocate of German unity, to which end he devoted his best talents. He was a brother of Julius, Moritz, and Hugo von Mohl, all of whom rose to great eminence in their respective positions. He wrote "Staatsrecht des Königreichs Württemberg" (1829; second edition, 1840-'46); "Die Ministerverantwortlichkeit in Einheitsstaaten mit Volksvertretung" (1837); "Die Polizeiwissenschaft nach den Grundsätzen des Rechtsstaates" (3 vols., third edition, 1866); "Geschichte und Literatur der Staatswissenschaft" (3 vols., 1855-'58); "Staatsrecht, Völkerrecht und Politik" (2 vols., 1860-'62; third vol., 1869); "Wider die Gleichstellung der Juden" (1869); and "Das deutsche Reichsstaatsrecht" (1878).

MORAVIANS. The statistics of the *Unitas Fratrum* for 1874 give the following details of the Moravian churches throughout the world:

German Province, 5,418 communicants, and 7,613 souls, besides 170 members engaged in various work in Germany; British Province, 3,289 communicants, and 5,646 souls; American Province, 8,705 communicants, and 15,308 souls; Bohemian Mission, 115 communicants, and 168 souls. Whole number of communicants in the three Home Provinces, 17,527; whole number of souls, 28,905. Converts in the Foreign Missionary Provinces, 69,322; missionaries and their children, about 400. Total membership of the *Unitas Fratrum*, 98,227 souls. Besides these, there are claimed as attached to the Moravian Church about 80,000 souls connected with the German Diaspora Mission, who are not counted among the members, because they mostly belong, as yet, to

the state churches, in the midst of which the Diaspora is carried on.

The Church annually educates in the boarding-schools of its three provinces about 2,350 young people who are not of its own communion.

It is claimed on behalf of the Moravians that the statistics show that theirs is not a large church, but, at the same time, that it exerts a very great influence both in the Christian and heathen world. It is scattered over the whole earth, from Greenland to Australia, and from Thibet to South America, and yet constitutes one organic whole, with the same general ecclesiastical government. It is claimed that this is the only Protestant Church which keeps up such a unity.

Certain exclusive features in the constitution of the American Province were done away with in 1855. At that time the number of churches was forty-three; of communicants, 4,460; and of souls, 8,831. In 1875 the number of churches had increased to seventy-three, the number of communicants had been doubled, and the whole number of souls had been increased by nearly 6,900.

The receipts for the *Moravian Foreign Missions* for the year ending July 1, 1875, were as follows:

1. *Collections in Congregations*:—a, Germany and the Diaspora, \$13,000; b, England, \$9,800; c, North America, \$1,000: total, \$23,800.

2. *Other Contributions*:—German Province, \$15,600; British Province, \$34,500; American Province, \$18,000: total, \$68,100.

3. *Legacies*:—German Province, \$11,000; British Province, \$6,000: total, \$17,000. Grand total, \$103,900.

(The report foots it up to \$106,900.)

The disbursements for the year amounted to about \$103,500.

There were also collected, for extinguishing the debt of the former year, the following sums: In the German Province, \$3,600; in the British Province, \$22,300; in the American Province, \$45; in the West Indies, \$20: total, \$25,965.

The whole number of missionaries was 886, or three more than were employed the previous year. Number of stations, 92; of out-stations, 15; of persons under the care of the missionaries, 67,795.

MORIKE, EDUARD, a German poet, born at Ludwigsburg, September 8, 1804; died June 4, 1875. He studied at the Gymnasium of Stuttgart, prepared himself for the study of theology at the Evangelical Seminary at Urach, and in 1822 entered the University of Tübingen, where, however, he devoted more time to belles-lettres than to theology. Having become pastor in a small town in 1834, he was forced to resign this position on account of ill-health. He was then for a time teacher in Stuttgart. Although his poems are known to few only, they are still prized as among the

finest productions of German poetry. He wrote: "Maler Nolten," a novel (1832); "Das Stuttgarter Hutzelmännlein" (1853); "Vier Erzählungen" (1856); and "Mozart auf der Reise nach Prag" (1856). His opera, "Die Regenbrüder" (1839), was set to music by Lachner; many of his songs and ballads by Kaufmann and Hetsch. He also published translations of Anacreon and Theocritus.

MOROCCO, a country in Northern Africa. Sultan, Muley Hassan, born 1831, eldest son of Sidi-Muley-Mohammed, ascended the throne at the death of his father, September 20, 1878. The crown was formerly hereditary in the male line, after the custom of succession obeyed in the Ottoman Empire, under which the crown falls, at the demise of the sovereign, to the surviving eldest member of the reigning family. The custom, however, was set aside at the death of the late Sultan, Sidi-Muley-Mohammed, when the succession was secured not to either of his two surviving brothers, but to his eldest son, the present Sultan. The form of government is that of absolute despotism, unrestricted by any laws civil or religious. The authority of the Sultan as spiritual ruler is not limited, as in Turkey and other Mohammedan countries, by the expounders of the Koran. The Sultan has no regular ministers, but receives advice from and carries on the executive usually through special favorites near his person, the principal of whom is generally invested with the title of Mula-el-tesserâd, or steward of the imperial household. The armed force consists of about 8,000 men, 5,000 of whom constitute the imperial body-guard, one half infantry and the other half cavalry. The country is divided into twenty-eight provinces, each of which is governed by a *kaid*, or governor, who holds absolute power within his own district. The revenue of the Sultan is estimated at about \$2,500,000.

The western frontier of the country, toward the Sahara, is not fixed, and the claims of the Sultan are disputed by a number of nomad tribes. The area is estimated by Behm and Wagner ("Bevölkerung der Erde," vol. iii., 1875) at about 250,000 square miles; the estimates of population vary from 2,500,000 to

8,000,000. In accordance with the statements of G. Rohlf's ("Mein erster Aufenthalt in Morocco," Bremen, 1873), Behm and Wagner assume it to be about 5,500,000. More than two-thirds of the population belong to the race commonly called Moors, the remaining third consisting mainly of Bedouin Arabs, Jews, estimated at 840,000, and negroes. The number of Christians is very small, not exceeding 500.

The trade of Morocco, though not yet considerable, has greatly increased since the year 1856, when a treaty of commerce was concluded between Great Britain and Morocco. The value of imports and exports in 1871 was as follows (in francs):

COUNTRIES AND COIN.	Imports.	Exports.
Great Britain	\$0,650,000	15,350,000
France	5,430,000	10,420,000
Spain	90,000	900,000
Other countries	40,000	170,000
Foreign coin	5,750,000	2,400,000
Total, 1873	\$1,950,000	\$9,350,000
" 1872	24,990,000	32,750,000

The value of the principal articles of import and export in 1874 was as follows:

IMPORTS.		EXPORTS.	
	Francs.		Francs.
Textures	14,320,000	Tea	750,000
Sugar	2,780,000	Cloths	800,000
Raw silk	1,080,000	Iron	420,000
Wool	7,000,000	Gums	610,000
Hides and skins	3,300,000	Ostrich-feathers	530,000
Corn	3,200,000	Dates	320,000
Peas and beans	2,270,000	Beeves	1,000,000
Almonds	1,950,000	Wax	500,000
Olive-oil	1,690,000	Shoes	1,500,000
Hemp-seed	710,000	Woolen stuffs	290,000

The movement of shipping was as follows in 1874:

SHIPPING.	LADEN.		IN BALLAST.		Total Tons.
	Vessels.	Tons.	Vessels.	Tons.	
Entered	1,311	166,915	575	68,129	254,944
Cleared	1,309	192,919	215	62,276	256,195

The movement of shipping, arranged according to nationalities and ports, was as follows:

NATIONALITY.	ENTERED.		PORTS.	ENTERED.		VALUE OF CARGOES (IN FRANCS).	
	Vessels.	Tons.		Vessels.	Tons.	Entered.	Cleared.
English	652	165,658	Tangier	459	58,581	8,510,000	5,200,000
French	221	78,588	Larache	55	4,839	510,000	2,580,000
Spanish	828	5,527	Rabat	41	8,561	2,890,000	1,280,000
Portuguese	74	8,871	Casablanca	148	50,194	4,390,000	4,430,000
German	18	2,157	Mazagan	161	50,818	1,980,000	4,160,000
Danish	9	1,117	Saff	110	24,580	1,990,000	2,870,000
Italian	7	1,563	Mogador	121	54,765	8,050,000	6,700,000
Others	7	868	Tetuan	215	2,571	700,000	210,000

The following countries were represented in Morocco, in 1875, by consuls and diplomatic agents: United States, Belgium, Brazil, Denmark, Germany, France, Great Britain, Italy, Netherlands, Austro-Hungary, Portugal, Swe-

den and Norway, and Spain. The consul-general of the United States is Hon. F. Mathewa.

In January, 1875, serious disturbances occurred on the frontier, between Morocco and Algeria, caused by the appointment of Sheik

Hadj Mohammed as commander of the Kabyles of Beni Suasen, an appointment said to be obtained by influence over the counselor of the Emperor of Morocco, when the latter with the army came to the frontier to settle existing disputes. Sheik Hadj was then appointed governor of the town of Oudjdah, and on proceeding to take possession of his post the conflict arose. Oudjdah submitted to him on compulsion, but the tribes of Anjad and Mahia revolted. Fighting went on for a week, in which one hundred and fifty of the Beni Suasen tribe and forty-eight of the Anjad and Mahia tribes were killed, and a great many wounded. The Sheik Hadj Mohammed and his column were compelled to retreat. The Anjad and Mahia tribes captured about 51,000 sheep and 18,000 camels, which were grazing on the plain. The Spahis and Turcos among the French troops, who belonged to the combatant tribes, were only restrained from taking part in the conflict by the French commander ordering all who left the ranks to be fired upon.

The mountain tribes in the province of Tangier not having paid any taxes for the last five years, the Government, in June, 1875, appointed Kaid Gelaley Ben Hamo, the chief officer of the Sultan's court, as governor of the province, and gave him a force of 2,000 to chastise the mountaineers. The new governor is upward of eighty years of age, but a man of great energy of character, and whenever the inhabitants of any province of importance have shown disaffection, Kaid Gelaley has been dispatched by the Sultan to rule the turbulent population with a rod of iron. In 1874, when the people of Fez rebelled against the authority of the Sultan Mulai Hassan, Kaid Gelaley was appointed governor of that city—a post which he held up to the time of his appointment as Governor of Tangier. Later accounts stated that Kaid Gelaley had seized several chiefs of rebellious tribes, and imposed a heavy fine upon the inhabitants.

The Government seemed to be inclined to take some steps toward establishing more friendly relations with foreign countries. Intelligence received from Tangier in July stated that the Moroccan Minister for Foreign Affairs had called a meeting of foreign representatives to communicate to them orders received from the Sultan. The minister was reported to have brought to the notice of the representatives proposals for the building of a mole at Tangier, and a breakwater at Casablanca; also for establishing telegraphic communication between Tangier and Europe. It was also stated that the Sultan intended to send a number of young Moors to be educated in Europe.

MORTON, OLIVER PERRY, the senior United States Senator from Indiana, was born in Wayne County, August 4, 1823. The original family name was Throckmorton, the first syllable having been dropped by the Senator's father. He received his education chiefly at the Wayne County Seminary and Miami Uni-

versity at Oxford, O., which he entered in 1843, and left two years after. He studied law at Centreville, and began practice there in 1847. During the next ten years he rose to a leading position at the bar of Indiana. He was elected a circuit judge in 1852, but remained on the bench only one year. He was a Democrat in early life, but, having strong antislavery sympathies, left the party after the repeal of the Missouri Compromise in 1854. In 1856 he was the Republican candidate for Governor, and made a brilliant canvass of the State with his opponent, Ashbel P. Willard. He was defeated, and returned to his law-practice at Centreville. In 1860 he was nominated on the Republican ticket for the office of Lieutenant-Governor, and during the canvass that followed took strong ground in favor of the coercion of the Southern States into obedience to the Constitution. He was elected, and took his seat as President of the Senate on the 14th of January, 1861, but two days afterward he took the oath of office as Governor, Henry S. Lane, who was elected to that position, having been chosen United States Senator. During the war Governor Morton was very active and zealous in raising troops and supporting the efforts of the Government for the suppression of the Southern resistance. In 1863 he was opposed by a Democratic Legislature, which contemplated taking the military power out of his hands and placing it in those of four Democrats. These efforts were defeated by the withdrawal of all the Republican members, leaving both Houses without a quorum. The Governor then borrowed money on his own responsibility to carry on the government of the State. The Democratic Attorney-General gave an opinion that there was no authority for drawing money from the Treasury to pay State bonds, and that a special appropriation was necessary, and this position was sustained by the Supreme Court. The object was to compel a calling of the Legislature, but the Governor raised the needed funds for meeting the obligations of the State on his own personal responsibility. The obligations which he incurred were afterward assumed by the State. Through them he was enabled to carry on the government and continue his support of the Federal authorities, in spite of the opposition of Democratic Legislature and courts. In 1866 he was elected to the United States Senate, and reelected in 1872. In that body he has taken a leading position in support of the Administration, and the policy of reconstruction and coercion in the South.

MÜLLER, JOHANN HEINRICH JAKOB VON, a German physicist, born at Cassel, April 30, 1809; died October 8, 1875. He studied at the Gymnasium of Darmstadt, and the Universities of Bonn and Giessen, devoting himself particularly to the study of mathematics and natural philosophy. Having been assistant teacher at the Gymnasium at Darmstadt for some time, he was appointed teacher of

Mathematics and Natural Philosophy in the Realschule of Giessen in 1839, and in 1844 became Professor of Natural Philosophy at the University of Freiburg. His principal work is "Lehrbuch der Physik und Meteorologie" (2 vols., 1842; seventh edition, 1868-'69); the third volume of this work was published separately under the title of "Lehrbuch der kosmischen Physik" (fourth edition, 1875). Of his other works, the best known are: "Grundzüge der Krystallographie" (second edition, 1868); "Anfangsgründe der geometrischen Disciplin für Gymnasien," etc. (thirteenth edition, 1869); "Grundriss der Physik und Meteorologie für Lyceen und Gymnasien," etc. (twelfth edition, 1875); and "Die Schule der Physik" (1874).

MUNZINGER, WERNER, a celebrated African explorer, born at Olten, Switzerland, in 1832; died in November, 1875. He studied Oriental languages at Munich and Paris, went to Cairo in 1852, entered a business in Alexandria in 1853, was chief of a commercial expedition to the Red Sea in 1854, lived for some time in Massowah and then in Keren, the principal town of the Bogos, and joined the German Expedition to Central Africa in 1861; but when Henglin, the leader, went to Abyssinia, he left the expedition and went to Obi by way of Khartoom in order to reach Wadai through Darfoor. As he was refused permission to travel through Darfoor, he returned to Europe. In 1864 he again went to Africa, had charge of the British consulate at Massowah in October, 1865, and took an active part in preparing the way for the British army in the Abyssinian War of 1867. In June, 1868, he became French consul in Massowah, went to Aden in 1870, and with Captain Miles explored the countries on the southeastern coast of Arabia. Returning to Massowah, he was appointed governor of that town, with the title of bey, by the Viceroy of Egypt, and continued his explorations in the Bogos country. In 1872 he was appointed to the chief command of the army against the Abyssinians. From that time he was continually engaged in subduing the border tribes of Abyssinia, in which undertakings he was eminently successful. In October, 1875, he again started on an expedition against the Gallas of Shoa. On this expedition he was accompanied by his wife, a

native Abyssinian. One night, in November, they were attacked by a party of Gallas near Lake Assal, and Munzinger, his wife, and a large number of his soldiers, were murdered. Of the three thousand men of which the expedition originally consisted, only one hundred and twenty returned. He wrote, besides a number of articles for geographical journals, the following works: "Ueber die Sitten und das Recht der Bogos" (1859); "Ostafrikanische Studien" (1864); "Die Deutsche Expedition in Ostafrika" (1865); "Vocabulaire de la Langue Tigré" (1865); "Routes in Abyssinia, presented to the House of Lords" (1867). He left the manuscript of "Skizze einer Geographie des Sudan," extracts from which are given by Behm and Wagner, in their periodical, "Die Bevölkerung der Erde" (vol. iii.).

MUSTAPHA FAZYL PASHA, a Turkish statesman, born in 1830; died December 2, 1875. He was the son of Ibrahim Pasha of Egypt, and only forty days younger than his brother Ismail Pasha, the present Viceroy of Egypt. According to the law of succession of the Osman dynasty, which had also been in force in Egypt since 1841, Mustapha Pasha was the heir-presumptive to the vice-regal throne. But in 1865 Ismail Pasha obtained a firman from the Sultan altering the law of succession of Egypt and making it similar to that of European countries. The brothers had always been opposed to each other, and this action completed the rupture. Mustapha had early gone to Turkey, where, in 1861, he was for a short time Minister of Finance. Short as his administration was, it was nevertheless one of the best that Turkey had enjoyed for many years. He introduced economy and order into the department, and did not burden the country with any new debts. When the firman appeared, excluding him from the succession to the Egyptian throne, he entered a protest, and in consequence was banished. In Paris, where he took up his residence, he was met by the Sultan in 1867, who invited him to return. After his return he was for a time Minister of Justice, and then of Finance, and upon the death of Mahmoud Pasha he was appointed Grand-Vizier, which position, however, he held for a short time only. In 1873 he tried to effect a reconciliation with his brother, but was unsuccessful.

N

NAVY OF THE UNITED STATES. The Navy is now reported to be in a stronger and more efficient condition than it has been at any other time during the present Administration.

The number of vessels of every class and description now on the Navy Register is 147; these carry 1,195 guns and are of 152,492 tons measurement. Of these 26, carrying nominally 266 guns, are sailing-vessels without steam-

power, of which 4 are in use as training and practice ships, 2 are assigned to States as school-ships, 3 are in use as hospital-ships, or as quarters, 6 as coal, store, and supply ships at the various stations and for the several squadrons, 6 are in commission as receiving-ships, 2 are laid up as useless for any present purpose, and 1 is on the stocks at Sackett's Harbor.

The steam-vessels, as distinguished from iron-clads and torpedo-ships, number 95, of which, however, 25 are tugs employed as towing, ferry, or torpedo boats at the various navy-yards or stations, or are in use as surveying-vessels, or in the service of the Fish Commission. Twenty-nine of all classes are in ordinary at the yards on the Atlantic or at Mare Island; 3 are used as freight and dispatch vessels; 3 are in commission as training and receiving ships, at all times ready for service, and the remainder are in commission on the several stations or at the various navy-yards, ready for use when required. Of these wooden ships 18 are substantially new.

The iron-clad fleet comprises 26 vessels. Three are of a class and in a condition to be of no service. The remaining 23, consisting of 21 vessels of the monitor type and 2 iron torpedo-ships, are all efficient vessels of their class, and very powerful in both defensive and offensive operations near our shores.

There are, therefore, 80 available ships, including 16 iron-clads and 2 torpedo-boats.

The cruising-stations remain the same in number and designation as last year, there being six separate stations, each commanded by a rear-admiral, and designated respectively the European, the Asiatic, the South Pacific, the North Pacific, the South Atlantic, and the North Atlantic stations. They comprise within their limits the whole field of naval operation in every part of the world.

The appropriations applicable to the year ending June 30, 1875, aggregated \$19,278,731, and the expenditures from these appropriations to \$18,825,526, or about \$450,000 less than the whole amount. The appropriations made available for the year ending June 30, 1876, amount to \$18,301,306. The following estimates have been submitted for the next year :

Pay of officers and seamen of the Navy.....	\$7,600,000 00
Pay of civil establishment in navy-yards.....	210,000 00
Ordnance and torpedo corps.....	502,000 00
Coal, hemp, and equipments.....	1,500,000 00
Navigation and navigation supplies.....	115,000 00
Hydrographic work.....	67,800 00
Naval Observatory, Nautical Almanac, etc.....	44,000 00
Repairs and preservation of vessels, etc.....	3,805,000 00
Steam-machinery, tools, etc.....	1,500,000 00
Provisions.....	1,279,000 00
Repairs of hospitals and laboratories.....	20,000 00
Surgeons' necessaries.....	40,000 00
Contingent expenses of various departments and bureaus.....	865,000 00
Naval Academy.....	193,882 40
Support of Marine Corps.....	924,507 00
Naval Asylum, Philadelphia.....	58,177 00
Maintenance of yards and docks.....	860,000 00

Total \$18,891,166 40

The cost of the new buildings asked for, and the current expenses for repairs at navy-yards and stations, are estimated to require in addition the sum of \$1,755,000.

The amount paid for pensions during the year ended June 30, 1875, was \$520,348, including \$185,675 to invalids and \$334,672 to widows and others.

The Torpedo-School at Newport continues in a high state of efficiency, and the knowledge

obtained by the officers in the manufacture and use of every description of this terrible means of warfare is reported to be of inestimable value to the service.

The department has deemed it advisable to resume the enlistment of boys to serve till reaching twenty-one years of age, under the existing laws enacted for that purpose. The sole object of the system is to make the boys good and intelligent sailors for the Navy, without attempting to prepare them for any higher grade. The great want of intelligent native-born seamen to man the vessels of the Navy has been seriously felt of late years, and it becomes a matter of national importance to remedy this evil. Other nations have felt the growing scarcity of good seamen to man their navies, and are attempting, by establishing schools and training-ships in their ports, to provide for the education and training of boys to become sailors. It is said that England turns out yearly 3,000 boys from her training-ships for her Navy. Some efforts were formerly made under the laws of Congress to enlist boys as apprentices, but without success, owing partly to the very elaborate system of education and training adopted, and partly to the fact that inducements were held out to the boys which could not be realized. Under the present system, which is purely experimental, about 250 boys have been enlisted and placed on board training-vessels, where they receive an elementary English education, and are initiated in all the duties of sailors on a man-of-war.

Two expeditions were sent out during the year to complete the survey for an interoceanic canal across the great Isthmus. One, an expedition under the command of Lieutenant Frederick Collins, was sent in January, with instructions to make a careful survey of the proposed Napipi Canal route, and to determine the character of the line in that vicinity found best suited to the construction of a ship-canal.

This expedition was transported to the gulf of Urabá by the United States steamer *Candaigua*, and thence up the *Atrato* to the field of operations in the boats of that ship. They arrived and commenced regular operations in the field on the 8th of February, and work was continued without interruption till the 28th of April. During this time a careful line of levels was run from the *Atrato*, near the mouth of the Napipi, to the Pacific, and the country along the line elaborately reconnoitred to develop its topographical features.

For the first five miles of the route swamps and morasses were encountered. From the swampy region to the Pacific the country was found to be extremely hilly. As long as the line followed the valley of the Napipi, however, it was found possible to avoid the greater part of the hills, but in the valley of the *Doguada* they could not be avoided, and in this section of the canal very deep cutting would be required.

The length of tunnel necessary to carry the canal under the dividing ridge, which attains a height of 778 feet, was found to be 8.5 miles. The total length of the canal line by this route, as determined by Lieutenant Collins, is 82.2 miles, and his estimates of the probable cost of the construction of a suitable canal, with all the works necessary for its preservation and successful operation, amount to \$98,000,000.

The other expedition was under the charge of Commander Edward P. Lull, and was directed to make surveys near the line of the Panama Railroad. This expedition sailed from New York on the 5th of January, and arrived at Aspinwall, United States of Colombia, on the 16th. Operations were at once begun and continued until the 8d of April, when the surveys were concluded.

The results obtained by the expedition are the location of a practicable line for an inter-oceanic ship-canal, 26 feet deep, from the bay of Aspinwall on the Caribbean Sea to Panama on the Pacific. The total length of the line is 41.7 statute miles. Twelve lift-locks on each side will be required, and one tide-lock at Panama, or 25 in all. The lift of the locks will be 10.8 feet each; that of the tide-lock 10 feet. It is proposed to cross the river Chagres by means of a viaduct 1,800 feet in length.

The water-supply is to be drawn from the river Chagres, and to be conveyed to the canal by a feeder 10.22 miles in length. The Chagres was found, by careful gauging, to discharge at an unusually low stage 55,900,800 cubic feet per day, a quantity considerably in excess of the maximum possible demand of the canal. Ample culverts are provided for the passage under the viaduct of all the superabundant waters of the Chagres in times of freshets.

The total estimated cost of opening a canal for ship-navigation through the Isthmus of Panama is, after adding, to provide for contingencies, 25 per cent. to the computed cost, \$94,911,860.

The commission appointed to consider the whole subject of communication by canal between the Atlantic and Pacific Oceans, over the Isthmus, after a careful examination of all the routes proposed, have unanimously reported that the one known as the "Nicaraguan Route," beginning at or near Greytown on the Atlantic side, and ending north of the Rio del Brito on the Pacific, affords more advantages and presents fewer difficulties than any other route yet found across the Isthmus.

NEBRASKA. The Legislature of this State assembled at Lincoln, in the first week of January, for the regular session of 1875, and closed it by final adjournment on the 25th of February ensuing. Of the fifty-three members composing that body, thirty-eight were Republicans, and fifteen Democrats and Independents, or Conservatives.

Among the first matters acted upon at this session was the election of a United States Senator, in the place of Thomas W. Tipton, whose

term was about to expire. The two Houses met in joint convention more than once for that purpose, and many ballots were taken, but finally A. S. Paddock received thirty-eight votes and was declared elected. Mr. Paddock was born at Glens Falls, in the county of Warren, State of New York.

Among the bills of a public character passed at this first session, the one most generally important was that "calling a convention to revise, alter, or amend the constitution of the State." By the provisions of the act, the number of the delegates to the convention was fixed at sixty-nine, and the time for their election on the first Tuesday in April, 1875. The time for the convention to assemble was on the second Tuesday in May following. The act ordained that the amendments, alterations, or revision of the existing constitution agreed to by the convention, should be submitted to the qualified voters of the State for their adoption or rejection.

For the relief of the large number of citizens inhabiting those sections of Nebraska which were devastated by the locusts in 1874, especially to assist them in providing seed-grain for the crops in 1875, the Legislature passed an act empowering the Governor and Secretary of State to issue State bonds of one thousand dollars each, to the aggregate amount of fifty thousand. The act created also a Board of Relief and appoints its members, whose duty it is to carry that purpose into execution, and report the result of their operations to the next Legislature.

The principal of the said bonds is redeemable within ten years from the date of their issue, and in the mean time they bear interest at the rate of ten per cent., payable semi-annually in the city of New York. To provide for the payment of both principal and interest, the act ordained that a tax of one-tenth of one mill should be levied by the Board of Equalization annually, in addition to all other taxes levied for State purposes.

Among the numerous other acts and joint resolutions passed were the following:

To aid in the construction of a railroad on the west bank of the Missouri River from Omaha to the south-line of the State of Nebraska.

An act to provide for the numeration of the population, and registration of the births and deaths, in the State of Nebraska.

To create and provide for a State Board of Immigration.

To amend an act entitled "An act to establish a system of public instruction in the State of Nebraska."

To erect and maintain an Institution for the Blind.

To provide for the government of the Institute for the Deaf and Dumb, and for other purposes.

The Constitutional Convention assembled in Lincoln, on the second Tuesday in May, and organized by electing John Lee Webster for president, and also the other officers. It finished the work of framing a new constitution within about a month from their first meeting, and on June 12th closed the session by final adjournment.

The number of officers in the three departments of the State government is generally increased by the new constitution. Among its chief provisions are the following: The House of Representatives shall consist of eighty-four members, the Senate of thirty, until 1880. After that year the number of members of each House shall be regulated by law, but never exceed one hundred Representatives nor thirty-three Senators. The compensation to be given each member of the Legislature is fixed at three dollars for every day's attendance, the number of days not to exceed forty at any one session, and one mileage at the rate of ten cents for every mile in going and returning on the most usual route.

The session of the Legislature shall commence at noon on the first Tuesday in January next following the election of its members, and at no other time, except as provided by this constitution; and their first election under it is to be held on the Tuesday succeeding the first Monday in November, 1876.

In defining the powers of the Legislature the constitution forbids them to pass special laws for granting divorces, changing the names of persons, and in many other matters particularly enumerated; and generally enjoins that in all cases where a common law can be made applicable to particular cases, no special law shall be enacted.

No act of the Legislature shall take effect until three calendar months after the adjournment of the session at which it passed, except in case of emergency, which is to be expressed in the title and body of the act, and concurred in by two-thirds of all the members elected to each House.

In the third section of the article on miscellaneous provisions the new constitution ordains that "drunkenness shall be cause of impeachment and removal from office."

The Executive Department shall consist of a Governor, a Lieutenant-Governor, Secretary of State, Auditor of Public Accounts, Treasurer, Superintendent of Public Instruction, Attorney-General, and Commissioner of Public Lands and Buildings, who shall each hold his office for the term of two years from the first Thursday after the first Tuesday in January next after his election. The first election of the said officers shall be held on the Tuesday succeeding the first Monday in November, 1876, and each succeeding election shall be held at the same relative time in each even year thereafter.

The State Treasurer is declared ineligible to his office for two years next succeeding the expiration of his second term after the first consecutively.

The salary of the Governor, Auditor of Public Accounts, and Treasurer, is fixed at twenty-five hundred dollars per annum each. The Lieutenant-Governor shall receive twice the compensation of a Senator, and all of the other State officers two thousand dollars each per annum.

The officers of the Executive Department, "after the adoption of this constitution, shall not receive to their own use any fees, costs, interest upon public moneys in their hands, or under their control, perquisites of office, or other compensation; and all fees that may hereafter be payable by law for services performed by any officer provided for in this article of the constitution shall be paid in advance into the State Treasury."

The judicial power is vested in a Supreme Court, composed of three judges, having original and appellate jurisdiction; in six District Courts, the whole State being divided for that purpose into six Judicial Districts, with one judge in each, having chancery and common-law jurisdiction; in County Courts, one court being allowed in every county, with one judge each, they being courts of record, having original jurisdiction in all matters of probate and others, specified; in justices of the peace, police magistrates, and such other courts, inferior to District Courts, as may be created by law for cities and incorporated towns, having proportionately limited jurisdiction in both criminal and civil cases respectively.

The judges of the six District Courts are empowered to hold courts for one another, and bound to do so when required by law.

The terms of office of the judges of the several courts are fixed at six years for the justices of the Supreme Court, four years for the judges of the District Courts, and two years for all the others. Their respective terms are to begin on the first Thursday after the first Tuesday in January next succeeding their election. Their first election shall, exceptionally, take place on the second Tuesday in October, 1875. The judges of the Supreme Court are elected by the qualified voters of the State at large; each of the others by those residing in the locality wherein he is to exercise his functions.

The judges of the Supreme and District Courts shall each receive a salary of twenty-five hundred dollars per annum, payable quarterly.

No judge of the Supreme Court, or District Court, shall receive any other compensation, perquisite, or benefit, for, or on account of, his office in any form whatever; nor act as attorney or counselor at law in any manner whatever.

The new constitution declares all property belonging to the State, counties, and municipal corporations, both real and personal, exempt from taxation. It also empowers the Legislature to exempt from taxation such other property as may be used exclusively for agricultural or horticultural societies, for schools, religious, cemetery, or charitable purposes; but the Legislature must do so by general law.

Amendments to this constitution may be proposed by either House of the Legislature. They must be agreed to by three-fifths of the members elected to each House, entered on the journals with the yeas and nays of the vote cast, and published once a week in at least one newspaper in each county for three months immediately preceding the next election of

Senators and Representatives, at which election such amendments shall be submitted to the people for approval or rejection, and, if adopted by a majority of votes, they shall become a part of this constitution.

To the constitution the convention appended two independent articles, to be voted upon at the same time with it, but separately. They were as follows:

I. The Legislature may provide that at the general election immediately preceding the expiration of term of a United States Senator from this State, the electors may express their preference for some person for the office of United States Senator. The votes cast for such candidates shall be canvassed and returned in the same manner as for State officers.

II. The seat of government of this State shall not be removed, or relocated, without the assent of a majority of the electors of the State voting thereupon at a general election, or elections, under such rules and regulations as may be prescribed by law: *Provided*, The question of removal may be submitted at such other general elections as may be provided by law.

The new constitution appointed the second Tuesday in October, 1875, for a general election upon it, as also upon the independent articles recited above.

By special provisions inserted in the schedule it was ordained that the judges of the Supreme and District Courts, the Regents of the State University, and some other officers created by the new constitution, should be elected on the same day in which that instrument was to be submitted to the people for adoption or rejection, and that, in the event of its being adopted, they should be installed in their several offices on the first Thursday after the first Tuesday in January, 1876.

The State Convention of the Democratic party assembled at Tremont on September 16th, and was very numerously attended. A motion was made "to nominate one candidate for the Supreme bench," which was finally carried by a vote of fifty-three to thirty. A further motion that instead of making the nomination by ballot, a special committee of five should be appointed "to report a name for a candidate for the Supreme bench," was also carried, and the committee appointed. This committee recommended E. A. Thomas, of Brownville, as a candidate for Judge of the Supreme Court, and their report was adopted by the convention unanimously.

The nomination of six candidates for Regents of the State University was, on motion, remitted to the delegates from each district on consultation among themselves, respectively. The following candidates were then nominated: Tobias Castor, of Saline County; James Thorn, of Otoe; D. O. Olin, of Washington; J. Houghton, of Seward; T. J. Foley, of Lincoln County; and Alexander Bear, of Madison.

The following platform was unanimously adopted by the convention:

Resolved, That the Democratic party of this State is in favor of retrenchment and reform in the administration of all departments of the Government, both State and national.

Resolved, That we are in favor of a sound currency, coin or its equivalent, as essential to stability in business and the restoration of prosperity; of steps toward specie payments, and no step backward.

Resolved, That we deprecate all attempts to commit the Democratic party to a system of paper-money, based upon an unconstitutional exercise of Federal power, as a crime against the common welfare, and in violation of a cardinal article of the Democratic creed.

The Republican party assembled in State Convention at Kearney Junction, on September 15th. The nominations of candidates for Justices of the Supreme Court were George B. Lake, Daniel Gantt, and Samuel Maxwell.

At the general election of October 12, 1875, the new State constitution and the two independent articles were adopted by very great though unequal majorities; the vote, as officially canvassed and announced, having stood thus: On the new constitution, 80,902 for, 5,474 against; on the proposition allowing electors to express their preference for United States Senator, 25,059 for, 6,270 against; on the seat of government, 20,042 for, 12,517 against.

The election of judges and Regents of the State University resulted in favor of the Republican candidates, the vote having been as follows: For the three Judges of the Supreme Court, George B. Lake, Daniel Gantt, and Samuel Maxwell, nominees of the Republican Convention, received 81,226, 29,072, and 27,767 votes, respectively; while E. W. Thomas, the only nominee of the Democratic Convention for Judge of the Supreme Court, received 15,091 votes; for Regents of the State University the number of votes given to the six Democratic candidates in their several districts ranged from 11,684, the lowest, to 13,947, the highest; and the votes given to the Republican candidates ranged from 27,053 to 29,744.

The financial condition of Nebraska appears to be remarkably prosperous. Upon a request by the Constitutional Convention, the State Auditor transmitted to that body the following "statement of the indebtedness and resources of the State of Nebraska, to May 21, 1875:"

GENERAL FUND.

Certificate of indebtedness held by the Permanent School Fund, dated March 10, 1873—issued under provision of an act approved February 27, 1873.....	\$138,397 67
Certificates of indebtedness held by the Permanent School Fund, dated May 21, 1874—issued under an act for the relief of the State Treasury, approved February 21, 1875.....	194,129 62
Warrants outstanding to May 21, 1875, \$64,559.55—interest on warrants registered, \$3,000—less amount of warrants paid from the 1st to the 21st of May, \$15,588.96.....	74,000 59
Warrants held in the Permanent University Fund.....	596 00
Total indebtedness.....	\$407,126 28

RESOURCES.

Cash in State Treasury, held in trust for notified holders of registered warrants.....	\$4,953 15
Delinquent State taxes, as per last report, \$198,115 79—tax of 1874, now due, \$200,995.77, less taxes paid from date of last report, November 30th, 1874, to May 21, 1875, inclusive, \$88,306.99.....	300,907 60
Total resources.....	\$305,760 75

STATE BUILDING FUND.

Warrants outstanding.....	\$48,812 19
Interest on warrants registered.....	19,976 87
Total indebtedness.....	\$68,789 56

The report of the State Superintendent of Public Instruction, dated December 26, 1874, states the number of children of school age in the State to be 72,991, and the whole amount of school-moneys in the hands of the State Treasurer, and subject to apportionment on December 19, 1874, to have been \$184,758.76. All of this sum, except \$3.65, was then distributed among the several counties in proportion to their respective number of children, the rate of apportionment having been a little more than two dollars and a half for each scholar. The school-moneys were derived from the following sources:

Private securities.....	\$2,810 00
Unpaid principal, school-lands.....	52,547 84
Rent of school-lands.....	13,268 67
Two-mill tax.....	102,487 08
Other sources.....	14,198 10
Fractional remainder.....	6 22
Total.....	\$184,762 41

The crops of Nebraska in 1875, though deficient in some localities, were generally reported fair, and considered on the whole as rather exceeding an average crop.

To help in supplying the wants of a large number of people inhabiting the sections devastated by the locusts in 1874, several prominent citizens of Nebraska formed themselves into a body called "The Nebraska State Aid and Relief Society," whose object it was to solicit, from all benevolent people in the State and abroad, contributions in money as well as food or clothing, and distribute them where most needed among the sufferers. Their appeal was liberally responded to by individuals as well as corporate bodies of Nebraska and other States. From the reports of the proper officers, it appears that the total of the operations of the society covered about half a million dollars. The whole number of cars of provisions and supplies of all sorts, moved by the society, was nine hundred and fifty. The value of supplies sent into the State from all sources was estimated at from \$350,000 to \$400,000. The donations in money which came into the hands of the society amounted to \$67,612.31; of which sum \$67,147.25 had been disbursed.

The following is a complete and correct ab-

stract of census returns of Nebraska for 1875 as far as returned. When no returns were made, estimates were made by adding a fraction less than 9 per cent., which is the gain for the State over 1874:

Counties.	Population.	Counties.	Population.
Adams.....	3,093	Keith.....	124
Antelope.....	1,239	Knox.....	1,524
Boone.....	966	Lancaster.....	15,324

NETHERLANDS, THE, a kingdom in Europe. King, William III., born February 19, 1817; succeeded his father, March 17, 1849; sons: 1, William, Prince of Orange, and heir-apparent to the throne, born September 4, 1840; 2, Alexander, born August 25, 1851; brother of the King, Henry, governor of the grand-duchy of Luxemburg. The area of the kingdom is 12,679 square miles.*

The population was, in December, 1874, officially estimated at 3,767,263. The following table gives the population of the several provinces, and the percentage of Protestants and Catholics, leaving out of account the Israelites and the minor sects:

PROVINCES.	PERCENTAGE IN 1869 OF		Population, 1874.
	Protestants.	Catholics.	
Brabant.....	11.6	87.9	447,682
Gelderland.....	62.0	36.3	445,490
South Holland.....	78.8	24.6	735,315
North Holland.....	66.3	27.5	620,890
Zealand.....	73.5	25.9	154,215
Utrecht.....	62.1	37.0	151,957

{ Amboina.....	94,745
Islands { Banda.....	155,468
Timor.....	Unknown
Ball, Lombok.....	79,574
New Guinea.....	Unknown
2. POPULATION OF THE DUTCH COLONIES IN THE WEST INDIES.....	89,150
Curaçoa Island.....	22,718
Aruba.....	5,898
Bonaire, St. Martin, Saba and St. Eustache Islands.....	11,044
3. SURINAM.....	69,884
Total.....	25,108,984

The foreign population of the colonies in 1873 included 18,245 Europeans in the army; 84,065 other Europeans (27,009 in Java and Madura); 1,252 descendants of Europeans; 295,406 Chinese; 12,948 Arabs; and 19,582 Hindoos.

The population of the principal cities was as follows: Batavia, 65,000; Surabaya, 90,000; Samarang, 50,000; Surakarta, 50,000; Djocjokarta, 45,000.

Education is provided for by a non-denominational primary instruction law, passed in 1857. Under its working there were in January, 1871, according to Government returns, 2,608 public schools, with 6,538 schoolmasters and 477 schoolmistresses, and 1,119 private schools, with 2,832 schoolmasters and 1,565 schoolmistresses. At the same date the pupils in the public schools numbered 390,129 (217,827 boys, and 72,302 girls), and the pupils in the private schools 111,762 (50,388 boys and 61,374 girls). The teachers appointed under the law of 1857 are superintended by 94 district-school inspectors, who act under 11 provincial superintendents. The inspectors grant

licenses for the establishment of schools, and present to the Government, three times a year, an account of the state of the public instruction. In 81 schools of ordinary instruction, and 55 Latin schools, with 7,047 and 1,128 pupils respectively in 1871, a higher instruction is imparted than provided for in the primary schools. The three Universities of Leyden, Groningen, and Utrecht, had 1,839 students in January, 1871, and the Polytechnical School at Delft, 171 pupils. The ecclesiastical training-schools comprise five Roman Catholic and three Protestant seminaries. The proportion of attendance in the schools for primary instruction is one in eight of the entire population of the kingdom.

The system, although it has produced good results, each annual report showing a decreasing per cent. of untaught children and illiterates, has been for some time the subject of bitter attacks from the Orthodox Protestants and Catholics. Dr. Knyper, the leader of the Orthodox Protestants, during the past year, published a plan for paying back to the "clericals" taxes collected for school purposes, and this plan is supported by both Catholics and Protestants. As in the public schools no religion is taught, both parties demand their school-taxes refunded, that they may support schools consistent with their creed.

In the budget for the year 1875 the expenditures and revenue are estimated as follows:

EXPENDITURES.	Florins.
1. Royal house.....	736,000
2. Cabinet; supreme state authorities.....	209,500
3. Ministry of Foreign Affairs.....	608,700
4. " of Justice.....	2,500,000

Amortization		574,300
Total debt, 1875.....	936,638,926	27,163,849
Total debt, 1874.....	937,090,076	27,100,880

The army of the Netherlands in Europe consisted, in 1875, of 2,057 officers and 60,014 men; the East Indian army numbered 1,342 officers and 29,803 men.

The navy of the Netherlands, on July 1, 1875, consisted of 88 steamers, with 474 guns, and 27 sailing-vessels, with 195 guns: total, 115 vessels, with 669 guns.

The merchant navy, on December 31, 1874,

consisted of 1,747 sailing-vessels, of 440,880 tons, and 80 steamers, of 71,102 tons: total, 1,827 vessels, of 511,982 tons.

The aggregate length of railroads in operation was, on January 1, 1875, 1,586 kilometres (1 kilometre equals 0.62 English mile).

The aggregate length of the state telegraph lines was on January 1, 1875, 34,811 kilometres; the aggregate length of the wires, 12,865.4 kilometres.

On April 5th the First Chamber passed a bill providing for the amortization of 10,000,000 florins of the public debt. On April 22d the Government brought in a bill in the Second Chamber, providing for the resumption of gold coin by July 1, 1875. It also provides for the coining of gold-pieces of five and ten florins, and prohibits the issuing of silver coins on private account before 1877. The bill was adopted by the Second Chamber May 27th, and concurred in by the First Chamber on June 4th.

On April 25th General Weitzel resigned his position as Secretary of War, and was replaced by Colonel Enderlein of the Engineer Corps.

The imports and exports, in 1872 and 1873, were valued as follows (value expressed in florins):

COUNTRIES.	IMPORTS.		EXPORTS.	
	1872.	1873.	1872.	1873.
Great Britain.....	219,763,000	247,348,000	108,876,000	115,304,000
Zellverein.....	112,921,000	181,180,000	300,668,000	229,566,000

The most important articles of import and export of the Netherlands are given in the following table:

ARTICLES.	Imports.	Exports.
Cereals.....	72,700,000	22,500,000
Seeds, fruits.....	15,600,000	17,200,000
Colonial produce.....	59,500,000	69,200,000
Tobacco.....	6,800,000	2,500,000
Beverages.....	7,000,000	42,800,000
Animals and animal provisions	4,700,000	8,700,000
a. Provisions, etc.....	195,800,000	168,900,000
Combustibles.....	20,500,000	2,800,000
Ores, stones.....	36,400,000	7,700,000
Raw metals.....	57,200,000	44,400,000
Wood, cork.....	27,400,000	16,900,000
Materials for spinning.....	45,000,000	43,100,000
Hides, leather.....	12,800,000	4,700,000
b. Raw materials.....	199,100,000	126,100,000
Pottery, glass-ware.....	1,600,000	2,800,000
Yarns.....	43,400,000	25,800,000
Textures.....	84,200,000	84,500,000
Paper.....	1,400,000	2,600,000
Goods from other materials..	46,800,000	28,200,000
c. Manufactured articles..	126,900,000	88,400,000
Manure, waste.....	3,800,000	1,500,000
Drugs, chemicals, and color- ing materials.....	75,200,000	60,400,000
Resins, oils, greases.....	34,600,000	32,800,000
Other commodities.....	28,600,000	84,500,000
d. Miscellaneous.....	141,700,000	126,100,000
e. Precious metals.....	18,600,000	15,200,000
Total.....	682,100,000	514,600,000

The biennial elections for members of the Second Chamber took place on June 8th, in accordance with the constitution of the Netherlands, which provides that this body shall be renewed every alternate year, by the election of one-half of its members. Since the election of 1878 it was equally divided between the Liberals on one side, and Conservatives, Orthodox Protestants, and Catholics, on the other. The Orthodox Protestants and Catholics, though differing essentially on religious dogmas generally, are united in an effort to change the system of primary instruction. The result made the political complexion of the present Chamber as follows: 42 Liberals, 10 Conservatives, 12 Anti-Revolutionists, and 16 Ultramontanes, giving to the Liberals a very small majority over all the other parties combined.

The new States-General was opened by the King on September 20th. The King, in the speech from the throne, stated that the relations of the Netherlands with foreign powers continued to be very friendly. The condition of the country was prosperous. Bills would be introduced by Government for the definitive organization of the monetary system, the modification of the excise duty on sugar and on the import duties, the reform of the system of military training, the energetic prosecution of the system of national defense, and the amelioration of the condition of the forces in the colonies. "The war in Acheen," the King continued, "has not yet had a satisfactory result, but I am confident that the energetic efforts being made will shortly attain the end we have in view." The royal speech alluded,

in conclusion, to the unfavorable influence upon the colony of Curaçoa of the difficulties arising from the constantly disturbed state of Venezuela, and the King hoped that the pending negotiations for the removal of these difficulties would be successful.

On September 24th the First Chamber passed a vote of censure against the Government. The Dutch Rhine Railroad Company, upon receiving its concession some fifteen years ago, agreed and gave bonds to make connection with the Rotterdam and Amsterdam line. This agreement it succeeded in evading up to the present time, and during the month of September it entered into a new agreement with M. Heemakirk, the Minister of the Interior, by which it was relieved from the obligation, and had its bonds returned. The resolution censuring the Government for this transaction was passed by a vote of 23 to 12.

The war with Acheen continued during the year. In the early part of January, the Dutch took nine forts near Longbattah. Their loss was 21 dead and 65 wounded, while the enemy lost 175 killed. Soon after the Rajah of Pedir offered submission to the Dutch. Another fort in the north of Longbattah was taken, subsequently, without any loss. In March the Dutch took possession of two points to the east of Lenboeng. In the same month the new Rajah of Pasangan acknowledged the sovereignty of the Netherlands, which was also recognized by the port of Ediketzi, where the blockade was consequently raised. In April, Pedava Besar, on the northeastern coast, recognized the sovereignty of the Dutch. In May the Achinese elected a new Sultan. The name of the new ruler is Tookoe David. On September 7th a severe fight took place south of Longbattah, in which the Dutch had five killed and five wounded, while the natives lost a considerable number. Official dispatches of December 26th and 31st stated that the Government troops had taken several positions of the Achinese, without suffering any great loss. The results achieved during the year in Sumatra were very favorable to the Government. Although very few engagements with the natives took place, the Dutch extended their supremacy over the tribes of the coast, and fresh submissions occurred quite frequently. The health of the troops also was considerably improved. While they had suffered much from the cholera during the former years, this disease had pretty much disappeared during the past year. From a communication from the Colonial Minister to the Second Chamber, it appeared that the army in Acheen had been increased from April, 1874, to April, 1875, from 3,914 to 6,010 men. In 1873, 4,389 men were sent to India; in 1874, 1,819; and from January to May, 1875, 1,395 men.

A serious difficulty with Venezuela arose at the end of the year 1874, and remained unsettled in December, 1875. The President of Venezuela, Jesus M. Blanco, in June, 1875, in-

formed the foreign governments that he had appealed to the King of the Netherlands, claiming indemnity for the expenses which it was obliged to incur to reestablish peace, disturbed in the republic by the last rebellion, promoted, organized, and sustained by Dutch subjects living on the island of Curaçoa, and asking the King, moreover, to direct measures to prevent the tranquillity of Venezuela from being at the mercy of some few speculators of Curaçoa. The President, at the same time, solicited the good offices of friendly governments in this affair, and to that end submitted a memorandum or recapitulation of the facts and reasons on which the Venezuela claim was founded. The Dutch Government emphatically denied the charges made by Venezuela. It stated that the first news of the Venezuela rebellion at Coro reached the authorities at Curaçoa October 26, 1874, and that on the next day the Governor prohibited the export of all munitions of war. It was also urged that the proofs of facts brought forward consisted chiefly of declarations, not sworn to, of persons mostly Venezuelans, made before the authorities of Venezuela, without the presence of any Netherlands authority. The Government of the Netherlands refused to enter into negotiations until Venezuela restored the Dutch ship *Midas*, which she had seized, and agreed to reopen her ports to Dutch commerce. Venezuela eventually agreed to restore the *Midas*, but desired the withdrawal by Holland of the second condition. Holland not having acceded to these terms within three days, diplomatic relations between the two countries were ruptured. On October 2d the Venezuela minister plenipotentiary left the Hague for Brussels, and the Dutch representative at Caracas was also recalled.

The third centennial celebration of the University of Leyden took place on February 7th. It was attended by the King and Queen, the Princes Frederick and Alexander, the Prince and Princess of Wied, and a large number of deputations from learned and art corporations, at home and abroad. The address was delivered by Prof. Hyensius. After the celebration the King gave a reception in the large hall of the university. On this occasion the university promoted a large number of persons to honorary degrees, among whom were Prof. Jewett, of Oxford, Doctor of Theology; Prof. Coyley of Cambridge, Huggins of London, Prescott and Joule of Manchester, Newcomb of Washington, and Odling of Oxford, Doctors of Mathematics; Prof. Darwin, of London, and Spencer Wells, of London, Doctors of Philosophy.

In August the International Law Conference was held at the Hague. It resolved to adopt, with a few modifications, the principles laid down at Geneva, Brussels, and Washington, and declared itself in favor of the principle that freighted merchant-ships, which do not take

any part in a war, shall only be captured if they have contraband goods on board or if they attempt to run the blockade. An International Committee was nominated by the Conference to frame an International Code or *Projet de Loi*, to be laid before the Conference next year. The members of this committee are: For Austria, Dr. Jaques; Belgium, M. Guillery; Denmark, Prof. Klein; England, Sir Travers Twiss; France, M. Massé; Italy, Signor Vidari; Russia, Prof. Breverer; Spain, Señor Costieri; Switzerland, Prof. Koenig. The committee has power to add to its numbers, and the United States, Sweden, and Portugal, will be at once represented. Each representative has to form a sub-committee for the respective countries. In May, 1876, the members of the committee are to meet at Brussels, to settle the draught of a *Projet de Loi*, which will be translated into French and German, and copies sent to the chambers of commerce, to jurists, and men of note, in the different countries of Europe and America.

On October 5th the twenty-fifth anniversary of the rule of Prince Henry, the Governor of Luxemburg, was celebrated. The Emperor of Germany, the King of Belgium, the Grand-duke of Saxe-Weimar, and President MacMahon, were represented at the celebration by special deputies. Besides these, a large number of other prominent persons were present.

An immense undertaking, which would give to Holland a new province, has been for several years under consideration. It is intended to drain the Zuyder Zee, an area of about 650 square miles. The Dutch are certainly the people best qualified to undertake this work. Since the earliest times they have always been at war with the ocean. The Zuyder Zee was, at the time of the Romans, dry land, and was covered by the ocean in 1282. It is very shallow. Alongside of channels of a depth of fifteen to twenty feet there are sand-banks of considerable extent, on which the water is not more than three or four feet deep. The draining of the Harlem Sea, from 1840 to 1853, gained for the Dutch about seventy square miles, on which there are now living over 7,000 persons. As early as 1849 the engineer, Van Diggelen, had prepared a plan of drainage, which, however, was rejected as impracticable. In 1865 M. Bochrussen, the former Governor-General of India, caused M. Beyerinck, who had conducted the drainage of the Harlem Sea, to prepare a plan by which to drain the southern part of the Zuyder Zee. The result was very satisfactory. The matter was next taken in hand by M. Hemskeerk, Minister of the Interior, who appointed a committee of eleven to examine into the feasibility of the plan; and in April, 1873, the committee, by a large majority, declared it possible and desirable. A sum was then granted by the Chambers to complete the preliminary work.

NEVADA. The results of the State census, taken in 1875, were as follows:

COUNTIES.	WHITE.		COLORED.		CHINESE.		1875.	1876.	GAIN.	LOSS.

The present State officers are as follows: Governor, Louis R. Bradley, Democrat; Lieutenant-Governor, Jewett Adams, Democrat; Attorney-General, John R. Kittrell, Democrat; Secretary of State, James D. Minor, Republican; Controller, W. W. Hobart, Republican; Treasurer, Jerry Schooling, Democrat; Surveyor, General John Day, Republican; Superintendent of Public Instruction, S. P. Kelly, Republican.

The Legislature is classified as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans.....	17	83	49
Democrats.....	7	15	22
Independents.....	1	8	4
Republican majority.....	9	14	23

Prof. R. E. Rogers has made to H. R. Linderman, Director of the United States Mint, a report, dated November 15, 1875, of the Consolidated Virginia and California mines on the famous Comstock Lode, at Virginia City. Prof. Rogers explored the mines during two prolonged visits, and made a careful and laborious investigation, in which all the galleries and cross-outs on the different accessible "levels" were critically inspected, with reference to the body of ore that might be within view, and its appearance in point of quality. According to the description given by Prof. Rogers—

The surface of the whole country around Virginia City is rough, broken, and hilly. At this immediate locality there is a long, lofty range extension of the Washoe Mountains, at places many hundred feet in elevation above the plain, whose steep slope to the valley below faces toward the east, and whose general trend is north and south. About midway up the slope the croppings of the ore of these and many other mines of the lode are visible.

The first excavations which were made in the early workings here were upon these croppings, but in due time it was discovered that the ore-body dipped toward the east in a measure parallel with the surface of the mountain-side, though having no physical nor geological relation to that superficial outline. As a consequence of this discovery the present shaft, known as that of the Consolidated Virginia mine, was sunk at a point down the slope many hundred feet to the east of its outcropping.

It is from this shaft that all the ore from the Consolidated Virginia and the California mines has been lifted, until the recent fire, which destroyed the hoisting-machinery.

The slope of the ore-body of these mines is from 40° to 47° toward the east, and its trend or line of length is nearly north and south, or in the direction of the line of the containing mountain-like range.

This being the relative position of the vertical shaft to the sloping body of ore, it is evident that no ore would be looked for in the descent until several hundred feet had been reached. In point of fact 1,300 feet of rock were passed through before any horizontal drifting was done to intercept the ore.

Ore of profitable richness having been met with at this level (the 1,300-foot level, as it is called), the shaft was sunk to the depth of one hundred feet more, and a similar horizontal drift run in to test the continuance of the ore. Finding that the ore-body on this (the 1,400-foot) level was undiminished in abundance, and richer than that on the 1,300-foot level, the shaft was carried down a second hundred feet, with a view to explore a 1,500-foot level; and finally, under the encouragement afforded in every successive foot of descent, a double "winze" has been put down recently in the California mine to a depth of 110 feet below the 1,550-foot level.

The shafts having been sunk successively to the depths here indicated, the principle adopted for exploring and probing the extent of ore on each level was to run galleries and cross-cuts.

The Consolidated Virginia and the California are two mines, belonging to two companies but under one management. In both the ore is of the same character; the east and west walls of both are identical. The claim of the Consolidated Virginia mine is 710 feet long, and that of the California mine is 600 feet. The explored width of the ore-mass on the 1,500-foot level averages 250 feet. The west boundary-wall is that of the mountain-rock *syenite*. The east boundary, which can be scarcely termed a wall, is ferruginous clay. The ore-body itself consists of a semi-crystalline, somewhat granular matrix of quartz, sometimes compact, but more commonly friable and easily crushed, crossed and coated over with whitish clay, containing the precious metals, associated with several of the base metals and a variety of other substances. The nodular and rocky masses scattered through the lode—at times of magnitude to form what

is termed a "horse"—is a potash feldspar, and named by the miners porphyry. In the language of Prof. Rogers the following may be stated as the composition of the ore-mass:

Quartz, the largest constituent, constituting the matrix or "gangue."
Gold, metallic.
Silver, metallic.
Silver-glance, or sulphite of silver.
Polybasite (silver, copper, iron, zinc, antimony, arsenic, sulphur).
Stephenite (silver, copper, iron, antimony, sulphur).
Blende (zinc, sulphur).
Galena (silver, lead, sulphur).
Horn silver in small amount (silver chloride).
Alumina (as clay).
Carbonate of lime.
Sulphate of lime.

In this ore the gold is in the metallic state. The silver is metallic, and also sulphide and chloride, and likewise in the complex mineral forms above named.

The iron, copper, lead, zinc, antimony, and arsenic, are in a condition of combination with sulphur as sulphides of those metals.

The silica and clay are simply in mechanical association with the above.

At the works of the mines, as well as at the mills, all the ore delivered is sampled as fairly as possible, that the averages may be obtained for assays, for the purpose of adjusting the accounts between the mines and the mills.

With the data in our possession, and the maps before us, I may venture upon the following calculations, and estimate the total ultimate product of the gold and silver of the ore-body of these two mines:

On an inspection of the official surveys exhibiting the galleries and cross-cuts, it would seem fair to conclude that, with proper allowances, the ore-body equals an amount which, taken at the actual assays, would give, as the ultimate yield of the two mines, \$300,000,000; but to guard against a chance of over-estimating, I take the assays at one-half that ascertained, which will place the production at not less than \$150,000,000.

With a view to make due allowance for interruptions to the continuity of the body of ore which lies between the 1,500 and 1,400 feet levels, the whole of the ore contained between the 1,400 and 1,300 feet levels is thrown in, and not embraced in the estimate. It may also be stated that the very promising ore developments below the 1,550-foot level, the assays of which run very high, have also been omitted in the calculations.

In a report made in March to Director Linderman, Prof. Schirmer, of the Denver mine, estimated that the probable production of the Comstock Lode for 1875 would amount to \$35,000,000, and for 1876 to \$50,000,000; and that the yield of the Consolidated Virginia and California mines alone would be at the rate of \$3,000,000 a month with the completion of the additional machinery in process of construction. The Belcher, Crown Point, and Consolidated Virginia, the three great mines of the Comstock Lode, have yielded during the forty-eight months ending March 31, 1875, \$56,233,479. Prof. Schirmer's estimates of the yield of the Comstock Lode will increase the annual bullion product of the United States for this year to \$85,000,000, and for the next year to \$100,000,000. The bullion yielded by the Comstock is known to commerce as "dore silver," or silver containing sufficient gold to defray the ex-

pense of separating the metals. Its average weight is about nine-tenths, and its value about sixty per cent. silver. The weight of the bullion to be dissolved in acid in order to separate the two metals will be about 1,000 tons per annum, and will consume about 3,000 tons of acid.

The Consolidated Virginia is composed of two mines—the Sides, 500 feet, and the White & Murphy, 210 feet, in all 710 feet in length along the lead, the width being as far as it extends each way, the distance not having yet been determined, as the walls of the mine have not been found. The two companies named were organized separately in 1859. Their mines were worked with varying success till about 1872, to the depth of 500 feet. The stock was on the market at that time, and four men bought the majority of shares, and the mines were consolidated under the name they now bear. The four men who bought the controlling interest and yet hold it are John W. Mackay, James C. Flood, James G. Fair, and W. S. O'Brien. The firm in Virginia City is known as Mackay, Fair & Co., and in San Francisco as Flood & O'Brien.

The stock of the Consolidated Virginia consists of 108,000 shares, par value \$100 each. Its market value is from \$340 to \$360 a share. Of these 108,000 shares, Mackay, Flood, Fair, and O'Brien, own 62,000. Between 3,000 and 4,000 men are employed in the Consolidated Virginia.

NEW BRUNSWICK. The population and land area by counties are as follows:

COUNTIES.	Area, Acres.	POPULATION.	
		1861.	1871.
St. John.....	374,810	48,922	52,120
Charlotte.....	547,000	23,663	25,882

Total.....	17,893,410	252,047	285,594

The chief executive officer is the Lieutenant-Governor, appointed by the Governor-General of the Dominion in Council for five years, assisted by an Executive Council of nine members (President of the Council, Secretary and Receiver-General, Attorney-General, Chief Commissioner of Public Works, Surveyor-General, and four without office), appointed by himself and responsible to the Assembly. The legislative authority is exercised by a Legislative Council of fifteen members, appointed by the Lieutenant-Governor in Council for life, and a House of Assembly of forty-one members elected by districts. Voting is by ballot, and a small property qualification is required for

voters, who must also be male British subjects and twenty-one years of age. The judicial power is vested in a Supreme Court, consisting of a Chief-Justice and four Associate Justices, who hold circuit courts in each county, county and probate courts, and justices of the peace. The court of divorce and matrimonial causes is held by a single judge, and there are a Vice-Admiralty Court with a judge and deputy judge, and a court for the trial and punishment of piracy and other offenses on the high-seas, consisting of the Lieutenant-Governor, Judges of the Supreme Court, and other officials. The Provincial Lunatic Asylum at St. John has about two hundred and fifty inmates. The latest financial statement is as follows:

Balance in the Treasury on October 31, 1873, \$151,400.88; receipts for the year 1873-'74, \$591,464.59, including \$516,155 from the Dominion Government; expenditures, \$589,793.61, including \$12,749 for agriculture, \$60,607 for executive, legislative, and judicial departments, \$22,000 for immigration, \$25,000 for Lunatic Asylum, \$7,208 for public health, \$10,587 for public printing, \$201,264 for roads, \$8,844 for university, \$20,000 for bridges, and \$19,000 for steam-navigation; balance in Treasury October 31, 1874, \$153,071.86.

The religious statistics, according to the census of 1871, are as follows:

DENOMINATIONS.	Number of Adherents.	Churches.	Buildings.
Baptists.....	70,597	226	293
Episcopalians.....	45,481	115	150
Methodists.....	29,556	118	186
Presbyterians.....	83,562	50	87
Roman Catholics.....	96,016	108	161
Other denominations....	4,792	19	23
Total.....	285,594	656	795

A system of free public schools was established by an act of 1871. These schools are under the general supervision of a Chief Superintendent of Education for the province, with a county inspector for each county and boards of trustees for the several districts, and are supported by a provincial grant and a county tax equal to thirty cents per head, supplemented by a local tax, which includes a poll-tax of one dollar per head. The expenditures from the provincial Treasury for school purposes during the year ending April 30, 1874, were \$122,067.69. The number of schools in operation during the summer term ending October 31, 1874, was 1,049, with 1,077 teachers and 45,539 pupils; number in attendance some portion of the year ending on that date, 60,467; number of school-districts, 1,392; number of schoolhouses, 1,050.

There is a Provincial Training and Model School at Fredericton. The most important higher institutions of learning are the University of New Brunswick at Fredericton, Mount Allison Wesleyan College at Sackville, and St. Joseph's College at Memramcook. There are 455 miles of railroad in operation in

the province. The following table exhibits the yield of the fisheries in 1874:

Codfish.....	98,855 cwt.	\$490,183 75
Herrings.....	100,876 bbls.	404,504 00

Total.....		\$2,655,733 51

NEWFOUNDLAND, the only British North American colony not included in the Dominion of Canada, comprises the island of the same name, and the coast of Labrador from Blanc Sablon Bay (latitude 51° 25' north, longitude 57° 9' west), at the western entrance of the Strait of Belle Isle to Cape Chudleigh (latitude 60° 37' north, longitude 65° west), at the eastern entrance of Hudson Strait, a distance of 800 miles. The island lies at the mouth of the Gulf of St. Lawrence, between latitudes 46° 37' and 51° 40' north, and longitudes 52° 40' and 59° 31' west, and is separated from Labrador on the northwest by the Strait of Belle Isle, 12 miles wide. Its length north and south, near the fifty-sixth meridian, is 325 miles, and near the fifty-fourth meridian 180 miles; its width varies from about 45 miles north of the fiftieth parallel to 310 miles between Cape Ray and St. John's; area, 40,200 square miles. The portion extending north from Cape St. John on the northeast coast around the northern extremity of the island, and thence south to Cape Ray, a distance of about 450 miles, which the French under treaties have the right to fish, is known as the "French Shore;" the remainder, extending from Cape Ray east and north to Cape St. John, a distance of about 610 miles, is divided into electoral districts or divisions, each returning one or more members to the Assembly. The population nowhere extends far inland, and the greater portion of the inhabitants are settled on the peninsula of Avalon and in the adjacent districts at the southeastern extremity of the island. The permanent population in 1768 was about 7,500; in 1804, 20,000; since which time it has increased rapidly. The number of inhabitants in 1836 was 75,096; in 1845, 96,606; in 1857, 124,288. The inhabitants are chiefly immigrants, or the descendants of immigrants, from England and Ireland. The aborigines of Newfoundland, who called themselves Beothks, and

painted themselves with red ochre against the bites of mosquitoes, whence they were called Red Indians by the settlers, are supposed to have become extinct, or, should any exist, have retired into the remotest parts of Labrador. There are a few Micmac Indians from New Brunswick in the island.

The population by districts, according to the censuses of 1869 and 1874, except one section of the district of Twillingate and Fogo, for which no return was made in 1874, is as follows:

DISTRICTS.	POPULATION.	
	1874.	1869.
ELECTORAL.

Total population.....	159,986	146,586

Adding the estimated population of the missing section (1,469), the entire population of the colony in 1874 becomes 161,455. Of the inhabitants enumerated in 1874, 59,057 belonged to the Church of England; 64,018 to the Church of Rome; 35,099 to the Wesleyan Church; 470 to the Scotch Kirk; 697 to the Free Kirk; 480 were Congregationalists, and 165 Baptists and of other denominations. In 1869 there were 78,547 males, and 70,989 females. The places having more than 1,000 inhabitants, according to the census of 1869, are as follows: St. John's, 22,553; Harbor Grace, 6,770; Carbonear, 4,556; Twillingate, 2,786; Bonavista, 2,617; Bay Roberts, 2,459; Burin, 2,077; Brigus, 1,876; Torbay, 1,281; Greenspond and Pondhead, 1,073. The island is rugged, and for the most part barren. The interior is an undulating plateau, interspersed at intervals of a few miles with low hills or ridges, marshes, and lakes. The coast is for the most part precipitous and lofty, and is broken into numerous headlands and peninsulas by deep bays, which in turn are indented by innumerable smaller inlets. The sinuosities measure several thousand miles. The west coast is the most regular. The interior of the island is so thickly strewed with lakes and ponds that it is estimated that a third of the surface is covered with water. Building-stones, including granite, sandstone, and limestone, are abundant in the

island. Marble of various kinds occurs on Bay of Islands, and the fossiliferous limestone of Topsail Head on Conception Bay takes a high polish, and furnishes a handsome variegated marble. Gypsum is profusely distributed in the vicinity of the Codroy Rivers, and elsewhere in the southwest part of the island, and bituminous coal is found in the carboniferous formation, where also brine-springs frequently occur. Iron, copper, lead, and nickel ores have been found. A lead-mine was for some time worked at La Manche, at the head of Placentia Bay, but with little success, although the lode is a most promising one. Copper-mines have been opened at several points; but, with the exception of that at Tilt Cove on Notre-Dame Bay, they have nearly all been discontinued. The Tilt Cove mine has been in successful operation since 1865, and, in the five years from 1869 to 1873 inclusive, 22,404 tons of ore were exported. A vein of nickel has been discovered here, and a small quantity of ore has been extracted.

In the interior, so far as known, the summits, and sometimes the sides of the hills and ridges, are thinly covered with a stunted vegetation, consisting of berry-plants and dwarf bushes of various species, and are called the "Barrens." The sides of those hills that afford natural drainage, and the borders of the lakes and rivers, are clothed with forests, consisting chiefly of fir, birch, pine, juniper, larch, witch-hazel, mountain-ash, alder, aspen, and spruce. These trees are generally small and stunted, though the fir and birch sometimes attain considerable size. The largest and finest timber is in the valleys of the Humber, the Exploits, the Gander, and the Gambo, where the pine and spruce are of the finest description. All the best timber and best land is back from the coast. The ground is often covered with a creeping bush, a species of yew, called in Canada the ground-hemlock. The frequent peat marshes are covered with grasses, rushes, etc., while the other valleys and level tracts produce abundant pasturage. Much of the country is covered with lichens and reindeer-moss.

The climate, tempered on the one hand by the Gulf Stream, and on the other by the arctic current, is neither so hot in summer nor so cold in winter as on the adjacent portions of the continent. The weather is extremely variable, being often very mild in midwinter, and on the other hand raw and cold in midsummer. Dense fogs are prevalent, principally in summer, along the south and southwest shores of the island and the coast of the peninsula of Avalon, but they do not extend far inland. The north portion of the island is said to be quite free from them.

The mean temperature at St. John's, for the eight years from 1857 to 1864 inclusive, was $41\frac{1}{2}^{\circ}$, the highest annual mean being 44° in 1863, and the lowest 37° in 1864; average annual fall of rain and melted snow, 59.94 inches, the greatest fall being 82.4 inches in 1860, and the least 42 in 1857. The highest temperature

observed was 89° in July, 1857, and the lowest 14° below zero in February, 1868.

The principal crops that may be successfully cultivated are barley, oats, potatoes, turnips, cabbages, peas, beans, carrots, etc. Wheat will ripen in some places, but cannot in general be profitably cultivated. It has been tried only on the smallest possible scale, and then it succeeded. Hops thrive, and strawberries, currants, gooseberries, cherries, and some other fruits, grow in gardens, while numerous species of berries are found wild. The number of acres under cultivation in 1869 was 41,715. The chief productions were 747 bushels of wheat and barley, 11,050 of oats, 808,357 of potatoes, 17,100 of turnips, 8,857 of other root-crops, and 20,458 tons of hay. There were 3,764 horses, 13,721 horned cattle, 23,044 sheep, 19,081 swine, and 6,417 goats. Since that date considerable advance has been made in agriculture.

The fisheries are the chief wealth of the colony, employing directly or indirectly nine-tenths of the inhabitants. The number of fishermen is about 32,000. The principal fisheries, in the order of importance, are the cod, seal, herring, and salmon. The cod-fishery is pursued around the shores of the island and on the coast of Labrador, from June to October; the average annual catch is about 1,500,000 quintals. The seal-fishery begins about the first of March and terminates in May, and from 850,000 to 550,000 seals are taken yearly. The chief seats of the herring-fishery are Labrador, Bonne Bay, Bay of Islands, St. George's Bay, and Fortune Bay. In the Bay of Islands it is pursued during the winter. The average annual catch is about 175,000 barrels. The salmon-fishery is prosecuted to some extent in Labrador, but chiefly in the bays on the east coast of the island; the average quantity taken annually is about 6,500 tierces.

The average number and tonnage of vessels, and the average number of men employed in the seal-fishery, from 1870 to 1875 inclusive, have been as follows: 186 sailing-vessels, with an aggregate tonnage of 18,520 tons and 8,093 men; and 22 steamers, with an aggregate tonnage of 6,483 tons and 4,214 men: total, 208 vessels of 25,003 tons, and 12,307 men. The exports in 1873 were 468,531 skins, worth \$602,590.30, and 1,722,420 gallons of oil, worth \$874,880; in 1874, 398,366 skins, worth \$517,875.80, and 1,098,216 gallons of oil, worth \$610,120. Besides the catch by steamers and sailing-vessels, a large number of seals are taken in nets along the western and northeastern coasts of the island, and when the seals are driven upon the coast with the ice a regular *battue* takes place from the points upon which the ice may be driven; this but very rarely occurs farther south than Bonavista Bay, upon the eastern coast, but to the north of that bay thousands of seals have been taken, some springs, by the sealing (or whelping) ice having become wedged in upon the land. The number of seal-nets owned in the island is about

5,800; of these 2,018 are owned by permanent residents upon what is usually termed the French Shore.

The following table gives the exports of the principal products of the fisheries for five recent years:

YEARS.	Cod, Quintals.	Herring, Barrels.	Cod-Oil, Gallons.	Seal-Oil, Gallons.	Seal-Skins, Number.
1868.....	1,162,948	186,168	680,592	1,263,460	323,946
1869.....	1,206,441	179,440	1,224,468	1,406,180	363,621
1870.....	1,315,644	146,708	1,071,736	1,604,968	353,625
1871.....	1,222,866	187,429	1,366,552	2,143,008	387,174
1872.....	1,222,948	147,771	1,097,908	1,066,456	275,373

The commerce of Newfoundland is important. The value of exports and imports for a series of years has been as follows:

YEARS.	Imports.	Exports.
1894.....	\$612,737	\$236,659
1895.....	964,527	1,012,573
1896.....	1,067,062	1,111,380
1870.....	1,296,685	1,297,974
1871.....	1,256,172	1,316,592
1872.....	1,399,180	1,168,968
1873.....	1,406,780	1,066,486
1874.....	1,582,227	1,263,941

The number of vessels entered at the various ports in 1873 was 1,146, with an aggregate tonnage of 218,122; cleared, 987; tonnage, 193,902; belonging to the colony, 1,301; tonnage, 68,185.

Newfoundland was the last of the North American colonies to which responsible government was conceded; it was fully established, however, in 1855. The government is at present administered by a Governor, aided by a responsible Executive Council not to exceed seven members, a Legislative Council not to exceed fifteen members, and a House of Assembly of thirty-one members, elected by householders, who have occupied a dwelling-house as owner or tenant for two years immediately preceding the day of election. There are fifteen districts, or subdivisions of districts, of which six return three members; four return two members, and five return one. The number of registered electors in 1873 was 20,759. There is a property qualification for the elected; viz., property exceeding £500 in amount or value, or a net annual income of £100. The ordinary duration of the session is about three months, and it generally meets at the end of January or beginning of February.

The revenue in 1874 was \$889,602.24; expenditure, \$951,792.49; public debt, \$1,149,100.73. The revenue and expenditure for the ten previous years were as follows:

YEARS.	Revenue.	Expenditure.
1864.....	\$123,136	\$177,006
1865.....	180,447	184,064
1866.....	150,839	189,251
1867.....	181,820	146,971
1868.....	179,841	178,429
1869.....	111,231	108,404
1870.....	189,299	147,544
1871.....	164,908	120,761
1872.....	177,042	172,689
1873.....	174,915	205,285

The following is a statement of the business at the General Post-Office, St. John's, for the year 1873: Letters received and dispatched, 348,698; registered, received and dispatched, 2,719; newspapers, over 1,000,000, besides books and magazines.

The amount expended by the Government for educational purposes in 1872 was \$71,290.24; in 1873, \$73,515.62. The statistics of common schools for the last three years are as follows:

YEARS.	ROMAN CATHOLIC SCHOOLS.		PROTESTANT SCHOOLS.	
	Number.	Pupils.	Number.	Pupils.
1872.....	126	8,097	191	11,201
1873.....	127	8,100	195	11,149
1874.....	186	8,792	187	7,903

Besides these there are grammar-schools at Harbor Grace and Carbonear; an Episcopal, a Wesleyan Methodist, and a general Protestant academy, at St. John's; and at the same place an Episcopal Theological Institute and St. Bonaventure College (Catholic).

The question of joining the Dominion of Canada as a province has several times come before the people of Newfoundland at elections for members of Assembly, but the proposition has been voted down by large majorities.

St. John's, the capital and commercial metropolis of Newfoundland, and the easternmost town in North America, is situated in the southeast part of the island, on the north side of a harbor of the same name on the east coast of the peninsula of Avalon, 65 miles north of Cape Race, and 18 miles south of Cape St. Francis, 550 miles east-northeast of Halifax, Nova Scotia, in latitude 47° 34' north, and longitude 52° 42' west. Its population in 1802 was 8,420; in 1836, 14,946; in 1845, about 19,000; in 1857, 24,851; in 1869, 22,553; in 1874, 23,890. The decrease in population between 1857 and 1869 was due to a considerable emigration to Canada and the United States, in consequence of several poor fishing-seasons.

The town consists of three streets nearly parallel with the harbor, and others crossing these at right angles. A fourth main street, on which are situated the Government-House, Colonial Building, skating-rinks, etc., is being rapidly built up. The streets are well drained and macadamized, and are lighted with gas. A supply of water was introduced in 1861, at a cost of \$360,000, from a large lake five miles distant, and elevated 150 feet above the highest part of the town. The principal thoroughfare stretches along the water's edge about 1½ mile, and is well built up with brick and stone. From it the wharves project into the harbor. On the other streets the houses are mostly of wood. The Government-House (residence of the Governor) is a plain structure, erected at a cost of \$240,000. The Colonial Lunatic Asylum is beautifully situated in wood-

ed grounds about three miles out of town. Other public edifices are the Colonial Building (containing the public offices and legislative halls), Custom-House, Colonial Penitentiary, Post-Office, Court-House, General Hospital, Small-Pox Hospital, Market-House, and Poor-House (in the suburbs).

The harbor is landlocked and somewhat crescent-shaped; it is deep, and has good anchorage. The entrance is through the "Narrows," a gorge between two steep and rugged cliffs, 220 yards wide and 660 yards long, with 12 fathoms of water in mid-channel. On the south one is a lighthouse, with a light 114 feet above the sea. There are also two lights in the town serving as a guide to the harbor. The harbor is 1½ mile long, and from 500 yards to a little more than half a mile wide.

The trade of the town consists chiefly in supplying the fishermen of Newfoundland with clothing, provisions, and tackle, and in exporting the products of the fisheries, chiefly cod-fish, seal-skins, and cod and seal oil, which are mostly taken to Great Britain, Spain, Portugal, and Brazil. Another important industry is the fitting out of vessels for the seal-fishery. The value of imports during 1874 was about \$6,000,000; of exports, about \$5,000,000. The number of entrances was 898, tonnage, 220,916; clearances, 724, tonnage, 195,892. About 80 per cent. of the imports and 75 per cent. of the exports of the island pass through this port.

St. John's contains two banks, a savings-bank, a marine-insurance company, and two public libraries, having together 5,000 or 6,000 volumes; and there are published here three tri-weekly, four semi-weekly, and three weekly newspapers.

NEW HAMPSHIRE. The Democratic party of this State met in State Convention at Concord on the 5th of January, 1875, for the purpose of nominating their candidates for the offices of Governor and Railroad Commissioner. The convention was very numerously attended, nearly seven hundred delegates having been present from all parts of the State.

For the office of Governor, Hiram R. Roberts, of Rollinsford, received 847 votes, and Warren F. Daniell, of Franklin, 240. Mr. Roberts was declared the nominee for Governor.

For Railroad Commissioner, Adams T. Pierce, of Claremont, received the highest number of votes, and was, on motion, nominated by acclamation.

The Committee on Resolutions then reported the following, which were adopted:

We, the Democracy of New Hampshire, in convention assembled, send greeting to our brethren in other States, and rejoice with them in the glorious result of the recent elections, presaging the deliverance of the country from the dominion of radical tyranny and corruption, under which it has suffered for the last fourteen years; reaffirming our allegiance to the Federal Constitution as the supreme law of the land, by which all powers not expressly delegated by the General Government are reserved to the States themselves and the people, we make the fol-

lowing declaration of principles as the basis of our political action:

1. Public officials to be held strictly accountable as the servants of the people, honesty and capacity being the only tests for official position.

2. No congressional usurpation, no Executive dictation, no military intimidation. The people of each State to regulate their own domestic affairs in their own way, subject only to the Constitution of the United States.

3. Economical administration and an honest currency—the only assurance of national prosperity; no more financial shams in congressional legislation. Specie payments are the demands of the people.

4. A tariff for revenue, no tax upon the masses for the aggrandizement of the few.

5. Free speech and a free press, and religious toleration and freedom in all things not inconsistent with the public good.

6. Rotation of office essential to the preservation of republican institutions; no third presidential term.

7. The public lands and the public funds the property of the whole people; no more subsidies in land or money for the benefit of individuals or corporations at the expense of the people.

8. Equal and exact justice to all; protection for the people against any and all encroachments of corporate power and capital; protection for corporations in all their chartered rights.

9. Honest legislation in State and nation the only safeguard of popular liberty; the lobby the worst enemy of free government.

10. Prohibition fails to suppress intemperance. A stringent license law, fairly enforced, is the only remedy for that growing evil.

11. *Resolved*, That the present Federal Administration, backed by the radical majority in Congress, by its persistent violation of the constitutional rights of the States and the people, and especially by its interference in the governmental affairs of the State of Louisiana to defeat the will of the people and uphold a corrupt and usurping government, and by the constant prostitution of all its powers to promote the base purposes of self-aggrandizement and partisan supremacy, has merited, as it has received, the emphatic condemnation of the people.

12. *Resolved*, That we have implicit confidence in the honesty, the capacity, and the democracy of the candidates this day nominated, and that we will spare no honest means to secure their triumphant election at the polls.

The Republicans of New Hampshire assembled in State Convention at Concord on the 12th of January, 1875. The delegates present were almost as numerous as at the Democratic Convention.

For the office of Governor, Person C. Cheney, of Manchester, received 392 votes, and was declared the nominee of the convention.

For the office of Railroad Commissioner, Charles H. Powers, of Jaffrey, received 242 votes, and was declared nominated.

The following platform was then reported from the Committee on Resolutions, and adopted by the convention:

The Republicans of New Hampshire, in annual convention assembled, hereby pledge their faith to the following platform of principles and declarations:

1. Equal civil rights and a free and honest ballot for all citizens, under the Constitution and the laws.

2. Uncompromising hostility to all forms of official venality and corruption.

3. The lowest rate of taxation compatible with a gradual payment of the public debt, and a rigidly

honest, economical, and efficient administration of all branches of the State and national Governments.

4. Unalterable opposition to the election of any man to the presidency of the United States for a third term.

5. Congratulations and thanks to those Republicans who, in the recent elections, secured the defeat of salary-grabbers and corruptionists, who had brought reproach upon the country and disgrace to themselves.

6. A State policy that shall encourage home enterprise, industry, and temperance, improve and spread the advantages of free education, and secure good wages and steady employment to labor, and a fair return to capital.

7. A financial policy based on free banking and the earliest possible resumption of specie payments, inasmuch as such resumption affords the only safe and permanent remedy for the present financial depression; and we heartily and entirely concur with the views on this subject expressed by the President in his late message, and so cogently elaborated in the accompanying report of the Secretary of the Treasury.

8. Prompt and unyielding denial by Congress of all applications for subsidies in aid of any scheme of individual or corporate aggrandizement.

9. We earnestly desire the same peace, protection, and prosperity for the people of the South that we ourselves enjoy, and we condemn all respect and mal-administration on the part of any Republican officials, whether white or black, and all lawlessness and intimidation on the part of White-Leaguers or white employers. "Let us have peace;" and we call on Congress to give peace and a republican form of government to Louisiana without further delay.

10. While we condemn the use of the military power of the nation for any purpose not clearly defined in the Constitution, we denounce the armed political organizations in some of the Southern States as the chief source of all their troubles, and particularly in Louisiana, where they have seized the arms of the State, overturned the existing government, and foully murdered thousands of innocent citizens.

11. In declaring for equal rights and specie payments in their platform, and in opposing the enactment of laws to secure equal rights and fix a date for resumption, we have renewed proof of the chronic tendency of the Democratic party to promise one thing and do another.

12. We arraign the Democratic and dominant party of this State as guilty of the following acts and misdemeanors, in reckless disregard of the fame, dignity, and welfare of the State:

It has shown a greed for office and a spirit of proscriptio that proved the insincerity of its declaration that honesty and capacity should be the sole tests for official position;

It has rearranged the councilor and senatorial districts of the State for partisan purposes, in absolute disregard of the spirit and letter of the requirements of the Constitution;

It has Gerrymandered the cities of the State, and arbitrarily ejected duly-elected officials from office, and conferred their duties upon partisans of its own appointment;

It has legislated out of office all the higher as well as nearly all the inferior judicial officers of the State;

It has discouraged the cause of education by abolishing teachers' institutes, disfranchising students, and introducing a partisan removal from and appointment to the office of State Superintendent of Public Instruction;

It has refused to enact a wholesome and needed law to secure greater purity at elections, and prevent bribery and corruption;

It has openly professed to the people a purpose to promote the cause of temperance in the State, and at the same time has secretly sought and obtained

the votes and support of those engaged in the liquor-traffic;

It has failed to enact a law that it was pledged to enact, and has neglected to enforce a law that it was sworn to enforce;

It has established a cumbersome, complicated, and expensive system of courts, by which the costs and delays of litigation are multiplied, and the right of speedy and impartial trial by jury denied;

Promising a short, useful, and economical session of the Legislature, it held the longest, worst, and most expensive session held in many years.

Failing at all points to fulfill its pledges and meet the just expectations of the people, we earnestly invite the good men of all parties to unite with us in the overthrow of a party that has again been tried and found wanting in that breadth of statesmanship and lofty purpose which put the State before party, and the people above the politicians.

13. We present the name of Person C. Cheney as our candidate for Governor, confident that his ability, experience, character, and fitness for the office of Chief Magistrate of this State will secure his triumphant election.

14. We present the name of Charles H. Powers as our candidate for Railroad Commissioner, and commend him as entirely worthy of the respect and support of his fellow-citizens.

The State Temperance Union of New Hampshire held their third annual meeting at Concord on the 12th of November, 1874. The fifth article of their constitution, providing that persons may become members of the Union by paying one dollar, and life-members by paying ten dollars, was, on motion, amended by making membership dependent only on signing the constitution.

The chairman of the Committee on Resolutions reported the following, which were adopted:

Resolved, That the experience of the past year fully convinces us that our organization is needed in New Hampshire, and, as we look back with satisfaction upon the work already accomplished, we desire to push forward with increased vigor and energy, to the end that the pure principles of total abstinence may be proclaimed in every portion of our State, and to all the inhabitants thereof, and being satisfied that the best interests of the cause require the employment of one or more efficient agents, we would recommend such appointment for the coming year.

Resolved, That we would reaffirm the declaration that temperance is a cardinal virtue, the practice of which is incumbent upon every person who would aim to attain a true manhood or womanhood, and while we recognize the fact that many individuals are the slaves of a debasing appetite, we would urge the necessity of using every proper instrumentality of an educating and reforming nature to rescue those who have fallen into the habit of drink, and also to protect the young from the temptations and allurements of the wine-cup.

Resolved, That while we regard moral suasion as a most potent means of promoting the temperance reform, and would urge the importance of kind entreaty and personal sacrifice to win men from habits of inebriation and from the wretched traffic in strong drink, we nevertheless fully indorse and uphold the principle of prohibition, and desire to place on record our heart-felt appreciation of those members of our last State Legislature who by voice and vote opposed and defeated the repeal of the prohibitory law, thus saving our State from the evils sure to flow from any scheme of license or local option.

Resolved, That while desiring, as an organization, to keep aloof from all the entanglements of party

politics, we nevertheless demand that the nominees of political parties be men whom we can consistently support, and we hereby give notice that unless our demands in this respect are complied with we will claim the right of independent action without reference to the weal or woe of the political organizations with which we usually vote.

Resolved, That we welcome the recent formation, in our State, of a Woman's Temperance League, and confidently look to that instrumentality as a great help to us in the work of our organization, and we are also pleased to observe that in some sections of our State children's temperance organizations are being formed.

Resolved, That in view of the urgent need of money to successfully prosecute the temperance work, we respectfully solicit pecuniary help from the churches, and would suggest the propriety of every church in the State classing temperance among its benevolent enterprises, and taking an annual collection in aid of the cause, and to this end we would recommend the officers of the Union to issue a circular to the churches urging compliance with this suggestion.

About the same time with the meeting of the State Temperance Union, the Woman's Temperance League, which has recently been organized in New Hampshire, assembled in convention at Concord. Nearly one hundred members were present, and continued in session two days.

The following resolutions were reported from the appropriate committee, and adopted by the convention:

Whereas, We, women of New Hampshire, believing that the sale and use of intoxicating beverages is the cause of much of the poverty and crime abounding in our State; and—

Whereas, We believe that the time has come for us to put forth individual and united efforts for their suppression: therefore—

Resolved, That we appeal to the churches, both ministry and membership, to unite their labors in an especial manner to aid in removing the curse of intemperance now resting upon us.

2. That we especially urge upon the executive officers of the State the necessity of enforcing those laws which prohibit the sale of intoxicants, and provide for the punishment of those who make or sell them.

3. That we entreat the voters of this State to remember the duty they owe to their mothers, wives, and sisters, whom they represent at the ballot-box, and put forth their efforts to purify and save society from this its greatest evil.

4. That the mothers who have convened here this afternoon, while earnestly hoping and praying that all use of intoxicating drinks may cease, make an especial appeal to every saloon-keeper, bar-tender, and all who sustain any relation to the traffic, to spare the young men, *our sons*, for whose present and future welfare we feel an anxiety that cannot be measured or expressed. In the name of God we beseech you to refuse the intoxicating cup to these dear boys, who are led into temptation!

5. That, as women and Christian workers, we pledge ourselves to labor at home and abroad, to advance and strengthen the cause of temperance.

The Liquor Prohibition party held their State Convention in Concord on the 2d of December, 1874, to nominate their candidates for the offices of Governor and Railroad Commissioner.

The resolutions reported from the Committee on Resolutions were adopted, as follows:

Whereas, The past political year has been one of unusual indications and marked changes, we are grateful for the evidence that right principles have gained many advantages in the convictions of thinking millions, and in the more distinct defining of the position of parties and policies, and we see encouragement for continued labor for the right: therefore—

Resolved, That we offer our unalterable opposition to the manufacture, importation, and sale of intoxicating liquors, to be used as a beverage.

Resolved, That all history demonstrates that licensing the sale of intoxicating liquors is not only wrong in principle, but as a means of suppressing intemperance has failed.

Resolved, That the traffic in intoxicating drinks is a wrong of such magnitude that its suppression is imperatively demanded by both national and State legislation, enforced by a vigilant Executive.

Resolved, That the liquor interests of this country being fully organized politically, supporting no man in any election who is in any way disposed toward the total-abstinence cause, all temperance men should politically unite in opposing them, remembering that in the present attitude of the temperance question there can be no neutral ground. "He that is not with us is against us."

Resolved, That the gigantic swindles and corruption with both the Democratic and Republican parties are but the natural consequences of the course pursued by both of those parties in shameless office-seeking, and in the use of bribery and other forms of corruption in carrying elections, and appointing men to office because they are office-seekers and subservient tools of party.

Resolved, That we extend our hearty thanks to those members in our last Legislature who sustained the principles of prohibition, and especially to those Democrats who, standing on their manhood, refused to obey the mandates of party drill.

Resolved, That we favor a speedy return to specie payments, and that we insist on an honest and economical administration of the Government, a large reduction both in the number and salaries of officials, a just and equal system of taxation, the most liberal educational system for the masses, and every possible encouragement to labor.

Resolved, That, believing in independent action as a political organization, we urge upon the friends of prohibition to avoid alliance or coalition with either of the old political parties.

Resolved, That we heartily honor the noble Christian women who have made a crusade against the terrible trade which was carrying constant grief and shame to their households.

Resolved, That we hereby indorse, as an exponent and supporter of our principles and objects, the *Prohibition Herald*, as having done and as still doing a good work; that we pledge for it our patronage as an efficient organ in our mission, by subscription, contribution, and efforts to increase its circulation through the State.

Nathaniel White, of Concord, who received seventy-one of the ninety votes cast, was declared nominated for Governor, and his nomination made unanimous.

For the office of Railroad Commissioner, David Heald, of Milford, was nominated by acclamation.

The election held on March 9, 1875, resulted in no choice of either Governor or Railroad Commissioner. The whole number of votes cast in the State was unusually large, having amounted to 79,205. Of these the Democratic candidate received 39,121, the Republican 39,292, the Prohibition party's nominee 778, or little more than one-third of the number cast

for the Temperance candidate in 1874, when it was 2,097. The votes given to the candidates for the office of Railroad Commissioner were in about the same proportions.

Concerning the members of the State Legislature, the result of the election was as follows: For the House of Representatives, Democrats, 180; Republicans, 192. For the twelve seats in the Senate, Democrats, five; Republicans, five. In the Second and Fourth Senatorial Districts, the official returns showed that neither of the candidates had received a sufficient number of votes for election.

The Governor and Council, whose duty it is to inspect the official returns of elections, and announce the result, on canvassing the returns from the Second and Fourth Senatorial Districts, threw out of the count, in the second district, all the votes given to the Republican candidate, because his name, in the ballot cast for him, was written "Natt," instead of "Nathaniel;" and in the fourth the votes cast for one among the candidates, because the time of his residence in the State fell short of the seven years required to make him eligible as a Senator. The rejection of these votes from the returns left the number of votes cast for the Democratic candidates in the respective districts more than sufficient for their election, and these the Governor declared to be elected.

This mode of proceeding on the part of the Governor and Council caused a very great and general excitement in the State. The Republicans loudly denounced it as not only arbitrary and unwarranted, but manifestly contrary to both the spirit and letter of the State constitution, by the express provisions of which they averred that in the Second and Fourth Senatorial Districts there was no election by the people on March 9, 1875; and that the filling of those two vacant seats belonged exclusively to the Senate, assisted by the House of Representatives. It was also the cause of considerable disturbance in the organization of the Legislature, as well as of legislative and judicial action.

The members of the legislative body convened at Concord for the June session of 1875, on the 2d day of the month. The House of Representatives was promptly organized by the election of its officers. Charles P. Sanborn, of Concord, Republican, was elected Speaker. The whole number of votes cast was 363, of which Mr. Sanborn received 190; his competitor, Albert R. Hatch, of Portsmouth, Democrat, 179.

As to the Senate, the five Republicans who had been unquestionably elected signed the following document, and caused it, before the meeting of that body, to be served upon Governor Weston and his Council:

The undersigned, Senators-elect for Districts Nos. 1, 5, 7, 9, and 10, protest against the oath of office being administered before the Governor and Council to Mr. James Priest and Mr. John Proctor, as Sena-

ors for Districts No. 2 and 4, for the reason that Mr. Priest and Mr. Proctor are not legally entitled to take seats in the Senate.

JEREMIAH F. HALL,
JOSHUA B. SMITH,
CHARLES HOLMAN,
GEORGE A. WHITNEY,
GEORGE H. STOWELL.

This protest having been disregarded, and Mr. Priest and Mr. Proctor installed in office, the five Republican Senators refused to take part in the organization and action of the Senate with the rest. They withdrew, and organized themselves as Senators into a separate body, electing George H. Stowell as their President. They then passed, and sent to the House of Representatives, the following resolutions:

Resolved, That a message be sent to the House of Representatives, that the Senators from Districts Nos. 1, 5, 7, 9, and 10, having protested against any organization of a Senate in which Messrs. Priest and Proctor are to act as members, which protest is made part of this resolution, and having declined to participate in any such organization, have organized themselves as a Senate by the election of George H. Stowell as chairman, and Tyler Westgate as clerk.

The undersigned, Senators-elect for Districts Nos. 1, 5, 7, 9, and 10, having protested against the oath of office being administered by the Governor to Mr. James Priest and Mr. John Proctor, as Senators for Districts Nos. 2 and 4, now protest against those gentlemen occupying seats, or acting as Senators for said districts.

Our reasons are substantially stated by Mr. Councilor Lovell, in his protest against the proceedings of the Governor and a majority of the Council in reference to those two districts.

We have appeared here and taken our oaths as Senators because it is our constitutional right and duty to do so, without waiving any objection to said proceedings, or to anything that has been or may hereafter be done by said Priest or Proctor, or by any other person or persons, in disregard of the fact that in Districts Nos. 2 and 4, at the last annual election, no one was elected Senator by a majority of votes.

We do not, and shall not, waive any objection to the legal defects which must manifestly attach to all proceedings founded upon a flagrant usurpation, and violation of the constitution.

We have signified our willingness to take our seats as Senators, and act as such with the Senators for Districts Nos. 3, 6, 8, 11, and 12 only, and, under a temporary organization of the Senate, to await an adjustment of the questions in dispute, by the court, or otherwise.

But as our fair offers have been disregarded, and it is the manifest purpose of the last-named Senators to attempt an organization of the Senate, with said Priest and Proctor illegally acting as members thereof, we do now, as the only effectual method of resisting a palpable wrong and usurpation, decline to participate in any such organization, protest against the same as unconstitutional, and in effect revolutionary, and we hereby move and demand that this protest be entered on record by the Clerk, to whom it is now tendered.

JEREMIAH F. HALL,
JOSHUA B. SMITH,
CHARLES HOLMAN,
GEORGE A. WHITNEY,
GEORGE H. STOWELL.

The five Democratic Senators, indisputably elected, on their part recognized Mr. Priest and Mr. Proctor as their colleagues, and jointly organized themselves as a Senate, with John

W. Sanborn as President. On motion, a committee was appointed to consider the matter relating to the election and installment in office of the Senators for the Second and Fourth Senatorial Districts, and report. The committee reported that the action of the Governor and Council in regard to the election returns from those two districts was legal, and that Mr. Priest and Mr. Proctor were legally occupying their respective seats in the Senate.

On the 8d of June the Republican Senators met, and adopted a resolution in which they stated the above-mentioned facts, and, in accordance with a special provision of the State constitution, requested the justices of the Superior Court of New Hampshire to give their opinion upon the following questions of law:

1. Can five Senators actually elected, together with two Senators not elected, and having no rights there, constitute a legal and constitutional Senate of New Hampshire, or perform any legislative or legal act?

2. Can a Senate composed of five other, actually elected Senators, organized in due form, in resistance of an attempted Senate composed of five Senators and two usurpers, perform any act other than that of meeting the House of Representatives to proceed with the elections in accordance with the constitution?

3. There being two vacancies in the Senate, can the House of Representatives and five elected Senators, with the other five if they choose to attend, or without them if, being notified, they fail to attend, fill those vacancies from the constitutional candidates prescribed by the constitution, and upon the admission of the two Senators thus elected to the Senate, making seven elected Senators, will the Senate, as thus constituted, be a legal and constitutional body, capable of legislation, and entitled to recognition from every branch of the State government?

The resolution was delivered to the court with an official communication, signed by the President and Clerk of the Republican portion of the Senate.

On the part of the House of Representatives the Superior Court was formally requested to give their opinion upon the legality of the action of the Governor and Council in regard to the election returns from the Second and Fourth Senatorial Districts, for which purpose they passed the following preamble and resolution:

Whereas, In Senatorial District No. 2, by the returned copies of the records on file in the office of the Secretary of State, it appears that the whole number of votes cast was 7,706, of which Joseph Pettigrew had 1, Arthur Deering 2, scattering 3, Joshua C. Merriek 95, Natt Head 3,771, James Priest 3,834; and

Whereas, in Senatorial District No. 4, by the returned copies of the records on file in the same office, it appears that the whole number of votes cast was 7,016, of which James M. Bishop had 1, Benjamin M. Gilman 3, Henry M. Putney 1, Moses Humphrey 1, Ira Osgood 1, G. E. Todd 2, Abraham Thorpe 9, Arthur Deering 46, George E. Todd 3,457, John Proctor 3,495: therefore—

Resolved, That the Speaker of this House be directed to obtain the opinion of the Superior Court, as soon as possible, on the question whether the Governor had the constitutional authority to issue to any one of the above-named persons a summons to appear as Senator-elect on the first Wednesday of June instant.

The matter in controversy was argued on both sides, in writing and orally, before the three justices, on June 7th. On the 8th the court officially communicated its decisions to the Senate and House of Representatives upon the questions which those bodies had respectively propounded. The principal and concluding parts of the said documents were as follows:

To the Honorable Senate of the State of New Hampshire :

The justices of the Superior Court have been furnished with a copy of the preamble and resolution, passed by the Senate on the 3d instant, by which resolution their opinion is required in regard to the "right of James Priest and John Proctor to retain their seats in the Senate" upon the facts stated in the preamble. . . .

By this action of the Governor and Council, whether it be regarded as within or exceeding their constitutional powers, Messrs. Priest and Proctor received the usual credentials, which authorized them to assemble with the other ten Senators and take the prescribed oaths of office, and they thereupon became Senators, subject to the constitutional authority of the Senate as final judges of the qualifications and election of its members.

It further appears that the Senate has proceeded to examine the returns of votes for Senators, and has adjudged that Messrs. Priest and Proctor, having received a majority of all the votes legally cast and returned in their respective districts, were elected Senators thereof.

By Article XXXV. of the constitution the Senate are made "final judges of the elections, returns, and qualifications, of their own members, as pointed out in this constitution." We are of the opinion that from the action of the Senators in this respect there was no appeal. By the express terms of the constitution the action of the Senate is made final. We are therefore of the opinion that when the Senate adjudged that Messrs. Priest and Proctor were duly elected Senators, their action was final and conclusive of the right of said Priest and Proctor to hold their seats as Senators.

The foregoing opinion is based entirely upon the facts stated in the preamble to the resolution, and upon the assumption that, when the Senate acted as final judges of the qualifications and election of Messrs. Priest and Proctor there was a constitutional quorum present.

E. L. CUSHING, } Justices of the Superior
W. S. LADD, } Court of Judicature.
ISAAC W. SMITH, }

To the House of Representatives :

The undersigned, justices of the Superior Court, have considered the questions addressed to them by the House of Representatives, by a resolution passed June 3, 1875, whether, upon the facts stated in the preamble to said resolution, the Governor had constitutional authority to issue a summons to appear as Senator to either of the persons mentioned as having received votes for that office in Senatorial Districts No. 2 and No. 4. . . .

In the view we take of this question it calls for our opinion upon a past and completed act of the Executive Department of the government, performed in discharge of the duty expressly required of that department by a constitution. And in any aspect which the subject presents to our minds such opinion, if given, could have no greater weight or authority than a criticism of approval or disapproval by one branch of the government upon the conduct of another coördinate branch. We have been unable, after most careful consideration, to discover any way in which such an official act, on the part of the justices of this court, could be made consistent with the grave duties imposed upon them by the constitution of the State.

If a mistake, or even an intentional wrong, should

be committed by the Executive, the remedies, under our form of government, are ample and prompt—the wrong to be suffered temporary. If, on the other hand, a precedent of interference by one department with the discharge of its duties by another should be established by the form of a judicial decision, a dangerous blow would, in our judgment, be struck at one of the most vital principles of our system of government, the consequences of which no one could foretell, but which no intelligent and candid citizen could fail to see must be lasting and pernicious.

For these reasons, with a full sense of the responsibilities under which we act, we are constrained, most respectfully, to decline giving a further answer to the question contained in the resolution of the House of Representatives, as we understand the purport and effect of that question.

E. L. CUSHING, } Justices of the Superior
W. S. LADD, } Court of Judicature.
ISAAC W. SMITH, }

June 8, 1875.

These decisions were read to the two Houses by their presiding officers, respectively. The Republican Senators, who had withdrawn on the first day of the session, acquiesced in the opinion rendered by the court, and at the afternoon sitting of the Senate on June 8th appeared in their seats to take part with the other Senators in the business of legislation.

In the House of Representatives, the opinion of the Superior Court, declining to decide the question propounded to it by that body, was acquiesced in so far as the transaction of present legislative business in conjunction with the Senate might be concerned; but the majority would not recognize the legality of the action taken by the Governor and the Democratic portion of the Senate in the election and seating of Mr. Priest and Mr. Proctor as Senators.

The House, therefore, after long debates, finally adopted, on June 25th, the following resolutions—yeas 174, nays 166 :

Resolved, That the action of Governor Weston and his Council, in throwing out the return of votes given for Natt Head and Arthur Deering, was unconstitutional, without precedent in the history of the State, and contrary to the overwhelming weight of legislative and judicial authority in this country.

Resolved, That said action of the Executive Department constitutes a mischievous and dangerous precedent, that will be fatal to the rights of the electors and of a coördinate branch of the government; unless it shall be condemned by the people at the ballot-box.

Resolved, That the action of the Senate on the 1st day of June, in perpetuating the arbitrary and unconstitutional action of the Governor and Council, in rejecting the return of votes given for Natt Head and Arthur Deering, and thereupon declaring elections where vacancies existed, was an unconstitutional assumption of power, in part expressly conferred by the constitution upon the members of the House of Representatives.

Resolved, That said action of the Senate having been regarded as final, but not justified by the Superior Court, the House of Representatives hereby enter their solemn protest against the arbitrary and unconstitutional precedent which it establishes, and confidently appeal to the people to revise and reverse it at the ballot-box next March.

On the 9th of June both Houses met in joint convention for the purpose of electing the

Governor and Railroad Commissioner. The results of the ballot were as follows: For Governor, whole number of votes cast, 379; of which Hiram R. Roberts had 186, Person O. Cheney 193. Mr. Cheney was declared elected.

For Railroad Commissioner, whole number of votes cast, 351; of which Adams T. Pierce had 171, Charles H. Powers 180. Mr. Powers was declared elected.

At the same session the convention declared the following named members of the State Council as elected by the people at the election of March preceding, they having received the required majority of all the votes then cast in the respective districts, as counted and reported in detail by the special committee appointed for that purpose: First District, Charles A. Foss; Second District, Moulton H. Marston; Third District, Edward D. Burnham; Fourth District, Albert S. Scott; Fifth District, Jeremiah Blodgett.

At a later day the two Houses met in convention again, to elect the Secretary of State and other officers. Those who received a majority of the votes cast, and were declared elected, were as follows: For Secretary of State, Benjamin F. Prescott; for State Treasurer, Solon A. Carter; for Commissary-General, Frank W. Miller; for State Printer, Edward A. Jenks.

The State debt is at present \$3,741,880.45. During the last fiscal year it had been reduced \$83,259.97.

The public revenue during the same year was \$505,654.21; derived, for \$400,208, from the State tax; the rest from other sources. The aggregate amount of the public expenditures was \$420,394.64; including ordinary expenses, \$149,64.80; extraordinary, \$35,240.04; interest paid on the State debt, \$236,89.80.

The same amount of tax is considered to be sufficient to meet the expenditures of the State government, and gradually reduce its debt.

There is in New Hampshire only one bank for discount which does business under a State charter. It has a capital stock of \$50,000. In the past year it paid a dividend of ten per cent. to its stockholders, and has a surplus of \$18,315.85.

The number of savings-banks in the State during 1874 was 68, the aggregate amount of their deposits being \$30,214,585.71; which exceeds their deposits in the previous year by \$1,385,108.88. The whole number of depositors is 96,938, or 4,150 more than they were in 1873.

The existing system of education in the State is well sustained so far as the common schools are concerned.

The almost general opposition which the Agricultural College and the Normal School met with from the people at the beginning has sensibly decreased, and will undoubtedly die out entirely, and be replaced by a decided and permanent popular favor.

The charitable, reformatory, and penal in-

stitutions of the State appear to be under efficient management, accomplishing the purposes for which they were severally intended.

As to the convicts in the State Penitentiary, for the year ending April 30, 1875, the whole number was 151; received, 56, which is the largest number committed in any one year, except 1866, when they were 60; discharged, 20—on expiration of term, 15; by pardon, 5; four died. The whole number remaining on May 1, 1875, was 127—females 6, males 121, of whom three are negroes. Of these convicts, 28 are under 20 years of age; 52 between 20 and 30 years; 29 between 30 and 40; 11 between 40 and 50; and 7 over 50. The crimes of which they have been convicted, respectively, are as follows: Murder in the first degree, 2; murder, second degree, 6; manslaughter, 3; attempt to kill, 4; arson, 11; highway robbery, 3; burglary, 26; breaking into and stealing, 17; stealing horses, 10; stealing, 26; obtaining goods on false pretenses, 4; forgery, 2; passing counterfeit money, embezzlement, and breaking seat on railroad car, 1 each; obstructing railroad track, 3; gross outrages on women, 7. These convicts have been sentenced, 3 to 30 years' confinement; 1 to 25; 1 to 21; 3 to 20; 14 to from 10 to 18 years; 23 to less than 10 and more than 4 years; 13 to 4; 26 to 3; 14 to 2 years; 4 to 1 year. They are natives of the United States, 97; of Ireland, 9; England, 4; Scotland, 4; Nova Scotia, 2; Canada, 8; Sweden, 2; Spain, 1.

The earnings of the convicts' labor, during the past year, amounted to \$30,664.02. The expenses of the State-prison for the same time were \$14,971.57; leaving a gain over all expenditures of \$15,692.46.

The material interests of the State in regard to trade, manufactures, and agriculture, are generally in a satisfactory condition.

The Governor invited the attention of the Legislature to the expediency of calling a convention to frame a new constitution for the State, or to revise and amend the present one, which has been in force since 1792. The Governor avers that in many particulars it is defective, ambiguous, and has at least one serious blemish, namely, "the clause known as the 'religious test,' requiring that certain officers must be Protestant." This clause, he says, is in practice a dead letter, Catholics as well as Protestants holding important offices every year, but adds that such a stain should be wiped out of the State constitution, even in reference to the letter.

A Constitutional Convention was held in 1851, when a new constitution was framed; but the delegates to that convention protracted their session so long, and thereby so increased the amount of its expenses, that the people were displeased, and looked on the whole work with disfavor. When the new document was submitted to the popular vote for its adoption or rejection, the people were

especially requested to vote for and secure the adoption at least of the proposition abolishing the property qualification; that abolishing the "religious test;" and that allowing the Legislature to propose amendments. The result of the vote was that, excepting the clause relating to the property qualification, which was adopted by a bare two-thirds majority, as required, the other two propositions failed; and the rest was rejected by decisive majorities.

By a provision of the old constitution, the sense of the people as to its revision, through a convention for that purpose, is to be taken once in seven years. The year 1875 was the time for such a vote; the last one having been taken in 1868, when the people decided not to call a convention.

The Legislature adjourned *sine die* on July 3d, after an unusually short session of thirty days. During that period a large number of acts were passed, affecting local as well as general interests.

Among the measures adopted, the most important seems to have been the joint resolution submitting to the people the question of calling a Constitutional Convention. The resolution was introduced in the House of Representatives on June 18th, and referred to the Judiciary Committee; but subsequently, on the same day's sitting, it was, on motion, recalled from that committee, and referred to a special joint committee consisting of thirteen members—ten from the Lower House, three from the Senate. The act confines the work of the convention to specified matters, relating chiefly to an improved system of political organization of the State, as follows:

That the action be limited to abolishing the religious test, providing for future amendments, districting the State for the election of Councilors, Senators, and Representatives, on the basis of population and in the ratio of one Senator to six Representatives; providing for biennial elections; changing the time of elections from the second Tuesday of March to the second Tuesday of November; changing the time of the meeting of the Legislature from the first Wednesday of June to the first Wednesday of February.

The work of the Geological Survey of New Hampshire has been completed and reported upon by the State Geologist, Prof. C. H. Hitchcock. The first volume of his report, containing 670 pages, with numerous illustrations of the subjects treated of, was published shortly before the meeting of the Legislature in June, 1875. The second and last volume, part of which was then in press, will be issued before the next session.

The climate of New Hampshire during the year 1874 was as follows:

Its mean temperature has been very slightly cooler than the average.

As in 1873, so in 1874 the mercury rose above 90° only twice—June 29th, 93°; July 15th, 92°. The warmest day in the year was June 29th, when the mean temperature was 81½°.

The mercury fell below zero nineteen times: eight

days in January, six days in February, one day in March, and four days in December.

The coldest day was February 2d, when the mercury sank as low as 28° below zero; the mean temperature of the day being 3° below.

Rain has fallen on seventy-five days, to the total amount of 28.09 inches, being 2.39 inches more than the rainfall of 1873, but nearly five inches less than the average annual rainfall during the last nineteen years.

Snow has fallen on forty-seven days (the same number of days as in 1873), to the total amount of seven feet and one inch, of which quantity thirty-five inches fell in April.

NEW JERSEY. The Legislature of New Jersey, at its session in 1875, gave its sanction to the amendments of the constitution of the State which were proposed by the Legislature of 1874, and provided for submitting them to a vote of the people at a special election, to be held on the 7th of September. These propositions for amendment were twenty-eight in number, and were to be voted for on one ticket, those opposed by the voter being canceled. The first was to insert, as paragraph 19 of Article I. on "Rights and Privileges," the following:

19. No county, city, borough, town, township, or village, shall hereafter give any money or property, or loan its money or credit, to or in aid of any individual, association, or corporation, or become security for, or be directly or indirectly the owner of, any stock or bonds of any association or corporation.

The second was to insert the following as paragraph 20 of the same article, the former paragraph 19 being made number 21:

20. No donation of land, or appropriation of money, shall be made by the State, or any municipal corporation, to or for the use of any society, association, or corporation, whatever.

The next proposed change was to strike out the word "white" between "every" and "male," in the first line of Article II. on the "Right of Suffrage," and add the following to section 1:

And provided further, that in time of war no elector in the actual military service of the State, or of the United States, in the army or navy thereof, shall be deprived of his vote by reason of his absence from such election district; and the Legislature shall have power to provide the manner in which, and the time and place at which, such absent electors may vote, and for the return and canvass of their votes in the election districts in which they respectively reside.

It was also proposed to strike from the second section of this article all after the word "bribery." It now reads: "The Legislature may pass laws to deprive persons of the right of suffrage who shall be convicted of bribery," whereas before it applied only to bribery at elections. The next amendment is to section 1 of Article IV., entitled "Legislative," and changes the time of the election from the second Tuesday of October to the "first Tuesday after the first Monday in November." The next affects paragraph 7 of section 4 of Article IV., and changes the compensation of members of the Legislature from \$3 per day for the first

forty days of the session, and \$1.50 per day thereafter, with an allowance of \$1 for every ten miles of necessary travel, to \$500 per annum "during the time for which they shall have been elected, and while they shall hold their office, and no other allowance or emolument, directly or indirectly, for any purpose whatever."

The next amendment adds to paragraph 4 of section 7 of Article IV. the following:

No law shall be revived or amended by reference to its title only, but the act revived, or the section or sections amended, shall be inserted at length. No general law shall embrace any provision of a private, special, or local character. No act shall be passed which shall provide that any existing law, or any part thereof, shall be made or deemed a part of the act, or which shall enact that any existing law, or any part thereof, shall be applicable, except by inserting it in such act.

The next inserts in paragraph 6 of the same section the word "free" between the word "public" and the word "schools," and adds the following:

The Legislature shall provide for the maintenance and support of a thorough and efficient system of free public schools for the instruction of all the children in this State between the ages of five and eighteen years.

Paragraph 8 of the same section is stricken out, and paragraph 9 is changed to 8. The provision stricken out was as follows:

8. The assent of three-fifths of the members elected to each House shall be requisite to the passage of every law for granting, continuing, altering, amending, or renewing, charters for banks or money corporations; and all such charters shall be limited to a term not exceeding twenty years.

The following is inserted as a new paragraph:

9. No private, special, or local bill shall be passed, unless public notice of the intention to apply therefor, and of the general object thereof, shall have been previously given. The Legislature, at the next session after the adoption thereof, and from time to time thereafter, shall prescribe the time and mode of giving such notice, the evidence thereof, and how much evidence shall be preserved.

Then a new paragraph 11 is inserted, as follows:

11. The Legislature shall not pass private, local, or special laws in any of the following enumerated cases, that is to say:

Laying out, opening, altering, and working roads or highways.

Vacating any road, town plot, street, alley, or public grounds.

Regulating the internal affairs of towns and counties; appointing local offices or commissions to regular municipal affairs.

Selecting, drawing, summoning, or impaneling grand or petit jurors.

Creating, increasing, or decreasing the percentage or allowance of public officers during the term for which said officers were elected or appointed.

Change the law of descent.

Granting to any corporation, association, or individual any exclusive privilege, immunity, or franchise whatever.

Granting to any corporation, association, or individual the right to lay down railroad tracks.

Providing for changes of venue in civil or criminal cases.

Providing for the management and support of free public schools.

The Legislature shall pass general laws providing for the cases enumerated in this paragraph, and for all other cases which, in its judgment, may be provided for by general laws. The Legislature shall pass no special act conferring corporate powers, but they shall pass general laws under which corporations may be organized and corporate powers of every nature obtained, subject, nevertheless, to repeal or alteration at the will of the Legislature.

A new paragraph 12 is inserted in the same section, as follows:

12. Property shall be assessed for taxes under general laws, and by uniform rules, according to its true value.

The next amendment inserts the following, as paragraph 2 in section 8 of Article IV.:

2. Every officer of the Legislature shall, before he enters upon his duties, take and subscribe the following oath or affirmation: "I do solemnly promise and swear (or affirm) that I will faithfully, impartially, and justly perform all the duties of the office of _____, to the best of my ability and understanding; that I will carefully preserve all records, papers, writings, or property intrusted to me for safe keeping by virtue of my office, and make such disposition of the same as may be required by law."

In Article V., on the "Executive," the words "or the Senate alone" are inserted after the word "Legislature," where it first occurs in paragraph 6, giving the Governor the power to convene the Senate without the House in special session. The following is added to paragraph 7:

If any bill presented to the Governor contain several items of appropriations of money, he may object to one or more of such items while approving of the other portion of the bill. In such case he shall append to the bill, at the time of signing it, a statement of the items to which he objects, and the appropriation so objected to shall not take effect. If the Legislature be in session he shall transmit to the House in which the bill originated a copy of such statement, and the items objected to shall be separately reconsidered. If, on reconsideration, one or more of such items be approved by a majority of the members elected to each House, the same shall be a part of the law, notwithstanding the objections of the Governor. All the provisions of this section in relation to bills not approved by the Governor, shall apply to cases in which he shall withhold his approval from any item or items contained in a bill appropriating money.

The following is added to paragraph 8, relating to the powers and qualifications of the Governor:

Nor shall he be elected by the Legislature to any office under the government of this State or of the United States, during the term for which he shall have been elected Governor.

The other amendments affect Article VII., on the "appointing power and tenure of office." In paragraph 5 of section 1, the words "the adjutant-general and quartermaster-general" are inserted after "major-generals," and the same words are stricken out of paragraph 9; the effect being to give the Governor, with the consent of the Senate, the

power to appoint the Adjutant-General and Quartermaster-General. Changes in section 2 of this article provide that the Governor shall appoint the judges of the Inferior Court of Common Pleas; that the term of office of Treasurer and Controller shall be three years; that the Keeper of the State-prison shall be appointed by the Governor, and hold office five years; and that sheriffs and coroners shall be elected for three years, and sheriffs renew their bonds annually.

The chief opposition to the amendments was made by the Roman Catholics against the first two given above, and those relating to the maintenance of free schools. Some of the clergy of that Church made efforts to have these defeated, but many prominent laymen openly advocated their adoption. There was also considerable opposition in the cities to the provision for uniform taxation, on the ground that it would remove the exemption of church property, and also that of mortgages provided for in what was known as the "Five Counties Act." The amendments were all ratified, notwithstanding this opposition. The total vote cast was 96,552. The opposition to the school clause did not exceed 2,000 votes. The majority in favor of the other amendments, except that relating to taxation, was about 40,000. The majority in favor of the uniform taxation clause was 6,784.

At the regular election on the 2d of November only local officers and members of the Legislature were chosen. Five Republicans and three Democrats were elected to the Senate, while seven Republican and six Democratic Senators held over from the former Legislature. A full House of Representatives was chosen, and the Legislature of 1876 consists of 12 Republicans and 9 Democrats in the Senate, and 37 Republicans and 23 Democrats in the House, making the Republican majority 8 in the Senate and 14 in the House, or 17 on a joint-ballot. During the session two Judges of the Supreme Court, a clerk in Chancery, Secretary of State, State Treasurer, State-prison Keeper, State Librarian, Inspector of the State-prison, judges of the county courts, and other officers, are to be chosen. The Secretary of State, Treasurer, and some of the minor officers, are elected by the Legislature, and the judges and Prison-Keeper are appointed by the Governor, and confirmed by the Senate.

A convention of temperance advocates was held at Trenton, on the 22d of September, to organize a new party, and resolved to support no man for office who was not pledged to the support of their principles. The State Grange of Patrons of Husbandry held a meeting at Camden, December 16th, and adopted a resolution protesting against excessive charges by railroad companies for freights, especially on fruits and perishable articles, and recommending that suitable legislation, to remedy the matter complained of, be asked for.

A census of the population was taken during

the year through the local assessors, but, owing to the meagre pay allowed, the returns were imperfect and incomplete, and it was found necessary in some cases to make estimates based on the vote at the election for members of the Legislature in November. The entire increase of the State, since 1870, is about 120,000, of which 51,600 is in Hudson County, 25,000 in Essex, 10,000 in Union, 7,500 in Camden, and 7,300 in Passaic. The annexed table gives the population by counties in 1875, 1870, and 1860:

COUNTIES.	1875.	1870.	1860.
Atlantic.....	14,978	14,168	11,756

The total valuation of property is \$613,993,196 against \$619,057,908 in 1874, a decrease of \$5,064,707. The tax-levy for 1876 is two mills for school purposes and 1½ mill for general purposes. The revenue will be reduced

* Estimated.

from \$1,238,115 to \$1,227,986 for school purposes, and from \$928,586 to \$920,980 for general purposes, a total reduction of \$17,826. The total receipts of the State Treasury for the year ending October 31st were \$3,214,543.93, consisting of \$919,194.16 from State tax, \$540,698.50 from tax on corporations, interest and dividends, \$1,226,054.98 from school-tax, \$427,985.06 from income of school-fund, exclusive of payments on account of annual appropriation, and \$100,000 from sundry sources. The disbursements were \$1,566,037.05 on account of State fund, \$315,500 on account of school-fund exclusive of State appropriation, \$1,235,592.21 from proceeds of school-tax, \$263,531.72 on account of war-fund, \$2,014.71 for library-fund, and \$6,860 for Agricultural College fund; total, \$3,378,635.69. There was paid out on State-prison account \$61,755, of which amount \$49,508 was for salaries. An additional sum of \$8,000 for gas-works was paid. The payments for the Trenton Lunatic Asylum were \$59,888.15, which included \$15,000 for the purchase of land, appropriated in 1874. Of the \$900,000 appropriated last year for the Morristown Asylum, \$600,000 has been drawn, and in order to meet the drafts the State had to borrow \$200,000. The total appropriations for this institution, thus far made, amount to \$2,000,000. The disbursements on account of the Legislature of 1875 were \$53,578.96, which was nearly \$12,000 less than the preceding Legislature. The expenses on militia account were \$44,725; printing, \$78,205.29; State-house expenses, \$22,851.55; State-house extension, \$15,000; Reform School, \$34,000; Industrial School for Girls, \$5,000; support of idiots, mutes, and blind persons, \$47,748.52; salaries and fees, \$46,995.83; education, \$57,411.59 (this includes an appropriation of \$25,000 to public schools, \$15,000 annual appropriation to State Normal School, etc.); Riparian Commission, \$11,000; pensions, \$44,218.08; Soldiers' Monument at Beverly, \$10,000; Centennial stock, \$80,000; Centennial Commission, \$3,500; law and equity reports, \$12,433.52; stationery and postage, \$11,213.86; inaugural expenses, \$2,377.10. The estimated expenses for the current fiscal year contain the following principal items: Principal of bonds due this year, \$100,000; interest on State bonds, \$47,427.60; temporary loans, \$200,000; State-prison, \$84,000; Lunatic Asylum at Trenton, \$45,000; Morristown Lunatic Asylum (balance of appropriation of 1875), \$300,000; Legislature, \$80,000; militia, \$50,000; transportation and costs, \$35,000; printing, \$50,000; State-house expenses, \$17,000; Reform School, \$26,500; support of idiots, mutes and blind, \$50,000; salaries and fees, \$47,000; salaries of the judiciary, \$70,000; education, \$288,000; pensions, \$30,000; Centennial stock, \$20,000; Centennial Commission, \$16,500; Home for Disabled Soldiers, \$40,000; Soldiers' Children's Home, \$15,000; State military account,

\$18,000; contingent and incidental, \$24,322.40. These, with other sundry amounts, make the estimated annual expenditures, for the year now running, \$1,722,000.

The following table shows the amount of taxable property in each county for 1874 and 1875:

COUNTIES.	Valuation of 1874.	Valuation of 1875.
Atlantic.....	\$4,617,151	\$4,526,585
Bergen.....	28,436,513	22,895,949
Burlington.....	27,501,000	27,220,085
Camden.....	20,000,000	21,539,610
Cape May.....	8,250,000	8,250,000
Cumberland.....	13,472,000	18,895,000
Essex.....	182,544,000	182,692,000
Gloucester.....	14,712,794	14,651,300
Hudson.....	95,271,985	98,948,514
Hunterdon.....	80,168,487	26,587,659
Mercer.....	38,547,606	34,278,265
Middlesex.....	28,567,000	22,660,000
Monmouth.....	28,158,173	27,730,978
Morris.....	27,381,089	27,091,007
Ocean.....	8,984,021	8,790,532
Passaic.....	38,821,059	33,774,000
Salem.....	14,479,477	14,216,923
Somerset.....	17,440,400	17,462,000
Sussex.....	16,058,491	15,567,236
Union.....	81,806,600	81,860,000
Warren.....	24,103,158	24,268,431
Total.....	\$619,067,908	\$612,731,004

The only bonded debt of the State is the war debt, which at the end of the fiscal year amounted to \$2,496,300, of which \$100,000 was paid out of the State fund on the 1st of January, 1876. The assets of the sinking-fund amount to \$1,360,466.72. The bonds became due at the rate of \$100,000 a year until 1891, after which the amount varies, but does not exceed \$200,000 in any one year. The last of the bonds mature in 1902. It is expected that in ten years the sinking-fund will equal the outstanding debt. The securities of the State fund consist of stock of the Camden & Amboy Railroad Company and the joint stock of the Delaware & Raritan Canal and Camden & Amboy Railroad Company, amounting to \$280,700, bonds of the joint company for \$24,000, and a bond of the Jersey City & Bergen Railroad Company for \$10,000. The school-fund amounts to \$2,078,576.04. The Agricultural College fund consists of \$116,000 of State bonds, the interest on which is paid to the trustees of Rutgers College toward the support of the Scientific School. The State is entitled to the education of forty students free of charge in this institution.

In August the State Treasurer was found to be a defaulter to a considerable amount. He had collected from the United New Jersey Railroad and Canal Companies through the Pennsylvania Railroad Company, on account of the revenues of the State, \$87,382.86, which he had failed to credit to the State, or report to the Controller. This amount was reduced by sums in bank standing to his credit as Treasurer, or paid over by him to the Attorney-General, to \$44,116.68. Suit was brought against the Treasurer, Mr. Sooy, and his sureties, to recov-

er this sum, and the defaulter arrested and subsequently tried and sentenced to the State-prison for three years.

The new Insane Asylum at Morristown will be completed in the spring of 1876, and its total cost will be about \$2,000,000. It will accommodate 800 patients. The deaf, dumb, blind, and feeble-minded of the State are still supported in the institutions of other States. During the year \$25,179.22 was paid for the support of the deaf and dumb, \$13,643.89 for the blind, and \$8,925.41 for the feeble-minded. There was in the State-prison during the year an average of 656 convicts. The contract for the employment of all prisoners with certain shoe-manufacturers has been relinquished, and a new contract entered into with some Philadelphia parties. The income from the State-prison during the year was \$81,596.30, cost of subsistence \$57,941.69, leaving \$23,654.61 as the net profits. In this calculation are not included salaries and other expenses paid out of the State Treasury amounting to \$66,215.40. The Home for Soldiers' Children is to be closed in April, 1876, the inmates being all provided for. There were 164 in the Home during the year. The Industrial School for Girls had only 20 inmates in October.

A suit was brought in the Court of Chancery, at Trenton, in December, by the Attorney-General, to restrain the Delaware & Bound Brook Railroad Company from constructing a bridge across the Delaware River at Yardleyville. This company was building the bridge in conjunction with the North Pennsylvania Railroad Company, the two corporations having constructed their lines of road to the river on either side, and expended a large sum for the bridge. It was claimed on the part of the prosecution that no authority had been given to construct the bridge, and that it would obstruct navigation. On the other side it was contended that the companies were authorized to build their roads to the boundary of their respective States, and that this was in the middle of the river, and that at this point the stream was not navigable. A preliminary injunction was denied, and the question decided in favor of the railroad company.

A case has been decided by the Court of Errors and Appeals, which had been pending in the courts of the State six years, and which originated in a dispute about twenty-five cents' worth of turnip-seed. The seed when sold was represented to be a variety to produce early turnips, and, as it proved, produced only late turnips of a poor quality. The purchaser brought suit for damages before a justice of the peace, in Monmouth County, and recovered \$99, although the defendants proved that they had believed the seed to be as represented, and intended no fraud. The case was carried successfully to the Court of Common Pleas, the Supreme Court, and the Court of Errors and Appeals, the original decision as to the liability of the vender being confirmed at every stage

of the proceedings. The case is regarded as a leading one on the principle involved.

NEW JERUSALEM CHURCH, THE. The fifty-fifth annual meeting of the General Conference of the Church of the New Jerusalem was held in the city of New York, beginning June 4th. Forty-two ministers and one hundred and seventy-six lay-delegates were present. The Rev. Chauncey Giles was chosen President. A memorial was submitted by the American Conference of New Church Missions, in respect to the methods of disseminating the doctrines of the Church, and giving greater unity and strength to its work. It classified the field of work into churches and associations which are self-sustaining, and able to help others; those which are simply self-sustaining, and not able to keep others; those which are not self-sustaining, and need help; circles of New Churchmen not formed into societies; isolated New Churchmen; "Old-Church" ministers who are known to be reading the new doctrines more or less and preaching them; "Old-Church" members who are reading and receiving the doctrines more or less; places where the doctrines are not known; seminaries, academies, and colleges; and the secular press. It made the following recommendations, which were adopted by the Conference: that the several associations sustain their superintendent or presiding minister in the general work of the Church; that if they are unable to support a superintendent, the adjoining associations aid them in supporting him; that general ministerial work in each district be placed in charge of its superintendent, and the ministers residing in the district; and that the superintendents constitute a general Board of Managers for raising and disbursing funds for the work in their several districts.

The report of the German Missionary Union stated that there were seventeen German societies and active circles of readers, numbering 1,200 adults, in the United States and Canada, of which ten societies were able to support a pastor. They had thirteen Sunday-schools, with 641 scholars, and supported a German Sunday-school paper. A new translation of the Bible into German had been undertaken by Dr. Leonhard Tafel, of New York, and was nearly completed.

A fund was established in 1872 by Mr. L. C. Jungerlich, of Philadelphia, for supplying gratuitously copies of Swedenborg's "True Christian Religion" to Protestant clergymen and students of theology in the United States and Canada. The trustees of the fund, to whom the distribution of the work was intrusted, had, in two and a half years, supplied between seven and eight thousand copies to *bona-fide* applicants. In 1873, the American New Church Tract and Publication Society offered to supply to clergymen and students Emanuel Swedenborg's "Heaven and Hell," and had distributed five thousand copies. Mr. Jungerlich had also made provision for distributing Swe-

danborg's "Apocalypse Revealed," under which one edition of one thousand copies had been exhausted, and a second thousand were being distributed. The trustees reported that in no instance had the faculty of any theological school opposed the reading of these works by students. The Executive Committee were directed to take steps to revive the liturgy of the convention, with a view to making it acceptable to the whole Church, and with this object to confer with the commission appointed by the conference of ministers, who had taken steps in the preparation of a liturgy. Appropriate resolutions were adopted in reference to the retirement of the Rev. Thomas Worcester, D. D., of Waltham, Mass., from the office of President, on account of the infirmities of age, and to the resignation of the Hon. J. Young Scammon, Vice-President. A report was made of the Theological School at Waltham, Mass. An address was received from the Convention of the New Church in Great Britain, and a reply to it adopted. The Board of Publication reported progress in the publication of the "True Christian Religion," the "Compendium," and the "Doctrine of Charity," works by Emanuel Swedenborg. Their financial statement showed that the subscriptions had been \$3,099.48; that the total subscriptions to the "fifty-dollar fund" were \$43,515.08, of which \$26,366.14 had been paid in, and \$19,017.54 had been distributed, leaving a balance in hand of \$3,294.65. The publication of the *New Jerusalem Messenger* had resulted in a deficit of \$1,811.54 for the year.

NEW YORK. The annual session of the Legislature of New York began on the 5th of January, and came to a final adjournment on the 22d of May. Early in the session, Francis Kiernan was elected to the United States Senate, to succeed Reuben E. Fenton. There were 420 bills signed by the Governor during the session, and 212 after adjournment; two were allowed to become law by lapse of time without the Governor's signature, 16 were vetoed during the session; 38 of those in the hands of the Governor after adjournment were left unsigned; 27 items in the supply bill, 15 in the reappropriation bill, and 41 in the extraordinary repairs bill, were vetoed. Among the acts passed was a general law for uniformity in the organization and administration of savings-banks. It provides that the Superintendent of the Banking Department shall have the power of chartering savings-banks, after certain forms and proceedings shall have been complied with, and gives him authority to change the names of these institutions, and remove them from one locality to another in the same county. It limits the amount of deposits in the name of one person to \$5,000, and the rate of interest to six per cent., and permits a surplus fund amounting to ten per cent. of deposits to be accumulated, after which all the net earnings must be divided among the

depositors. Deposits may be invested in bonds and mortgages on real estate, in the bonds of the United States, or the State of New York, and in those of other States which have not defaulted in payment of principal or interest within ten years, or in the city, county, and town bonds of the State, and in real estate and buildings necessary for the transaction of the business of the banks. Not more than fifty per cent. of the surplus shall be invested in the last-mentioned form. Loaning deposits upon notes, bills of exchange, drafts, or other personal securities, dealing in merchandise, buying or selling exchange or gold and silver, and collecting or protesting promissory notes, are prohibited. Surplus and available funds must be invested in the same manner as deposits. Each bank is required once a year to make a full statement to the Superintendent, of the transactions of the preceding twelve months, and he must make an examination of every bank once in two years, or at any time when circumstances seem to call for it. All existing savings-banks are required to conform their charters and regulations to this law, but existing investments are not disturbed by it.

An act to prevent bribery at elections provides that "no person shall be permitted to vote at any election in the State who previous thereto shall have been convicted of bribery or of any infamous crime, unless he shall have been pardoned and restored to all the rights of a citizen," and "any person so disqualified who shall vote at any election shall be deemed guilty of a misdemeanor, and on conviction thereof shall be imprisoned in the county jail for the term of six months." A person challenged at the polls, for disqualification under this act, shall be required to take an oath that he has not been convicted of bribery or other infamous crime, or has been pardoned and restored to all the rights of a citizen, and false swearing in such case shall be deemed perjury and punished as such. A bill which occupied a good deal of time and attention, and elicited much discussion, provides for the removal of the Secretary of State, Controller, Treasurer, Attorney-General, State Engineer, Canal Commissioner, and State-prison Inspector, by the Senate, on the recommendation of the Governor, for misconduct or malversation in office, the cause being entered on the journals, and the accused having an opportunity to be heard. During the investigating of charges against an accused official, the Governor may suspend him from office and appoint a suitable person to perform his duties. If the Senate is not in session at the time of such suspension, it must be summoned to convene within thirty days to hear the case. The removal may be made by a majority of all the Senators, and the vacancy must be filled by appointment of the Governor, with the advice and consent of the Senate. Another act created the office of Inspector of Public Works, to be appointed and removed by the Governor, whose duty it is to inspect

all works carried on by, or on account of, the State. He is authorized to examine any books or papers relating to such work, in the custody of any public officer or board, and to take testimony, compelling the attendance of witnesses, and administering oaths. Among other acts passed was one revising the military code of the State; one equalizing the salaries of State officers; one enlarging and defining the powers and duties of county supervisors; one providing for the better protection of poor children, and keeping them out of poorhouses; one authorizing the organization of societies for the prevention of cruelty to children; a general business incorporation act; an act providing for a system of rapid transit in the city of New York; an act providing for a State Board of Audit; and one codifying the laws relating to the incorporation of religious societies. A new act "to suppress intemperance and regulate the sale of intoxicating liquors" was defeated. An act providing that a person sentenced to imprisonment for life or twenty-five years may be discharged at the expiration of fifteen years for good conduct, and receive a full pardon at the end of ten years more, unless convicted of some other crime, was vetoed by the Governor.

The bill reappropriating money for the construction of new work and extraordinary repairs on the canals involved the reappropriation of unexpended balances amounting to \$407,844.88. This was reduced, by the Governor's veto of certain items, to \$340,879.19. The bill for extraordinary repairs, entitled "An act to authorize the construction of work upon the canals of this State," consisting of forty-one items, was vetoed as a whole. Some of the items, the Governor declared, should properly come under provisions for ordinary repairs, and these were already sufficiently provided for; and those relating to repairs properly classed as extraordinary he regarded as unnecessary and the appropriations made under them as unconstitutional, inasmuch as payments for this purpose could only be made from surplus revenues of the canals. The veto of certain items in the "Supply bill," the official title of which was, "An act making appropriations for certain expenses of government and supplying deficiencies in former appropriations," effected a reduction of \$172,169.

Among the investigations ordered during the session was one, to be conducted by a special committee of five, "into the affairs of the Commissioners of Quarantine and Health Officers, and also the affairs of the Commissioners of Emigration, particularly as to all appropriations made and the expenditures thereof, the number of officers employed and the annual salaries paid," and "all and every matter and thing in any wise pertaining to the Quarantine establishment, or Castle Garden, and the management thereof."

Another was ordered by the following resolution:

Whereas, The steady and rapid increase of crime in the city and county of New York has created great alarm in the minds of all good citizens of that city; and—

Whereas, The proper authorities appear to be inadequate to its speedy suppression, while the interests of good government require that offenses against the laws should be dealt with in the most summary and decisive manner: therefore—

Resolved, That the Speaker of the Assembly be, and he is hereby, authorized to appoint a committee of five, which committee shall have power to send for persons and papers and compel the attendance of witnesses, and inquire into the causes, as far as possible, of the great increase of crime in said city and county, and making such examination and investigation of all persons and officers, books and papers, in said city and county, that may in any way be connected with the prosecution, suppression, and punishment of crime, that the said committee may deem essential and necessary for the purpose of ascertaining if such increase of crime can be charged to the negligence or connivance of any of the public officers whose duty it is to either arrest, detect, prosecute, or punish crime in said city and county, together with such other matters as said committee shall deem best. Said committee is hereby authorized to sit during the recess of the Legislature, and report the result of their investigation, together with such recommendations in relation thereto as they may deem necessary and important for the preservation of law and order in said city and county, to the next Legislature; and said committee is authorized to employ a stenographer, who shall be clerk of the committee, and a messenger.

The scope of this investigation was extended by the following resolution:

Whereas, It is against the settled policy of this State to allow imprisonment for debt; and—

Whereas, It is a matter of public notoriety that many are confined in the jail of the county of New York upon civil process only; therefore—

Resolved, That the select committee appointed to "inquire into the causes, so far as possible, of the great increase of crime" in the city of New York, are hereby empowered and directed to investigate the management of the Ludlow Street Jail in said city, and to report, in connection with the other subjects upon which they are empowered to act, a statement of the nature of the process upon which they are so confined; and in all cases where such detention is upon civil process only, with a full statement of the nature of the charges or allegations upon which such process was issued, and of the mode in which such allegations were supported by proof before the magistrate or officer issuing such process, and further to report what legislation is necessary to insure reasonable exemption from the arbitrary and unjust imprisonment and detention of all citizens of this State, and that said committee have power to employ counsel if necessary.

Both these committees made the investigations intrusted to them, during the recess of the Legislature, holding their sessions chiefly in New York City.

One of the most important subjects occupying the attention of the Governor, the Legislature, and the people, during the year, was that of reform in the management of the canals. On the 18th of March the Governor submitted to the Legislature a special message on the subject. He showed that for five years, ending September 30, 1874, the total receipts for tolls had been \$15,058,861.75, while the expenses for operating and for ordinary repairs

had amounted to \$9,202,434.23, leaving an apparent surplus of \$5,855,927.52. During the same period the disbursements for extraordinary repairs had amounted to \$10,960,624.84, causing a real deficiency of \$5,104,697.32. Adding to this payments on the canal debt, and other outlays on account of the canals, an aggregate of over \$11,000,000 was obtained as the amount expended by the State in five years for these works. It was directly charged by the Governor that the expenses for both ordinary and extraordinary repairs had been greatly in excess of what was required. He showed that there had been corrupt and fraudulent contracts for work and materials, which the constitution required to be let out to the lowest bidder. The method of making these contracts was illustrated by the following statement:

When a contract is to be let, the engineer makes out an estimate of the quantity and kinds of work to be done. Those who make bids state at what prices they will do each kind of work, or furnish each kind of material. These prices are footed up, and the bid which amounts to the smallest sum is accepted. The sums thus agreed upon average but little more than one-half the amounts estimated by the engineer, and apparently the State makes advantageous contracts. On examination, it will be found that the prices for the several items bear no relation to their real value. In some instances excavation of earth is put at one cent per cubic yard, and in others eighty-five cents are asked. Excavation of rock blasted at one cent in some cases, and two dollars in others. Slope-wall is bid for in some cases at twenty cents, and in others at two dollars. Hemlock-timber, which is worth at least twelve dollars per thousand, is in some contracts put at less than three dollars per thousand, and in others at thirty dollars per thousand. Oak-timber in one instance is put at one dollar per thousand and in others at seventy dollars. Some items are absurdly low, others unreasonably high.

... When the engineer's estimate of quantities and kinds of material are published by the Commissioners, the contractor will find out by collusion, or in some other way, what quantities of each kind of work or material will, in fact, be required, or he will see what influence he can exert to change the contract after it is made. If it is changed, no new letting is had, but he claims the job as his right. He then puts in his bid, offering to do such work or to furnish such material as he finds will not be required at all, or in small quantities, at absurdly low prices, at a quarter or in some instances at a twentieth part of its cost. The items which will be required in full, and probably in extra quantities, he will put at unreasonably high rates, and it turns out that what the contractor offers at low prices is called for in small quantities, if at all, while those which are put at high prices are not only required in full, but in most cases in extraordinary quantities.

An example will more clearly illustrate how the State is defrauded by these devices.

The engineer having estimated certain work and materials as follows:

100 cubic yards of vertical wall at \$8.....	\$800 00
8,855 " " slope-wall at \$1.50.....	5,782 50
2,400 feet B. M. white-oak at \$50.....	120 00
60,000 " " hemlock at \$15.....	900 00
Total estimate.....	\$7,102 50
A's bid for the job at these rates amounted to.....	7,102 50
B's bid for the same was, for—	
100 cubic yards vertical wall at \$6.....	\$600 00
8,855 " " slope-wall at 90c.....	1,156 50
2,400 feet B. M. white-oak at \$70.....	168 00
60,000 " " hemlock at \$8.....	190 00
Aggregated.....	\$21,104 50

The proposal of B, apparently so advantageous to the State, was accepted, and the contract awarded to him as the "lowest bidder." But afterward, by some influence, it was decided to make only vertical and no slope wall, and to use only oak and no hemlock timber. There was no reletting, although the agreement had been in fact revamped into a new and different contract, which enabled B to collect from the State for—

8,955 cubic yards of vertical wall at \$6.....	\$23,780 00
62,400 feet B. M. white-oak at \$70.....	4,368 00
Total.....	\$28,098 00

As a result of this kind of contracting, it was shown that the State had paid, up to February 1, 1875, \$1,560,769.84 on ten contracts, while the amount to be paid, upon the quantities exhibited in the proposals at the contract prices, would have been \$424,735.90. The Governor recommended various measures of reform to remedy the evils in canal management. He proposed that on a change of plan or specifications of contract there should be a new letting; that the award of contracts be made by the Canal Board, who should be authorized to discard bids showing bad faith on the face of them; that an Inspector of Public Works be provided for; and that provision be made to "enforce the accountability of the officers charged with the disbursement of the public money by a liability to summary removal or suspension." He also suggested that an investigation be made in order that frauds might be "exposed and punished, and a check be put upon practices so destructive to morals, as well as to the public interests of the people of the State."

Governor Tilden's suggestions in favor of reform in the administration of the canals were earnestly applauded by the Produce Exchange and Chamber of Commerce of New York, and many of the other public and political bodies, and a large portion of the press of the State. The subject was at once placed in the hands of a committee in the Legislature, and several acts were passed for the purpose of carrying out the recommendations of the message. Those providing for the removal of officials, and the appointment of an Inspector of Public Works, have already been noticed. A bill abolishing the office of canal superintendents, and making other important changes in canal management, passed the Assembly, but failed in the Senate. An act was passed authorizing the Canal Commissioners and State Engineer and Surveyor to examine into the matter of disposing of the lateral canals, and report a plan for the purpose to the next Legislature. The points to be covered in their report were designated as follows:

1. The portion of the lateral canals which, in their judgment, it is desirable for the State to retain as feeders or otherwise, with the reasons therefor.
2. The portion of the laterals which, in their opinion, it is desirable that the State should dispose of.
3. The best manner in their judgment of disposing of the same.

A joint resolution was adopted authorizing the Governor to appoint, with the advice and

consent of the Senate, a commission of four members to investigate the alleged frauds in making contracts, and in the general management of the canals; and an act was passed empowering the Commissioners so appointed to compel the attendance of witnesses. The Commissioners appointed were John Bigelow, of New York; Daniel Magone, Jr., of Ogdensburg; Alexander E. Orr, of Brooklyn; and John D. Van Buren, Jr., of New York. They met at Albany, and organized for their work on April 12th. The next five or six weeks, before the water was let into the canals, they spent in making a personal inspection of the work done under various contracts. Their first report to the Governor was made on August 2d. This was devoted largely to work done by H. D. Denison on the Erie Canal between Port Schuyler and the lower Mohawk Aqueduct. It showed fraudulent estimates, false measurements, and charges for excavations and embankments that were never made; the amount allowed for work never done being \$150,387.02. It was also shown that while the law expressly provided that only five per cent. should be expended for vertical walls, nearly ninety-five per cent. of the cost was incurred upon them, and that no slope-wall had been laid. The total appropriation required for the entire work, according to careful estimates, was a little under \$88,000, which was only one-sixth of the amount expended on an uncompleted and vastly inferior work. The Commissioners found that no surveys, maps, or estimates, were ever made before this contract was let; and that, while the official minutes of the Canal Board indicate that "maps, plans, and estimates," had been submitted to the Canal Commissioners, and were adopted subsequently by the Canal Board, as a matter of fact the Canal Commissioners never took any action upon the matter until the Canal Board had authorized the letting of the work. Denison, who was in reality the highest bidder, was made to appear the lowest. He simply bid very low prices for three of the major quantities, and enormously high prices for two of the minor ones. After the contract was signed, the conditions were completely changed. One material was substituted for another, and then charged as "extra work" at its full value. From 1,500 cubic yards—the engineer's estimate—the rock excavation increased to 54,021 cubic yards, and the embankment from 1,100 to 78,460 yards, and in either case Denison's price was from fifty to seventy-five cents greater than the average of all other bids.

During the investigation of the case, Mr. Denison refused to produce his books before the Commissioners, and was committed to the jail in Albany for contempt. He was released on writ of *habeas corpus* by Justice Leonard of the Supreme Court. An appeal was taken, and in November a decision was rendered in favor of the commission, declaring that it was

lawfully created; that it was vested with authority to issue subpoenas, to enforce the attendance of witnesses, and to compel the production of books and papers; and in case of disobedience or refusal it was authorized to proceed as if it were a court of record." The order of the justice was reversed, and the relator remanded to the custody of the Sheriff of Albany County. In the mean time suit had been brought in the Supreme Court against Denison, Belden & Co., for restitution of money fraudulently obtained. An order of arrest and attachment was issued on August 9th, and the case was pending at the close of the year.

The investigation of the commission continued during the summer and fall, and twelve successive reports were submitted to the Governor, the twelfth bearing date December 25th. These show a vast amount of fraud in the making and executing contracts for repairs on the canals. Among the results of the investigation were the arrest and arraignment at Buffalo on criminal indictment of ex-Canal Commissioner Alexander Barkley, Canal Appraiser Thaddeus C. Davis, and Messrs. George D. Lord, Lewis J. Bennett, and William H. Bowman, for conspiracy to defraud the people of the State of \$36,855 in connection with a contract with John Hand for dredging at Black Rock Harbor. George D. Lord was accused of accepting a bribe for favoring the claim of Mr. Hand, while a member of the Legislature. The accused were held for trial under bail for their appearance at the proper time. Indictments were also found, in Niagara County, against William McRae, superintendent of section ten of the Erie Canal, for malfeasance in office; against Charles Molyneux, his clerk, for forgery; against P. H. Lumeen, foreman, and McRae, for forgery; and against Robert S. Patterson, another foreman, for perjury.

In the eighth report of the investigating commission, it was shown that Francis S. Thayer, Auditor of the Canal Department, had taken advantage of the necessities of a creditor of the State to purchase his claim of \$85,000 for \$31,500 after obtaining from the Attorney-General assurance that an opinion would be given in favor of the validity of the claim. In the twelfth report it was stated that the Auditor had been in the habit of withholding his audit on claims, for no apparent purpose but to purchase them; and to purchase them, too, before auditing them, with money borrowed on the security of such claims, from the Troy City National Bank, which, for the more successful prosecution of this traffic, had been made a depository of canal funds through his influence and at his special instigation.

It appeared from the testimony that from December 7, 1874, to July 2, 1875, he had purchased drafts and certificates against the State to the number of fifty-eight, representing in value \$318,343.81. After purchasing these claims he audited them himself, and received

payment for them, making considerable profit by these transactions. Charges were presented by the commission against the Auditor, before the Commissioners of the Canal Fund, which consisted of the Lieutenant-Governor, Secretary of State, Controller, Attorney-General, and Treasurer; and on the 28th of December that body adopted the following resolution:

Resolved, That a requisition is hereby made upon his Excellency the Governor, to suspend Francis S. Thayer, the Auditor of the Canal Department, and to appoint a suitable person to perform his duties, if it shall be made to appear to him that the said Auditor has violated his duty in respect to the public moneys in his charge and subject to his draft, the particulars of which alleged violations of duty appear in the report of the commission to investigate the affairs of the canals of the State, which has been submitted to this board, and which is herewith transmitted.

The same day Mr. Thayer was suspended from office, and the Treasurer notified of the fact, and requested to "scrutinize carefully all warrants drawn upon you by him and still unpaid, and to refuse to pay any you may find that are in any respect suspicious, until they can be investigated."

With regard to future measures affecting the canals, Governor Tilden, in his message to the Legislature of 1876, made the following suggestions:

In this state of things it is obvious that our first measure should be to ascertain completely, and without unnecessary delay, the financial condition of the canals; the state of the contracts yet outstanding for extraordinary work, in order to determine what ought to be stopped or abandoned, and what ought to be continued, and the means applicable to any expenditure they may require. A second measure is the careful and thorough investigation of ordinary expenses and repairs, for the purpose of keeping them down to the lowest point consistent with the efficiency of the canals. A third measure relates to the disposition of such laterals as are not necessary

as feeders. It will be recollected that at the last session, in view of the complicated questions incident to this subject, requiring legal, engineering, and business skill, and much devotion of time and attention, I recommended its reference to a special commission. The Legislature, however, preferred to charge the Canal Commissioners and State Engineer and Surveyor with the additional duty. I am not advised what report they will make on the subject. A fourth measure is a radical change in the system of administration. The present machinery is chaotic, and except with something of the unity which existed in practice under the old constitution, the Canal Board is incapable of acting with efficiency or economy. The abuses, perversions of law and morals, improvidence and waste which cling around it, are the growth of years. When a man of average well-meaning and average ability comes singly into one of these administrative offices, the graft develops, not its own nature, but the nature of the parent stem. It is difficult to carry out reform by instruments that are incurably averse to reform; whose indolence, comfort, associations, habits, assistants and advisers, are all naturally opposed to what they are expected to do. Every step of progress is not only through an enemy's country, but beset by unexpected betrayals. A constitutional amendment, changing the system of administering the canals, was unanimously passed by both Houses at the last session. Your attention is respectfully called to the importance of an early consideration of the subject. A fifth measure is the continuance for the present year of the reduction in the tolls made for last year. A sixth measure is to subject all the work called extraordinary repairs to a systematic and thorough scrutiny, and discard everything that is not clearly and certainly necessary. When the *debit* of the old rotten system shall be cleared away, there is a work of real utility and small cost, which will claim an early attention, and for which the people would be willing to provide the means.

The income and expenses of the canals for the fiscal year ending September 30, 1875, given in the following table, show the tolls received on each canal, and the total expenditures for ordinary and extraordinary repairs and new work:

CANALS.	Income Tolls.	DISBURSEMENTS.			Income in Excess of Disbursements.	All Disbursements in Excess of Income.	Income in Excess of Disbursements for Ordinary Repairs.	Disbursements for Ordinary Repairs in Excess of Income.
		Ordinary Repairs.	Extraordinary Repairs and New Work.	Total.

Cayuga Inlet.....	869 98				869 98		869 98	
Crooked Lake Canal.....	126 09	7,896 80		7,896 80		7,270 71		7,270 71
Total.....	\$1,902,990 64	\$1,264,721 79	\$978,318 80	\$2,283,065 59	\$231,371 41	\$564,916 86	\$906,064 68	\$266,795 88

Total disbursements on all canals in excess of tolls, \$335,044.95. Tolls in excess of disbursements for ordinary repairs, \$638,268.85.

The following is a comparative statement of

the revenues and expenses for the fiscal years 1874 and 1875, showing the aggregate receipts and payments on account of the ordinary expenses of the canals for the last two years:

STATEMENT.	1874.	1875.
Receipts from tolls, etc.....	\$2,947,973 91	\$1,925,995 68
Payments to superintendents and repair contractors.....	\$1,176,091 46	\$985,105 10
Payments by Canal Commissioners for repairs.....	121,694 91	279,616 69
Payments to collectors and their assistants.....	84,888 44	75,887 41
Payments to weighmasters and their assistants.....	12,846 89	12,118 09
Refunding tolls, salaries of officers, etc.....	74,070 68	61,759 65
Reserve balance of appropriation for concreting the sixteen locks and re-trunking the Upper and Lower Mohawk aqueducts.....		52,859 01
Total expenses for the year	\$1,469,466 58	\$1,467,815 95
Net receipts.....	1,478,506 08	458,679 68

This statement shows a falling off in the toll receipts of the last fiscal year as compared with those of 1874 of \$1,021,977.28, decrease in payments of \$2,150.88, and a loss in net receipts of \$1,019,826.40—the net revenue being \$625,610.70 short of the requirements of the sinking-fund under Art. VII., section 8 of the constitution; the amount required being as follows:

Interest, in coin.....	\$684,290 88
For sinking-fund.....	450,000 00
Total.....	\$1,084,290 88
Actual surplus.....	458,679 68
Deficiency.....	\$625,610 70

The following statement shows the total amount of work done during the fiscal year ending September 30, 1875; also the amount of work remaining to be done on all existing contracts upon the New York State canals:

NAME OF CANAL.	Amount done during the Fiscal Year.	Amount remaining to be done.
Erie.....	\$728,908 70	\$228,619 43
Champlain.....	*140,550 25	†180,610 69
Oswego.....	9,279 87	14,500 00
Chenango.....	2,494 68	2,000 00
Chemung.....	1,418 53	
Cayuga & Seneca.....	8,973 81	
Genesee Valley.....	7,107 65	
Oneida Lake.....	16,591 68	\$9,700 00
Chenango Extension.....		401,974 45
Crooked Lake Canal.....	928 49	
Ithaca Inlet.....	7,695 70	
Totals.....	\$916,931 46	\$892,397 56

The total length of navigable canals and feeders, together with lakes and rivers artificially connected therewith in the State of New York, is as follows:

Total length of artificial canals and feeders.....	Miles. 907
Hudson River, New York to Waterford.....	155
Lake Champlain, Whitehall to Rouse's Point.....	111
Oneida Lake.....	22
Cayuga.....	89
Seneca.....	35
Crooked.....	19
Delaware & Hudson Canal (in this State) belongs to a corporation.....	87
Junction Canal belongs to a corporation.....	18
Total.....	1,398

* Including \$107,451.17 for work on enlargement of the Champlain Canal.

† All the work remaining to be done on contracts for the enlargement of the Champlain Canal.

The cost of canals and railroads in the State, including equipment, up to 1875, is approximately as follows:

New York State canals and equipment.....	\$100,717,965
New York Central & Hudson River Railroad and equipment.....	92,504,568
Erie Railway and equipment.....	118,073,900
All remaining steam roads and equipments.....	890,961,527
Roads operated by horse-power and equipment.....	84,600,867

Total cost railroads and canals and equipments \$785,868,332

This is equal to one-third of the gross taxable property of the State, real and personal.

The total length of rail and water lines within the State in 1874 was as follows:

Length of canals and feeders (navigable).....	Miles. 907
Lakes and rivers connected artificially therewith.....	851
Total length water lines.....	1,258
Length of steam railroads laid within the State.....	3,310
Length of horse railroads laid within the State.....	400

Total length rail and water..... 4,568

The number of tons of freight actually transported upon the foregoing lines, in 1874, was as follows:

Upon New York State canals.....	Tons. 5,504,868
Upon steam roads.....	22,055,000
Total.....	29,559,868

Number of passengers carried on steam roads in 1874.....	84,719,918
Number of passengers carried on horse railroads in 1874.....	228,872,111

Total number of passengers carried..... 313,592,029

The receipts from freight transportation in the State, during 1874, were as follows:

Tolls and freight upon New York canals.....	\$2,932,971
Receipts from freight, steam roads.....	62,665,004
Total receipts.....	\$71,598,255
Total receipts from passengers, steam roads.....	20,000,530
Total receipts from passengers, horse railroads.....	12,008,684

Total from passengers and freight..... \$103,607,469

The actual cost of transportation was—

Cost of freight transportation, New York State canals.....	\$4,385,386
Cost of freight and passengers, steam roads.....	60,545,122
Cost of freight and passengers, horse railroads.....	10,177,251
Total.....	\$75,107,759

The nominal amount of the debts of the State on the 30th of September, 1875, was \$28,326,686.40, classified as follows:

General fund.....	\$3,119,526 40
Contingent.....	65,000 00
Canal.....	10,008,680 00
Bounty.....	15,054,500 00

Total..... \$28,247,706 40

The amount of those debts, after deducting the assets in the sinking-funds at that time applicable to their payment, is exhibited by the following statement:

FUNDS.	Debt, September 30, 1875.	Sinking-Fund, Sept. 30, 1875.	Balance.
General fund.....	\$3,119,526 40	\$3,029,606 70	\$89,919 70
Contingent.....	65,000 00	85,677 64	21,677 64
Canal.....	10,008,680 00	1,443,345 51	8,565,334 49
Bounty.....	15,054,500 00	9,066,758 29	5,987,741 71
Total.....	\$28,247,706 40	\$13,565,389 14	\$14,742,317 26

The actual reduction, during the year, of the debts by cancellation of matured stocks, and by the purchase of \$858,000 of the bounty loan for the sinking-fund, was \$1,870,770. The diminution, during the year, of the debts, after deducting the assets of the sinking-funds, was \$2,744,505.06.

The tax levy of 1874 was 7½ mills on a valuation of \$2,169,307, producing \$15,727,482.08. In 1875 the tax levy was 6 mills on a valuation of \$2,867,780,102, producing \$14,206,680.61, in reduction in taxes of \$1,520,801.47.

The following statement shows the amount appropriated for various purposes, compared with the amount realized from taxes:

OBJECT.	Mills.	Appropriations of 1875.	Amount of Tax of 1875.
Schools.....	1½	\$2,712,000 00	\$2,959,735 13
Bounty debt.....	2	4,360,000 00	4,735,560 20
Capitol.....	1	1,000,000 00	1,138,800 05
Canal floating debt.....	1	264,000 00	295,972 51
Canal awards.....	1	422,766 90	478,556 02
General purposes.....	1½	2,986,825 00	3,255,067 64
Deficiency and asylums.....	1½	1,295,218 58	1,302,279 06
Total.....		\$12,173,805 48	\$14,206,680 61
Excess of tax over appropriations.....			\$1,068,875 18

The Governor in his message to the Legislature of 1876 endeavored to show the practicability of reducing the rate of taxation to 3.321 mills on the valuation of 1875, which would yield a revenue of \$7,868,741.04. This, he maintained, would be sufficient for all necessary appropriations.

The aggregate bonded debt of the counties, cities, towns, and villages, of the State is \$214,344,676.58, or 10½ per cent. of the valuation of property in 1871. The ratio of debt to valuation ranges from 1 per cent. in Washington County to 24½ per cent. in Ulster. That for New York County is 10½ per cent. The purposes for which this heavy aggregate of debt was incurred were as follows: \$26,946,662.09 in aid of railroads; \$10,416,864.84 for public buildings; \$26,934,966.19 for war and bounty expenses; \$36,658,144.59 for roads and bridges; and \$29,335,385.79 for water-works and fire-apparatus.

There were 84 banks doing business under the laws of the State on the 1st of October. During the year preceding eight new banks had been organized, one had failed, and three had been converted into national banks. The amount of circulation outstanding October 1st was \$849,226.50. All but twenty-three of the banks had taken steps for a final redemption of their notes. On the 1st of July there were 160 savings-banks, five of which afterward closed their business. The aggregate assets of these institutions were \$336,308,236.43; the amount of deposits was \$316,835,617.82; number of depositors, 891,992. The increase in deposits during the six months preceding was upward of \$12,000,000, and the increase in the number of depositors was 19,494. There were eleven trust, loan, and indemnity companies doing business on the 1st of July; one

had closed during the year preceding, and a new one began operations on the 1st of September. The aggregate capital of those in business July 1st was \$11,564,475; total assets, \$69,654,948; amount due to depositors, \$50,865,569.

The number of insurance companies subject to the supervision of the Insurance Department, on the 19th day of November, 1875, was 281, as follows:

New York joint-stock fire-insurance companies.....	102
New York mutual fire-insurance companies.....	8
New York marine insurance companies.....	9
New York life-insurance companies.....	23
New York plate-glass insurance companies.....	1
Fire-insurance companies of other States.....	91
Marine insurance companies of other States.....	1
Life-insurance companies of other States.....	25
Casualty-insurance companies of other States.....	4
Canadian fire-insurance companies.....	2
Foreign fire-insurance companies.....	11
Foreign marine insurance companies.....	4

The total amount of stocks and mortgages held by the Insurance Department for the protection of policy-holders of fire, life, and casualty insurance companies of this State, and of foreign insurance companies doing business within it, was \$11,036,053. The assets of the life-insurance companies of this State amounted to nearly \$200,000,000, the amount insured by them to \$1,000,000,000, and their annual receipts to more than \$60,000,000.

The amount expended on the new State Capitol, up to June 20th, was \$5,997,495.16. A new commission, provided for by the last Legislature, and consisting of the Lieutenant-Governor, Auditor of the Canal Department, and Attorney-General, was organized on the 29th of June.

Four State institutions are still in process of construction. The expenditures upon them, thus far, are as follows:

Hudson River Asylum—total expenditure to December 30, 1875.....	\$1,537,978 59
Buffalo Asylum—total expenditure to December 30, 1875.....	767,251 91
Middletown Asylum—total expenditure to December 30, 1875.....	454,099 83
Elmira Reformatory—total expenditure to December 30, 1875.....	760,117 98
Total.....	\$2,819,547 79

It is thought that an equal amount will be required for their completion.

The following statement shows the expenditures and earnings of each of the State-prisons for the year ending September 30, 1875:

STATE-PRISONS.	Advances from the Treasury.	Received from Earnings.	Excess of Expenditures.
Auburn.....	\$206,719 35	\$76,985 69	\$131,733 78
Clinton.....	323,683 13	133,446 25	195,191 88
Sing Sing.....	841,396 20	158,596 64	188,229 56
Miscellaneous expenditures not distributed, including \$23,144.50 for transportation of convicts.....	35,344 50		35,344 50
Total.....	\$914,528 18	\$268,978 51	\$545,549 67

The number of convicts in each of the prisons, September 30, 1873, 1874, and 1875, was as follows:

STATE-PRISONS.	1873.	1874.	1875.
Auburn.....	1,104	1,302	1,312
Clinton.....	567	552	553
Sing Sing.....	1,854	1,806	1,616
Total.....	3,525	3,660	3,481

The following are the common-school statistics of the State for the year ending Sept. 30th:

Total receipts, including balance on hand September 30, 1874.....	\$12,516,302 96
Total expenditures.....	11,835,877 79
Amount paid for teachers' wages.....	7,543,381 67
Amount paid for schoolhouses, repairs, furniture, etc.....	1,844,347 20
Estimated value of schoolhouses and sites.....	35,393,190 00

Number of schoolhouses.....	11,787
School-districts, exclusive of cities.....	11,369
Teachers employed for the legal term of school....	19,157
Teachers employed during any portion of the year	29,977
Children attending public schools.....	1,068,546
Persons attending normal schools.....	4,907
Children of school-age in private schools.....	185,093
Volumes in school-district libraries.....	812,555
Persons in the State between the ages of five and twenty-one years.....	1,579,504

The amount raised by the State school-tax of $\frac{1}{4}$ mill was \$2,959,725.13.

The National Guard of the State consists of eight divisions, eighteen brigades, one regiment and ten separate troops of cavalry, eleven separate battalions of artillery, and twenty-five regiments, twelve battalions, and seven separate companies of infantry. They comprise 1,505 commissioned officers, and 17,908 non-commissioned officers, musicians, and privates.

The Republican State Convention was held at Saratoga on the 8th of September. George William Curtis, of New York, presided over its deliberations, and made an address urging the nomination of men of the highest character and the adoption of sound principles. The candidates nominated were: Secretary of State, Frederick W. Seward, of New York; Controller, Francis E. Spinner, of Herkimer; State Treasurer, E. A. Merritt, of St. Lawrence; Attorney-General, George F. Danforth, of Monroe; State Engineer and Surveyor, Oliver H. P. Cornell, of Tompkins; Canal Commissioner, William T. Tinsley, of Wayne; State-prison Inspector, Benoni I. Ives, of Cayuga.

The platform adopted was as follows:

The Republicans of New York, faithful to justice and liberty, to the supremacy of the Constitution, to the national unity and the just rights of the States, make the following declaration of principles:

1. The national Government should remain in the hands of those who sustain the guarantees of the amended Constitution, and, in pursuance of the past action of the Republican party and its good results, the welfare of the country requires a just, generous, and forbearing national policy in the Southern States; a firm refusal to use military power, except for purposes clearly defined in the Constitution; and the local enforcement of national authority by those only who are in sympathy with such a policy, and will heartily support it.

2. We demand honesty, economy, and efficiency in every branch of the State and national administrations, prompt investigation of all charges of wrong-doing, and summary exposure, prosecution, and punishment of wrong-doers. We therefore heartily commend the action of all officers, whether of the State or national Government, in their honest efforts for the correction of public abuses. We

pledge to them our constant and faithful support, and we charge every nominee of this convention to cooperate in every honorable way to secure pure government and to bring offenders to justice.

3. The people should nominate for the Legislature only men who are pledged by their known character to provide and sustain measures calculated to rescue and preserve the State from every form of corruption and maladministration.

4. The guilty offenders in the management of the canals should be brought to speedy punishment, and the Executive, under the powers already conferred upon him, should suspend all officers who have violated the law.

5. The Republican party has proved itself from the beginning the party of practical reform and sound economy. In the affairs of this State it has, within the last four years, provided for the payment of \$20,000,000 of the public debt, and practically extinguished the general State indebtedness, and by this action has made it certain that the tax for the next year will be reduced about \$5,000,000.

6. Further inflation of the currency, under any pretense whatever, would be a public calamity. The interests of honest industry and the common welfare demand the speediest possible return to specie payments.

7. The whole subject of taxation ought to be carefully and wisely reviewed, to the end that its burdens should bear equally upon all.

8. Recognizing as conclusive the President's public declaration that he is not a candidate for re-nomination, and with the sincerest gratitude for his patriotic services, we declare our unalterable opposition to the election of any President for a third term.

9. The free public school is the bulwark of the American Republic; we therefore demand the unqualified maintenance of the public-school system, and its support by equal taxation. We are opposed to all sectarian appropriations; and we denounce as a crime against liberty and republican institutions any project for a sectarian division or perversion of the school-fund of the State.

10. The national Administration, by its steadfast fidelity to the principles of commercial honor, by its opposition to unsound financial projects, by its calm avoidance of collisions with foreign powers, by its reliance on justice and reason, rather than force, in the settlement of disputes, by its firm vindication of the national dignity and authority, by rigidly enforcing the laws, correcting abuses, punishing offenders and enforcing retrenchment without boastful ostentatious pretension, deserves the gratitude of the American people, and adds lustre to the service in the war, of the distinguished soldier and patriot who stands at its head.

The Democratic State Convention met at Syracuse on the 15th of September, and occupied two days in its proceedings. Judge Hezekiah Sturges, of Otsego County, presided. The ticket put in nomination was as follows: For Secretary of State, John Bigelow; for Controller, Lucius Robinson; for Attorney-General, Charles S. Fairchild; for Treasurer, Charles N. Ross; for State Engineer and Surveyor, John D. Van Buren, Jr.; for Canal Commissioner, Christopher A. Walrath; for Inspector of State-prisons, Rodney R. Crowley.

The following was the platform adopted:

The Democratic party of New York renew their pledge of fidelity to the principles adopted and affirmed unanimously by the delegates representing Democrats of all the United States together assembled in their latest National Convention, and since reapproved by Democratic majorities in fifteen States, comprising more than half the total population of the Union:

From the National Democratic Platform, Baltimore, July 10, 1872.]

1. The public credit must be sacredly maintained, and we denounce repudiation in every form and guise.
2. A speedy return to specie payment is demanded like by the highest considerations of commercial morality and honest government.

To these authentic declarations of Democratic principle and policy time gives proof. The present depression of business is caused by reaction from the unhealthy stimulus of an excessive, depreciated, and irredeemable currency; by enormous and ill-adjusted municipal, State, and Federal taxation, and by extravagance, waste, and speculation, in the administration of public affairs. The remedy for this ailment is not to be found in the renewal of any of its causes. In face of the fact that the existing volume of the currency is greater than can be absorbed by business; in face of the fact that the recent fall of prices has followed repeated inflations, any attempt to increase the currency would be worse than ineffectual to revive prosperity, for it would interrupt the healing processes of industry. It would be worse than futile to restore confidence, for it would create distrust and new uncertainties in business, paralyze the beginnings of enterprise, rob labor of its too scanty employment, and, while stifling the progress of administrative reforms, would inflict lasting dishonor upon the credit, intelligence, and character, of the country.

The Democratic party of New York also affirm the principle set forth in their platform adopted last year at Syracuse, indorsed by fifty thousand Democratic majority at the election following in a poll of nearly eight hundred thousand votes, and vindicated before all the people of this republic by the illustrious administration of Governor Samuel J. Tilden.

From the New York Democratic Platform, Syracuse, September 7, 1874.]

1. Gold and silver the only legal tender. No currency inconvertible with coin.

2. Steady steps toward specie payments. No step backward.

3. Honest payment of all public debt in coin. Sacred preservation of the public faith.

4. Revenue reform. Federal taxation for revenue only. No Government partnership with protected monopolies.

5. Home-rule. To limit and localize most jealously the few powers intrusted to public servants, municipal, State, and Federal. No centralization.

6. Equal and exact justice to all men. No partial legislation. No partial taxation.

7. A free press. No gag-laws.

8. Free men. A uniform excise law. No sumptuary laws.

9. Official accountability, enforced by better civil and criminal remedies. No private use of public lands by public officers.

10. Corporations chartered by the State always supervisable by the State.

11. The party in power responsible for all legislation when in power.

12. The presidency a public trust, not a private prerogative. No third term.

13. Economy in the public expense, that labor may be lightly burdened.

The Democrats of New York, in convention assembled, pledge themselves, their nominees, and their representatives in Senate and Assembly, to follow where an honest and fearless chief-magistrate has dared to lead in reforming the administration of our great canals, so long despoiled in their construction, maintenance, repairs, and revenues; to carry on, with unwavering purpose and fidelity, wise measures to increase the efficiency of all departments of public works and service, and to persist in reducing our State tax, in which the burdens have already been lightened by the retrenchments and re-

forms of a single year to the amount of nearly three million dollars, and upon this paramount, immediate, and practical issue of administrative reform we cordially invite the coöperation of every true Democrat, every Liberal Republican, and all our fellow-citizens, of whatever party-name, who are willing, in the coming State elections, to unite with us in supporting reform candidates upon a reform platform.

On September 22d the Liberal Republicans held a convention at Albany. A State Committee was appointed, but no nominations were made. The following resolutions were adopted:

Resolved, That we consider it self-evident that there can be no sound currency but coin, or paper convertible into coin on demand, without a speedy return to which national disaster threatens; that the whole system of civil service needs reform; that the military authority be subordinate to the civil; that a single presidential term is enough; that local self-government is the basis of free government, and that forcible interference with this right of States usurps it; that social, civil, and political tests discriminating race and color, are fatal to equal and exact justice to all men; that the original and the amendments of the Federal Constitution are obligatory in their text and spirit, and in their judicial exposition, subject neither to executive caprices nor to the exigencies of a personal government; that a free press is the bulwark of freemen; that municipal rights be respected, monopolies repressed, and economy in public expenditures observed; that the minimum of taxation be secured, speculators punished, and the corruption of public morals banished; that canal reform be upheld, and the school-fund be sacredly devoted to our present system of common schools, and that appropriations of the people's money to sectarian uses cease; that bribery and corruption are the canker of the body politic, and should be pursued through all their subtle forms, and the guilty punished.

Resolved, That while official trusts are inherent in the system, and honest and capable incumbents are essential to the administration of every good government, the intrusion of office-holders into the machinery of politics, and their active participation in nominating conventions, are a notorious abuse, at once offensive to public decency and productive of unmitigated evil. We therefore denounce the practice and demand their exclusion from future political conventions.

Resolved, That we condemn the national Administration for its illegal and oppressive acts, for its retention of corrupt men in office, for its shifting and unstable policy in the administration of the finances, for its inflation of the currency, its fraudulent pretenses to the contrary notwithstanding, for its extravagant expenditures, and its general disregard for an intelligent public opinion.

Resolved, That with every advocate of honesty in public affairs we rejoice in the prospect that the gang of confederate thieves within the canal ring, who have seized upon the substance of the people of the State, shall be pursued and subjected to condign punishment; and while this consummation has been publicly prayed for by the Liberals, they by no means stint the generous measure of praise due irrespective of political considerations to Samuel Tilden, the leader of those crusades, and they by all means propose to sustain his hands, and the hands of everybody besides, who they shall have reason to believe will fight, or whom they find fighting, for pure and incorrupt governments in the interest of the people, and they caution the electors to choose for legislative officers none but those who can be depended on to sustain all measures of reform.

Resolved, That the Liberal Republicans of the State of New York, in convention assembled, intending to maintain the principles they have now re-

peated and hitherto uniformly proposed, congratulate the country upon the general favor to which they have attained, and believing that, if not entirely, yet they are substantially recognized by both the Democratic and Republican parties of the State, do not think it necessary or useful to nominate a State ticket. They do therefore recommend to the Liberal and independent voters of the State to support those candidates already in nomination, whose character and experience they most approve and who, in their judgment, will earnestly and efficiently cooperate with Governor Tilden in his work of administrative reform.

Other resolutions, in favor of consolidating with the Democratic party, were rejected.

The election was held on the 2d of November, and the Democratic candidates were chosen. The total vote for Secretary of State was 777,663, of which John Bigelow received 390,211, F. W. Seward 375,401, and George B. Dusenberre, Prohibitory candidate, 11,103; Bigelow's plurality over Seward, 14,810; majority, 8,707. The vote for Controller was 389,699 for Robinson, 376,150 for Spinner, and 10,614 for A. A. Hopkins: total, 773,213; Robinson's plurality, 13,549; majority, 2,985. The Legislature of 1876 consists of 20 Republicans and 12 Democrats in the Senate, and 71 Republicans and 57 Democrats in the Assembly, making the Republican majority 8 in the Senate, 14 in the Assembly, and 20 on a joint ballot.

JOHN BIGELOW, the new Secretary of State, was born in Malden, Ulster County, November, 1817, and was graduated at Union College in 1835. He studied law with Robert Sedgwick, and was admitted to the New York bar in 1858, but soon united literary work with his professional pursuits. In 1840 he was literary editor of the *Plebeian*, and was for several years a regular contributor to the *Democratic Review*. In 1845 he was appointed one of three inspectors of the State-prison at Sing Sing, and held the position two years, after which the inspectors were elected by the people. He made a trip to the West Indies in January, 1850, and on his return published a volume entitled "Jamaica in 1850." The same year he became part owner of the *New York Evening Post*, and had an editorial connection with that journal during the next ten years. Under the Administration of President Lincoln he was offered the position of consul at Paris, and was for three years connected with the legation at the French capital under Minister William L. Dayton. On the death of Mr. Dayton, in December, 1864, he became *chargé d'affaires*, and on the assembling of the Thirty-eighth Congress was confirmed as minister. He held the position until the appointment of General Dix by President Johnson in 1866. In the mean time he had disposed of his interest in the *Evening Post*, and on his return to America devoted himself to general literary labor. The study of the life and services of the first American minister to France, Benjamin Franklin, had engaged his attention while abroad, and he had the good fortune to

secure the original manuscript of Franklin's memoir, parts of his correspondence during his stay in France, and his portrait, painted by Duplessis. A series of magazine articles was the earliest public announcement of his discoveries, and at a later date the collection was published in the form of an autobiography of Franklin. During his stay in Paris Mr. Bigelow published there "Les États-Unis d'Amérique," and he had previously added to his published works a "Life of Fremont." Shortly after the death of Henry J. Raymond, he was called to the management of the *New York Times*, a position he held but a short time. Soon after he left his residence at Highland Falls, Orange County, N. Y., and passed some time in Berlin. Shortly after his return he was appointed one of the commissioners to represent the State at the Centennial Exposition, a position he devoted much time to till his appointment, April 7, 1875, on the Canal Investigating Commission. Upon the assembling of that board he was elected its president.

The Commission of Appeals which was created in 1870, to assist the Court of Appeals in disposing of accumulated business, ceased to exist on the 1st of July. During the five years of its existence it had about one thousand cases assigned to it. Its decisions are comprised in six volumes of reports. The commission, as at first constituted, consisted of John A. Lott, chief-commissioner, Ward Hunt, Robert Earl, Hiram Gray, and William H. Leonard. Commissioner Leonard resigned in 1872, and John H. Reynolds was appointed to fill the place; Commissioner Hunt resigned in 1873, to take a place on the Federal bench, and Alexander S. Johnson was appointed to the vacancy; Mr. Johnson was appointed a Judge of the Court of Appeals late in the same year, and his place was filled by Theodore W. Dwight.

Judge Alexander S. Johnson, who was defeated for reelection to the bench of the Court of Appeals in 1874, by his Democratic opponent, has been appointed United States Circuit Judge to fill the vacancy caused by the death of Judge Woodruff. He is a native of Utica, fifty-seven years of age, and was a Judge of the Court of Appeals from 1852 to 1864. In the latter year he was a Democratic candidate for the office, and was defeated. In 1873 he was appointed Commissioner of Appeals by Governor Dix, in place of Judge Hunt, and the same year Judge of the Court of Appeals, to succeed Judge Peckham, deceased; and was defeated in 1874 as a Republican candidate.

Robert Earl was appointed Judge of the Court of Appeals in November, to fill the vacancy caused by the death of Martin Grover. He was elected to the bench of the same court in 1869, but by the reorganization under the new constitution was transferred to the Commission of Appeals, on which he served throughout with great ability.

Judge Gilbert, of the Supreme Court in Brooklyn, rendered a decision in September denying

a motion for a *mandamus* sought by a colored citizen to compel the principal of a public school to admit his son thereto. The court held that the common schools are a public charity; that benefits conferred by them are the free gift from the State, and like every other donor the State may prescribe in what manner and upon what terms and conditions the gift may be enjoyed. In conclusion, Judge Gilbert said that the statute, by guaranteeing equal privileges, does not confer the right to enjoy them in common with any class of persons or in any particular school, and that nothing had been shown from which it could be inferred that the relator had been deprived of the equality of privilege to which he was entitled.

Judge Blatchford, of the United States District Court, decided, in April, in the case of Charles A. Dana, arrested for contempt of court in not obeying a subpoena issued by the Supreme Court of the District of Columbia, that it was necessary "to find statute authority for the power of the Supreme Court of the District of Columbia to send out of the District, to be served out of the District, process to summon witnesses to attend in said District, and that no such authority existed."

The Court of Appeals at its June term rendered a decision in the case of the People *vs.* Wm. M. Tweed, reversing the orders of the Supreme Court and of the Court of Oyer and Terminer, and discharging the prisoner, on the ground that the original sentence to twelve years' imprisonment for twelve different offenses charged in the same indictment, the penalty for a single offense of that grade being imprisonment for one year, could not be sustained. The relator had been found guilty of misdemeanor on several different counts, of one indictment before the Court of Oyer and Terminer in November, 1873, and a cumulative sentence had been pronounced, adjudging the full penalty for each offense. After one year's imprisonment and the payment of one fine, a writ of *habeas corpus* was sued out and made returnable before the Court of Oyer and Terminer, December 17, 1874. The court discharged the writ and remanded the prisoner, and the case was brought by *certiorari* before the General Term of the Supreme Court. In March, 1875, that court confirmed the previous order, an elaborate opinion being submitted by Judge Westbrook. When the case came before the Court of Appeals, opinions of great length were submitted in support of the decision reversing the former judgments. The principal one was that of Judge Allen, the most essential points of which are contained in the following brief extracts:

The question is, had the Court of Oyer and Terminer the power to pronounce the several judgments and inflict the accumulated punishments upon the conviction of the prisoner of the offenses as charged in the single indictment. . . . In theory every count in an indictment is for a distinct offense, but in fact, as is very well understood in most cases, several counts are resorted to, and the same offense stated

in different forms and with different circumstances to meet the evidence that may be adduced upon the trial. . . . I have referred to the several cases cited from our own reports, and no warrant can be found in any of them, or in any remark, casual or otherwise, by any judge for cumulative punishment upon a conviction of several offenses charged in a single indictment, the aggregate punishment exceeding that prescribed by law for the grade of offenses charged. The rule, as claimed by implication, calls for a single judgment for all the offenses charged in the indictment, and of which the accused is convicted. It requires that the offenses joined shall be of the same grade and be subject to the same punishment, that is, not only punishment the same in kind, but the same in degree. . . .

I have examined with some care the cases in the courts of this State and of England, to which we have been referred, or which have come under my observation, and I find no authority for holding that the common law, as it existed in England in April, 1873, or as it exists and is administered in this State at this time, permits cumulative sentences to be imposed upon conviction for several distinct misdemeanors, charged in different counts, in a single indictment, in the aggregate exceeding the punishment prescribed by law, as the extreme limit of punishment for a single misdemeanor. . . .

The power of the court was exhausted by one sentence to imprisonment for one year, and the payment of a fine of two hundred and fifty dollars; or if several judgments can be pronounced by a sentence, the same in the aggregate distributing such punishment and apportioning it to the convictions upon the several counts, according to the demerits of the offenses charged in each, each and every of the judgments and sentences in excess of that limit was *coram non iudice*. A judgment in the form and to the extent allowed by law once pronounced, the power of the court became *functus officio* in respect to that prosecution and the indictment, except to see that the judgment was executed. There was no longer any record or verdict upon which the court could act. The jurisdiction over the person of the condemned was exhausted, and as if no prosecution had ever been instituted against him. The purposes of the prosecution and of the indictment had been accomplished. If the punishment for the offense is fixed by statute a judgment in excess of the statutory limit is void for the excess, as we have seen by adjudged cases, *supra*.

A party held only by virtue of judgments thus pronounced, and therefore void for want of jurisdiction, or by reason of the excess of jurisdiction, is not put to his writ of error, but may be released by *habeas corpus*. It will not answer to say that a court having power to give a particular judgment can give any judgment, and that a judgment not authorized by law, and contrary to law, is merely voidable and not void, and must be corrected by error. This would be trifling with the law, the liberty of the citizen, and the protection thrown about his person by the Bill of Rights and the constitution, and creating a judicial despotism. It would be to defeat justice, nullify the writ of *habeas corpus* by the merest technicality and the most artificial process of reasoning. . . .

The remedy was by several indictments if the offenses were distinct. But courts can only administer the laws as they find them, and it is far better that the most guilty should escape than that the law should be judicially disregarded or violated. A greater public wrong would be committed, one more lasting in its injurious effects, and dangerous to civil liberty, and the sacredness of the law, by punishing a man against and without law, but under color of law and a judicial proceeding, than can result from the escape of the greatest offender, or the commission of the highest individual crime against law. Neither the cause of justice nor of true reform can be advanced by illegal and void acts, or doubt-

ful experiments by courts of justice, in any form, or to any extent.

From some expressions of judges and the remarks of text-writers, there was some color for the idea that several distinct offenses could be tried at the same time, but there was no real or true warrant in this State for several and distinct judgments upon a single indictment in the law, and for that reason the prisoner should have been discharged upon the expiration of the imprisonment for one year and the payment of a fine of two hundred and fifty dollars.

This decision was severely criticised by eminent lawyers, including Mr. Charles O'Connor, who wrote a review of the opinions, maintaining that they were not sound law.

A census of the population of the State was taken during the summer, in accordance with provision made by the last Legislature. The following table shows the result in the several counties, with comparisons with the results of preceding enumerations:

COUNTIES.	Population.			Voters.	
	1875.	1870.	1865.	1875.	1865.

Of the voters 743,082 were native, and 395,248 naturalized; while in 1865 there were 583,594 native, and 239,832 naturalized. In the city of New York the number of native voters had increased from 51,500 in 1865 to 89,907, while the naturalized voters had increased from 77,475 to 141,202.

NORTH CAROLINA. In the session of 1874-'75 the legislative body of this State adjourned for a recess on December 19th, and reassembled on the 18th of January, continuing in session till March 22d.

A large number of laws was enacted on various subjects. One among the most important acts of a general character was the usury bill, which fixes the legal rate of interest on money at eight per cent. per annum, and inflicts the penalty of forfeiture of principal as well as interest if a higher rate is exacted, even by express agreement.

This bill met with strenuous opposition, and was the subject of repeated and lengthy debates; the friends of the measure declaring its object to be, to put some restraint on the cupidty of money-lenders, and give some ease to money-borrowers, chiefly the planters and all engaged in farming, who, for the use of the money which they necessarily want in their pursuits, are usually compelled to pay interest at as heavy a rate as twelve, eighteen, and more per cent., which is utter ruin to them. The opponents of the bill contended that free trade makes money, as all other commodities, to be more easily obtainable, and at lower rates, than where the law interfered by imposing coercions upon the lenders.

One of the points of debate in regard to this measure was the question whether the national banks doing business in the State could be restrained in their operations by the provisions of the bill; some maintaining that such banks are not bound to obey the laws of the States wherein they are located, others affirming that they are so bound by the terms of the act which has called them into existence.

Of greater and more general importance was the act "to commute, compromise, and settle the State debt." Details of this debt are given in the ANNUAL CYCLOPEDIA for 1874. It consists of several classes of bonds, issued before and after the late civil war, at various times and under different acts, and its aggregate amount of principal and unpaid interest is \$38,921,848.05. The act passed at this session does not recognize that part of the debt known as construction bonds, amounting to \$14,700,000, but rejects it as unlawful. The bonds composing the rest of the debt are apportioned by the act into three classes, to be funded at the respective rates of forty cents on the dollar for the first class, and of twenty-five cents for the second and third classes; the new debt bearing a gradually increasing rate of interest for a certain time, namely, of two per cent. per annum for the first two years, of three per cent. for the next three years, of four per cent. for the next five years, and of five per

cent. for the next twenty years. By this process the whole indebtedness of North Carolina would be reduced to \$4,500,000.

Information of the features of this bill in its early stages having reached the creditors abroad, a citizen of New York, who holds North Carolina bonds to the amount of \$87,000, wrote to Governor Brogden, complaining of the contemplated provisions of the funding act as partial in favor of the State, and unjust to her creditors; and proposing that the rate of funding the principal should be at the least fifty cents in the dollar, and the annual interest six per cent. The Governor communicated this letter to the Senate on the 8th of March, 1875, when a Senator characterized it as an insult, and moved to table it, which was done without further consideration.

The bill calling a convention of the people for the purpose of amending the State constitution was the subject of considerable excitement from the beginning of the adjourned session till its final passage. An amendment to the bill providing that, instead of calling directly a convention, the Legislature should submit to the decision of the people the question of "convention or no convention," was offered in the House, and rejected by a vote of yeas 28, nays 83. The question on the passage of the bill being then put, it passed: yeas 81, nays 33.

The act premises that "the present constitution of North Carolina is, in many important particulars, unsuited to the wants and condition of our people," and ordains, in section 1, "that a convention of the people of North Carolina be, and the same is hereby, called to meet in the hall of the House of Representatives in the city of Raleigh on Monday, the 6th day of September, 1875, for the purpose of considering and adopting such amendments to the constitution as they may deem necessary and expedient, subject only to the restrictions hereinafter provided."

The said convention shall consist of one hundred and twenty delegates, each county being entitled to the same number of delegates as it has members in the House of Representatives. The first Thursday in August, 1875, was appointed for the election of delegates.

The convention was expressly forbidden to consider, debate, adopt, or propose any amendment or ordinance upon the subjects of the homestead and personal-property exemptions, and a large number of other matters.

A bill changing the day for all elections in the State, and fixing it on the Tuesday next after the first Monday in November, passed the Senate on March 17th, and the House of Representatives on the 20th.

The better to secure suitable action from party adherents in choosing delegates to the convention at the August election, the Executive Democratic Central Committee, under date of June 1, 1875, issued a lengthy "Address to the People of North Carolina," urging

the necessity of holding a convention to supply the omissions and correct the objectionable provisions of the constitution.

The Republican State Executive Committee published, on their part, an "Address to the Voters of North Carolina," dated June 16, 1875, denying any necessity or use for holding a Constitutional Convention, and condemning the action of the Democratic party in calling such a convention.

During the political campaign preceding the election of delegates to the convention in August, each of the two parties vigorously canvassed the State. The result of that election was rather unfavorable to the Democrats, who had reckoned on a good majority of delegates as certain; whereas, of the one hundred and seventeen members elected they could scarcely count fifty-nine as Democrats, fifty-eight being regular Republicans. The death of ex-Governor William Alexander Graham, one of the delegates-elect, which occurred shortly after the election, rendered the number of Democrats in the convention equal to that of the Republicans.

The delegates assembled on September 6, 1875, and adjourned *sine die* on the 11th of October.

The convention provided for the publication of its ordinances; and that they shall be submitted to the voters for ratification or rejection at the general election to be held on the Tuesday after the first Monday in November, 1876; thus giving the citizens a full year's time to consider the proposed amendments.

The new instrument forbids the calling of a Constitutional Convention unless the question is first submitted to the people.

To section 24 of Article I. the following clause is added: "Nothing herein contained shall justify the practice of carrying concealed weapons, or prevent the Legislature from enacting penal statutes against such practice."

To section 25 of the same article a clause is also added, "that secret political societies are dangerous to the liberties of a free people, and are not to be tolerated."

The sessions of the General Assembly are required to begin in January instead of November. The duration of each session shall not exceed sixty days. If it is prolonged beyond that period, the members of the Legislature shall receive no pay; which is fixed at four dollars for each day, and ten cents mileage.

Section 29, Article II., of the old constitution is amended by the new, which allows the Legislature to change the time for holding elections for the General Assembly.

All the judicial power is to be vested in a court for the trial of impeachments, a Supreme Court, Superior Courts, courts of justices of the peace, and such others inferior to the Supreme Court as may be established by law.

The number of the Justices of the Supreme Court is reduced from five to three, and that of Judges in the State from twelve to nine.

The Governor, with the advice and consent of the Senate, shall appoint all officers whose appointments are not otherwise provided for.

A Bureau of Agriculture, Immigration, and Statistics, is provided for.

All lands, and the proceeds of lands, given by the United States to the State, shall be applied to educational purposes; also, all swamp-lands, fines, etc., are to be used for purposes of education.

Concerning the social relations between the two races, the new constitution forbids white and black children going to the same school; and provides that separate schools shall be furnished them respectively, and no discrimination made to the prejudice of either race.

It also forbids marriage between a white and a black, or any person of negro descent, to the third generation.

During the session of the Constitutional Convention a resolution was offered by one of its members proposing the removal of the political disabilities from William W. Holden, the ex-Governor of North Carolina, who was impeached for high crimes and misdemeanors in office, tried, and convicted, in 1871. The resolution was not adopted.

According to the school-census of 1874, the aggregate number of children and youth between six and twenty-one years of age in the State was 369,960, of whom 242,768 were whites, 127,192 blacks; of these there attended school that year—whites, 119,088; blacks, about 55,000. The number of schools in the same year was 2,850 white, 999 colored; and the number of teachers, 2,108 white and 767 colored. In some of the colored schools instruction was given by white teachers. At Raleigh there is a colored academy of very good repute, and in successful operation. It is partly supported by contributions from citizens of other States.

With a view to restore the University of North Carolina to its former condition, from which it had been apparently declining, a bill was passed by the Legislature securing to it an annual income of \$7,500, representing the interest of six per cent. on the \$125,000 of land-scrip donated before the late civil war, by Congress, for the establishment of one or more agricultural colleges in the State. This, together with the income derived from students, and the contributions from the alumni and the numerous friends of the institution, seems to warrant the anticipation of the most satisfactory results. A board of trustees was also elected by the General Assembly to take care of the interests of the university, and four of their number have been appointed to take charge of the funds raised by private contributions. From a report submitted by these in November, 1875, it appears that the sums subscribed up to that time amounted in the aggregate to more than \$20,000.

The State Hospital for the Insane having become insufficient for the reception and treat-

ment of all the unfortunate of that class in the State, a bill was passed by the Legislature providing for the erection of another hospital at Morganton, to be called "The Western."

The North Carolina Institution for the Deaf and Dumb and the Blind continues to be under excellent management. In 1868 a department for colored deaf-mutes and blind was added to the institution. The whole number of pupils in attendance in December, 1875, was about two hundred, all supported by the State.

The agricultural interest of North Carolina seems to be in a satisfactory condition, especially with reference to the small farmers, who are said never to have been so prosperous as at present. A considerable number among this class are negroes.

Upon the occasion and by the effect of the late civil war, the agricultural interest of the State sustained a most heavy and seemingly irreparable loss, in the almost total extinction of the rice-production on the Cape Fear. The vast tracts of its swamp-land which, in a long succession of years, and at immense cost, had been reclaimed, banked, and adapted to rice-culture, are abandoned, and have resumed their previous natural condition of impenetrable morass. The proper kind of laborers, also, who had been for generations purposely trained and rendered fit for the peculiarities of that culture and region, are now no longer obtainable. Some idea of the extent of the loss sustained by their industry may be formed from the fact that the rice-production on the Cape Fear before 1861 was annually about two hundred thousand bushels; since the war it has scarcely been ten thousand bushels, and it is rather diminishing than increasing.

NORTHWEST TERRITORIES. This vast region comprises the greater part of the former Hudson Bay Territory, and is chiefly valuable for its furs. An act was passed this year by the Dominion Parliament providing for its government, which is known as "The Northwest Territories Act, 1875." The most important provisions of this act are as follows:

The Territories formerly known as "Rupert's Land" and the Northwestern Territory (with the exception of such portion thereof as forms the Province of Manitoba) shall continue to be styled and known as the Northwest Territories.

For the Northwest Territories there shall be an officer styled the Lieutenant-Governor, appointed by the Governor-General in Council, by instrument under the Great Seal of Canada, who shall hold office during the pleasure of the Governor-General; and the Lieutenant-Governor shall administer the government under instructions from time to time given him by Order in Council, or by the Secretary of State of Canada, and by and with the advice and consent of the Council of the Northwest Territories shall have power to make local ordinances therein.

The Governor-General with the advice of the Queen's Privy Council for Canada, by warrant under his privy seal, may constitute and appoint such and so many persons from time to time, not exceeding in the whole five persons, of which number the stipendiary magistrates hereinafter mentioned shall be members *ex officio*, to be a Council to aid the Lieutenant-Governor in the administration of the North-

west Territories, with such powers not inconsistent with this act as may be from time to time conferred upon them by the Governor-General in Council; and a majority shall form a *quorum*.

When and so soon as the Lieutenant-Governor is satisfied, by such proof as he may require, that any district or portion of the Northwest Territories, not exceeding an area of one thousand square miles, contains a population of not less than one thousand inhabitants of adult age, exclusive of aliens or unenfranchised Indians, the Lieutenant-Governor shall, by proclamation, erect such district or portion into an electoral district, by a name and with boundaries to be respectively declared in the proclamation, and such electoral district shall thenceforth be entitled to elect a member of the Council, or of the Legislative Assembly, as the case may be.

The Lieutenant-Governor shall thereafter cause a writ to be issued by the clerk of the Council in such form and addressed to such returning-officer as he thinks fit; and, until the Lieutenant-Governor and Council of the Province otherwise provides, he shall by proclamation prescribe and declare the mode of providing voters' lists, the oaths to be taken by voters, the powers and duties of returning and deputy returning officers, the proceedings to be observed at such elections, and the period during which such elections may be continued, and such other provisions in respect to such election as he may think fit.

The persons qualified to vote at such election shall be the *bona-fide* male residents and householders of adult age, not being aliens, or unenfranchised Indians, within the electoral district, and shall have respectively resided in such electoral district for at least twelve months immediately preceding the issue of the said writ.

Any person entitled to vote may be elected.

When and so soon as the Lieutenant-Governor is satisfied, as aforesaid, that any electoral district contains a population of two thousand inhabitants of adult age, exclusive of aliens or unenfranchised Indians, he shall issue his writ for the election of a second member for the electoral district.

When the number of elected members amounts to twenty-one, the Council hereinbefore appointed shall cease and be determined, and the members so elected shall be constituted and designated as the Legislative Assembly of the Northwest Territories, and all the powers by this act vested in the Council shall be henceforth vested in and exercisable by the said Legislative Assembly.

The number of members so to be elected, as hereinbefore mentioned, shall not exceed twenty-one, at which number the representation shall remain; the members so elected shall hold their seats for a period not exceeding two years.

A court or courts of civil and criminal jurisdiction shall be held in the said Territories, and in every judicial district thereof when formed, under such names, at such periods, and at such places, as the Lieutenant-Governor may from time to time order.

The Governor may from time to time appoint, by commission under the great seal, one or more fit and proper person or persons, not exceeding three, to be and act as a stipendiary magistrate or stipendiary magistrates within the Northwest Territories, who shall hold office during pleasure, and who shall reside at such place or places as may from time to time be ordered by the Governor in Council.

Each stipendiary magistrate shall have jurisdiction throughout the Northwest Territories, as hereinafter mentioned, and shall also have jurisdiction and may exercise within the Northwest Territories the magisterial, judicial, and other functions appertaining to any justice of the peace, or any two justices of the peace, under any laws or ordinances which may from time to time be in force in the Northwest Territories.

Each stipendiary magistrate shall preside over

such courts in the Northwest Territories as shall from time to time be assigned to him by the Lieutenant-Governor.

The Chief-Justice or any Judge of the Court of Queen's Bench of the Province of Manitoba, with any one of the stipendiary magistrates as an associate, shall have power and authority to hold a court under section 59.

A person convicted of any offense punishable by death may appeal to the Court of Queen's Bench of Manitoba, which shall have jurisdiction to confirm the conviction or to order a new trial; and the mode of such appeal, and all particulars relating thereto, shall be determined from time to time by ordinance of the Lieutenant-Governor and Council, or Assembly.

Any stipendiary magistrate of the said Territories, or the Chief-Justice or any Judge of the Court of Queen's Bench of the Province of Manitoba, shall have power and authority to commit and cause to be conveyed to jail in the Province of Manitoba, for trial by the Court of Queen's Bench according to the laws of criminal procedure in force in the said Province, any person or persons at any time charged with the commission of any offense against any of the laws or ordinances in force in the Northwest Territories, punishable by death or imprisonment in the penitentiary; and the said Court of Queen's Bench, or any Judge thereof, shall have power and authority to have any person arraigned before the said court on any such charge; and the jury laws and laws of criminal procedure of the said Province shall apply to any such trial, except that the punishment to be awarded upon conviction of any such person shall be according to the laws in force in the Northwest Territories; and the sentence may be carried into effect in a penitentiary or other place of confinement in the Northwest Territories, or in the said Province, as if the same were in the Northwest Territories.

NOVA SCOTIA. The population and land area, by electoral districts, are as follows:

ELECTORAL DISTRICTS.	Territorial Superficies, in Acres.	POPULATION.	
		1861.	1871.

Total.....	18,883,008	380,857	487,800

The executive government is administered by a Lieutenant-Governor, appointed by the Governor-General of the Dominion in Council, assisted by an Executive Council of nine members (Treasurer, Attorney-General, Provincial Secretary, Commissioner of Public Works and Mines, Commissioner of Crown Lands, and four without office), appointed by himself and responsible to the Assembly. The legislative power is vested in a Legislative Council of 21 members, appointed by the Lieutenant-Governor for life, and a House of Assembly, of 38

members, elected by the qualified voters of the counties for four years. Voting is by ballot, and a small property qualification is required. The Supreme Court, having law and equity jurisdiction throughout the Province, consists of a Chief-Justice, a Judge in Equity, and five Associates appointed by the Governor-General in Council for life; and there are a Court of Error, consisting of the Lieutenant-Governor and Council; a court of divorce and matrimonial causes, held by a Justice of the Supreme Court; a Vice-Admiralty Court, held by the Chief-Justice; a probate court for each county; and courts of justices of the peace.

The provincial institutions are the Hospital for the Insane, the Institution for the Deaf and Dumb, and the Blind Asylum, all at Halifax. The latest financial statement is as follows: Balance in the provincial Treasury on January 1, 1878, \$33,916.41; receipts during the year, \$672,551.97, including \$481,106.80 subsidy from the Dominion Government: total, \$711,468.38. The expenditures amounted to \$681,275.23; balance in Treasury on January 1, 1874, \$30,193.15.

Nova Scotia has a system of free public schools, organized in 1864. The schools are under the general supervision of the Provincial Superintendent of Education, with inspectors for the several counties, and are immediately managed by boards of commissioners for the counties, and of trustees for the different sections or districts. The number of schools in operation during the summer term ending October 31, 1878, was 1,626; number of teachers, 1,697 (616 males and 1,081 females); number of pupils registered, 78,266 (39,195 males and 39,071 females); average daily attendance, 43,929; number of different children at school some portion of the year ending on the above date, 93,759; number of school sections, 1,704, of which 208 had no school any portion of the year; value of school property, \$300,294.49; number of pupils for whom accommodation is provided, 85,754. Included in the above figures are 10 county academies, with 44 teachers and 2,833 pupils enrolled during the year. The provincial normal and model schools are at Truro. The latest statistics of the colleges are as follows:

NAME.	Location.	Date of Foundation.	Denomination.	Number of Instruction.	Number of Students.	Volumes in Library.
King's College and University.....	Windsor.....	1738	Episcopal.....	5	15	6,300
Dalhousie College and University....	Halifax.....	1820	Presbyterian.....	7	80	1,300
St. Mary's College.....	Halifax.....	1804	Roman Catholic.....	5	47	1,280
Acadia College.....	Wolfville.....	1837	Baptist.....	5	37	8,237
St. Francis Xavier College.....	Antigonish.....	1835	Roman Catholic.....	8	55	2,090

In Dalhousie University a medical department was organized in 1868.

There are about 400 miles of railroad in operation or in progress in the Province.

The most valuable mineral products are bituminous coal, gold, and gypsum. The coal is found chiefly in the northeast part of the peninsula and on Cape Breton, the three most productive counties being Cape Breton (southeast portion of the island), Pictou, and Cumberland. Guysborough County produces more than half the gold, Halifax and Hants Counties standing next. There are between thirty and forty mines in operation. Gypsum is quarried chiefly in Hants County, but it occurs throughout the northeastern portion of the peninsula and on Cape Breton. Iron is mined to only a limited extent in Annapolis, Colchester, and Pictou Counties; but the supply of ore of superior quality is abundant, not only in the three counties mentioned, but also in the counties of Cumberland, Inverness, Victoria, and Cape Breton. Galena and copper ore occur in various localities. Limestone, freestone, granite, and marble, suitable for building-purposes, and clay for brick-making, are common. Grindstones are manufactured from the sandstone strata, chiefly in Cumberland County. The mineral product of the Province in 1873 was valued at \$3,084,687, viz.: Coal (1,051,467 tons), \$2,699,347; gold (11,852.4 ounces), \$219,270; gypsum (120,693 tons), \$120,693; other products, \$45,357. The yield of the fisheries in 1874 was—

OBITUARIES, AMERICAN. *Jan. 10.*—JANES, Rev. EDWIN L., born at Sheffield, Mass., April 27, 1807; died at Flushing, L. I.; a distinguished clergyman of the Methodist Church, and for six years a secretary of the National Temperance Society. He had been pastor in Philadelphia, in New York, in Brooklyn, in Bridgeport, and elsewhere. He was a brother of Bishop Janes. He was the author of several works, among which were "Wesley his Own Biographer," published about five years ago; "Incidents in the Life of Bishop Asbury," and "Recollections in the Life of the Rev. Dr. Edward Payson."

Jan. 11.—MAGILL, Mrs. ANN T., formerly Principal of the Valley Female Seminary at Winchester, Va.; died at Staunton, Va. For the last two years she was connected with the Augusta Female Seminary, Staunton. She was the widow of the late Prof. Magill, of the University of Virginia.

Jan. 12.—BRAMLETTE, Hon. THOMAS J., ex-Governor of Kentucky; died at Louisville. He was an able lawyer, a short time Judge of the Federal Court. He was Governor of Kentucky during the closing years of the civil war.

Jan. 13.—McMILAN, Hon. GARNET; died at Atlanta, Ga. He was member of Congress elect from one of the districts of Georgia.

Jan. 14.—HORSFORD, Colonel JEDEDIAH, an early settler in the Genesee Valley, N. Y.; was born in Charlotte, Vt., March 8, 1791; died in Lavonia, Livingston County, aged 83 years. In the War of 1812 he participated in the defense of Burlington, went into the Genesee Valley in 1814, taught a mission-school among the Seneca Indians at Squakey Hill, settled in Moscow where he resided forty-eight years, and was a representative in the New York Legislature, and a member of Congress.

Jan. 14.—TRACY, FREDERICK U., for nearly twenty-five years City Treasurer of Boston, Mass. He was born at Burlington, Vt., January 3, 1811. For some years he resided in South America, and on his return he formed a partnership with Mr. S. H. Russell. This firm was dissolved in 1843. He afterward managed the Northfield woolen-mills in Vermont. He was elected City Treasurer in 1852.

Jan. 15.—WEBBER, Captain JOHN, a veteran of the War of 1812; died at Ossining, Westchester County, aged 84. He was also well known as one of the heirs presumptive of the supposed estate of Anneke Jans.

Jan. 17.—FOX, CHARLES KEMBLE, was born in Boston, August 15, 1838. He was well known as the performer of *Pantaloen*. He went upon the stage at the age of six years. His first appearance in New York was made at the old National Theatre, July 18, 1853, as

Cute, in a play on "Uncle Tom's Cabin." In 1858 he was a member of the company at the Old Bowery, and in 1859 he joined the New Bowery. Afterward he appeared at the Olympic, in pantomimes. His last appearance on the local stage was made at the Globe Theatre, May 16, 1874, in "Humpty Dumpty at Home"—that house being then under Mr. G. L. Fox's management. Mr. Fox was the author of the pantomime in which his brother and himself won popularity and fortune.

Jan. 17.—NEWTON, Rev. BENJAMIN B., well-known Episcopal clergyman of Brooklyn; died in that city, aged 66 years. He was born at St. Albans, Vt., and was graduated at Vermont University, Burlington, in 1831, and subsequently studied at Andover, Mass., and New Haven, Conn. He was settled at Plattsburg, N. Y., in 1835, and afterward in Chelsea, Vt. He came to New York City in 1863, and was engaged at different periods as assistant minister of Holy Trinity, Brooklyn.

Jan. 19.—QUINCY, Hon. JOSIAH; died in Rumney, N. H., aged 81 years. He was a native of Lenox, Mass., but had resided sixty years in Rumney, where he had practised law until lately. He had served in both branches of the State Legislature, and was President of the Senate in 1841.

Jan. 20.—TENNEY, Rev. SAMUEL GILMAN; died at Springfield, Vt., aged 81 years. He was a native of Rowley, Mass., and a graduate of Dartmouth College, in the class of 1823. He was ordained at Lyndon in 1825, and subsequently preached in Bakersville, Waitsfield, Wadsworth, Springfield, Hillsborough, and Alstead, N. H.

Jan. 27.—GREEN, Judge JOHN T.; died in Sumter, S. C. He was born at Mechanicsville, S. C., October 18, 1827. He was the son of Rev. Henry D. Green. At an early age he entered the South Carolina College, where he remained for three years. He subsequently entered the law-office of Mr. F. J. Moses, Sr., the present Chief-Justice of the State, and after a course of study was admitted to the bar in 1849, when he had just passed his twenty-first year. In 1852 Judge Green was elected to the State Legislature on the Coöperation ticket, and, being reelected, served for six successive years. Being again put forward in 1858, he declined to be a candidate, and continued to practise his profession in Sumter until 1864, when he was again elected a member of the Legislature. There having been some irregularity in the preceding election, a new one was held in 1865, and he was once more nominated and elected. In the following year he ran against John N. Frierson, for State Senator from Sumter County, and was beaten by sixty-six votes. During the war, and for some years

afterward, he was in delicate health, and as he took no part in the struggle, he was regarded as a Union man. In 1866 he was appointed president of the Provost Court in Sumter, and held that post until civil authority was restored. When the reconstruction government was organized he was unanimously elected by the General Assembly Judge of the Third Judicial Circuit, was unanimously reelected upon the expiration of his term of office, and was still the incumbent of that office at the time of his death. Judge Green was a Republican.

Jan. 29.—ROBERTS, Brevet Brigadier-General B. S.; died at Washington, D. C. He was born in Vermont in 1811, graduated at West Point in 1835, and was brevetted second-lieutenant in the old First Dragoons. In 1839 he resigned, but reentered the army at the outbreak of the war with Mexico, in which he served under General Scott in the march from Vera Cruz to the capital. During part of the civil war he was with the Army of Virginia, and participated in the battle of Cedar Mountain and the second battle of Bull Run. He rendered efficient service in different capacities during the remainder of the conflict, and was rewarded with the rank of brigadier-general by brevet in 1865. In June, 1866, he was appointed lieutenant-colonel of the Third Cavalry, and held that rank until December, 1870, when on account of ill health he was placed on the retired list. He was one of the oldest officers in the army, having been in the military service twenty-eight years.

Jan. 30.—LANGDON, LEANDER W., inventor; died at Jacksonville, Fla. He was born at Joy, N. Y., in 1838. He was widely known as the inventor of the Florence sewing-machine, manufactured at Florence, Mass. There are four features of the Florence machine which are the important products of his mind. The first was the "knot-stitch," for which a patent was issued October 30, 1855. The next was the "take-up wheel," as it is known, and the hook-pulley which holds the shuttle-thread tight while the shuttle is passing on, and also the rib in the shuttle-race, which prevents the machine from skipping stitches. His patent for this was granted March 20, 1860. His third was the "shuttle-thread tension," which was one of the neatest of his inventions. Previous to that time the pressure on the bobbin had been uniform, which did not produce an even tension, as when the bobbin was full the thread ran off more freely than when not full. By his invention an even tension was produced. The patent was given January 22, 1861. His fourth invention was the celebrated "reversible feed," which has been so much talked of, in connection with the Florence machine. This was patented July 14, 1863.

Jan. 30.—ROBERTS, JOHN WRIGHT, bishop of the Methodist Church, Liberia; died at Monrovia. He was the son of "Auntie Robos," as she was familiarly called in Petersburg, Va., whence she and her three sons emigrated to

Liberia forty-seven years ago. The eldest of these sons was Joseph, who was elected the first President of the Republic of Liberia, and who is now again elected to the same office. Next to him in age was the deceased bishop, who entered the Liberia Annual Conference as an itinerant, and, after serving as pastor and presiding elder for twenty-seven years, was chosen bishop by his conference, as the successor of Bishop Burns, and in the succeeding summer (June 20, 1866) was consecrated to the office in St. Paul's Church, New York City.

Feb. 7.—EDDY, Rev. Dr. ANSEL D.; died at Lansingburg, N. Y. He was successor to Rev. Dr. Hamilton in the First Presbyterian Church of Newark, N. J. He was afterward pastor of the Park Presbyterian Church in Newark.

Feb. 9.—BAKER, Hon. OSMYR, lawyer and congressman, of Northampton, Mass.; was born May 18, 1800, at Amherst, Mass. He entered Yale College at eighteen, and graduated in the class of 1822, studied law in the law school at Northampton, and commenced practice in Amherst in 1825. From 1838 to 1837 he represented Amherst in the Legislature of Massachusetts, and from 1839 to 1845 he served three terms in Congress. In 1845 he removed to Northampton. From 1853 to 1854 he was an Executive Councilor. He was especially prominent as the representative of eight towns in the counties of Hampshire and Franklin in upholding the will of Oliver Smith, of Hatfield, and thus saving the "Smith Charities" to the poor of those towns. He early retained Daniel Webster and Judge Forbes for the towns, opposed to Messrs. Choate, Chapman, and Huntington for the heirs-at-law. The will having safely passed every ordeal, in organizing the board of trustees under the will, Mr. Baker was chosen president. After retiring from the practice of law in 1860, he gave his undivided attention to the management of this trust fund. He lived to see the original gift of \$400,000 expand to more than \$1,000,000, while hundreds of poor men, women, and children, were fed by this munificent charity. He resigned the presidency of this board of charities in 1870.

Feb. 10.—COLLINS, GEORGE C., one of the largest tea-importers of New York; died in that city, aged 65 years, having been born in 1810, at South Hadley, Mass. At the age of twenty he went to Mobile, Ala., as confidential secretary to Mr. Burrett Ames, then the great cotton-dealer of the South. He remained there three years, and then returned North and went into business on his own account. In 1860 he established the house of Collins & Rayner at No. 95 Front Street, New York, which afterward became George C. Collins & Co. He was one of the Union League Club. Although of retiring disposition, he was brought into more public notice by the "draft-riots," after which he served on a committee for prosecuting the claims of the families of the murdered negroes against the city. He was also one of the largest contributors to the fund raised for the relief

of these families. A member of St. Thomas's Episcopal Church, it was principally by his efforts that the new church edifice on Fifth Avenue was erected. During the panic of "Black Friday" he borrowed on his own credit \$30,000 to carry the new building through the crisis. He was not only charitable to the destitute, but lenient toward the weak.

Feb. 10.—**SPACKMAN**, Rev. HENRY S., D. D., Episcopal clergyman of Philadelphia, and chaplain of the Episcopal Hospital there; died at that institution, aged 64. He studied law and was admitted to the bar in 1832. In 1834 he was elected to the Assembly of Pennsylvania, and, with the exception of one year, he was a member of the Legislature for the next ten years. He was ordained priest in 1847, was rector of St. Mark's, Frankford, of St. Clement's Church, Philadelphia, and of Trinity Church, Williamsport. From 1862 to 1868 he was military chaplain, and in 1869 was appointed chaplain of the Episcopal Hospital. Dr. Spackman organized a successful system of "cottage lectures" during Lent, the object of which was to carry the gospel to the homes of the congregation.

Feb. 12.—**GEOLDEN**, Rev. JOHN BAPTIST, of the Jesuits' College, New Orleans.

Feb. 26.—**BEDL**, General JOHN; died at Bath, N. H., aged 52 years. He was the son of General Moody Bedel, and was born in Indian Stream Territory, July 8, 1822. He enlisted as a private in the Mexican War in 1847, and became captain in 1849. He was admitted to the bar in 1850, and practised in Bath until 1853, when he entered the Treasury Department at Washington, and remained there until the breaking out of the civil war. He was then appointed lieutenant-colonel of the Third Regiment of New Hampshire Volunteers, June 27, 1862; was wounded July 10, 1863, and captured at Fort Wagner, July 18, 1863. He was promoted to colonel of that regiment, while a prisoner of war, April 6, 1864, and paroled on the 9th of December of the same year. He was made a brigadier-general of the U. S. Volunteers, by brevet, dating from March 13, 1865, for gallant and meritorious services, and was mustered out of the service July 20, 1865. He represented the town of Bath in the Legislature, and was for two or three years the unsuccessful Democratic candidate for Governor.

Feb. 26.—**MURPHY**, JAMES, the "Irish Giant;" died at Baltimore, Md., aged 33 years. He died of a bronchial disease. He was about eight feet high, and weighed 350 pounds. He traveled several years with a show, and was exhibited in many parts of the United States.

March 1.—**CHASE**, HORACE; died in Hopkinton, N. H., at the age of 87. He was born at Unity, N. H., December 14, 1788, and was graduated at Dartmouth College, in the class of 1814. He read law with the late Judge Matthew Harvey, and commenced practice in the town of Goshen, in 1818, where he re-

mained until 1821, when he removed to Hopkinton, and formed a law partnership with Judge Harvey, and remained in that town to his death. He served as representative from Hopkinton in the Legislature of 1829, and was Assistant Clerk of the House in the years 1830-'32. He was postmaster from 1829 to 1850, and Judge of Probate for Merrimac County from 1833 to 1855. In 1845 he published the "New Hampshire Probate Directory."

March 2.—**THOMAS**, General LORENZO, U. S. A., Adjutant-General of the Army; died in Washington, D. C., aged 71 years. He was born in Delaware. After completing his course at the Military Academy, he entered the army in 1823 as second-lieutenant, and rose to the rank of brigadier-general in 1861. He was Secretary of War a short time during President Johnson's Administration.

March 7.—**BUFFINGTON**, Hon. JAMES, M. C., Representative from Massachusetts; died at Fall River, aged 59 years. He was born at Fall River, March 16, 1817. He was educated at the Friends' College, Providence. He served for a season as a private soldier in a Fall River regiment during the civil war. He was elected to the Thirty-fourth, Thirty-fifth, Thirty-sixth, Thirty-seventh, Forty-first, Forty-second, and Forty-third Congresses.

March 12.—**LONGYEAR**, Judge JOHN W.; died in Michigan. He was born October 22, 1820, in Ulster County, N. Y. In 1844 he went to Michigan, where he was admitted to the bar in 1846. In 1862 he was elected to Congress, and reelected in 1864. In 1867 he served as a member of the Constitutional Convention. In 1870 he was appointed Judge of the United States District Court for the Eastern District of Michigan, an office which he held until his death.

March 16.—**LAURIE**, JAMES, an able and widely-known civil engineer; died in Hartford, Conn., aged 69; was a native of Scotland; was the chief-engineer of a road in New Jersey, another in New England, and another in Nova Scotia. He was also consulting engineer of the Hoosac Tunnel.

March 19.—**ALEXIS**, Sister ANN, the head of the St. Vincent Orphan Asylum, Boston; died in that city. For forty-three years she was devoted to the Roman Catholic orphans of that city. For fifty-six years she was a Sister of Charity. She went to Boston in 1832 from Baltimore. She gave her long life to the welfare of the friendless and the forsaken.

March 23.—**HICKMAN**, Hon. JOHN; died at West Chester, Pa., aged 65. He was born at West Bradford, Pa., September 11, 1810; was admitted to the bar in 1833. He was nominated in his district for Congress in 1844, but was defeated. He was nominated again in 1854, and was elected. He secured the nomination of Mr. Buchanan for President in the Cincinnati Convention. In 1858 he was elected to the Thirty-sixth Congress, receiving the

support of a portion of the Republican party. He was reelected as a Republican to the Thirty-seventh Congress.

March 26.—BYRNES, REV. REID PATRICIO; died at Rochester, N. Y., aged 42 years. He was born in Montevideo, South America, in 1838. Father Byrnes was ordained about sixteen years ago, and served in Corning, Jamestown, Lockport, and Rochester. He died pastor of the Church of the Immaculate Conception, in Rochester.

March 27.—STILES, REV. JOSEPH C., a well-known Presbyterian minister; died at Savannah, Ga., aged 79 years. He was for some years pastor of the Mercer Street Church, New York City.

March 28.—STEMMLER, Judge JOHN A.; died in New York City, aged 69 years. He was born in the Palatinate of Bavaria in 1806, and was educated in the Universities of Munich and Heidelberg. Having, while a student, espoused ultra-liberal opinions, he opposed the constituted authorities, and as a consequence had to flee the country. He came to New York in 1829, and entered the office of Judge Brady's father, and afterward practised on his own account. He was for some time American correspondent of the *Augsburger Allgemeine Zeitung*, and once owner and editor of the New York *Staats-Zeitung*. In 1863 he was elected Judge of the Seventh District Court of New York City, and was reelected in 1869. He held his seat on the bench until recently, when sickness compelled him to abandon his judicial duties.

April 5.—HENDERSON, Dr. A. A., medical director of the U. S. Navy. He was a native of Pennsylvania, and entered the Navy from that State in 1841. He was made medical director, with the relative rank of captain, in 1871, and since that time had been stationed in New York or Brooklyn, where he died.

April 6.—PAGE, Colonel JAMES, a venerable member of the Philadelphia bar, and for many years commander of the State "Fencibles;" died in Philadelphia. From 1833 to 1841 he was postmaster of Philadelphia. He joined the "Fencibles" in 1814, and was elected captain in 1819, and held the command until 1861, a period of forty-two years. In the Kensington riots he was engaged in a conflict in which several persons were killed and wounded. Colonel Page was also a prominent member of the Masonic Order.

April 9.—ATOCHA, Judge A. A., of New Orleans; died in that city. He was Judge of the Superior Criminal Court of New Orleans, and formerly provost-marshal under General Butler.

April 9.—WILLERS, CALVIN, deputy Secretary of State of New York; died at Albany, aged 84 years.

April 10.—HAMILTON, General ANDREW J.; died at Austin, Texas. About thirty years ago he migrated to that State from Alabama. He practised law many years at Austin, served several terms in the Legislature, and, after be-

ing Attorney-General, represented a district from 1859 to 1861 in Congress. He was a Unionist, and made speeches against secession at Brenham and Galveston, in November, 1861. He remained North during the early part of the war, but subsequently accepted the commission of major-general in the Union Army, and was sent to Matamoros, where, having no troops to command, he remained inactive. In 1865 he returned to Texas as Provisional Governor, and retained that office until the election of Governor Throckmorton in 1866. When Throckmorton was afterward deposed by the military, General Hamilton was made a Justice of the Supreme Court. General Hamilton was an independent candidate for Governor in 1869, but was defeated by ex-Governor Davis.

April 10.—HAMILTON, Father GEORGE A., of St. Mary's (Catholic) Church, Indianapolis, Ind.; died in that city, aged 57 years. He was a native of Kentucky, and a relative of Bishop Spalding, of Baltimore. He had had charge of St. Mary's Church since 1862. He was of the party of one hundred who last year made a pilgrimage to Rome and various other parts of Europe.

April 10.—SLADE, Hon. JAMES M.; was born at Middlebury, Vt.; died there, at the age of 60. He was the son of Hon. W. M. Slade, fifteenth Governor of Vermont; was a Representative in Congress from 1831 to 1834, and Lieutenant-Governor from 1856 to 1858.

April 18.—MCJILTON, Rev. JOHN N.; died in New York City. He was born in Baltimore, in 1805. He was educated in the Protestant Episcopal faith, and having been ordained priest was placed in charge of St. James's African Church, Baltimore. He was for some time editor of the *Baltimore Patriot*. He was also prominently identified with several scientific and charitable societies. For some years he had resided in the city of New York, in order to assist Mr. John Hecker in his various religious, educational, and charitable enterprises. He was for some time rector of the Madison Street Mission Church, New York City.

April 18.—WELLS, SAMUEL, a well-known professor of phrenology, and proprietor of the *Phrenological Journal*; died in New York City, aged 55 years.

April 14.—QUARTLEY, FREDERICK W., well-known engraver; died in New York City. He was born in Bath, England, in 1808, and came to the United States twenty-four years ago. For twelve years he was employed by the publishers of *Harper's Weekly*. Afterward he was induced by the Appletons to work exclusively for their *Journal* and for their book entitled "Picturesque America."

April 15.—SHANLY, CHARLES DAWSON; died at Jacksonville, Fla., aged 50 years; was author of many essays and descriptive articles in the *Atlantic Monthly*, and many poems and ballads. He was also a contributor to the *New York Leader*, *New York Weekly Review*, the

New York Albion, and the *World*. He was a native of Ireland, and had lived in England and Canada before he settled in New York City, where he resided about eighteen years.

April 19.—BLECKER, RICHARD W.; died in New York City. He was born there, in 1821. He was a generous patron of the arts and sciences, and was an active member of the Historical Society and the American Institute, as well as a corresponding member of several other art and historical societies, both at home and abroad. The literary receptions held at his house were attended for many years by the most prominent artists and authors of the country.

April 20.—HODGES, Hon. S. H.; died at Washington, D. C. He was born at Clarendon, Vt., January 12, 1804. He practised law in Rutland for many years, and was appointed Commissioner of Patents by President Fillmore. In 1861 he was appointed one of the commissioners of a Board of Appeals in Patent Causes.

April 20.—MOULTON, JOSEPH W., historian and writer on law; died at Roslyn, Long Island, N. Y., aged 85 years. Mr. Moulton was born at Stratford, Conn., in June, 1789, whence the family to which he belonged moved to Troy, N. Y., while he was young. He studied law, and, after being admitted to the bar, moved to Buffalo, and made a moderate fortune by investments in real estate. He afterward came to this city. In 1824 and 1826, in conjunction with J. V. N. Yates, he published "A History of the State of New York," which, however, was devoted entirely to the earlier history of the State. His chief publications, besides this, were "New York as it was Seventy Years Ago," "View of the City of Orange as it was in 1673," and "Chancery Practice." During the later years of his life he lived in Roslyn, engaged in historical and legal researches.

April 21.—WHITMARSH, SAMUEL, formerly an enterprising manufacturer of Northampton, Mass.; died in that town, aged 74 years. He formed a silk company at Northampton. This proving unsuccessful, he went to the West Indies and introduced the growth of mulberry-trees and silk-worms in the mountain-region of Jamaica. While there his business was so profitable that he sent about thirty thousand dollars to Northampton with direction to pay in full every dollar he owed there. His agent informed him that twenty-five or fifty per cent. would give entire satisfaction; but that would not satisfy Mr. Whitmarsh, who ordered the money to be justly distributed. The consequence was that the money found its way into the hands of almost every person in town. Ultimately failing in Jamaica, he returned to Northampton to end his days in dependence.

April 28.—GALE, LEVIN, a distinguished lawyer of Maryland; died in Baltimore, aged 51. He was a native of Cecil County, Md. He was a barrister as contradistinguished from an at-

torney. He had a large practice, and argued many cases before the Court of Appeals of Maryland.

April 28.—GREENE, JOHN C., prominent merchant of New York City; was born in New Jersey, and, when very young, entered the mercantile house of N. L. & G. Griswold, in South Street. He was employed as a clerk in the counting-room, but, as he displayed unusual commercial sagacity, he was appointed supercargo of the ship *Panama*, and other vessels, and made many voyages to South America and other parts of the world. In 1833 he entered the house of Russell & Co., at Canton, China, and laid the foundation of his rapidly-accumulated and large fortune. In 1839, on his return to New York, he married the daughter of the late George Griswold, and took a prominent part in the social, business, and public enterprises of the city. He had been for many years a director of the Bank of Commerce, the Chamber of Commerce, and a manager of several of the leading charitable and public institutions. He took an active interest in the University of New York, and more especially in Princeton College, to which he gave a large part of his fortune.

April 30.—CHARLICK, OLIVER, politician and railroad speculator; was born in New York City, about the year 1810, and died at Bay-side, near Flushing, Long Island.

May 5.—BUTTERWORTH, SAMUEL F., lawyer, politician, and speculator; died in San Francisco. He studied and practised law in New York City, and was at the head of the Sub-Treasury in Wall Street during the Administration of President Buchanan. He was afterward sent to California as Superintendent of the New Amaden Mining Company. He is said to have died worth \$7,000,000 in lands and other real estate.

May 7.—BIDDLE, THOMAS, United States minister to Ecuador; died in Guayaquil. He was a nephew of the famous Nicholas Biddle. He had had much experience in diplomacy in British India, in Cuba, and in South America. In 1857 he was appointed commissioner to adjust the claims of the United States upon the States of Columbia. Mr. Biddle held the rank of colonel in the army. He served his country abroad more than twenty years.

May 9.—DIMOCK, Dr. SUSAN, of Boston, Mass.; was lost in the *Schiller*, which was wrecked off the coast of Cornwall, England. She was born in North Carolina, in 1847. When only twelve years old, she told her father she wished to study medicine and become a physician. During the war her family came North, and twice she applied for admission into the Medical School of Harvard University, and was twice refused. She went to Zürich, in Switzerland, where she graduated with honors. She afterward studied at Vienna, where she made a very favorable impression. Returning to Boston she became resident physician of the Hospital for Women

and Children. She was highly successful in the best sense.

May 18.—MAYER, Rev. LEONARD (O. S. B.), of Newark, N. J.; died in Newark. He was a native of Wittenberg, Germany, and came to the United States in 1848. When ordained to the priesthood he stood high as a musician, being at one time Musical Director of St. Vincent's College, Pa. During the civil war he was pastor of a German church in Richmond, Va. His labors among the Confederate troops greatly impaired his health. He was not only Superior of the Benedictines of High Street, Newark, but also pastor of St. Mary's Roman Catholic church in that city.

May 20.—BRIGHT, Hon. JESSE D., lawyer and Senator of Indiana; died in Baltimore, Md., aged 68 years. He was born in Norwich, Chenango County, N. Y., December 18, 1812. Removing to Indiana, he received an academic education, studied and practised law; was Circuit Judge of the State, State Senator, United States Marshal, and Lieutenant-Governor; was United States Senator from 1845 to February, 1862, at which time he was expelled on the charge of disloyalty. During the war, or soon after, he removed with his family to Carrollton, Ky., and thence to Covington, in each of which cities he practised his profession. Within the past year the deceased had made Baltimore his home. At the time of his expulsion from the Senate party spirit ran high, and some of the best legal authorities then in the Senate, among whom was the late Judge Harris, of Albany, N. Y., defended his claim to a seat in that body.

May 27.—MORGAN, Rev. GILBERT, D. D.; was born in Central New York in 1791. Early in the present century he was active in the organization of Presbyterian churches and academies in the western sections of New York State. Removing to Pennsylvania in 1836, Dr. Morgan became President of the Western University at Pittsburg. At the request of a committee of the Pennsylvania Legislature, he prepared a report which became the basis of the educational system in that State. He became connected with the Hampden Sidney College in Virginia. He rendered important educational services in North Carolina, where he lived several years. Subsequently he made South Carolina his home, having purchased the Bradford Springs, an estate on the hills of the Santee River, about fifteen miles from Sumter, which he retained until his death. He was a favorite preacher, and contributed largely to theological journals. In 1870 the University of New York conferred upon him the degree of Doctor of Divinity. His latest public sermon was at the opening of the services in the Rev. Dr. John Hall's new church on Fifth Avenue.

May 27.—WELLS, DABUIS, the inventor of wood type; died in Paterson, N. J., aged 75 years. Before he made his discovery, job-

printers had, for three centuries, relied on metal type, which, by reason of cost of the metal, forbade the use of very large letters. Mr. Wells had to invent his own tools in order to make his large wooden type. These tools have since been of great service to wood-engravers. He had served as postmaster of Paterson.

May 29.—BAKER, WILLIAM H., a well-known American artist; died in Brooklyn. He began to practise his art in New Orleans, where he became known as a very successful portrait-painter. About ten years ago he settled in Brooklyn. One of his most successful portraits is a life-size painting of Bishop Quintard, of Tennessee, which he painted for the Episcopal General Convention. For several years he was the principal of the Free School of Design of the Brooklyn Art Association.

June 4.—BALCH, Rev. LEWIS P. W., D. D.; died at Detroit, Mich. He was born at Lewisburg, Va., in 1814, was three years at West Point and afterward at Princeton. He became rector of St. Andrew's, Philadelphia, and in 1847 rector of St. Bartholomew's, in New York City. Next he became rector of Christ Church, Baltimore, and then successively at Newport and Bristol, R. I., and at Middletown, Conn. Subsequently he was made President of Helmut College and Archdeacon of Kent, in Canada. In November, 1874, he became rector of Grace Church, Detroit. For thirteen years he was secretary of the House of Bishops. He received during his life thirty-four calls.

June 4.—McKENNA, Rev. MICHAEL, first pastor of the Roman Catholic Church of St. Rose of Lima, in New York City; died at the rectory. He was born in Greencastle, County Donegal, Ireland, in 1820. In 1860 he visited the United States. He returned to Ireland, whence he was soon after affiliated to the archdiocese of New York, where he was assigned in turn to assist at the parishes of St. Peter's in Barclay Street, the Transfiguration, in Mot Street, and St. Mary's, in Grand Street. The last-named parish was divided by the then Archbishop (now Cardinal) McCloskey into the parishes of St. Mary and St. Rose of Lima, with Father McKenna as pastor of the latter. The parish was a very poor one. A temporary frame-building was at first used for a church, but his zeal and energy enabled him soon to erect a church. He was engaged in the erection of schools for his parish at the time of his death. Father McKenna was a scholar, being so well versed in philosophy and theology that his opinions in all such matters were regarded as authoritative.

June 9.—JAMES, Rev. HORACE; died at Worcester, Mass. He was formerly chaplain of the Twenty-fifth Massachusetts Regiment, and in 1864 was superintendent of freedmen in the Department of North Carolina.

June 11.—RYERSON, Judge MARTIN; died at

Newton, N. J., aged 60 years. He was a member of the Commission on the Alabama Claims.

June 11.—WILLOOK, Prof. JOSEPH, director of the observatory at Cambridge, Mass.

June 14.—DRAKE, SAMUEL G., American antiquarian; died in Boston, Mass., at the age of 77 years. He was born October 10, 1798, at Pittsfield, N. H., and was educated at the common schools of the neighborhood. At the age of twenty he became a school-teacher, and continued so seven years. In 1830 Mr. Drake established his noted book-store in Boston, where he dealt in old and curious books, giving special attention to such as related to the early history of this country. His labors as an antiquarian began in 1824, as editor of a reprint of Colonel Church's "History of King Philip's War." This was followed in 1832 by the "Indian Biography," and in 1833 by "The Book of the Indians; or, a Biography and History of the Indians of North America," a valuable work, of which over ten editions have been published. In 1836 Mr. Drake published "The Old Indian Chronicle," being a collection of narratives of the early colonial wars. In 1839 he prepared "Indian Captivities," a volume containing the accounts given by settlers of the sufferings they endured while in the hands of the Indians. Mr. Drake began in 1847 the "New England Historical and Genealogical Register," and some years later published "The History of Boston," a large work, profusely illustrated with portraits, autographs, and views of buildings and localities. Mr. Drake contributed to numerous periodicals, and imparted information freely to authors intent on studying the annals of the olden time.

June 20.—CASSEL, DOUGLAS, lieutenant-commander U. S. Navy; died at Germantown, Pa. He entered the Naval Academy in 1860, but, owing to the exigencies of the civil war, did not complete his course, but was ordered into active service. He participated in all the most important naval engagements in the Gulf and Atlantic squadrons. He was, in 1868, promoted to the rank he held at the time of his death. He had lately returned from the China station, where he had served as a commander of Japanese troops in the expedition to Formosa.

June 20.—LORE, DALLAS, D. D., was a native of Philadelphia, and died at Auburn, N. Y. In 1847 he was sent to Buenos Ayres as a missionary, and preached there to the English-speaking residents. Upon his return he organized a mission in New Mexico. In the course of his ministry he preached in the Philadelphia and New Jersey Conferences. In 1864 Dr. Lore was elected editor of the *Northern Christian Advocate*, published in Syracuse, for the conferences of Central and Northern New York. His daughter, Miss Julia Lore, was educated and graduated as a physician, and recently sailed for India as a missionary.

June 20.—MASON, M. W., inventor of the locomotive head-light and other useful railway improvements; died at Rochester, N. Y.

June 25.—THOMPSON, MORTIMER, a humorous writer, well known as "Doesticks," died in the city of New York. He was born near Rochester, N. Y., about forty years ago. In his childhood his parents moved to the West. He was graduated at the University of Michigan, then went to New York and obtained a position with Sackett, Davis & Potter, in Maiden Lane. Some letters from Niagara Falls, published in the *Tribune*, first brought him into public notice. He next appeared in the character of reporter of the Police Court for the *Tribune*, his paragraphs being in rhyme. He then wrote a series of sketches of the fortune-tellers of New York, afterward published in a volume, entitled "The Witches of New York." He also wrote biographical articles on the actors of the day. Mr. Thompson wrote several other books, among which were "Pluribustah," "What he Says," and "Nothing to Say." His literary name was "Q. K. Philander Doesticks, P. B." Mr. Thompson was twice married, first to Miss Olive, a daughter of General Clive, of Minnesota; secondly to a daughter of Mrs. James Parton, or "Fanny Fern," of New York City.

June 27.—HORSFORD, Prof. SAMUEL CURTIS, a well-known educator of Paterson, N. J.; died in that city. He was born in Falls Village, Litchfield County, Conn., in 1842, was graduated at Wesleyan University, Conn., and in 1850 was admitted to the bar in that State. He had been an instructor in Paterson for about twenty years.

June 28.—CHUBBUCK, SAMUEL W., inventor and manufacturer of telegraph apparatus; died at Utica, N. Y., aged seventy-five years. He was born in Vermont. At an early age he removed to Eaton, Madison County, N. Y. He went to Utica about thirty years ago, and established a shop for the manufacture of telegraph instruments. He made, it is said, the first telegraphic instrument ever manufactured. One of his inventions was that by which the paper on the reel could be used forty times. The circuit-closer attachment to the key, and the famous "pony" sounder, were also invented by him. He had a practical knowledge of chemistry, optics, and many other sciences. During the "coin-fever" he gathered a collection which was at one time valued at \$30,000. Of late his taste ran to musical instruments, which, together with his former collection of mathematical, optical, and philosophical instruments, the accumulation of a lifetime, filled a "curiosity-shop."

July 2.—WARREN, EDWARD A., ex-member of Congress from Arkansas; died in Nevada County, Ark. He was born in Greene County, Ala., May 2, 1818. After receiving a liberal education he studied law. He served in the Mississippi Legislature in 1845 and 1846, and in the Legislature of Arkansas, in 1848 and 1849, as Speaker of the House. In 1850 he was elected State's Attorney for the Sixth Judicial District of Arkansas. In 1853 Mr.

Warren was elected to the Thirty-third Congress from the Second District of Arkansas, as a Democrat. He was also a member of the Thirty-fifth Congress. During his service as a Representative he was a member of the Committee on the Militia, and Railroads and Canals.

July 8.—FLORENCE, THOMAS B., ex-member of Congress from Philadelphia; died at Washington, D. C. In earlier life he was captain of the Independent Rifle Company, which was accepted for service in Mexico. He was elected to Congress by the Democratic party, his rival being Mr. Lavin, the "National American" candidate.

July 6.—IVES, ROBERT H., senior partner in the firm of Brown & Ives; died at Providence, R. I., aged 77 years. The firm of which he was the senior partner at the time of his death was the largest cotton-manufacturing firm in New England. For many years it has taken an active interest in the general welfare of the State, and aided largely in promoting the industrial prosperity of Rhode Island. The firm owned or was interested in cotton-mills at Blackstone, Mass., and Ashton, Lonsdale, and Scituate, R. I., and other places, in the successful management of which great wealth was amassed. Liberality was shown toward the employés of the firm in the payment of wages, and every effort was made for their improvement. Libraries were established at the several factories, and educational opportunities were afforded the employés. The company's mills at Lonsdale were perhaps the most complete of their kind in the country. The firm of Brown & Ives exercised a controlling influence in the Republican party of the State.

July 7.—BARRY, General HENRY W.; died at Washington, D. C. He was born in New York City, and was self-educated. He taught school in Kentucky, and afterward became a lawyer at Washington. He entered the Union army as a private early in the war; organized the first regiment of colored troops raised in Kentucky; commanded a brigade and for a time a division of the army, and was brevetted twice for gallant and meritorious conduct, the last brevet being for the rank of major-general. He was a member of the State Constitutional Convention of Mississippi in 1867, a State Senator in 1868, and the same year was elected to Congress in the Third District. He was reelected to the latter position in 1870 and 1872. General Barry was chairman of the Committee on Postal Expenditures in the last Congress. He was an Administration Republican, and owed his political success to the support of the colored people. He had been a member of Congress from Mississippi since 1868.

July 7.—PIZARRO, Chevalier Don José A.; died at Baltimore. He was many years consul of Spain and Mexico for the State of Maryland, and Professor of the Spanish Language in St. Mary's College.

July 8.—BLAIR, FRANCIS PRESTON, Jr.; died at St. Louis. He was born at Lexington, Ky., February 19, 1821, and graduated at Princeton College in 1841. Returning to Washington, where his father had charge of the Administration organ, the *Globe*, he studied law and then went to Kentucky, where he was admitted to the bar in 1848. He commenced practice at St. Louis, but, his health failing, he made a journey with a party of trappers to the Rocky Mountains. Being in New Mexico when the war broke out he enlisted as a private soldier under Sterling Price, and engaged in all the battles of the war until 1847, from that of Palo Alto to Buena Vista. In 1848 he returned to St. Louis and resumed the practice of law. He attached himself to the "Free-Soil" branch of the Democratic party, and from 1852 to 1856 served two terms in the Missouri Legislature. He entered the House of Representatives in 1857, and from that year until 1865 represented the St. Louis district. When the civil war broke out he secretly enrolled one thousand volunteers; he took command of the force as colonel, and captured Fort Jackson. He afterward left his place in Congress, and with the rank of major-general he joined the army of General Sherman. He took part in the one hundred days' siege of Vicksburg. In the march from Memphis to Chattanooga he commanded the Fifteenth Corps, and led his men in the battles of Lookout Mountain and Missionary Ridge. In December, 1863, his corps having gone into winter quarters, he resumed his seat in Congress. But at the opening of the campaign in the subsequent fall he again took command, and led the Seventeenth Corps in General Sherman's army in "the march to the sea." In 1866 he was nominated by President Johnson as collector of internal revenue at St. Louis, but was rejected by the Senate. He was also among the nominees as minister to Austria, but he was again denied confirmation. Becoming dissatisfied with the policy of the Republicans, he returned to the Democratic party, and was in 1868 its candidate for the vice-presidency on the ticket with Mr. Seymour as President. In January, 1871, General Blair entered again the State Legislature of Missouri, and in the same month he was elected to fill a vacancy in the United States Senate. He took his seat January 25th, and retired at the end of the term in 1873. Resuming his residence in St. Louis, he was appointed State Superintendent of Insurance, and held that position at the time of his death.

July 8.—PAPY, MARIANNO D., an eminent lawyer of Tallahassee, Fla.; died in that city. Born in St. Augustine, he studied law in Tallahassee, and was admitted to the bar in 1844. In 1846, he became Clerk of the Court of Appeals and continued in that office until 1850. He was member of the Legislature in 1853, when he was elected Attorney-General. He was twice reelected, and held the office until 1860, when he declined another reelection. He

was an exemplary member of the Methodist Church.

July 9.—LOBDELL, DANIEL G.; died at Washington, D. C. He was about 65 years of age. He was supervising special agent of the Treasury Department.

July 9.—OSGOOD, REV. SEWALL M., D. D.; died at Chicago, Ill., aged 68 years. He was born in Henderson, N. Y., March 2, 1808. He was in 1834 appointed printer to the Baptist mission at Maulmain, Burmah, where he was ordained to the work of the ministry May 10, 1836. He was associated with Adoniram Judson, Eugene Kincaid, and other pioneer missionaries in India, in planting there the first Baptist churches. His health failing, he returned to the United States in April, 1846. He closed his connection with the mission in 1849. Since that time he had been for many years in the service of the Baptist Missionary Union as agent or district secretary—stationed, almost always, at Chicago, Ill.

July 10.—BENNING, General HENRY L., Southern leader and judge; died in Columbus, Ga., aged 60 years. He was born in Columbia, in 1818, and commenced the practice of law in that city as a partner of the noted Seaborn Jones, and first distinguished himself in certain bank cases. For some years he was Judge of the Supreme Court of Georgia. He went into the Confederate service as colonel of the Seventeenth Georgia Regiment, and became brigadier-general of the historic Benning's Brigade. He took part in every fight in Northern Virginia until wounded in the battle of the Wilderness. For his stubbornness and coolness in battle he received the *sobriquet* of "Old Rook."

July 10.—HOLDEN, CHARLES, of Portland, Me.; died in that city. He was for three years member of the State Senate, and was president of that body in 1848. For three years he was member of the Executive Council, and had also held several other important offices.

July 11.—MASON, CHARLES KEMBLE, once a well-known actor; died in Brooklyn. He was born in Peterborough, Eng., about 1800. He first appeared on the stage in London in 1828. He came to America in 1834. His final appearance on the stage was in 1869, in conjunction with his relative, Mrs. Scott-Siddons.

July 11.—MORIARTY, the Very Rev. Dr., distinguished Catholic divine; died at Villanova, Delaware County, Pa. He was pastor of St. Augustine's Church, in Philadelphia, at the time of the riots, when the edifice was destroyed by fire.

July 11.—SIMS, HENRY A., architect; died in Philadelphia. He was born in Philadelphia, December 22, 1834. He was originally a civil engineer. He designed and constructed many public and private buildings in Pennsylvania and elsewhere. For a long time he was the foreign correspondent of the American Institute of Architects.

July 16.—YARD, Rev. R. B.; died at Elizabeth, N. J. He was graduated at Pennington

Seminary, and entered the ministry in 1848. Having served in various churches in Rahway, Morristown, and Jersey City, he was chosen chaplain of the First Regiment of the New Jersey Volunteers, and obtained the *sobriquet* of the "Fighting Chaplain." He was a Methodist and also a member of St. John's Masonic Lodge, Newark, N. J.

July 21.—HERSEY, SAMUEL F., a Representative in Congress from Maine; died at Bangor, Me. He was born in Sumner, Me., April 12, 1812. He began as a bank clerk, but subsequently engaged in the lumber-business in Maine, Minnesota, and Wisconsin. He was a member of the Maine Legislature in 1842, of the Executive Council of the State in 1851 and 1852, and of the Legislature again in 1857, 1865, 1867, and 1869. He was a delegate to the National Republican Conventions in 1860 and 1864, and a member of the National Republican-Committee from 1864 to 1868. Mr. Hersey was elected in 1872 on the Republican ticket to Congress from the Fourth District of Maine, composed of the northern and northeastern sections of the State, bordering upon Canada. In September, 1874, he was reelected to Congress. In the House of Representatives, he was a member of the Committee on Public Buildings and Grounds.

July 21.—NOLAN, SAMUEL B. B. (O. E.), inventor; died in New York City. He was born in Dublin, in 1808. In early life he served in the British naval and land forces. In 1850 he came to the United States for the purpose of selling a patent-right for the ruling of paper (the invention of his father), which he disposed of for a considerable sum. He then directed his attention to civil engineering, and was the inventor of numerous plans for the construction of underground and elevated railroads, rafts to be used in case of shipwrecks, improvements in pumps, valves, bridges, manufacture of paper, etc. He devoted a great deal of attention to preparing designs for an underground arcade-road, to connect the lower and upper quarters of this city, and on two occasions his plans embodied in a bill passed unanimously both branches of the Legislature, but were vetoed by the Governor, on the ground that the proposed route would interfere with Central and other parks. Plans of Mr. Nolan were before the Rapid Transit Commissioners at the time of his death, and he left the world expecting that his long-cherished ideas would soon be carried into successful operation.

July 23.—SINGER, ISAAO MERRITT, inventor of a sewing-machine, was born at Oswego, N. Y., October 27, 1811, and died at Torquay, England, aged 63 years. Being a machinist by trade, Mr. Singer made himself thoroughly acquainted with the manufacture of sewing-machines, and for several years he gave his undivided attention to their improvement. Moving from Boston to New York, he finished his machine—which was known as a single-thread, chain-stitch machine—and opened a manufac-

tory. Mr. Singer was materially aided in his early efforts by Edward Clark, a wealthy lawyer, with whom, however, he had some trouble after having compromised the suits brought against him by the Howe Sewing-Machine Company for infringement upon patents held by them. The difficulty with his friend was finally settled, each agreeing, while retaining an equal interest in the machine, to place its manufacture in the hands of a company. The profits on his invention soon made Mr. Singer a wealthy man, and, leaving this country, he took up his residence some time ago in Paris. He afterward went to England, where he lived in a curiously constructed house which he built at Torquay.

July 24.—YEATES, JOHN LLOYD, M. D.; died in Baltimore, aged 78 years. A native of Harford County, Md., born December, 1802, he was graduated M. D. from the University of Maryland in 1822. In early life he was an active politician. He was held in high regard by his professional brethren, and was a prominent member of the Masonic fraternity, having been repeatedly elected "Grand High Priest of the Royal Arch Chapter of Maryland and the District of Columbia."

July 25.—MUMFORD, GEORGE H., vice-president and secretary of the Western Union Telegraph Company; died at Paris, France. He was born in the city of Rochester, N. Y., September 22, 1840. He was a graduate of Harvard University, and in 1863 he was admitted to the Rochester bar, but shortly after became an agent of the Western Union Telegraph Company for the Pacific coast section of the line. After five years of service there, he was called to New York City and elected vice-president and secretary of the company. He had given particular attention to modern languages, and was a writer of merit, his articles on the postal telegraph system having been copied into European newspapers.

July 27.—BURLEIGH, Mrs. CELIA, preacher and reformer; died at Syracuse, at the age of 48 years. She was the widow of William H. Burleigh, a strong advocate of antislavery and female suffrage principles, who died in Brooklyn in 1871. Mrs. Burleigh was the first president of the Woman's Club of Brooklyn, and took an active part in the advocacy of woman suffrage and other liberal and reform movements. After the death of her husband, she prepared herself for the ministry, and was pastor of a Unitarian Church in Brooklyn, Conn., until 1873, when her failing health compelled her to resign the position, and she went to the water-cure establishment of Dr. Jackson, in Dansville, Livingston County, N. Y. Mrs. Burleigh had a wide reputation as an able writer and an eloquent speaker.

July 28.—LAMSON, Colonel TRUMAN; died at Bennington, Vt., aged 80 years. He was the inventor of the present method of rifling guns. From forty to fifty years ago he was the most distinguished "shot" in America.

Aug. 1.—McCABE, Rev. Dr. JAMES D., a well-known Episcopal clergyman of Maryland; died in Baltimore, aged 67. He was born in Richmond, Va., April 15, 1808. He entered the Methodist ministry at twenty-one, but in 1845 he passed into the ministry of the Episcopal Church, and was rector of several parishes in Virginia until 1855, when he went to Baltimore as associate rector of St. Paul's Church. He was afterward rector of several other parishes in Maryland. He was held in high regard, and on two occasions he was chosen bishop, but declined, preferring a more retired sphere of duty. He was a man of varied attainments and philanthropic sentiments. He ranks as one of the founders of the Order of Odd-Fellows, and was the author of the ritual used in that order. As a Mason he was quite as prominent. He was Past Grand Master of Odd-Fellows and Past Grand Chief Patriarch of the Grand Encampment of Virginia, and was for a number of years Grand Representative of the Grand Lodge of Virginia, during which time he was elected Grand Chaplain of the Grand Lodge. He filled the position of Past Grand High Priest of the Grand Chapter of Masons of Virginia, and Past Grand Chaplain of the Grand Lodges of Virginia and Maryland. He was author of several degrees in Odd-Fellowship, was editor at one time of the *Olives Branch*, and also of the *Odd-Fellows Magazine*.

Aug. 3.—LEWIS, WINSLOW, M. D., an eminent surgeon of Boston; died in that city, aged 76 years. He was born in Boston, on July 5, 1799, graduated at Harvard University in 1819, and received his degree of M. D. in 1822. He continued his medical studies under Dupuytren in Paris, and Abernethy in London, and after his return to this country practised his profession with great success in Boston. For many years he was the consulting physician of the Massachusetts General Hospital; he served several terms in the State Legislature, presided over the New England Historical and Genealogical Society for some time, and was Grand Master of the Masons in Massachusetts in 1855-'56, and again in 1860. Dr. Lewis was also an eminent contributor to the medical literature of the country.

Aug. 4.—DRAKE, Commander ANDREW JACKSON, U. S. Navy; died at Newark, N. J. He was born in Morristown, N. J., about 1818, and in 1837 he was appointed a midshipman-at-large by President Jackson. When a young man he was noted for courage, skill as a seaman, and devotion to the service. His first exploit was to bring home a sloop-of-war from the coast of Africa, when all the officers were sick with the yellow fever. He rose by promotion to the rank of commander, to which he was appointed in 1862. He served during the war as commander of the sloop-of-war *Sagamore* and the double-enders *Cimmarone* and *Iosco*. He was engaged chiefly in blockade duty off the coast of Florida and the long siege off Fort

Fisher, and also assisted in the capture of the rebel iron-clad Atlanta. His earlier service was in the West Indies and on the African and Pacific coasts. After the war he was appointed to the command of the Mackinaw, and went to the Bay of Fundy to protect the fishing interests. He made his last cruise in 1866, and was retired on his return, after a long and faithful service. He was then appointed by Governor Ward a Pilot-Commissioner, and re-appointed by successive State administrations. For the past two years he was president of the board.

Aug. 4.—VAN ANDEN, ISAAC, proprietor of the *Brooklyn Eagle*, and long an enterprising and public-spirited citizen of Brooklyn; died at Poughkeepsie. He was born in the last-named city, in 1818. He had taken an active interest in the affairs of Brooklyn for over forty years.

Aug. 7.—MADDEN, Judge JOHN B.; died at Long Island City, N. Y., 1875. He was born in the county of Galway, Ireland, in 1828, and at the age of twenty-three came to the United States. He was member of the State Assembly for several years from Queens County. He was City Justice of Long Island City at the time of his death.

Aug. 15.—MORRIS, GEORGE U., commander in the U. S. Navy; died in Virginia. He was a native of Massachusetts, and was appointed to the Navy from that State. He entered the service August 14, 1836, and remained in it over twenty-six years, and had over fourteen years of active duty. He was commander of the Cumberland when she was sunk by the Merrimac in Hampton Roads. He received his commission as commander, July 25, 1866. His residence was in Georgetown, D. C.

Aug. 17.—PARKER, Prof. JOEL, L.L. D., an eminent jurist; died at Cambridge, Mass. He was born at Jaffrey, N. H., January 25, 1795, and was graduated at Dartmouth College in 1811, becoming afterward Professor of Medical Jurisprudence in that institution. He was a Justice of the Supreme Court of New Hampshire in 1838, and became Chief-Justice in 1838. He was Royal Professor of Law at Cambridge University from 1847 to 1868. He was the author of more than twenty publications, most of which were contributions to the volumes of the Massachusetts Historical Society.

Aug. 17.—WELLER, JOHN B.; died in New Orleans; was a native of Ohio, and represented a district of that State in Congress, from 1839 to 1845. He was the first U. S. Commissioner to Mexico under the treaty of Guadalupe Hidalgo. Afterward settling in California, he was, in 1851, sent to the U. S. Senate from that State. In December, 1860, he was appointed minister to Mexico, and in 1864 he was a delegate to the Democratic Convention at Chicago.

Aug. 23.—EDWARDS, JONATHAN; died in New Haven, Conn., aged 77 years. He was

a grandson of the famous theologian, Jonathan Edwards; graduated at Yale College in 1819; he studied law at Judge Gould's law-school at Litchfield, and commenced practice in Troy, N. Y., of which city he was at one time mayor, and several times a member of the Legislature of New York.

Aug. 23.—GROVER, Judge MARTIN; died at Angelica, N. Y. He was a resident of Alleghany County, where he gained a good reputation as a lawyer. He was nominated Judge of the Court of Appeals in 1865, to fill the unexpired term of Judge Henry R. Selden. He was a Democrat of the Silas Wright school, and acted with the party until the passage of the Kansas-Nebraska bill, when he became a Republican. He was firmly opposed to legislative corruption. For years he went by the name of the "ragged lawyer," on account of his appearance in court with his garments torn, or sadly the worse for wear. He was very popular in Alleghany, Wyoming, and adjacent counties. He was some years since elected by an overwhelming majority Judge of the Supreme Court of the Eighth Judicial District. His term did not expire until the close of December, 1867. Unlike some judicial officers, he studiously avoided taking an active part in political gatherings and campaigns.

Aug. 23.—NUTT, Rev. CYRUS, D. D., late president of the University of Indiana; died at Bloomington, Ind., about 64 years of age. He was a native of Western Pennsylvania. He graduated at Meadville, overcoming the difficulties of poverty in the gaining of his education. He came to Indiana in 1838, and was the first president of Asbury University, Greencastle, organizing that college with three scholars in a small room twelve by fifteen feet, which is yet standing. He remained president until the election of Bishop Simpson, in 1839, and then took the place of Professor of Greek. He continued in that relation, and as vice-president of the university, until the retirement of Dr. Curry from the presidency again placed him in charge for a period of eighteen or twenty months, the presidency being then filled by Bishop Bowman. In 1860 Dr. Nutt was elected president of the State University, and remained at its head until July, 1875. As an evidence of his devotion to the educational work, and especially to Asbury University, it may be mentioned that during the first three years of the history of that institution he did not receive money enough to pay the postage on his correspondence; but he remained at his post, and had the satisfaction of seeing the university become known and honored throughout the country.

Aug. 29.—WHITE, FRANK J., brigadier-general; died in San Francisco, aged 33 years. In 1861, when only nineteen, he contributed to the raising of the Tenth New York Regiment. The same year he was placed in command of the Union outposts near Hampton. He served as a member of General Fremont's staff while

that officer was in the Department of Missouri. In October, 1861, at the head of his "Prairie Scouts," he recaptured Lexington. Although wounded, and at the head of only twenty-two men, he held Springfield thirty-six hours against a large force until reinforcements arrived. In the closing years of the war he was governor of the Eastern Shore of Maryland. After the war he was made brigadier-general, and, after serving a short time in Texas, he settled in St. Louis, studied law, was admitted to the bar of St. Louis, and was elected to the State Legislature.

Sept. 1.—SMITH, GEORGE H., second president of the Church of the "Latter-Day Saints;" died at Salt Lake City.

Sept. 2.—HILL, U. C., musician; died in Paterson, N. J. He was born in Boston; gave lessons in New York on the violin and piano; studied music in Cassel, Germany, under the celebrated violinist Louis Spohr; originated the idea of the Philharmonic Society, which was the pride of his life; was president for many years, and played first-violin in the orchestra until two years ago; became pecuniarily embarrassed, and committed suicide.

Sept. 4.—BLATCHFORD, RICHARD M.; died at Newport, R. I., aged 77 years. He was born at Stratford, Conn., in 1798, and graduated at Union College in 1818. Studying law in Jamaica, L. I., he began practice in New York City. Mr. Blatchford rapidly rose in his profession, and in 1826 he received the appointment of financial agent and counsel in the United States for the Bank of England. At a later date he held the same position in relation to the Bank of the United States, and in 1836, when the charter of that bank expired, he satisfactorily settled the affairs between it and the Bank of England. In 1855 he was elected member of the Assembly from the Fifteenth Ward of New York City, and in April, 1859, he was appointed Commissioner of Central Park, which position he held until April 20, 1870, when he was removed by the operation of the new charter. On December 3, 1872, Mayor Hall appointed him as a Commissioner of Public Parks, and he remained in office until the adoption of the present charter. At the beginning of the late war, Mr. Blatchford became a very prominent member of the Union Defense Committee, and President Lincoln appointed him on the committee charged with the disbursement of the large sums of money appropriated for obtaining soldiers for the Union army. Besides Mr. Blatchford, that committee consisted of ex-Governor Dix and George Opdyke. In 1862 President Lincoln appointed Mr. Blatchford United States minister at Rome, and he discharged the duties of that office to the satisfaction of the Administration under which he acted. He was a personal friend of Daniel Webster, who selected him as one of the executors of his will.

Sept. 6.—BROWN, Judge JOHN W.; died at Newburg, N. Y., aged 78 years. He was born

at Dundee, Scotland, October 11, 1796. He was admitted to the bar in 1818. At the time of his death he was Judge of the Supreme Court for the Second Judicial District.

Sept. 9.—LYON, CALEB; died at Rosville, Staten Island. He formerly resided at Lyonsdale, in Lewis County, N. Y. He was appointed consul at Shanghai, China, by President Polk, in 1845, and on his return was elected to the State Assembly, and afterward to the State Senate. In 1853 he was elected to Congress. In 1864 he was appointed Governor of Idaho Territory, which position he held two years. His later life was passed at Rosville, Staten Island, N. Y., where he purchased and restored the country-seat known as "Ros Castle."

Sept. 10.—WOODRUFF, LEWIS BARTHOLOMEW, lawyer and judge, of New York; died at Litchfield, Conn., at the age of 65. He was born in Litchfield, and entered Yale College in 1830. After graduating he studied law in Judge Gould's law-school in Litchfield. He began practice in New York City, and was associated for a number of years with the celebrated George Wood, also with Mr. Goodman. His first judicial office was that of Judge of the Court of Common Pleas, in 1855. He afterward became Judge of the Superior Court. At the expiration of his term he returned to practice, and formed a partnership with Mr. Sandford. In 1867 he was appointed Judge of the Court of Appeals. President Grant, December 22, 1869, appointed him United States Circuit Judge, in place of Judge John K. Porter, resigned. His circuit included New York, Vermont, and Connecticut.

Sept. 11.—BLOW, HENRY T., of Missouri; died at Saratoga. He was born in Virginia in 1818, but went to Missouri in 1830, and graduated at St. Louis University. He then engaged in the lead and drug business, in which he was very successful. Before the war he took a prominent part in the antislavery movement, and served four years in the State Senate. In 1861 he was appointed by President Lincoln as minister to Venezuela, but he resigned in less than a year. He was a Republican member of Congress from 1863 to 1867, and served on the Committee of Ways and Means. He was minister to Brazil from 1869 to 1871, and was appointed one of the Commissioners of the District of Columbia under the recent act of Congress, but declined to accept the position. Mr. Blow evinced a warm interest in the progress of Missouri, and was identified with the general advancement of the State.

Sept. 11.—STONE, HORATIO, a distinguished American sculptor; died at Carrara, Italy.

Sept. 14.—LAPHAM, INCREASE A., a scientist of wide reputation; died at Oconomowoc, Wis. He was born in Palmyra, Wayne County, N. Y., March 7, 1811. In early life he became a civil engineer. While residing at Columbus, from 1833 to 1835, as secretary of the Ohio Canal

Commissioners, he devoted his leisure to collecting an *herbarium*, and served on a committee to report on the subject of a geological survey of the State of Ohio. In 1836 he removed to Milwaukee, Wis., where he began his career as author. In 1844 he published "Wisconsin: Its Geography and Topography, History, Geology, and Mineralogy," and, in 1855, a geological map of Wisconsin, compiled in great measure from personal observations. In the same year appeared his "Antiquities of Wisconsin," published in the seventh volume of the Smithsonian "Contributions to Knowledge," the result of investigations undertaken in behalf of the American Antiquarian Society. He contributed numerous papers to the scientific periodicals, and was the first to ascertain that there is a slight lunar tide on Lake Michigan. The country is in a great measure indebted to Prof. Lapham for the present system of weather probabilities. Acting in concert with the Hon. Henry E. Paine, of Milwaukee, he advocated and framed the law of 1870, which established the Signal-Office. Prof. Lapham was, until lately, State Geologist of Wisconsin, and retained an active interest in scientific progress until the close of his career.

Sept. 15.—STONE, WILLIAM OLIVER, N. A., a portrait-painter of New York City; died at Newport, R. I. The Stuyvesants and other old New York families are the possessors of many of his finest portraits.

Sept. 20.—WEEKS, CYRUS, M. D., over forty years practising physician in the city of New York. He was a native of New Hampshire, and received his diploma from the Medical School at Cambridge, Mass. Commencing practice in New York City, he contributed to *The New-Yorker*. He was an active member of the New York Academy of Medicine, and, like the late Dr. Francis, he formerly attracted to his house, No. 434 Broome Street, some of the leading literary men of the day. Of late, he had resided at Bloomfield, N. J.

Sept. 21.—SMITH, JOSEPH, M. D.; died at Lexington, Ky. He was born near Danville, Boyle County, Ky., January 8, 1815. He was educated at Centre College, took his first medical degree in 1836, another in 1838, and practised medicine for thirty years in Danville. Dr. Smith removed to Lexington eight years before his death. He was a member of the Board of Kentucky University, and professor in the Medical Department of the same.

Sept. 22.—CHAMBERS, Rev. JOHN; died in Philadelphia, aged 78 years. He had been pastor of a Presbyterian Church there for about fifty years, and was, during nearly all that time, a very popular preacher.

Sept. 23.—KRAOKOWIZER, ERNEST, M. D.; died at Sing Sing, N. Y. He was born in Austria, in 1821, and studied medicine at Vienna. Several years ago he came to America, and settled in Brooklyn, N. Y., where he practised until 1857, when he removed to the city

of New York. He excelled in surgery, and was a member of several medical societies. He was also attached to the staff of the Mount Sinai and other hospitals. He was well known and highly esteemed by the Germans of New York.

Sept. 24.—HATCH, ISRAEL T.; died in Buffalo, aged 67 years. Graduating at Union College, he went to Buffalo in 1828, and practised law. He was Assistant Secretary of State in 1829-'30; was elected member of Assembly in 1852, and of Congress in 1856; was appointed Postmaster of Buffalo in November, 1859, and served till the spring of 1861. He was elected a member of the Constitutional Convention of 1867-'68, and acted as Commissioner of the Reciprocity Treaty in 1869-'70. Mr. Hatch was for many years engaged in banking business, and prominently connected with the elevating and dock enterprises in Buffalo.

Sept. 24.—REYNOLDS, JOHN H.; died in Kinderhook, N. Y. About twenty years ago he was a prominent member of the bar of the State of New York, being the contemporary of Nicholas Hill, John K. Porter, and Augustus Beach. In 1858 he was a member of Congress, and in 1873 he became Commissioner of Appeals.

Sept. 28.—PORTEOUS, Rev. GEORGE B., pastor of All-Souls' Church, Brooklyn, N. Y.; was drowned at Sea Cliff, Long Island, aged about 45 years. He was a native of Scotland. After studying law in the University of Glasgow, and medicine in the Andersonian University, in the same city, he studied theology in King's College, London. He was afterward engaged as Episcopal clergyman in London and other parts of England, but, after ten years' service, becoming dissatisfied with the Anglican Church, in 1873 he came to the United States. After a short term of service here, in connection with the American Episcopal Church, he became a Unitarian of the theistic school of Theodore Parker. He was the author of several novels, treatises, and pamphlets, and was a contributor to some British magazines. He was for a few years editor of a religious monthly and a London daily paper. He also lectured on "Genius," "Sectarianism," "Savonarola," "Progress," and "National Characteristics." He was a versatile writer and popular speaker.

Oct. 2.—SPALDING, General IRA, military leader and railroad engineer; died in New York City, aged 57 years. Educated as a civil engineer, he began to practise his profession when only twenty-one years old, and was connected with several railroads in the western part of New York State and in Canada. During the civil war he was major of the Fiftieth New York Volunteers. He rose to the rank of brevet brigadier-general. At the close of the war he returned to his profession, and became chief-engineer of the Utica, Chenango & Susquehanna Railroad, engineer-in-chief of the Costa Rica Railroad, and chief-engineer of the Minnesota division of the Northern Pacific Railroad.

Oct. 8.—HEGEMAN, WILLIAM, senior partner in the firm of Hegeman & Co.; died in the city of New York, where he was born, in 1816, his father being Judge Adrian Hegeman. He was a man of versatile talents and of a genial disposition. At one time he had under his control several drug-stores, in various parts of the country and in New York City. With all his business cares, Mr. Hegeman found time to attend to several other pursuits. He was for many years president of the College of Pharmacy, and an active member of the Century Club, of the Union League Club, and of the St. Nicholas Society. Well versed in chemistry and kindred sciences, he was a painter and musician for his own amusement. He was also a good critic and liberal patron of the fine arts and literature.

Oct. 4.—CHATFIELD, ANDREW G.; died at Belle Plain, Minn. He was Judge of one of the District Courts of Minnesota. He was appointed to the office of Territorial Judge by President Pierce.

Oct. 5.—HAINES, General J. M.; died at Charlestown, Mass. He was formerly Adjutant-General of New Hampshire, and took a prominent part in enrolling and equipping the troops of that State during the civil war.

Oct. 6.—PLUNKETT, JAMES LYSAGHT, master in U. S. Navy; died in Brooklyn, aged 84 years. He was born in Berkshire, England, and entered the U. S. Navy, as a master's mate, in 1858, and served throughout the war, winning his position as a master by meritorious service and signal bravery. He commanded the naval part of the parade when medals were distributed to the veterans of the army and navy, in Brooklyn, at the close of the war. Afterward he served for a short time as a commissioned officer of the Peruvian Navy. He had been recently engaged in the merchant service.

Oct. 9.—McKINNEY, Judge ROBERT J.; died at Knoxville, Tenn. He was for many years one of the Judges of the Supreme Court, and one of the most eminent jurists of the State.

Oct. 11.—JOHNSON, WILLIAM H.; died at Seneca Falls. He had represented the Twenty-sixth Senatorial District for the last four years. He was born in Volney, Oswego County, in 1820, and was for many years engaged in manufacturing at Seneca Falls. He was an active member of the Democratic party.

Oct. 18.—PRESCOTT, Dr. WILLIAM; died in New Hampshire, aged 86 years. He was born in Gilmanton, December 29, 1788. At the age of sixteen he was indentured to a farmer, who was so parsimonious that he compelled the boy to spend the hours usually devoted to rest in gathering chestnuts with which to purchase his school-books. At the age of twenty-one he had such an education as he could receive by attending the common school two months in the year. He then learned mathematics, navigation, and surveying, under the private instruction of two clergymen, afterward taught school, studied medicine, and graduated, in 1815, from

the Dartmouth Medical College. He practised medicine in Gilmanton and Lynn. He represented Gilmanton in the Legislature, and the Sixth District in the State Senate. He was a member of a great number of literary and scientific societies, and was connected with the Masonic fraternity, having received the council degrees at Concord, in 1869. He was an enthusiastic collector of minerals, shells, etc. He wrote the "Prescott Memorial," a history of the Prescott family in the United States. In faith he was a Methodist, but in charity of the "Church universal."

Oct. 19.—ANDERSON, HENRY JAMES, M. D., LL. D., a distinguished man of science, was born in New York, January 6, 1798; died at Lahore, Northern Hindostan, aged 77 years. He was graduated at Columbia College, N. Y., in 1818, at the age of twenty, and at the College of Physicians and Surgeons in 1824. He became a Professor of Mathematics and Astronomy at Columbia College in 1826 and *emeritus* professor in 1866. After discharging the duties of his professorship for more than twenty-five years, he was obliged to resign in consequence of the serious illness of his wife, with whom he visited Europe. While in France he became acquainted with the celebrated French astronomer Arago, and at this time entered the Catholic Church, of which at the time of his death he was one of the most distinguished American laymen. He was one of the band of pilgrims who left the United States in 1874 on a visit to Lourdes, in the south of France, and who were received with special marks of favor by Pius IX. Leaving the fellow-pilgrims after they had accomplished their pilgrimage, he joined the American Scientific Expedition appointed by the Government of the United States to witness the transit of Venus, and in the performance of the duties connected therewith visited Australia. He next proceeded to India, where, after ascending and descending one of the highest peaks of the Himalayas, he died of diarrhoea at Lahore. Dr. Anderson was held in high regard by his fellow-Catholics throughout the United States and by the Pope, who on more than one occasion alluded in terms of praise to his services in the cause of religion. He was for many years president of the Society of St. Vincent de Paul. He was also one of the early members and founders of the Catholic Protectory in Westchester, N. Y. To Dr. Anderson the Catholic Union of New York is mainly indebted for its origin. He was an ardent and devoted student in the natural sciences, and it is thought his death was hastened by his excessive exertions in his last scientific exploration. He was the author of two works: "Geology of Lieutenant Lynch's Expedition to the Dead Sea," and "Geological Reconnaissance of Part of the Holy Land," 1848, published by the United States Government.

Oct. 21.—DAVIS, R. T.; died at Louisville, Ky. He was the eldest son of the late Senator

Garrett Davis, was president of the Northern Bank of Kentucky, and a leading member of the bar of Bourbon County. His death is supposed to have been caused by an overdose of chloral used as an anodyne.

Oct. 21.—HUDSON, FREDERICK, formerly managing editor of the *New York Herald*; died at Concord, Mass. He was born in Quincy, Mass., in 1819, and received his education partly in Concord and partly in Boston, where in 1830 he graduated in the Mayhew School. In 1836 he went to New York. In 1837, then a boy of seventeen, he was employed by James Gordon Bennett as an office *factotum*. He rose to be a reporter, and then to the position of managing editor. He was connected with the *Herald* nearly thirty years, retiring in April, 1866, and thenceforth residing in Concord. In 1872 he published a "History of Journalism in America." It is a faithful and comprehensive chronicle of the rise and progress of newspaper literature in the United States. In the spring of 1875 he wrote an entertaining magazine article on the "Concord Fight."

Oct. 22.—FILLMORE, ISAAC O., D. D.; died at Green Island, N. Y. After completing his studies at a theological seminary he was ordained pastor of the Presbyterian Church at Cambridge, N. Y., in 1843. He labored in Cambridge twelve years, during which the church had several powerful revivals. He was afterward pastor at Batavia and Syracuse, and preached for a short time at Knowlesville, at Jordan, N. Y., and at Green Island. Taking a trip to California and Oregon for the recovery of his health, he also preached in several destitute places in those States.

Oct. 22.—HEBARD, WILLIAM; died in Chelsea, Vt., aged 75 years. He was born in Windham County, Vt., November 29, 1800. In 1842 he was elected Judge of the Supreme Court of Vermont, and again in 1844. For several years he represented his State in both branches of the Legislature, and was a delegate to the Republican National Convention of 1860. He represented the Second District in the Thirty-first and Thirty-second Congresses.

Oct. 22.—MEREDITH, General SOLOMON; died at Cambridge City, Ind. He was born in Guilford County, N. C., in May, 1810. In 1830 he removed to Wayne County, Ind., and settled in Cambridge City in 1840. For three terms, beginning in 1846, he represented his county in the State Legislature. In 1849 he was United States Marshal of Indiana. In the civil war he led to the field, as colonel, the Sixty-ninth Indiana Volunteers. He was afterward made brigadier-general, and received the rank of major-general at the close of the war. He was popularly known as the commander of the "Iron Brigade." During four years he fought on many fields, and was dangerously wounded at Gettysburg. At the close of the war he was appointed Surveyor-General for Montana. Retiring in 1868, he devoted his energies to raising blooded cattle.

Oct. 24.—CARRUTH, URI, journalist; died at Vineland, N. J. He was born in the State of New York, studied law, and became editor of the *Vineland Independent*. He was shot by Mr. Charles K. Landis in March, 1875, and carried the bullet in his brain until he died.

Oct. 25.—ATHON, Dr. JAMES S., physician and politician, of Indiana; died at Indianapolis, Ind. He was born in Loudon County, Va., April 1, 1811. His parents settled in that part of Indiana Territory known as "Clark's Grant." In early life he went to the common school in the winter months, and worked on his father's farm during the rest of the year. After he had grown to manhood he studied medicine, graduating at the Medical College of Louisville, Ky. In 1846 he received the appointment of surgeon of an Indiana regiment, to serve under General Taylor in the Mexican War. He served first in the Third and then in the Fifth Regiment. At the close of the war he was elected State Senator. He was a member of the Constitutional Convention of 1850, and was, in 1858, appointed superintendent of the Hospital for the Insane. On retiring from the hospital he was elected Secretary of State, and filled the office for two years. For many years he was an ardent Methodist, but subsequently became a communicant in the Episcopal Church. He was the father of the poetess Hetty Athon Morrison.

Oct. 27.—ARTHUR, Rev. Dr. WILLIAM; died at Newtonville, near Albany, N. Y. He was born of Scotch-Irish parentage, in Antrim, Ireland, in 1796, and was graduated at Belfast College. While a young man he came to the United States, and, after studying law for a short time, was called to the Baptist ministry. After preaching in Vermont and Western New York, he settled as pastor of the Calvary Baptist Church of Albany, N. Y., where he remained from 1855 to 1863. He afterward removed to Schenectady, where he published a magazine, called the *Antiquarian*. A few years later he published a work on the origin and import of "Family Names," which was favorably received both in this country and in Europe. During the last ten years he had lived in retirement, preaching occasionally, and giving much time to literary pursuits.

Nov. 1.—YOUNG, Captain THOMAS G.; died at Augusta, Me. For the past four years he was Assistant State Librarian. He was a veteran whaler, and sailed out of New Bedford for forty years. He made quite a reputation, near the close of the war, by his refusal to surrender his whaling-vessel, the bark *Favorite*, to the pirate Shenandoah, in the Arctic Ocean. The commander of the Shenandoah admired the old man's bravery so much that he did not fire a shot at the craft, but with an armed boat's crew brought him and his crew off.

Nov. 4.—BLODGETT, WILLIAM TILDEN, manufacturer; died in New York City, aged 52 years. By his taste, geniality, benevolence, and public spirit, he won many friends. The fine beginnings of the New York Metropolitan Museum

are due, in great part, to his liberality and energetic exertions. He was also a generous, but discriminating, patron of American art.

Nov. 7.—ANTHON, General WILLIAM HENRY, a prominent lawyer of New York City. He was commonly known as General Anthon, a title conferred on him by his position of Judge Advocate-General on Governor Morgan's staff during the late war. He was admitted to the bar in 1848. For one term he was a member of the State Legislature. He was as a lawyer engaged in several remarkable cases, one of which was the Brinckly divorce case. In 1858 he defended the rioters who burnt the Quarantine buildings on Staten Island. He purchased and laid out the Jerome Park and race-course for Mr. Jerome. He was a son of the late John Anthon, president of the Law Institute of New York, and a nephew of the late Prof. Charles Anthon, of Columbia College.

Nov. 9.—TICE, ISAAC P., aged 42 years. He was a prolific inventor, having taken out letters-patent for more than sixty inventions.

Nov. 13.—MILES, Rev. JAMES B., D. D.; died at Worcester, Mass. He was corresponding secretary of the Peace Society, and, as such, took a leading part in a series of annual congresses for the reform and codification of international law, especially with a view to secure the settlement of contentions among nations by the arbitration of commissioners.

Nov. 17.—FARWELL, SAMUEL, of Utica, N. Y.; died at Saginaw, Mich. He was known throughout the United States, for fifty years, as a leading contractor for the building of public works. He began to work on the Erie Canal in 1825. He completed contracts for the slackwater navigation in the Lehigh River in 1835, the Croton Aqueduct in 1838, and in subsequent years the Boston Water-Works, New York & Erie Railway, Great Western Railway of Canada, Utica & Black River Railroad, Brooklyn Water-Works, and the Flint & Père Marquette Railway. Of the railway last mentioned he was the vice-president and principal stockholder.

Nov. 23.—FOSTER, JOHN; died in Jacksonville, Ala. He was born in Rowe, Mass., February 7, 1817, was graduated at Williams College, Mass., in 1834, and read law at Troy, N. Y. In early life he settled in Jacksonville as a lawyer, and in the course of his practice rose to the first rank of his profession. He was elected Chancellor in 1856, and was reelected in 1862, serving until 1865. Mr. Foster was a member of the Constitutional Convention of 1865, and was on the "Committee on the Constitution."

Nov. 23.—WELLS, JOHN, Judge of the Supreme Court of Massachusetts. He was born at Rowe, Franklin County, Mass., 1818, and was graduated at Williams College in 1837. Completing a course of law at the Harvard Law-School, he commenced practice at Chicopee. He was afterward Probate Judge of Hampden County. He was appointed to the Supreme Bench in 1868.

Nov. 30.—AVERY, BENJAMIN P., United States minister to China; died aged about 47 years. He was a native of the city of New York. He embarked for California in 1849, to engage in mining. But it was as a journalist that he gained his reputation, particularly during his ten years' connection with the *San Francisco Bulletin*. For a year he was the Washington correspondent of that journal. He became editor of the *Overland Monthly* in January, 1874, and continued his connection with that periodical until his departure for China, in August of the same year. He succeeded Mr. Low as United States minister at Peking. As the United States has been at peace with China, Mr. Avery had no opportunity for displaying his diplomatic skill.

Dec. 2.—STROUD, REUBEN W., Canal-Commissioner; died at Syracuse, aged 34 years. He was elected Canal-Commissioner in 1873, on the ticket with Governor Dix. He had charge of the middle division of the canals.

Dec. 3.—ARMSBY, JAMES H., M. D., an eminent physician of Albany, N. Y.; died in that city. He was born in Sutton, Mass., December 31, 1809. His early years were spent on his father's farm and in the common school, except a brief period at the Worcester and Monson Academies. In 1830 he went to Albany, and studied medicine in the office of Dr. Alden March, and in 1838 he graduated at the Vermont Academy of Medicine. Returning to Albany, he became a teacher in a private medical school. In 1834 he was appointed Professor of Anatomy and Physiology in the Vermont Academy of Medicine. He retained this position about six years, and then devoted himself to the founding of a university in Albany. He raised \$10,000 for that object, and delivered in that city the first American course of medical lectures that was illustrated by dissections of the human body. In 1839, and again in 1845, he visited Europe for the purpose of inspecting the principal medical institutions of the Old World. In 1861 he was appointed United States consul at Naples. He was a warm and intelligent friend of the fine arts and of young artists. He was very popular as a lecturer on anatomy and physiology, and gave lectures on these subjects not only in various parts of the State of New York, but in Naples, while residing in that city. He was one of the originators of the Young Men's Christian Association, was one of the founders of the Albany Medical College, and for many years one of its principal professors, and was instrumental in founding the Dudley Observatory. He also had an extensive practice, and was highly esteemed by the leading residents of the State capital.

Dec. 4.—DENN, Miss SUSAN, a well-known American actress; died at Bluffton, Ind., from injuries caused by a fall upon the stage, while playing in Indianapolis. She was born in Philadelphia, March 22, 1835. She had much ability, and was at one time a favorite in New

York. Of late she had acted very successfully in California and other parts of the West, where her popularity was undiminished.

Dec. 5.—DUANE, Rev. RICHARD B., D. D.; died in Bergen, N. J., at the age of 53 years. In early life he engaged in business; in 1847 he became a candidate for holy orders; in 1850 he was ordained deacon, and in 1851 ordained to the priesthood. He was successively rector of Grace Church, Honesdale, Pa., St. Michael's Church, Trenton, N. J., and of St. John's, Providence, R. I. At the time of his death he held the office of secretary and agent of the Foreign Committee of the (Episcopal) Board of Missions.

Dec. 7.—DICKINSON, Rev. BAXTER, D. D.; died in Brooklyn, N. Y., aged 81 years. He was graduated at Yale College in 1817, and at Andover in 1821. He was ordained at Long Meadow, Mass., in 1823, where he was settled six years. From 1829 to 1838 he was pastor of the Third Presbyterian Church, Newark, N. J., whence he went to Lane Theological Seminary and taught there as Professor of Sacred Rhetoric and Pastoral Care four years, until 1839. Then he removed to Auburn Theological Seminary, and taught until 1847. Subsequently he was engaged in the service of the American and Foreign Christian Union, and of the American Board of Foreign Missions.

Dec. 7.—PAYNE, Rev. SMITH, D. D.; died in New York City. He was a native of Ireland, but was educated at Eton, England. He came to this country when a young man, studied for the ministry, and was pastor at Elizabeth, N. Y., Middletown, Conn., Yonkers, and Calvary Church in New York. In 1844 he became rector of St. John's Church in Washington, and remained there twenty years. Since 1865 he had resided quietly in New York City.

Dec. 10.—CHANLER, Mrs. JOHN WINTHROP; died in New York City. She was the daughter of Samuel Ward and Emily Astor, the daughter of William B. Astor, by the death of whom (November 24th) she came into the possession of a large fortune. By his will Mr. Astor gave Mrs. Chanler a life-estate in a house on Madison Avenue, in his country-seat in Dutchess County, in a large amount of real estate out of John Jacob Astor's residuary estate, and \$375,000. She also received absolutely a large quantity of real estate. She was in the 38th year of her age.

Dec. 12.—JONES, Mrs. MELINDA, once a popular actress; died in Boston, aged 60 years. Her maiden name was Topping. She made her first appearance on the stage at the Bowery Theatre, New York, in February, 1837. She was then the wife of Mr. George Jones, from whom she was afterward divorced, and who still survives as the "Count Johannes." She dropped the name of Mrs. George Jones about twenty years ago. At one period in her professional career she was associated with the late Edwin Forrest. In her last days she was poor and afflicted. Her *début* was made

on an occasion when her husband took a benefit.

Dec. 18.—MORGAN, Brigadier-General CHAS. H.; died in Alcatraz Island, Cal. He was major of the Fourth Artillery, U. S. A. He was born in the State of New York; was a graduate of West Point, and in 1857 was assigned the Third Regiment of Artillery. In 1863 he joined the Volunteers, with the rank of major, and at the close of the war received the brevet of brigadier-general.

Dec. 19.—EDDY, EDWARD, American tragedian; died at Kingston, Jamaica, aged 54 years. He was born in Troy, N. Y., and commenced his theatrical career in Albany. About 1843 he went to New York City, where he played in several theatres, and afterward in other cities of the United States. During his lifetime he managed almost all the theatres in New York City.

Dec. 20.—SENGER, WILLIAM U., an eminent geologist; died at Port Jervis, N. Y., aged 83 years. He was born in Austria, and was a geologist in the employment of that Government for thirty-eight years, having charge of the survey of the Tyrol, and for a time was superintendent of the Government salt-works at Hall in the Tyrol. He removed to this country in 1840.

Dec. 22.—BOSE, WILLIAM, a journalist; died in Baltimore, Md., aged 79 years. At the age of nineteen, having achieved collegiate honors, he became one of the editors and proprietors of the *Baltimore American*, and held these relations for nearly forty years.

Dec. 22.—IVES, Rev. DWIGHT, D. D.; died at Conway, Mass., aged 70 years. He was born in West Springfield (now a part of Holyoke), Mass., September 21, 1805. He was graduated in Brown University in 1835. After completing his studies he settled first at Springfield, Mass., and next at Alton, Ill. After remaining three years at the West, he returned and settled as pastor of the First Baptist Church in Suffield, Conn., where he continued for thirty-four years. For many years he took a leading part in the Baptist councils and conventions of Connecticut, and especially in advancing the prosperity of Baptist educational institutions.

Dec. 25.—ADAMS, Rev. GEORGE E., D. D.; died at Orange, N. J., aged 74 years. He was a native of Bangor, Me., and for forty years was pastor of the chapel of Bowdoin College at New Brunswick, Me. He then moved to Orange, N. J., and preached as his enfeebled health would permit, until Trinity Congregational Church in Orange was formed, when he accepted the pastorate, limiting his term to five years. This period expired in 1874. By many he was highly esteemed as pastor, orator, writer, and friend. During many years he wrote much for the press.

Dec. 27.—RICHARDSON, WILLIAM A.; died at Quincy, Ill. He was born in Kentucky in 1811, became a lawyer and settled in Illinois.

Between the years 1836 and 1844 he was three times a member of the State Legislature, and in 1844 was an elector at large on the Polk and Dallas presidential ticket. In 1846 he served as captain in the Mexican War, and on the battle-field of Buena Vista was promoted by the unanimous vote of his regiment. In 1847 he was elected by the Democrats a Representative in Congress from Illinois, and continued a member of the House until 1856, when he resigned. In 1857 he was appointed by President Buchanan Governor of Nebraska, but he resigned the following year. In 1860, he reluctantly consented to serve as member of Congress, but, before his term ended, he was elected United States Senator to succeed Stephen A. Douglas. Of late he took but little active part in public affairs.

Dec. 27.—WHITE, REV. ISAAC P., D. D., rector of Trinity Church, Newport, R. I.; died in that city, aged 27 years. He was born in Sunderland, Eng., July 17, 1818. Educated at Cambridge, he was prepared for the ministry by the Dean of Peterborough. He began his ministry in the Isle of Jersey, where he preached alike in French and English. Subsequently he moved to Canada, where he had a parish twelve miles from Montreal. He was next called to the Cathedral of Montreal, where he held the office of canon at the time he was called to Newport. He accepted the charge of Trinity Church in 1866, and remained there just nine years. He promoted church extension in Newport, and had the reputation of being a good pastor, but his High-Church faith and preaching were offensive to those who belong to the "evangelical" branch of the Episcopal Church. His death was occasioned by exposure to inclement weather while in attendance at the funeral of Mrs. Chanler, who also died from a cold caught at the funeral of her grandfather, W. B. Astor.

Dec. 28.—BOEHM, HENRY, Methodist preacher and itinerant; died near Richmond, S. I., aged 100 years. He was born in Conestoga, Lancaster County, Pa., June 8, 1775. His grandfather, Jacob, born in Switzerland in 1698, and having become a disciple of the Baptist Menno, came to America in 1715, and settled in Lancaster, Pa., then a colony of Mennonites. Martin, the father of Henry, was in early life a licensed preacher among the Mennonites, but afterward joined the Moravian Brethren, and finally became a Methodist. The family spoke the "Pennsylvania German," but a Hessian soldier taught him to write and speak the German language correctly. In 1791 the Methodists built a chapel on land given by his uncle. In this meeting-house, known as Boehm's Chapel, Henry first heard Bishop Asbury preach in 1799. His own life as an itinerant began in 1800, on the Eastern Shore of Maryland. In 1803 he made a short tour with Bishop Asbury as his traveling companion, and in 1808 he was chosen to journey with the bishop continually. For five years he ac-

companied him in all his travels, South and West, East and North, as far as Canada. Bishop Asbury, being sixty-three years old, was feeble, rheumatic, and at times almost helpless. In acknowledgment of Boehm's ministrations to him he says, "He served me as a son; he served me as a brother; he served me as a servant; and he served me as a slave." Speaking the German as well as the English language, Boehm often preached to the German colonists in various parts of America. He traveled about 40,000 miles with Bishop Asbury, and during his entire itinerary he traveled on horseback over 100,000 miles. He was one of Bishop Asbury's executors. He also made tours with Bishops Genge and McKendree. Mr. Boehm was seventy-four years in the ministry, and at the time of his death was the oldest Methodist preacher in America. A special service was held June 8, 1875, in celebration of his hundredth birthday. In 1865 he published a volume of "Reminiscences," a new edition of which was published in 1875, with additional chapters and notes by Rev. Dr. J. B. Wakeley and others, with a preface by Mr. Boehm himself, dated July, 1875. This autobiography shows that he was a personal acquaintance of all the leading American Methodists of the first half of the present century.

Dec. 28.—SHELDON, GAYLOR, formerly a well-known merchant of Albany, N. Y.; died in New York City, at the age of 77 years. He was a native of Montgomery County, N. Y., and was long distinguished for his integrity, piety, enterprise, benevolence, and public spirit.

OBITUARIES, FOREIGN. ADALBERT, WILLIAM GEORGE LOUIS, Prince of Bavaria, born July 19, 1828; died September 21, 1875. He was a son of King Louis I., and an uncle of the present King. On August 25, 1856, he was married to Princess Amelia of Spain, daughter of the late Infante Francis de Paula, cousin of ex-Queen Isabella, and sister of the Infante Francis de Assisi (the husband of ex-Queen Isabella), by whom he had two sons and three daughters. He was a lieutenant-general in the German Army.*

AGUIAR, LUIZ H. FERREIRA, Consul-General of Brazil in New York City; died August 6th, aged 62 years. He was born in Rio Janeiro, October 8, 1812. His father was the court-physician of Dom Pedro I. of Brazil. When very young he was appointed an *attaché* to the Brazilian legation at Washington, under Dom Calvacanti de Albuquerque, and was transferred to New York, as consul-general on the 1st day of February, 1843. In the years 1851, 1852, 1853, and 1854, he was absent from that city on special mission to Uruguay, visiting Europe in the last-mentioned year, after which he returned to his post. In 1843 he married Emeline, daughter of James Wilkie, who died some years subsequently, leaving two sons. During the late war Mr. Aguiar, through his

* See the Genealogy of the House of Bourbon, in *ARTIST CYCLOPEDIA* for 1874, p. 804.

personal acquaintance with Secretary Seward, was the means of preventing an unpleasantness between the Brazilian Government and the United States with reference to an occurrence which took place in the Brazilian harbor of Pará. On the occasion of the visit to this city, four years ago, of the Duke of Saxe, admiral in the Brazilian Navy and son-in-law of Dom Pedro, actual Emperor of Brazil, Mr. Aguiar received special attentions from him. Mr. Aguiar was Commander of the Order of the Rose and Chevalier of Christ of the Royal Order of Brazil, also Knight of the Order of Conception of Portugal and honorary member of many societies.

ARROWSON, General Sir JOHN G. C. B., an English officer; died May 12, 1875.

ALDBOROUGH, BENJAMIN O'NEALE SRATFORD, sixth Earl of, born June 10, 1808; died December 19, 1875. The title became extinct with his death.

ALDRIDGE, J. W., an English naval officer, born in 1795; died March 26, 1875. At ten years of age he entered the navy as a midshipman, and served as such on the *Arethusa* in 1806, at the capture of the Spanish frigate *Pomona*, and at the capture of *Curaçoa* in 1807. He served throughout the war with Napoleon, was appointed a lieutenant in 1815, commander in 1833, captain in 1841, rear-admiral in 1852, and was retired as vice-admiral in 1867.

ALEXANDRA, AMELIA, Princess of Bavaria, born August 26, 1826; died May 8, 1875. She was a daughter of King Louis I., and an aunt of the present King, and was known as the authoress of several juvenile books. She had been quite well up to the day of her death, and was entering her reception-room to give an audience to some persons when she fell down dead, struck by apoplexy.

AMELIA, MARY FREDERICA, ex-Queen of Greece, born December 21, 1818; died May 20, 1875. She was the daughter of the Grand-duke Augustus of Oldenburg, was married to King Otto of Greece in 1836, and left Greece with her husband in 1862, since which time she lived at Bamberg in Bavaria. She has been a widow since 1867.

ARENBERG-MEPPEN, ENGELBERT AUGUST ANTON, Duke of, hereditary member of the Prussian *Herrenhaus*, born May 11, 1824; died March 28, 1875. He was succeeded by his son Engelbert Prosper Ernst Maria Joseph, born August 10, 1872. The residence of the ducal family is at Brussels.

ARLET, ALEXANDER, a German musician; died March 1, 1875. He had for a time a position in the court-opera of Vienna, but left it to devote himself entirely to vocal music as an instructor, in which he was very successful. Among his pupils were the Archduke Ludwig Victor and Herr Dumba, and the ladies Ander, Tietjens, and Bürde-Ney.

ARNIM-HEINRICHSDORF, HEINRICH LEONHARD VON, a member of the German *Reichstag*, born September 29, 1801; died November 18, 1875.

In the Prussian House of Deputies, where he had been since 1849, he was one of the most prominent leaders of the Conservative party. He did not belong to the same branch of the Arnim family as Count Harry von Arnim (see ARNIM, COUNT HARRY VON).

ARREST, HEINRICH LUDWIG D', a German astronomer, born in Berlin, August 13, 1822; died in Copenhagen, June 14, 1875. He studied astronomy with Encke, was appointed second assistant in the observatory in Berlin, and extraordinary professor in Leipzig in 1848. In 1857 he went as ordinary Professor of Astronomy to Copenhagen, where in 1860 and 1861 the new observatory of the university was built under his direction. Among his principal discoveries was that of four comets. He wrote "*Resultate aus Beobachtungen der Nebelflecken und Sternhaufen*" (1850), "*Ueber das System der kleinen Planeten*" (1851), and "*De Instrumento magno æquatorio Havnias erecto*" (1861).

ATHENS, MAID OF (see BUAN).

AUDIFREDI, ———, an Italian Senator; died April 4, 1875. The Duke d'Audiffret-Pasquier is descended from a French branch of the same family.

BAINES, THOMAS, a British painter and explorer; died May 8, 1875. He took part in Gregory's Expedition in Northern Australia from 1855 to 1856, accompanied Livingstone on his two expeditions to the Zambesi in 1858 to 1861, and also Mr. Chapman on his journey from the Bay of Whales to Lake Ngami and the Victoria Falls in 1861-'62, of which he published an account under the title of "*Explorations in South Africa*" (1864). In 1869 he visited the Tali gold-fields, and subsequently made several journeys through the Transvaal Republic and the neighboring countries, on the last of which he had just set out when he died. He published, together with W. B. Lord, the book "*Shifts and Expedients of Camp-Life*" (1871). He also wrote numerous contributions to the *Journal of the Royal Geographical Society*, and furnished the illustrations to Livingstone's *Zambesi Expeditions*.

BARILLI, LORENZO, an Italian cardinal, born December 1, 1801; died March 9, 1875.

BARLOW, General MAURICE, an English officer, born in 1795; died in April, 1875. He commanded a brigade in the Crimea.

BARTAL, GEORGE, a Hungarian statesman, born in 1820; died October 25, 1875. He was a member of the Hungarian Diet, and had been Minister of Commerce in the cabinet Bitto.

BAUERNSCHMID, KARL EDUARD, an Austrian journalist, born in 1801; died May 6, 1875. He had been a Democratic member of the Frankfort Parliament, and was one of the oldest journalists of Vienna.

BAXTER, DUDLEY, an English statistician; died May 17, 1875, in London.

BAYER, AUGUST VON, a German painter, was born 1803; died February 2, 1875. Among his best works is "*The Strasburg Cathedral*," in

the gallery of Carlsruhe. A large number of his paintings are also in the new Pinakothek in Munich. He was for a number of years previous to his death court-painter at Carlsruhe, Baden, and conservator of the collection of antiquities of the Grand-duke.

BROCK, JOHANN HEINRICH, a German painter, born in 1789; died March 6, 1875. In 1817 Duke Leopold Frederick of Anhalt appointed him court-painter, and in that position he gained a great reputation as portrait painter.

BELOW-LUGOWEN, RICHARD VON, a member of the Prussian Herrenhaus; died November 6, 1875.

BENNETT, SIR WILLIAM STERNDAL, a celebrated English composer and pianist, was born in Sheffield, April 13, 1816, and died in London, February 1, 1875. In his eighth year he entered King's College, Cambridge, as chorister, and two years later commenced his musical studies at the Royal Academy of Music. He first chose the violin as his specialty, but soon left it for the piano. He studied under Dr. Crotch, Cipriani Potter, Moscheles, and afterward in Leipzig under Mendelssohn, to whom he soon became warmly attached. In Germany he also became very intimate with Schumann. During the years 1836-'38 some of his compositions were produced in Leipzig under the personal direction of Mendelssohn, and were received with great favor. In 1856 he was appointed Professor of Music at the University of Cambridge. In 1870 he received the degree of D. C. L. from the University of Oxford, and in 1871 he was raised to the knighthood. His principal works are the operas "The Wood-Nymphs" and "Parisina"; the cantatas "The May Queen" and "The Woman of Samaria;" and several concertos for piano and orchestra. He has also written a treatise on harmony, and one entitled "Classical Practice for Pianoforte Students." Schumann wrote of him that "he was a born artist, the like of which even Germany had few to boast of."

BEVILACQUA, CARLOS, an Italian senator; died in September, 1875. He was Vice-President of the Upper Italian Railroad Company.

BIGGOLD, SIR SAMUEL, born in 1791; died January 2, 1875. He was Mayor of Norwich in 1854, and member of Parliament from 1854 to 1857.

BIZET, GEORGES, a French composer, born in 1840; died June 3, 1875. He was a pupil of Halévy, whose daughter he married. His first works were "The Pearl-Fishers" and the "Beautiful Maid of Perth," which, however, did not meet with a favorable reception. His last work, "Carmen," which was performed for the first time a few weeks before his death, was a decided success, and brought him the cross of the Legion of Honor.

BLASIUS, ERNST, a German physician, born November 30, 1802; died July 11, 1875. In 1829 he was appointed tutor, in 1830 extraordinary and in 1834 ordinary Professor of

Medicine in the University of Halle, and soon after received the position of Director of the Medioo-Surgical Clinic, in which position he remained until 1867. Among his principal works are "Handbuch der Akiurgie" (3 vols. 1830-'32), "Akiurgische Abbildungen" (1831-'33), "Handbuch der gesammten Chirurgie und Augenheilkunde" (4 vols., 1836-'38), "Beiträge zur praktischen Chirurgie" (1843), and "Neue Beiträge" (1857).

BLUHME, GEORG RICHARD, a German statesman, born August 14, 1830; died December 4, 1875. He has been Director of the Royal Coal Mines at Saarbrücken, a member of the Prussian Reichstag, and at the time of his death was a member of the German Reichstag.

BLUMER, DR. J. J., a Swiss statesman; died November 12, 1875. He was one of the leaders of the Liberal party, and on October 22, 1874, was elected President of the Federal Court.

BØRØK, KARL WILHELM, a Norwegian physician, born in 1808; died December 10, 1875. His influence on the development of certain branches of medical science was so great that the peculiar theories which have sprung from his works and doctrines are generally spoken of as the Norwegian school. He was professor in Christiania.

BORN, LUDWIG, a German politician, born January 13, 1813; died April 15, 1875. He was a prominent leader of the Liberal party in the former Duchy of Nassau, a member of the constituent Reichstag of the North German Confederation in 1867, and at the time of his death was a member of the Prussian House of Deputies.

BOTH, KARL FRIEDRICH VON, a German scholar, born February 11, 1799; died May 4, 1875. Having served the state in various positions, he was appointed in 1836 Vice-Chancellor of the University of Rostock, which position he held for twenty-two years. During his term of office he did much to promote the interests of the university, and when in 1870 he celebrated the fiftieth anniversary of his connection with it, he was created "doctor philosophiæ honoris causa," and was presented with the "golden medal of merit" for science and art. His principal work is his "Gesetzesammlung der Mecklenburg-Schwerinschen Lande."

BRANDE, AUGUST, a member of the German Reichstag, for the province of Hanover, born December 20, 1820; died December 23, 1875. He studied medicine in the Universities of Göttingen and Heidelberg, and, having retired from the practice of medicine in 1852, he founded a brewery, which he managed until 1871. He was also a member of the Prussian House of Deputies, and belonged to the National Liberal party.

BRAUN, SIMON, a German painter, born December 24, 1833; died August 21, 1875. He excelled in historical paintings and had gained some celebrity as a lithographer.

BROOKE, Major-General J. C., a British officer; died in the latter part of April, 1875. He took a distinguished part in the siege of Delhi.

BRUNI, THEODORE, a Russian painter, born in 1801; died in St. Petersburg, September 11, 1875. He was Professor Emeritus in the Academy of Fine Arts in St. Petersburg.

BUAN, Mrs. THERESA, Byron's "Maid of Athens;" died in October, 1875. Her father was the Consul Theodoros Makai.

BUCHANAN, ROBERT, D. D., a Scotch theologian; died in Rome, March 30, 1875. He was one of the most prominent clergymen of the Free Church of Scotland, and was the last surviving leader of those who took part in the great schism of 1843.

BUFALINI, M., an Italian scholar; died April 1, 1875. He was Professor of Medicine in Florence, and a senator of Italy.

BULKELEY, Sir RICHARD WILLIAMS, born September 23, 1801; died August 29, 1875. He was a member of Parliament for several constituencies, and Lord-Lieutenant of Carnarvonshire from 1851 to 1856.

BURKE, Sir THOMAS JOHN, M. P., born June 7, 1813; died December 10, 1875. He was a member of Parliament for Galway County, from 1847 to 1865.

BURNETT, FANNY, an English translator and authoress, born in 1843; died February 19, 1875. During a protracted stay in Germany, she became well acquainted with the language and literature of that country. Her principal work is the translation of the "Shakespearean Commentaries" by Gervinus. Among her other translations are Lübke's "History of Art," Grimm's "Michael Angelo," Woltmann's "Holbein," Wolzogen's "Raphael," Vambéry's "Central Asia," Zeller's "Life of D. F. Strauss," Fouqué's "Sintram," and Reumont's "Lorenzo il Magnifico." She also wrote several stories for the young, of which "Paul the Ivory-Carver" was finished just before her death.

CABBOLD, JOHN PATTESON, a member of Parliament, born in 1830; died December 10, 1875. He was elected an M. P. for Ipswich in 1874, and retained that position up to the time of his death.

CAIENES, Professor, one of the ablest writers in England on social and political questions, born at Drogheda, Ireland, in 1828; died July 8, 1875.

CAPALTI, ANNIBALE, an Italian prelate, born January 21, 1811; died April 16, 1875. In 1868 he was created a cardinal-deacon.

CARION, ANTOINE JULES, a French radical, born November 24, 1815; died in the latter part of June, 1875. He held various offices under the Republic of 1848; was banished after the *coup d'état* in 1851, and was elected to the Assembly in 1871 from the Department of Côte d'Or. He was a member of the Extreme Left, and voted against the preliminaries of peace.

CAENWATH, ARTHUR ALEXANDER DALZELL, Earl of, a British peer, born September 15,

1799; died April 28, 1875. He was a general in the army.

CARPEAUX, JEAN BAPTISTE, a French sculptor, born May 24, 1827; died October 12, 1875. He studied in the École des Beaux Arts under Rude, Duret, and Abel de Pujol. In 1859 he presented to the public his first large work, "The Young Fisherman," which was followed in 1863 by the beautiful group of "Ugolino and his Sons." When the front of the new opera-house was to be decorated by four allegorical groups, Carpeaux was to furnish that representing the dance. Although accepted by the government, it was still objected to by many persons as obscene, and was defaced by some unknown persons.

CASTILHO, ANTONIO FELICIANO, Viscount, a Portuguese poet, born June 26, 1800; died in July, 1875. In accordance with his father's wish, he studied law, but never practised. When a student he wrote "Cartas de Echo e Narciso" (1821), a poem which in a very short time went through four editions. He published "A Primavera, Collecção de Poemas," in 1822, and "O Otono, Collecção de Poesias," in 1865. He also published translations of Ovid and Goethe. He was a member of the Royal Council.

CAVOUR, AINARDO, Marchese DI, an Italian nobleman, born in 1833; died August 30, 1875. He was the son of Marchese Gustavo di Cavour and Adelaide Lascaris di Ventimiglia, the last descendant of a family which gave several Emperors to the Eastern Empire. His father was a brother of the celebrated statesman, Count Camillo di Cavour. With the death of Marchese Ainaro the celebrated name of Cavour becomes extinct.

CHABOT, VICOMTE DE, a French statesman, born in 1780; died in July, 1875. He had been a peer of France, and adjutant to Louis Philippe. He was the father of Count de Jarnac, French ambassador in London, who died a few months before.

CHAMPNEYS, WILLIAM WELDON, an English clergyman, born in 1807; died February 4, 1875. He was one of the earliest advocates of ragged schools, refuges, etc., and was the originator of a local association for the "Promotion of Cleanliness, Health, and Comfort of the Industrial Classes," and of the "Church of England Young Men's Society." In 1851 he was appointed to a canonry in St. Paul's, and at his death was Vicar of St. Pancras.

CHARLES, THEODORE, Prince of Bavaria, born July 7, 1795; died August 16, 1875. He was a son of Maximilian Joseph, King of Bavaria, and of Wilhelmina Augusta, daughter of George, Prince of Hesse-Darmstadt, and was a grand-uncle of the present King. He was Inspector-General of the Bavarian Army, in which he held the rank of field-marshal. He was also a general in the Prussian army and held positions of honorary rank in the military service of Austria and Russia.

CHARVILLE, ALFRED BURY, Earl of, an Eng-

lish peer, born February 19, 1829; died June 27, 1875. The title becomes extinct with his death.

CHEAPE, Sir J., an English general, born in 1792; died April 2, 1875. He entered the army in 1809, and served mostly in India. He distinguished himself chiefly in the wars with Burmah in 1824-'26 and 1852-'53, and in the campaign in the Punjab, 1848-'49. He was a Commander of the Order of Bath, and was made a general in 1866.

CHRUŠTCHOV, A. P., a Russian officer, born in 1806; died July 26, 1875. He commanded a division at Sevastopol, took part in suppressing the Polish insurrections, was appointed Governor-General of Western Siberia and Hetman of the Siberian Cossacks in 1866. In 1874 he was forced to resign on account of ill-health. In 1875 he was created an imperial councillor.

CLAASON, OCTAVIUS, a German philologist, born in 1844; died March 18, 1875. He studied in Bonn, then traveled extensively, and, having taken part in the French war, became a lecturer at the University of Rostock in 1871, and Professor of History in 1874. He wrote "Kritische Erörterungen über den römischen Staat" (1871), "De Taciti Annalium sætate Questiones geographicæ ad Mare Rubrum et Ægyptum Maxime pertinentes interpretatus est O. Claason" (1870).

COCHET, JEAN BENOÎT DÉSIRÉ, a French abbot and antiquarian, born March 7, 1812; died in June, 1875. Besides some works on the churches of the arrondissements of Havre (1844-'46), of Dieppe (2 vols., 1846-'50), and of Yvetot (2 vols., 1862), he wrote the following works: "Le Tombeau de Chilpéric, Premier Roi des Francs" (1850), "Sépultures Gauloises, Romaines, Françaises, et Normandes" (1857), and "Archéologie Chrétienne" (1867).

COROT, JEAN BAPTISTE CAMILLE, a French artist, born in 1796; died February 23, 1875. He was one of the first French historical painters of the day, and his death was sincerely regretted, not only by all lovers of the arts, but by a large circle of friends. His first work was exhibited in 1827. In grandeur, his "Christ on the Mount of Olives," "Hagar in the Desert," and "Dante," are fully equal to any of Delacroix's pictures, and these he has left to the Louvre. Others of his chief productions are "Ariadne," "Saint Sebastian," "The Burning of Sodom," and "Macbeth," all splendid examples of color and grouping. About six months before his death the artists of Paris united to present "Le Père Corot," as they liked to call him, with a large gold medal specially struck for the occasion. He was buried on February 26th at Père Lachaise. Upward of 6,000 people and fifty carriages formed the funeral procession, and the Abbé Duclos, in the funeral sermon, condemned the newspapers for ignoring the fact that the deceased died a good Catholic.

COWPER, Sir CHARLES, an Australian states-

man, born in 1808; died in London, October 19, 1875. He had been Prime-Minister of New South Wales five times, and at the time of his death was the London general agent of the same colony.

CURRIE, Sir FREDERICK, Bart., was born 1799, and died September 10, 1875. He entered the Bengal service in 1817, and, having held several inferior offices, he became successively a secretary to the Government of India and a member of the Supreme Council. During the first Sikh War in 1847, he greatly distinguished himself by his energy and his administrative capacity. He was raised to a baronetcy soon after the battles of the Sutlej, and returning to England he was appointed in 1854 a director of the East India Company, and in 1858 Vice-President of the Indian Council.

DECHAMPS, ADOLPHE, a Belgian statesman, born June 17, 1807; died July 19, 1875. In 1834 he was elected to the Chamber of Deputies, and soon became a prominent member. In 1842 he was appointed Governor of Luxembourg, and a year later Minister of Public Works. He principally distinguished himself by his efforts to promote the railroad system of his native country. From 1845 to 1847 he was Minister of Foreign Affairs, and then remained in the Chamber of Deputies until 1857. In 1859 he was again elected a deputy, and remained in the Chamber until 1864. During the years 1837-'51 he published, together with Dedecker, the *Revue de Bruxelles*, an ultra-Catholic paper.

DEINLEIN, MICHAEL VON, a German Archbishop, born October 26, 1800; died January 4, 1875. He was ordained a priest in 1824, was created a coadjutor to the Bishop of Bamberg in 1853; Bishop of Augsburg in 1856; and Archbishop of Bamberg in 1858. He was noted for his devotion to historical studies.

DEJAZET, VIRGINIE, a Parisian actress, born in 1797; died December 1, 1875. She was the most popular actress of the Vaudeville and Variété-Theatres, where she filled the houses to their utmost. Numerous trips across the Continent made her well known outside of France. Her principal parts were in the plays "Bonaparte in Brienne," "Vert Vert," "Frétillon," "Monsieur Garat," "Les Prés Saint-Gervais." All the prominent actors and actresses attended her funeral, and the procession which followed her to her grave was estimated to contain about 20,000 persons.

DE VESOL, THOMAS VESKY, Viscount, born September 21, 1803; died December 23, 1875. He was elected a representative peer of Ireland in 1857, and was Member of Parliament for Queen's County, 1835-'37, and 1841-'52.

DORCHESTER, GUY TABLETON, Baron, a British peer, born October 25, 1811; died December 2, 1875.

DUQUING, FRANÇOIS, a French politician, died October 8, 1875. In 1871 he was elected a member of the National Assembly from the

Hautes-Pyrénées. He was one of the most active members of the Left.

DUNCKER, LUDWIG, a German theologian, born August 17, 1810; died November 7, 1875. He was Professor of Theology in Göttingen, and was well known as a writer on theological subjects.

DYMOKE, HENRY LIONEL, born 1834; died December 31, 1875. He was "Champion of the Queen," a title which is hereditary in the family.

EICHMANN, FRIEDRICH VON, a German diplomatist; died October 27, 1875. Since 1862, he had been successively ambassador to Rio de Janeiro, Dresden, Constantinople, and Stockholm, which latter position he had held up to the time of his death since August 12, 1874. He was a member of the Prussian Herrenhaus.

ESMARCK, H. K., one of the leaders of the German party in Schleswig-Holstein, born in 1792; died February 2, 1875. He entered the Danish civil service in 1818, was appointed a member of the Supreme Court of Schleswig in 1830, was deprived of this office in 1848, in consequence of his participation in the revolutionary movement of that year, and was even excluded from the general amnesty in 1852. He then went to Prussia, where he was appointed a counselor at the Court of Appeals in Greifswalde, and afterward in Frankfort-on-the-Oder.

ESSAD PASHA, a Turkish statesman, born in 1829; died November 28, 1875. He had held various offices, as Minister of War and of the Navy, and had been Grand-Vizier twice, the first time from August, 1872, to February, 1873, and the second time from April to August, 1875. He was soon after appointed Governor of Syria, which position he held at the time of his death. He was noted for his hatred of the Christians.

EGGEN, Duke of Württemberg, born December 25, 1820; died January 8, 1875. He was a second cousin of the King of Württemberg, an hereditary member of the Prussian Herrenhaus, and a Prussian cavalry general.

EULENBURG, Count WEND BOTHO zu, a German nobleman, was born May 19, 1845; died December 5, 1875. At the time of his death he was engaged to be married to the Countess Marie von Bismarck, the chancellor's daughter.

FAY, JOSEPH, a celebrated German painter, born in 1818; died July 27, 1875. In 1833 he entered the Düsseldorf Academy. His first large work was "Samson and Delila," in the exhibition of 1839. The "Cleopatra," which followed in 1841, was an improvement on the former in the coloring. In 1840 a prize was offered for the painting *al fresco* of the large hall of the new City Hall of Elberfeld, and Fay won it. He then went to Paris, where he painted "The last Scene of Goethe's Faust," and "The Balcony Scene from Romeo and Juliet." Having returned to Düsseldorf he painted scenes from Italian country life. He was one of the founders of the "Malkasten," the artist

society of Düsseldorf, and one of the most famous of Germany.

FRILDEN, HENRY MASTER, M. P., born 1818; died September 5, 1875. He was a member of Parliament for Blackburn since 1868.

FINDLAY, A. E., an English geographer, born January 6, 1812; died May 8, 1875. He was author of several nautical handbooks and charts, among these "Directory for the Coasts and Islands of the Pacific Ocean" (1851).

FITZWALTER, BROOK WILLIAM BRIDGES, Baron, a British peer, born June 2, 1801; died December 7, 1875. He was a member of Parliament for East Kent in 1852, and from 1857 to 1868. The barony became extinct upon his death.

FORDYCE, WILLIAM DINGWALL, M. P., born in 1836; died December 3, 1875. He was a member of Parliament for Aberdeenshire, since 1866.

FORWEEK, LUDWIG, a German prelate, born 1817; died January 9, 1875. He was ordained as a priest in 1839, and in 1854 was appointed Vicar Apostolic of the kingdom of Saxony, with the title Bishop of Leontopolis *in part infid.*

FOUCHER, PAUL, a French author, born April 21, 1810; died January 24, 1875. In his youth he wrote a few novels. But during the period from 1834 to 1874 he wrote about seventy dramas, partly alone and partly in conjunction with others. Among his best-known dramas are: "Caravage" (1834), "Les Chevaux du Carrousel" (1840), "Le Comte de Mansfeld" (1841), "Les Deux Perles" (1844), "Red-gauntlet" (1844), and "Maurice de Saxe" (1859). He was a brother-in-law of Victor Hugo.

FOULD, BENOIT, a Parisian banker, born in 1792; died January 9, 1875. In partnership with his younger brother, the late Achille Fould, he conducted a Paris bank, trading under the firm of Fould, Oppenheim & Co. His brother withdrew from the firm upon entering public life in 1842, leaving him in control of the establishment, which he managed with great success.

FREDERICK, CHARLES, an English vice-admiral; died December 23, 1875.

FURLONG, Dr., an Irish prelate, born in 1803; died November 12, 1875. He was Catholic Bishop of Ferns at the time of his death.

GARCIA Y TESSARA, GABRIEL, a Spanish poet, born June 16, 1817; died February 14, 1875. He was contributor for various journals, and in his war-articles showed considerable political foresight. His poem "Un Diablo más," although not finished, is considered one of his finest productions. He was for a time Minister-Resident of Spain in the United States.

GENBERG, PAUL, a Swedish prelate, born in 1811; died September 30, 1875. He was Lutheran Bishop of Calmar, and had been Minister of Education of Sweden.

GINOULHIAC, a French prelate, born in 1806; died November 17, 1875. He was considered one of the most prominent French theologians

and philosophers. In 1870 he was appointed Archbishop of Lyons and Vienne.

GLADSTONE, ROBERTSON, a brother of the Rt. Hon. Wm. H. Gladstone, the ex-prime-minister; died at Liverpool, in September, 1875. He was Mayor of Liverpool in 1842, and was one of the leaders of the Liberal party in that city.

GOTTLEB, JOHANN, an Austrian chemist; died March 4, 1875. In 1846 he became a professor of the Polytechnic High-School in Graz, of which institution he afterward was rector. He chiefly distinguished himself by his researches on sebaceous acids. His principal work is "Lehrbuch der reinen und technischen Chemie."

GÖTZ, LOUIS FRANZ, a German scholar, born in 1811; died September 8, 1875. He studied theology and philosophy in Leipsic. In 1835 he was appointed a teacher in the Kreuzschule in Leipsic, and in 1868 was nominated Conrector. He wrote "Ueber das Gymnasium als Vorschule zur öffentlichen Beredsamkeit" (1844), "Ueber den aristotelischen Gottesbegriff mit Beziehung auf die christliche Gottesidee" (1870).

GRABBE, Count P., a Russian general, died July 27, 1875. He entered the army in 1805, and took part in the campaigns of 1805-1807, in the war of 1812, and in 1814 went with the army to France. In the Turkish campaign he was chief of the staff, and distinguished himself in the Polish campaign, particularly in the storming of Warsaw. After the suppression of the Polish rebellion he received the command of the second division of dragoons and the rank of lieutenant-general. At the outbreak of the Crimean War, he had command of the military stationed in Esthonia. In 1862 he was appointed Hetman of the Cossack Army of the Don, and in 1866 was created a count. Having resigned his position as hetman, he was created an imperial councillor.

GRAY, Sir JOHN, Knt., a member of Parliament, born in 1815; died April 10, 1875. He was member of Parliament for Kilkenny since 1865. The honor of knighthood was conferred upon him in 1863 by the Earl of Carlisle, then Lord-Lieutenant of Ireland, on the occasion of diverting the waters of the river Vartry from their old bed into the artificial cut intended to convey them to Dublin for the supply of the city and suburbs, and was announced to have been bestowed "in special recognition of the indefatigable zeal and high ability evinced by him throughout the whole progress" of the undertaking, as Chairman of the Municipal Water-Works Committee.

GRAY, JOHN EDWARD, a British naturalist, born in 1800; died March 7, 1875. In 1821 he published, in his father's name, the "Natural Arrangement of British Plants," the first work in the English language on the natural method. In addition to his labors as a naturalist he has taken an active part in questions relating to sanitary and metropolitan improve-

ments, public education, and prison discipline. In 1851 he was appointed acting chairman of one of the juries of the Great Exhibition, and in 1862 was a juror of the educational section in the Exhibition. He was a Fellow of the Royal, the Linnæan, the Geographical, and various other societies. He wrote "Illustrations of Indian Zoology," "The Knowsley Menagerie," and "A Manual of British Land and Fresh-water Shells."

GRIEBEL, Dr. THEODOR, a German politician, died February 15, 1875. He was one of the leaders of the *Landespartei* in Schleswig, whose object it was to separate the two duchies from Prussia, and form an independent state, if possible, under Duke Frederic.

GRUBER, JOHANNES VON, a German scholar, born April 23, 1807; died January 14, 1875. He studied philology in Greifswalde and Berlin. Since 1834 he was professor in the gymnasium in Stralsund. He published a Latin grammar, and Cicero's "De Officiis."

HALLER VON HALLERKNEß, Count FRANCIS, a Hungarian officer, born in Transylvania, March 24, 1796; died March 6, 1875. He served in the wars with Napoleon, was made major-general and Banus of Croatia in 1841, took part in the Italian War of 1848-49, when he was made lieutenant-general and commandant of Peschiera. In 1856 he was for a short time Acting-Governor of Hungary, during the absence of Archduke Albert; and in 1861 he was created a life-member of the Herrenhaus. At his death he was captain-general of the Hungarian body-guard.

HÄRTTEL, Dr. HERMANN, a German publisher; died August 7, 1875. He was a member of the well-known publishing-house of Breitkopf & Härttel, of Leipsic.

HEADLAM, THOMAS EMERSON, born in 1813; died December 8, 1875. He was Judge Advocate-General from 1859 to 1866, and a member of Parliament for Newcastle-on-Tyne from 1847 to 1874. He wrote a "Treatise on the Practice of the Court of Chancery."

HEARD, JACOB, an English educator, born in 1799; died September 28, 1875. He went to Russia, where he introduced the Lancaster schools. He wrote a large number of Russian school-books, and several very popular novels.

HEINTZ, FRIEDRICH LEOPOLD VON, a German general, born in 1792; died February 15, 1875. He commanded the Saxon troops in the war against Denmark in 1849, and eventually became lieutenant-general.

HERDER, Frau VON, the daughter-in-law of the famous German writer J. G. von Herder, born in 1790; died February 26, 1875. She was the wife of the poet's youngest son, E. von Herder, who died in 1855. The old lady possessed, up to her death, a perfectly clear mind, and took great pleasure in reading the most recent productions of German poetry.

HERVEY, Lord AUGUSTUS HENRY CHARLES M. P., born in 1837; died May 23, 1875. He was the second son of the second Marquis of

Bristol, and heir-presumptive to the title. At the time of his death he was a member of Parliament for West Suffolk.

HILL, Viscount ROWLAND, a peer of Great Britain, born in 1800; died January 2, 1875. He was a member of Parliament for North Shropshire, 1821 to 1842, and at the time of his death was Lord-Lieutenant of Shropshire.

HOFSTÄTTER, HEINRICH VON, a German prelate, born in 1805; died May 12, 1875. He was ordained as priest in 1833, and in 1840 was appointed Bishop of Passau. He was noted for many eccentricities, and, while zealously devoted to the doctrines of his Church, inculcated, at the same time, very earnestly loyalty to the state government and state laws. He severely censured many political movements of the Catholic party, and was, on the other hand, most fiercely denounced by many ultra-Catholic papers.

HOLLOWAY, General Sir THOMAS, a British officer, born in 1810; died July 21, 1875. He served at the siege and capture of Sevastopol, in the expedition against Kertch in 1855, and was Senior Allied Commissioner at Canton, 1858 to 1859.

HORN, EDWARD, a Hungarian statesman; died November 2, 1875. He was Secretary of State in the Ministry of Commerce of Hungary, and a member of the Reichstag of the Austro-Hungarian monarchy.

HUISSE, HIPPOLYTE DE LA FAILLE, Baron D', a Belgian politician, born in 1800; died in Ghent, on February 28, 1875. He had been at one time member of the Second Chamber, and afterward a senator of Belgium.

HUNTINGDON, FRANCIS THEOPHILUS HENRY HASTINGS, thirteenth Earl of, a British peer, born November 28, 1808; died September 18, 1875.

ISCHITELLA, FRANCESCO PINTO, Prince of, a Neapolitan general, died April 2, 1875. He was Minister of Finance under Ferdinand II. of Naples.

JARNAQ, PHILIPPE DE ROHAN-CHABOT, Comte de, a French diplomatist, born in 1815; died March 22, 1875. He was the son of Vicomte de Chabot, a French *émigré* nobleman, who served as a major-general in the British Army, and his mother was Lady Isabella Fitzgerald, sister of the Duke of Leinster. At the outbreak of the Revolution of 1848, the Comte de Jarnac was chief secretary of the French embassy in London, but he retired from all diplomatic work throughout the Republic and the Second Empire. He then settled down upon his Irish estates in Kilkenny. On the collapse of the Second Empire he again directed his attention to politics, returning to France after a residence of about twenty years in Ireland; and he was appointed ambassador at the Court of St. James in 1874, by President MacMahon, in succession to the Duc de la Rochefoucauld-Bisaccia. In 1844 he married his cousin, the Hon. Geraldine Foley.

JOLOVICZ, Dr. H., a German Orientalist; died

in February, 1875. His principal works are "Blüthenkranz morgenländischer Dichtungen" (1860), and "Geschichte der Juden in Königsberg" (1867).

JUSTH, JOSEPH, a member of the Hungarian Diet, born in 1808; died December 6, 1875. He was President of the Deak Club in the Diet of 1874.

JUVARA, TOMMASO ALOYSIO, an Italian artist, born January 13, 1809; died by his own hand May 30, 1875. His principal works are a drawing of Christ, after the painting by Alibrandi, an engraving on copper of the Madonna della Regia di Napoli, by Raphael, and an engraving showing a wonder performed by St. Borromeus, after a composition by Giuseppe Mancinelli. He is considered one of the best engravers on copper of modern times.

KELLETT, Sir HENRY, a British naval officer, born in 1807; died March 1, 1875. He entered the navy at 14 years of age, took part in the coast-survey of America from 1835-'40, under Beechey and Belcher, continued this work in 1845 in the *Herald* up to 1848, when he was ordered to the Behring Straits to take part in the researches for Sir John Franklin's Expedition. In 1849 he discovered Herald Island (Wrangell Land), and returned to England in 1851. In 1852 he took part in the Arctic Expedition of Belcher as commander of the *Resolute*, and picked up McClure, with the crew of the *Investigator*. In 1854 he was appointed commodore, in 1864 Admiral-Superintendent of Malta, and in 1869 commander of the naval station in China.

KRON, M. G., an English author, died in July, 1875. He was Colonial Secretary in the Bermudas at the time of his death. In 1846 he published a history of the Society of Jesus, by whom he had been educated. He was an active contributor to various journals, particularly the *Morning Post*, and while in Calcutta edited the *Bengal Hurkaru*. His last work was the novel "Dion and the Sybils," published in 1866.

KOERLE, B., a German painter, born October 21, 1823; died April 23, 1875. In his fifteenth year he turned his attention to art, visiting a drawing-school, and afterward the Art Academy of Munich. His finest works are those describing the times of Louis XV.

KRAJNER, EMERICH VON, a Hungarian jurist, born in 1790; died October 5, 1875. He was one of the most learned lawyers of Hungary, and paid particular attention to the constitutional history of that country. His largest work is entitled "On the Original Constitution of Hungary from the Foundation of the Kingdom to 1832" (1872), which was very favorably received.

KREMER, JOSEPH, a German philosopher, born in 1808; died June 2, 1875. He was Professor of Philosophy in Cracow, and was the author of "System der Philosophie," and "Reise nach Italien."

LABROUSTE, PIERRE FRANÇOIS HENRI, a French

architect, born March 11, 1801; died June 27, 1875. He was an artist of considerable reputation. Among his works are the Library Saint-Geneviève, and the Imperial Library. He was made Grand Officer of the Legion of Honor in 1852, and was elected a member of the Academy of Fine Arts in 1867.

LAFITTE, CHARLES, a French banker, born in 1802; died December 27, 1875. He was the son of the celebrated financier of the same name.

LAINÉ, PIERRE JEAN HONORAT, Vicomte, a French naval officer, born December 4, 1796; died December 24, 1875. He was educated at the naval school at Brest, served with distinction in Spain, was appointed rear-admiral in 1840, naval commander of Algeria in 1841, and vice-admiral in 1847. In 1849 he was elected to the Legislative Assembly, and in the same year was decorated with the Grand Cross of the Legion of Honor.

LANDSTEINER, LEOPOLD, a German journalist; died February 22, 1875. He was for some time in Paris as contributor to the *Journal des Débats*, and afterward as editor of the *National*, at that time the principal organ of the opposition. In 1848 he returned to Vienna, and became one of the editors of the *Allgemeine Oesterreichische Zeitung*. In the following year he became editor-in-chief of the official journal of the Minister-President Prince Felix Schwarzenberg, and a few years after founded the *Morgenpost*, a very popular journal.

LAPLACE, CYRILLE, a French naval officer, born November 7, 1793; died January 24, 1875. In 1828 he was appointed captain of the *Favorite*, with which he was ordered to sail around the world. The result of this voyage he laid down in the book "Voyage autour du Monde, par les Mers de l'Inde et de Chine, exécuté sur la Corvette de l'État la Favorite pendant 1830-'32" (4 vols., 1833-'35). In 1837 he undertook a second voyage around the world on board the *Artémise*, which he described in "Campagne de Circumnavigation de la Frégate l'Artémise pendant les Années 1837-'40" (1840-'54). He was appointed rear-admiral in 1844, and vice-admiral in 1853, in which year he was also elected President of the Geographical Society of Paris.

LAUTERS, PAUL, a Belgian painter in water-colors, born in 1806; died in November, 1875. He excelled in landscapes, and was professor in the Royal Academy in Brussels.

LEAHY, PATRICK, an Irish prelate, born in 1807; died January 26, 1875. He was for a time Vice-Rector and Professor of Biblical Exegesis in the new Catholic University in Dublin. In 1857 he was made Archbishop of Cashel.

LOOCK, Sir CHARLES, Bart., an English physician, born April 21, 1799; died July 23, 1875. He graduated M.D. from the University of Edinburgh, and, having settled in London, was appointed first physician-accoucheur to the Queen in 1840. Having retired from the active

duties of his profession in 1857, he became President of the Royal Medical Chirurgical Society, and on April 14, 1857, was made a baronet.

LOEBEN, ALBERT, Count von, a German statesman, born April 29, 1800; died April 2, 1875. In 1855 he became a member of the Prussian Herrenhaus.

LOGAN, Sir WILLIAM EDMOND, a British geologist, born in 1798; died in July, 1875. He studied at the University of Edinburgh; was appointed Director of the Geological Survey of Canada in 1840; was created a knight in 1856, and was one of the jurors in the scientific department of the International Exhibition of 1862. He was the author of various works on the coal-fields of Southern Wales, and various other geological works.

LOHDE, Dr. GEORG, a German naturalist; died October 19, 1875. He studied at Berlin, Heidelberg, Leipsic, and Strasburg. He was about to start for the German station Chinchoa, on the west coast of Africa, when he was taken sick. He wrote "Ueber die Entwicklungsgeschichte und den Bau einiger Samenschalen," "Zur Kenntniss der Gattung *Gloeocystis*," and "Insectenepidemien, welche durch Pilze hervorgerufen werden."

LOTZE, HERMANN, a German philologist; died April 27, 1875. He was official interpreter in Leipsic of fourteen languages.

LOVAT, THOMAS ALEXANDER FRASER, Baron, a British peer, born in 1802; died June 22, 1872. He was Lord-Lieutenant of Invernesshire from 1853 to 1873.

LYONNET, JEAN PAUL FRANÇOIS MARIE, a French prelate, born June 12, 1801; died December 23, 1875. He was ordained as priest in 1824, and for some time was director of various educational institutions. In 1848 he was appointed Dean of the Chapter of Dreux, and soon after Vicar-General of Lyons. In 1851 he was appointed Bishop of Saint-Flour, in 1857 of Valence, and in 1864 Archbishop of Albi. In 1858 he was made an Officer of the Legion of Honor. He wrote "Tractatus de Contractibus" (1837), "Tractatus de Justitia et Jure" (1837), "Le Cardinal Fesch" (2 vols., 1841), "Histoire de Mgr. d'Avien" (2 vols., 1847).

MACDONNELL, Sir ALEXANDER, born in 1794; died January 21, 1875. He was resident commissioner of the Board of National Education in Ireland from 1839 to 1871, and was created a baronet in 1872.

MAGERE, FRANZ, Freiherr von, a Bavarian lieutenant-general, born in 1785; died February 10, 1875. He entered the army when quite young, and up to 1815 took part in eight campaigns.

MARGARY, AUGUSTUS RAYMOND, a British diplomatic officer, born at Belgaune, Bombay, May 26, 1846; was murdered at Manwypa, February 21, 1875. From 1867 to 1874 he had acted as consul at various posts in China and Formosa, and in 1874 he joined the Browne Expedition to Yunnan as interpreter. In order

to prepare the way for the expedition, he traveled by land through China to Burmah, there to meet it. He left Shanghai in August, 1874, went up the Yang-tse-Kiang to Lake Tungting, traveled through the provinces of Hunan, Kweichow, and Yunnan, and on January 15, 1875, arrived in Bhamo, Burmah. From here he soon after set out with the expedition, and in the Chinese town of Manwyne, on the border of Burmah, he was murdered with five servants. (See BURMAH and CHINA.)

MASSOL, MARIE ALEXANDRE, a French journalist and politician, born March 18, 1805; died April 23, 1875. He went to Paris in 1830, where he joined the Saint-Simonists. He set out on a foot-journey to propagate the ideas of the new social party in other countries. After his return to Paris, he devoted himself to journalism. But, finding that his republican ideas were apt to bring him into trouble, he went to London, where he published for some time a radical French journal. He left the Saint-Simonists when they began to meddle with religion. Under the Empire he devoted himself entirely to his studies, particularly to that of philosophy. He was a member of one of the radical lodges of Freemasons in Paris, and made a determined resistance against the interference of the state. These struggles attracted considerable attention at the time. During the siege of Paris he was adjunct to the Maire of the Ninth District, and at the last municipal elections he was elected a member of the Communal Council.

MATHIEU, JACQUES MARIE ADRIEN CÉSAIRE, a French prelate, born at Paris, June 20, 1796; died July 9, 1875. He studied at the Seminary of Saint-Sulpice, was ordained as a priest upon his graduation; appointed secretary of the Bishop of Evreux in 1823, and a short time after became one of the grand vicars of M. de Quélen, Archbishop of Paris. After being curate of a parish in Paris for some time, he was appointed Bishop of Langres in 1833, Archbishop of Besançon in 1834, and in 1850 cardinal. As a member of the Senate of the Second Empire, he took a prominent part in the deliberations of that body. He was made a Commander of the Legion of Honor in 1856.

MAYER, FRIEDRICH EDUARD, a German politician, born April 27, 1809; died April 2, 1875. He was a member of the German Reichstag, and belonged to the National Liberal party. He was also a prominent member of the Diet of Württemberg.

MAYHEW, AUGUSTUS SEPTIMUS, an English writer, born in 1812; died December 25, 1875. He had both skill and facility as a sketcher in pen and ink, and studied as an artist in Paris, where he was living at the time of the *coup d'état*. With Mr. Sutherland Edwards, he was, at this period, correspondent of the *Morning Chronicle*. As a member of the literary circle known as the Brothers Mayhew, he wrote much in the various departments of literature and journalism. A novel called "Paved with

Gold," and an amusing book entitled "The Greatest Plague in Life," met with great success. He also wrote songs for music, and was a prolific contributor to magazines. He was one of the chief writers on *Diogenes*, a comic paper published some years ago. The farce "The Goose with the Golden Eggs," one of the most successful on the modern stage, was written in collaboration with Mr. Sutherland Edwards, who also had a share in the "Four Cousins," a comedy produced at the Globe Theatre.

MÉLINGUE, ÉTIENNE MARIN, a French actor, born at Caen, in 1812; died March 28, 1875. He at first turned his attention to sculpture, but soon left it for the stage. He appeared with great success in France and in the colonies. In Paris, where he played in the Porte Sainte-Marie and Ambigu Theatres, he always drew crowded houses.

MILDE, KARL JULIUS, a German painter, born February 16, 1808; died in November, 1875. He excelled in paintings on glass. Among his best works of this class is a window in the Church of St. Peter, in Hamburg, representing the Saviour walking on the sea, and the large window for the cathedral of Cologne, 45 feet high, and 28 feet wide, which he made together with Achelius, and which represents the day of judgment.

MILLET, JEAN FRANÇOIS, a French painter, born about 1815; died January 20, 1875. He was the son of a peasant, and in his youth received those impressions which he afterward used in his paintings. He became a pupil of Paul Delaroche, and at first tried historical and mythological subjects. Later he devoted himself entirely to landscape-painting, and his scenes from peasant-life in Normandy have brought more than 50,000 francs.

MINISCALCHI-ERIZZO, Count, an Italian senator; died December 27, 1875. He was the author and translator of various geographical and philological works.

MITCHELL, THOMAS ALEXANDER, M. P., born in 1812; died March 16, 1875. He was in Parliament for Bridport, from 1841 to 1875.

MOLESWORTH, RICHARD PIGOT MOLESWORTH, Viscount, a British peer, born July 23, 1786; died June 20, 1875. He is succeeded by his nephew, the Rev. Samuel Molesworth.

MOLTKE-BREGENTVED, Count, a Danish statesman; died October 1, 1875. He was Minister of Foreign Affairs at the time of his death.

MONTBELLLO, GUSTAVE OLIVIER LANNES, Comte DE, a French officer, born December 4, 1804; died August 29, 1875. In 1854 he was appointed general of division, and in 1862 was put in command of the French army of occupation in Rome. He was decorated with the Grand Cross of the Legion of Honor in 1864, and was created a Senator in 1867.

MORTEMART, CASIMIR VICTORNIEN DE ROCHE-CHOUART, Duc DE, born in 1787; died January 1, 1875. He took part in the battle of Jena, in 1806, was created a Peer of France under

the Restoration, and was appointed lieutenant-general and ambassador to the Court of Russia. On July 29, 1830, Charles X. recalled him to Paris, and intrusted him with the formation of a new ministry, but too late. When the duke arrived in Paris the King had already been deposed. Under Louis Napoleon he took a seat in the Senate. His title goes to his nephew.

MÜLLER, NIKLAS, a German-American poet, born in 1809; died August 14, 1875. In his youth he was apprenticed to a printer, which trade he learned thoroughly. He made his first appearance as a poet in 1825. In 1837 a collection of his poems was published by Cotta. He took part in the revolutionary movements of 1848, was forced to flee to Switzerland, and in 1853 went to New York, where he bought a printing-office. During the war he published "Zehn Sonnetts," and in 1867 a volume of poems, entitled "Neuere Gedichte." During the German-French War he published a number of patriotic poems, under the title of "Frische Blätter auf die Wunden deutscher Krieger." In 1874 he retired from the printing business. He was preparing a complete edition of his poems in 1875, but had not finished it at the time of his death.

MULZER, KARL, Freiherr von, a German lawyer, born at Wetzlar, in 1805; died January 23, 1875. In 1859 he was appointed Minister of Justice of Bavaria, and in 1864 President of the Court of Appeals of Lower Bavaria. In consequence of a disease of the eyes he was pensioned in 1867.

NEUMANN, HERMANN, a German poet, born November 12, 1808; died November 8, 1875. His poems are chiefly epics. He wrote "Nur Jehan," "Jürgen Wullenweber," and "Dinon thy."

NEW, CHARLES, an English missionary, born in 1841; died in the interior of Africa, in 1875. He joined the mission of the United Methodist Free Churches in 1862, and for nine years he was the fellow-laborer of the Rev. Thomas Wakefield, at Ribe. While in England, in 1872, he joined, by special request, the Livingstone Search Expedition. He spent two years in England, awaking popular interest in the cause of African missions. In March, 1874, he returned to his work in East Africa. He had penetrated into the interior as far as Ohaga, with the intention of selecting a suitable locality for commencing a new mission. He did not succeed, however, and was compelled to return to his missionary station at Ribe. But he died, before reaching this place, in the neighborhood of Duruma.

NIPPERDEY, KARL, a German philologist; died January 2, 1875, at about 50 years of age. He was Professor of Classical Philology at the University of Jena. His editions of "Cornelius Nepos," "Cæsar," and "Tacitus," and his philological researches, attracted great attention.

NÖGGERATH, GUSTAV ADOLF, a German journalist, born in 1841; died December 11, 1875. He was the son of the celebrated geologist,

Johann Jacob Nöggerath. At the time of his death he was the editor of the *Correspondenzblatt*, a National Liberal paper.

OATES, FRANK, a British explorer, born April 6, 1840; died February 5, 1875. In 1873 he set out on an exploring expedition to South Africa, remained some time in the Matebele country, visited toward the close of 1874 the Victoria Falls of the Zambesi, fell sick on his return voyage, and died eighty miles north of Tati, in the Makalaka country.

OHMÜLLER, FRANZ JOSEPH, a German botanist, born July 5, 1797; died January 1, 1875. He discovered a large number of new plants, and executed a botanical map of Bavaria.

OKROPIROVITCH, Prince PAUL, the grandson of the last Prince of Georgia, George XIII; died February 24, 1875.

OMALINO D'HALLOY, JEAN BAPTISTE JULIEN, a Belgian geologist and ethnologist, born at Liège, February 16, 1783; died at Brussels, January 15, 1875. From 1815 to 1830 he was Governor of the province of Namur, was elected a member of the Belgian Senate in 1848, and vice-president of that body in 1851. In 1808 he published his first work, on the geology of Northern France. His best-known works are: "Éléments de Géologie" (1831); "Introduction à la Géologie" (1833); "Précis élémentaire de Géologie" (1843); "Abrégé de Géologie" (1853); and "Des Races humaines ou Éléments d'Ethnographie" (1845). The *Memoirs of the Belgian Academy of Sciences*, of which he was repeatedly president, contain a series of "Notes sur la Classification des Races humaines," by him.

PETERSEN, AUGUST, a German theologian, born in 1809; died November 1, 1875. He is best known by his work, "Die Idee der christlichen Kirche."

PFLIEGER-MORANSKY, GUSTAVUS, the most prominent Bohemian poet of modern times, born in 1834; died September 21, 1875.

PHILIP, JOHN BERNIE, an English sculptor; died in March, 1875. Among his principal works is the pedestal of the Albert Monument, consisting of 87 figures in life size: of these the figures representing Geology, Geometry, Rhetoric, and Philosophy, are considered the finest. He also made the shrines of the altar in St. George's Chapel, Windsor, the Crimean Monument in Westminster, and eight of the statues in the Royal Gallery of Parliament.

PIDERIT, KARL WILHELM, a German educator, born in 1816; died May 29, 1875. He had been Director of the Gymnasium of Hanau for twenty-two years, which institution gained great popularity under his administration. His commentaries to "Cicero," and his school edition of Cicero's orations, were received with great favor.

PLYCEL, MARIE, a celebrated pianist, born in Paris of Belgian parents in 1811; died March 30, 1875. She studied with Moscheles and Kalkbrenner, and in her sixteenth year ap-

appeared in public in Paris, St. Petersburg, and other cities. In 1848 she was appointed professor in the conservatory in Brussels. She was a sister of Prof. Moll, of Ghent, who died some years ago. She married the well-known piano-maker, Camille Pleyel, but was separated from him a few years after.

PULIAN, JOHANN GOTTFRIED, a German painter, born in 1809; died March 4, 1875. He belonged to the Düsseldorf school of painters, and excelled in landscape-painting. His principal paintings are scenes on the Rhine.

RAMSAY, SIR ALEXANDER, M. P., born May 26, 1818; died March 3, 1875. He was M. P. for Rochdale from 1857-'59.

RANFURLY, THOMAS GRANVILLE HENRY STEWART KNOX, fourth earl, a British peer, born July 28, 1849; died May 10, 1875. He is succeeded by his brother, the Hon. Uchter John Mark Knox.

RANOLDER, DR. JOHN, a Hungarian prelate, born in 1806; died September 12, 1875. He was Roman Catholic Bishop of Veszprém.

RASIN, ALEXIS, a Russian author; died May 1, 1875. His books for the young enjoyed great popularity.

REBER, BALTHASAR, a German scholar, born in 1805; died March 18, 1875. He was professor in the University of Basel, and was well known as a poet and a writer on historical subjects.

REID, ROBERT, M. P., born in 1881; died March 30, 1875. He was a member of Parliament for Kirkcaldy since 1874.

REISMANN, JOHANN VALENTIN VON, a German prelate, born November 12, 1807; died November 17, 1875. He was ordained as priest in 1830, became subsequently Professor of Theology at the University of Würzburg, and was appointed Bishop of Würzburg in 1870.

RESLHUBER, DR. AUGUSTIN, an Austrian priest and astronomer, born July 5, 1808; died September 29, 1875. In 1847 he was appointed Director of the Observatory of the Stift (monastery) of Kremsmünster, and at the same time acted as Professor of Natural History up to 1854. In 1860 he was elected Abbot of the Stift but retained the control of the observatory. He also took part in politics; he was a member of the Upper Austrian Diet in 1861, and in 1872 was appointed a life-member of the Herrenhaus. He was decorated with various orders, and was a member of a large number of scientific societies. He wrote a large number of works on astronomy, meteorology, and magnetism.

RICHTER, F. I., a German journalist, born in Magdeburg, in 1814; died in April, 1875. He began life by peddling books and pictures, and, having after a time established himself in business in Hamburg, he founded the *Hamburger Reform*, and by his energy raised it to a front rank among the journals in Germany.

RITTER, FRANZ, a German scholar, born in 1803; died October 22, 1875. He was former-

ly Professor of Classical Philology in Bonn, and published editions of and commentaries to "Horace."

ROGIER, FIRMIN FRANÇOIS MARIE, a Belgian statesman, brother of the celebrated minister Charles Rogier, born April 1, 1791; died November 1, 1875. He took a prominent part in the Belgian revolution, and in 1830 was sent to Paris, where first as secretary, and since 1848 as ambassador, he remained until 1864.

ROSENTHAL, DAVID AUGUST, a Catholic author; died March 30, 1875. He was descended from Jewish parents, but in 1851 with his wife and children entered the Catholic Church. He wrote, besides several works on medicine and natural history, "Convertitenbilder aus dem 19ten Jahrhundert," which was translated into several languages and passed through two editions. He also translated from the Spanish the tales, legends, and stories of Balaguer Montserrat (1860), and published the poetical works of Johann Scheffler (1862). He also wrote numerous articles for the *Schlesische Kirchenzeitung*, and the *Schlesische Volkszeitung*.

RUSSELL, LORD COSMO, half-brother of Earl Russell, born in 1817; died December 18, 1875. He was the sixth son of the sixth Duke of Bedford, by his second wife. He was for some time in the army, but retired in 1849, when he married Annie, daughter of Mr. J. G. Norbury.

SAUVAIRE-BARTHÉLEMY, BARTHÉLEMY ANTOINE FRANÇOIS XAVIER SAUVAIRE, Marquis de Barthélemy, a French politician, born at Marseilles, November 16, 1800; died in February, 1875. He was a grand-nephew of the Marquis de Barthélemy, a member of the Directory, and afterward Vice-President of the Chamber of Peers. During the last days of the Restoration, he inherited the title of his grand-uncle, and took his seat in the Chamber of Peers on September 27, 1830. In 1848 he was elected to the Constituent and Legislative Assemblies, but retired from public life after the *coup d'état*. In 1869 he was a candidate for the Corps Législatif from Marseilles, but was defeated.

SCHARNHORST, AUGUST VON, a Prussian officer, died November 11, 1875. He was the grandson of the celebrated Prussian General Gerhard David Scharnhorst, to whom Prussia and consequently Germany owes its present military greatness. With him the direct male line of the Scharnhorsts becomes extinct, 119 years after the birth of its great ancestor.

SCHNEIDER, THEODOR, a German chemist and geologist, born August 23, 1813; died July 18, 1875. He was professor in the Mining Academy of Freiberg, and was the author of numerous chemical and geological works and treatises.

SOHNABEL, KARL, a German chemist, born in 1809; died September 11, 1875. He was Director of the Realschule in Siegen, and had performed many interesting chemical analyses.

SOHRADER, CLEMENS, a German Jesuit, born in 1820; died February 23, 1875. He was ordained as priest in 1846, was appointed professor in Löwen in 1850, and in Vienna in 1857.

He wrote "Theses theologicae," and "De Unitate Ecclesiae."

SCHUBERTH, JULIUS F. G., a German music-publisher, born July 14, 1804; died June 9, 1875. In 1826 he began business as a publisher of music, maps, and books, at Hamburg, and succeeded so well that he established a branch house in Leipsic in 1832, and one in New York in 1850. In 1853 he transferred the Hamburg establishment to his brother Fritz, and concentrated his wholesale business at Leipsic, where it has since continued, with branches in the principal cities of Europe and America. Mr. Schubertsh visited the United States frequently, having crossed the Atlantic as many as sixty-six times. He came for the first time as manager for his friend, Ole Bull. He was on intimate terms with Vieuxtemps, Spohr, Schumann, and other distinguished musicians and composers. He was a warm friend of the Abbé Liszt, and published the later works of that composer, such as the "Oratorio of Christ" and the "Rhapsodies." In 1846 the King of Württemberg awarded him the gold medal of the Order of Merit, and in 1870 he was made a member-extraordinary of the orchestra of the Grand-duke of Weimar, who also conferred on him the Order of Merit. His editions of the great German composers are splendid works of art, and his "Musical Dictionary" a compilation of great merit. He was an excellent violinist, and played also other instruments.

SCHWEITZER, Dr. J. B. VON, a German socialist and poet, born July 12, 1834; died July 28, 1875. He studied law, and, having graduated, settled as advocate in Frankfort-on-the-Main. He afterward went to Berlin, where, with Lassalle, he became the leader of the social democrats, and founded the paper *Der Social-demokrat*. He was a member of the Reichstag of the North German Confederation, and of the German Customs Parliament from 1867 to 1870. As the leader of the social democrats of Germany he maintained a correspondence with most of the advanced reformers of Europe. Dissensions with other leaders of the socialistic movement caused him to withdraw from political agitation and to devote himself to poetry. He wrote the comedies "Drei Staatsverbrecher," "Epidemisch," "Cousin Emil," and "Das Vorrecht des Genies," which were well received.

SEBASTIAN, GABRIEL MARIA, Infante of Spain, born November 4, 1811; died February 13, 1875. He was a second-cousin of Queen Isabella, and was married to Maria Christina Isabella, daughter of Henry, Duke of Seville.

SILVESTRI, PIETRO DI, an Italian cardinal, born February 15, 1803; died November 19, 1875. He was created a cardinal in 1858.

SMITH, MATTHEW, a British officer, born in 1797; died in the latter part of April, 1875. He had served chiefly in India. At the time of his death he held the rank of lieutenant-general.

SOLMS-BRAUNFELS, KARL, Prince of, a German soldier, born July 27, 1812; died November 18, 1875. He was the son of Prince Friedrich Wilhelm of Solms-Braunfels, and Princess Frederike of Mecklenburg-Strelitz, the sister of Queen Louisa of Prussia. His mother had been married three times, first to Prince Louis of Prussia (died December 28, 1796), next to the Prince of Solms-Braunfels, and lastly to Ernest August, Duke of Cumberland, afterward King of Hanover. Prince Karl was, therefore, a step-brother of King George V. of Hanover. At the time of his death he was lieutenant-field-marshal in the Austrian Army. He was married to Princess Sophie of Löwenstein-Wertheim-Rosenberg.

SPRENGPORTEN, Freiherr JAMES WILLIAM, a Swedish officer; died September 23, 1873, in his 89th year. He had been Governor of Stockholm, and at the time of his death was lieutenant-general in the Swedish Army and a member of the Upper Chamber.

STEINMANN, FRIEDRICH, a German politician, born in 1801; died February 8, 1875. He held various offices, and was editor and contributor to various journals, particularly in 1848 and 1849 of the *Westphälische Volks-Zeitung*, an organ of the Republican party. He published "Geschichte der Revolution in Preussen" (1854), on account of which he was dismissed from the civil service.

STUART, Lady LOUISE, the last member of the royal house of Stuart, born March 21, 1776; died in December, 1875. Longevity seemed to be peculiar to her family, as her father died at eighty-three, and her brother, the last Earl of Traquair, at eighty.

TOLSTOI, Count ALEXEI, a Russian poet and novelist, died October 11, 1875. He published "Kujas Serebiganny" (1863), a tale of the time of Ivan the Terrible; "Smert Joana Grosnago" (1866), a tragedy; and a collection of poems in 1867.

TREDEGAR, CHARLES MORGAN ROBERTSON, Baron, a British peer, born April 10, 1793; died April 16, 1875. He was member of Parliament for Brecon in 1830-'31 and 1835-'47, was raised to the peerage in 1859, and was since 1866 Lord-Lieutenant of Breconshire.

TROILUS, GUSTAVUS UNO, the most prominent Swedish portrait-painter of modern times, born in 1804; died August 13, 1875. He was court-painter, and member of the Academy of Fine Arts.

TROSS, EDWIN, a French antiquarian and publisher, born in Germany in 1823; died in Paris, August 26, 1875. In 1851 he founded his antiquarian publishing-house, which soon became one of the largest in Europe. His catalogues of the literature of the fifteenth and sixteenth centuries are of great literary value.

TURNER, CHARLES, M. P., born in 1803; died October 15, 1875. He was member of Parliament for Liverpool in 1852-'53, for South Lancashire in 1861, and for Southwest Lancashire since 1868.

VANCE, JOHN, M. P., died September 21, 1875. He was M. P. for the city of Dublin, 1852-'65, and for Armagh City since 1867.

VAUFRELAND, Vicomte DE, a French statesman, born in 1795; died in June, 1875. During the last days of the Restoration he was under-Secretary of State in the Department of Justice. He was also a member of the Family Council appointed for the Count de Chambord during his minority.

WARNIER, AUGUSTE HUBERT, a French scholar, born January 8, 1810; died March 15, 1875. He studied medicine in Paris, went to Algeria as surgeon, and for some time represented France with Abd-el-Kader. As a member of the Commission for the Scientific Exploration of Algeria, he drew, together with Captain Carette, a very valuable map of the territory of the Berber and Arab tribes of Algeria. Having held various offices in Algeria, he finally settled down as a farmer in the plain of Medja. In 1862, during the sickness of his friend, Dr. Duveyrier, he edited the latter's celebrated book, "Les Touaregs du Nord." In 1871 he was elected to the National Assembly from Algeria. He wrote "L'Algérie devant le Sénat" (1863), "L'Algérie devant l'Opinion Publique" (1864), "L'Algérie devant l'Empereur" (1865), a series of letters to M. Rouher, entitled "Programme de Politique Algérienne" (1868), "Bureaux Arabes et Colons" (1869), "Cahiers Algériens" (1870), and "L'Algérie et les Victimes de la Guerre" (1871).

WELBY-GREGORY, Sir GLYNNE EARLE, M. P., born June 26, 1806; died August 23, 1875. He was M. P. for Grantham, 1830-'57.

WESTBURY, RICHARD AUGUSTUS BETHELL, Baron, a British peer, born March 11, 1830; died March 28, 1875.

WILLEMORS-SUHM, RUDOLPH VON, a German zoölogist, born September 11, 1847; died September 13, 1875. He studied zoölogy in Munich and Bonn, took part in the war with France, and in 1871 was appointed lecturer and assistant in the Zoölogical Museum in Munich. In 1872 he accompanied the expedition on the Challenger on its tour around the world as zoölogist, and died on the way from the Sandwich Islands to Tahiti. He left an official journal of two large volumes, and a fine collection of zoölogical drawings.

WÖRNER, LUDWIG, a German author, born 1843; died January 24, 1875. He had been for over two years, previous to his death, secretary of the Union of the Historical and Antiquarian Societies of Germany, which had its seat in Darmstadt, and was editor of the *Correspondenzblatt*, published by the Union. Among his literary labors the best known is his continuation of the "Literarisches Handbuch für Geschichte und Landeskunde von Hessen," established by Walther.

YARBOROUGH, CHARLES ANDERSON PELHAM, Earl of, a British peer, born January 14, 1835; died February 6, 1875. He was M. P. for Great Grimsby, 1857-'62.

ZASTROW, ADOLPH VON, a German general, born in 1802; died August 12, 1875. He was a general of infantry, had been commander of the Seventh Prussian Army Corps, and was well known as a writer on military subjects, particularly on matters connected with engineering.

ZELENY, WENZEL, a Bohemian scholar, born in 1806; died April 5, 1875. He was director of a gymnasium in Prague, had been a member of the Austrian Reichstag and of the Bohemian Diet, and was one of the most prominent members of the Czechic party.

ZWIERLEIN, Freifrau von, a German poetess, born in 1801; died in December, 1875. She is better known by her pseudonym of Adelheid von Stolterfoth. Her principal poems are the "Rheinische Sagen und Lieder."

OHIO. The following is a brief summary of the present financial condition of the State:

On November 15, 1874, the public funded debt of the State was.....	\$7,989,305 30
The redemptions during the year were:	
Loan of 1870.....	\$18,200 00
" of 1875.....	20,085 18
Total.....	38,285 18

Outstanding November 15, 1875.....\$7,949,990 12

Of the amount outstanding on the 15th of November, the sum of \$4,165 had ceased to draw interest, the holders thereof having been notified to surrender their stock for redemption, so that the interest-bearing funded debt of the State is \$7,945,755.12.

The funded debt is divided as follows:

Foreign debt, payable in New York City.....	\$7,948,255 12
Domestic debt, payable in Columbus.....	1,665 00
Total.....	\$7,949,990 12

The local indebtedness of the State, on September 1, 1875, was as follows:

Debts of counties.....	\$3,044,578 90
Debts of townships, including debts created by boards of education other than for separate school-districts.....	322,971 18
Debts of cities (first and second class).....	20,350,723 11
" of incorporated villages.....	981,862 64
" of school-districts (special).....	1,507,958 48
Total.....	\$25,957,588 21

The amount of reimbursable debt, therefore, is:

State.....	\$7,949,990 12
Local.....	25,957,588 21
Total.....	\$33,907,508 33
Irreducible debt.....	4,177,668 31

Aggregate debts in Ohio (State, local, and trust funds).....\$33,908,176 64

The local indebtedness in this statement is reckoned to September 1, 1875, and the State debt to November 15, 1875:

The balance in the State Treasury on November 15, 1874, was.....	\$812,897 19
The receipts, including transfers of \$590,674.30, for the fiscal year ending November 15, 1875, were.....	5,654,866 23

Total amount of funds in the Treasury for the year.....	\$6,467,763 42
The disbursements, including transfers, during the year had been.....	5,087,464 90
Balance in the Treasury November 15, 1875.....	\$1,429,778 52

The following table shows the purposes and amounts for which taxes were levied in 1875 in Ohio, with the increase and decrease, compared with 1874; also the tax collected by the United States in 1875:

Total tax for State purposes.....	\$4,948,995 19
Total county tax for local purposes.....	23,008,976 18
Total tax levied in Ohio for 1875.....	\$27,957,971 37
Internal revenue tax collected by the United States.....	14,656,395 30
Total collected in Ohio.....	\$42,609,266 67
By the population of Ohio in 1870, per head.....	\$16 00
For each voter voting at the election, 1875.....	71 66
Increase of local taxes.....	\$1,215,976 33
Decrease of State tax.....	101,372 23
Net increase of the whole tax.....	\$1,114,604 10
The assessed value of property on the grand duplicate is as follows, compared with the returns of 1874:	
Value of lands, 1874.....	\$697,408,587
1875.....	696,838,328
Decrease.....	\$525,214
Value of real estate in cities, etc., 1874.....	\$354,849,199
1875.....	366,031,731
Increase.....	\$11,182,532
Value of chattel property, 1874.....	\$528,131,588
1875.....	585,660,818
Increase.....	\$7,529,230
Total value.....	\$1,598,575,862
Total increase.....	13,196,583

The acreage of wheat for 1874 was 1,845,797, being 101,041 acres more than in 1873; the yield, 26,896,818 bushels, an increase over the previous year of 4,922,438 bushels; average yield, 14.51, an increase of 1.90. In acreage, total yield, and average yield, there was a decided increase over each of the preceding four years.

In corn the acreage was 2,597,716; bushels yielded, 101,815,494; average per acre, 39.15 bushels. Compared with 1873, the increase in acres was 201,421; in bushels, 17,766,166; in the average per acre, 4.08.

In oats the number of acres sown was 881,970; bushels raised, 19,557,014; average per acre, 22. Compared with 1873, it shows an increase of 90,043 acres, a decrease of 537,890 bushels, and a decrease of 3.38 bushels per acre. The average is less than for seventeen years.

Of barley there were 42,547 acres sown; 1,233,914 bushels raised; average per acre, 26.65. Compared with 1873, this shows a decrease of 7,325 acres, an increase of 159,008 bushels, and an increased average of 5.10 bushels per acre.

The statistics of the rye-crop show the number of acres sown to be 22,175; bushels raised, 231,435; average per acre, 9.94 bushels. Compared with 1873, the decrease is 4,752 acres; decrease in yield, 60,394 bushels; and in average, 0.54.

Of buckwheat the number of acres sown was

19,936; bushels raised, 240,015; average per acre, 12.04. Compared with 1873, this shows a decrease of 1,066 acres, an increase of 26,945 bushels, and an increase of 1.90 in the average yield per acre.

The potato-crop was 7,348,907 bushels from an acreage of 107,911, being an average yield of 68.10 per acre. Compared with 1873, this shows an increase of 27,712 acres and 1,382,591 bushels, and a decrease in the average yield of 8.45 bushels per acre.

The number of acres planted to sweet-potatoes was 2,793, and the yield 170,502 bushels; the average per acre being 69.15 bushels.

The returns of meadow products were: timothy, acres, 1,810,837; tons of hay, 1,145,999; average, 33. Clover: acres, 502,268; tons of hay, 362,386; bushels of seed, 194,066; acres ploughed under for manure, 40,277. Compared with 1873, this shows a decrease in acres in timothy of 4,320; decrease in tons in timothy, 156,165; decrease in average, 0.16; decrease in acres in clover, 148,890; decrease in tons of clover, 205,662; decrease in bushels of clover-seed, 11,878; decrease in acres of clover ploughed under, 23,812.

The product of flax in Ohio, in 1874, was: number of acres sown, 40,719; bushels of seed produced, 268,790; pounds of fibre, 6,223,351. Compared with 1873, it shows a decrease in acres sown of 2,936; increase of pounds of fibre, 1,152,563; and increase of bushels of seed, 101,280.

The number of acres planted to tobacco in 1874 was 12,439, producing 9,245,524 pounds. This was a decrease of 31,411 acres and 30,327,084 pounds compared with the reports of 1873. This shows the most remarkable loss of production of any article in the State.

The dairy products of Ohio, for 1874, are: butter, 44,335,657 pounds; cheese, 33,123,880 pounds. Compared with 1873, it is an increase of 801,792 pounds of butter, and a decrease of 3,344,650 pounds of cheese.

The product of maple-sugar in 1874 was 1,248,955 pounds, and of sirup 302,854 gallons. Compared with the product of 1873, there was a decrease in the amount of sugar of 901,117 pounds, and a decrease of 74,515 gallons of sirup. The sorghum-crop figures show an acreage of 12,108, a product of 36,410 pounds of sugar, and 941,510 gallons of sirup. Compared with 1873, this was an increase in acreage of 26.82; gallons of sirup, 249,196; and a decrease of 436 pounds of sugar.

The following is the number and value of sheep, and the number of pounds of wool shorn in Ohio, as returned by the assessors in 1875: number of sheep, 4,100,288; value, \$10,178,046; average value, \$2.48; pounds of wool shorn, 16,684,276; average pounds to the sheep, 4.07. Compared with 1874, there is a decrease of 233,580 in the number, and \$478,021 in the aggregate value. The assessors report 172,572 dogs in the State; sheep

killed by dogs, 81,691; value, \$101,681; and 25,770 sheep injured by dogs, to the estimated amount of \$48,688: aggregate loss, 145,324. This shows an increase of 7,674 dogs over 1873; and a decrease in the value of sheep killed and injured of \$10,994.

The number of acres in orchards and vineyards, and their products, in 1874, were reported as follows: acres in orchards, 391,620; acres in vineyards, 9,975; acres in vines planted in the year, 905; bushels of apples gathered, 15,918,794; bushels of peaches gathered, 2,251,878; bushels of pears gathered, 135,987; pounds of grapes gathered, 17,965,804; gallons of wine, 1,078,056.

The assessors' reports of taxable lands in 1874 show the number of acres cultivated to be 7,670,333; in pasture, 4,956,975; woodland, 4,887,579; other lands, unproductive and lying waste, 548,298: total acres owned, 19,526,715. The census report of 1870 gives the amount of acres at 25,312,937, being 5,958,311 more than returned by the assessors. By the reports it appears that 67,355 acres of woodland have been cleared in one year, of which 20,368 acres lay in one county, Washington. These reports may be regarded as very incorrectly returned by the assessors. The total acres of land on the grand duplicate of the State for taxation is 25,458,328. This amount exceeds that returned by the assessors 5,931,608 acres.

The number of horses listed for taxation in 1875 was 788,839, with a total assessed value of \$44,594,849, and an average value of \$60.36. Compared with the previous year, this is an increase in the number of 9,536, a decrease in the aggregate value of \$337,519, and an average decrease per head of \$2.59. The number of cattle was 1,509,260; value, \$25,920,445; average value, \$17.17. This is a decrease from the previous year of 164,604 in number, and in value of \$1,997,092, and an average increase of fifty cents per head. The number of hogs was 1,778,899; value, \$7,353,740; average value, \$4.14. Number of mules, 26,812; value, \$1,811,631; average value, \$68.25. This is an increase in number of 967, and an aggregate value of \$33,450; and a decrease in the average value of \$1.30.

The total number of hogs packed in the winter of 1874-'75 was 871,736; being a falling off from the preceding winter of 25,891.

The amount of coal mined in the State, according to the returns of the assessors, was, in 1874, 97,876,809 bushels; thus giving employment to 10,261 men. This was an increase in the product of 9,082,569 bushels, and in men employed of 1,899.

The law requires the assessors to collect and return statistics of manufactures, water-crafts, mines, miners, and miscellaneous items; but, owing to a failure to provide means for procuring correct statistics in these departments, the returns furnished are so absurdly inaccurate that the Secretary of State warns the

public against placing any confidence in them; they are therefore omitted here.

According to the returns of the county auditors, there were in operation for the year ending April 12, 1875, 171 national banks, with a capital of \$29,986,742; 22 banks incorporated under the laws of the State, with a capital of \$525,503; 22 savings-banks incorporated under the State law of 1873, with a capital of \$1,274,280; 198 private banks, with a capital of \$6,561,743; making a total of 390 banks of all kinds, with a capital of \$38,348,260. The amount of Government bonds reported as held in the State exempt from taxation was \$7,094,125; being a decrease of \$1,311,325 from the amount returned for 1874.

The Railroad Commissioner's report shows that within the State of Ohio there are 4,458 miles of track in main line and branches, laid with rail, and 1,190 $\frac{1}{4}$ miles of sidings and other tracks; total, 5,648 $\frac{1}{4}$ miles, an increase for the year of 88 $\frac{1}{2}$ miles of main and 48 $\frac{1}{2}$ of other track, a total of 132 miles. This is 128 miles less of main track and 49 miles less of sidings than was laid the previous year. The report covers returns from all the lines wholly or partially within the limits of the State. The aggregate length of main line and branches owned or leased is 8,222 miles; the traffic, etc., reported, however, being upon 7,489 miles.

The number of passengers reported carried over the entire lines was 17,193,948, an increase of 1,706,654; of freight, 25,750,501 tons yielding revenue were transported, an increase of 145,725 tons, excluding supplies carried for company's use.

The gross earnings reported for entire lines operated were \$64,495,325.83, against \$70,928,194.67 last year, a decrease of \$6,432,868.84, nearly 11 per cent.

The net earnings were \$17,515,686.94 against \$19,798,169.39 for year previous, being \$2,272,482.43 less, or a fraction over 11 per cent. decrease, and amounting to only 3 per cent. upon the paid-in capital stock and indebtedness of the companies owning the lines operated.

The passenger earnings were \$17,116,524.84, a falling off of \$5,779.46 from last year.

The earnings from freight transportation were \$48,280,980.11, being \$6,377,646.41 less than amount derived from this source last year, and a decrease of 12.83 per cent.

The companies report a total paid-in capital stock of \$267,018,980.17, with \$269,416,782.92 of bonds issued, and other indebtedness amounting to \$31,808,044.45, an aggregate liability of \$568,238,757.54. The interest paid amounts on funded debt to \$12,691,903.72, and on other debts to \$685,081.36.

Dividends are reported as paid on preferred stock of \$773,456, and \$5,604,335.09 on common stock.

There are 7,419 $\frac{1}{4}$ miles of telegraph-lines reported, with offices at 1,102 stations. The passenger and freight stations number 1,727, and 48,216 persons are reported as employees.

Only eighteen companies paid dividends, as follows: Baltimore & Ohio Short Line, 8 per cent.; Central Ohio, 6; Cincinnati & Baltimore, 8; Cleveland, Columbus, Cincinnati & Indianapolis, 3½; Cleveland & Mahoning Valley, 6; Cleveland & Pittsburg 7; Columbus & Hooking Valley, 8; Lawrence, 10; Little Miami, 8; Massillon & Cleveland, 5; Pittsburg, Fort Wayne & Chicago, 7; L. M. & N., 4. These were on entire capital stock.

The Dayton & Michigan paid 8 per cent. dividends on preferred, and 3½ on its common stock; the Lake Shore & Michigan Southern, 10 on preferred, and 3½ on common; and two companies, the Cincinnati, Sandusky & Cleveland 8 per cent., and the Ohio & Mississippi 7 per cent., on preferred stock only.

The aggregate number of casualties to persons occurring within the State upon the several railway lines for the year, as reported, is, of passengers, killed, 8; injured, 27; of employes, killed, 93; injured, 181; and of others, on track, trespassing, etc., 115 killed and 98 injured—making a total of 216 killed, and 806 injured.

Compared with years previous, there is an increase of two in number of passengers killed, that of employes is the same, while of others there are three less, the total showing a decrease in fatal injuries of three.

Of the non-fatal injuries caused by accident, there was an increase in number of those to passengers of 15; to employes of 16, and to others of 29—a total increase for the year of 60.

The number of persons supported in the county infirmaries, and otherwise, from the poor-fund, for the year ending March 31, 1875, with the cost, as reported to the county auditors, is as follows: Number admitted to infirmaries during the year, 4,870; number supported in infirmaries, 5,879; otherwise supported from the poor-fund, 4,300; total cost, \$546,903; average cost per day, about 25 cents. This shows an increase over last year of \$4,178. It is difficult to determine the exact aggregate of average cost of the poor per day under the care of the county infirmaries from the reports, as other expenses are reported in the gross amount of costs; the above very nearly approximates the real cost.

The total number of prisoners confined in the county jails, for the year ending June 30, 1875, is reported by the sheriffs as 7,454. Of this number 6,773 were white and 681 colored. Aggregate cost of keeping them, \$84,048.

Inquests by coroners: 62 by homicide, 118 by suicide, 360 by accident, 246 by violent and unknown causes; total, 781; number of inquests, 655. By justices of the peace: 37 by homicide, 48 by suicide, 110 by accident, 72 by causes unknown; total, 257. Total deaths reported, 1,088.

Number of deaths, giving the aggregate of counties, of males, 14,906; females, 13,261; total, 28,167. In the details of the reports of the probate judges, which in some cases are

very imperfect, it is shown that there were 18,646 males and 12,424 females, making an aggregate of 26,170, showing 1,997 deaths of persons, sex unknown or not stated in the details of deaths in the reports. Of the deceased whose ages are given in the reports, 4,436 were under one year of age; 8,421 under five years; 9,895 under ten years; 11,595 under twenty years; 14,058 under thirty years. Of the deaths and ages as reported, 16.32 per cent. were under one year; under five years, 31 per cent.; under ten years, 36.42 per cent.; under twenty years, 42.68 per cent.; under thirty years, 50 per cent.

The following is a summary of the school statistics for the year ending August 31, 1875, from the State School Commissioner's report:

Number of primary schools.....	14,415
" high-schools.....	439
" teachers in primary schools.....	21,584
" " high-schools.....	641
" scholars enrolled in primary schools.....	657,917
" " high-schools.....	24,212

The following shows the amount and number of deeds, leases, and mortgages, in all the counties of the State for the year ending June 30, 1875: Deeds recorded, 84,923; leases recorded, 2,675; mortgages recorded, 54,861; amount of money secured by mortgage, \$67,061,716; number of mortgages, other than railroad mortgages, canceled, 31,018; amount of money released by same, \$44,515,868.

The reports of the clerks of Courts of Common Pleas for the year ending June 30, 1875, show the following results: Number of civil judgments rendered, 18,468; number for money only, 12,861; amount adjudged due, \$9,562,146.48; number of decrees, 4,713; average amount of judgments, \$773.57. Compared with 1874, it shows 1,808 increase in the number of civil judgments rendered, and an increase in amount of \$1,023,827.48.

The reports of the probate judges show that 1,288 persons (665 males and 623 females) were sent to the insane asylums during the year ending March, 1875. These reports show an increase, compared with 1874, of 153 males and 117 females: total increase, 270.

The Adjutant-General reports a settlement with the United States, under the act of Congress approved March 3, 1875, whereby the State received a credit on its arms and ordnance account of \$149,800.05, which settled all the indebtedness of the State to the United States for arms drawn in 1863, and placed to the credit of the State the sum of \$44,771.14 in arms, upon which requisitions have been made for improved arms to the amount of \$44,330. These arms have been distributed among the

military companies of the State, and place them, as far as equipment is concerned, in an excellent condition. All of the State war claims that were supposed to be collectible under the laws of Congress were presented to the United States previous to the year 1874. The total amount of these claims was \$3,235,183.51, all of which were presented as valid accounts against the United States. Of this sum, the United States had paid \$2,959,194.69, leaving a balance outstanding, November 15, 1875, of \$275,984.82, on which there was paid, December 27, 1875, the sum of \$5,578.27, on special settlement forwarded by the Adjutant-General, February 27, 1875, leaving a balance yet unpaid of \$270,406.55. This amount consists in claims that are disallowed or suspended for want of proper evidence which it is impossible for the State to obtain.

The General Assembly, which met in adjourned session December 1, 1874, continued in session until March 30th. A large number of bills were passed, mostly of a local character. Among the measures enacted were two modifying the liquor laws of the State. One so amended the so-called Adair law as to require notice not to sell liquor to any individual to be filed with the township clerk. The other repealed the local-option clause of the municipal code. Laws were passed authorizing stockholders of railroads and mining companies to vote by proxy; authorizing railroad companies to extend their lines of road beyond their original termini; authorizing railroads to increase their capital stock before commencing their roads; authorizing mining and manufacturing companies to borrow money at eight per cent. interest; making all checks, bills, and drafts, drawn on banks and bankers, payable without grace; extending the jurisdiction of justices of the peace under the water-craft lien law to three hundred dollars; prescribing penalty of a fine of not less than fifty dollars against school boards for refusing to levy tax to a sufficient amount to maintain schools six months in each year; providing for the appointment by the State School Commissioner of special commissions to examine into any alleged default or misfeasance of local schools and officers; providing for teaching industrial pursuits in children's homes; providing that inmates of orphan asylums may become wards of such institutions upon the neglect for six months of parents to provide for them; providing for vagrant and mendicant children (street minstrels); providing for an inquest of lunacy on persons convicted of crime, and suspension of execution of the lunatics; prescribing proceedings for the extradition of alleged fugitives from justice; providing for the appointment of trustees of minors, idiots, lunatics, and imbeciles, residing out of the State and having property in the State; punishing rape upon a child under twelve years of age with imprisonment for life; amending the law of divorces and alimony so as to allow the wife a support pending an appeal

to the District Court; providing for the suppression of tramps, vagrants, and common beggars; providing for the appointment of three commissioners learned in the law to revise and consolidate the General Statutes of Ohio; granting the consent of the State of Ohio to the Government of the United States to acquire land within the State of Ohio, needed for the improvement of the navigation of the Ohio River; authorizing the giving sectarian instruction in matters of religion in penal and reformatory institutions. The last-named law filled so large a space in the political history of the State during the year that its full text is here given:

SECTION 1. *Be it enacted* etc., That as liberty of conscience is not forfeited by reason of conviction for crime, or by reason of detention in any penal, reformatory, eleemosynary institution, or any house of refuge, workhouse, jail, or public asylum in this State, no person in any such institutions shall be compelled to attend religious worship or instruction of a form which is against the dictates of his or her conscience; and it shall be the duty of every director, trustee, superintendent, or other person having in charge any such institution, to permit ample and equal facilities to all such persons for receiving the ministrations of the authorized clergymen of their own religious denomination or persuasion, under such reasonable rules and regulations as the trustees, directors, managers, or superintendent shall make, but no such rules shall be made as to prevent a clergyman of any denomination from fully administering the rites of his denomination to such inmates; provided such ministrations entail no expense on the public Treasury.

The bill was originally introduced into the Legislature by Mr. Geghan, a representative from Cincinnati, and thus became known as the "Geghan bill." As introduced it was of much greater length than given above. While the measure was pending a letter from Mr. Geghan to a friend was made public, in which the bill was spoken of as an act of justice to the Roman Catholic Church, of which both the writer and the receiver of the letter were members, and its passage urged as a debt due by the Democratic party, then in the majority in the Legislature, to the party members of that faith. At the same time the Cincinnati *Catholic Telegraph* published one or two articles demanding the passage of the bill. These facts arrayed the Republican members against the bill, which was passed by a party vote, and immediately on the adjournment of the Legislature it was made an issue in the political canvass at once commenced. The closing days of the session were much disturbed by proceedings in regard to some local legislation. Charges were made that members were bribed on the matter of the proposed removal of the county-seat of Wood County, and an investigation was had, which ended in finding that irregularities had taken place, but no further steps were taken.

The political campaign opened early. The Prohibition Convention was held at Columbus, February 24th, and the following ticket placed in nomination: For Governor, J. Odell, of Cleveland; Lieutenant-Governor, H. A. Thompson, of Franklin County; Auditor of

State, Delmont Locke, of Lawrence County; Treasurer of State, Edward C. Young, of Champaign County; Judge of Supreme Court, David C. Dwight, of Montgomery County; Attorney-General, S. E. Adams, of Cleveland; Member of Board of Public Works, John R. Butchel, of Summit County.

The following was the platform adopted:

Resolved, That we reaffirm and approve the national platform.

Resolved, That the manufacture, importation, and sale of alcoholic liquors, as a beverage, is a crime of enormous magnitude, being greatly detrimental to the peace and welfare of the people. Because—

1. Multitudes of our countrymen, not less, probably, than 60,000, perish every year under the effects of the poison made and sold.

2. Many of the victims are led by the poison, from which they are slowly dying, to rush in their frantic or morally weakened state into other crimes of every sort and degree of aggravation.

Whereas, We have no law against this crime of crimes, and parent of crime—our so-called laws being mere regulations as to persons on whom, or when, or where, the evil deeds may be done: therefore—

Resolved, That common justice, the welfare of the community, and even the permanence of our civil, moral, and religious institutions, demand direct legislation against the manufacture and sale of alcoholic drinks—as a crime, and that the severity of the laws enacted should correspond with the enormity of the offense.

Resolved, That, since the laws are enacted by the legislators, who are elected by the people through party combinations, and since all other political parties are opposed to the very idea of treating this great evil directly as a crime, a distinct Prohibition party is a necessity.

Resolved, further, That the doctrine of equal rights is a reality, and hence that all the people, male and female, are equally entitled to the right of choosing the business or avocation they would pursue in life, and also to a voice in legislation, and other public affairs, through the ballot-box.

Resolved, That, as far as possible, legislators, judges, executive officers, and especially the President and Vice-President of the United States, and United States Senators, should be elected directly by the people.

Resolved, That all class legislation is inconsistent with equal rights, and should not be tolerated in our country, glorying, as she does, in her Declaration of Independence.

Resolved, That when Prohibitionists have nominated their own candidates, they should, in the judgment of this convention, give them united and unwavering support at the polls, for real success can appear only in the elevation or election of open and avowed candidates.

Resolved, That enforced education of the youth of our land, who, by the wrong or neglect of parents and guardians, are excluded from the benefits of our free-school system, and especially of the freedmen of the South, is demanded by the highest interests of the people.

Resolved, In view of the fact that our cities are enslaved by the liquor-traffic, and the hope of the nation must be in the better moral condition of the people of the country; we therefore ask also the co-operation of all our farmers to secure such laws as will tend to the suppression of this traffic, and to advance the material interests of the State.

Resolved, That the women of Ohio have achieved much in the preparation of the public mind for the legal suppression of the liquor-crime, and we invite their continued co-operation in the prosecution of this great work.

The Republican Convention was held at Columbus, June 2d. The following ticket was placed in nomination: For Governor, Rutherford B. Hayes, Sandusky County; Lieutenant-Governor, Thomas L. Young, Hamilton County; Judge of Supreme Court, George W. McIlvaine, Tuscarawas County; Auditor, James Williams, Franklin County; Attorney-General, John Little, Greene County; Treasurer, John M. Millikin, Butler County; Member of Board of Public Works, Peter Thatcher, Cuyahoga County.

The following platform was adopted:

The Republicans of Ohio, in convention assembled, reaffirming the cardinal principles of their organization, which have become received maxims of policy, State and national, declare on specific points the series of sentiments following:

1. The States are one as a nation, and all citizens are equal under the laws, and entitled to their fullest protection.

2. That policy of finance should be steadily pursued which, without unnecessary shock to business, or trade, will ultimately equalize the purchasing capacity of the coin and paper dollar.

3. We favor a tariff for revenue, with incidental protection to American industry.

4. We stand by free education, our public-school system, the taxation of all for its support, and "no division of the school-fund."

5. Under our republican system of government, there should be no connection, direct or indirect, between Church and state, and we oppose all legislation in the interest of any particular sect. Upon this subject we should not fail to profit by the experience of foreign governments, where the efforts of the Church to control the state constitute an evil of great magnitude, and endanger the power and prosperity of the people.

6. We demand such a revision of the patent laws as will relieve industry from the oppression of monopolies in administration.

7. A grateful people can never cease to remember the services of our soldiers and sailors, and it is due to them that liberality and generosity should obtain in the adjustment of pay and bounties.

8. That we demand that the public domain shall be scrupulously reserved for occupancy by actual settlers.

9. The determination of the Government to collect the revenue, and prevent and punish frauds, has our unqualified approval.

10. That the power of municipal corporations to create debts should be restricted, and local and other expenditures should be so reduced as to diminish taxation.

11. The observance of Washington's example is retiring at the close of a second presidential term will be in the future, as it has been in the past, regarded as a fundamental rule in the unwritten law of the republic.

The distinguished success of his Administration, which to the fame of the patriot and soldier has added that of the capable and judicious statesman, entitles President Grant to the gratitude of his countrymen.

The Democratic Convention met at Columbus, June 17th. Governor Allen was renominated by acclamation, and the full ticket nominated was as follows: For Governor, William Allen, of Ross County; for Lieutenant-Governor, Samuel F. Cary, of Hamilton County; for Auditor of State, Edward M. Green, of Shelby County; for Treasurer of State, John Schreiner, of Meigs County; for Attorney-

General, Thomas E. Powell, of Delaware County; for Judge of Supreme Court, Thomas Q. Ashburn, of Clermont County; for Member of Board of Public Works, H. E. O'Hagan, of Erie County.

The following platform was adopted:

The Democratic party of Ohio, in State Convention assembled, proclaim the following propositions of political faith and action:

1. A sacred adherence to the principles of government declared and put in practical operation by the fathers of the republic.

2. Opposition to aggressions, by either department of the Government upon the functions of the others, and to the exercise by Federal authority of any of the powers reserved by the Constitution to the States respectively, or to the people.

3. The protection of the Government to all citizens, without regard to race, color, or previous condition of servitude.

4. The President's service should be limited to one term, at a salary of \$35,000 a year.

5. Retrenchment and reform in every department of Government—Federal, State, and local.

6. No grants of land or money by the Government, or use of its credit to railroad, steamship, or other companies.

7. The preservation of the remnant of public lands for the benefit of citizens of the United States, and foreign immigrants who have declared their intention to become such, who will occupy and cultivate the same.

8. That the contraction of the currency heretofore made by the Republican party, and the further contraction proposed by it, with a view to the forced resumption of specie payment, has already brought disaster to the business of the country, and threatens it with general bankruptcy and ruin. We demand that this policy be abandoned, and that the volume of currency be made and kept equal to the wants of trade, leaving the restoration of legal tenders to par with gold to be brought about by promoting the industries of the people, and not by destroying them.

9. That the policy already initiated by the Republican party, of abolishing legal tenders and giving national banks the power to furnish all the currency, will increase the power of an already dangerous monopoly, and the enormous burdens now oppressing the people, without any compensating advantage. And that we oppose to this policy the demand that all the national-bank circulation be promptly and permanently retired, and legal tenders issued in its place.

10. That public interest demands that the Government should cease to discredit its own currency, and should make its legal tenders receivable for public dues, except where respect for the obligation of contracts requires payment in coin; and that we favor the payment of at least one-half of the customs in legal tenders.

11. The extinction of the present national banks, and the establishment in their stead of a system of free banks of discount and deposit, only under such regulations as the States may respectively prescribe. And no paper currency except such as may be issued directly by and upon the faith of the General Government.

12. A tariff for the sole purpose of revenue.

13. We favor the complete separation of Church and state; religious independence and absolute freedom of opinion; equal and exact justice to all religious societies; and purely secular education at the expense of the tax-payer, without division among or control by any sect, directly or indirectly, of any portion of the public-school fund.

In view of the admirable provisions of our State constitution upon these subjects, which are due to

the energy and wisdom of the Democratic party, we denounce the Republican platform as an insult to the intelligence of the people of Ohio, and a base appeal to sectarian prejudices.

14. That we are opposed to the passage of what are called sumptuary laws, or any interference with social habits or customs, not in themselves criminal, and we reprobate any espionage by one class of citizens upon another, under any pretense whatever.

With this declaration of principles and policy, we arraign the leaders of the Republican party for their extravagant expenditure and profligate waste of the people's money; for their oppressive, unjust, and defective system of taxation and finance; for their continued tyranny and cruelty to the Southern States of the Union; for their squandering of the public lands; for their continuance of incompetent and corrupt men in office, at home and abroad; and for their general mismanagement of the Government. And we cordially invite all men, without regard to past party associations, to cooperate with us in expelling them from power, and in securing such an administration of public affairs as characterized the purer and better days of the republic.

The political campaign was an exceedingly hot and bitter one, and the active work covered a much longer period than is ordinary in a State election. The result was as follows:

GOVERNOR.

Rutherford B. Hayes, Republican.....	297,517
William Allen, Democrat.....	262,378
Jay Odell, Prohibition.....	2,568

LIEUTENANT-GOVERNOR.

Thomas L. Young, Republican.....	297,281
Samuel F. Cary, Democrat.....	237,990
H. A. Thompson, Prohibition.....	2,800

AUDITOR OF STATE.

James Williams, Republican.....	296,505
Edward M. Green, Democrat.....	292,271
Delmont Locke, Prohibition.....	2,893

TREASURER OF STATE.

John M. Millikin, Republican.....	296,677
John Schreiner, Democrat.....	292,714
Edward C. Young, Prohibition.....	2,196

ATTORNEY-GENERAL.

John Little, Republican.....	296,868
Thomas E. Powell, Democrat.....	292,487
Samuel E. Adams, Prohibition.....	2,157

JUDGE OF SUPREME COURT.

George W. McIlvaine, Republican.....	296,944
Thomas Q. Ashburn, Democrat.....	292,823
David C. Montgomery, Prohibition.....	2,118

BOARD OF PUBLIC WORKS.

Peter Thatcher, Republican.....	296,901
Henry E. O'Hagan, Democrat.....	292,067
John R. Buchtel, Prohibition.....	2,252

At the same election two additions to the constitution were voted upon. One authorized the creation of a commission "to dispose of such part of the dockets of the Supreme Court as shall, by arrangement between said commissioners and said court, be transferred to such commission." This was adopted by a vote of 389,076 for the commission to 98,561 against. The other proposed addition was to authorize a tax on dogs. This failed of adoption, not receiving a majority of all the votes cast at the election. The vote stood: for the tax, 278,005; against, 78,801. The total vote cast at the election was 595,248.

A Legislature was elected at the same time, with the following result:

PARTIES.	Senate.	House.	Joint Ballot.
Republicans	30	65	85
Democrats	17	45	62
Republican majority.....	8	20	23

OLD CATHOLICS. In Germany, the Old Catholic Church held its second Synod from May 18th to 22d, under the presidency of Bishop Reinkens. Prof. Langen, of Bonn, submitted reports on a "Manual of Christian Doctrines" and a "Catechism," which have been prepared for general introduction into the Old Catholic congregations. The draft of a German liturgy which had been prepared was recommended to the congregations, and the Synod of 1876 will take action on its definite and obligatory introduction. The Synod declined to pass resolutions in favor of abolishing priestly celibacy, but postponed the question to a future Synod. Of the members of the standing committee, Profs. Knoodt, Schulte, Michelis, Friedrich, and Cornelius, were reelected; among the new members is the Mayor of Carlsruhe. A resolution was passed to publish an address, drawn up by Bishop Reinkens, to all priests sympathizing with the Old Catholic movement, urging them to give in their public adhesion. The statistical report, drawn up by Prof. Schulte, gave the following account of the condition of the Church in Germany:

STATES.	Congregations.	Adult Male Members.	Persons.
Prussia.....	89	4,580	13,765
Baden.....	35	4,371	14,968
Hesse.....	8	319	694
Bavaria.....	24	3,505	10,189
Oldenburg.....	1	91	193
Württemberg.....	1	57	102
Total.....	99	14,766	44,836

The report stated that these figures did not exhibit the full strength of the Old Catholics. Several lists of Old Catholic congregations were received after the report had been closed. In Prussia only those places have been registered where congregations have been fully organized; in Baden, only the communities which have been fully recognized by Bishop Reinkens (besides which there are some twenty places with Old Catholic societies), and in Bavaria only those places which had sent in lists of members. Moreover, quite a number of the lists were defective. Compared with 1874, the report showed an increase in membership of 4,151, and in total population of 9,803. In Prussia, eleven parishes are organized, and twenty-two priests at work. In Baden, twenty Old Catholic communities have been recognized by the state, and in several places the Old Catholics, constituting a majority of all the Catholic voters, have been put in possession of the parochial church property, according to the law of Baden. The number

of priests at work was sixteen. The total number of Old Catholic priests in Germany was fifty-three, against forty-one in 1874; and the number of Old Catholic students of theology at the University of Bonn was eleven.

The absence of Dr. Dollinger from this, as well as from the first Old Catholic Synod, held in 1874, was noted. The report that he had ceased to sympathize with the movement was, however, contradicted by himself, and he was not only present, but presided, at the new union conference between Old Catholic, Oriental, and Anglican theologians, held at Bonn from August 12th to 16th. It was chiefly ascribed to his influence that an understanding with the Greek Church on the doctrine of the procession of the Holy Ghost was reached. (See GREEK CHURCH.)

The usual Old Catholic Congress, which was to be held at Breslau, did not take place. The reasons assigned for this by the local committee were chiefly the inability of most of the prominent lay-members of the Church to be present.

The Old Catholic congregation in Switzerland made some further progress in shaping the national constitution of their Church, for which they preferred the name of Christiana Catholic, but, at the close of the year, no bishop had been elected. In the cantons of Berns and Geneva, nearly the entire property of the Catholic Church has, in virtue of the new ecclesiastical laws of those cantons, passed into the hands of the Old Catholics, although the majority of the Catholic population shows itself decidedly opposed to it. In the canton of Berne, an Old Catholic faculty of theology has been established in connection with the University of Berne. Even the Government of one of the Catholic cantons, Soleure, continues to favor the movement. The progress of the movement was considerably damaged by a split between the moderate and the radical parties in the Church, the latter obtaining control of church affairs in Geneva.

In Austria, the Lower House of the Reichsrath showed its appreciation of and sympathy with the movement, by adopting a bill, regulating the legal condition of the Old Catholics without requiring a formal secession from the Catholic Church. The Upper House refused to concur in the adoption of the bill; but the Government promised that it would remove all former obstacles to the formation and recognition of the Old Catholic congregations. Relying on this promise, the leaders of the movement convoked an assembly of all the Old Catholic congregations of the empire to meet at Vienna in February, 1876.

The Old Catholics of Italy effected a national organization on May 1st, when they met in general assembly at Naples. The assembly elected by 2,789 votes, mostly cast by proxy, Monsignor Dominico Panelli, Archbishop of Lydda, in *partibus infidelium*, as first bishop of the Old Catholic Church of Italy. Among

the members of the convention were deputies of the national Parliament, members of the bar, priests, literary men, and numerous representatives of the working classes. The movement at this time was confined to Southern Italy, having societies in Naples, Salerno, Foggia, Bari, Palermo, Messina, Syracuse, and many other towns.

In France, Abbé Michaud continued to display a great literary activity in behalf of an Old Catholic movement; but no practical results were attained.

OREGON. The most important public movements in this State during 1875 had reference to the congressional election. Not fewer than four parties were in the field with their candidates. The Democratic State Convention, held in Salem, July 29th-30th, nominated L. F. Lane, and adopted the following resolutions:

The Democratic party of Oregon, in State Convention assembled, proclaim the following propositions of political faith and action:

1. Unflinching devotion to the cardinal principles of republican government, as declared and put into practical operation by the fathers of the republic.

2. The preservation of the General Government in the proper exercise of the powers delegated to it in the Constitution, carefully and strictly construed, and the maintenance, inviolate of the several States of the Union in all their rights, dignity, and equality, as the most competent and reliable administration for their own domestic concerns, and the surest bulwark against the tendency toward a centralized despotism.

3. Opposition to aggressions by either department of the Government upon the functions of any other, and to the exercise by Federal authority of any of the rights or powers reserved by the Constitution to the States respectively, or to the people.

4. That every attempt on the part of the Federal Government to exercise any powers not delegated to it, and especially every interference by the Government, or any of its departments, with the local affairs of any State, or with the rights of the people thereof to choose their own representatives, is an act of usurpation which should be repudiated and condemned by every friend of constitutional liberty.

5. We demand retrenchment, reform, and the most rigid economy in the administration of every department of the Government; the honest payment of the debts, the sacred preservation of the public faith; strict accountability of all officers, and the speedy and impartial arraignment of all abuses of public trust before the tribunals of justice; a zealous care of the rights of election by the people; the absolute subordination of the military to the civil authority. The equal and impartial administration of the laws, and the protection of the rights of all; freedom of religion, of the press, and of the person, under protection of the *habeas corpus*, and trial by juries impartially selected.

6. We protest against the burdens of a protective tariff, as needless exactions from a people already intolerably oppressed by a national debt, and we insist that the tariff be so regulated as to provide only sufficient revenue for an economical administration of the Government, and not for the purpose of enriching the few at the expense of the many, or fostering one branch of industry to the detriment of another.

7. That the precious metals are the only basis of commercial values; that an irredeemable paper currency is a national curse, and we insist upon the speedy return by the national Government to specie payments.

8. The institution of the system of national banks was a fraud upon the country and an injustice upon the laboring classes, and we demand such prudent legislation as will gradually bring this vicious system to a close; that all currency which may be issued shall be convertible into coin upon demand, and be issued directly by the Government.

9. That the treaty between the United States and China shall be so modified as to apply solely to commercial relations.

10. That we condemn the party in power, not only for its contempt of constitutional obligations, but for extravagant, partisan, and corrupt administration of the Federal Government; for its reckless expenditure and profligate waste of the people's money; for its oppressive, unjust and defective system of finance and taxation; for the perversion of the functions of the General Government to enrich the great corporations at the expense of the people; for the jobbery and frauds which have brought reproach upon democratic institutions; for the iniquities of the protective system; for the curse of an inconvertible paper-money; for its disgraceful diplomatic service and unfit appointments and continuance in office of incompetent and corrupt men at home and abroad; for its attempt to pass an unconstitutional force bill, and for a catalogue of other enormities which have rendered that organization offensive to and subversive of the liberties of a free people.

11. That corporations are the creatures of law; their functions and privileges are granted to subserve the public interests; and when they are not used for the object of their creation, but for purposes of oppression and extortion, we declare it to be the right and duty of the legislative power to regulate and control such corporations for the public good.

12. That we disapprove all measures in the interest of monopolies against labor, and therefore we approve of the declared principles and sympathize with the avowed objects of the order known as the Patrons of Husbandry, and with those of all other orders having for their object retrenchment and reform in public affairs and the social advancement of the people.

13. That we are in favor of laboring to secure judicious appropriations from Congress for the purpose of improving our harbors along the western and northern boundaries of our State, and we demand that our Representatives in Congress shall use their best efforts to secure the aid of the General Government for the free navigation and improvement of the Columbia River, by the construction of locks at the Cascades; the improvement of the Willamet and Coquille Rivers; the construction of the Portland, Dalles & Salt Lake, and Winnemucca Railroads, and the early completion of the Oregon & California Railroad from Roseburg to the State line.

14. That the policy of the Republican party in dealing with the Indian tribes is impolitic and unwise; that the time has arrived when the few Indians now occupying the Umatilla, Grand Ronde, and Siletz reservations should be removed to some other locality, and thus be opened up to settlement by the whites some of the richest portions of the State.

15. That we invite the hearty cooperation of all persons, whatever may have been their past political affinities, to unite with us in carrying out the principles herein enunciated.

The Independent State Convention was assembled in Salem, August 10th, and nominated for Congress George M. Whitney, of Lane. The platform adopted was as follows:

Resolved, 1. That there is just cause for alarm in the extravagance and profligacy prevalent in our government—both State and national administrations; and we congratulate the people of this State

upon the great reduction of taxation and expenses, brought about through the agency of the Independent movement, and we demand the adoption of a similar policy of retrenchment on the part of the General Government.

2. That we favor a return to specie payment at the earliest practical moment.

3. That the election of any man to the presidency of the United States for three successive terms would be a violation of the traditional sentiments of the republic, and we utterly condemn any and all third-term schemes.

4. That we demand the repeal of the act doubling the salary of the President.

5. That we pledge the nominee of this convention to labor for Government aid for opening up and improving the rivers and harbors of our State, especially the Coos Bay road, Port Orford Harbor, the Columbia, Willamette, and Coquille Rivers, and the construction of locks at the Cascades of the Columbia; and also for the extension of public surveys to accommodate the advancing settlements of our State.

6. That we favor the adoption of all reasonable measures for securing cheap transportation, and to this end we pledge the nominee of this convention to labor for aid for the construction of the Portland, Dalles & Salt Lake Railroad, and the Winnemuca Railroad; that the interests of the State demand the completion of the Oregon & California Railway to the southern boundary of the State, the extension of the Oregon Central Railway to Junction City and to Astoria, and the construction of the Corvallis & Yaquina Bay Railway; and we favor the construction of a wagon-road along the south bank of the Columbia River from the mouth of the Sandy to the Dalles.

7. That corporations, like individuals, should be in subjection to law, and the rates of freights and fares are proper matters for legislative control.

8. That we regard with favor the increasing interest manifested by the industrial classes in favor of retrenchment and reform in public affairs.

9. That we demand that this State be reimbursed by the general Government for the expenses incurred on account of the Modoc War.

10. That we oppose any division of the public-school funds for sectarian purposes.

11. That none but honest, moral, and sober men should be permitted to fill any positions of honor or trust.

The Republicans assembled in convention at Salem, August 11th, nominated Henry Warren, and passed the following resolutions:

Resolved, 1. That the Republicans of Oregon declare unalterable adherence to the indissoluble union of the States; sovereignty of the Federal Government in the functions assigned it by the Constitution; rights of the States, and equality of all men before the law.

2. That we approve of the present Republican national Administration, and especially the efforts to prevent and punish fraud, expose past violations, and to guard against their occurrence in the future.

3. That we endorse the policy of adjusting difficulties between this and foreign nations by arbitration instead of war.

4. The Republican party of Oregon oppose a third presidential term, and believe that President Grant's letter to General White fairly removes that issue from politics.

5. That gold and silver are the only reliable legal tender, and a currency convertible into coin should therefore be gradually attained, and we are in favor of resumption of specie payments as soon as it is practicable to do so without disturbing the business interests of the country.

6. We demand that the patent laws be modified

and revised, to relieve industry from the oppression of monopolies.

7. We demand that all railways and other corporations shall be held in fair and just subjection to the law-making powers constitutionally exercised.

8. We condemn the corruption and extravagance of the present Democratic State administration.

9. We demand of our representation in Congress their best efforts to secure aid from the General Government for the free navigation of the Columbia by building locks at the Cascades and the Dalles, and a wagon-road from Sandy to the Dalles; the improvement of the Willamette, Coquille, and Rogue Rivers; the erection of a breakwater at Port Orford; the construction of the Portland, Dalles & Salt Lake and Winnemuca & Yaquina Bay Railroads, and the early completion of the Oregon & California Railroad from Roseburg to Redding, the west side road from St. Joe to Junction, and also the extension of the public surveys to meet the wants of the increasing population of the State, and the construction of a wagon road from Ashland by Link River, Langell Valley, and Goose Lake, to the eastern State line.

10. That we are in favor of opening up the Umatilla and Siletz Indian reservations for public settlement.

11. That we are in favor of maintaining our present free-school system, and of increasing its efficiency, and are opposed to any division of the public-school moneys for sectarian purposes.

12. We cordially invite all persons opposed to the restoration of the Democratic party to power in the nation to forget all past political differences, and unite with the Republican party in maintaining the cause of true reform.

The election resulted in the success of the Democratic nominee, the vote being as follows: Lane, Democrat, 9,378; Warren, Republican, 9,106; Whitney, Independent, 837; Dimmick, Temperance, 345.

The woman's rights movement in Oregon is one of considerable importance. A three days' session of the third annual Woman's Suffrage State Convention was held in Portland, in February. The aims of this party are indicated in the following resolutions which were adopted:

Whereas, Political power has rested and still does rest solely with our legislative bodies, who are supposed to represent the sentiments of their constituents; and—

Whereas, It has seemed to those who are interested in the accomplishment of woman suffrage as a necessity of vital importance that an appeal to those bodies is the only means of obtaining the desired result; therefore, be it

Resolved, By this association, that woman suffragists should continue, as heretofore, to appeal to those to whom the making of the laws is intrusted, as the only potent means in their power for the accomplishment of the cause they so earnestly represent, hoping for a favorable decision; feeling assured that the men composing the legislative assemblies will not long be blind to their own interests by closing the doors of justice against one-half of the citizens of this State.

Resolved, That the thanks of this association are due, and are hereby tendered, to the members of our recent legislative assembly who so ably and earnestly advocated our cause in the face of ridicule and opposition, thereby rendering their names illustrious in the annals of the State as fearless champions of political equality.

The fourth anniversary of the Oregon State Temperance Alliance was held in Salem in

February, and was attended by a large number of the friends of the temperance cause. Their views as to political organization were set forth in the following preamble and resolutions:

Whereas, Dishonesty, fraud, and corruption, within the few past years have seriously endangered the prosperity if not the very existence of our nation; and—

Whereas, We believe that the liquor-business has been a chief instrument in this mischief by corrupting the ballot-box; and—

Whereas, This thing is admitted by the most intelligent of our nation everywhere, so that wrongs are acknowledged generally where they exist, by those holding office and power; and—

Whereas, The people of our State and nation are clamoring for reform in every department of the Government; and—

Whereas, The object to be sought can only be successfully reached by the united and consolidated co-operation of all the temperance people throughout the United States: therefore—

Resolved, That we believe the interest of the temperance cause demands that we unite for political action upon thoroughgoing temperance candidates, of whatsoever party, who are trustworthy, honest, and competent men, for all offices elected by the people.

That with the aforementioned qualification in candidates for office, we leave political party preferences to be voted for by the temperance voters according to their convictions of propriety, but making temperance, in the widest and fullest sense, the supreme bond of union with all temperance voters.

That this Alliance appoint a State Central Committee, consisting of one member from each county, which committee shall act in unison with the State Central Committee appointed by the last State Temperance Union.

That at an early date these organizations shall call County and State Conventions for the purpose of making nominations for all elective offices within said counties and State from among their true, tried, and competent temperance men, to be supported at each election by temperance people throughout the State.

Oregon has many advantages as an agricultural State. Western Oregon has a moist and equable climate; Eastern Oregon, one dry and variable. In the former division there are but two seasons, the wet and the dry. The wet season commences about the latter part of November and lasts till March or April, during which drizzling rains and thick mists prevail, though there are many clear days. In the dry season the sky is generally clear, and, though rain is not entirely wanting, very little falls from June to October. The climate of this division varies somewhat in different localities. In the southern portions the dry season is longer and the wet season shorter than in the northern, while in the district west of the Coast Range the atmosphere is more humid than between the Coast and Cascade Mountains. Snow falls occasionally, but seldom to any considerable depth, and generally soon disappears. Ice rarely forms more than an inch or two in thickness, and soon thaws. In some winters flowers bloom in the gardens, even in the northern portion of the Willamette Valley. The nights in summer are always cool, and the heat during the day, seldom extreme, is never oppressive. The Cascade Mountains shut out

from Eastern Oregon the moisture of the Pacific. The temperature here is subject to greater extremes than in the west, but the winters are shorter and milder, and the summers cooler and more equable than on the Atlantic coast. The winter commences late in December, and generally lasts three months. Snow frequently falls to the depth of twelve inches in the valleys, but six inches is the usual depth. In the high mountainous region of Grant County a much greater quantity falls. Ice is formed every winter, but commonly it does not exceed a few inches in thickness. A warm southeast wind is not uncommon, before which the snow speedily disappears. In summer the heat occasionally reaches 100°, but owing to the dryness and rarity of the atmosphere it is not severely felt. Considerable rain falls in spring, but in summer there is little rain and not much dew, though crops do not suffer from drought. In the Klamath Valley, owing to its elevation (4,200 feet), frosts occur every night of the year, and snow lies from three to five months. Thunder, lightning, hail, and heavy winds are rare in Oregon. In most parts of the State cattle are wintered without shelter or prepared food, but loss is suffered in seasons of unusual severity. In Western Oregon the most careful farmers erect sheds to protect their stock from cold rains, and furnish fodder for five or six weeks. The mean temperature of the seasons and year at Port Orford (latitude 42° 40') and Astoria (latitude 46° 10') on the coast, at Corvallis (latitude 44° 30') in the Willamette Valley, and at Dalles (latitude 45° 36') just east of the Cascade Range, is stated by Murphy as follows:

LOCALITY.	Spring.	Summer.	Autumn.	Winter.	Year.
Port Orford.....	52.00°	60.00°	55.00°	47.50°	53.5°
Astoria.....	51.00	61.50	54.00	42.50	52.0
Corvallis.....	52.19	67.18	53.41	39.27	56.0
Dalles.....	58.00	70.50	52.00	35.50	58.0

At Eola (latitude 44° 57'), near Salem, the average mean temperature of the years 1870-'72 was 49.66°, varying from 49.25° to 50.4°; average annual rainfall, 38.62 inches, varying from 37.11 to 40.84 inches; average mean temperature of spring, 47°; summer, 66.1°; autumn, 49.1°; winter, 37.3°; maximum temperature, 83°; minimum, 13°. The annual rainfall at Astoria is stated at sixty inches, and in Eastern Oregon at from fifteen to twenty inches. The climate is generally healthy, and there is no prevailing type of disease. A species of intermittent fever occurs in the low bottoms along some of the water-courses in Western Oregon, but it is mild, and readily yields to treatment. The climate is believed to be beneficial to consumptives, particularly in Eastern Oregon.

The soil in the valleys of the Willamette, Umpqua, and Rogue Rivers, is very fertile. The district west of the Coast Mountains is generally rugged, but along the water-courses and at the mouths of the streams are tracts

adapted to agriculture, which possess a good soil. These valleys are more extensive toward the south. In Eastern Oregon the chief agricultural tracts are along the streams. The most extensive and productive valleys are those of the Grande Ronde, Powder, and Malheur Rivers. On John Day's and Crooked Rivers there are also productive lands. Much of the district belonging to the Great Basin is a desert, covered in the east with sand and sage, and in the west with volcanic ashes and pumice. Lava terraces often rise one above the other to the height of 1,000 feet, and chasms appear on every hand. The only tree is a dwarf pine. Western Oregon, with the exception of the extensive prairie tracts in the Willamette Valley and smaller ones in some of the other valleys, is densely wooded with gigantic forests. This is particularly true of the Coast Range and the region west of it. On the Cascade Mountains the forests extend to the snow-line. While several varieties of deciduous trees occur, the forests consist chiefly of coniferous evergreens. These furnish excellent ship-timber, and several species attain a height of 300 feet, and a diameter of from 8 to 20 feet. The largest tree in Oregon is the redwood, which grows along the shores of the Pacific, and is surpassed in size only by the *Sequoia gigantea* of California.

In Eastern Oregon timber is scarce, except along the streams and on the mountains. The Blue Mountains are well wooded. The principal varieties here are poplar, cottonwood, aspen, birch, willow, etc., on the water-courses; and the larch, pine, fir, cedar, maple, etc., on the mountains. Some species are found in both divisions of the State. Among wild fruits are grapes, cherries, plums, and numerous species of berries, including gooseberries, currants, cranberries, strawberries, and blackberries. In Western Oregon, particularly west of the Coast Range, grass is abundant, owing to the prevalence of moisture, while in the east section the nutritious bunch-grass (*Festuca scabrella*) abounds. The greater part of the State is well adapted to stock and sheep raising. The table-lands of Eastern Oregon may be profitably devoted to this industry. Wheat is the chief crop; its yield is large and its quality excellent. By far the greater portion is raised in the Willamette Valley. The climate and soil are also well adapted to oats and barley. Rye and buckwheat have been little cultivated. Indian corn is not extensively raised, the climate being better suited to the production of the smaller grains. It grows best in portions of Eastern Oregon and in the south valleys between the Coast and Cascade Mountains. Potatoes, peas and beans, cabbages, onions, turnips, carrots, and other root-crops, grow well. Flax grows wild in the vicinity of the Klamath basin. Apples, pears, plums, cherries, and grapes, thrive, and considerable quantities of apples are raised in the Willamette Valley. Prunes are grown in many portions of western

Oregon, and peaches succeed well in the eastern and southern sections of the State. Figs have been successfully grown in the south part of western Oregon.

The rivers of Oregon abound in salmon at the proper seasons; there are several species. Other varieties of fish are the cod, halibut, sturgeon, herring, smelt, etc. Lobsters, oysters, clams, and other shell-fish, are also common. The salmon alone is caught to any considerable extent. There are a number of fisheries near the mouth of the Columbia, and several canning establishments. The total annual value of the salmon-fisheries of the State is estimated at \$1,500,000. Most of the animals, birds, and fishes, as well as the trees and other vegetable productions of Oregon, differ from those of the Eastern States, and are peculiar to the Pacific coast.

The shipments of wheat and flour from Oregon in 1875 were as follows:

To Europe.....	2,141,900 bush.
" San Francisco.....	943,776 "
" British Columbia.....	4,173 "
" Honolulu.....	859 "
Total.....	2,895,138

The shipments of flour were as follows:

To Europe.....	113,588 bbls.
" San Francisco.....	78,335 "
" British Columbia.....	23,673 "
" China.....	2,000 "
" Honolulu.....	1,713 "
Total.....	219,269

Among the shipments of miscellaneous produce were 10,159 bushels of oats, 1,625 boxes of apples, 448 packages of dried fruit, 2,573 cases of bread, 8,928 sacks of mill-feed, 1,965 barrels and 1,619 half-barrels of salmon, and 8,893 cases and packages of salmon.

The present State government is as follows: Governor, Lafayette Grover, Democrat; Secretary of State, S. F. Chadwick, Democrat; State Treasurer, A. H. Brown, Democrat; Superintendent of Public Instruction, L. L. Rowland, Republican.

The Legislature is classified as follows:

PARTIES.	Senate.	House.	Joint Body.
Democrats.....	18	20	23
Republicans.....	11	17	25
Independents.....	6	23	29

OSBORN, SHERARD, a British naval officer, born April 25, 1822; died May 6, 1875. In the Arctic Expedition sent in search of Sir John Franklin, in 1849, he was selected as a volunteer, and was given the command of the Pioneer. He served with distinction in the Black Sea, during the Crimean War. In 1867, in command of the Furious, he took part in the capture of the Tuku forts, and in 1853 navigated the Yang-tse-kiang as far as Hankow, six hundred miles from the sea. In 1863 he was offered by the Emperor of China the absolute command of a squadron, with which to suppress piracy on the coast of China. As the

Emperor did not keep his agreement, Captain Osborn resigned, and again entered the British Navy. He wrote, besides his diary, "The Career, Last Voyage, and Fate of Sir John Franklin" (1860); "The Past and Future of

British Relations in China" (1860); "A Cruise in Japanese Waters" (1859); and "The Fight on the Peiho" (1865). He also contributed a large number of articles to the Journal of the Royal Geographical Society.

P

PALMER, CHRISTIAN VON, a German theologian, born January 27, 1811; died May 29, 1875. He studied at the University of Tübingen, became dean of the principal church in Tübingen in 1851, and in 1852 was appointed professor in the university. He wrote "Evangelische Homiletik" (1842, fifth edition, 1867); "Evangelische Katechetik" (1844, sixth edition, 1875); "Evangelische Pädagogik" (1852, third edition, 1861); "Evangelische Pastoraltheologie" (1860, second edition, 1863); "Die Moral des Christenthums" (1864); and "Geistliches und Weltliches für gebildete christliche Leser" (1873).

PARAGUAY (REPÚBLICA DEL PARAGUAY), a country of South America, comprised between latitude 21° 57' and 27° 30' south, and longitude 54° 33' and 58° 40' west. It is bounded on the north and northeast by Brazil, on the southeast, south, and southwest, by the Argentine Republic, and on the northwest by Bolivia.

Detailed information respecting the territorial extent,* population, etc., will be found in the *ANNUAL CYCLOPEDIA* for 1874.

The President of the Republic is Señor Don Juan Bautista Gil, in office since November 25, 1874. The Vice-President is Señor Don Higinio Uriarte, and the cabinet is composed of the following ministers: Interior, Señor Don G. Serrano; Foreign Affairs, Dr. F. Machain; Finances, Señor Don E. Gil; Justice and Public Worship, General B. Caballero; and War, General P. Escóbar.

The army, with a strength of 2,000 men, comprised two battalions of infantry, one regiment of light artillery, and two regiments of horse; but, owing to the embarrassed condition of the national finances, the strength has, according to report, been reduced to four hundred men.

The amount and various branches of the national revenue, and of the national expenditure, are shown in the following tables:

REVENUE.

Custom-house receipts.....	\$563,456
Stamped paper.....	21,568
Licenses.....	12,958
Post-office.....	1,788
Sale of Government lands.....	203,649
Sundries.....	53,894
Total.....	\$856,713

EXPENDITURE.

Legislative Chambers.....	\$101,487
Ministry of the Interior.....	499,721
" of Foreign Affairs.....	58,535
" of Public Worship, etc.....	81,737
" of Finance.....	91,736
" of War.....	815,128
Foreign debt.....	1,235,586
Home debt.....	160,693
Incidental expenses.....	27,573
Total.....	\$3,172,130
Deficit.....	\$2,315,417

In the estimated budget for 1875, the expenditure, exclusive of the expenses of the legations at Rio de Janeiro and London, the interest on the home and foreign debts, the maintenance of the army, etc., stood as follows:

Legislative Chambers.....	\$64,080
Executive, etc.....	45,180
Ministry of the Interior.....	110,280
" of Foreign Affairs.....	9,200
" of Finance.....	42,964
" of Public Worship, etc.....	108,776
" of War.....	53,906
Total.....	\$453,286

In view of the enormous deficit resulting from the comparison of the above tables of the revenue and expenditure for 1874, it will not be regarded as matter of surprise that the legislative body, before closing its session, on January 23, 1875, and after having signified its approval of the foregoing budget of expenditure, authorized the issue of \$2,500,000 Paraguayan consols.

An article published in an Asuncion newspaper early in the year, and reproduced in part by a London sheet in May, represented the financial and commercial condition of the republic not only as unfavorable at the time, but likely to become still worse before long—utter impoverishment of the country; absolute emptiness of the coffers of the Treasury; absence of credit upon which to raise elements of relief; an insignificant foreign commerce; and people devoid of enterprise. In view of such a state of national penury, the Paraguayan writer loudly protests against the maintenance of a costly and useless diplomatic agency in London.

Some foreign journals echoed the report of a proposed reduction of the number of representatives to ten and of senators to five.

In the matter of the foreign debt, which weighs so heavily upon this distracted republic, and a full statement of which is contained in the *ANNUAL CYCLOPEDIA* for 1874, nothing of particular interest transpired during the year.

* In the time of Lopez, Paraguay was divided into twenty departments.

That the foreign commerce, though still insignificant, as has been observed above, and far inferior to what it might be were the capabilities of the country taxed to the full, is certainly on the increase since the determination of the disastrous five years' war of 1865-'70, no clearer proof can be adduced than the fact that the custom-house receipts have more than quintupled in the quinquennial period 1870-'74, as follows:

Years.	Amounts.
1870.....	\$105,720
1871.....	320,202
1872.....	338,574
1873.....	428,543
1874.....	568,456

The total value of the exports for the year 1873 was \$1,100,160; the chief staples shipped having been as follows: *yerba maté* or Paraguayan tea (*Ilex Paraguayensis*), 4,537,775 pounds, \$635,000 (or rather over seven cents per pound); tobacco, \$224,544; cigars, \$466,616; skins, \$134,000; hides, timber, etc.

The commodities comprising the imports for

the same year are, with their respective values, exhibited in the subjoined table:

Commodities.	Value.
Cotton fabrics.....	\$270,542
Fancy goods.....	269,716
Clothing.....	113,815
Wine.....	86,408
Sugar, etc.....	525,907
Total.....	\$1,147,863

The foregoing totals, if correct, would show the foreign trade to have so far recuperated since 1870 as to compare favorably with that of 1862, one of the most prosperous years before the war, as follows:

BRANCHES.	1872.	1862.
Exports	\$1,100,160	\$1,500,240
Imports	1,147,683	1,224,174
Total foreign trade.....	\$2,247,843	\$2,724,414

Mr. Keith Johnson says:

Yerba maté, or Paraguay tea, the staple product of the country, is derived from the twigs and leaves of a bushy evergreen tree, scattered, more or less

ASUNCION.

thickly, through the wild forests of the central Cordillera from north to south. The districts in which it is most abundant are hence termed *yerbales*, and are named from their locality; the most important are those of Chiriguano and Tacurupytá, in the extreme north; of Concepción, at the head of the Ypané; of Rosario and San Pedro, in the basin of the Xexuy; of Caaguazú and Tacurupytá, on the shed to the Paraná; and of Yuti and Jesus, in the south. The yerba-trade is a government monopoly. Having obtained a concession, the yerba speculator may take his gang of peons to any chosen yerbal: there he settles down during the time that the trees are in season, or for the six months of spring and summer. The processes of gathering the twigs and leaves, drying these over a fire, and afterward beating them into small fragments, and packing the tea thus prepared in hide bags, are simple and rude in the extreme. At the present time yerba is not a cultivated

product in any part of Paraguay. In former times, however, the Jesuit missionaries, recognizing the great advantages of having the yerba close at hand, made large plantations of the tree about the southern reductions; and at Santiago, it is said that a grove of not less than twenty thousand yerba-trees flourished at the end of last century. It is surprising that, considering the value of the product to Paraguay, no subsequent efforts have been made to extend the cultivation of yerba; but it is probable that the tree yields a finer tea in its native state and habitat than when cultivated, as the maté of the missions was not considered superior. The trees of the far northern yerbales yield a finer tea than those of the south of Paraguay, and the maté of Chiriguano is reported the best of all. From the difficulty of access to this remote yerbal it has never been worked, and the maté of trade is chiefly derived from the districts of San Pedro and Rosario.

The yerbaes are said to occupy an area of some 3,000,000 acres. The value of the tea exported in the time of Lopez never exceeded \$800,000 per annum, when it was sold to foreign purchasers at the rate of about \$3.00 per twenty-five pounds. But the trade is now much more profitable, since the article, though having risen to fifty cents per pound in Buenos Ayres, is more extensively exported than ever. Most of the arable land is under cultivation; but, for lack of hands and proper instruments, the tillage is far from being perfect.

The chief cultivated products, and the extent of land devoted to them respectively, in 1863, were as follows:

Products.	Acres.
Maize.....	940,000
Mandioca.....	110,000
Beans.....	75,000
Cotton.....	83,000
Tobacco.....	23,000
Sugar-cane.....	25,000
Mani.....	11,000
Rice, vegetables, etc.....	84,000
Total.....	550,000 *

The tobacco of Paraguay yields three crops every year, and is largely consumed within the republic, where people of both sexes and of all ages smoke almost incessantly. The home consumption of this article in former years was estimated at fifteen million pounds annually, and the exports at six million pounds. A gold medal was awarded for Paraguay tobacco at the Paris Exhibition of 1855. Cigars are extensively manufactured for export, mainly to Buenos Ayres.

Little or no wheat is produced; maize, often yielding one hundred and fifty for one, and mandioca, of which there are whole farms in many districts, are the chief articles of food used by the inhabitants.

Public instruction continues to be encouraged.

The name of Paraguay is still rarely heard or seen otherwise than in connection with its onerous indebtedness to the other Platine states, to Brazil, and to Great Britain, and the vexed question of limits. Concerning the latter subject, some remarks will be found in the articles ARGENTINE REPUBLIC and BRAZIL in this volume.

PEDRO II. DE ALCÁNTARA (John Charles Leopold Salvador Bibiana Francis Xavier de Paula Leocadio Michael Gabriel Raphael Gonzaga), Emperor of Brazil, born December 2, 1825. His father was Dom Pedro I. of Braganza and Bourbon; and his mother, Leopoldina Carolina Josephine of Austria; and he is consequently the legitimate descendant of three of the most ancient royal houses of Europe—Braganza, Bourbon, and Hapsburg. Dom Pedro I., son of John VI., abdicated the throne of Portugal in favor of his daughter Donna Maria, May 2, 1826; and subsequently (April 7, 1831), after a prolonged and hopeless strug-

gle against an obstinate and ever-growing opposition, he abdicated the throne of Brazil in favor of his present Imperial Majesty, then only in his sixth year.

Thus the early years of the young Emperor, whose education was conducted with the utmost care and solicitude, were passed amid the turmoils which followed the declaration of Brazilian independence. From his accession until 1833 the Government was administered by a single regent, Bonifacio Jozé de Andrade e Silva, formerly a leader of the democratic party; and afterward, until 1840, by a council of regency. But, through the zeal with which all statesmen, whatever their political creeds or principles, defended their country's welfare and their sovereign's rights, the Brazilian constitution, even during the most critical period, was preserved intact.

In 1840 Dom Pedro II., though still under age, was declared by the Chambers to have attained his majority; he assumed the reins of government on July 23d of that year; and the ceremony of his coronation was solemnized July 18, 1841.

A determined effort to substitute a Federal Government instead of the existing order of things, during 1841 and 1842, was promptly and efficiently frustrated, and by the end of the latter year the whole republican party was reduced to submission. The only other incidents that occurred of a nature to disturb the peace of the empire since that time, were a series of political uprisings, chiefly in Pernambuco, São Paulo, and Minas Geraes, and directed against the provincial governments or against the measures or the ministers of the central Government; but none attained the proportions of a civil war.

An alliance having been made between Brazil, Uruguay, and the forces of Entre-Rios, against Rosas, the aid then afforded by the imperial arms materially contributed to the downfall of the Argentine dictator; and among the fruits of the intervention was the free navigation of the Plata and its great feeders; an event which, with a certain territorial aggrandizement of the empire, inaugurated an era of general prosperity for Brazil.

Among the more notable events which have tended to popularize Dom Pedro's reign and consolidate his power, may be mentioned the determined and judicious attitude he assumed on the occasion of the quarrel with the British Government in 1862—a quarrel settled in his favor by the arbitration of Leopold I., King of the Belgians; the five years' war against Paraguay, begun in 1865 by Brazil, the Argentine Republic, and Uruguay (the triple alliance of May 1, 1865), and terminating with the fall of Lopez, who was slain at Aquidaban, March 1, 1870, Brazil acquiring as a part of her war indemnity 1,163 (i) square miles of Paraguayan territory; and, above all, the bold attack upon and complete triumph over the national prejudice of the necessity of black labor—the law

* "Hand-book of the River Plate Republics," 1875.

passed in September, 1871, for the final but gradual abolition of slavery in the empire, and the hitherto successful endeavor to supersede African labor by attracting European immigrants to the Brazilian shores.

For the measures adopted by his Majesty relative to archiepiscopal disregard of the laws in 1874, reference may be made to the article BRAZIL in the ANNUAL CYCLOPÆDIA for that year.

On September 4, 1843, Dom Pedro II. was married to the Empress Donna Theresa Christina Maria, born March 14, 1822, daughter of the late Francis I., King of the Two Sicilies. The only surviving issue of that union is the Princess Imperial Isabella Christina Leopoldina Augustina Michelle Gabrielle Raphaella Gonzaga, born July 29, 1846, and married October 15, 1864, to Louis, Count d'Eu.

In 1860 the Emperor made an extended tour through the empire; and in 1867 he opened the navigation of the Amazon to the vessels of all nations. In 1871-'72 he visited England and the Continent of Europe; and is expected to visit the United States on the occasion of the Centennial Exhibition at Philadelphia in the course of 1876.

His Imperial Majesty is of an extremely active disposition; he is said to be an excellent horseman, and assiduous in athletic exercises. When in Rio de Janeiro, he is constantly to be seen in public; and twice in each week he receives his subjects, and foreigners, never failing to captivate both by his courteous manners. He speaks and writes the English, French, German, Spanish, and Italian languages with fluency and elegance; he was elected member of the Geographical Society of Paris in 1868, and Corresponding Member of the French Academy of Sciences in 1875; and is a liberal patron of letters, the arts and sciences, and of every branch of industry and commerce. During his reign and through his influence Brazil has steadily grown in power and importance; the national finances are in a prosperous condition; railways have been built; marine and terrestrial telegraphs extended in every direction; fluvial navigation promoted and extended; slavery abolished; internal improvements actively carried on; and free education rendered almost universal throughout the empire.

PENNSYLVANIA. The receipts into the Treasury during the year ended June 30, 1875, were \$6,480,100, and the disbursements \$6,541,448, including \$3,806,769 ordinary expenses, \$1,385,498 loans redeemed, \$1,899,176 interest on loans. The balance in the Treasury, November 80th, was \$993,207. The indebtedness of the State is as follows:

FUNDED DEBT.

Six per cent. loan.....	\$18,153,880 00
Five per cent. loan.....	4,869,241 53
Four-and-a-half per cent. loan.....	87,000 00
	\$23,109,621 53

UNFUNDED DEBT.

Relief-notes in circulation.....	\$56,134 00
Interest certificates outstanding.....	15,086 54
Interest certificates unclaimed.....	4,446 26
Domestic creditors' certificates.....	25 00
Chambersburg certificates outstanding.....	9,629 30
Chambersburg certificates unclaimed.....	199 94
	\$123,516 14

SINKING-FUND ASSETS.

Bonds of Pennsylvania Railroad Company, \$5,800,000, representing an indebtedness, January 1, 1876, as per schedule on file in office of State Treasurer.....	\$5,182,544 86
Bonds of Alleghany Valley Railroad Company..	2,400,000 00
	\$7,582,544 86
Cash in sinking-fund November 80, 1875.....	634,088 49
Total assets.....	\$8,216,633 35
Total public debt.....	23,233,137 74
Indebtedness unprovided for.....	\$14,766,544 39

During the year \$1,385,497 of the debt was redeemed.

By virtue of a constitutional amendment, the sinking-fund was created for the purpose of gradually reducing the public debt at a time when it exceeded \$40,000,000. An annual reduction of \$250,000 and the payment of interest of the entire debt were its only requirements. During the past eleven years the annual reduction of the debt has averaged nearly \$1,500,000. On the 1st of December, 1864, the debt amounted to \$39,379,608; December 1, 1875, it was \$23,233,137, showing a total reduction during this period of \$16,146,466.

In regard to the insufficiency of the appropriations to meet the expenses of the State government, Governor Hartranft says:

The appropriations made for the fiscal year ending November 80, 1875, exceeded the receipts of the general revenue fund \$515,820.22, and with like appropriations and receipts the deficit for this year would be doubled. It is estimated, however, that the revenue of this year will be \$500,000 less than that of last year, which would make the deficiency at the end of the current fiscal year about \$1,500,000, unless the appropriations can be reduced. The appropriations are already made for that part of the fiscal year embraced between December 1, 1875, and June 1, 1876. Moreover, the principal appropriations, such as for schools and the ordinary expenses of the government, are fixed by the constitution or by law, except those for public charities, and these will demand unusually large amounts at this season by reason of their failure to receive anything at the last. It is manifest, therefore, that the appropriations cannot be materially reduced, and the deficiency must be provided for either by the imposition of new taxes or the diversion into the general fund of some of the revenue now flowing into the sinking-fund. To levy new taxes at a time when the business and industrial interests are prostrated would be unwise and a great hardship, and would justly meet with public condemnation. The necessity, therefore, of the redistribution of the revenue is obviously a duty that is urgent, and demands your immediate attention.

The public schools of the State are in a prosperous condition. Ten years ago the Commonwealth had 1,743 graded schools; there are now 5,625. During this period the value of school property has increased from \$564,088 to \$2,159,415. In 1865 the State expended upon her public schools \$3,613,233,

and in 1875 \$9,863,927. During the last year 13,863 teachers attended the teachers' institutes held throughout the State. In 1865 the number attending was only 2,765. The most important school statistics for 1875, with the increase over the preceding year, were as follows:

STATISTICS.	1875.	Increase.
School-districts	2,089	18
Schools	17,092	453
Graded schools	5,625	89
School directors	18,825	75
Superintendents	87	—
Teachers	19,830	533
Average salaries of male teachers per month	\$41 07	*\$1 88
Average salaries of female teachers per month	\$34 09	*\$1 73
Average length of school term in months	6 85	2.6 days
Number of pupils	890,078	89,299
Average number of pupils	551,843	8,322

The percentage of attendance was 62 of the whole number of pupils registered. The average cost of tuition per month for each pupil was 92 cents. The cost of the school system for the year was as follows:

COST.	1875.	Increase.
Tuition for the year	\$4,746,876	\$219,567
Building, purchasing, and renting schoolhouses, fuel, contingencies, debt, and interest paid	5,507,730	207,159
Total expenditures	9,863,927	541,942

To the \$9,863,927 named above, should be added \$77,324 increased expenditure in the city of Pittsburg, not included in the summary; \$85,816 expended for normal schools, and \$423,694 expended in the support of soldiers' orphan schools, to obtain the full sum of \$9,950,761 expended for all school purposes during the school year 1875.

The appropriation by the State was \$1,000,000. The number of orphan children under the care of the State, September 1, 1875, was 2,695; the amount expended for this purpose was \$423,694.

The Republican Convention assembled in Lancaster, May 26th, and renominated John F. Hartranft for Governor, nominated H. W. Rawle for Treasurer, and adopted the following platform of principles:

The Republicans of Pennsylvania, affirming their continued adhesion to the party whose perpetuation is rendered necessary by the causes which called it into existence, make declaration of their political faith as follows:

1. The equality of all men before the law. Equal justice to all and special favors to none.
2. The harmony of the Federal and State governments. Both are parts of one system, alike necessary for the common prosperity, peace, and security.
3. The unity of the nation. We are one people. The constitution of the United States forms a government, not a league.
4. A faithful execution of the laws, an economical administration of the Government, integrity in

office, honesty in all branches of the civil service, and a rigid accountability of public officers.

5. Protection to home industry and a home market for home products.

6. The right of the laborer to protection and encouragement, and the promotion of harmony between labor and capital.

7. Cheap transportation and the advancement of closer intercourse between all parts of the country.

8. Free banking, a safe and uniform national currency, and a steady reduction of the national debt.

9. The public domain being the heritage of the people, should be reserved for actual settlers exclusively.

10. The equalization of the bounties of soldiers, and a speedy settlement of all just claims arising out of the late war.

11. Honest men in office—men with brains enough to know dishonesty when they see it, and courage enough to fight it whenever they find it.

Resolved, That we declare a firm and unqualified adherence to the unwritten law of the republic, which wisely and under the sanction of the most venerable of examples limits the presidential service of any citizen to two terms; and we, the Republicans of Pennsylvania, in recognition of this law, are unalterably opposed to the election to the presidency of any person for a third term.

Resolved, That the Republican party of this Commonwealth recall with pride their effective agency in the creation of this Administration of President Ulysses S. Grant, and point with confidence to its general policy and the beneficent fruits thereof for their vindication and his. That having received the Government from his predecessor demoralized in every branch, corruption and recklessness in office the rule, the fruits of the war ungathered, the lately rebellious States sullen, the late slaves unprotected and yet denied that great means of self-protection, the ballot, foreign states unchastised for their wrongs to us, and home States defiantly indifferent to the expiation which their rebellious action required—the Administration of President Grant has in six short years steadily and unbendingly reformed every known abuse, and is to-day relentlessly upon the track of wrong-doers, has largely reduced the nation's debt, has largely reduced the people's taxes, has inflexibly punished all violators of law, has secured by constitutional provision the ballot to all freemen, and by law thrown sorely-needed safeguards around the ballot-box, has wrung from unfriendly foreign states confession of their faults and reparation for injuries done us, and has influenced reluctant home States to at least the appearance of just dealings with all their citizens; all which events mark the present Administration as among the most brilliant in achievement in our annals.

Resolved, That in presenting the name of John F. Hartranft for reelection to the exalted position which he now fills, we meet the unanimous wish of our constituents, who desire in this manner to indicate their approval of the careful, conscientious, and able manner in which he has met and discharged every duty incumbent upon him, making thereby a record which will secure his reputation as one of the best upon the roll of our chief-magistrates—brave in the field, modest in the cabinet, tried often and always found faithful, self-poised, and honest. We present him for the suffrages of the people, confident that their judgment will approve and ratify our nomination.

Resolved, That in view of the evils common to the government of most of the large municipalities of the country, and the constant increase in municipal taxation in this and other States of the Union, it behooves our Legislature to devise adequate means to protect the people as well from existing maladministration as to prevent its recurrence, and to this end we suggest as a preliminary step a thorough

* Decrease.

investigation by an able and experienced commission, to be formed under proper authority, of the whole subject.

Resolved, That we arraign the Democratic party of Pennsylvania for its utter failure to redeem the promises upon which it partially attained to power in this State. It pledged itself to reform, to legislative purity, to greater economy, and to a higher aim in legislation; while it has reformed nothing, has economized in nothing, and has dishonored the State by an unseemly and arbitrary exercise of legislative powers.

Resolved, That the efforts now being made by the national Administration to ferret out and bring to punishment those who have been defrauding the Government of its lawful revenues, should enlist the sympathy and hearty support of honest men of all parties.

The Democrats held their State Convention in Erie, on the 8th of September, when Cyrus L. Pershing was nominated for Governor and Victor E. Piollet for State Treasurer. The resolutions adopted were as follows:

Resolved, 1. That we hereby declare our unfaltering devotion to the fundamental principles of Democratic government as enunciated by Thomas Jefferson in his first inaugural address; to equal and exact justice to all men, of whatsoever state or persuasion, religious or political; the support of the State governments in all their rights, as the most competent administration for our domestic concerns, and the surest bulwarks against anti-republican tendencies; the supremacy of the civil over the military authority; economy in the public expense, that labor may be lightly burdened; the honest payment of our just debts, and the sacred preservation of the public faith, freedom of religion, freedom of the press, freedom of person under the protection of the great writ of *habeas corpus*, and trial by juries impartially selected.

2. That the wide-spread depression and suffering which affect every business and employment that is capable of being touched by legislation, show beyond a doubt the ignorance, inefficiency, and wickedness of the leaders of the party that has ruled the State and nation for a period of years, and call for their immediate and permanent removal from the places they have so long dishonored and disgraced.

3. That the undue multiplication of public officers, and the inordinate increase of salaries and emoluments of offices, are among the many evils which radical rule has forced upon the country, and favoring an economical administration of the Federal and State governments so that the people may be as speedily as possible relieved from the burden of taxation with which they are now seriously oppressed, we call upon our Federal and State representatives to strive by all proper means to reduce these evils to the very lowest practicable number and amount.

4. That the conduct of the present State Treasurer in the management of the Commonwealth's finances, in his neglecting to appropriate the moneys in the sinking-fund in payment of the public debt as rapidly as required by law, in non-accounting for the interest received by him on the people's money deposited with the several banks and banking institutions throughout the State, and his insolent refusal to submit the archives of the Treasury Department to a legally constituted committee of the House of Representatives, appointed to investigate the same, is cause for grave suspicion, and is deserving of the severest condemnation at the hands of an outraged and already overtaxed people.

5. That the condition of our State Treasury demands the most searching and thorough investigation, and we call upon the committee appointed by the House of Representatives to investigate the state

of the same, and to resolutely pursue the duty which has been confided to it.

6. That the nominees of this convention are hereby pledged to apply all moneys in the sinking-fund as required by law, in the reduction of the public debt, and thereby save the interest on the same to the amount so reduced, and that moneys due the Commonwealth from corporations and individuals shall be promptly collected and paid into the Treasury, and not in any manner, directly or indirectly, to employ public moneys for their own profit or purposes.

7. As the contraction of the money currency and circulating medium, heretofore made by the Republican party, and the further contraction proposed by it, with a view to forced resumption of specie payments, have already brought disaster to the business of the country, and threaten general bankruptcy, while we expressly enunciate the principle that a sound currency should be gold and silver, or redeemable therein, we are opposed to either a contraction or inflation of the present currency, and would leave the restoration of legal tenders to par in gold to be brought about by promoting the industries of the people and not by destroying them.

8. That the policy initiated by the Republican party of abolishing legal tenders, and giving the national banks the power to furnish all the currency, will increase the power of an already dangerous monopoly, and the enormous burdens now oppressing the people, without compensating advantage, and all the national - bank circulation should be promptly and permanently retired and full legal tenders be issued in their place.

9. That the public interest demands that the Government should cease to discredit its own money, and should make its legal tenders receivable for all public dues, except where respect for the obligations of contracts requires payment in coin.

10. Demands the extinction of the present national banks and the establishment in their stead of a system of free banks of discount and deposit, under such regulations as the States respectively may prescribe, and no paper-money except such as may be issued directly by and upon the faith of the Federal Government, affording practically a currency based on the gold and silver and other property of the whole people of the country.

11. That with this declaration of principle of policy we arraign the leaders of the Republican party for their extravagant expenditures and prodigal waste of the people's money, for their corruption, for their speculation, for their contempt of constitutional obligations, for their extortionate increase of the salaries of our public officers, for their oppressive, unjust, and defective system of taxation, finance, and currency, for their continuance of incompetent and corrupt men in office; and, further, general mismanagement of both the State and Federal governments, and we cordially invite the Liberal Republicans and all other men, without regard to past party affiliation, to cooperate with us in expelling them from power, and securing such an administration of our public offices as characterized the purer and better days of the republic.

The election resulted in the success of the Republican candidates. The total vote was as follows:

FOR GOVERNOR.

Hartranft (Rep.).....	804,175
Pershing (Dem.).....	292,146
Browne (Prohibition).....	12,944
Hartranft's plurality.....	12,000

FOR STATE TREASURER.

Rawls (Rep.).....	802,575
Piollet (Dem.).....	292,136
Pennypacker (Prohibition).....	12,600

The present State government is as follows:

Governor, John F. Hartranft (Rep.); Lieutenant-Governor, John Latta (Dem.); Auditor-General, Justus F. Temple (Dem.); Secretary of Federal Affairs, William McCandless (Dem.); Secretary of the Commonwealth, M. S. Quay (Rep.); Insurance Commissioner, J. Montgomery Forster (Dem.); State Treasurer, Henry Rawle (Rep.); Superintendent of Public Instruction, James O. Wickersham (Rep.).

The Legislature is classified as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Democrats	30	109	129
Republicans	30	91	121
Prohibitionist	..	1	1
Republican majority	10	..	..
Democratic majority	..	17	7

The State is represented in the United States Senate by Simon Cameron (Rep.), whose term of office will expire March 8, 1879, and William A. Wallace (Dem.), whose term will expire March 8, 1881.

According to the census of 1870, the mineral products of Pennsylvania were valued at nearly half of those of the entire United States. The extent of the mining industry in that year is shown in the following statement:

MINERALS.	Number of Establishments.	Hands employed.	Capital Invested.	Value of Products.
Coal, anthracite	229	58,021	\$50,986,735	\$33,436,745
" bituminous	850	16,851	16,974,918	18,921,069
Copper	2	7	80,500	7,800
Iron ore	180	4,886	4,548,026	8,944,146
Marble	6	86	226,000	101,000
Nickel	1	48	60,000	24,000
Petroleum	2,145	4,070	9,249,288	18,045,967
Slate	28	732	1,502,389	618,229
Stone	126	1,114	783,425	878,879
Zinc	1	400	400,000	285,555
Total	3,036	81,215	\$84,660,276	\$76,208,890

The amount of anthracite coal produced was 15,650,275 tons, and of bituminous coal 7,798,518 tons; iron-ore, 1,095,486 tons; petroleum, 171,207,622 gallons. The most extensive and valuable coal-mines in America are in Pennsylvania. The coal-fields cover an area of 12,774 square miles, including the anthracite basin of 470 square miles in Eastern Pennsylvania. Of the sixty-six counties of the State, twenty-four in the southeast part and Erie in the northwest contain no coal. The anthracite beds are chiefly in Dauphin, Schuylkill, Carbon, and Luzerne Counties, and extend into Northumberland and Columbia Counties; semi-anthracite coal is found in Dauphin, Sullivan, and Wyoming Counties. Bradford, Lycoming, Tioga, Huntingdon, Bedford, and Fulton, contain detached fields of semi-bituminous coal. Forty-one counties in the north and northwestern part of the State produce bituminous coal. In Mercer County, on the western border, are deposits of the most valuable coal in the United States. It is a species of semi-cannel coal,

with a slaty structure, and a dull, jet-black lustre, with a thickness of from three to four feet. It is known as block-coal, and is specially adapted to the smelting of iron. The annual production is about 500,000 tons. The number of anthracite collieries in 1875 was 437; shafts, 91; slopes, 293; drifts and tunnels, 290. The amount of anthracite coal annually mined in 1872, 1873, and 1874, was as follows:

DISTRICTS.	1872.	1873.	1874.
	Tons.	Tons.	Tons.
Schuylkill	5,010,908	5,182,048	4,844,922
Northumberland	1,891,837	1,404,170	1,374,245
Columbia	844,220	858,741	290,923
Lykens Valley	430,823	479,915	473,481
Wyoming	10,694,803	11,722,241	10,838,804
Lehigh	4,110,674	3,706,108	3,641,873
Total	22,032,265	22,628,178	21,516,243

Of this product, 18,932,265 tons were sent to market in 1872, 19,585,178 in 1873, and 18,537,888 in 1874, the remainder in each year being the estimated home consumption. The production of bituminous coal was 4,741,367 tons in 1872, and 5,059,769 in 1873. The entire production of coal in 1874 was 32,147,040 tons, including 21,631,118 of anthracite, 7,712,461 of bituminous, 2,303,461 of semi-bituminous, and 500,000 of block. Nearly half of all the pig-iron made in the United States is the product of Pennsylvania. The extent of this industry in this State and the United States is as follows:

PARTICULARS.	Pennsylvania.	United States.
Number of stacks in 1873	248	612
" of tons (2,000 lbs.) produced in 1873	1,401,497	2,854,558
Number of stacks in 1874	262	662
" of tons produced in 1874	1,389,678	2,868,278
" of stacks in blast, January 1, 1874	166	410
Whole number of stacks, July 1, 1874	268	673

Of the product of Pennsylvania in 1873, 913,085 tons were produced in anthracite, 430,634 in bituminous coal and coke, and 45,854 in charcoal furnaces. The manufacturing interests of Pennsylvania are of the highest importance. According to the census of 1870, the amount of capital invested in manufactures, and the number of establishments, were larger in Pennsylvania than in any other State, while the value of products was greater than in any other except New York. Large quantities of lumber, chiefly pine, are cut in the northern central part of the State. The leading lumbermarkets of the State are Williamsport and Lock Haven on the western branch of the Susquehanna. The shipments of lumber from these two points during the first half of 1873 amounted to 159,884,029 feet. On January 1, 1874, the estimated amount of lumber at Williamsport comprised 220,961,922 feet of pine, and 19,872,444 of hemlock, besides large quan-

tities of lath and pickets. Pennsylvania has two United States ports of entry, Philadelphia and Erie. Pittsburg is a port of delivery in the district of Louisiana. The vast mineral wealth of Pennsylvania has led to the development of a system of internal improvements not excelled by those of any other State. In 1826 the State began the construction of a line of communication between Philadelphia and Pittsburg, consisting of about 292 miles of canal and 126 miles of railroad. This line was completed in 1831, at a cost of \$18,615,663; this liability was increased, in consequence of other works undertaken and aided by the State, to \$41,294,462. After great losses had been sustained, the State, about 1857, disposed of its entire interest and control in these works, and in that year an amendment was made to the constitution prohibiting the State from constructing or being a stockholder in any canal or railroad. The constitution, as amended in 1873, prohibits railroads and canals from making unjust discriminations in charges for freight or passengers, or in facilities for transportation; railroad companies are prohibited from granting free passes, or passes at a discount, to any persons except officers or employes of the company. The Secretary of Internal Affairs has a general supervision over railroads, canals, and other transportation companies. The two most extensive railroad corporations of the State are the Philadelphia & Reading and the Pennsylvania. The former, chartered in 1833, was opened for through-trains between Philadelphia and Pottsville in 1842. This company now operates from fifteen to twenty main lines and branches, comprising more than 700 miles of railroad; also the Schuylkill and Susquehanna Canals. The investment of the company in

railroads, workshops, coal-mines, and iron-works, is estimated at about \$125,000,000. The chief business of the company is the transportation of coal from the southern anthracite coal-fields to tide-water in the Delaware River near Philadelphia. About 7,000,000 tons of coal are annually transported over the roads of this company. The Pennsylvania is perhaps the most powerful railroad corporation in America; nearly 2,500 miles of railroad in Pennsylvania are operated by it, and its investments in this State are estimated at not less than \$150,000,000; besides which it owns or leases a large extent of road outside of the State. At the beginning of 1874 the mileage of railroads in Pennsylvania was reported by the Auditor-General at 5,854 miles, including 4,257 miles of main track, and 1,597 of branches. There were also 2,218 miles of sidings, and 1,819 of double track. The entire length of main line reported by Pennsylvania companies was 8,401 miles, of which 6,655 miles were laid. The capital stock authorized by law was \$515,368,954; subscribed, \$389,374,234; paid in, \$478,711,873; funded debt, \$378,590,370; floating debt, \$37,601,157; cost of road and equipment, \$621,312,048.

The total expenses of all these roads amounted to \$95,207,139, including \$48,818,074 for operating the roads; the total receipts, \$147,995,214, of which \$28,350,040 was from passengers, and \$107,583,075 from freight. The various lines of railroad in Pennsylvania under the control of the Philadelphia & Reading and the Pennsylvania Railroad Companies, with details showing their termini, the miles in operation in Pennsylvania, cost of road and equipment, the capital stock paid in, etc., are as follows:

The canals lying wholly or partly in Pennsylvania are 880 miles in length, of which 781 miles are within the State. The total cost of the canals and fixtures has been \$36,539,879, exclusive of the Pennsylvania. The receipts in

1873 were \$2,342,918, and the total expenses \$1,824,915. The canals are used chiefly for the transportation of coal. Their situation, total length between termini and cost are as follows:

* Including eleven miles of slackwater.

Pennsylvania holds a high rank as an agricultural State. According to the Federal census of 1870, it ranked after Illinois, New York, and Ohio, in the extent of improved land in farms and the total value of all farm productions; next to New York and Ohio in the cash value of farms; and next to New York in the value of farming implements and machinery. The total number of farms was 174,041, and the average size 108 acres. There were 10,028 containing from 3 to 10 acres, 15,905 from 10 to 20, 48,151 from 20 to 50, 61,268 from 50 to 100, 38,273 from 100 to 500, 76 from 500 to 1,000, and 76 having over 1,000 acres. There were 11,515,965 acres of improved land in farms, 5,740,864 woodland, and 737,371 other unimproved land.

As a dairy State it ranked next to New York in the number of milch-cows and the quantity of butter produced; but in the quantity of milk sold it came after New York, Ohio, and Michigan, and it ranked tenth in the production of farm and eighth in factory cheese. The most important dairy counties were Berks, Bradford, Bucks, Chester, Crawford, Erie, Lancaster, Montgomery, Susquehanna, and York, in all of which the number of milch-cows ranged from 20,000 to 85,000, and the amount of butter produced from 1,500,000 to 3,700,000 pounds.

Under the amended constitution of 1873, which went into force January 1, 1874, the General Assembly consists of 50 Senators, elected for four years, and 200 Representatives, chosen for two years. Regular sessions are held biennially, beginning on the first Tuesday of January in odd years. Extra sessions may be convened by the Governor, but annual adjourned sessions are prohibited after 1878. In case of a vacancy in the office of United States Senator from this State when the Legislature is not in session, the Governor is required to convene that body on notice not exceeding sixty days. Members of the Legislature receive \$1,000 for each regular session not exceeding one hundred days, and \$10 a day for time, not exceeding fifty days at any session, necessarily spent after the hundred days; also, twenty cents a mile for going to and from the capital. There are strict constitutional limitations on special legislation. The Executive Department consists of a Governor, annual salary \$10,000; Lieutenant-Governor, who is president of the Senate, \$3,000; Secretary of the Commonwealth, \$4,000; Attorney-General, \$3,500; Auditor-General, \$3,000; State Treasurer, \$5,000; Secretary of Internal Affairs, \$3,000; and Superintendent of Public Instruction, \$2,500. The Governor, Lieutenant-Governor, and Secretary of Internal Affairs, are elected by the people for four years, the Auditor-General for three, and the Treasurer for two years. The Attorney-General, Secretary of the Commonwealth, and Superintendent, are appointed for four years by the Governor, with the consent of two-thirds of the Senators. The Governor is ineligible to the office for the next succeeding

term. He may grant commutations of sentence and pardons only upon the written recommendation of the Lieutenant-Governor, Secretary of the Commonwealth, Attorney-General, and Secretary of Internal Affairs, or any three of them, after full hearing upon due public notice and in open session. In addition to the ordinary veto powers, he may exercise a partial veto on appropriation bills. The Secretary of the Commonwealth keeps a record of all official acts and proceedings of the Governor. The Secretary of Internal Affairs succeeds to the duties of the Surveyor-General, which title is now abolished. His department embraces a Bureau of Industrial Statistics, and he is required to discharge such duties relating to corporations, and to the charitable institutions, the agricultural, manufacturing, mining, mineral, timber, and other material or business interests of the State, as may be prescribed by law. He must report annually to the General Assembly. The judicial power is vested in a Supreme Court, Courts of Common Pleas, of Oyer and Terminer and General Jail Delivery, of Quarter Sessions of the Peace, Orphans' Courts, and Magistrates' Courts. The Supreme Court consists of seven judges, who are elected by the people for twenty-one years, but are not eligible for reelection, and receive an annual salary of \$7,000 each. The judge having the shortest term to serve becomes Chief-Justice. This court has original jurisdiction only in cases of injunction where a corporation is a party defendant, of *habeas corpus*, of mandamus to courts of inferior jurisdiction, and of *quo warranto* as to all officers of the Commonwealth whose jurisdiction extends over the State. Annual sessions of the Supreme Court are held in Philadelphia, Harrisburg, Sunbury, and Pittsburg. The judges of the Supreme Court, as well as those of the Common Pleas, are justices of Oyer and Terminer and General Jail Delivery in the several counties. The State is divided into forty-three judicial districts, in each of which one or more Common Pleas judges are elected for ten years. Judges of the Courts of Common Pleas are also judges of the Courts of Oyer and Terminer, of Quarter Sessions of the Peace, of General Jail Delivery, and of Orphans' Courts, where separate tribunals of this kind have not been established. They also act as justices of the peace in criminal matters in their respective districts. There are special courts in Philadelphia and Pittsburg. The State is divided into two districts for holding United States Courts. In the eastern district courts are held in Philadelphia, and in the western in Pittsburg, Williamsport, and Erie. The right of voting is given to every male citizen, not under twenty-one years of age, who has been a citizen of the United States at least one month, and a resident of the State one year, and of the election district two months next preceding the election; if twenty-two years of age or upward, he must have paid within two years a State or county tax assessed

at least two months, and paid at least one month, before the election. The general election is held annually on the Tuesday next following the first Monday of November. Property owned at the time of marriage, or thereafter acquired, may be held by a married woman as her separate estate, and is not liable for the husband's debts. Her property is liable for debts contracted by her, and for necessities for the support of the family of her husband and herself. She may dispose of her property by will without the signature of her husband. By petitioning the Court of Common Pleas she may hold her separate earnings and income for her sole benefit. The grounds of divorce are impotence, adultery, desertion for two years, cruel treatment or indignities that render the condition intolerable and life burdensome, fraud, force, or coercion, in procuring the marriage, sentence to two years' imprisonment for felony, and becoming a lunatic or *non compos mentis*. The legal rate of interest is 6 per cent. Pennsylvania is represented in Congress by 2 Senators and 27 Representatives, and has, therefore, 29 votes in the electoral college. The National Guard of the State is divided into ten divisions. In 1874 there were 19 regiments, 169 companies, 738 officers, and 8,261 enlisted men.

PERSIA,* a country of Asia. Reigning sovereign, Nassr-ed-Din, Shah of Persia, born 1829, succeeded his father, Shah Mohammed, in 1848. Heir-apparent, Muzaffer-ed-Din, born in 1850. The area of Persia is estimated at 636,000 square miles. The population, which for some time had been on the decline, is now reliably reported as being again increasing, and amounting to from 6,000,000 to 7,000,000.

The Persian army, according to official returns of the Minister of War, numbers 105,000, of whom about one-third, or 30,000 men, constitute the standing army. According to a new law issued in 1875, the soldiers will no longer serve as heretofore for lifetime, but only for twelve years, and the right of providing substitutes is granted.

The electric telegraph had, in 1875, an aggregate length of about 1,800 miles.

Since the visit of the Shah, the European papers report more frequently than formerly of the condition of Persia, but their accounts widely differ. Some correspondents represent the country as still being in the most deplorable condition; according to others, the Shah's visit begins to bear fruit. According to one correspondent, the Shah has recently caused what are called "boxes of justice" to be sent to every town in his dominions. Placed under a military guard, this novelty serves as a receptacle for petitions; every one, however humble, possessing the right of placing in it written memorials and statements of grievances. At stated intervals the box of justice

is forwarded to Teheran under escort, when its contents are laid before the Shah, who, it is said, reads every petition himself. One of the greatest abuses still existing in Persia is the bad system of credit. There are no courts of justice in which to sue debtors. If a creditor is strong enough, he may lay hold of a debtor by the collar in the middle of the road and give him in charge of two *ferashes*, who will summarily recover double the amount of the debt from him, the excess of course going into their own pockets. If the debtor be a great man, his creditor has little chance of ever recovering the debt. The Europeans are more fortunate in the collection of their debts. As a last resource, they give the names of their debtors to the legation to which they belong, and the legation has only to send the names to the Sadr Azim to recover the debts, and this he does immediately. The Russian Foreign Minister takes under his mighty wings all those Europeans who have no legation here. He also protects the Armenians, and sees that no injustice is done to them; and therefore they enjoy greater freedom and liberty than they have ever done. The name of Russia inspires the Persian fanatics with awe, while that of England inspires them with respect and admiration for her skill. The British Foreign Minister protects the Parsees, who are represented by Mr. Manakji Limji, a well-educated and highly-respected gentleman from Bombay. He is supported by the Bombay Parsee Panchayat, and he rendered valuable service to his countrymen during the great famine. The Jews alone are left to themselves, and this accounts for their being still in the lowest scale of society. The spirit of toleration is daily gaining ground in Persia, and the Jews have nothing to complain of, especially when their present condition is compared with that of ten years ago. But, while the Parsees, the Armenians, and the Jews, enjoy religious toleration in Teheran, they are deprived of this privilege in other cities and towns, where they are still subjected to much annoyance and tyranny by the followers of the Prophet, though in a less degree than in former years.

The present relations between Persia and Russia are thus referred to in the new work by Sir H. Rawlinson, on "The British in Asia" (London, 1875):

In Persia, quite recently, there has been unwonted activity. The plan of a railway from the frontier to Tabreez, originated by a private company, has been pressed on the acceptance of the Shah's Government by the full weight of Russian official influence, against his Majesty's wishes, and in flagrant disregard of the rights of Baron Reuter, the annulment of whose concession, although formally ratified by Persia, has never been accepted either by the individual or by his protecting Government. There can be no question that the interference of the Russian Government in this matter has far transcended the limits of advice or even of solicitation tendered by a friendly power, and has given a rude shock to the Shah's independent authority; but the incident is not likely to lead to serious misunderstanding,

* For an account of the religious statistics, the political divisions, and the imports and exports, see ANNUAL CYCLOPEDIA for 1874.

since the Reuter privileges cannot certainly be maintained in their entirety, and if they are annulled, either partially or wholly, it is probable that a compromise will be effected between the baron and the Russian company. Considerable uneasiness at the same time is felt by Persia at the facilities which such a railway would afford for the military occupation of Tabreez by Russia, in the event of war between the two countries; but this question is, in my opinion, hardly worth considering, since the northern Persian capital has always been and still is completely at the mercy of the Russian forces cantoned on the frontier, within a week's march of the city, and the danger therefore of such an occupation is not in any essential degree augmented by the railway. Of far more importance is the eventual destination of this line, which, it is understood, is to be protracted through Koordistan toward Bagdad, so as to give access to a part of the Turkish Empire where the Porte is, in a political point of view, especially vulnerable, but which has been hitherto supposed by its remote position to be secured from attack from the northward.

The most important negotiations, however, on which Russia is now engaged with Persia, refer, no doubt, to the Toorkomans. General Lomakin, the new Governor of the trans-Caspian military district, is making strenuous efforts to withdraw the Yormuts and Goklans from their Persian allegiance, with a view, no doubt, to employ them as auxiliaries against the recalcitrant Tekkehs, and Persia is thus subjected to the danger of not only losing her subjects, but of seeing her Asterabad frontier completely exposed. As the Toorkoman campaign, however, proceeds, and Persian interests become more and more involved in the contest of Russia with the nomades, it is not at all improbable that important territorial adjustments may take place on this frontier. The advance of Russia, indeed, along the Caspian, has been so steady and persistent, and the possession of Asterabad is so manifestly necessary to the further extension of her power to the eastward, that I can hardly doubt but that in the course of a few years, unless we interfere actively to prevent it, the territory at the southeast corner of the Caspian will have become, either by conquest, or cession, or exchange, the property of the Russian crown.

PERU (REPÚBLICA DEL PERÚ), an independent state of South America, extending from latitude 3° 20' to 22° 20' north, and from longitude 67° to 81° 26' west, and bounded north by Ecuador, from which it is separated mainly by the Upper Amazon, there commonly called the Marañon; east by Brazil and Bolivia, the dividing lines with which are respectively the Javary, from its confluence with the Amazon, the tenth parallel, the Purús to the twelfth parallel, and thence a line bisecting Lake Titicaca and joining the western Cordillera of the Andes, which completes the boundary southward; south by Bolivia, from which it is separated by the Rio Loa; and west by the Pacific. The boundary with Brazil is now generally regarded as marked by the Javary; but the jurisdiction of the Peruvian colonial Government extended eastward to the banks of the Tefé.

The area of the republic may be roundly computed at 500,000 square miles.

The territorial division comprises seventeen departments (subdivided into provinces, and these in turn into districts), and two littoral provinces; which, with their estimated population and their capitals, were officially stated in 1873 as follows:

DEPARTMENTS.	Population.	Capitals.
Piura.....	158,000	Piura.
Amazonas.....	69,800	Chachapoya.
Loreto.....	65,000	Moyobamba.
Libertad.....	219,000	Trujillo.
Cajamarca.....	198,000	Cajamarca.
Ancocha.....	295,000	Huancuz.
Lima.....	400,000	Lima.
Huánuco.....	195,000	Huánuco.
Junín.....	188,000	Cerro de Pasco.
Ica.....	180,000	Ica.
Huancavállica.....	142,000	Huancavállica.
Ayacucho.....	280,000	Ayacucho.
Apurímac.....	165,000	Abancay.
Cuzco.....	300,000	Cuzco.
Puno.....	278,000	Puno.
Arequipa.....	200,000	Arequipa.
Moquegua.....	90,000	Tarma.
Callao { littoral }	85,000	Callao.
Tarapacá { provinces }	70,000	Tarapacá.
Total.....	3,417,000	

Another official document, published in 1871, gave the population at 3,199,000;* but the most carefully prepared statistical works represent it as not exceeding 2,500,000, made up approximately as follows: Indians, 57 per cent.; hybrids (choloes, zambos, etc.), 23 per cent.; whites born in the republic, 12½ per cent.; negroes, 8½ per cent.; Chinese, 1½ per cent.; and other foreigners, 2½ per cent.

The capital is Lima, with a population of some 125,000.

The President of Peru is Señor Don M. Pardo, elected August 2, 1872; and the first Vice-President, Señor Don M. Costas.

The cabinet is composed of the following ministers: Interior, Señor Don A. García y García; Foreign Affairs, Señor Don A. V. de la Torre; Justice, Señor Don M. Odrizola; Finance, Señor Don Z. Z. Elguera; and War, General L. Freyre, who is also President of the Council.

The Archbishop of Lima is P. Orta y Castrillon; President of the Supreme Court, M. Vidaurre; Postmaster-General, Z. Dávila Condemarin; Inspector-General of the Army and Navy, General P. Silva; Commandant-General of the Navy, Post-Captain D. de la Haza.

The army, in 1875, was composed of three regiments of horse, 1,200 men; eight battalions of foot, 5,600; two brigades of artillery, 1,000; and 5,400 gendarmes: total, 13,200 men.

In the summer of last year the navy comprised six iron-clads, with an aggregate armament of 88 guns; and six other steamers mounting an aggregate armament of 56 guns: total armament, 94 guns.

The public revenue is for the most part derived from the sale of guano and nitrate of soda, and, though in a comparatively limited proportion, from the custom-house and miscellaneous receipts, such as licenses, there being no direct taxation in Peru.

In regard to the finances of the republic, no official returns having been made for several years, it may simply be observed that the revenue, in 1873, was reported at \$23,499,633; and

* See ANNUAL CYCLOPEDIA for 1873.

the expenditures at \$17,380,406. But the expenditure for 1874 has been estimated at \$62,500,000, while the revenue for that year was set down at but \$51,100,000, leaving a deficit of \$11,400,000.

The foreign debt consisted, in 1875, of the following loans: Railway, of 1869, at 5 per cent., £290,000; railway 6 per cent., of 1870, £11,920,000; and railway 5 per cent., of 1872, £36,800,000: total, £49,010,000, or \$196,100,000. The 6 per cent. loan of 1870 was issued at the price of 82½, and the 5 per cent. loan of 1872 at 72. The loan of 1872 was intended to be for the nominal amount of £36,800,000; but provisionally there was issued (in July, 1872) only £15,000,000. All these loans, secured by the guano deposits and other resources of the country, are payable in twenty years, by means of sinking-funds.

The home debt amounted, in 1872, according to report, to £2,500,000, exclusive of a floating debt, of the amount of which nothing was known.

Before dismissing the subject of the national indebtedness, it may be proper to transcribe here the report of the Corporation of South American Bondholders, published in a London Journal early in 1875:

As soon as the terms of the contract entered into in August, 1869, between the Peruvian Government and Messrs. Dreyfus Brothers & Co., for the sale of two million tons of guano, became known to the bondholders, much dissatisfaction was expressed with Article XVIII. of the contract, which, by implication, abrogated the priority of the bondholders' lien in respect of the proceeds of sales of guano for interest and sinking-fund. A committee was appointed, which, after correspondence with the Government and contractors, succeeded in securing the rights of the bondholders. The functions of the committee being at an end, the committee was dissolved.

The council, however, have continued to maintain with the Government of Peru friendly correspondence, which has been of reciprocal advantage. It is of paramount importance to a country like Peru, possessing valuable assets, and engaged in the construction of extensive public works, requiring a large expenditure of capital, that she should have the cordial co-operation of those interested in her prosperity. The council consider Peru to be of so much importance to the bondholding interests that they are disposed, when circumstances permit, to appoint a special agent for that country. Meanwhile they have cultivated most cordial relations with the Peruvian legation, and have, through their correspondents, placed themselves in direct communication with the President, who manifests the most loyal disposition toward the foreign creditors.

The council were able, finally, to bring into practical effect the arrangement made in the first instance with Messrs. J. Henry Schroder & Co., with regard to the 6 per cent. loan of 1870. This having been ratified by the Government, in conformity with the negotiations carried on between Señor Pedro Galvez and the council, a number of the 1870 bonds were, in the months of April and October, withdrawn from the market, by the application of the sinking-fund provided by the above arrangement, and the same operation will be pursued this year.

The new discoveries of guano are a subject of much moment to the bondholders, and not the less so since the quantity and quality of the deposits have been the subject of much controversy in the

public press. The presence in London of Mr. Hindle, an engineer of long experience in Peru, induced the council to call two private meetings of leading bondholders, to hear his explanations. His statements confirmed the results of the preliminary surveys, and produced a favorable impression.

It has, however, been the opinion of some leading bondholders that an independent detailed survey should be undertaken by the council on behalf of the general body, and a correspondence has taken place with the Peruvian Government, from which, as yet, nothing definite has resulted, although the Government appears inclined to meet the views of the bondholders to a certain extent.

As is well known, great depression of Peruvian securities has prevailed, and many applications have consequently been made to the council. To have convened the bondholders in a public meeting might have been regarded as an unfriendly act toward a Government possessing such great resources as Peru, and might have weakened, instead of strengthening, the action of the Government. At the same time, a meeting without definite aim, far from allaying public anxiety, would only tend to increase it.

The contract between the Peruvian Government and Messrs. Dreyfus Brothers & Co. will expire in July, 1875. The interests of the bondholders will be sufficiently protected in respect of any fresh contract which the Government may enter into with responsible parties for the sale of guano, provided the terms and spirit of the seventh clause of the general bond of the 1872 loan be strictly observed.

On the 3d of February was formally opened the session extraordinary of the Congress, when the President delivered the following speech, than which no other report could present a clearer view of the condition of the republic at that time:

HONORABLE REPRESENTATIVES: My first duty on finding myself in the midst of you, in the tranquil performance of your constitutional duties, is to return thanks to Almighty God for the rapid and happy termination of the civil war which two months ago threatened the republic, and for the proofs of civic virtues evinced by our citizens upon that occasion.

The crisis through which the republic has passed has sufficed to prove the power of order, law, and progress, in our social organization; and the National Guards, the army and the navy have, by their spirited behavior, exercised a moral and material influence greatly to the benefit of the true interests of the country. The result has proved that the consciousness of the existence of that power was well founded, and has been a source of satisfaction to right-thinking men of all parties, who desire their ideas or political aspirations to be carried out after honorable and peaceable legal conflict.

The army, the navy, and the National Guards, well deserve the public gratitude for their conduct during this short though vigorous defense of social order, justice, and our institutions.

To consolidate the labor effected, and insure the interests and rights of society against future attacks, it is urgently requisite to determine a number of important matters which await your decision, and for this reason I have summoned the sessions extraordinary, in the hope that your intelligence and patriotism will give them that correct and prompt solution which the condition of the country imperiously demands.

The most important of these questions are those with reference to the finances.

The country is passing through a crisis which is so serious that we cannot ignore it, because social evils cannot be remedied unless the authorities examine into them.

The advances received on account of the sales of

guano have resulted in three consequences which are now combined in one: the natural reaction in business and industry after passing through an epoch in which the ordinary product of the guano was consumed, and also the sales of future years; the difficulty which the foreign trade of Peru feels in consequence of guano having thus temporarily ceased to serve as a national return; and the blank which the discount of this rental has produced in the receipts, to the great embarrassment of the regular public service.

The first of these results refers to a circumstance already realized, and can therefore only be corrected by the gradual action of economical laws. The second, i. e., the decreased commercial return in proportion to the imports, will diminish as the production of the country increases. But the third can only be remedied by yourselves, and it is urgently necessary that you should undertake the task.

An equality between receipts and expenditures is indispensably necessary for the proper administration of the executive power, which, as you well know, plays an important part in the moral and material welfare of the nation. Only equality can insure credit, and we require to make use of ours in order to terminate the public works which have been commenced, and increase European immigration, the want of which is now so sensibly felt, and which is the most powerful element for increasing production.

If the solution of our financial question places us in a position to make use of our credit, the resources we obtain from it will contribute to a great extent to decrease the ill effects we at present experience from a want of exportable products, and our foreign trade will to that extent be a gainer. Consequently, the public peace, social order, the due carrying on of the Government, the national credit, the termination of the public works and their necessary effects on the prosperity of industry and commerce, all depend on your success in restoring a fiscal equilibrium by determining the sums which are to be permanently devoted to meeting our ordinary expenses.

The solution of this problem has become a necessity to the republic, and it is worthy of receiving the whole of your time, study, and attention, since the difficulties and dangers attendant on its solution are equally as great as those which must result from its non-determination. I call your attention most seriously to this matter, because the future of my country is a question which gives me much thought, and because my duty to it compels me to explain its necessity to you, and to urge you to come to a resolution.

The discussion of the budget and the determination of the receipts with which its expenses are to be permanently met; the determination of unsettled questions as to the administration of guano and nitrate in reference to each other, and in reference to the public treasury; the formation of a special school-fund on a scale which shall enable instruction to be generalized and allow the municipalities freedom of action in the matter with their own funds, and thus liberate the budget from charges for local expenses; and, finally, the determination of funds for the perfection of our public works and for foreign immigration—these are the primary questions which have led to my calling this extraordinary Congress, and to which I especially direct your attention in consequence of their intimate connection with the present and the future of the republic.

Honorable legislators, the responsibility which today weighs on the representatives of the people is as great as are the problems submitted to their decision by public necessity; and problems such as these, on which the present and future of a nation depend, can only be solved by disregarding the minor interests of the present and acting for the permanent welfare of society.

On October 7th the town of Iquique was almost totally destroyed by fire.

A circular proposing a congress of American jurists was addressed by the Minister of Foreign Affairs to the several governments of the American Continent. The congress is designed to establish a definite agreement on the following points:

1. As a general basis for all points not specially determined, to obtain uniformity of private legislation, so far as the particular circumstances of each country will permit it, and to stipulate in the different codes the points on which uniformity is impossible, and the manner in which questions shall be decided which may arise in consequence of such want of uniformity.

2. To concede in each State to citizens of the others the same rights as to natives.

3. To simplify as much as possible marriage between natives and foreigners.

4. To establish uniformity in all external acts and obligatory documents.

5. To fix common rules for the due execution of civil sentences and the carrying out of summonses.

6. To stipulate in the different codes all cases of extradition and the modes of carrying them out.

7. To assimilate commercial legislation, and more particularly in cases of bankruptcy and patents.

8. To assimilate the coinage, weights, and measures.

9. To celebrate a postal convention between all the states.

The congress, the circular says, might meet in Lima, or in any other place which the majority of the governments might determine, and it might commence its sessions with the presence of such plenipotentiaries of the united nations as are present at the date of its installation, and to their decisions the other nations might agree, either during the session or subsequently. This is a most important movement, and the centennial year is a good time for the United States to aid in establishing an assembly for the improvement of international law.

PESCHEL, OSKAR FERDINAND, a German geographer, born March 17, 1826; died August 31, 1876. He entered a business house in his youth, but, this not suiting his taste, he retired, and devoted himself to the study of law and to journalism, becoming one of the editors of the *Allgemeine Zeitung* of Augsburg; and when, in 1854, the editor of the *Ausland*, a geographical journal, died, Peschel was appointed in his place. In this position he did much to promote geography and the different natural sciences connected with it. Under his editorship, the *Ausland* became not only one of the most prominent geographical publications of Germany, but natural philosophy and astronomy, physiology and biology, all were represented in the same masterly manner. In 1871 he accepted a call as professor in Leipzig, in which position he remained up to his death. His principal works are: "Geschichte des Zeitalters der Entdeckungen" (1858); "Geschichte der Erdkunde bis auf A. von Humboldt und Karl Ritter" (1865); "Neue Probleme der vergleichenden Erdkunde als Versuch einer Morphologie der Erdoberfläche" (1870), and "Völkerkunde," of

which two editions appeared in 1874. A biography of Peschel was published by Fr. Hellwald ("Oskar Peschel, sein Leben und Schaffen" 1876).

PFYFFER, CASIMIR, a Swiss lawyer, born October 10, 1794; died November 11, 1875. He studied law in Tübingen, and, having graduated, he settled in Lucerne, where he soon was one of the most popular lawyers. In 1826 he was elected to the Common Council of Lucerne, and from 1831 to 1841 was President of the Court of Appeals. He was a decided opponent of the "Sonderbund," and, when the rebellion had been suppressed, he was elected under the new Federal Constitution, first into the National Council, and subsequently into the Supreme Federal Court. Of this court he was twice elected president, in 1851 and again in 1863. He wrote "Geschichte des Cantons Luzern" (2 vols., 1850-52); "Erläuterungen des bürgerlichen Gesetzbuches des Cantons Luzern" (3 vols., 1832-39); "Der Sempacher Krieg" (1844); and "Dr. J. R. Steiger und dessen Staatsprocess" (1845).

PHILADELPHIA. The wide-spread interest that will attach to Philadelphia, in consequence of its being the place of the American Centennial Exposition, renders timely an extended description of the city in this volume of the ANNUAL CYCLOPEDIA.

Philadelphia is the chief city of Pennsylvania, and the second of the United States in population. It is situated on the Delaware River at the mouth of the Schuylkill, 96 miles from the Atlantic Ocean; 125 miles in a direct line northeast of Washington, and 85 miles southwest of New York; latitude of Independence Hall, 39° 57' north; longitude 75° 10' west. The city was founded by William Penn, as his first act in taking possession of the grant of a province by Charles II. He sent out a body of colonists in August, 1681, but the town was not laid out till near the close of 1682, Penn arriving meanwhile. The name was selected more because of its intrinsic significance than from historical regard to the city of that name in Asia Minor. The Swedes had settled in considerable numbers on both shores of the Delaware below the site of the city before Penn came, and several proprietors of Swedish origin at this time held small tracts on the present site of the city by titles derived from the Dutch and English Governors of New York. In 1683 and 1684 a large immigration arrived from Holland and Germany as well as from England and Wales. They were nearly all Friends, and the city continued to be almost exclusively occupied and controlled by Friends for half a century after it was founded.

The first Continental Congress met in Philadelphia in Carpenters' Hall, September 5, 1774, and continued in session till October 26, 1774. The second assembled in the State-House May 10, 1775, and on July 4, 1776, adopted the Declaration of Independence. Other sessions of Congress were begun here on March 4, 1777,

and July 2, 1778. The British forces occupied the city from September, 1777, to June, 1788. Philadelphia was the capital of the colony and State of Pennsylvania till 1799, except during the British occupation. From 1790 to 1800 it was the seat of government of the United States. The growth of the city has been steady and rapid. The total population in 1790 was 28,522; in 1800, 41,220; in 1810, 53,722; in 1820, 63,802; in 1830, 80,458; in 1840, 93,665; in 1850, 121,376; in 1860, 565,529; and in 1870, 674,022. Of the total population in 1870, 22,147 were colored; 490,398 were natives, and 183,624 foreigners, of whom 96,698 were born in Ireland, 50,746 in Germany, and 22,034 in England.

The city covers an area of 129 square miles, its greatest length, north-northeast and south-southwest, being 22 miles, and its breadth from 5 to 10 miles. The densely-built portion comprises about 15 square miles between the rivers, on either side of and including the original city. The district west of the Schuylkill is popularly known as West Philadelphia, and there are other localities which still retain the names they bore prior to annexation. Among these may be mentioned Bridesburg, Frankford, and Holmesburg in the northeast, and Manayunk (on the left bank of the Schuylkill), Germantown, and Chestnut Hill, in the northwest. The last two are chiefly noted for their fine residences, the others for their manufactures.

The original city was regularly laid out, the north and south streets, with few exceptions, being numbered from the Delaware west to the Schuylkill, which is reached at Twenty-third Street, the first street west of that river being Thirtieth. These are crossed at right angles by named streets. This plan, though in general applied to the newer portions of the city, has been modified by the conformation of the land as determined by the curves of the rivers, while the suburbs in some instances were laid out upon an independent plan. A few irregular avenues, formerly highways leading to the country, stretch away from the original town plot. The buildings on the east and west streets are numbered toward the west, all between Front or First Street and Second Street being between 100 and 200, and all between Second and Third Streets between 200 and 300, and so on. On the north and south streets the buildings are numbered in either direction from Market Street, certain streets being designated as boundaries of the hundreds. Market Street, the great central street east and west, is 100 feet wide, and built up for more than 5 miles. Broad Street is the central street north and south, 113 feet wide, and built upon for over 6 miles. The other great streets are from 50 to 66 feet wide, forming squares with sides of from 300 to 450 feet. In most cases the squares are subdivided by small streets laid out at a later period.

Chestnut Street, the first east and west street south of Market, is the fashionable thorough-

fare. Walnut, Locust, Spruce, and Pine Streets succeed each other on the south, and are occupied mainly by wealthy residents; farther southward are Lombard, South, Shippen, Fitzwater, Christian, and Washington Streets. North of Market there are, first, Arch, Race, and Vine, leading and wealthy streets; next Callowhill, Spring Garden, and Green. The banking and financial centre is in Third and Chestnut Streets; the dry-goods and other jobbing trade in Third and Market; the commission-houses in Front and Chestnut; the shipping and provision trade on Water Street and Delaware Avenue; the newspaper-offices on Third, Chestnut, and Seventh Streets.—The style of building has always been principally of brick, the vicinity producing very superior pressed brick at a low cost. Numbers of brick buildings remain standing and in good preservation which were erected before 1760; those built since 1800 have marble facings and marble steps, and are remarkably uniform in height and general character. All are conspicuous for neatness and durability; even the cheaply-built blocks and suburban streets intended for laborers' residences are distinguished for neat-

ness, and differ externally from those of the wealthier class more in size than anything else. Tenement-houses are almost unknown. This is largely due to the building and loan associations, monetary institutions peculiar to Philadelphia. For the best residences marble and brown-stone have been much used. An improved style of cheaper dwellings, recently introduced, may be seen in Madison Square and St. Alban's Place near the Schuylkill, just south of the original city. Here two rows of houses face each other across a wide street, through the middle of which stretches a park adorned with flowers and fountains, with ample room on either side for a walk or play-ground for children. These streets are not designed for carriages, alleys in the rear of the houses being provided for teams. The houses are two stories high, and in St. Alban's Place are surmounted with Mansard roofs.

The chief business streets are now occupied with a large number of costly and superior buildings of marble, granite, iron, and sandstone. The Custom-House and Sub-Treasury, formerly the second United States Bank, stands on the south side of Chestnut Street,

PUBLIC LEDGER BUILDING.

between Fourth and Fifth Streets. It is of marble, and was completed in 1824, at a cost of \$500,000; it has two fronts, one on Chestnut and the other on Library Street, each ornamented with eight fluted Doric columns supporting a heavy entablature. The United States Mint, of brick with marble facings, is in Chestnut above Thirteenth Street; it is of the Ionic order, and was erected in 1829. The Post-Office, of white marble, is just above the Custom-House. A new building for this use is in course of construction at the corner of Ninth and Chestnut Streets, which will also be occupied by the United States Courts and other Government offices. It is to be of granite, in the French Renaissance style, four stories high, with

an iron dome. The length is to be 428 feet, depth 152 feet, height to top of main cornice 90 feet, to top of dome 184 feet. The Merchants' Exchange is a fine structure of marble, with an ornamental front on Dock Street, a semicircular colonnade of eight pillars, and a spacious rotunda within, on that side. The Commercial Exchange, built in 1870 of brown-stone in the Roman-Gothic style, is in Second Street south of Chestnut, on the site of the "Slate-Roof House," once the residence of William Penn. In Broad Street, north of Pine, is Horticultural Hall, a handsome building, in which the Pennsylvania Horticultural Society holds its annual fairs. The six-story publishing-house of J. R. Lippincott & Co., in Market Street, above Ser-

enth, and the building erected by Mr. George W. Childs for the *Public Ledger*, on the corner of Sixth and Chestnut Streets, of brown-stone, five stories high, with Mansard roof, are noteworthy structures. The building of the American Sunday-School Union, erected in 1854, is in Chestnut between Eleventh and Twelfth Streets. Here are the headquarters of the mission-work of the Union, and here its publication business is carried on. Nearly opposite the Mint is the handsome new building of the Presbyterian Board of Publication. Near each other in Fourth Street, not far from Walnut, are the offices of the Pennsylvania and the Philadelphia & Reading Railroad Companies. The former, built in 1871-'72, is a spacious edifice of brick, with an elegant front of Quincy granite. The latter is a handsome building, enlarged and improved in 1871. In Third Street, near the former, is the spacious building of the Lehigh Valley Railroad Company. The new Masonic Temple is on the corner of

Club has a fine marble-front building in Chestnut, near Sixteenth Street, handsomely furnished. The Girard National Bank (built in 1795-'98 for the first United States Bank) in Third Street, the building of the Fidelity Insurance, Trust & Safe Deposit Company, and the Farmers' & Mechanics' National Bank in Chestnut Street, of marble; the new building of the Provident Life & Trust Company in Fourth Street, of iron; the Tradesman's National Bank in Third Street, the Philadelphia National Bank, and the Pennsylvania Life Insurance & Trust Company's building, in Chestnut Street, of granite; and the Bank of North America, in Chestnut Street, of brown-stone, are handsome structures. The Bank of North America, chartered by Congress in 1781, was the first bank established in the United States.

The largest hotel is the Continental, in Chestnut Street, with fronts also on Ninth and Sansom Streets. It was opened in 1860, is six stories high, and covers 41,536 square feet. The Chestnut Street front is of Albert and Picton sandstone, and the others of fine pressed brick. On the opposite side of Chestnut Street is the Girard House, and in Broad Street near Chestnut, the La Pierre House; both are fine architectural structures, built in part of brown-stone. The Colonnade Hotel, recently erected on the corner of Fifteenth and Chestnut Streets, is six stories high, with a Mansard roof. Other hotels are the Merchants', in Fourth Street; the Bingham House, in Market Street; the St. Cloud, in Arch Street; the Irving House, in Walnut Street; the American, Guy's, the Market House, the St. Lawrence, and the Washington House, in Chestnut Street. Very many hotels exist in various parts of the city, with the signs, arms, and insignia of Revolutionary times.

The "Old Swedes'" Church, built in 1700, is the oldest church edifice in the city. It is of brick, and stands in an ancient cemetery, fronting on Swanson Street near Christian. In the cemetery is the tomb of Wilson, the ornithologist. Christ Church (Episcopal), in Second Street near Market, begun in 1727, is still a fine building and in perfect preservation. The spire is 196 feet high, and contains a chime of bells cast in London in 1754. The graveyard on the corner of Fifth and Arch Streets contains the remains of Franklin. St. Peter's Church (Episcopal), in Third and Pine Streets, built in 1758-'61, has a tower containing a chime of bells. In the churchyard is a monument to Commodore Decatur. The Friends' Meeting-House, secluded in a broad graveyard, in Arch Street near Third, deserves mention; it was built in 1808. Among Episcopal churches, St. Mark's, in the later or English-Gothic style, in Sixteenth and Locust Streets; the Church of the Holy Trinity, in the Norman style, in Nineteenth and Walnut Streets; and the Church of the Incarnation, in Broad and Jefferson Streets, are fine

MASONIC TEMPLE.

Broad and Filbert Streets; it is built of granite in the Norman style, and is 150 feet broad by 250 feet in length, the sides being 90 feet above the pavement, with a tower at one corner 230 feet high. The temple is richly ornamented, and contains several large halls finished in various styles of architecture — Corinthian, Doric, Egyptian, Ionic, Oriental, etc. The Union League Club-House, at the corner of Broad and Sansom Streets, was built in 1865; it is of brick, in the French Renaissance style, with façades of granite, brick, and brown-stone. Its cost, including furniture, was about \$200,000. The club was formed toward the close of 1862, for the purpose of aiding the Federal cause in the civil war. The Reform

specimens of architecture. The West Arch Street Presbyterian Church is a very handsome and spacious structure in the Roman-Corinthian style; the West Spruce Street, the Calvary, the Washington Square, and the Second (Twenty-first and Walnut Streets) Presbyterian Churches are fine buildings, in various styles. The Roman Catholic Cathedral of St. Peter and St. Paul, in Eighteenth Street opposite Logan Square, erected in 1846-'64, is an imposing specimen of Roman-Corinthian architecture; it is of red sandstone, 136 feet front by 216 feet deep, and is crowned by a dome 210 feet high. The façade consists of a classic pediment upheld by four lofty Corinthian columns, flanked by pilastered wings. The interior is cruciform, and is adorned with frescoes. At the intersection of Broad and Arch

INDEPENDENCE HALL.

Streets are the Arch Street Methodist Episcopal Church, of white marble; the First Baptist Church, of brown-stone; and a Lutheran Church, of green serpentine. The Central Congregational Church, in Eighteenth and Green Streets, is a handsome building in the late Norman style. The Beth-Eden Baptist Church, in Broad and Spruce Streets, is a fine structure, of green serpentine. The Broad Street Synagogue is a handsome though peculiar building, of the Saracenic order.

The most prominent objects of historical interest in the city are the Penn Treaty Monument, and Carpenters' and Independence Halls. The monument is at Kensington (formerly Shackamaxon), and occupies the site of the elm-tree, blown down in 1810, under which, according to tradition, William Penn made his famous

treaty with the Indians; it is of stone, and insignificant in appearance. Carpenters' Hall, in Chestnut between Third and Fourth Streets, is the place of meeting of the first Continental Congress in 1774. It was built in 1770 by the Carpenters' Company, which still owns it. It is open to visitors, and has been fitted up to represent its appearance at the time of the Revolution, and its walls are hung with mementoes of that period.

Independence Hall signifies generally the whole of the old State-House, but more specifically the large eastern room of the lower floor. It was built in 1732-'35. Here the second Continental Congress adopted the Declaration of Independence. In this hall Lafayette had a great public reception in 1824, and in 1830 a movement was commenced to restore it to its original condition, and to set it apart "for dignified purposes only." The portraits of the great men of the Revolution were procured, and historical relics were placed there for permanent preservation. In 1854 the consolidated city took a renewed interest in it; the old Independence bell was taken from the tower and placed in the hall, a large number of portraits from the Peale Gallery were hung on the walls, and a keeper was appointed. It is open to visitors. Independence Hall is the centre of a line of ancient buildings, called State-House Row, those on either side of it being occupied by courts and city and county offices. They are on the south side of Chestnut Street, between Fifth and Sixth, fronting on a broad paved sidewalk, which is shaded with trees and contains a statue of Washington.

The United States Arsenal at Frankford is devoted to the manufacture of fixed ammunition, all the cartridges for the army being made here. The grounds cover 62½ acres, are beautifully situated and laid out, and are well kept. On Gray's Ferry road, near the Naval Asylum, is another United States arsenal, devoted to the manufacture of army clothing.

LIBERTY BELL.

There are five small public squares in the original city: Logan Square, at Eighteenth and Race Streets; Franklin Square, at Sixth and Race Streets; Independence Square, front-

ing on Walnut Street in the rear of Independence Hall; Washington Square, at Sixth and Walnut Streets, diagonally opposite Independence Square; and Rittenhouse Square, at Eighteenth and Walnut Streets. These are laid out as parks and shaded with trees. Franklin Square contains a large fountain. On what was formerly Penn Square, at Broad and Market Streets, the new City Hall is in course of construction. It is to be 470 feet from east to west, and 486½ feet from north to

south, containing 520 rooms, and covering an area, exclusive of the courtyard, of nearly 4½ acres. It is to consist of four stories, together 100 feet high. From the north front will rise a tower surmounted by a dome, the apex of which will be nearly 300 feet above the pavement. The exterior walls are to be of white marble, and those facing the courtyard of light-blue marble. The cost will be about \$7,000,000. There are about half a dozen other small parks in different sections of the city.

NEW CITY HALL.

The great park of Philadelphia, and one of the largest in the world, is Fairmount Park, embracing 2,740 acres. It extends along both banks of the Schuylkill for more than seven miles, and along both banks of the Wissahickon for more than six miles, commencing at Fairmount, an elevation on the Schuylkill, from which the park derives its name, about 1½ miles above the original city, and extending to

Chestnut Hill on the Wissahickon, a total distance of nearly fourteen miles. It possesses much natural beauty, being well wooded, and having a great variety of surface. The park was established mainly for the purpose of securing a supply of pure water for the city by preventing the occupation and contamination of the streams by factories. In the southwest portion of this park, west of the Schuylkill

MAIN EXHIBITION BUILDING.

River, is to be held from May 10 to November 10, 1876, the International Exhibition in celebration of the centennial anniversary of American Independence. The chief buildings consist of the main Exhibition Building, the Art Gallery, Machinery Building, Horticultural Build-

ing, and Agricultural Building. The Art-Gallery and the Horticultural Building are intended to be permanent; the others are temporary. The main building is 1,880 feet long from east to west, and 464 feet wide, covering 20 acres. It is for the most part of one story, the main

cornice on the outside being 45 feet above the ground, and the interior height 70 feet. At the centres of the sides are projections 416 feet long, and at the centres of the ends other projections 216 feet long. In these projections are the main entrances, which are provided with arcades on the ground-floor, and central façades extending to the height of 90 feet. On the corners of the buildings are towers 75 feet high, and between these and the central projection there is a lower roof with the cornice 24 feet above the ground. The roof over the central part for 184 feet square has been raised above the surrounding portion, and at the corners of this elevated portion are towers 48 feet square and 120 feet high. The building is divided into sections of various size, which are assigned

to the different States and nations. The foundations consist of piers of masonry. The superstructure is composed of wrought-iron columns, which support wrought-iron roof-trusses. The sides for the height of seven feet from the ground are finished with brickwork in panels between the columns, and above this with glazed sash. The Art-Gallery is situated on the "Lansdowne Plateau," north of the main building, 116 feet above the Schuylkill. The structure is in the modern Renaissance style, and is built of granite, glass, and iron. It is 365 feet long, 210 wide, and 59 high, above a spacious basement 12 feet high, and is surmounted by a dome rising 150 feet above the ground. The dome terminates in a colossal bell, from which the figure of America

FINE-ART GALLERY.

rises, and at each corner of its base stands a colossal figure. The Machinery Building is west of the main Exhibition Building, and consists of a main hall 360 by 1,402 feet, and an annex on the south side 208 by 210 feet, the whole covering 12.82 acres. The Horticultural Building, situated on the plateau north of the Art-Gallery, is in the Moresque style of architecture of the twelfth century, and is built principally of iron and glass; it is 383 feet long, 193 wide, and 72 high to the top of the lantern. The main floor is occupied by the Central Conservatory, 230 by 80 feet and 55 feet high, surmounted by a lantern 170 feet long, 20 wide, and 14 high. On the north and south sides of the Central Conservatory are four forcing-rooms, each 100 by 30 feet, covered with curved roofs of iron and glass. The Agricultural Building is north of the Horticultural Building, and is constructed of wood and glass. It consists of a nave crossed by three transepts, both nave and transepts being composed of Gothic arches. The nave is 820 feet long, 125 wide, and 75 high from the floor to the point of the arch. The central transept is of the

same height, and has a breadth of 100 feet, the two end transepts being 70 feet high and 80 feet wide. The ground-plan of the entire structure is a parallelogram 540 by 820 feet, covering more than 10 acres. The entire cost of the five buildings is about \$4,500,000. (For an illustration of the Centennial grounds and buildings, *see* EXPOSITION, CENTENNIAL.)

There are many cemeteries in the city, beautifully laid out, ornamented with trees, flowers and shrubbery, and containing numerous handsome monuments. The principal one is Laurel Hill, established in 1835, occupying a slope on the east bank of the Schuylkill, adjoining the upper part of Fairmount Park; it embraces nearly 200 acres, and is divided into three sections, called North, South, and Central Laurel Hill. West Laurel Hill Cemetery, incorporated in 1869; is situated a short distance farther up on the west bank of the Schuylkill, within the limits of Montgomery County; it contains 110 acres. Other cemeteries are Mount Peace and Mount Vernon, near Laurel Hill; Glenwood, Odd-Fellows', and Monument, southeast of these; and Cathedral (Roman Catholic), Mount

Moriah, and Woodlands, in West Philadelphia, south of Fairmount Park, the last being situated on the bank of the Schuylkill.

Several fine bridges, both for railroad and ordinary travel, span the Schuylkill, and six steam-ferries (fare five cents) ply across the Delaware to the New Jersey shore—one to Gloucester and the others to Camden.

Philadelphia is connected with New York and the West by the Pennsylvania Railroad; with different points in the State of Pennsylvania by the Philadelphia & Reading, the Germantown & Norristown, the North Pennsylvania, and the West Chester & Philadelphia Railroads, and the Philadelphia & Erie division of the Pennsylvania Railroad; and with the South by the Philadelphia, Wilmington & Baltimore, and the Philadelphia & Baltimore Central Railroads. By ferry to Camden, N. J., communication is had with the Camden & Amboy division of the Pennsylvania Railroad, for South Amboy; with the Camden & Atlantic Railroad, for Atlantic City; with the Camden, Mount Holly & Pemberton Railroad, for Long Branch; and with the West Jersey Railroad for Bridgeton, Salem, and Cape May. There are numerous regular lines of steamers to Southern and other coastwise ports, a fortnightly line to Havana and New Orleans, a weekly line to Liverpool, and a weekly line to Antwerp. The bar in the river below the city has 19 feet at low and 25 feet at high water. The wharf front of the city has extraordinary depth of water, there being 57 feet at low water at the pier-heads for half a mile, and not less than 25 feet for three miles of the river-front. The occupied commercial front is seven miles on the Delaware and four miles on the Schuylkill. Just below the city, on Mud Island, is Fort Mifflin, commanding the river; and on Tinicum Island, eleven miles below, are the quarantine station and hospital. The United States Navy-Yard, embracing eighteen acres on the Delaware, about a mile below Market Street, is to be sold, and League Island, comprising 600 acres, having been presented to the Government by the city, is to be occupied as a naval station.

The customs district of which Philadelphia is the port includes the city of Camden, N. J., and all the shores of the Delaware and its tributaries within the State of Pennsylvania. The value of its foreign commerce during the year ending June 30, 1874, included exports amounting to \$33,121,337, and imports to \$26,447,037. During the year ending June 30, 1875, the imports amounted to \$24,236,387, and the exports to \$28,611,644. Chief among the exports are petroleum, breadstuffs, and provisions.

In 1874 1,008 vessels entered, and 1,105 cleared, in the foreign trade. The number of vessels belonging to the district was 3,040, of 394,760 tons; 120 vessels were built during the year. The coal-trade of the port is immense, vast quantities being brought here

for shipment to coastwise ports. Kensington, about two miles north of Market Street, is the chief seat of ship-building in the city, but the business is extensively carried on at Chester and other points on the Delaware within the customs district. Philadelphia is preëminent for its manufactures, for which its proximity to the iron and coal fields of Pennsylvania affords great facilities. In 1870, according to the United States census, it was the first city in the Union in the number of manufacturing establishments and of hands employed, in the amount of capital invested and of wages paid, and in the value of materials used; it was surpassed only by New York in the value of manufactured products. The number of establishments was 8,184, with 1,611 steam-engines of 40,528 horse-power, and 59 water-wheels of 2,696 horse-power; number of hands 137,496, of whom 95,421 were males above sixteen, 32,687 females above fifteen, and 9,388 youth; capital, \$174,016,674; wages paid during the year, \$58,780,130; value of materials used, \$180,325,713; of products, \$322,004,517.

Philadelphia is divided into 31 wards. The chief executive officer is the mayor, elected by the people for three years. The legislative authority is vested in a Select Council of 31 members (one from each ward), elected for three years, and a Common Council of 68 members, elected for two years. There are also a city controller, city treasurer, city solicitor, and receiver of taxes. Boards of Commissioners have the management of Fairmount Park, the public buildings, the gas-works, the city trusts, the health department, etc. The chief county officers are three commissioners, the sheriff, recorder of deeds, register of wills, district attorney, and coroner, elected by the people for three years. The United States Courts for the Eastern District of Pennsylvania meet here, and terms of the State Supreme Court are held here. There are four Courts of Common Pleas, each consisting of three judges, which have coördinate jurisdiction in civil matters within the city. These judges designate one or more of their number to hold the Courts of Oyer and Terminer and of Quarter Sessions, which have criminal jurisdiction only. There are also an Orphans' Court of three judges, with probate powers, and Magistrates' Courts. Philadelphia sends 8 Senators and 38 Representatives to the State Legislature, and 5 members to Congress. The police-force is under command of a chief, assisted by four captains, and consists of 1,200 men. There is a paid fire department, under the control of a board of seven commissioners. In 1875, the force consisted of a chief-engineer, five assistant engineers, and 389 men, organized into 27 steam-engine companies and 5 hook-and-ladder companies. There is a fire-alarm telegraph, but the number of alarm-boxes is inadequate. The number of fires during 1874 was 592, with a loss of property estimated at \$754,688. The amount appropriated for the

use of the department during that year was \$586,400. The city is supplied with water from the Schuylkill and Delaware Rivers, chiefly from the former. There are seven works—the Fairmount, on the Schuylkill, at the lower extremity of the park, the Schuylkill, the Spring Garden, the Delaware, the Belmont, the Roxborough, and the Frankford. These works in 1874 pumped 14,588,425,097 gallons, an average of 42,111,780 gallons per day. At the close of that year there were 628 miles 4,507 feet of pipe, 5,119 fire-plugs, and 68 public drinking-fountains, of which 61 were erected by the Fountain Society, and 7 by the Society for Prevention of Cruelty to Animals. The water department is in charge of a chief-engineer. Gas-works were first constructed on a general scale in 1835; they were principally conducted by the authorities of the original city, and were very successful. In 1855 and 1858 the works owned by the municipalities were consolidated with those of the city proper, and in 1859 the works of two companies, previously independent, were purchased, bringing the whole service under the control of the city as its property. Great care was taken in the original establishment of the city gas-works to secure the best improvements then effected in the manufacture of coal-gas in European cities, and they have from the outset furnished gas cheaper than in any other American city. Philadelphia has numerous markets, some of which are of large size and superior character. The city owns some of them, but most have been built by incorporated companies.

The benevolent institutions of Philadelphia are numerous. The Pennsylvania Hospital, founded in 1752, has spacious buildings occupying the square bounded by Eighth, Ninth, Spruce, and Pine Streets. It is supported almost entirely by voluntary contributions, and since its origin has expended more than \$1,200,000 in the support of the sick and injured. A separate insane department (Pennsylvania Hospital for the Insane) was established in 1841; it has fine buildings and grounds in West Philadelphia. The Friends' Asylum for the Insane at Frankford, opened in 1817, has large and beautiful grounds and accommodations for about one hundred patients, who are chiefly supported by their own means, but in some cases receive assistance from the funds of the asylum. There are more than forty hospitals, dispensaries, and lying-in asylums, among which may be mentioned the Hospital of the University of Pennsylvania and the Philadelphia and Presbyterian Hospitals, in West Philadelphia; the Wills Ophthalmic Hospital, in Race Street, opposite Logan Square; the Children's Hospital, in Twenty-second Street, near Locust; the German Hospital, in Corinthian Avenue, on the corner of Girard Avenue; the Jewish Hospital, in West Philadelphia; the Charity Hospital of Philadelphia, in Hamilton Street; the Episcopal Hospital, in Front and Huntingdon Streets;

St. Joseph's (Roman Catholic) Hospital, in Girard Avenue, near Sixteenth Street; the Homoeopathic Hospital, connected with the Hahnemann Medical College; the Woman's Hospital, connected with the Woman's Medical College; the Philadelphia Dispensary, in South Fifth Street; the Southern Dispensary, in Bainbridge Street; the Northern Dispensary, in Fairmount Avenue; and the Preston Retreat (lying-in charity), in Hamilton and Twentieth Streets. The Blockley Almshouse is in West Philadelphia, near the university. The buildings, four in number, are each 500 feet long, and inclose a square. A well-cultivated park of 180 acres surrounds them. This institution embraces a department for the poor, a hospital, an insane asylum, and a children's asylum. The average number of inmates is more than 3,500, of whom about 1,000 are insane. It is supported by the city at an annual expense of more than \$800,000. The Pennsylvania Institution for the Deaf and Dumb, in Broad and Pine Streets, was opened in 1820. There are a few paying pupils, and some are supported by the States of Delaware and New Jersey; but the greater number are maintained at the expense of Pennsylvania. The Pennsylvania Institution for the Instruction of the Blind is similarly supported; it was founded in 1833, and is at the corner of Twentieth and Race Streets. The United States Naval Asylum, built in 1832, is on Gray's Ferry road below South Street. The main building has a marble front 880 feet long, 150 feet deep, and three stories high, approached by a flight of marble steps. The grounds are large and finely ornamented. About 180 superannuated sailors are maintained here. In the rear of the asylum is a large hospital for the care of sick and wounded sailors.

Among other benevolent institutions and associations, besides numerous lodges of Freemasons, Odd-Fellows, and similar societies, may be mentioned the Presbyterian Home for Women, in Fifty-eighth Street and Greenway Avenue; the Educational Home for Boys, in Greenway Avenue near Forty-ninth Street; St. John's Male Orphan Asylum, in Westminster Avenue near Forty-ninth Street; the Industrial Home for Blind Women, in Thirty-ninth and Locust Streets; the Franklin Reformatory Home for Inebriates, in Locust Street; the Magdalen Society, in Twenty-first Street near Race; St. Joseph's Female Orphan Asylum, in Spruce Street; the Penn Widows' Asylum, in Belgrade Street near Otis; the Colored Orphans' Shelter, in West Philadelphia; the Home for Aged and Infirm Colored Persons, in Belmont and Girard Avenues; and the House of the Good Shepherd (for the reformation of unfortunate females), in Twenty-second Street near Walnut. The Eastern Penitentiary, a State institution, completed in 1829, embraces an entire square, fronting on Fairmount Avenue between Twenty-second and Twenty-third Streets. It is the only prison in

the country conducted on the separate system. The convicts are confined in separate cells, 560 in number, where, except when from lack of room two are put into one cell, and the time devoted to exercise in separate yards, they work and pass their entire time alone. The prison has a library of more than 8,000 volumes. The county prison, first occupied in 1835, is on the Passyunk Road below Reed Street, and consists of a massive centre building, with wings flanked by heavy octangular towers, beyond which are walls terminating in bastions. It is in the Tudor style of English-Gothic; the walls are of Quincy granite. With the exception of the women's department, it is overcrowded. The House of Correction, recently erected at Holmesburg, on the Delaware, at a cost of more than \$1,000,000, is intended for the confinement of paupers able to work, and of persons convicted of misdemeanors. It is of brownstone, and has accommodations for 1,500 inmates. The House of Refuge, opposite Girard College, was incorporated in 1826, for "the employment of the idle, instruction of the ignorant, and reformation of the depraved." It has separate apartments for boys and girls. The number of inmates is about 600.

The public schools are 424 in number, and comprise 2 high, 60 grammar, 29 consolidated, 121 secondary, and 212 primary. They are under the charge of a Board of Public Education, consisting of thirty-one members, one from each ward, with a subordinate Board of Directors for each ward. The number of teachers is about 1,800; average attendance of pupils about 80,000. The high-schools are the Central High-School for Boys, and the Girls' Normal School. The former affords instruction in Latin, German, and the higher English branches, and confers degrees. The latter is designed especially to prepare teachers for the public schools. There are also evening schools in the autumn and winter months for those unable or too old to attend the day-schools. The system of public schools of Philadelphia was established on a free basis in 1818. It is supported by a city tax. The schoolhouses are large, well-built edifices, distributed so as to give access to them by the entire population. Text-books are furnished by the city.

The Girard College for Orphans was founded by Stephen Girard. The grounds are about two miles northwest of Independence Hall,

GIRARD COLLEGE.

bordering northeast on Ridge Avenue, and are surrounded by a high stone-wall; they embrace upward of forty acres. The main building, completed in 1847, is a splendid specimen of Corinthian architecture, of white marble. The roof commands a wide view of the city. In a room in the building, known as Girard's room, are preserved the books and personal effects of the founder. The grounds contain a monument to the graduates of the college who fell in the civil war. This institution is supported by the income of the residue of Girard's estate after the payment of certain specific legacies. The residuary estate is managed by the Board of Directors of

City Trusts, appointed by the judges of the Court of Common Pleas, and on January 1, 1875, amounted to \$6,104,862.22. The total receipts during 1874, including \$38,487.37 on hand at the beginning of the year, were \$798,399.10; expenditures, \$738,985.89, of which \$174,073.40 were on account of the college, and \$564,912.49 on account of the estate, including investments, erection of buildings, etc. The institution can accommodate 550 pupils, and is now full. The number admitted, from the opening of the college in 1848 to the beginning of 1875, was 1,796. The beneficiaries are white male orphans, born in Pennsylvania, who are admitted between six and ten years of age,

and are maintained and educated in the institution until eighteen, unless sooner apprenticed to some trade or occupation. The course of study, arranged for eight and a half years, embraces the English and scientific branches, besides French and Spanish. There are 24 teachers, and 20 other officers.

The Polytechnic College of the State of Pennsylvania is situated in Market near Seventeenth Street. It was incorporated in 1853. This institution affords instruction in mechanics, engineering, geology, mineralogy, chemistry, mathematics, architecture, drawing, modern languages, book-keeping, etc.

The University of Pennsylvania occupies fine buildings, recently erected, near Thirtysixth and Locust Streets, West Philadelphia,

in two squares of over sixteen acres, comprising a hall for the departments of arts, science, and law, the medical hall, and the university hospital. The site of the hospital was presented by the city on condition of the maintenance of 53 free beds for the indigent sick. The State granted \$200,000 for its establishment and \$350,000 was obtained by subscriptions. The university had its origin in a charitable school, established by subscription in 1743. The institution was founded as an academy in 1749, and incorporated in 1755 as "the College, Academy, and Charitable School of Philadelphia." In 1779 it was erected into a university, at which time the college separated from it, remaining distinct until 1791, when the present organization of the university was

UNIVERSITY OF PENNSYLVANIA.

established. The medical department was founded in 1765, and the law department in 1789. The department of arts affords instruction in the usual collegiate branches, and the department of science in chemistry, mineralogy, geology, mining, metallurgy and assaying, engineering, drawing, and architecture. The regular course in each department is four years, but special and partial courses are allowed. Instruction in the medical department is given by the regular faculty and by clinical lecturers in the hospital during the autumn and winter. Instruction is also given during the spring and summer in certain collateral branches of science, by an auxiliary faculty organized in 1865. The regular course of this department, and in the law department, is two years. In 1874-'75 the number of instructors in the department of arts was 13, and of students 99, of whom 11 were pursuing partial courses; in the department of science there were 18 instructors and 116 students, of whom 16 were pursuing special and partial courses; in the law department, 5 professors and 59 students; in the charity schools, one for boys and one for girls, giving instruction in the English branches, 3 teachers and 186 pupils. In the medical de-

partment the regular faculty numbered 11, the auxiliary faculty 5, and the hospital faculty 12; total, deducting repetitions, 24. The number of students in the regular course was 371; in the auxiliary course, 101; total, deducting repetitions, 390. The whole number of professors in the university, deducting repetitions, was 41; of other instructors, 15; of students, 800. The number of volumes in the libraries was 18,000. In the department of science there are a collection of American fossils and a mineralogical cabinet, containing 10,000 specimens. The medical department also has a valuable museum and cabinets.

The Wagner Free Institute of Science, founded by Prof. William Wagner, occupies a fine building on the corner of Seventeenth Street and Montgomery Avenue. It was incorporated and opened in 1855; a supplementary act of incorporation was passed in 1864, and in that year the building now occupied was completed. It has a library of 16,000 volumes, and its cabinets of minerals, geological specimens, shells, dried plants, etc., are very valuable. There are 6 professors, and two courses of lectures, attended by from 500 to 1,000 persons, are annually delivered on

chemistry, geology and paleontology, anatomy and physiology, astronomy, natural philosophy, and elocution and oratory. Instruction is also given in civil, mining, and steam-engineering.

The Divinity School of the Protestant Episcopal Church, in Thirty-ninth and Walnut Streets, West Philadelphia, was established in 1862. In 1874-'75 it had 6 professors, 36 students, and a library of 6,000 volumes. The Theological Seminary of the Evangelical Lutheran Church, in Franklin Street, was founded in 1864. In 1874-'75 it had 6 professors and a library of 2,500 volumes. The whole number of graduates was 103.

There are three medical colleges, besides the medical department of the university, two dental colleges, and a college of pharmacy. These are the Jefferson Medical College, in Tenth Street, between Chestnut and Walnut; the Hahnemann Medical College of Philadelphia, in Filbert near Eleventh Street, the oldest homœopathic college in the world; the Woman's Medical College of Pennsylvania, in College Avenue near North Twenty-second Street; the Pennsylvania College of Dental Surgery, in Tenth and Arch Streets; the Philadelphia Dental College, in North Tenth Street; and the Philadelphia College of Pharmacy, in Tenth Street near Race. The latest statistics of these institutions appear in the following table:

INSTITUTIONS.	Date of Organization	No. of Instructors.	No. of Students.
Jefferson Medical College....	1825	12	483
Hahnemann Medical College....	1848	19	130
Woman's Medical College....	1850	14	50
Pa. College of Dental Surgery...	1856	8	69
Philadelphia Dental College..	1863	9	78
Pa. College of Pharmacy...	1821	3	231

The Franklin Institute occupies a plain and substantial building in Seventh Street near Chestnut, containing a fine lecture-room; it was incorporated in 1824, and is designed to promote manufactures and the mechanic and useful arts. It has a library, and maintains courses of lectures on different branches of science. The School of Design for Women, in Penn Square, founded in 1848, affords gratuitous instruction. The American Philosophical Society, in South Fifth Street, was incorporated in 1780. It has a cabinet of coins and relics, and a library containing 15,000 pamphlets, besides bound volumes. The Academy of Natural Sciences, founded in 1812 and incorporated in 1817, has a valuable library and very extensive collections in zoology, ornithology, geology, mineralogy, paleontology, conchology, ethnology, archaeology, and botany. Gratuitous instruction is given in natural science. Admission is obtained to the collection upon payment of a small fee. The building now occupied is on the corner of Broad and Sansom Streets. A new and extensive building of serpentine stone, with trimmings of Ohio sandstone, in the collegiate Gothic style, is in course of

erection on the corner of Nineteenth and Race Streets. The Academy of Fine Arts, in Broad and Cherry Streets, was founded in 1805 and incorporated in 1807; it has very valuable art collections, and holds annual exhibitions. The building has a front of 100 feet on Broad Street and a depth of 258 feet on Cherry Street; it is of a modified Gothic style, and is profusely ornamented. The Händel and Haydn Society, in Arch Street, is chiefly devoted to music, but possesses a library of standard works. The Historical Society of Pennsylvania, in Spruce Street, was incorporated in 1826; its library, containing, besides bound volumes, 40,000 pamphlets and 20,000 folios of manuscripts, is particularly rich in local and family histories. The Numismatic and Antiquarian Society of Philadelphia, in Walnut Street, has a library and a collection of 6,700 coins, metals, etc., chiefly ancient, and 300 antiques and medallions; it was incorporated in 1858. The American Baptist Historical Society, in Arch Street, has a library containing, besides bound volumes, 16,000 pamphlets and 453 manuscripts.

The Athenæum of Philadelphia occupies an imposing building in Sixth and Adelphi Streets; it has a fine library, and a reading-room supplied with the principal American and foreign newspapers and periodicals. The Library Company of Philadelphia was formed in 1731 by Benjamin Franklin and others; its library, commonly known as the Philadelphia Library, is, next to the Mercantile, the largest in the city; the building, in South Fifth and Library Streets, was erected in 1789. The Mercantile Library, organized in 1821, belongs to shareholders, and is accessible to others upon the payment of annual dues; its reading-room is supplied with the principal American and foreign newspapers and periodicals; the building, in Tenth Street above Chestnut, has a frontage of 74 feet and a depth of 184 feet, and is one of the finest buildings for library purposes in the country. Other libraries are the Apprentices' (free), established in 1821, in Arch Street; that of the Catholic Philopatrian Literary Institute, in Locust Street; the Dial Library, in South Fifth Street; that of the German Society of Pennsylvania, in South Seventh Street; of the Library Association of Friends, in Race near Fifteenth Street; of the Mechanics' Institute of Southwark, in South Fifth Street; of St. Philip's Literary Institute, in Queen Street; of the Law Association of Philadelphia, at Sixth and Chestnut Streets; of the Moyamensing Literary Institute, at South Eleventh and Catharine Streets; of the Spring Garden Institute, at Broad and Spring Garden Streets; and the Southwark Library, in South Second Street. The latest statistics of the libraries above mentioned are as follows:

Libraries.	No. of vols.
Mercantile Library.....	112,000
Library Company of Philadelphia.....	100,000
Academy of Natural Sciences.....	26,000
Apprentices' Library.....	20,000
Athenæum of Philadelphia.....	30,000

Literaries.	No. of vols.

The Walnut Street Theatre, at Ninth and Walnut Street, seating 1,500, is chiefly devoted to the standard drama; it has a front of 90 feet and a depth of 146 feet, presenting from Walnut Street a façade in marble of two stories, with a range of Doric columns. The principal other theatres are the Arch Street, in Arch near Sixth Street, with a marble front, seating 1,800; the Chestnut Street, in Chestnut near Twelfth Street, one of the finest theatres in the country, seating 2,500; the American, in Chestnut near Tenth Street, seating 2,800; and the Grand Central, in Walnut near Eighth Street. The Museum is in Ninth and Arch Streets. Minstrel entertainments are given in the Arch Street Opera-House, in Arch near Tenth Street, and in the Eleventh Street Opera-House, in Eleventh near Chestnut Street. The Academy of Music, in Broad and Locust Streets, seating 3,000, was opened in 1857; it has a front of 140 feet and a depth of 238 feet. The exterior is of fine pressed brick, with handsome brown-stone trimmings, the façade being in the Byzantine style. The interior is elaborately ornamented. It is chiefly devoted to operas and classic concerts. Classic music may also be heard in the Musical Fund Hall, Locust near Ninth Street; in Concert Hall, Chestnut near Twelfth Street; and in Horticultural Hall.

There are 105 newspapers and periodicals, viz.: 17 daily (3 German), 2 tri-weekly, 1 semi-weekly, 40 weekly (5 German), 6 semi-monthly, 37 monthly (1 German), and 2 quarterly.

The number of church organizations, according to the census of 1870, was 388, with 424 edifices, 302,239 sittings, and \$18,330,667 property. The City Directory enumerates 488 churches and missions, viz.: 61 Baptist, 3 Congregational, 2 Disciples of Christ, 90 Episcopal, 7 Evangelical Association, 14 Friends' (7 Hicksite and 7 Orthodox), 11 Jewish, 26 Lutheran (14 English and 12 German), 91 Methodist Episcopal (several colored), 1 Methodist Protestant, 4 Moravian, 77 Presbyterian, 4 Reformed (late Dutch Reformed), 15 Reformed (late German Reformed), 11 Reformed Presbyterian, 42 Roman Catholic, 2 Second Advent, 3 Swedenborgian, 2 Unitarian, 11 United Presbyterian, 8 Universalist, and 8 miscellaneous.

* 8,000 German and 7,000 English.

PICKERSGILL, a British painter, born in 1782; died April 21, 1875. He was brought up to commercial pursuits, but accidentally began the study of art, for which he had always shown considerable taste. He was elected an A. R. A. when little more than thirty years of age, and in 1827 was admitted to the full honors of the Academy. He constantly exhibited from that time, and was particularly celebrated for his portraits.

PICKETT, General GEORGE E., Confederate leader in the civil war; died in Norfolk, Va., July 30, 1875. He was born in Henrico County, Va., January 25, 1825. In 1842 he entered the Military Academy at West Point, and, after completing his course there, was assigned to duty in the United States Army in Mexico, under General Winfield Scott, with the rank of brevet second-lieutenant. He accompanied the army in its advances on the city of Mexico, and took part in the battles of Contreras, Churubusco, Molino del Rey, and Chapultepec. During the Mexican War he was twice promoted, receiving the rank of captain at the battle last mentioned. At the close of the war, he was sent with his regiment (the Ninth Infantry) into the Territories, and was subsequently stationed on the Pacific coast, where he distinguished himself by his firmness and prudence in holding the disputed island of St. Juan when threatened by four British men-of-war. At the beginning of the civil war in 1861, Captain Pickett resigned his commission and accompanied General A. S. Johnston and others across the Plains and offered his services to the Confederate authorities in Richmond, from whom he received a colonel's commission, and was assigned to duty on the Rappahannock. Shortly afterward he was promoted to brigadier-general, and his command did gallant service at Yorktown, Williamsburg, Seven Pines, and in the seven days' fighting around Richmond. At Gaines's Mills, General Pickett was severely wounded, and forced to remain inactive for several months. On his return to the field he was commissioned major-general, and put in command of a division which was actively and daringly engaged in nearly every battle fought by the Army of Northern Virginia. At the battle of Gettysburg in 1863, he led his men to the desperate charge at Cemetery Hill. After this campaign, he was given an independent command in North Carolina and Lower Virginia. His command also was engaged in the later battles in 1864, around Richmond and Petersburg, and at Five Forks. General Pickett ended his military career in the fight of Sailor's Creek, April 6, 1865. After the surrender of General Lee, he retired to private life, and at the time of his death was the Virginia agent of the Washington Life Insurance Company of New York City. He distinguished himself as a dashing, daring, and stubborn fighter. After the war he took no part in public affairs.

PIGOTT, Sir GILLERY, M. P., born in 1818;

died April 28, 1875. He was educated privately at Putney, and called to the bar in 1839. He practised in the courts held in the Oxford circuit, and in 1856 was appointed a sergeant-at-law with patent of precedence. He was some time Recorder of Hereford, and in October, 1860, was elected by the Liberals to represent Reading in the British House of Commons. Sir Gillery Pigott continued in Parliament until October, 1863, when he was promoted to a judgeship in the Court of Exchequer, and received the honor of knighthood.

PORTUGAL, a kingdom in Southwestern Europe. King, Louis I., born October 31, 1838; succeeded his brother, King Pedro V., November 11, 1861; married October 6, 1862, to Pia, youngest daughter of King Victor Emmanuel of Italy. Issue of the union are two sons: Carlos, born September 28, 1863, and Alfonso, born July 31, 1865.

The area and population, according to the latest dates, are as follows:

PROVINCES.	Area.	Population in 1877.
Minho.....	2,781.96	9,65,040
Tras-os-Montes.....	4,277.43	869,897
Beira.....	9,249.45	1,299,253
Estremadura.....	6,910.75	849,819
Alentejo.....	9,408.59	835,735
Algarve.....	1,584.33	192,104
Total.....	34,507.55	4,011,908
Azores Islands.....	1,143.61	260,972
Madeira Islands.....	317.54	118,609
Total provinces and islands...	35,969.00	4,390,589

The area of the Portuguese possessions* in Asia and Africa is estimated at 740,365 square miles, and the population at 3,258,140.

The rival claims of Portugal and Great Britain to the territories of Tembe and Maputo, and Inyack and Elephantine Islands, situated in the bay of Delagoa or Lourenço Marques, in Eastern Africa, which the two powers had agreed, on September 15, 1872, to refer to the arbitration of the President of the French Republic, was decided on July 24, 1875, in favor of Portugal.

The public debt of Portugal dates from the year 1796, when the first loan of 4,000,000 milreis was raised. In 1835 it amounted to 55,000,000 milreis; in 1874, to 348,495,725.

The following were the gross sums of the budget estimates for the financial year 1876 (value expressed in contos and milreis: 1 conto = 1,000 milreis; 1 milreis = \$1.08; 5,652: 260 means 5,652 contos and 260 milreis):

REVENUE.	
1. Direct taxes.....	\$5,645,220
2. Register.....	2,598,200
3. Indirect taxes.....	11,831,330

The budget of the colonies for the year 1875-'76 was as follows:

COLONIES.	Revenue.	Expenditure.	Surplus.
	Milreis.	Milreis.	Milreis.
Cape Verd Islands.....	220,377	215,877	+ 1,500
St. Thomas and Principe.....	109,610	105,532	+ 4,058
Angola.....	565,974	556,111	+ 9,863
Mozambique.....	247,713	249,934	- 2,241
India.....	523,649	476,968	+ 51,681
Macao and Timor.....	354,331	322,702	+ 32,129
Total.....	2,027,154	1,980,164	+ 96,990

The trade of Portugal in 1872 was as follows (value expressed in francs):

COUNTRIES.	Imports.	Exports.
Great Britain.....	15,821,000	13,196,000
France.....	3,804,000	828,000
Spain.....	2,750,000	1,750,000
Russia.....	480,000	755,000
Germany.....	470,000	638,000
Sweden and Norway.....	513,000	209,000
Brazil.....	3,003,000	3,525,000
United States.....	1,210,000	211,000
Portuguese colonies.....	753,000	624,000
Other countries.....	822,000	1,450,000
Total, 1872.....	29,125,000	23,241,000
" 1871.....	27,160,000	21,260,000

The chief articles of import and export were:

MISCELLANEOUS.	Imports.	Exports.
Cereals.....	1,953,000	375,000
Seeds, fruits.....	501,000	8,651,000
Colonial produce.....	3,342,000	385,000
Beverages.....	250,000	9,317,000
Animals and animal provisions.....	3,197,000	1,886,000
a. Provisions and articles of indulgence.....	9,250,000	15,814,000
Minerals.....	1,388,000	2,263,000
Metals.....	3,651,000	420,000
Wood.....	680,000	1,851,000
Hides, skins.....	1,860,000	1,521,000
Materials for spinning textures.....	10,901,000	1,445,000
Other manufactured articles.....	1,236,000	427,000
b. Raw materials and manufactured articles.....	19,575,000	7,427,000
Total.....	29,125,000	23,241,000

The movement of shipping in 1872 was:

FLAG.	ENTERED.		CLEARED.	
	Sailing-Vessels.	Steamer.	Sailing-Vessels.	Steamers.
Portuguese:				
Sea-going vessels.....	771	36	1,082	49
Coast ".....	5,021	395	4,872	392
Foreign.....	2,983	1,653	3,060	1,662
Total.....	8,775	2,092	9,014	2,104

The commercial navy of Portugal consisted, in 1874, of 552 vessels. The total length of railways in operation was, at the close of 1875, 1,033 kilometres. The aggregate length of telegraph-lines was 3,786; and of telegraph-wires, 4,812 kilometres.

The military system is based on the law of June 23, 1864, which has been modified by several decrees of the year 1868, as well as by a decree of October 4, 1869. The strength of the army on August 31, 1875, on the peace-footing, was 1,642 officers and 37,316 men; on the war-footing, 2,418 officers and 70,687 men.

The Portuguese Cortes were opened by the King on January 3d. The speech from the throne announced bills relative to the public schools, the introduction of new codes and the progress of public works. The session was closed on April 6th. The most important act of the session relates to the emancipation of the people known as freedmen, and was passed in March, but not promulgated until the 11th of May. The act provides that one year after the publication of the law in the ultramarine provinces the condition of servitude established by decree of February 25, 1869, will be considered extinct, and all those persons to whom it refers will be declared free. Persons who thus obtain their liberty remain subject to public tutelage. Excepted from this tutelage are all persons employed in public or private schools, or who profess or are actually employed in any art, skilled labor, or public office, and who can read and write. The public tutelage ceases by law on April 29, 1878. In each of the provinces of Angola, Mozambique, and St. Thomas and Principe, there shall be appointed by the Government a magistrate (curator-general) whose duty it shall be to perform in the said provinces the duties in regard to public tutelage. The persons who remain subject to public tutelage must contract for two years' service, and the former masters shall have the preference in these contracts if they desire it. Provision is made for indemnifying all persons who were entitled to the labor of the freedmen. All persons or freedmen who shall be brought into any of the ultramarine provinces from and after the date of the publication of this law, shall be considered free. The minister resident of the United States in Lisbon, Benjamin Moran, reported in July that the Portuguese Government was in earnest in its endeavors to put down the African slave-trade, and that the governors of its colonies on both the east and west coasts of Africa had been directed to use their best efforts to that end. A request from the Governor of Mozambique for naval aid to enable him to assist in suppressing the traffic, there being surreptitiously carried on by Arabs along that coast, was not only granted to the fullest extent of the naval power of the Portuguese Government, but, in one important instance, where he had spontaneously permitted

British vessels-of-war to follow slavers into the creeks and bays of the colony, his action was cordially approved.

POTGIETER, EVERHARD JOHANA, a Dutch poet, born at Zwolle, in 1808; died March 3, 1875. Barely twenty years old, he entered a business house in Antwerp, but returned to his native country when Belgium obtained her independence. His first poetical attempts were made in 1827. In 1834 he assumed the editorship of the *Muzen*, and four years later that of the annual publication, "Tesselschade." In 1836 he published his "Omtrekken en tafereelen," and in 1843 was appointed editor-in-chief of *De Gids*, at that time one of the most influential and best edited journals of Holland. This position he retained until 1866. In 1865 he visited Florence on the occasion of the sixth centennial anniversary of Dante's birth. The impressions he received there he expressed in "Florence," a poem of over 3,000 verses written in *terzine*. The unusual metre attracted general attention to this work, and, as it was well executed, it gained for him a considerable reputation. In 1864 he published his collected prose writings, and from 1868-'74 his poems.

PRESBYTERIANS. I. PRESBYTERIAN CHURCH IN THE UNITED STATES OF AMERICA.

—The following is a summary of the statistics of this Church by synods, as they were reported to the General Assembly in May, 1875:

Total.....	180	569	6,901	12,509

The reports showed also 76 native licentiates (9 in Mexico, 3 in South America, 3 in Africa, 3 in Siam, 16 in China, and 42 in Persia). Of the "lay teachers and others," 167 were American, and 391 native.

The *General Assembly* of the Presbyterian Church in the United States of America met at Cleveland, Ohio, May 20th. The Rev. E. D. Morris, D. D., of Lane Seminary, Cincinnati, Ohio, was chosen moderator. The committee who had been appointed to confer with a committee of the Presbyterian Church in the United States (Southern), with respect to establishing fraternal relations between the two bodies, made a report of the proceedings and results of the conferences that had been held at Baltimore, beginning January 7th. They had not been able to reach any agreement. The conference, said the committee's report, was continued through a period of several days with a spirit of calmness, and deliberation, and Christian courtesy, from both sides. The report continued:

We are happy to state that the conclusions of our committee, representing as it did all the different opinions prevailing among us, with reference to the so-called war deliverances of former Assemblies, were in all cases unanimous. In our actions we endeavored to carry out faithfully, and to the farthest extreme, the instructions given us by the Assembly from which we received our appointments, as well as the spirit prompting and controlling the action of the last Assembly.

VOL. XV.—41 A

The report then gave a brief summary of the correspondence which passed between the two committees, after which it added:

Your committee report that they were disappointed in their own personal desire, as well as that of the whole Church which they represent, to establish fraternal relations with the Assembly South on terms of mutual confidence, respect, Christian honor, and love; but, while the result grieves us, we have the assurance that we did all that we were authorized to do by the venerable body that appointed us. Nor did we keep back anything that we could say consistent with truth and fidelity to principle and charity, in order to secure the result we so much desire.

The report was adopted. The Assembly also adopted the following resolution on the subject of the report:

Resolved, That this Assembly deeply regrets that the negotiations in reference to fraternal correspondence between the Presbyterian Church in the United States (popularly known as the Presbyterian Church, South) have failed; that the Assembly deems it inexpedient to press the question of fraternal relations at present by further negotiations, through the appointment of another committee; at the same time the Assembly avails itself of this opportunity to affirm unequivocally its confidence in the integrity and Christian character of our brethren of the Southern Church, and to declare that all the acts and deliverances of the Northern Assemblies of which they complain are wholly null and void, and of no binding efficacy as judgments of the Church we represent, or as rules of procedure for its Presbyteries and Church sessions, and that in so far as they, or any of them, can be supposed to import any injurious imputations upon the present character and

standing of the churches and members of the Southern Assembly as Christians and Presbyterians, such an application of them would be unjust to them, and would be disapproved and regretted by us; and further to reaffirm explicitly, in harmony with the repeated and emphatic deliverances of former Assemblies, our hearty willingness and our earnest and sincere desire for the reestablishment of fraternal relations between the two bodies on terms and conditions which shall be mutually honorable and in the spirit of Christian charity, forbearance, and brotherly love, and that we wait, in charity and hope, the early coming of the day when we shall again mingle with our brethren of the Southern Church in Christian fellowship and coöperation.

A motion was made to strike out the word "present" from the resolution, but was rejected by the Assembly. Near the close of the session a letter was received from a member of the Southern General Assembly, which was then in session at St. Louis, stating that, if the word "present" were struck out, the Southern Assembly would appoint fraternal delegates. It was decided that such action would be out of order, as the subject had already been considered and fully disposed of. The Committee on the Federal Union of Presbyterian Churches, or Presbyterian Confederation, made a report of their proceedings. A meeting of committees of various Presbyterian and Reformed bodies had been held in New York City, and had prepared a draft of a constitution for the proposed Confederation, to be submitted to the General Conference to be held in London, July 21st. They recommended as delegates to the Conference the Rev. Messrs. R. M. Patterson, of Philadelphia; O. W. Thomas, of the Presbytery of Chester; S. M. Hamilton, of New York; James McCosh, LL. D., of Princeton, N. J.; J. H. Munro, D. D., of Philadelphia; T. H. Robinson, D. D., of Harrisburg, Pa.; John Hall, D. D., of New York; A. O. McClelland, of Pittsburg, Pa.; and Messrs. William E. Dodge, Jr., Morris K. Jessup, John Wanamaker, and J. Blair Scribner. The Assembly also, "in view of the fact that the question of calling a Presbyterian Council was suggested in the Assembly of 1873, and further considered in the Assembly of 1874, and answered in the Assembly of 1875," appointed the moderators of these three Assemblies, viz.: the Rev. Howard Crosby, D. D., LL. D., 1873; the Rev. Samuel Wilson, D. D., LL. D., 1874; and the Rev. Edward D. Morris, D. D., 1875, together with the stated clerk, the Rev. Edwin F. Hatfield, D. D., as delegates to the London meeting, with power to substitute or add to their number ministers or laymen. The following overture, providing for what was called a *term* or *rotary* eldership, had been submitted to the Presbyteries by the General Assembly of 1874:

ART. VIII. If any particular Church, by a vote of members in full communion, shall prefer to elect ruling elders for a limited time in the exercise of their functions, this may be done; provided the full time be not less than three years, and the Session be made to consist of three classes, one of which only shall be elected every year; and, provided, that

elders once ordained shall not be divested of the office when they are not reelected, but shall be entitled to represent that particular Church in the highest judicatories, when appointed by the Sessions or the Presbytery.

The number of Presbyteries connected with the General Assembly was 173, of which 87 constituted a majority. Answers to the overture had been received from 139 Presbyteries, of which 100 had answered in the affirmative. 86 had answered in the negative, and three were returned as equally divided. It being shown that a majority of all the Presbyteries had answered in the affirmative, the overtures were declared as an additional section of the form of government, and as a part of the constitution of the Church.

The committee appointed by the General Assembly in 1873, and continued in 1874, to confer with a committee of the General Synod of the Reformed Church in America, reported that that Church declined to enter into negotiations for union, but would consider plans for coöperation in certain departments of work. The committee were continued, and were authorized to confer upon this subject. The committee appointed to consider the subject of participation in the Centennial Celebration of American Independence reported that they had designated the Rev. A. J. Macgill, D. D.; the Rev. E. H. Gillette, D. D.; the Rev. Samuel Wilson, D. D.; the Rev. E. P. Humphreys, D. D.; and the Rev. William Adams, D. D., to deliver five of the historical discourses contemplated in the plan for a celebration which had been adopted by the previous General Assembly, and that these gentlemen had all accepted their appointments. The historical sketches of the several boards and other agencies established by the General Assembly would be prepared by persons designated by the boards and agencies. The Assembly reiterated its former declarations on the subject of temperance. Parents were advised to pay greater attention to the religious instruction of children at home. The Societies for the Prevention of Cruelty to Animals were commended.

The Rev. E. D. Morris, Moderator of the General Assembly of the Presbyterian Church in the United States of America, was born in Utica, N. Y., in 1825, and was graduated at Yale College in 1849, and at the Theological Seminary at Auburn, N. Y., in 1852. He was afterward pastor of the First Presbyterian Church at Auburn, until 1855, when he accepted a call to the Second Presbyterian Church of Columbus, Ohio. In 1868 he was called to the chair of Ecclesiastical History and Church Polity in Lane Theological Seminary, Cincinnati, Ohio, and in 1874 he succeeded the Rev. Henry A. Nelson, D. D., as Professor of Systematic Theology in the same institution.

II. PRESBYTERIAN CHURCH IN THE UNITED STATES.—The following is the general summary of the statistics of this Church, as published in the "Minutes of the General Assembly of 1875."

The statistics for 1874 are also given for comparison :

MISCELLANEOUS.	1874.	1875.
Synods in connection with the General Assembly	19	19
Presbyteries	64	64
Ministers and licentiates	1,068	1,094
Candidates for the ministry	199	187
Number of churches	1,764	1,797
Licensures	68	48
Ordinations	45	41
Installations	65	70
Pastoral relations dissolved	35	46
Churches organized	49	56
Churches dissolved	10	15
Ministers received from other denominations	5	7
Ministers dismissed to other denominations	8	9
Elders		5,065
Deacons		2,867
Members added on examination	7,139	8,616
Members added on certificate	8,429	2,867
Whole number of communicants	105,956	107,384
Churches not reporting (exclusive of Synod of Missouri)	78	128
Adults baptized	2,017	2,453
Infants baptized	4,249	4,693
Number of baptized non-communicants		21,075
Children in Sabbath-schools and Bible-classes	60,298	67,056
MONEY CONTRIBUTED.		
Sustentation and presbyterial domestic missions	\$55,986	
Sustentation		\$34,665
Evangelistic fund		20,675
Foreign missions	28,958	88,693
Education	51,860	88,750
Publication	15,808	18,190
Presbyterial		11,707
Invalid fund	9,918	9,185
Pastors' salaries	494,164	550,270
Congregational purposes	396,641	399,583
Miscellaneous	68,681	55,412
Total	\$1,167,461	\$1,157,037

The missionary force consisted of twenty-seven ordained missionaries, eight of whom were natives of the countries in which they were laboring, twenty-seven assistant missionaries from the United States, and sixteen native helpers, or seventy laborers in all. Sixteen principal stations had been established, of which six were in the Indian country of the United States, one in Mexico, two in the United States of Colombia, two in Brazil, one in Italy, two in Greece, and one in China. Each of these stations was occupied by one or more ordained ministers. There were besides between fifteen and twenty out-stations where stated preaching was maintained, and ten schools of various grades, with upward of four hundred pupils.

The *General Assembly* of the Presbyterian Church in the United States met at St. Louis, Mo., May 20th. The Rev. M. D. Hoge, D. D., of Virginia, was chosen moderator. The committee who had been appointed to confer with a committee of the Reformed Church of America with reference to a plan for the coöperation of the two bodies in certain departments of the work of missions and publication, reported that a conference of the two committees had been held in the city of New York, January 15th, and that a plan of coöperation had been agreed upon. The plan was laid be-

fore the Assembly, and recommended for adoption. The committee who had been appointed at the previous meeting of the General Assembly "to meet with the committee appointed by the Northern General Assembly, and enter fully into conference concerning the removal of those causes which have heretofore prevented fraternal relations between the two Churches," reported a full minute of the proceedings of the joint meeting of the committees held at Baltimore, June 27th. The conference had failed to accomplish the object for which it met. The committee were discharged, and the Assembly ordered the following minute to be made:

This Assembly, in the name of the whole Church, tenders special thanks to the committee of conference for the diligence, fidelity, and Christian prudence, with which they have discharged the delicate and important trust committed to them, and, while regretting the failure of the conference as to its chief end, hereby approves in general the course of the committee, and, in particular, approves and indorses, as satisfactory to the Southern Church, the condition precedent to fraternal relations suggested by our committee, viz.: "If your Assembly could see its way clear to say in a few plain words to this effect—that these obnoxious things were said and done in times of great excitement, and are to be regretted, and that now, in a calm review, the imputations cast upon the Southern Church, of schism, heresy, and blasphemy, are disapproved—that would end the difficulty at once."

The subject of the proposed Federal Union of the Presbyterian Churches of the World was carefully considered and discussed. A "Committee on Confederation of the Presbyterian Churches of the World" was appointed, with authority to correspond with similar committees of other Presbyterian bodies in reference to the constitution to be proposed in the contemplated General Council, and, if they (the committee) should deem it wise and practicable, to appoint delegates to the proposed Conference to be held in London, July 21, 1875. The committee decided in favor of sending delegates to the Conference, and appointed as such the Rev. Dr. Stuart Robinson, the Rev. Dr. J. A. Lefevre, and the Rev. Dr. M. D. Hoge. The following resolution was passed, and the committee contemplated by it was appointed:

Whereas, The General Assembly of the Presbyterian Church, in the United States, did at its first organization in 1861, and also at various times since, finally and distinctly declare its conviction as to the nature and function of the Church of the Lord Jesus Christ, especially as to its non-secular and non-political character; and—

Whereas, Notwithstanding this it may be that certain expressions have been inadvertently admitted into some of the papers on our records, which it is alleged are inconsistent with the well-considered and formal views aforesaid: therefore—

Resolved, That this subject be referred to a committee of three whose duty it shall be to make a careful examination, and make a report to the next General Assembly, to the end that no vestige of anything inconsistent with the clearly-defined position of our Assemblies may be left to impair the testimony of our Church upon this vital point.

A committee was appointed to take "into

consideration the subject of establishing an institute for the education of colored preachers, with instructions, if they deem it expedient and practicable, to digest a plan for the organization, management, and support of such a school, and report to the next Assembly.

III. UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.—The following is a general summary of the statistics of this Church as they were reported to the General Assembly in May: Number of synods, 8; of presbyteries, 56; of ministers, 611; of licentiates, 74; of congregations, 777; of mission-stations, 34; of members, 76,063; of adults baptized, 500; of infants baptized, 3,961; of Sunday-schools, 636; of officers and teachers in the same, 6,311; of Sunday-school scholars, 53,232; amount of contributions by Sunday-schools, \$24,234.

Contributions: For salaries of pastor's, \$451,695; for congregational expenses, \$255,525; to the boards, \$103,025; general contributions, \$62,818; total contributions, \$872,758; legacies, \$21,237; average amount of contribution per member, \$12.31; average salary of pastors, \$1,012.

The total receipts of the *Board of Education* were reported to have been for the year \$10,457.88; and its expenditures, \$9,484.52. Twenty-eight students had received aid from the funds of the Church through this board, of whom thirteen were students of theology. The *Board of Publication* reported that their total assets were \$119,874.90; of which \$49,147.49 were in the shape of real estate, and \$3,411.32 cash. Their liabilities were \$25,265.43. The board had a capital stock of \$94,609.47. The sales had been \$23,103.17.

The *General Assembly* of the United Presbyterian Church of North America met at Wooster, Ohio, May 26th. The Rev. W. W. Barr, D. D., was chosen moderator. Each Synod under the care of the Assembly was directed to spend at least one session in each year in conference on the subject of Sunday-schools. Special services of prayer and preaching, in which the laymen should be encouraged to participate, were recommended to the congregations to be held at convenient times throughout the year. The Benevolent Boards of the Church had heretofore filled all vacancies in their number by nominations made by themselves. It was found that under this system one person was often chosen to serve in two or more boards at the same time. In order to obviate this difficulty, the Assembly created a standing committee on nominations whose duty it should be to nominate persons to fill the vacancies occurring in all the boards each year. The Assembly presented the following as an outline of what should be the educational policy of the Church:

1. So to equip and endow her existing colleges as to fit them for doing their work as efficiently as possible.

2. Not to establish any additional colleges until this work has been fully accomplished,

and until the Church is able and willing to make the new enterprise successful.

8. To make all its institutions thoroughly Christian in both form and fact. The Board of Freedmen's Missions were directed to proceed immediately to erect the necessary buildings for a mission training-school among the freedmen, and to open the school as soon as possible. The Associate Reformed Synod of the South was invited to cooperate in this work. The resolution of the Associate Reformed Synod of the South to cooperate with the General Assembly in its mission-work was acknowledged, and the hope was expressed that "the time is approaching when more intimate relations (between the two bodies) may be established." The Assembly again adopted resolutions against the manufacture and sale of intoxicating liquors.

The committee appointed by the previous General Assembly on the subject of confederation of Presbyterian Churches reported that it had met with the committees of the other churches which had approved of the movement, and had arranged a plan of confederation, and had participated in the call for a council to be held in London, in July, 1875. The action of the committee was approved.

The following resolutions bearing on this subject were adopted:

Whereas, Several churches adhering to Presbyterian polity and Calvinistic doctrine are, on conscientious grounds, opposed to the use of uninspired hymns in the worship of God; and—

Whereas, The inspired Book of Psalms has been acknowledged by every branch of the Church of Christ, at least by every Presbyterian one, to contain matter suitable for praise in the service of song; and—

Whereas, The exclusive use of the hymns embraced in this sacred collection by the proposed confederation in its meetings would not only evince a generous regard for the cherished convictions of many Presbyterians, but also, it is believed, tend to prove and promote the unity of the Church of Christ; therefore—

Resolved, That this Assembly, respectfully but earnestly, asks that, in the particular referred to, the "consensus of the Reformed Churches" be respected by the confederation in its devotional exercises, and that a specific guarantee to this effect be incorporated in the constitution which may be adopted.

Resolved, Further, that our committee be directed to urge this matter, by letter or otherwise, in the convention about to be held in London.

IV. ASSOCIATE REFORMED PRESBYTERIAN CHURCH.—The Associate Reformed Synod of the South met at Due West, S. C., September 23d. The Rev. James A. Lowry was chosen moderator. An arrangement for cooperative in missionary work had been effected with the Board of Missions of the United Presbyterian Church, under which Miss Mary E. Galloway had joined the mission of that Church in Egypt to be supported by the Synod. A report was made of the action of the Conference held at London in July, for the formation of an Alliance of the Presbyterian Churches of the world. The Synod of the year before had given a geo-

eral approval of the object of this council, although it was not actually represented in it. A resolution was adopted, again approving the object of the Alliance, and the constitution which had been adopted by the Conference in London. The Rev. James Boyce, D. D., was appointed a delegate to represent the Synod at the Conference to be held at Edinburgh, Scotland, in 1876.

Committees appointed by the General Assembly of the United Presbyterian Church and by the Associate Reformed Synod of the South for that purpose, met in Baltimore, December 15th, to confer with reference to co-operation of the two bodies in such departments of their respective works as admitted of it. The conference resulted in the adoption of resolutions recommending a plan which will be submitted in 1876 to the General Assembly of the United Presbyterian Church and to the Associate Reformed Synod of the South for adoption.

V. REFORMED PRESBYTERIAN CHURCHES.—The *General Synod* of the Reformed Presbyterian Church in North America met at Coulterville, Randolph County, Ill., May 19th. The Rev. A. R. Gailey, of the Chicago Presbytery, was chosen moderator. The Committee on a Federative Union of the Presbyterian and Reformed Churches submitted a report on the joint meeting of the committees of the several denominations, held in New York in April. The General Synod disapproved of the course pursued by the committee, and resolved to take no further action on the subject at present. The measures taken by the General Synod to obtain possession of the property of a church in Philadelphia which had suspended relations with it were referred by the Supreme Court of Pennsylvania in 1873 to S. C. Perkins, Esq., Master in Chancery. He gave a decision in January, 1875, adverse to the claims of the General Synod, and embodying the following points:

1. That in Pennsylvania the law "requires an examination by the civil court of the ecclesiastical constitution, rules, and regulations," of the party applying for relief.
2. That, to obtain relief from the civil court, the ecclesiastical court must be able to show that it has acted up to its own laws and regulations.
3. That the Reformed Presbyterian Synod, in this case, has not acted in accordance with its own constitution and laws, but in violation of them, and therefore it denies the relief sought.

The other branch of the Church, the "Synod of the Reformed Presbyterian Church," met at Coulterville, Ill., May 26th. The Rev. James Kennedy, of New York City, was chosen moderator. The Rev. J. R. W. Sloane, D. D., the Rev. J. L. McCartney, and Elder Walter T. Miller, of New York, were appointed commissioners to the General Council of Presbyterian Churches, which was called to meet in London on the 21st of July. No specific instructions were issued to the commissioners, but it was distinctly understood by all that the

testimony of the Reformed Presbyterian Church on the subject of Scriptural Psalmody, and other distinctive points, should be carefully guarded.

VI. CUMBERLAND PRESBYTERIAN CHURCH.—The minutes of the General Assembly of the Cumberland Presbyterian Church for 1875 give the names of 1,225 ministers, who are distributed among the States as follows: Tennessee, 266; Missouri, 174; Texas, 168; Illinois, 129; Arkansas, 101; Kentucky, 98; Mississippi, 60; Alabama, 54; Indiana, 29; California, 20; Iowa, 20; Kansas, 19; Pennsylvania, 19; Oregon, 14; Ohio, 13; Georgia, 12; Washington Territory, 7; Choctaw Nation, 6; Nebraska, 6; Colorado, 5; Louisiana, 8; Nevada, 1; New York, 1. The minutes also give a list of 263 licentiates, and of 207 candidates for the ministry, making the total number of ministers, licentiates, and candidates, 1,695.

The forty-fifth *General Assembly* of the Cumberland Presbyterian Church met at Jefferson, Texas, May 20th. The Rev. W. S. Campbell, D. D., of Illinois, was elected moderator. The Assembly declared that the Sunday-schools of the Church should be under the supervision and control of the pastors and sessions of the congregations, and urged the importance of parental training of children in the doctrines and usages of the Church, and of catechetical instruction. The decisions of former General Assemblies that "to use or in any way encourage the use of intoxicating drinks as a beverage is an immorality, and merits the censure of the Church," were reiterated.

VII. PRESBYTERIAN CHURCH OF CANADA.—The following are summaries of the statistical returns of the churches which have united in the Presbyterian Church of Canada: *Presbyterian Church of Canada in connection with the Church of Scotland*: Ministers, 141; average stipend, \$842; congregations, 179; communicants, 17,247; teachers in the Sunday-schools, 1,193; scholars in the same, 18,401. *Canada Presbyterian Church*: Ministers, 338; average stipend, \$700; congregations, 650; communicants, 50,702; teachers in the Sunday-schools, 4,097; scholars in the same, 43,536. *Presbyterian Church of the Lower Provinces*: Ministers, 124; average stipend, \$947; congregations, 188; communicants, 18,082; teachers in the Sunday-schools, 1,710; scholars in the same, 13,401. *Presbyterian Church of the Maritime Provinces in connection with the Church of Scotland*: Ministers, 81; average stipend, \$840; congregations, 41; elders, 228; communicants, 4,622; teachers in the Sunday-schools, 474; scholars in the same, 4,970. *Total*: Ministers, 634; congregations, 1,119; communicants, 90,653; teachers in the Sunday-schools, 7,471; scholars in the same, 73,394.

The *General Assembly* and the three Synods met for the last time as separate organizations, Tuesday morning, June 15th. After being constituted, each marched, with its moderator

at its head, to the Victoria Hall, where the joint meeting was held. The four moderators occupied seats together upon the platform. After devotional exercises, the minutes of the last meetings of the several synods were read by their respective clerks. The Rev. William Reid, joint Clerk of the Canada Presbyterian Church, the oldest of the clerks in point of ordination, read the preamble and basis of union with the accompanying resolutions. The preamble and basis are as follows:

The Presbyterian Church of Canada in connection with the Church of Scotland, the Canada Presbyterian Church, the Church of the Maritime Provinces in connection with the Church of Scotland, and the Presbyterian Church of the Lower Provinces, holding the same doctrine, government, and discipline; believing that it would be for the glory of God and the advancement of the cause of Christ that they should unite and thus form one Presbyterian Church in the Dominion, independent of all other churches in its jurisdiction, and under authority to Christ alone, the Head of his Church and Head over all things to the Church, agree to unite on the following basis to be subscribed by the moderators of the respective churches, in their name and on their behalf:

1. The Scriptures of the Old and New Testaments, being the word of God, are the only infallible rule of faith and morals.

2. The Westminster Confession of Faith shall form the subordinate standard of the Church; the Larger and Shorter Catechisms shall be adopted by the Church and appointed to be used for the instruction of the people; it being distinctly understood that nothing contained in the aforesaid Confession and Catechisms regarding the power and duty of the civil magistrate shall be held to sanction any views or principles inconsistent with full liberty of conscience in matters of religion.

3. The government and worship of this Church shall be in accordance with the recognized principles and practice of Presbyterian Churches as laid down generally in "The Form of Presbyterian Church Government," and in "The Directory for the Public Worship of God."

The resolutions accompanying the articles provide more definitely for the adjustment of various interests of the uniting churches and other details which it seemed necessary to arrange in advance of union. Each of the four moderators then signed the engrossed copy of the preamble, basis, and resolutions, the members of each Synod rising to their feet during the act in attestation of their approval. In affixing his signature, each moderator made the following declaration: "In the name and by the appointment of —" (here follows the name of the Church), "I affix my signature to the above articles and resolutions now read." The Rev. P. G. McGregor, of the Synod of the Lower Provinces, the oldest of the moderators in point of ordination, then declared the Union consummated in the following terms:

The moderators of the Presbyterian Church in Canada, in connection with the Church of Scotland, of the Canada Presbyterian Church, of the Presbyterian Church of the Lower Provinces, and of the Presbyterian Church of the Maritime Provinces, having signed the terms of union in the name of their respective churches, I declare these churches do form one Church, to be known and designated as the Presbyterian Church of Canada.

The Rev. John Cook, D. D., Principal of Morrin College, Quebec, was chosen Moderator of the Assembly of the united Church. The Assembly the next day addressed itself to the business of adjusting the organization of the Church. Five synods were constituted, to be known as the Synods of the Maritime Provinces of Montreal and Ottawa, of Toronto, of Hamilton and London, and of Manitoba. It was argued that the next General Assembly should consist of all the ministers and elders of the Church. A committee was appointed to prepare a draft act for the future organization of the General Assembly, to be presented for the consideration of the presbyteries. A standing committee was elected, to be charged with the consideration of ecclesiastical procedure, parliamentary legislation, synodical functions, financial, missionary, and other schemes, to meet in Montreal, on the ensuing 1st of September, and to report to the next General Assembly.

VIII. CHURCH OF SCOTLAND.—The *General Assembly* of the Established Church of Scotland met at Edinburgh, May 20th. The Rev. Dr. James Sellar was chosen moderator. The Committee on Christian Life and Work reported that returns had been received from 711 parishes, which showed that, out of a population of 1,886,077, 681,635 belonged to the Established Church; and that 1,121 parishes and chapels had voluntarily contributed £272,588 during the year, or £41,706 more than had been reported the year before by 1,171 parishes.

IX. FREE CHURCH OF SCOTLAND.—The *General Assembly* of the Free Church of Scotland met at Edinburgh, May 20th. The Rev. Dr. Alexander Stuart, of Edinburgh, convener of the Jewish Mission, was chosen moderator. The financial report showed the income of the several funds of the Church from March 31, 1874, to March 31, 1875, to have been: of the sustentation fund, £163,168; of the local building fund, £61,631; of the congregational fund, £158,906; of the fund for missions and education, £93,857; miscellaneous, £47,862: total, £525,424. The exhibit showed a total increase for the year of £14,340. The report of the colleges stated that during the last session 116 students had attended in Edinburgh, 56 in Glasgow, and 23 in Aberdeen. Report was made that the Reformed Presbyterian Church was prepared to accept the formula of the Free Church, with reference to union. A committee was appointed to prepare an overture on the subject, to be submitted to the presbyteries.

X. REFORMED PRESBYTERIAN CHURCH OF SCOTLAND.—The Synod of the Reformed Presbyterian Church of Scotland met at Glasgow, early in May. The number of members of the Church was reported to be 57,335; and the contributions for the year, for all purposes, had been £13,724. The previous Synod had taken steps toward negotiation for union with the Free Church of Scotland. It was now de-

cided, by a vote of 56 to 4, to unite with that Church, if no objection was interposed on its part.

XI. UNITED PRESBYTERIAN CHURCH IN SCOTLAND.—The statistical reports of this Church, made to the General Synod in May, showed it to have 616 congregations, 187,761 members, 11,857 Sunday-school teachers, and 84,224 scholars in Sunday-schools. The total income of the Church during the past year had been £364,023; of this amount, £346,984 were from sources rated as "ordinary" ones; £260,990 of it were contributed for congregational, and £85,943 for benevolent missionary purposes. The average ratio of contributions through the Church was reckoned to be £1 17s. per member. Six hundred ministers were enjoying an average stipend of £240 sterling a year. In the ten years ending December 31, 1874, the Church had raised an aggregate of £3,901,297 from voluntary contributions.

XII. ENGLISH PRESBYTERIAN CHURCH.—The following statistics of this Church were reported at the meeting of the Synod, May 3d: Number of charges, 163; of ministers, 138; of communicants, 26,856; of Sunday-school teachers, 2,935; of Sunday-school scholars, 27,784. The total income of the Church for the year was £95,791. The following items of receipts were specifically given: for stipends, £34,739; for the college, £1,668; for the sustentation fund, £16,531 (making an equal dividend of £150); for the Continental Mission, £269; for the church-building fund, £2,629; for the debt-extinction fund, £3,757.

XIII. IRISH PRESBYTERIAN CHURCH.—The statistical reports of this Church, as presented to the General Assembly in June, showed the number of communicants to be 109,156. The entire amount raised for all church purposes was £142,459,155, or £6,810 more than were raised the preceding year. The amount of church debts was £53,519, an increase of £9,138.

The Assembly unanimously resolved to adhere firmly to the principle of united non-sectarian education as opposed to the denominational system, expressed its condemnation of the proposal to establish non-vested training-colleges, and approved the model schools as being the essential and most valuable part of the national system. Favorable reports were received from the Belfast and Derry Colleges.

XIV. ALLIANCE OF PRESBYTERIAN AND REFORMED CHURCHES.—A delegate meeting of the several branches of the Presbyterian and Reformed Churches in America was held in the city of New York, in December, 1874, to consider the subject of a Federal Union of the Presbyterian and Reformed Churches of the World. This meeting appointed a committee to prepare a draft for a constitution for the proposed confederation, to be considered at the General Conference of Presbyterian and Reformed Churches, to be held in London on the 21st of July, 1875. The committee held its

final meeting April 20th, when a *draft of a proposed constitution of a confederation of Reformed Churches holding to the Presbyterian system* was submitted and unanimously approved. Several of the most important points in this draft were embodied in the constitution ultimately adopted in London.

A meeting for the organization of an alliance of Reformed Churches throughout the world, holding to the Presbyterian system, was held in London, July 20th to 23d. The following churches were represented, either by delegates or by letters approving the movement, viz.: the Presbyterian Church of the United States of America; the Presbyterian Church of the United States (Southern); the Reformed Presbyterian Church (Old School) of the United States; the Reformed Church in America; the Presbyterian Church in England; the Synod of the Church of Scotland in England; the Calvinistic Methodists of North and South Wales; the Established Church of Scotland; the Free Church of Scotland; the United Presbyterian Church of Scotland; the Reformed Presbyterian Church of Scotland; the Presbyterian Church of Ireland; the Presbyterian Church of Canada; the Evangelical French Church of Canada; the Presbyterian Church of Otago, New Zealand; the Presbyterian Church of Victoria, Australia; the Presbyterian Church of New South Wales; the Reformed Church of France; the Missionary Church of Belgium; the Evangelical Church of the Canton de Vaud; the Evangelical Church of Neuchâtel; the Waldensian Church of Italy; the Protestant Church of Spain; the Free Church of Germany; the old Reformed Church of Bethel, East Friesland. A letter of sympathy was also read from representatives of the Hungarian Reformed Churches. About ninety delegates were actually present, and took part in the proceedings. The Rev. James McCosh, D. D., of Princeton, N. J., was chosen moderator of the meeting, and ultimately President of the Alliance.

The following constitution for the Alliance was unanimously adopted:

GENERAL PRESBYTERIAN COUNCIL.

PREAMBLE.

Whereas, Churches holding the Reformed faith, and organized on Presbyterian principles, are found, though under a variety of names, in different parts of the world; and—

Whereas, Many of those were long wont to maintain close relations, but are at present united by no visible bond, whether of fellowship or of work; and—

Whereas, In the providence of God the time seems to have come when they may all more fully manifest their essential oneness, have closer communion with each other, and promote great causes by joint action:

It is agreed to form a Presbyterian Alliance to meet in General Council from time to time, in order to confer upon matters of common interest, and to further the ends for which the Church has been constituted by her Divine Lord and only King. In forming this Alliance the Presbyterian Churches do not mean to change their fraternal relations with other churches, but will be ready as heretofore to

join with them in Christian fellowship, and in advancing the cause of the Redeemer on the general principle maintained and taught in the Reformed Confession, that the Church of God on earth, though composed of many members, is one body in the Communion of the Holy Ghost, of which body Christ is the Supreme Head, and the Scriptures alone the infallible law.

ARTICLES.

I. **DESIGNATION.**—This Alliance shall be known as "The Alliance of the Reformed Churches throughout the world holding the Presbyterian system."

II. **MEMBERSHIP.**—Any church organized on Presbyterian principles which holds the supreme authority of the Scriptures of the Old and New Testaments in matters of faith and morals, and whose creed is in harmony with the Consensus of the Reformed Confessions, shall be eligible for admission into the Alliance.

III. **THE COUNCIL.** 1. *Its Meetings.*—The Alliance shall meet in General Council ordinarily once in three years.

2. *Its Constituency.*—The Council shall consist of delegates being ministers and ruling elders appointed by the churches forming the Alliance, the number from each church being regulated by a plan sanctioned by the Council, regard being had generally to the number of congregations in the several churches. The delegates, as far as practicable, to consist of an equal number of ministers and ruling elders. The Council may, on a recommendation of a committee on business, invite Presbyterian brethren not delegates to offer suggestions, to deliver addresses, and to read papers.

3. *Its Powers.*—The Council shall have power to decide upon the applications of churches desiring to join the Alliance; it shall have the power to entertain and consider topics which may be brought before it by any church represented in the Council, or by any member of the Council, on their being transmitted in the manner hereinafter provided; but it shall not interfere with the existing creed or constitution of any church in the Alliance, or with its internal order or external relations.

4. *Its Objects.*—The Council shall consider questions of general interest to the Presbyterian community; it shall seek the welfare of churches, especially such as are weak or persecuted; it shall gather and disseminate information concerning the kingdom of Christ throughout the world; it shall commend the Presbyterian system as Scriptural, and as combining simplicity, efficiency, and adaptation to all times and conditions; it shall also entertain all subjects directly connected with the work of evangelization, such as the relation of the Christian Church to the evangelization of the world, the distribution of mission-work, the combination of church energies, especially in reference to great cities and destitute districts; the training of ministers; the use of the press; colportage; the religious instruction of the young; the sanctification of the Sabbath; systematic benevolence; the suppression of intemperance and other prevailing vices; and the best method of opposing infidelity and Romanism.

5. *Its Methods.*—The Council shall seek to guide and stimulate public sentiment by papers read, by addresses delivered and published, by the circulation of information respecting the allied churches and their missions, by the exposition of Scriptural principles and by defenses of the truth, by communicating the minutes of its proceedings to the supreme courts of the churches forming the Alliance, and by such other action as is in accordance with its constitution and objects.

6. *Committee on Business.*—The Council at each general meeting shall appoint a Committee on Business, through which all commissions and notices of subjects proposed to be discussed shall pass. The committee appointed at one general meeting shall

PROTESTANT EPISCOPAL CHURCH.

act provisionally so far as is necessary in preparing for the following meeting.

IV. **CHANGE OF CONSTITUTION.**—No change shall be made in this constitution except on a motion made at one general meeting of Council, not objected to by a majority of the churches, and carried by a two-thirds vote at the next general meeting.

The first meeting of the Council was appointed to be held at Edinburgh on the first Tuesday in July, 1876.

PROTESTANT EPISCOPAL CHURCH.

The Protestant Episcopal Almanac and Directory for 1876 gives the following statistics of the Protestant Episcopal Church in the United States, China, Japan, and Africa, for 1874-'75:

Missionary district of Western Texas.....	56	445	12,500 00
Total.....	22,090	261,008	\$4,592,805 94

Number of bishops, 57; of bishops-elect 3; of priests and deacons, 3,122; of baptisms, 88,053; of candidates for orders, 298; of or-

dinations of deacons, 110; of ordinations of priests, 122; of Sunday-school teachers, 23,448; of Sunday-school scholars, 235,943.

The *Church Almanac* of the Protestant Episcopal Tract Society gives the following totals: Number of dioceses, 45; of missionary districts, 10; of bishops, 57; of bishops-elect, 5; of priests and deacons, 3,130; of ordinations of deacons, 101; of ordinations of priests, 114; of candidates for orders, 322; of baptisms, 38,675; of confirmations, 22,503; of communicants, 265,357; of Sunday-school teachers, 23,340; of Sunday-school scholars, 218,400; amount of contributions, \$6,851,983.27.

The *Journal* of the Triennial General Convention of 1874 (first published in August, 1875) gives the following elaborate summary of the statistics of this Church as they were reported to the General Convention in October, 1874:

Number of dioceses.....	41
Number of missionary jurisdictions.....	8
Number of bishops and clergy.....	3,086
Number of lay readers in twenty-one dioceses and six missionary jurisdictions.....	598
Number of candidates for holy orders in thirty-seven dioceses and five missionary jurisdictions.....	838
Deacons ordained in thirty-eight dioceses and four missionary jurisdictions.....	410
Present number of deacons in thirty-eight dioceses and six missionary jurisdictions.....	278
Priests ordained in thirty-eight dioceses and four missionary jurisdictions.....	310
Present number of priests in thirty-eight dioceses and eight missionary jurisdictions.....	2,580
Whole number of parishes in thirty-eight dioceses and four missionary jurisdictions.....	2,741
Number of missions in thirty-two dioceses and five missionary jurisdictions.....	918
Churches consecrated in thirty-seven dioceses and three missionary jurisdictions.....	204
Whole number of churches and chapels in thirty-four dioceses and eight missionary jurisdictions.....	2,621
Number of rectories in thirty-three dioceses and five missionary jurisdictions.....	763
Number of families in twenty-two dioceses and three missionary jurisdictions.....	70,080
Number of souls in sixteen dioceses and one missionary jurisdiction.....	241,393
Baptisms reported in 1871-'74:	
Infants in thirty-nine dioceses and seven missionary jurisdictions.....	93,164
Adults in same.....	22,120

The General Convention of 1874 authorized the formation of a new diocese out of the southern part of the Diocese of Ohio. The primary convention of the new diocese met at Columbus, Ohio, January 13th and 14th. It decided that the name of the diocese should be the *Diocese of Southern Ohio*, and chose the Rev. Thomas A. Jaggar, D. D., of Philadelphia, to be its bishop. Some objection was made to the suitability of Dr. Jaggar, on the ground that he had at one time expressed his sympathy with the Rev. Charles E. Cheney, of Chicago, in his scruples against the use in the baptismal formula of the words implying the doctrine of baptismal regeneration; but it was shown that this sympathy was expressed while Mr. Cheney still professed to be loyal to the Church, and before the formal censures were pronounced against him. Dr. Jaggar's name went before the standing committee of the dioceses for confirmation at the same time with that of Dr. DeKoven, Bishop-elect of Illinois. His election was approved, and he was consecrated at Philadelphia, April 28th.

The Rev. Dr. Huntington having declined the bishopric of *Iowa*, to which he was elected in 1874, a special session of the diocesan convention of that diocese was held at Cedar Rapids, May 25th. The Rev. James Houston Eggleston, D. D., of the Church of the Saviour, West Philadelphia, Pa., was elected bishop. The validity of the election was disputed by a considerable part of the convention on account of some alleged irregularity in the proceedings. The opposers of Dr. Eggleston addressed a protest against his confirmation to the Standing Committee. His election, however, received the approval of a large number of the commit-

tee, but toward the end of November Dr. Eggleston withdrew from any further consideration of the subject.

The General Convention of 1874 having authorized the formation of a new diocese out of the northeastern part of the Diocese of Wisconsin, a primary convention met at Fond du Lac, January 7th. It was decided to call the new diocese the *Diocese of Fond du Lac*. After eight ballottings, the Rev. Leighton Coleman, of Toledo, Ohio, received the unanimous vote of both orders for bishop, and was declared duly elected. He, however, declined to accept the offer. The Diocesan Convention met again at Fond du Lac, June 9th, and elected as bishop the Rev. Jacob S. Shipman, of Christ Church, Louisville, Ky. Mr. Shipman declined to serve. A third meeting of the convention was held at Green Bay, Wis., September 15th. The Rev. Henry Hobart Brown, D. D., of Cohoes, N. Y., was elected bishop. He accepted his election, and was confirmed by the Standing Committee, and he was consecrated bishop at St. John's Church, Cohoes, December 15th.

The General Convention of 1874 having refused to approve the election of the Rev. George F. Seymour, D. D., as *Bishop of Illinois*, a special session of the Diocesan Convention of that diocese met on the 8d of February to elect a bishop. The Rev. J. DeKoven, D. D., appeared on the third ballot to have received the majority of the votes of the clergy and the lay delegates, and was declared elected. A strong opposition to Dr. DeKoven existed in the convention and the diocese, and in the Church at large, based upon the fact that he was generally regarded as the most advanced leader of the ritualistic party in the Protestant Episcopal Church in the United States. He had indeed placed himself on record in the General Convention of 1871 by making the formal declaration for the assured purpose of expressly defining his views: "I believe in the 'Real, Actual Presence of our Lord under the form of bread and wine upon the altars of our churches.' I myself adore, and would, if it were necessary or my duty, teach my people to adore Christ present in the elements under the form of bread and wine." The validity of Dr. DeKoven's election was, moreover, disputed on the ground that he had not received a lawful majority of the votes of the lay deputies. One vote, classed as "divided" on the final ballot, was not counted in the summary, whereas it was held that it should have been taken account of in making the estimate of the number "necessary to a choice." Furthermore, the chancellor of the diocese and the chancellor of the cathedral, holding seats in the convention by the canons, were allowed to vote, and their votes were included in declaring the result, whereas the constitution of the diocese required that the lay delegates be representatives of congregations in union with the convention, and chosen by the vestry or congregations of their

churches, conditions which were not fulfilled in the case of the officers named. A protest, based upon these grounds, was drawn up, and signed by the opponents of Dr. DeKoven in the convention, and forwarded to each of the standing committees of the dioceses to whom the name of the bishop-elect had to be submitted for approval. The decision of the Standing Committee was adverse to the ratification of the election of Dr. DeKoven. The convention met for the third time to elect a bishop, at Chicago, September 14th. Dr. DeKoven declined to be a candidate again, and the convention adopted the following protest against the action of the standing committees in refusing to ratify the nomination of Dr. DeKoven:

Whereas, The Rev. James DeKoven, Warden of Racine College, has addressed to the Diocese of Illinois a communication calm, dignified, and eloquent, full of tenderness, pathos, and power, in which, after defining clearly and distinctly his doctrinal views, and professing his unswerving loyalty to the Church, he withdrew his name as Bishop-elect of the Diocese of Illinois; and—

Whereas, The communication will be spread upon the minutes of the convention:

Therefore be it resolved, That this convention hereby records its solemn disapproval of any constitutions or canons, or any construction of constitution or canon, that puts it in the power of the Standing Committee, composed of clergymen and laymen, to sit in judgment upon its doctrinal views or upon the life and manners of our bishop-elect, deeming such constitution and canons inconsistent with the law of the Church catholic, and in contradiction of that principle of the common law that a man can only be judged by his peers

Resolved, That this convention further records the extension of its unchanged confidence in the entire soundness in the faith, the unshaken loyalty to the Church, and the eminent fitness for the episcopate of the Rev. James DeKoven, D. D., Warden of Racine College, who was, at the special convention in February last, elected to the vacant episcopate of this diocese.

The convention then elected as bishop the Rev. W. E. McLaren, D. D., of Cleveland, Ohio. Dr. McLaren accepted; his election was confirmed by the Standing Committee, and he was consecrated bishop in the Cathedral of Saints Peter and Paul, Chicago, December 8th.

The Rev. W. E. McLaren, Bishop-elect of Illinois, had been but four years in the Protestant Episcopal Church when he was elected bishop. He was born at Geneva, N. Y., about 1831. He was graduated from the Allegheny Theological Seminary, Pittsburg, Pa., in 1860, and entered the Presbyterian ministry in that city. He afterward went to South America as a missionary. In 1867 he was settled over a Presbyterian Church at Peoria, Ill. In 1872 he joined the Protestant Episcopal Church, was ordained to the ministry of the same, and became rector of Trinity Church, Cleveland, Ohio. He preached a short time in Detroit, Mich., and was for a few years one of the editors of the *Cleveland Plaindealer*.

A *Board of Inquiry*, drawn by the presiding bishop of the House of Bishops, met at Balti-

more, Md., June 29th, to investigate charges for neglect of duty which had been made against the Right Rev. William R. Whittingham, Bishop of Maryland. The Rev. C. B. Perry, assistant rector, and the Rev. Joseph Richey, rector of Mount Calvary Church, Baltimore, were presented to Bishop Whittingham, by the Standing Committee of the diocese, the first on the 4th, the second on the 5th of February, 1875, for violation of their ordination vows and of the articles of religion of the Church by offering prayers for the dead. The complaint alleged that the bishop had refused to bring the accused parties to trial. He was therefore presented for trial according to the canons of the Church, upon the complaint of two clergymen and five laymen of his diocese. It was shown before the Board of Inquiry, on behalf of the bishop, that he had, previous to the presentation of the charges against the clergymen, admonished and rebuked them because of their practices and teachings, and had obtained their written promise that they would not so offend again. He had been advised by counsel that he had by such action satisfied the demand of the law; and it was further affirmed in his behalf that he had not intentionally or willfully violated the canons of his diocese. The Board of Inquiry, after spending four days in consideration of the subject, decided, by a vote of nine to four, that, from the evidence before them, there were not, in their opinion, sufficient grounds to put Bishop Whittingham upon trial. Their decision was accompanied by a resolution, instructing the president of the board to accompany the charges and certificate of refusal of the board to make presentment against the bishop with a statement of their "unanimous and emphatic condemnation of the alleged acts and teachings of the Revs. Joseph Richey and Calbraith B. Perry, of Mount Calvary Church, set forth and complained of in the presentment made against them by the Standing Committee to their bishop, and for which they have been admonished." This resolution was adopted unanimously. The Board of Inquiry was constituted of two ministers and two laymen each of the Dioceses of Maryland, Virginia, Central Pennsylvania, and Pittsburg.

A special meeting of the *House of Bishops* of the Protestant Episcopal Church was held in New York City, October 28th. Presiding Bishop Smith, of Kentucky, presided and delivered the opening address. The principal business before it was the election of missionary bishops for foreign dioceses of the Church. The Rev. S. I. J. Scherenschewsky, D. D., was elected Missionary Bishop of China. Dr. Scherenschewsky declined to accept the office. The Rev. William H. Clarke, D. D., of Augusta, Ga., was elected Missionary Bishop of Cape Palmas. The House also considered the subject of establishing covenant relations with a branch of the Church in Mexico. A commission representing the Protestant Episcopal

Church had visited Mexico to inquire into the condition of the Church in that country. They reported that a church had been formed there recognizing the episcopate of the Protestant Episcopal Church, and seeking further organization under its care. They also laid before the House a formal covenant, or articles of agreement, between the bishops and "the Mexican branch of the Catholic Church of our Lord Jesus Christ militant upon earth" (the title assumed by the Mexican Church at its synodical meeting in August, 1875). The House of Bishops agreed to the ratification of the articles of agreement, authorized a commission to be appointed with full authority to represent them in conclusive action, and empowered the commission to correspond with the representatives of the Mexican Church, in order to a final ratification of the articles, and also to examine and report upon the evidence of election and testimonials of qualifications of the person or persons who may be presented by the Mexican Church for ordination to the episcopate. The presiding bishop was empowered, upon the recommendation of the commission, to take steps for the consecration of the persons so presented as bishops.

The Rev. S. I. J. Scherenschewsky, D. D., elected Missionary Bishop of China, has been laboring continuously in China for fifteen years, with great industry and success. He assisted in translating the New Testament into the mandarin or court language of the Chinese; then undertook, single-handed, the translation of the Old Testament into the same dialect, and completed it.

The Rev. William H. Clarke, D. D., elected Missionary Bishop of Cape Palmas, Africa, is a native of New England, and a graduate of Yale College and the General Theological Seminary. The early part of his ministry was passed in educational work in Maryland and elsewhere. He was at the time of his election rector of St. Paul's Church, Augusta, Ga.

The second *Annual Congress* of the Protestant Episcopal Church met at Philadelphia, November 9th, and continued in session four days. The Right Rev. William B. Stevens, D. D., LL. D., Bishop of Pennsylvania, presided. He made an opening address, in which he gave a history of the Congresses of the Church of England, after the plan of which the present body was organized, and stated the purpose of the Congress. It was, he said—

To gather light from all points, and reflect it in all quarters. It seeks breadth of view as well as depth of thought. It is neither defensive nor oppressive; it is designed to cultivate personal and official toleration and charity for widely-differing opinions, to make men look each other in the face who have hitherto stood back to back. A Church Congress has no official status; it is purely the outcome of the popular mind.

Bishop Clark, of Rhode Island, made some remarks at the opening communion service, in

which he characterized the Congress as "a gathering of clergy and laity from all quarters, representing all shades of opinion that are tolerated within the Church." The regular sessions of the Congress were occupied in the reading of papers, and volunteer discussions upon a list of topics which had been previously prepared, as follows: First day, Tuesday, November 9th: *Ultramontaniam and Civil Authority*.—Papers and addresses by the Rev. Messrs. Francis Wharton, D. D., LL. D.; Clement M. Butler, D. D.; George Zabriskie Gray, William Chauncey Langdon, and the Rev. Isidore Mombert, D. D., of Dresden, Germany. *Ministrations of the Church to the Working-Classes*.—Papers and addresses by the Rev. John Vaughan Lewis, D. D.; Henry Pellew, Esq.; the Rev. J. H. Reylance, D. D., of New York; Mr. Samuel Wagner, Mr. William Welsh, Mr. Russell Sturgis, the Rev. Dr. Gallaudet, the Rev. Hugh Ray Scott, and the Rev. A. S. Woode. Second day, Wednesday, November 10th: *The Best Method of procuring and preparing Candidates for the Ministry*.—Papers and addresses by the Rev. Messrs. N. H. Schenck, D. D., and E. B. Boggs, D. D.; Bishop Garrett, of Northern Texas, and Whipple, of Minnesota; the Rev. Messrs. T. F. Fales, D. D.; Edward Sullivan, S. T. D.; Robert O. Mattuck, J. F. Garrison, M. D.; the Rev. Drs. Harwood and O. K. Nelson. *Church Music*.—Papers and addresses by the Rev. Messrs. E. N. Potter, D. D.; W. H. Cooke, J. W. Shackelford, George D. Wildes, D. D.; W. Ryce Morrow and J. Vaughan Lewis, D. D. Third day, Thursday, November 11th: *Nature and Extent of Episcopal Authority*.—Papers and addresses by the Rev. Messrs. Alex. H. Vinton, D. D.; John Fulton, D. D.; J. F. Garrison, M. D.; O. K. Nelson, D. D.; D. R. Goodwin, D. D.; E. A. Washburn, D. D.; the Rev. Dr. Harwood, the Rev. Mr. Bolman, and the Rev. J. Vaughan Lewis, D. D. *The Parochial System and Hall Preaching*.—Papers and addresses by the Right Rev. F. D. Huntington, D. D., Bishop of Central New York; Mr. Francis Wells; the Rev. Messrs. Edward B. Boggs, D. D.; Julius H. Ward, Julius E. Grammar, D. D.; S. H. Tyng, D. D.; and the Rev. Dr. Langdon. *Bible Revision*.—Papers and addresses by the Right Rev. Alfred Lee, D. D., Bishop of Delaware; the Right Rev. A. C. Coxe, D. D., LL. D., Bishop of Western New York; the Rev. Messrs. William Kirkus, LL. B.; G. Emlen Hare, D. D., LL. D.; Samuel I. J. Scherenschewsky, D. D. Fourth day, Friday, November 12th: *The Mutual Relations of Christian Theology and Natural Science*.—Papers and addresses by the Rev. William R. Huntington, D. D.; the Right Rev. Thomas M. Clark, D. D., LL. D., Bishop of Rhode Island; the Rev. O. C. Tiffany, the Rev. Dr. Leeds, the Rev. Messrs. William Newton, D. D., and C. S. Bates; J. F. Garrison, M. D.; E. N. Potter, D. D.; the Rev. Drs. Sullivan and Gallaudet. *The Best Method of promoting*

Spiritual Life.—Papers and addresses by the Rev. Messrs L. W. Bancroft, D. D.; Phillips Brooks, the Right Rev. Alexander S. Garrett, D. D., Bishop of Northern Texas; the Hon. J. W. Andrews, the Rev. John H. Elliott, D. D. The Congress was well attended; it embraced representatives of all shades of doctrine in the Church, and the proceedings were satisfactory to all who participated in them.

The sixteenth anniversary of the *American Church Missionary Society* was held in Philadelphia, November 12th. The home-mission field of the society embraced nineteen States and Territories of the United States. Its foreign field was the republic of Mexico. Fifty-five missionaries had been commissioned; forty-three remained in service at the close of the year. The missions in the city of Mexico had increased from three to seven, and in the whole country the number of organized congregations connected with the Church of Jesus had increased from twenty-seven to fifty-seven, with more than six thousand regular attendants upon worship. The Church of Jesus had organized a society, called "The Christian Society of Mexico," to which it had intrusted the supervision of a large part of its work. The society had a depository of Bibles and evangelical publications on the principal street of the city of Mexico; had charge of nine day-schools, attended by more than two hundred children; and had established an orphanage in the building formerly occupied by the Roman Catholic Convent of San Antonio Abad, in the city of Mexico.

The ninth annual *Convocation of the Protestant Episcopal Churches in Hayti* was held at Port-au-Prince, in May, Bishop Hally presiding. It ratified the covenant, or Ecclesiastical Convention, concluded with the Protestant Episcopal Church in the United States, and adopted a constitution for a national Church, with a prologue and devices. The constitution and accompanying documents, having received episcopal approbation, were publicly promulgated upon the adjournment of the convention, May 26th.

PRUSSIA, a kingdom of Europe, forming part of the German Empire. King, William I., German Emperor and King of Prussia (see GERMANY). The Prussian ministry was, in 1873, composed as follows: President, Prince von Bismarck, Minister of Foreign Affairs and Minister for the Duchy of Lauenburg; Vice-President, Camphausen, Minister of Finances; Count zu Eulenburg, Minister of the Interior; Dr. Leonhardt, Minister of Justice; Dr. Falk, Minister of Ecclesiastical, Educational, and Medical Affairs; General von Kamecke, Minister of War; Dr. Achenbach, Minister of Commerce, Trades, and Public Works; Dr. Friedenthal, Minister of Agricultural Affairs.

According to the budget for the year 1874 the revenue and expenditures were as follows (value expressed in marks; 1 mark = 23 cents):

REVENUE.

Ministry of Finances.....	354,565,741
Ministry of Commerce.....	280,000,926
Ministry of State.....	473,800
Ministry of Justice.....	42,676,000
Ministry of the Interior.....	2,836,946
Ministry of Agriculture.....	8,490,780
Ministry of Education and Ecclesiastical Affairs..	1,364,726
Total.....	604,498,919

EXPENDITURES.

I. ORDINARY EXPENDITURES:	
Costs of administration.....	275,920,381
Charges on consolidated debt.....	60,811,280
Administrative expenditures.....	276,954,785
Total ordinary expenditures.....	618,686,446
II. EXTRAORDINARY EXPENDITURES.....	80,812,473
Total of all expenditures.....	694,498,919

The public debt, according to the budget of 1875 (end of the year 1874), was as follows:

I. INTEREST-BEARING DEBT:	
1. Of the old provinces.....	799,853,341
2. Of the new provincesm.....	99,433,767
3. Floating debt.....	80,000,000
	929,287,108
II. RENTES.....	23,500,000
III. DEBT BEARING NO INTEREST.....	56,440,699
Total.....	1,014,227,807

The following table exhibits the rapid reduction of the public debt of Prussia during the last two years:

YEARS.	Capital.	Interest.
Total debt, end of 1874.....	1,014,227,807	38,927,635
" " 1873.....	1,081,382,807	41,476,494
" " 1872.....	1,317,888,634	51,073,287

The session of the Prussian Diet was opened on January 16th, by the Vice-President of the Ministry, Camphausen. The opening speech declared that many of the bills which would be submitted to the Diet were of unusual importance. This was especially the case with those regulating the legal condition of the Catholic Church, and those introducing the principle of self-government into the administration of districts and provinces. The condition of the finances was represented as extremely favorable, and as allowing an increase of the salaries of clergymen and teachers. The session lasted until June 15th. At first it seemed that the bills relating to the organization of provincial and circle diets would be the most prominent, but the conflict between the Government and the Roman Catholic Church steadily increased so much that it engaged the attention of all parties of the Diet, in preference to any other question. In regard to the former question, the Government agreed, on the whole, with the Liberal party and the majority of the Diet. On several questions there was, however, a difference of opinion between the Government and the Diet and between the two Houses of the Diet. The Government favored the postponement of the introduction of the new "*Kreisordnung*," or organization of circles (the administrative subdivisions of provinces), which in the five eastern provinces of Prussia has been carried through, into Westphalia and the Rhine Prov-

GENERAL VIEW OF BERLIN.

ince, on the ground that there it might give still greater strength to the powerful Ultramontane party. The House of Deputies, however, did not approve of this plan, and on February 11th adopted, by 292 against 28 votes, a motion by Prof. Virchow (of the Party of Progress), to

extend the *Kreisordnung* to the two western provinces. In the discussion of the *Provincialordnung*, the two Houses chiefly differed in regard to the organization of the provincial council, or committee, which is to represent the provincial Diet in questions relating to the

administration of the province. The Lower House desired a provincial committee wholly elected by the Diet; the Upper House substituted for this a provincial council consisting of four members elected by the Diet, of the Oberpräsident (chief president) of the province, who is to preside, and two other administrative officers appointed by the Government. Finally, a compromise was agreed upon, according to which the provincial council will consist of the Oberpräsident, one other appointed member who must have the qualification for judge, and five elected members of the Diet. This compromise was adopted in the

THE EXCHANGE, BERLIN.

House of Deputies on June 10th by 213 against 148 votes, and on June 12th by a large majority in the House of Lords.

The first of the bills concerning the Roman Catholic Church of Prussia came up for discussion on February 16th; its title is "A law for the management of the property of the Catholic Church." It provides for an election of church-wardens in each parish by the congregation, the number to be fixed by the bishop, in conjunction with the Government. This body can be called together at any time, either by the bishop or the Landrath, or, in cities, by the mayor, or by one-half of the board, or by the congregation. A second act was introduced on the 3d of March, and like the former bears the name of Dr. Falk. It is entitled "An act concerning the suppression of the payment of the state aid to the Roman Catholic bishops and clergy." It absolutely suspends such payments, but the suspension is to be removed as soon as the archbishop, bishop, or priest, pledges himself in writing to obey the laws of the state. The revocation of such a pledge, once given, is to involve dismissal from office by judicial sentence, and incapacity for the exercise of the office hereafter. Another bill submitted by the Government provided for the suppression of the Prussian monasteries. Finally, the Government proposed to the Diet the abrogation of those clauses of the constitution which allow the independent administration of ecclesiastical affairs, the unimpeded intercourse of religious bodies with their superiors,

and freedom of clerical appointments. All these bills were adopted by both Houses of the Diet by large majorities. In the Lower House, all the parties except the Catholic "Centre" and the Poles supported the Government; in the Upper House, the number of the ultra-conservative Protestant noblemen who voted with Catholics was reduced to about a dozen. The Diet also adopted a bill regulating the affairs of the Old Catholics, and in particular their claims to a fair proportion of the Catholic Church property.

The discussion of these ecclesiastical bills was greatly embittered, and the union of all the parties, except the Catholic, in the support of the Government was greatly strengthened by a papal encyclical, dated February 5th, in which the ecclesiastical bills passed and promulgated in the preceding years were declared null and void. Even a number of Roman Catholic members of the Diet issued a joint declaration against the encyclical, saying:

We most emphatically deny that the Church laws of the German Empire and of the Prussian state entirely subvert the divine constitution of the Church and nullify the inviolable prerogatives of the bishops, and most solemnly protest against all the principles set forth in the encyclical which jeopardize the authority, the constitution, and the existence of the state; and especially against the prerogative claimed for the Pope of declaring constitutionally enacted laws null and void. It is, on the contrary, our conviction that the teachings of the Catholic Church expressly enjoin upon every Catholic to recognize as binding and to obey state laws which have been constitutionally enacted.

While the immense majority of the lower clergy also sided with the bishops, and a number of them shared the imprisonment of the bishops, there was, on the other hand, quite a number of priests, including even several canons of Cologne and Breslau, who announced

THE ROYAL LIBRARY, BERLIN.

to the Government their submission to all the ecclesiastical laws, and thus secured the payment of their salaries. As this act was severely censured by the majority of priests and laymen, the Prussian Government ordered that declarations of submission by Catholic clergy-

men to the new laws should be kept strictly secret.

The Catholic bishops held in March another conference at Fulda. They resolved to address a petition to the Emperor William in person, remonstrating against the withdrawal of the state grants, to the maintenance of which they declared the honor of Prussia was pledged. They also protested against being required to obey unconditionally the state laws. The ministers authorized by the Emperor replied, expressing regret that the bishops should object to obey laws which were always obeyed in other countries, and adding that the bishops would have preserved the Fatherland from peace-disturbing confusion if they had remained faithful to their own convictions and to the warnings which they proclaimed before the Vatican Council.

The Prussian Government, in the progress of the conflict, remained as unyielding as the Pope. Several bishops were imprisoned, and the Bishops of Paderborn and Breslau were deposed for disobeying the laws of the state, and in the course of the year proceedings were also instituted against the Bishop of Treves and the Archbishop of Cologne. The Bishops of Paderborn and Breslau and the Archbishop of Cologne left the Prussian territory and attempted to administer their dioceses from abroad through unknown delegates. Only to one of the new laws respecting the administration of Church and diocesan property did the bishops resolve to submit, and accordingly Church councils, consisting exclusively of laymen, were chosen in all the Catholic congregations of the kingdom for the administration of the parochial property. The result of their election showed that the overwhelming majority of the Catholic population of Prussia sided with the bishops. The excitement among the Catholic population led to several riots. In the province of Prussia a priest who had made his submission to the ecclesiastical laws was mobbed; and in Königshütte, Silesia, the public school was invaded by a crowd of furious women who had heard that their children were to be made Old Catholics. In the large cities, the policy of the Government had, however, many steadfast supporters among the wealthy and educated classes. Dr. Falk, the Minister of Public Worship, and author of all the ecclesiastical laws, on a tour which he made in July through the Rhine Province, met with an enthusiastic reception in all the Catholic cities, and the Council of Cologne conferred upon Prince Bismarck the right of honorary citizenship.

The Prussian Government has for some time been intent upon carrying through the synodal constitution in the United Evangelical Church. To this end synods, consisting of clerical and lay members, are to meet regularly in the circles (*Kreissynoden*) in the provinces (*Provincialsynoden*), and for the entire kingdom (*Generalsynode*). In the Rhine Province and in Westphalia the Protestant state Church has

long been in possession of a synodal constitution, but in the eastern provinces the circle synods were not introduced until 1874. The first provincial synods of these provinces met in the spring, 1875. An extraordinary synod, consisting partly of delegates chosen by the provincial synods, and partly of members appointed by the King, met in Berlin; on November 24th, and was closed on December 18th. This synod was to draft a synodal constitution for the Protestant State Church (United Evangelical Church of Prussia). Three large parties were represented in it: the Lutheran, which contends for the strictest adhesion to the Lutheran symbols of that portion of the Church which was originally Lutheran; the Liberal party, which professes the rationalistic view of the "Protestant Union" (*Protestantenverein*); and a middle party, which is anxious to avoid all extremes, and to make it possible for all parties to remain in the Church. This party, which is supported by the entire influence the state Government can bring to bear, was in a majority, and elected, as president of the synod, Count Stolberg Wernigerode, one of the foremost statesmen of Prussia. The draft of the constitution prepared by the majority, when put to the final vote, was adopted by 134 against 62 votes.

The President of the General Synod, Count OTTO ZU STOLBERG-WERNIGERODE, was born October 30, 1837. He studied at the Universities of Göttingen and Heidelberg, and, having graduated, he entered the Gardes du Corps as lieutenant, but remained in this position a short time only. Having arrived at majority, he took charge of the large family estates, which had come into his possession in 1854, upon the death of his grandfather. In 1867 he was appointed Oberpräsident of Hanover, which position he filled with great ability up to 1873, when he resigned. A few months before his resignation, he was elected President of the Prussian Herrenhaus in the place of his father, the late Count Eberhard. Early in 1876 he was appointed German ambassador at the court of Vienna.

RUDOLPH VON BENNINGSEN, First President of the House of Deputies, was born in 1824. In 1855 he was elected a member of the Second Chamber of Hanover, where he was, up to 1866, the leader of the Democratic party. In 1859 he issued, with others, a declaration, that the Federal Constitution of Germany no longer sufficed, and that a Parliament and a strong central power were needed. This was followed in the same year by the foundation of the "Nationalverein," of which he was president up to 1867. Since 1867 he was a member of the Provincial Diet of Hanover, the Prussian House of Deputies, and of the North-German Reichstag, of which body he was elected second vice-president. In 1873 he was elected First President of the Prussian House of Deputies. He was also elected a member of the first and the second German Reichstag.

PUBLIC DOCUMENTS. *Message of President GRANT, at the commencement of the first session of the Forty-fourth Congress, December 7, 1875.*

To the Senate and House of Representatives:

In submitting my seventh annual message to Congress, in this centennial year of our national existence as a free and independent people, it affords me great pleasure to recur to the advancement that has been made from the time of the colonies, one hundred years ago. We were then a people numbering only three millions. Now we number more than forty millions. Then industries were confined almost exclusively to the tillage of the soil. Now manufactures absorb much of the labor of the country.

Our liberties remain unimpaired; the bondman have been freed from slavery; we have become possessed of the respect, if not the friendship, of all civilized nations. Our progress has been great in all the arts; in science, agriculture, commerce, navigation, mining, mechanics, law, medicine, etc.; and in general education the progress is likewise encouraging. Our thirteen States have become thirty-eight, including Colorado (which has taken the initiatory steps to become a State), and eight Territories, including the Indian Territory and Alaska, and excluding Colorado, making a territory extending from the Atlantic to the Pacific. On the south we have extended to the Gulf of Mexico, and in the west from the Mississippi to the Pacific.

One hundred years ago the cotton-gin, the steamship, the railroad, the telegraph, the reaping, sewing, and modern printing-machines, and numerous other inventions of scarcely less value to our business and happiness, were entirely unknown.

In 1776, manufactures scarcely existed even in name in all this vast territory. In 1870, more than two millions of persons were employed in manufactures, producing more than \$2,100,000,000 of products in amount annually, nearly equal to our national debt. From nearly the whole of the population of 1776 being engaged in the one occupation of agriculture, in 1870 so numerous and diversified had become the occupation of our people that less than six millions out of more than forty millions were so engaged. The extraordinary effect produced in our country by a resort to diversified occupations has built a market for the products of fertile lands distant from the seaboard and the markets of the world.

The American system of locating various and extensive manufactories next to the plough and the pasture, and adding connecting railroads and steamboats, has produced in our distant interior country a result noticeable by the intelligent portions of all commercial nations. The ingenuity and skill of American mechanics have been demonstrated at home and abroad in a manner most flattering to their pride. But for the extraordinary genius and ability of our mechanics, the achievements of our agriculturists, manufacturers, and transporters throughout the country would have been impossible of attainment.

The progress of the miner has also been great. Of coal our production was small; now many millions of tons are mined annually. So with iron, which formed scarcely an appreciable part of our products half a century ago, we now produce more than the world consumed at the beginning of our national existence. Lead, zinc, and copper, from being articles of import, we may expect to be large exporters of in the near future. The development of gold and silver mines in the United States and Territories has not only been remarkable, but has had a large influence upon the business of all commercial nations. Our merchants in the last hundred years have had a success and have established a reputation for enterprise, sagacity, progress, and integrity, unsurpassed by peoples of older nationalities. This "good name" is not confined to their homes, but goes out

upon every sea and into every port where commerce enters. With equal pride we can point to our progress in all of the learned professions.

As we are now about to enter upon our second centennial—commencing our manhood as a nation—it is well to look back upon the past and study what will be best to preserve and advance our future greatness. From the fall of Adam for his transgression to the present day, no nation has ever been free from threatened danger to its prosperity and happiness. We should look to the dangers threatening us, and remedy them so far as lies in our power. We are a republic whereof one man is as good as another before the law. Under such a form of government it is of the greatest importance that all should be possessed of education and intelligence enough to cast a vote with a right understanding of its meaning. A large association of ignorant men cannot, for any considerable period, oppose a successful resistance to tyranny and oppression from the educated few, but will inevitably sink into acquiescence to the will of intelligence, whether directed by the demagogue or by priestcraft. Hence the education of the masses becomes of the first necessity for the preservation of our institutions. They are worth preserving, because they have secured the greatest good to the greatest proportion of the population of any form of government yet devised. All other forms of government approach it just in proportion to the general diffusion of education and independence of thought and action. As the primary step, therefore, to our advancement in all that has marked our progress in the past century, I suggest for your earnest consideration, and most earnestly recommend it, that a constitutional amendment be submitted to the Legislatures of the several States for ratification, making it the duty of each of the several States to establish and forever maintain free public schools adequate to the education of all the children in the rudimentary branches within their respective limits, irrespective of sex, color, birthplace, or religions; forbidding the teaching in said schools of religious, atheistic, or pagan tenets; and prohibiting the granting of any school-funds, or school-taxes, or any part thereof, either by legislative, municipal, or other authority, for the benefit or in aid, directly or indirectly, of any religious sect or denomination, or in aid or for the benefit of any other object of any nature or kind whatever.

In connection with this important question, I would also call your attention to the importance of correcting an evil that, if permitted to continue, will probably lead to great trouble in our land before the close of the nineteenth century. It is the accumulation of vast amounts of untaxed church-property.

In 1860, I believe, the church-property of the United States which paid no tax, municipal or State, amounted to about \$33,000,000. In 1860, the amount had doubled; in 1875, it is about \$1,000,000,000. By 1900, without check, it is safe to say this property will reach a sum exceeding \$3,000,000,000. So vast a sum, receiving all the protection and benefits of government, without bearing its proportion of the burdens and expenses of the same, will not be looked upon acquiescently by those who have to pay the taxes. In a growing country, where real estate enhances so rapidly with time as in the United States, there is scarcely a limit to the wealth that may be acquired by corporations, religious or otherwise, if allowed to retain real estate without taxation. The contemplation of so vast a property as here alluded to, without taxation, may lead to sequestration without constitutional authority and through blood.

I would suggest the taxation of all property equally, whether church or corporation, exempting only the last resting-place of the dead, and, possibly, with proper restrictions, church-edifices.

Our relations with most of the foreign powers continue on a satisfactory and friendly footing.

Increased intercourse, the extension of commerce, and the cultivation of mutual interests, have steadily improved our relations with the large majority of the powers of the world, rendering practicable the peaceful solution of questions which from time to time necessarily arise, leaving few which demand extended or particular notice.

The correspondence of the Department of State with our diplomatic representatives abroad is transmitted herewith.

I am happy to announce the passage of an act by the General Cortes of Portugal, proclaimed since the adjournment of Congress, for the abolition of servitude in the Portuguese colonies. It is to be hoped that such legislation may be another step toward the great consummation to be reached, when no man shall be permitted, directly or indirectly, under any guise, excuse, or form of law, to hold his fellow-man in bondage. I am of the opinion also that it is the duty of the United States, as contributing toward that end, and required by the spirit of the age in which we live, to provide by suitable legislation that no citizen of the United States shall hold slaves as property in any other country or be interested therein.

Chili has made reparation in the case of the whaler-ship *Good Return*, seized without sufficient cause upward of forty years ago. Though she had hitherto denied her accountability, the denial was never acquiesced in by this Government, and the justice of the claim has been so earnestly contended for that it has been gratifying that she should have at last acknowledged it.

The arbitrator in the case of the United States steamer *Montijo*, for the seizure and detention of which the Government of the United States of Colombia was held accountable, has decided in favor of the claim. This decision has settled a question which had been pending for several years, and which, while it continued open, might more or less disturb the good understanding which it is desirable should be maintained between the two republics.

A reciprocity treaty with the King of the Hawaiian Islands was concluded some months since. As it contains a stipulation that it shall not take effect until Congress shall enact the proper legislation for that purpose, copies of the instrument are herewith submitted, in order that, if such should be the pleasure of Congress, the necessary legislation upon the subject may be adopted.

In March last an arrangement was made, through Mr. Cushing, our minister in Madrid, with the Spanish Government, for the payment by the latter to the United States of the sum of \$80,000 in coin, for the purpose of the relief of the families or persons of the ship's company and certain passengers of the *Virginus*. This sum was to have been paid in three installments at two months each. It is due to the Spanish Government that I should state that the payments were fully and spontaneously anticipated by that Government, and that the whole amount was paid within but a few days more than two months from the date of the agreement, a copy of which is herewith transmitted. In pursuance of the terms of the adjustment I have directed the distribution of the amount among the parties entitled thereto, including the ship's company and such of the passengers as were American citizens. Payments are made accordingly, on the application by the parties entitled thereto.

The past year has furnished no evidence of an approaching termination of the ruinous conflict which has been raging for seven years in the neighboring island of Cuba. The same disregard of the laws of civilized warfare and of the just demands of humanity, which has heretofore called forth expressions of condemnation from the nations of Christendom, has continued to blacken the sad scene. Desolation, ruin, and pillage, are pervading the rich fields of one of the most fertile and productive regions of the

earth, and the incendiaries' torch, firing plantations and valuable factories and buildings, is the agent marking the alternate advance or retreat of contending parties.

The protracted continuance of this strife seriously affects the interests of all commercial nations, but those of the United States more than others, by reason of close proximity, its larger trade and intercourse with Cuba, and the frequent and intimate personal and social relations which have grown up between its citizens and those of the island. Moreover, the property of our citizens in Cuba is large, and is rendered insecure and depreciated in value and in capacity of production by the continuance of the strife and the unnatural mode of its conduct. The same is true, differing only in degree, with respect to the interests and people of other nations; and the absence of any reasonable assurance of a near termination of the conflict must, of necessity, soon compel the states thus suffering to consider what the interests of their own people and their duty toward themselves may demand.

I have hoped that Spain would be enabled to establish peace in her colony, to afford security to the property and the interests of our citizens, and allow legitimate scope to trade and commerce and the natural productions of the island. Because of this hope, and from an extreme reluctance to interfere in the most remote manner in the affairs of another and a friendly nation, especially of one whose sympathy and friendship in the struggling infancy of our own existence must ever be remembered with gratitude, I have patiently and anxiously waited the progress of events. Our own civil conflict is too recent for us not to consider the difficulties which surround a Government distracted by a dynastic rebellion at home, at the same time that it has to cope with a separate insurrection in a distant colony. But whatever causes may have produced the situation which so grievously affects our interests, it exists, with all its attendant evils operating directly upon this country and its people. Thus far all the efforts of Spain have proved abortive, and time has marked no improvement in the situation. The armed bands of either side now occupy nearly the same ground as in the past, with the difference, from time to time, of more lives sacrificed, more property destroyed, and wider extents of fertile and productive fields and more and more of valuable property constantly wantonly sacrificed to the incendiaries' torch.

In contests of this nature, where a considerable body of people, who have attempted to free themselves of the control of the superior government, have reached such point in occupation of territory, in power, and in general organization as to constitute in fact a body politic, having a government in substance as well as in name, possessed of the elements of stability, and equipped with the machinery for the administration of internal policy and the execution of its laws, prepared and able to administer justice at home, as well as in its dealings with other powers, it is within the province of those other powers to recognize its existence as a new and independent nation. In such cases other nations simply deal with an actually existing condition of things, and recognize as one of the powers of the earth that body politic which, possessing the necessary elements, has, in fact, become a new power. In a word, the creation of a new state is a fact.

To establish the condition of things essential to the recognition of this fact, there must be a people occupying a known territory, united under some known and defined form of government, acknowledged by those subject thereto, in which the functions of government are administered by usual methods, competent to mete out justice to citizens and strangers, to afford remedies for public and for private wrongs, and able to assume the correlative international obligations, and capable of performing the corresponding international duties resulting from

its acquisition of the rights of sovereignty. A power should exist complete in its organization, ready to take and able to maintain its place among the nations of the earth.

While conscious that the insurrection in Cuba has shown a strength and endurance which make it at least doubtful whether it be in the power of Spain to subdue it, it seems unquestionable that no such civil organization exists which may be recognized as an independent government capable of performing its international obligations and entitled to be treated as one of the powers of the earth. A recognition under such circumstances would be inconsistent with the facts, and would compel the power granting it soon to support by force the government to which it had really given its only claim of existence. In my judgment, the United States should adhere to the policy and the principles which have heretofore been its sure and safe guides in like contests between revolted colonies and their mother-country, and, acting only upon the clearest evidence, should avoid any possibility of suspicion or of imputation.

A recognition of the independence of Cuba being, in my opinion, impracticable and indefensible, the question which next presents itself is that of the recognition of belligerent rights in the parties to the contest.

In a former message to Congress I had occasion to consider this question, and reached the conclusion that the conflict in Cuba, dreadful and devastating as were its incidents, did not rise to the fearful dignity of war. Regarding it now, after this lapse of time, I am unable to see that any notable success, or any marked or real advance on the part of the insurgents, has essentially changed the character of the contest. It has acquired greater age, but not greater or more formidable proportions. It is possible that the acts of foreign powers, and even acts of Spain herself, of this very nature, might be pointed to in defense of such recognition. But now, as in its past history, the United States should carefully avoid the false lights which might lead it into the mazes of doubtful law and of questionable propriety, and adhere rigidly and sternly to the rule, which has been its guide, of doing only that which is right, and honest, and of good report. The question of according or of withholding rights of belligerency must be judged, in every case, in view of the particular attending facts. Unless justified by necessity, it is always, and justly, regarded as an unfriendly act, and a gratuitous demonstration of moral support to the rebellion. It is necessary, and it is required, when the interests and rights of another government or of its people are so far affected by a pending civil conflict as to require a definition of its relations to the parties thereto. But this conflict must be one which will be recognized in the sense of international law as war. Belligerence, too, is a fact. The mere existence of contending armed bodies, and their occasional conflicts, do not constitute war in the sense referred to. Applying to the existing condition of affairs in Cuba the tests recognized by publicists and writers on international law, and which have been observed by nations of dignity, honesty, and power, when free from sensitive or selfish and unworthy motives, I fail to find in the insurrection the existence of such a substantial political organization, real, palpable, and manifest to the world, having the forms and capable of the ordinary functions of government toward its own people and to other states, with courts for the administration of justice, with a local habitation, possessing such organization of force, such material, such occupation of territory, as to take the contest out of the category of a mere rebellious insurrection, or occasional skirmishes, and place it on the terrible footing of war, to which a recognition of belligerency would aim to elevate it. The contest, moreover, is solely on land; the insurrection has not possessed itself of a single seaport whence it may send forth its flag,

nor has it any means of communication with foreign powers except through the military lines of its adversaries. No apprehension of any of those sudden and difficult complications which a war upon the ocean is apt to precipitate upon the vessels, both commercial and national, and upon the consular officers of other powers, calls for the definition of their relations to the parties to the contest. Considered as a question of expediency, I regard the accordance of belligerent rights still to be as unwise and premature, as I regard it to be, at present, indefensible as a measure of right. Such recognition entails upon the country according the rights which flow from it difficult and complicated duties, and requires the exactation from the contending parties of the strict observance of their rights and obligations. It confers the rights of search upon the high-seas by vessels of both parties; it would subject the carrying of arms and munitions of war, which now may be transported freely and without interruption in the vessels of the United States, to detention and to possible seizure; it would give rise to countless vexatious questions, would release the parent government from responsibility for acts done by the insurgents, and would invest Spain with the right to exercise the supervision recognized by our treaty of 1795 over our commerce on the high seas, a very large part of which, in its traffic between the Atlantic and the Gulf States, and between all of them and the States on the Pacific, passes through the waters which wash the shores of Cuba. The exercise of this supervision could scarcely fail to lead, if not to abuses, certainly to collisions perilous to the peaceful relations of the two states. There can be little doubt to what result such supervision would before long draw this nation. It would be unworthy of the United States to inaugurate the possibilities of such result, by means of questionable right or expediency, or by any indirection. Apart from any question of theoretical right, I am satisfied that, while the accordance of belligerent rights to the insurgents in Cuba might give them a hope and an inducement to protract the struggle, it would be but a delusive hope, and would not remove the evils which this Government and its people are experiencing, but would draw the United States into complications which it has waited long and already suffered much to avoid. The recognition of independence, or of belligerency, being thus, in my judgment, equally inadmissible, it remains to consider what course shall be adopted should the conflict not soon be brought to an end by acts of the parties themselves, and should the evils which result therefrom, affecting all nations, and particularly the United States, continue.

In such event, I am of opinion that other nations will be compelled to assume the responsibility which devolves upon them, and to seriously consider the only remaining measures possible, mediation and intervention. Owing, perhaps, to the large expanse of water separating the island from the peninsula, the want of harmony and of personal sympathy between the inhabitants of the colony and those sent thither to rule them, and want of adaptation of the ancient colonial system of Europe to the present times and to the ideas which the events of the past century have developed, the contending parties appear to have within themselves no depositary of common confidence, to suggest wisdom when passion and excitement have their sway, and to assume the part of peace-maker. In this view, in the earlier days of the contest the good offices of the United States as a mediator were tendered in good faith, without any selfish purpose, in the interest of humanity and in sincere friendship for both parties, but were at the time declined by Spain, with the declaration, nevertheless, that at a future time they would be indispensable. No intimation has been received that in the opinion of Spain that time has been reached. And yet the strife continues with all

its dread horrors and all its injuries to the interests of the United States and of other nations. Each party seems quite capable of working great injury and damage to the other, as well as to all the relations and interests dependent on the existence of peace in the island; but they seem incapable of reaching any adjustment, and both have thus far failed of achieving any success whereby one party shall possess and control the island to the exclusion of the other. Under these circumstances, the agency of others, either by mediation or by intervention, seems to be the only alternative which must, sooner or later, be invoked for the termination of the strife. At the same time, while thus impressed, I do not at this time recommend the adoption of any measure of intervention. I shall be ready at all times, and as the equal friend of both parties, to respond to a suggestion that the good offices of the United States will be acceptable to aid in bringing about a peace honorable to both. It is due to Spain, so far as this Government is concerned, that the agency of a third power, to which I have adverted, shall be adopted only as a last expedient. Had it been the desire of the United States to interfere in the affairs of Cuba, repeated opportunities for so doing have been presented within the last few years; but we have remained passive, and have performed our whole duty and all international obligations to Spain with friendship, fairness, and fidelity, and with a spirit of patience and forbearance which negatives every possible suggestion of desire to interfere or to add to the difficulties with which she has been surrounded.

The Government of Spain has recently submitted to our minister at Madrid certain proposals which it is hoped may be found to be the basis, if not the actual submission, of terms to meet the requirements of the particular griefs of which this Government has felt itself entitled to complain. These proposals have not yet reached me in their full text. On their arrival they will be taken into careful examination, and may, I hope, lead to a satisfactory adjustment of the questions to which they refer, and remove the possibility of future occurrences, such as have given rise to our just complaints.

It is understood also that renewed efforts are being made to introduce reforms in the internal administration of the island. Persuaded, however, that a proper regard for the interests of the United States and of its citizens entitles it to relief from the strain to which it has been subjected by the difficulties of the questions, and the wrongs and losses which arise from the contest in Cuba, and that the interests of humanity itself demand the cessation of the strife before the whole island shall be laid waste and larger sacrifices of life be made, I shall feel it my duty, should my hopes of a satisfactory adjustment and of the early restoration of peace and the removal of future causes of complaint be, unhappily, disappointed, to make a further communication to Congress at some period not far remote, and during the present session, recommending what may then seem to me to be necessary.

The Free Zone, so called, several years since established by the Mexican Government in certain of the States of that republic adjacent to our frontier, remains in full operation. It has always been materially injurious to honest traffic, for it operates as an incentive to traders in Mexico to supply without customs charges the wants of inhabitants on this side of the line, and prevents the same wants from being supplied by merchants of the United States, thereby, to a considerable extent, defrauding our revenue and checking honest commercial enterprises.

Depredations by armed bands from Mexico on the people of Texas near the frontier continue. Though the main object of these incursions is robbery, they frequently result in the murder of unarmed and peaceably-disposed persons; and in some instances even the United States post-offices and mail communications have been attacked. Renewed remon-

strances upon this subject have been addressed to the Mexican Government, but without much apparent effect. The military force of this Government, disposable for service in that quarter, is quite inadequate to effectually guard the line, even at those points where the incursions are usually made. An experiment of an armed vessel on the Rio Grande for that purpose is on trial, and it is hoped that, if not thwarted by the shallowness of the river and other natural obstacles, it may materially contribute to the protection of the herdsmen of Texas.

The proceedings of the joint commission under the convention between the United States and Mexico of July 4, 1868, on the subject of claims, will soon be brought to a close. The result of those proceedings will then be communicated to Congress.

I am happy to announce that the Government of Venezuela has, upon further consideration, practically abandoned its objection to pay to the United States that share of its revenue which some years since it allotted toward the extinguishment of the claims of foreigners generally. In thus reconsidering its determination that Government has shown a just sense of self-respect which cannot fail to reflect credit upon it in the eyes of all disinterested persons elsewhere. It is to be regretted, however, that its payments on account of claims of citizens of the United States are still so meagre in amount, and that the stipulations of the treaty in regard to the sums to be paid and the periods when those payments were to take place should have been so signally disregarded.

Since my last annual message the exchange has been made of the ratification of a treaty of commerce and navigation with Belgium, and of conventions with the Mexican Republic for the further extension of the joint commission respecting claims; with the Hawaiian Islands for commercial reciprocity, and with the Ottoman Empire for extradition; all of which have been duly proclaimed.

The Court of Commissioners of Alabama Claims has prosecuted its important duties very assiduously and very satisfactorily. It convened and was organized on July 22, 1874, and, by the terms of the act under which it was created, was to exist for one year from that date. The act provided, however, that, should it be found impracticable to complete the work of the court before the expiration of the year, the President might, by proclamation, extend the time of its duration to a period not more than six months beyond the expiration of the one year.

Having received satisfactory evidence that it would be impracticable to complete the work within the time originally fixed, I issued a proclamation (a copy of which is presented herewith) extending the time of duration of the court for a period of six months from and after the twenty-second day of July last.

A report made through the clerk of the court (communicated herewith) shows the condition of the calendar on the 1st of November last, and the large amount of work which has been accomplished. Thirteen hundred and eighty-two claims have been presented, of which six hundred and eighty-two had been disposed of at the date of the report. I am informed that one hundred and seventy cases were decided during the month of November. Arguments are being made and decisions given in the remaining cases with all the dispatch consistent with the proper consideration of the questions submitted. Many of these claims are in behalf of mariners, or depend on the evidence of mariners, whose absence has delayed the taking or the return of the necessary evidence.

It is represented to me that it will be impracticable for the court to finally dispose of all the cases before it within the present limit of its duration. Justice to the parties claimant, who have been at large expense in preparing their claims and obtaining the evidence in their support, suggests a short

extension, to enable the court to dispose of all of the claims which have been presented.

I recommend the legislation which may be deemed proper to enable the court to complete the work before it.

I recommend that some suitable provision be made, by the creation of a special court or by conferring the necessary jurisdiction upon some appropriate tribunal, for the consideration and determination of the claims of aliens against the Government of the United States which have arisen within some reasonable limitation of time, or which may hereafter arise, excluding all claims barred by treaty provisions or otherwise. It has been found impossible to give proper consideration to these claims by the Executive Departments of the Government. Such a tribunal would afford an opportunity to aliens other than British subjects to present their claims on account of acts committed against their persons or property during the rebellion, as also to those subjects of Great Britain whose claims, having arisen subsequent to the 9th day of April, 1865, could not be presented to the late commission organized pursuant to the provisions of the Treaty of Washington.

The electric telegraph has become an essential and indispensable agent in the transmission of business and social messages. Its operation on land, and within the limit of particular States, is necessarily under the control of the jurisdiction within which it operates. The lines on the high-seas, however, are not subject to the particular control of any one government.

In 1869 a concession was granted by the French Government to a company which proposed to lay a cable from the shores of France to the United States. At that time there was a telegraphic connection between the United States and the continent of Europe (through the possessions of Great Britain at either end of the line), under the control of an association which had, at large outlay of capital and at great risk, demonstrated the practicability of maintaining such means of communication. The cost of correspondence by this agency was great, possibly not too large at the time for a proper remuneration for so hazardous and so costly an enterprise. It was, however, a heavy charge upon a means of communication which the progress in the social and commercial intercourse of the world found to be a necessity, and the obtaining of this French concession showed that other capital than that already invested was ready to enter into competition, with assurance of adequate return for their outlay. Impressed with the conviction that the interests, not only of the people of the United States, but of the world at large, demanded, or would demand, the multiplication of such means of communication between separated continents, I was desirous that the proposed connection should be made; but certain provisions of this concession were deemed by me to be objectionable, particularly one which gave for a long term of years the exclusive right of telegraphic communication by submarine cable between the shores of France and the United States. I could not concede that any power should claim the right to land a cable on the shores of the United States, and at the same time deny to the United States, or to its citizens or grantees, an equal right to land a cable on its shores. The right to control the conditions for the laying of a cable within the jurisdictional waters of the United States, to connect our shores with those of any foreign state, pertains exclusively to the Government of the United States, under such limitations and conditions as Congress may impose. In the absence of legislation by Congress, I was unwilling, on the one hand, to yield to a foreign state the right to say that its grantees might land on our shores, while it denied a similar right to our people to land on its shores; and, on the other hand, I was reluctant to deny to the great interests of the world and of civilization

the facilities of such communication as were proposed. I therefore withheld any resistance to the landing of the cable on condition that the offensive monopoly feature of the concession be abandoned, and that the right of any cable which may be established by authority of this Government to land upon French territory, and to connect with French land-lines, and enjoy all the necessary facilities or privileges incident to the use thereof upon as favorable terms as any other company, be conceded. As the result thereof the company in question renounced the exclusive privilege, and the representative of France was informed that, understanding this relinquishment to be construed as granting the entire reciprocity and equal facilities which had been demanded, the opposition to the landing of the cable was withdrawn. The cable, under this French concession, was landed in the month of July, 1869, and has been an efficient and valuable agent of communication between this country and the other continent. It soon passed under the control, however, of those who had the management of the cable connecting Great Britain with this continent, and thus whatever benefit to the public might have ensued from competition between the two lines was lost, leaving only the greater facilities of an additional line, and the additional security in case of accident to one of them. But these increased facilities and this additional security, together with the control of the combined capital of the two companies, gave also greater power to prevent the future construction of other lines, and to limit the control of telegraphic communication between the two continents to those possessing the lines already laid. Within a few months past a cable has been laid, known as the United States Direct Cable Company, connecting the United States directly with Great Britain. As soon as this cable was reported to be laid and in working order, the rates of the then existing consolidated companies were greatly reduced. Soon, however, a break was announced in this new cable, and immediately the rates of the other line, which had been reduced, were again raised. This cable being now repaired, the rates appear not to be reduced by either line from those formerly charged by the consolidated companies.

There is reason to believe that large amounts of capital, both at home and abroad, are ready to seek profitable investment in the advancement of this useful and most civilizing means of intercourse and correspondence. They await, however, the assurance of the means and conditions on which they may safely be made tributary to the general good.

As these cable telegraph-lines connect separate states, there are questions as to their organization and control which probably can be best, if not solely, settled by conventions between the respective states. In the absence, however, of international conventions on the subject, municipal legislation may secure many points which appear to me important, if not indispensable for the protection of the public against the extortions which may result from a monopoly of the right of operating cable-telegrams, or from a combination between several lines:

1. No line should be allowed to land on the shores of the United States under the concession from another power, which does not admit the right of any other line or lines, formed in the United States, to land and freely connect with and operate through its land-lines.

2. No line should be allowed to land on the shores of the United States which is not by treaty stipulation with the government from whose shores it proceeds, or by prohibition in its charter, or otherwise to the satisfaction of this Government, prohibited from consolidating or amalgamating with any other cable telegraph-line, or combining therewith for the purpose of regulating and maintaining the cost of telegraphing.

3. All lines should be bound to give precedence in the transmission of the official messages of the governments of the two countries between which it may be laid.

4. A power should be reserved to the two governments, either conjointly or to each, as regards the messages dispatched from its shores, to fix a limit to the charges to be demanded for the transmission of messages.

I present this subject to the earnest consideration of Congress.

In the mean time, and unless Congress otherwise direct, I shall not oppose the landing of any telegraphic cable which complies with and assents to the points above enumerated, but will feel it my duty to prevent the landing of any which does not conform to the first and second points as stated, and which will not stipulate to concede to this Government the precedence in the transmission of its official messages, and will not enter into a satisfactory arrangement with regard to its charges.

Among the pressing and important subjects to which, in my opinion, the attention of Congress should be directed, are those relating to fraudulent naturalization and expatriation.

The United States, with great liberality, offers its citizenship to all who in good faith comply with the requirements of law. These requirements are as simple and upon as favorable terms to the immigrant as the high privilege to which he is admitted can or should permit. I do not propose any additional requirements to those which the law now demands. But the very simplicity and the want of unnecessary formality in our law have made fraudulent naturalization not infrequent, to the discredit and injury of all honest citizens, whether native or naturalized. Cases of this character are continually being brought to the notice of the Government by our representatives abroad, and also those of persons resident in other countries, most frequently those who, if they have remained in this country long enough to entitle them to become naturalized, have generally not much overpassed that period, and have returned to the country of their origin, where they reside, avoiding all duties to the United States by their absence, and claiming to be exempt from all duties to the country of their nativity and of their residence by reason of their alleged naturalization. It is due to this Government itself and to the great mass of the naturalized citizens who entirely, both in name and in fact, become citizens of the United States, that the high privilege of citizenship of the United States should not be held by fraud or in derogation of the laws and of the good name of every honest citizen. On many occasions it has been brought to the knowledge of the Government that certificates of naturalization are held, and protection or interference claimed, by parties who admit that not only they were not within the United States at the time of the pretended naturalization, but that they have never resided in the United States; in others, the certificate and record of the court show on their face that the person claiming to be naturalized had not resided the required time in the United States; in others, it is admitted upon examination that the requirements of law have not been complied with; in some cases even, such certificates have been matter of purchase. These are not isolated cases, arising at rare intervals, but of common occurrence, and which are reported from all quarters of the globe. Such occurrences cannot, and do not, fail to reflect upon the Government and injure all honest citizens. Such a fraud being discovered, however, there is no practicable means within the control of the Government by which the record of naturalization can be vacated; and should the certificate be taken up, as it usually is, by the diplomatic and consular representatives of the government to whom it may have been presented, there is nothing to prevent the person claiming to have been naturalized from obtain-

ing a new certificate from the court in place of that which has been taken from him.

The evil has become so great and of such frequent occurrence that I cannot too earnestly recommend that some effective measures be adopted to provide a proper remedy and means for the vacating of any record thus fraudulently made, and of punishing the guilty parties to the transaction.

In this connection I refer also to the question of expatriation and the election of nationality.

The United States was foremost in upholding the right of expatriation, and was principally instrumental in overthrowing the doctrine of perpetual allegiance. Congress has declared the right of expatriation to be a natural and inherent right of all people; but, while many other nations have enacted laws providing what formalities shall be necessary to work a change of allegiance, the United States has enacted no provisions of law, and has in no respect marked out how and when expatriation may be accomplished by its citizens. Instances are brought to the attention of the Government where citizens of the United States, either naturalized or native-born, have formally become citizens or subjects of foreign powers, but who, nevertheless, in the absence of any provisions of legislation on this question, when involved in difficulties, or when it seems to be their interest, claim to be citizens of the United States, and demand the intervention of a government which they have long since abandoned, and to which for years they have rendered no service, nor held themselves in any way amenable.

In other cases naturalized citizens, immediately after naturalization, have returned to their native country; have become engaged in business; have accepted offices or pursuits inconsistent with American citizenship, and evidence no intent to return to the United States until called upon to discharge some duty to the country where they are residing, when at once they assert their citizenship, and call upon the representatives of the Government to aid them in their unjust pretensions. It is but justice to all *bona-fide* citizens that no doubt should exist on such questions, and that Congress should determine by enactment of law how expatriation may be accomplished, and change of citizenship be established.

I also invite your attention to the necessity of regulating by law the status of American women who may marry foreigners, and of defining more fully that of children born in a foreign country of American parents who may reside abroad; and also of some further provision regulating or giving legal effect to marriages of American citizens contracted in foreign countries. The correspondence submitted herewith shows a few of the constantly-occurring questions on these points presented to the consideration of the Government. There are few subjects to engage the attention of Congress on which more delicate relations or more important interests are dependent.

In the month of July last the building erected for the Department of State was taken possession of and occupied by that Department. I am happy to announce that the archives and valuable papers of the Government in the custody of that Department are now safely deposited and properly cared for.

The report of the Secretary of the Treasury shows the receipts from customs for the fiscal year ending June 30, 1874, to have been \$163,103,838.69, and for the fiscal year ending June 30, 1875, to have been \$157,167,722.35, a decrease for the last fiscal year of \$5,936,116.34. Receipts from internal revenue for the year ending the 30th of June, 1874, were \$102,409,784.90, and for the year ending June 30, 1875, \$110,007,493.58; increase, \$7,597,708.68.

The report also shows a complete history of the workings of the Department for the last year, and contains recommendations for reforms and for legislation which I concur in, but cannot comment on so

fully as I should like to do if space would permit, but will confine myself to a few suggestions which I look upon as vital to the best interests of the whole people—coming within the purview of "Treasury"—I mean specie resumption. Too much stress cannot be laid upon this question, and I hope Congress may be induced, at the earliest day practicable, to insure the consummation of the act of the last Congress, at its last session, to bring about specie resumption "on and after the 1st of January, 1878," at farthest. It would be a great blessing if this could be consummated even at an earlier day.

Nothing seems to me more certain than that a full, healthy, and permanent reaction cannot take place in favor of the industries and financial welfare of the country until we return to a measure of values recognized throughout the civilized world. While we use a currency not equivalent to this standard, the world's recognized standard, specie, becomes a commodity like the products of the soil, the surplus seeking a market wherever there is a demand for it.

Under our present system we should want none, nor would we have any, were it not that customs dues must be paid in coin, and because of the pledge to pay interest on the public debt in coin. The yield of precious metals would flow out for the purchase of foreign productions and leave the United States "hewers of wood and drawers of water" because of wiser legislation on the subject of finance by the nations with whom we have dealings. I am not prepared to say that I can suggest the best legislation to secure the end most heartily recommended. It will be a source of great gratification to me to be able to approve any measure of Congress looking effectively toward securing "resumption."

Unlimited inflation would probably bring about specie payments more speedily than any legislation looking to the redemption of the legal tenders in coin. But it would be at the expense of honor. The legal tenders would have no value beyond settling present liabilities, or, properly speaking, repudiating them. They would buy nothing after debts were all settled.

There are a few measures which seem to me important in this connection, and which I commend to your earnest consideration:

A repeal of so much of the legal-tender act as makes these notes receivable for debts contracted after a date to be fixed in the act itself, say not later than January 1, 1877. We should then have quotations at real values, not fictitious ones. Gold would no longer be at a premium, but currency at a discount. A healthy reaction would set in at once, and with it a desire to make the currency equal to what it purports to be. The merchants, manufacturers, and tradesmen of every calling could do business on a fair margin of profit, the money to be received having an unvarying value. Laborers and all classes who work for stipulated pay or salary would receive more for their income, because extra profits would no longer be charged by the capitalist to compensate for the risk of a downward fluctuation in the value of the currency.

Second, that the Secretary of the Treasury be authorized to redeem, say not to exceed \$2,000,000 monthly of legal-tender notes, by issuing in their stead a long bond, bearing interest at the rate of 3.65 per cent. per annum, of denominations ranging from fifty dollars up to \$1,000 each. This would in time reduce the legal-tender notes to a volume that could be kept afloat without demanding redemption in large sums suddenly.

Third, that additional power be given to the Secretary of the Treasury to accumulate gold for final redemption, either by increasing revenue, curtailing expenses, or both—it is preferable to do both; and I recommend that reduction of expenditures be made wherever it can be done without impairing government obligations or crippling the due execution thereof. One measure for increasing the reve-

nue—and the only one I think of—is the restoration of the duty on tea and coffee. These duties would add probably \$18,000,000 to the present amount received from imports, and would in no way increase the prices paid for those articles by the consumers.

These articles are the products of countries collecting revenue from exports, and as we, the largest consumers, reduce the duties, they proportionately increase them. With this addition to the revenue, many duties now collected, and which give but an insignificant return for the cost of collection, might be remitted, and to the direct advantage of consumers at home.

I would mention those articles which enter into manufactures of all sorts. All duty paid upon such articles goes directly to the cost of the article when manufactured here, and must be paid for by the consumers. These duties not only come from the consumers at home, but act as a protection to foreign manufacturers of the same completed articles in our own and distant markets.

I will suggest, or mention, another subject bearing upon the problem of "how to enable the Secretary of the Treasury to accumulate balances." It is to devise some better method of verifying claims against the Government than at present exists through the Court of Claims, especially those claims growing out of the late war. Nothing is more certain than that a very large percentage of the amounts passed and paid are either wholly fraudulent or are far in excess of the real losses sustained. The large amount of losses proved—on good testimony according to existing laws, by affidavits of fictitious or unscrupulous persons—to have been sustained on small farms and plantations is not only far beyond the possible yield of those places for any one year, but, as every one knows who has had experience in tilling the soil, and who has visited the scenes of these speculations, is in many instances more than the individual claimants were ever worth, including their personal and real estate.

The report of the Attorney-General, which will be submitted to Congress at an early day, will contain a detailed history of awards made, and of claims pending of the class here referred to.

The report of the Secretary of War, accompanying this message, gives a detailed account of army operations for the year just past, expenses for maintenance, etc., with recommendations for legislation to which I respectfully invite your attention. To some of these I invite special attention:

1. The necessity of making \$300,000 of the appropriation for the Subsistence Department available before the beginning of the next fiscal year. Without this provision troops at points distant from supply production must either go without food or existing laws must be violated. It is not attended with cost to the Treasury.
2. His recommendation for the enactment of a system of annuities for the families of deceased officers by voluntary deductions from the monthly pay of officers. This again is not attended with burden upon the Treasury, and would for the future relieve much distress which every old army officer has witnessed in the past—of officers dying suddenly or being killed, leaving families without even the means of reaching their friends, if fortunate enough to have friends to aid them.
3. The repeal of the law abolishing mileage, and a return to the old system.
4. The trial with torpedoes under the Corps of Engineers, and appropriation for the same. Should war ever occur between the United States and any maritime power, torpedoes will be among, if not the most effective and cheapest auxiliary for the defense of harbors, and also in aggressive operations, that we can have. Hence it is advisable to learn by experiment their best construction and application as well as effect.
5. A permanent organization for the Signal-Ser-

vice Corps. This service has now become a necessity of peace as well as war, under the advancement made by the present able management.

5. A renewal of the appropriation for compiling the official records of the war, etc.

The condition of our Navy at this time is a subject of satisfaction. It does not contain, it is true, any of the powerful cruising iron-clads which make so much of the maritime strength of some other nations, but neither our continental situation nor our foreign policy requires that we should have a large number of ships of this character, while this situation and the nature of our ports combine to make those of other nations little dangerous to us under any circumstances.

Our Navy does contain, however, a considerable number of iron-clads of the monitor class, which, though not properly cruisers, are powerful and effective for harbor defense and for operations near our own shores. Of these all the single-turreted ones, fifteen in number, have been substantially rebuilt, their rotten wooden beams replaced with iron, their hulls strengthened, and their engines and machinery thoroughly repaired, so that they are now in the most efficient condition and ready for sea as soon as they can be manned and put in commission.

The five double-turreted iron-clads belonging to our Navy, by far the most powerful of our ships for fighting purposes, are also in hand undergoing complete repairs, and could be ready for sea in periods varying from four to six months. With these completed according to the present design, and our two iron torpedo-boats now ready, our iron-clad fleet will be, for the purposes of defense at home, equal to any force that can readily be brought against it.

Of our wooden navy also, cruisers of various sizes, to the number of about forty, including those now in commission, are in the Atlantic, and could be ready for duty as fast as men could be enlisted for those not already in commission. Of these, one-third are in effect new ships, and, though some of the remainder need considerable repairs to their boilers and machinery, they all are, or can readily be made, effective.

This constitutes a fleet of more than fifty warships, of which fifteen are iron-clad, now in hand on the Atlantic coast. The Navy has been brought to this condition by a judicious and practical application of what could be spared from the current appropriations of the last few years, and from that made to meet the possible emergency of two years ago. It has been done quietly, without proclamation or display, and though it has necessarily strained the Department in its ordinary expenditure, and, as far as the iron-clads are concerned, has added nothing to the cruising force of the Navy, yet the result is not the less satisfactory, because it is to be found in a great increase of real rather than apparent force. The expenses incurred in the maintenance of an effective naval force in all its branches are necessarily large, but such force is essential to our position, relations, and character, and affects seriously the weight of our principles and policy throughout the whole sphere of national responsibilities.

The estimates for the regular support of this branch of the service for the next year amount to a little less in the aggregate than those made for the current year; but some additional appropriations are asked for objects not included in the ordinary maintenance of the Navy, but believed to be of pressing importance at this time. It would, in my opinion, be wise at once to afford sufficient means for the immediate completion of the five double-turreted monitors now undergoing repairs, which must otherwise advance slowly, and only as money can be spared from current expenses. Supplemented by these, our Navy, armed with the destructive weapons of modern warfare, manned by our seamen, and in charge of our instructed officers, will present a force

powerful for the home purposes of a responsible though peaceful nation.

The report of the Postmaster-General, herewith transmitted, gives a full history of the workings of the Department for the year just past. It will be observed that the deficiency to be supplied from the General Treasury increased over the amount required for the preceding year. In a country so vast in area as the United States, with large portions sparsely settled, it must be expected that this important service will be more or less a burden upon the Treasury for many years to come. But there is no branch of the public service which interests the whole people more than that of cheap and rapid transmission of the mails to every inhabited part of our territory. Next to the free school, the post-office is the great educator of the people, and it may well receive the support of the General Government.

The subsidy of \$150,000 per annum given to vessels of the United States for carrying the mails between New York and Rio de Janeiro having ceased on the 30th day of September last, we are without direct mail facilities with the South American states. This is greatly to be regretted, and I do not hesitate to recommend the authorization of a renewal of that contract, and also that the service may be increased from monthly to semi-monthly trips. The commercial advantages to be gained by a direct line of American steamers to the South American states will far outweigh the expense of the service.

By act of Congress approved March 3, 1875, almost all matter, whether properly mail-matter or not, may be sent any distance through the mails, in packages not exceeding four pounds in weight, for the sum of sixteen cents per pound. So far as the transmission of real mail-matter goes, this would seem entirely proper. But I suggest that the law be so amended as to exclude from the mails merchandise of all descriptions, and limit this transportation to articles enumerated, and which may be classed as mail-matter proper.

The discovery of gold in the Black Hills, a portion of the Sioux reservation, has had the effect to induce a large emigration of miners to that point. Thus far the effort to protect the treaty rights of the Indians to that section has been successful, but the next year will certainly witness a large increase of such emigration. The negotiations for the relinquishment of the gold-fields having failed, it will be necessary for Congress to adopt some measures to relieve the embarrassment growing out of the causes named. The Secretary of the Interior suggests that the supplies now appropriated for the sustenance of that people, being no longer obligatory under the treaty of 1868, but simply a gratuity, may be issued or withheld at his discretion.

The condition of the Indian Territory, to which I have referred in several of my former annual messages, remains practically unchanged. The Secretary of the Interior has taken measures to obtain a full report of the condition of that Territory, and will make it the subject of a special report at an early day. It may then be necessary to make some further recommendation in regard to legislation for the government of that Territory.

The steady growth and increase of the business of the Patent-Office indicate, in some measure, the progress of the industrial activity of the country. The receipts of the office are in excess of its expenditures, and the office generally is in a prosperous and satisfactory condition.

The report of the General Land-Office shows that there were 2,459,601 acres less disposed of during this than during the last year. More than one-half of this decrease was in lands disposed of under the homestead and timber-culture laws. The cause of this decrease is supposed to be found in the grasshopper scourge and the droughts which prevailed so extensively in some of the frontier States and Territories during that time as to discourage and

deter entries by actual settlers. The cash receipts were less, by \$690,322.23 than during the preceding year.

The entire surveyed area of the public domain is 680,253,094 acres, of which 26,077,531 acres were surveyed during the past year, leaving 1,154,471,763 acres still unsurveyed.

The report of the Commissioner presents many interesting suggestions in regard to the management and disposition of the public domain and the modification of existing laws, the apparent importance of which should insure for them the careful consideration of Congress.

The number of pensioners still continues to decrease, the highest number having been reached during the year ending June 30, 1873. During the last year, 11,557 names were added to the rolls, and 12,977 were dropped therefrom, showing a net decrease of 1,420. But while the number of pensioners has decreased, the annual amount due on the pension-rolls has increased \$44,733.18. This is caused by the greatly increased average rate of pensions, which, by the liberal legislation of Congress, has increased from \$90.26 in 1872 to \$103.91 in 1875 to each invalid pensioner, an increase in the average rate of fifteen per cent. in the three years. During the year ending June 30, 1875, there was paid on account of pensions, including the expenses of disbursement, \$29,633,116, being \$910,632 less than was paid the preceding year. This reduction in amount of expenditures was produced by the decrease in the amount of arrearages due on allowed claims, and on pensions, the rate of which was increased by the legislation of the preceding session of Congress. At the close of the last fiscal year there were on the pension-rolls 234,321 persons, of whom 210,363 were army pensioners, 105,478 being invalids and 104,885 widows and dependent relatives; 3,420 were navy pensioners, of whom 1,688 were invalids and 1,734 widows and dependent relatives; 21,038 were pensioners of the War of 1812, 15,875 of whom were survivors and 5,163 were widows.

It is estimated that \$29,535,000 will be required for the payment of pensions for the next fiscal year, an amount \$965,000 less than the estimate for the present year.

The geological explorations have been prosecuted with energy during the year, covering an area of about forty thousand square miles in the Territories of Colorado, Utah, and New Mexico, developing the agricultural and mineral resources, and furnishing interesting scientific and topographical details of that region.

The method for the treatment of the Indians, adopted at the beginning of my first term, has been steadily pursued, and with satisfactory and encouraging results. It has been productive of evident improvement in the condition of that race, and will be continued, with only such modifications as further experience may indicate to be necessary.

The board heretofore appointed to take charge of the articles and materials pertaining to the War, the Navy, the Treasury, the Interior, and the Post-Office Departments, and the Department of Agriculture, the Smithsonian Institution, and the Commission of Food-Fishes, to be contributed, under the legislation of last session, to the International Exhibition to be held at Philadelphia during the centennial year 1876, has been diligent in the discharge of the duties which have devolved upon it; and the preparations so far made with the means at command give assurance that the governmental contribution will be made one of the marked characteristics of the exhibition. The board has observed commendable economy in the matter of the erection of a building for the governmental exhibit, the expense of which, it is estimated, will not exceed, say, \$30,000. This amount has been withdrawn, under the law, from the appropriations of five of the principal Departments, which leaves some of those Departments

without sufficient means to render their respective practical exhibits complete and satisfactory. The exhibition being an international one, and the Government being a voluntary contributor, it is my opinion that its contribution should be of a character, in quality and extent, to sustain the dignity and credit of so distinguished a contributor. The advantages to the country of a creditable display are, in an international point of view, of the first importance, while an indifferent or uncreditable participation by the Government would be humiliating to the patriotic feelings of our people themselves. I commend the estimates of the board for the necessary additional appropriations to the favorable consideration of Congress.

The powers of Europe, almost without exception, many of the South American states, and even the more distant Eastern powers, have manifested their friendly sentiments toward the United States and the interest of the world in our progress by taking steps to join with us in celebrating the centennial of the nation, and I strongly recommend that a more national importance be given to this exhibition by such legislation and by such appropriation as will insure its success. Its value in bringing to our shores innumerable useful works of art and skill, the commingling of the citizens of foreign countries and our own, and the interchange of ideas and manufactures will far exceed any pecuniary outlay we may make.

I transmit herewith the report of the Commissioner of Agriculture, together with the reports of the commissioners, the Board of Audit, and the Board of Health of the District of Columbia, to all of which I invite your attention.

The Bureau of Agriculture has accomplished much in disseminating useful knowledge to the agriculturist, and also in introducing new and useful productions adapted to our soil and climate, and is worthy of the continued encouragement of the Government.

The report of the Commissioner of Education, which accompanies the report of the Secretary of the Interior, shows a gratifying progress in educational matters.

In nearly every annual message that I have had the honor of transmitting to Congress I have called attention to the anomalous, not to say scandalous, condition of affairs existing in the Territory of Utah, and have asked for definite legislation to correct it. That polygamy should exist in a free, enlightened, and Christian country, without the power to punish so flagrant a crime against decency and morality, seems preposterous. True, there is no law to sustain this unnatural vice, but what is needed is a law to punish it as a crime, and at the same time to fix the status of the innocent children, the offspring of this system; and of the possibly innocent plural wives. But, as an institution, polygamy should be banished from the land.

While this is being done, I invite the attention of Congress to another, though perhaps no less an evil, the importation of Chinese women, but few of whom are brought to our shores to pursue honorable or useful occupations.

Observations while visiting the Territories of Wyoming, Utah, and Colorado, during the past autumn, convinced me that existing laws regulating the disposition of public lands, timber, etc., and probably the mining laws themselves, are very defective, and should be carefully amended, and at an early day. In territory where cultivation of the soil can only be followed by irrigation, and where irrigation is not practicable the lands can only be used as pasture, and this only where stock can reach water (to quench its thirst), and cannot be governed by the same laws as to entries as lands every acre of which is an independent estate by itself.

Land must be held in larger quantities to justify the expense of conducting water upon it to make it fruitful, or to justify utilizing it as pasture. The

timber in most of the Territories is principally confined to the mountain-regions which are held for entry in small quantities only, and as mineral lands. The timber is the property of the United States, for the disposal of which there is now no adequate law. The settler must become a consumer of this timber whether he lives upon the plain or engages in working the mines. Hence every man becomes either a trespasser himself, or, knowingly, a patron of trespassers.

My opportunities for observation were not sufficient to justify me in recommending specific legislation on these subjects, but I do recommend that a joint committee of the two Houses of Congress—sufficiently large to be divided into sub-committees—be organized to visit all the mining States and Territories during the coming summer, and that the committee shall report to Congress at the next session such laws, or amendments to laws, as it may deem necessary to secure the best interests of the Government and the people of these Territories who are doing so much for their development.

I am sure the citizens occupying the territory described do not wish to be trespassers, nor will they be if legal ways are provided for them to become owners of these actual necessities of their position.

As this will be the last annual message which I shall have the honor of transmitting to Congress before my successor is chosen, I will repeat or recapitulate the questions which I deem of vital importance, which may be legislated upon and settled at this session:

1. That the States shall be required to afford the opportunity of a good common-school education to every child within their limits.

2. No sectarian tenets shall ever be taught in any school supported in whole or in part by the State, nation, or by the proceeds of any tax levied upon any community. Make education compulsory, so far as to deprive all persons who cannot read and write from becoming voters after the year 1890, disfranchising none, however, on grounds of illiteracy who may be voters at the time this amendment takes effect.

3. Declare church and state forever separate and distinct, but each free within its proper sphere; and that all church-property shall bear its own proportion of taxation.

4. Drive out licensed immorality, such as polygamy and the importation of women for illegitimate purposes. To recur again to the centennial year, it would seem as though now, as we are about to begin the second century of our national existence, would be a most fitting time for these reforms.

5. Enact such laws as will insure a speedy return to a sound currency, such as will command the respect of the world.

Believing that these views will commend themselves to the great majority of the right-thinking and patriotic citizens of the United States, I submit the rest to Congress.

U. S. GRANT.

Whiskey Frauds—how they have been committed—Precautions taken against their Recurrence—their Extent.

The following is an extract from the report of Mr. D. D. Pratt, Commissioner of Internal Revenue, in relation to the recent whiskey frauds:

Public attention has been often called, within the past few months, to extensive frauds committed in certain localities upon the revenue by distillers and rectifiers of distilled spirits. I propose, briefly as I can, to give an account, first, of the checks, guards, and protections against frauds established by law; second, of the manner in which "whiskey frauds," so called, lately exposed, were perpetrated upon the

Government; third, of the extent of these frauds; fourth, of the checks recently established to prevent a recurrence of the same; and, fifth, to suggest the legislation which, in my opinion, is necessary to insure a fuller collection in the future of taxes upon distilled spirits.

1. The system of surveillance now in force at all distilleries, to insure that none of the product may escape taxation, is based upon the presumption that all local officers are honest. Where such is the case it works admirably, and insures the collection of tax upon every gallon of spirits produced by the distiller. It could hardly be expected, however, that among over twenty-three hundred storekeepers and gaugers some would not prove dishonest, especially since there is always near them, in the person of the distiller, if he happen to be an unscrupulous man, a tempter to move them by bribes.

In order, therefore, to effectually prevent fraud, it is necessary to establish a system that shall surely detect it, and that shall be followed by certain and severe penalties. With the distiller it is a matter of dollars and cents, so that, if the risk in committing fraud is made so great that it does not pay, he will not only be honest himself, but will inform on others as a matter of self-protection.

The present system may be described briefly as follows: A storekeeper is assigned to every distillery, whose duty it is to record the time of filling and emptying every mash-tub, to weigh every pound of grain that is used in the mash, and to see that the law is strictly complied with. The cistern-room, where the spirits are received, is placed in charge of a gauger, who determines the exact quantity produced, and the gauge to each barrel into which the spirits are drawn. The pipes from the still to the cistern-room are continuous, so that the distiller has no access to the spirits until after they are gauged and the quantities determined. Each barrel filled in the cistern-room must be serially numbered, beginning with No. 1, and running consecutively without duplication. A warehouse-stamp must then be affixed to the barrel, which stamp has also a serial number, never duplicated, and shows the number of barrel, contents in proof, and wine-gallons, name of gauger, and date of affixing. The barrel so marked is then placed in a warehouse on the distillery premises, where it can remain not to exceed one month without a warehousing-bond, or not to exceed one year when such a bond is given. When the package is to be withdrawn, the collector furnishes, on application and after payment of the tax, a tax-paid stamp, which is filled in with the same number of package, proof, and wine-gallons, as appears on the warehouse-stamp, and has itself another distinctive serial number, which is never duplicated. The package of spirits is now ready for market, and is so fully marked and branded as to enable any revenue-officer to identify it wherever found, since no other package can exist legally with the same numbers, marks, and brands.

The distiller is required to keep a book, in which he records a full description of each package, specifying all the marks and brands above specified, and the name of the party to whom each package is sold. The purchaser is required to keep a book, which records a like description of the package, and states both from whom it was purchased and to whom he sells it. A complete record is thus kept of the whereabouts of each package of spirits until it is dumped for rectification or reaches the consumer.

The system of checks, as applied to rectifiers, is as follows: A rectifier is permitted to rectify spirits bought by him, and place the same upon the market under a rectifier's stamp. When he purchases the spirits, and is ready to dump for rectification, he makes out a full description of the packages, giving all serial numbers, date of original gauge, and name of distiller producing the spirits, and sends a notice of intention to rectify the same to the collector, who

its acquisition of the rights of sovereignty. A power should exist complete in its organization, ready to take and able to maintain its place among the nations of the earth.

While conscious that the insurrection in Cuba has shown a strength and endurance which make it at least doubtful whether it be in the power of Spain to subdue it, it seems unquestionable that no such civil organization exists which may be recognized as an independent government capable of performing its international obligations and entitled to be treated as one of the powers of the earth. A recognition under such circumstances would be inconsistent with the facts, and would compel the power granting it soon to support by force the government to which it had really given its only claim of existence. In my judgment, the United States should adhere to the policy and the principles which have heretofore been its sure and safe guides in like contests between revolted colonies and their mother-country, and, acting only upon the clearest evidence, should avoid any possibility of suspicion or of imputation.

A recognition of the independence of Cuba being, in my opinion, impracticable and indefensible, the question which next presents itself is that of the recognition of belligerent rights in the parties to the contest.

In a former message to Congress I had occasion to consider this question, and reached the conclusion that the conflict in Cuba, dreadful and devastating as were its incidents, did not rise to the fearful dignity of war. Regarding it now, after this lapse of time, I am unable to see that any notable success, or any marked or real advance on the part of the insurgents, has essentially changed the character of the contest. It has acquired greater age, but not greater or more formidable proportions. It is possible that the acts of foreign powers, and even acts of Spain herself, of this very nature, might be pointed to in defense of such recognition. But now, as in its past history, the United States should carefully avoid the false lights which might lead it into the mazes of doubtful law and of questionable propriety, and adhere rigidly and sternly to the rule, which has been its guide, of doing only that which is right, and honest, and of good report. The question of according or of withholding rights of belligerency must be judged, in every case, in view of the particular attending facts. Unless justified by necessity, it is always, and justly, regarded as an unfriendly act, and a gratuitous demonstration of moral support to the rebellion. It is necessary, and it is required, when the interests and rights of another government or of its people are so far affected by a pending civil conflict as to require a definition of its relations to the parties thereto. But this conflict must be one which will be recognized in the sense of international law as war. Belligerency, too, is a fact. The mere existence of contending armed bodies, and their occasional conflicts, do not constitute war in the sense referred to. Applying to the existing condition of affairs in Cuba the tests recognized by publicists and writers on international law, and which have been observed by nations of dignity, honesty, and power, when free from sensitive or selfish and unworthy motives, I fail to find in the insurrection the existence of such a substantial political organization, real, palpable, and manifest to the world, having the forms and capable of the ordinary functions of government toward its own people and to other states, with courts for the administration of justice, with a local habitation, possessing such organization of force, such material, such occupation of territory, as to take the contest out of the category of a mere rebellious insurrection, or occasional skirmishes, and place it on the terrible footing of war, to which a recognition of belligerency would aim to elevate it. The contest, moreover, is solely on land; the insurrection has not possessed itself of a single seaport whence it may send forth its flag,

nor has it any means of communication with foreign powers except through the military lines of its adversaries. No apprehension of any of those sudden and difficult complications which a war upon the ocean is apt to precipitate upon the vessels, both commercial and national, and upon the consular officers of other powers, calls for the definition of the relations to the parties to the contest. Considered as a question of expediency, I regard the accordance of belligerent rights still to be as unwise and premature, as I regard it to be, at present, indefensible as a measure of right. Such recognition entails upon the country according the rights which flow from difficult and complicated duties, and requires the exaction from the contending parties of the strict observance of their rights and obligations. It confers the rights of search upon the high-seas by vessels of both parties; it would subject the carrying of arms and munitions of war, which now may be transported freely and without interruption in the vessels of the United States, to detention and to possible seizure; it would give rise to countless vexatious questions, would release the parent government from responsibility for acts done by the insurgents, and would invest Spain with the right to exercise the supervision recognized by our treaty of 1795 over our commerce on the high seas, a very large part of which, in its traffic between the Atlantic and the Gulf States, and between all of them and the States on the Pacific, passes through the waters which wash the shores of Cuba. The exercise of this supervision could scarcely fail to lead, if not to abuses, certainly to collisions perilous to the peaceful relations of the two states. There can be little doubt to what result such supervision would before long draw this nation. It would be unworthy of the United States to inaugurate the possibilities of such result, by means of questionable right or expediency, or by any indirection. Apart from any question of theoretical right, I am satisfied that, while the accordance of belligerent rights to the insurgents in Cuba might give them a hope and an inducement to protract the struggle, it would be but a delusive hope, and would not remove the evils which this Government and its people are experiencing, but would draw the United States into complications which it has waited long and already suffered much to avoid. The recognition of independence, or of belligerency, being thus, in my judgment, equally inadmissible, it remains to consider what course shall be adopted should the conflict not soon be brought to an end by acts of the parties themselves, and should the evils which result therefrom, affecting all nations, and particularly the United States, continue.

In such event, I am of opinion that other nations will be compelled to assume the responsibility which devolves upon them, and to seriously consider the only remaining measures possible, mediation and intervention. Owing, perhaps, to the large expanse of water separating the island from the peninsula, the want of harmony and of personal sympathy between the inhabitants of the colony and those sent thither to rule them, and want of adaptation of the ancient colonial system of Europe to the present times and to the ideas which the events of the past century have developed, the contending parties appear to have within themselves no depositary of common confidence, to suggest wisdom when passion and excitement have their sway, and to assume the part of peace-maker. In this view, in the earlier days of the contest the good offices of the United States as a mediator were tendered in good faith, without any selfish purpose, in the interest of humanity and in sincere friendship for both parties, but were at the time declined by Spain, with the declaration, nevertheless, that at a future time they would be indispensable. No intimation has been received that in the opinion of Spain that time has been reached. And yet the strife continues with all

a dread horrors and all its injuries to the interests of the United States and of other nations. Each party seems quite capable of working great injury and damage to the other, as well as to all the relations and interests dependent on the existence of peace in the island; but they seem incapable of reaching any adjustment, and both have thus far failed of achieving any success whereby one party shall possess and control the island to the exclusion of the other. Under these circumstances, the agency of others, either by mediation or by intervention, seems to be the only alternative which must, sooner or later, be invoked for the termination of the strife. At the same time, while thus impressed, I do not at this time recommend the adoption of any measure of intervention. I shall be ready at all times, and as the equal friend of both parties, to respond to a suggestion that the good offices of the United States will be acceptable to aid in bringing about a peace honorable to both. It is due to Spain, so far as this Government is concerned, that the agency of a third power, to which I have adverted, shall be adopted only as a last expedient. Had it been the desire of the United States to interfere in the affairs of Cuba, repeated opportunities for so doing have been presented within the last few years; but we have remained passive, and have performed our whole duty and all international obligations to Spain with friendship, fairness, and fidelity, and with a spirit of patience and forbearance which negatives every possible suggestion of desire to interfere or to add to the difficulties with which she has been surrounded.

The Government of Spain has recently submitted to our minister at Madrid certain proposals which it is hoped may be found to be the basis, if not the actual submission, of terms to meet the requirements of the particular griefs of which this Government has felt itself entitled to complain. These proposals have not yet reached me in their full text. On their arrival they will be taken into careful examination, and may, I hope, lead to a satisfactory adjustment of the questions to which they refer, and remove the possibility of future occurrences, such as have given rise to our just complaints.

It is understood also that renewed efforts are being made to introduce reforms in the internal administration of the island. Persuaded, however, that a proper regard for the interests of the United States and of its citizens entitles it to relief from the strain to which it has been subjected by the difficulties of the questions, and the wrongs and losses which arise from the contest in Cuba, and that the interests of humanity itself demand the cessation of the strife before the whole island shall be laid waste and larger sacrifices of life be made, I shall feel it my duty, should my hopes of a satisfactory adjustment and of the early restoration of peace and the removal of future causes of complaint be, unhappily, disappointed, to make a further communication to Congress at some period not far remote, and during the present session, recommending what may then seem to me to be necessary.

The Free Zone, so called, several years since established by the Mexican Government in certain of the States of that republic adjacent to our frontier, remains in full operation. It has always been materially injurious to honest traffic, for it operates as an incentive to traders in Mexico to supply without customs charges the wants of inhabitants on this side of the line, and prevents the same wants from being supplied by merchants of the United States, thereby, to a considerable extent, defrauding our revenue and checking honest commercial enterprises.

Depredations by armed bands from Mexico on the people of Texas near the frontier continue. Though the main object of these incursions is robbery, they frequently result in the murder of unarmed and peaceably-disposed persons; and in some instances even the United States post-offices and mail communications have been attacked. Renewed remon-

strances upon this subject have been addressed to the Mexican Government, but without much apparent effect. The military force of this Government, disposable for service in that quarter, is quite inadequate to effectually guard the line, even at those points where the incursions are usually made. An experiment of an armed vessel on the Rio Grande for that purpose is on trial, and it is hoped that, if not thwarted by the shallowness of the river and other natural obstacles, it may materially contribute to the protection of the herdsmen of Texas.

The proceedings of the joint commission under the convention between the United States and Mexico of July 4, 1868, on the subject of claims, will soon be brought to a close. The result of those proceedings will then be communicated to Congress.

I am happy to announce that the Government of Venezuela has, upon further consideration, practically abandoned its objection to pay to the United States that share of its revenue which some years since it allotted toward the extinguishment of the claims of foreigners generally. In thus reconsidering its determination that Government has shown a just sense of self-respect which cannot fail to reflect credit upon it in the eyes of all disinterested persons elsewhere. It is to be regretted, however, that its payments on account of claims of citizens of the United States are still so meagre in amount, and that the stipulations of the treaty in regard to the sums to be paid and the periods when those payments were to take place should have been so signally disregarded.

Since my last annual message the exchange has been made of the ratification of a treaty of commerce and navigation with Belgium, and of conventions with the Mexican Republic for the further extension of the joint commission respecting claims; with the Hawaiian Islands for commercial reciprocity, and with the Ottoman Empire for extradition; all of which have been duly proclaimed.

The Court of Commissioners of Alabama Claims has prosecuted its important duties very assiduously and very satisfactorily. It convened and was organized on July 23, 1874, and, by the terms of the act under which it was created, was to exist for one year from that date. The act provided, however, that, should it be found impracticable to complete the work of the court before the expiration of the year, the President might, by proclamation, extend the time of its duration to a period not more than six months beyond the expiration of the one year.

Having received satisfactory evidence that it would be impracticable to complete the work within the time originally fixed, I issued a proclamation (a copy of which is presented herewith) extending the time of duration of the court for a period of six months from and after the twenty-second day of July last.

A report made through the clerk of the court (communicated herewith) shows the condition of the calendar on the 1st of November last, and the large amount of work which has been accomplished. Thirteen hundred and eighty-two claims have been presented, of which six hundred and eighty-two had been disposed of at the date of the report. I am informed that one hundred and seventy cases were decided during the month of November. Arguments are being made and decisions given in the remaining cases with all the dispatch consistent with the proper consideration of the questions submitted. Many of these claims are in behalf of mariners, or depend on the evidence of mariners, whose absence has delayed the taking or the return of the necessary evidence.

It is represented to me that it will be impracticable for the court to finally dispose of all the cases before it within the present limit of its duration. Justice to the parties claimant, who have been at large expense in preparing their claims and obtaining the evidence in their support, suggests a short

extension, to enable the court to dispose of all of the claims which have been presented.

I recommend the legislation which may be deemed proper to enable the court to complete the work before it.

I recommend that some suitable provision be made, by the creation of a special court or by conferring the necessary jurisdiction upon some appropriate tribunal, for the consideration and determination of the claims of aliens against the Government of the United States which have arisen within some reasonable limitation of time, or which may hereafter arise, excluding all claims barred by treaty provisions or otherwise. It has been found impossible to give proper consideration to these claims by the Executive Departments of the Government. Such a tribunal would afford an opportunity to aliens other than British subjects to present their claims on account of acts committed against their persons or property during the rebellion, as also to those subjects of Great Britain whose claims, having arisen subsequent to the 9th day of April, 1865, could not be presented to the late commission organized pursuant to the provisions of the Treaty of Washington.

The electric telegraph has become an essential and indispensable agent in the transmission of business and social messages. Its operation on land, and within the limit of particular States, is necessarily under the control of the jurisdiction within which it operates. The lines on the high-seas, however, are not subject to the particular control of any one government.

In 1869 a concession was granted by the French Government to a company which proposed to lay a cable from the shores of France to the United States. At that time there was a telegraphic connection between the United States and the continent of Europe (through the possessions of Great Britain at either end of the line), under the control of an association which had, at large outlay of capital and at great risk, demonstrated the practicability of maintaining such means of communication. The cost of correspondence by this agency was great, possibly not too large at the time for a proper remuneration for so hazardous and so costly an enterprise. It was, however, a heavy charge upon a means of communication which the progress in the social and commercial intercourse of the world found to be a necessity, and the obtaining of this French concession showed that other capital than that already invested was ready to enter into competition, with assurance of adequate return for their outlay. Impressed with the conviction that the interests, not only of the people of the United States, but of the world at large, demanded, or would demand, the multiplication of such means of communication between separated continents, I was desirous that the proposed connection should be made; but certain provisions of this concession were deemed by me to be objectionable, particularly one which gave for a long term of years the exclusive right of telegraphic communication by submarine cable between the shores of France and the United States. I could not concede that any power should claim the right to land a cable on the shores of the United States, and at the same time deny to the United States, or to its citizens or grantees, an equal right to land a cable on its shores. The right to control the conditions for the laying of a cable within the jurisdictional waters of the United States, to connect our shores with those of any foreign state, pertains exclusively to the Government of the United States, under such limitations and conditions as Congress may impose. In the absence of legislation by Congress, I was unwilling, on the one hand, to yield to a foreign state the right to say that its grantees might land on our shores, while it denied a similar right to our people to land on its shores; and, on the other hand, I was reluctant to deny to the great interests of the world and of civilization

the facilities of such communication as were proposed. I therefore withheld any resistance to the landing of the cable on condition that the offensive monopoly feature of the concession be abandoned, and that the right of any cable which may be established by authority of this Government to land upon French territory, and to connect with French land-lines, and enjoy all the necessary facilities or privileges incident to the use thereof upon as favorable terms as any other company, be conceded. As the result thereof the company in question renounced the exclusive privilege, and the representative of France was informed that, understanding this relinquishment to be construed as granting the entire reciprocity and equal facilities which had been demanded, the opposition to the landing of the cable was withdrawn. The cable, under this French concession, was landed in the month of July, 1869, and has been an efficient and valuable agent of communication between this country and the other continent. It soon passed under the control, however, of those who had the management of the cable connecting Great Britain with this continent, and thus whatever benefit to the public might have ensued from competition between the two lines was lost, leaving only the greater facilities of an additional line, and the additional security in case of accident to one of them. But these increased facilities and this additional security, together with the control of the combined capital of the two companies, gave also greater power to prevent the future construction of other lines, and to limit the control of telegraphic communication between the two continents to those possessing the lines already laid. Within a few months past a cable has been laid, known as the United States Direct Cable Company, connecting the United States directly with Great Britain. As soon as this cable was reported to be laid and in working order, the rates of the then existing consolidated companies were greatly reduced. Soon, however, a break was announced in this new cable, and immediately the rates of the other line, which had been reduced, were again raised. This cable being now repaired, the rates appear not to be reduced by either line from those formerly charged by the consolidated companies.

There is reason to believe that large amounts of capital, both at home and abroad, are ready to seek profitable investment in the advancement of this useful and most civilizing means of intercourse and correspondence. They await, however, the assurance of the means and conditions on which they may safely be made tributary to the general good.

As these cable telegraph-lines connect separate states, there are questions as to their organization and control which probably can be best, if not solely, settled by conventions between the respective states. In the absence, however, of international conventions on the subject, municipal legislation may secure many points which appear to me important, if not indispensable for the protection of the public against the extortions which may result from a monopoly of the right of operating cable-telegrams, or from a combination between several lines:

1. No line should be allowed to land on the shores of the United States under the concession from another power, which does not admit the right of any other line or lines, formed in the United States, to land and freely connect with and operate through its land-lines.

2. No line should be allowed to land on the shores of the United States which is not by treaty stipulation with the government from whose shores it proceeds, or by prohibition in its charter, or otherwise to the satisfaction of this Government, prohibited from consolidating or amalgamating with any other cable telegraph-line, or combining therewith for the purpose of regulating and maintaining the cost of telegraphing.

3. All lines should be bound to give precedence in the transmission of the official messages of the governments of the two countries between which it may be laid.

4. A power should be reserved to the two governments, either conjointly or to each, as regards the messages dispatched from its shores, to fix a limit to the charges to be demanded for the transmission of messages.

I present this subject to the earnest consideration of Congress.

In the mean time, and unless Congress otherwise direct, I shall not oppose the landing of any telegraphic cable which complies with and assents to the points above enumerated, but will feel it my duty to prevent the landing of any which does not conform to the first and second points as stated, and which will not stipulate to concede to this Government the precedence in the transmission of its official messages, and will not enter into a satisfactory arrangement with regard to its charges.

Among the pressing and important subjects to which, in my opinion, the attention of Congress should be directed, are those relating to fraudulent naturalization and expatriation.

The United States, with great liberality, offers its citizenship to all who in good faith comply with the requirements of law. These requirements are as simple and upon as favorable terms to the immigrant as the high privilege to which he is admitted can or should permit. I do not propose any additional requirements to those which the law now demands. But the very simplicity and the want of unnecessary formality in our law have made fraudulent naturalization not infrequent, to the discredit and injury of all honest citizens, whether native or naturalized. Cases of this character are continually being brought to the notice of the Government by our representatives abroad, and also those of persons resident in other countries, most frequently those who, if they have remained in this country long enough to entitle them to become naturalized, have generally not much overpassed that period, and have returned to the country of their origin, where they reside, avoiding all duties to the United States by their absence, and claiming to be exempt from all duties to the country of their nativity and of their residence by reason of their alleged naturalization. It is due to this Government itself and to the great mass of the naturalized citizens who entirely, both in name and in fact, become citizens of the United States, that the high privilege of citizenship of the United States should not be held by fraud or in derogation of the laws and of the good name of every honest citizen. On many occasions it has been brought to the knowledge of the Government that certificates of naturalization are held, and protection or interference claimed, by parties who admit that not only they were not within the United States at the time of the pretended naturalization, but that they have never resided in the United States; in others, the certificate and record of the court show on their face that the person claiming to be naturalized had not resided the required time in the United States; in others, it is admitted upon examination that the requirements of law have not been complied with; in some cases even, such certificates have been matter of purchase. These are not isolated cases, arising at rare intervals, but of common occurrence, and which are reported from all quarters of the globe. Such occurrences cannot, and do not, fail to reflect upon the Government and injure all honest citizens. Such a fraud being discovered, however, there is no practicable means within the control of the Government by which the record of naturalization can be vacated; and should the certificate be taken up, as it usually is, by the diplomatic and consular representatives of the government to whom it may have been presented, there is nothing to prevent the person claiming to have been naturalized from obtain-

ing a new certificate from the court in place of that which has been taken from him.

The evil has become so great and of such frequent occurrence that I cannot too earnestly recommend that some effective measures be adopted to provide a proper remedy and means for the vacating of any record thus fraudulently made, and of punishing the guilty parties to the transaction.

In this connection I refer also to the question of expatriation and the election of nationality.

The United States was foremost in upholding the right of expatriation, and was principally instrumental in overthrowing the doctrine of perpetual allegiance. Congress has declared the right of expatriation to be a natural and inherent right of all people; but, while many other nations have enacted laws providing what formalities shall be necessary to work a change of allegiance, the United States has enacted no provisions of law, and has in no respect marked out how and when expatriation may be accomplished by its citizens. Instances are brought to the attention of the Government where citizens of the United States, either naturalized or native-born, have formally become citizens or subjects of foreign powers, but who, nevertheless, in the absence of any provisions of legislation on this question, when involved in difficulties, or when it seems to be their interest, claim to be citizens of the United States, and demand the intervention of a government which they have long since abandoned, and to which for years they have rendered no service, nor held themselves in any way amenable.

In other cases naturalized citizens, immediately after naturalization, have returned to their native country; have become engaged in business; have accepted offices or pursuits inconsistent with American citizenship, and evidence no intent to return to the United States until called upon to discharge some duty to the country where they are residing, when at once they assert their citizenship, and call upon the representatives of the Government to aid them in their unjust pretensions. It is but justice to all *bona-fide* citizens that no doubt should exist on such questions, and that Congress should determine by enactment of law how expatriation may be accomplished, and change of citizenship be established.

I also invite your attention to the necessity of regulating by law the status of American women who may marry foreigners, and of defining more fully that of children born in a foreign country of American parents who may reside abroad; and also of some further provision regulating or giving legal effect to marriages of American citizens contracted in foreign countries. The correspondence submitted herewith shows a few of the constantly-occurring questions on these points presented to the consideration of the Government. There are few subjects to engage the attention of Congress on which more delicate relations or more important interests are dependent.

In the month of July last the building erected for the Department of State was taken possession of and occupied by that Department. I am happy to announce that the archives and valuable papers of the Government in the custody of that Department are now safely deposited and properly cared for.

The report of the Secretary of the Treasury shows the receipts from customs for the fiscal year ending June 30, 1874, to have been \$183,103,838.69, and for the fiscal year ending June 30, 1875, to have been \$157,167,722.85, a decrease for the last fiscal year of \$25,936,115.84. Receipts from internal revenue for the year ending the 30th of June, 1874, were \$102,409,784.90, and for the year ending June 30, 1875, \$110,007,498.55; increase, \$7,597,708.65.

The report also shows a complete history of the workings of the Department for the last year, and contains recommendations for reforms and for legislation which I concur in, but cannot comment on so

iana, 589, \$52,724,107; Texas, 1,650, \$64,565,842; Kentucky, 1,326, \$52,481,535; Tennessee, 1,630, \$24,144,283; Arkansas, 700, \$15,320,000; California (including Central Pacific), 1,328, \$159,332,700; Oregon, 250, \$. . . ; Nevada, 650, \$. . . ; Washington Territory, 110, \$. . .

The total number of miles of railroad in the New England States, taken together, was 5,509; the number of inhabitants to the mile, 671; square miles to the mile of railroad, 12.4; the aggregate capital stock, \$187,125,915; total debt, \$111,218,811; total capital, \$248,344,726; cost of railroad per mile, \$42,862. In the Middle States there were 14,291 miles of railroad, 14,291 inhabitants and 9.6 miles of area to each mile; the stock was \$657,934,601, debt \$660,464,491, total capital \$1,318,399,092; the cost per mile was \$47,356. The Western States had miles of railroad 84,882, costing per mile \$54,329, one mile to each 445 inhabitants and each 29.8 areal mile, with stock of \$899,030,222, and \$1,073,147,622 debt; total, \$1,972,177,844. The miles of road in the Southern States was 15,602, the inhabitants and square miles per mile of railroad 735 and 50.6, the stock \$213,794,148, the debt \$309,715,075; total, \$523,509,223; cost per mile, \$38,764. In the Pacific States the miles of railroad were 2,339, inhabitants per mile 388, square miles 196.0, capital stock \$63,112,600, debt \$76,220,106, total capital account \$159,332,709, cost per mile \$89,981. The total mileage for the country has decreased in proportion to the number of inhabitants in the following ratio: in 1874 there was one mile of railway to each 581 inhabitants, in 1873 one to each 582, and in 1872 one for each 600.

The mileage of roads new-built for the year 1875, calculated from the beginning of the year, has been 1,483 miles. The largest proportion was built in New York State, 200 miles, 51 miles having been laid by the New York & Canada, and 42 miles on the Lake Ontario Shore Line. California has opened 174 miles of new road, of which 90 miles is on the line of the Southern Pacific. Illinois has 172 miles, 50 miles of it on the Paris & Danville. In Colorado 113½ miles of new road were built—by the Puebla & Arkansas Valley 90 miles, and the rest by the Kansas Pacific. In Pennsylvania 118 miles of new road, a good part of which was on the new through-line, to be opened in the spring of 1876, from New York to Philadelphia *via* Bound Brook by the New Jersey Central.

The business done by American railroads during the last year, though it has been by no means a prosperous year, has been greater than it was in 1874. The greatest deficiency has been in the transport of mine-products, lumber, and manufactures. The ravages of the grasshoppers in the West destroyed the traffic of the roads passing through the tracts laid waste by these insects. The carriage of grains and meats has, on the whole, not been deficient.

The earnings have fallen below those of former years, but this has resulted from a greater competition, and not from a decline in the tonnage. For the entire country the aggregate receipts were \$520,466,016; from passengers \$140,999,081, from freight \$347,016,874. The aggregate operating expenses of railroads were \$380,895,858; the aggregate net earnings, \$189,570,958; total amount of dividends paid, \$67,042,942. To compare these figures with the year 1873-'74, the gross earnings were for that year, \$526,419,935; the net earnings, \$183,810,562; and the dividends declared, \$67,120,709. The proportion of freight and passenger receipts was: freight, \$389,035,506; from passengers, \$137,884,427.

The earnings of the roads for 1874-'75 were 1.11 per cent. less than those of the year before, which were 10 per cent. greater than those of the preceding year, which in turn exceeded those of 1871 by a still greater ratio; and last year was the only time in fifteen years when the gross earnings fell below those of the preceding year, during which period the annual percentage of increase exceeded 10 per cent. Although the total receipts were less (\$520,466,016 against \$526,419,935 in 1873-'74) than the preceding year, the net earnings were somewhat greater (\$189,570,958 against \$183,810,562).

If the earnings have fallen off, the tons carried have, if any thing, increased upon those of last year.

The receipts from passengers, receipts from freight, and total receipts, for the railroads of the main divisions of the country, were respectively: for the New England States, \$22,111,787, \$25,075,777, \$50,064,774; Middle States, \$41,699,871, \$134,658,938, \$186,498,438; Western States, \$56,783,466, \$142,090,912, \$214,869,477; Southern States, \$14,131,291, \$44,782,286, \$52,259,241; Pacific States, \$6,272,666, \$10,478,961, \$16,774,086. The working expenses, net earnings, and dividends paid by the railroads in the same groups, were: For the Eastern States, \$33,351,591, \$16,713,183, and \$8,511,971; Middle States, \$116,309,466, \$70,188,972, and \$37,600,154; Western States, \$139,322,782, \$75,546,695, and \$16,605,832; Southern States, \$34,989,909, \$17,269,332, and \$1,068,455; Pacific States, \$6,921,310, \$9,852,776, and \$3,256,130.

For the whole country the aggregate mileage of the railroads is 72,623 miles, one mile to every 581 inhabitants and to every 34.4 square miles of territory. The total capital stock of all the railroads of the country is, as computed by Poor for the year 1874-'75, \$1,990,997,468; the total debt, funded and not funded, \$3,230,766,108; making a total capital of \$4,221,763,594. The average cost per mile of American railroads is \$60,425.

A comparison of the capital, earnings, and expenses of American and foreign railroads gives the following results: the capital invested per mile in American roads is \$54,394; in

British roads, \$180,440; in German and Austrian, \$95,422. The passenger receipts, freight receipts, and gross earnings, are respectively: American, \$1,809, \$4,869, and \$6,678; British, \$7,365, \$9,469, and \$17,531; German, \$3,278, \$7,520, and \$11,360. The working expenses are: for American roads \$4,246 per mile, for British, \$9,649, for German, \$6,572. The net earnings are for the three countries respectively, \$2,432, \$7,882, and \$4,788.

The statistics of accidents show very unfavorably for the year. The total number of accidents was 1,201, against 980 in 1874, and 1,283 in 1873, a bad year: the number of killed was in 1875, 234, of injured 1,107; in 1874, killed 204, injured 778; in 1873, killed 276, injured 1,172. The accidents classed according to their nature show: of collisions, in 1875, 278; in 1874, 260; in 1873, 392; of derailments in 1875, 840; in 1874, 654; in 1873, 815.

In connection with the question of cheap transportation according to carefully-compiled statistical accounts of the history of freight charges given in the *Railroad Gazette*, there has been a growing tendency to lower rates; and rates which have been brought down by sharp competition and in the contests between rival companies, as in the fierce railroad war waged during 1875, show an inclination to keep at a low mark for longer and longer periods. The prices of transportation have declined more since the war, it is asserted, than any other article of exchange. The average rates of freight between New York and Chicago were: per 100 pounds, eastward, in 1866, first class, \$1.83½; second class, \$1.61½; third class, \$1.10½; fourth class, \$0.77; in 1872, first class, \$1.60; second class, \$1.25; third class, \$0.85; fourth class, \$0.58½. A comparison between rates for the same period of the years 1872 and 1875 gives: 1872, first class, \$1.60; second class, \$1.15; third class, \$0.85; fourth class, \$0.50; 1875, first class, \$1.50; second class, \$1.10; third class, \$0.85; fourth class, \$0.30.

The St. Louis Railroad Convention, representing municipalities and commercial boards through the Middle as well as the Southern States, was very earnest in its call upon the Government to aid in building the Texas Pacific Railroad. The convention met in St. Louis, November 23d and 24th. General Anderson, of Richmond, was chosen temporary chairman, and the following officers were elected: President, Judge Stanley Matthews, of Cincinnati; Vice-President, General W. M. Preston, of Kentucky; Secretary, John M. Howell, of Arkansas. The resolutions adopted, extracts from which are presented below, exhibit very explicitly the attitude of these capitalists toward the question of governmental aid to railroad enterprises. They allege the large subventions which have been granted by the Government to other enterprises as apologetical of their own demands, and say:

This convention of delegates, duly appointed from thirty-one States and Territories, many cities and boards of trade, merchants' exchanges, and other commercial bodies, constituting a body of 869 delegates, representing not only a large proportion of the people of the United States, but of the active producing business of the capital of the country, and now assembled to take action upon the construction of a Southern line of railroad to the Pacific, do respectfully represent to the Senate and House of Representatives of the United States, in Congress assembled, that a Southern transcontinental railway from the waters of the Mississippi, *via* El Paso, to the Pacific Ocean on or near the thirty-second parallel of latitude is imperatively demanded:

1. As a measure of sound statesmanship, because it is only by constant intercourse, business and social, that the great States now growing up on the Pacific slope can be permanently bound in a common interest with our Eastern and Southern communities, and it is, therefore, sound policy and a wise foresight to promote the most intimate relations between all the sections of our common country, a necessity already recognized by the Government in its grant of bonds and lands to the Union Central and Kansas Pacific roads, and of lands to other transcontinental lines on the thirty-second, thirty-fifth, and forty-seventh parallels, under the belief that private capital would furnish the needful funds to complete these highways.

2. As a means of national defense, because it is the duty of the Government to have a line to the Pacific unobstructed at all seasons of the year for the prompt transportation of troops and supplies, should trouble arise with any foreign country, and the ports and countries of the Pacific coast be exposed to insult or attack.

4. As a measure of practical economy, because, as already shown by the experience of the Pacific road, the expenses of maintaining a military establishment for the protection of the Southern territory against Indian depredations will be largely reduced.

5. As a commercial necessity to the twelve million of people inhabiting a belt of country from 400 to 700 miles in width and stretching along the entire South Atlantic coast, the Gulf of Mexico, and old Mexico to the Pacific Ocean.

6. As a direct saving to the people of the entire country, because it will give a competing line between the two oceans both for the large local and through traffic of this country, and for the great through traffic with the Sandwich Islands, India, China, Japan, Australia, and Western South America, thereby conferring substantial benefits upon the entire nation, and because in this manner the people of this United States will best be protected against a monopoly, to whom they have loaned \$55,000,000 of six per cent. Government bonds, and made large grants of lands to build the present Pacific line, and for whose benefit the Government is now paying yearly upward of three additional millions out of the Treasury, a corporation that has established arbitrary rates for transportation, and is now seeking to perpetuate itself as a close corporation and control the lines, and such as it may hereafter build, in its own exclusive interest, instead of making them an open highway, such as the people of this country have a right to demand.

7. Because the communication thus established with such rich and productive States of old Mexico would secure a large and lucrative traffic now diverted to other countries, and would thereby increase the revenue of the Government.

8. As a prudential and proper act to encourage the people of the South, who may very justly and with great force urge that, while \$175,000,000 of the public moneys have been appropriated in the Northern States and Territories since the organization of the Government, there have been but \$19,000,000 expended on the Southern States and Territories.

Whereas, To secure to the Government and people these several advantages, and, in addition thereto, secure the return to the people of 80,000,000 of acres of land, heretofore granted to build the thirtieth parallel line, and save the building of 1,500 miles of road, it is, in the judgment of this convention, not only the right, but the duty of the national Government to render such aid, properly secured, restricted, and guarded, as will secure the prompt completion of the line referred to, and such extensions as will give to all sections the advantages resulting therefrom, now be it resolved:

1. That a Southern line to the Pacific Ocean should be built on or near the thirty-second parallel from Shreveport, *via* El Paso, to San Diego, where it will make connections with the waters of the Pacific in a safe and excellent harbor, and connect also with the railway lines now building from San Francisco to the southern part of California, thus securing a continuous line to that great city and port.

2. That there should also be constructed extensions from the most eligible points of the Texas Pacific road to New Orleans, Memphis, and Vicksburg, and from a point near the hundred and third meridian to Vinita, in order to reach the Mississippi River, to connect with every road and harbor of the Atlantic coast, and with the harbors of the Atlantic coast, and with every railway east of the Rocky Mountain slope.

8. That the construction of such a line and branches can be best secured by the extension of Government aid to the line and branches heretofore mentioned in these resolutions, in the form of a guarantee of the interest, not the principal, on a limited amount of five per cent. construction bonds, payable in fifty years, so that the entire liability assumed should not in any event exceed \$2,000 per mile per annum, nor the interest on the actual cost of the line and said branches.

The fact that the sentiment in favor of legislative control of the transportation of the country, together with the desire that the central Government should assume the business of goods-transportation itself, for the relief of producers and their supposed protection against the capricious and extortionate charges of the private companies; the fact that this feeling, which has so long been rife preëminently among the grain-producing communities of the West, is now still upon the increase, is shown in the action of the convention of the National Association of Transportation and Commerce, which met at Chicago on the 17th of December, 1875. There were about two hundred delegates present from all parts of the country: Mr. Josiah Quincy not being present, Vice-President John F. Henry, of New York, presided. The officers elected were: President, John F. Henry, with one vice-president from each State; Secretary, Frank Gilbert, of Chicago; Assistant Secretary, Henry Stotenwalks, Florida; Treasurer, F. B. Thurbur, New York. In his opening address, Mr. Henry declared that the day was not distant, if it had not already arrived, when the statesman will find it his duty to inquire

"whether there is less danger in leaving the property and industrial interests of the people thus wholly at the mercy of a few men who recognize no responsibility but to their stockholders, and no principle of action but personal and corporate aggrandizement, than in adding somewhat to the power and patronage of a Government directly responsible to the people, and entirely under their control."

In corroboration of this he quoted the following proposition from the report of the committee on transportation routes of the United States Senate:

"In the matter of taxation there are to-day four men, representing the four great trunk-lines between Chicago and New York, who possess, and not unfrequently exercise, power which the Congress or the United States would not venture to exert."

The report of the secretary of the Association stated the objects of the convention as follows:

The question for this convention, for our people, and Government to consider, is, whether the power to levy enormous tributes, to disarrange all industrial and commercial transactions, as the four or five men who manage present trunk-lines now are capable of doing, and have actually done since July, whether this exercise of arbitrary power is not prejudicial to all interests, and of such a nature as should command the exercise of our best legislative ability in seeking the control and, to a large extent, the supervision of our transportation routes. In cities like Chicago, Boston, New York, and all others where large transportation routes centre, the formation of boards of transportation and commerce, like the New York association, before which can be brought all differences and grievances between transportation companies and the merchants and the people, will be found highly beneficial.

A paper, presented by Richard P. Morgan, of Illinois, points out, as the means of reaching reasonable rates of transportation, a reduction of the fictitious valuations put upon the property of railroads and the improvements in construction, which may be awaited, the more thorough utilization of water-courses, etc. He expressed the opinion that the cost of transportation in the Erie Canal might be reduced to eight mills per ton for general freightage, and five mills per ton for through expedited and agricultural products. The New York Central & Hudson River Railroad, he asserted, might reduce their charges to less than five mills per ton, instead of the ten mills which they demand, and then derive a fair revenue from the original capital stock. Among the improvements in transportation routes brought to the notice of the convention were the prospective low freightage to result from the improved navigation of the Mississippi, the deepening of the St. Lawrence, the enlargement of the Welland Canal, and the construction of the Caughnawaga Canal; the free use of Canadian canals was also suggested as a beneficial project. Among the abuses in the construction and management of railroads set forth, were the projecting of roads not needed, by irresponsible men, which are built upon construction bonds secured by mortgage; the buying in and manipulation of such bankrupt roads by operators. Another serious abuse is the buying up of a controlling interest in a profitable road by men of wealth, who elect their own board of directors, and so manage the road as to knock down the stock to zero. Then they discovered that the road was immensely valuable, and that its capital stock bore no proportion to the actual expenditures

pon it, and they issued new stock without equivalent, and gradually advanced rates until eight or ten per cent. was paid annually on the whole mass of obligations so created. In the New York Central & Hudson River, these dividends in 1885 would amount to \$118,000,000.

A memorial from Western grain-producers, presented by H. N. T. Lewis, declared the principal hardships which the producers suffer, as follows:

The extortionate freight charges of railroad and transportation companies between the grain-growing countries of the West and the seaboard; a gross disregard of their liabilities as common carriers; the effect of watered stocks and inflated construction accounts on the cost of transportation; exorbitant intermediate and terminal charges; inadequate railway and transfer facilities; insufficient safeguards against financial panics; the absence of facilities for selling and delivering grain in transit; the failure of railroad and transportation companies to issue shipping-bills and bills of lading that shall be adequate security to the shipper or the bank advancing thereon; the constant and wide range in fluctuation of freight-rates between the West and the seaboard; the necessity of a uniform system of inspecting and grading grain; the unjust discrimination in freight-rates made at various points of shipment. The remedy for all these evils was expressed in one word—combination. The initial steps had already been taken.

The result of the convention was the appointment of a committee of seven to present their resolutions to Congress, and the recommendation to Congress of the appointment of a committee of both Houses to consider the creation of a Department of Commerce. The following provisions were recommended for enactment by the various Legislatures:

1. A law providing a board of railway commissioners, with power to prescribe a uniform system of keeping railroad accounts, and with powers similar to those possessed by the Railroad Commissioners of Massachusetts.
2. A law to prevent stock inflation, similar to that in Massachusetts.
3. A law prohibiting officers or directors of railways from either directly or indirectly owning any non-coöperative fast-freight line, car company, or bridge company, or from being interested in any manner in the furnishing of supplies to any company with which they may have official connection.
4. A law prohibiting railway companies from acquiring or holding more real estate than is necessary for the operation of their lines, and prohibiting railway companies from engaging in mining or any business other than transportation.
5. A law providing that all common carriers shall receipt for quantity, and deliver the same at destination.
6. A law making it a penal offense for any public official to accept or use the free pass of any railway company, and prohibiting railways from granting such passes to any but regular employés of such railways.
7. A law prohibiting representatives of the people, who belong to the legal profession, from being retained on either side, in cases where the public interest is involved.

RAMBERG, ARTHUR, Freiherr von, a German artist, born in Vienna September 4, 1809; died February 6, 1875. He studied in Vienna and went to Munich in 1850. Among his best

paintings are "The Bouquet" (1856), "The Walk with the Tutor" (1857), and "After the Masquerade" (1858). In 1860 he was appointed professor of the Art School in Weimar, where he executed one of his finest paintings, representing the court of Frederick II. of Hohenstaufen at Palermo. Together with Pecht he published a series of illustrations to the works of Schiller and Goethe, known as "The Schiller and Goethe Galleries," which are considered the finest works of this kind produced in modern times. In 1865 he returned to Munich as professor at the Academy of Arts, which position he retained up to his death.

RANDOLPH, Colonel THOMAS JEFFERSON, grandson of Thomas Jefferson; died October 7, 1875, near Charlottesville, Va. He was the son of Governor Thomas Randolph, and Martha, daughter of Thomas Jefferson, and was born September 11, 1792. His boyhood and youth were spent at Monticello, the home of his grandfather, who superintended his education, and regarded him with the greatest affection. He married a daughter of Governor Nichols, by whom he had several children. In 1829 he published in four volumes the "Life and Correspondence of Thomas Jefferson." He was a member of the Virginia House of Delegates at intervals between 1832 and 1838, and distinguished himself by a speech favoring the abolition of slavery. In 1851 he was a member of the Constitutional Convention, and was once afterward in the Legislature. His last appearance in public was at the National Democratic Convention at Baltimore in 1872, when he was made temporary chairman. He was for many years rector of the university, and was always an ardent friend of that institution.

RAUSCHER, JOSEPH OTTMAR, Ritter von, Cardinal and Prince-archbishop of Vienna, born October 6, 1797; died November 24, 1874. He first studied law and then turned his attention to theology. He was for a time Professor of Canon Law and Church History in Salzburg, was appointed director of the Oriental Academy in Vienna in 1832, and was tutor of Francis Joseph, of the late Emperor Maximilian of Mexico, and of Archduke Charles Louis. In 1849 he was appointed Prince-bishop of Seckau, in 1853 Prince-archbishop of Vienna, and in 1855 cardinal. During the early part of the reign of the present emperor he exercised a considerable influence on state affairs, and concluded the Concordat in 1855 with the Holy See. At the Œumenical Council he was one of the most prominent and active among the German prelates in opposing the proclamation of the doctrine of infallibility, but declared his submission after the doctrine had been proclaimed. He was looked up to and revered by his colleagues, and was in every respect at the head of the church in Austria. He wrote a church history of the first three centuries (2 vols., 1829), and "Observationes quedam de infallibilitatis ecclesiæ subjecto" (1870).

READ, JOHN MEREDITH, LL. D., an eminent jurist of Pennsylvania, born in Philadelphia, July 21, 1797; died in that city, November 29, 1874. He was a grandson of George Read, one of the signers of the Declaration of Independence. He graduated from the University of Pennsylvania in 1812, and was called to the bar in 1818. He was elected to the State Legislature from Philadelphia in 1823, and reelected in 1824. He subsequently became City Solicitor, Attorney-General of the State, and United States District Attorney. In 1845 he was nominated for Judge of the Supreme Court of the United States by President Tyler, but was not confirmed, because of his unsoundness on the slavery question. In 1860 he was elected on the Republican ticket one of the Judges of the Supreme Court, and subsequently became chief justice. Mr. Read resigned the latter position in December, 1873, and since that time has lived in retirement in Philadelphia. In politics he was a Democrat; but, being in sympathy with the Free-Soilers, he gradually became separated from the main body of the party. In 1856 he joined the Republicans, and acted henceforth with them. He was engaged in many important cases, and was author of numerous essays and addresses on public affairs from 1838 to 1867. He had an extensive knowledge of law, and was undeniably a great jurist.

READE, WILLIAM WINWOOD, a British explorer and author, born in 1838; died April 2, 1875. He first turned his attention to romance, but with little success. A result of his archaeological studies was "The Veil of Iris." But his reputation as an author was principally gained by his works on Africa. The theories of Du Chaillu on the strength and the aggressive character of the gorilla aroused his spirit of adventure, and, mortgaging a prospective legacy in order to obtain means, he went to Africa, to hunt gorillas. A result of this expedition was "Savage Africa" (1863), a book alike peculiar by its style and its contents. Notwithstanding his failing health, he undertook a second expedition a few years later, and upon his return published two works, "The Martyrdom of Man" and "African Sketch-book" (2 vols., 1873), which were very warmly received by Darwin and others. In November, 1873, he went to Africa for a third time, this time as special correspondent of the London *Times* in the Ashantee War. He returned from this expedition completely broken down in health, and never recovered.

REFORMED CHURCHES. I. REFORMED CHURCH IN AMERICA. The Reformed Church in America, formerly called the Reformed Dutch Church, had, in 1875, 84 classes, 490 churches, 523 ministers, and 70,628 members. One of the classes, Arcot, contains the missionary churches in India; all the others are in the United States. The following is a summary of the statistics of the several classes, as they were reported to the General Synod in May, 1875:

CLASSES.	Churches.	Ministers.	Members in Communion.
Albany.....	17	16	2,085
Arcot.....	16	7	730
Bergen.....	14	18	1,910
Bergen, South.....	12	18	1,594
Cayuga.....	12	11	1,215
Grand River.....	11	10	1,909
Geneva.....	19	16	2,190
Greene.....	10	11	1,430
Holland.....	16	14	2,119
Hudson.....	10	13	1,000
Illinois.....	22	22	2,061
Kingston.....	13	11	2,000
Long Island, North.....	19	21	2,000
Long Island, South.....	16	30	2,000
Michigan.....	9	8	873
Monmouth.....	9	12	1,140
Montgomery.....	23	18	1,000
Newark.....	12	15	2,000
New Brunswick.....	10	19	2,221
New York.....	19	29	4,000
New York, South.....	6	11	1,253
Orange.....	25	23	2,570
Paramus.....	19	18	2,370
Passaic.....	12	16	1,007

Schoharie.....	12	10	804
Ulster.....	18	16	2,007
Westchester.....	14	16	1,200
Wisconsin.....	20	17	1,001
Total.....	490	523	70,628

The total number of candidates for the ministry reported was 11; number of families connected with the Church, 42,277; number of baptisms (of infants, 4,290; of adults, 994, 5,214; number of catechumens, 22,176; number of Sunday-schools, 594, with 68,041 scholars. Total amount of contributions: For religious and benevolent purposes, \$262,505; for congregational purposes, \$944,116.

The Board of Directors reported that they had received \$7,500 toward the endowment of the permanent seminary fund, and \$5,715 toward the endowment of the Thomas DeWitt professorship; \$10,000, the legacy of the late Jacob H. Ten Eyck, for the Theological Seminary, had been appropriated for the use of the Hertzog Hall Committee. Mr. Gardner A. Sage had given \$20,000, in addition to the \$50,000 given by him the previous year, toward the erection of a fire-proof building at New Brunswick, N. J., to be known as "The Gardner A. Sage Library." This building, having been completed, was dedicated during the meeting of the General Synod. The Board reported that the widows' and orphans' fund amounted to \$38,631, and that annuities had been paid from it, during the year, amounting to \$2,325.77. The fund for the endowment of Hope College now amounted to \$19,319.83. The aggregate value of all the funds in charge of the board was \$431,857.05. The receipts of the Treasurer had been, including the balance from the previous year, \$120,287.22.

The Board of Domestic Missions reported their receipts for the year to have been \$21,732.90 from contributions, and \$22,400.83 from legacies, and their expenditures \$35,133.

The Board of Foreign Missions reported their receipts for the year had been \$54,249.95.

The following is a tabular view of the statistics of the mission stations:

STATISTICS.	China.	India.	Japan.	Total.
Stations	1	8	2	11
Out-stations	14	44	1	59
Missionaries	8	7	5	15

The General Synod of the Reformed Church in America met at Jersey City, N. J., June 2d. The Rev. Charles Scott, of Holland, Mich., was chosen president. A letter was read which had been received from the Synodical Committee of the Christian Reformed Church in the Netherlands, inviting the Church to be represented in its Synod, which was held May 20th, at Bois-le-Duc, North Brabant, and asking the advice of the Church respecting the oath against simony, which is required by the Church of the Netherlands from its candidates in theology. The previous synodical meeting had resolved to maintain this oath, but, on account of the differences of opinion which prevailed in the Church, had decided to ask the foreign sister churches whether such an oath was customary with them, and if not, why it had been abolished.

The committee who had been appointed to confer with similar committees of the Reformed Church in the United States, and the Northern and Southern branches of the Presbyterian Churches, in reference to closer relations and coöperation in benevolent work, reported the result of their conference. No agreement had been reached with the Reformed Church in the United States, and the report on this branch of the subject consisted largely of a recital of the difficulties which were found to lie in the way of union with that denomination. The action of the committee on this point was approved. The report further presented the plan of coöperation which had been agreed upon with the committee of the Southern Presbyterian Church. The Synod adopted it unanimously. Nothing had been accomplished respecting the relations with the Northern Presbyterian Church, owing to the failure to secure a conference with a quorum on both sides. A meeting had been appointed for March 25, 1875. The committee were ready with a plan of coöperation similar to that adopted with the Southern Church,

but not identical with it. They were ready to proceed to conference, but only three members of the Presbyterian committee were present, and they were unwilling to act without their colleagues. The Presbyterian General Assembly having resolved to continue the conference on the basis of coöperation, the Synod also resolved to continue its Committee of Conference for another year.

The committee who had been appointed to consider the subject of a General Council of all Presbyterian Churches holding to the Reformed faith, made a report of the results of their conferences with the other committees appointed on the subject, and of the programme for the conference which was called to meet in London on the 21st of July. The Synod, determined to be represented in the Council, appointed the Rev. Drs. E. P. Rogers, Philip Peltz, and Thomas E. Vermilye, and Elders G. G. Smith, John A. Lott, and J. B. Jewitt, as delegates, and authorized the chairman of the committee to appoint other delegates, ministers or elders.

The Synod resolved to participate in the celebration of the centennial of American independence by setting apart the first Sunday in July, 1876, as a day of thanksgiving and praise for national mercies, on which occasion the pastors of churches are expected to preach upon the religious aspects of American liberty as illustrated in the history of the denomination; by raising a thank-offering, to constitute the "Centennial Seminary Fund," the interest of which should be applied to the payment of the contingent expenses of the theological schools; and by the preparation, under the direction of a committee appointed for the purpose, of a series of discourses on the following and other appropriate topics:

"The Points of Similarity between the Struggle for Independence here and that of our Holland Ancestors;" "The Character and Development of our Church in the Colonial Period;" "The Posture of its Ministers and Elders during the Revolution;" "The Resemblance of its Polity to that of our own Country;" "Its Type of Doctrine as represented by the Symbols of Heidelberg and Dordrecht;" "Its Peculiar History in Relation to Theological Education;" "Its Hereditary Interest in all Forms of Popular Education;" "Its Liturgical Features and Spirit;" "Its Missionary Work at Home and Abroad;" "Its Influence in preserving Soundness of Doctrine;" "Its Immovable Attachment to its own Heirlooms of Faith and Order, combined with the most Catholic Spirit toward all other Christians;" "Its Duty in the Coming Century as fore-shown by its Course in the Last Hundred Years."

The discourses are intended to be delivered, and repeated as often as convenient, in various parts of the Church.

The following resolutions were passed on the subject of the Sabbath:

In view of the prevailing and increasing desecration of the holy Sabbath, in open violation of civil and moral laws, by railroad and steamboat companies, by beer-saloons, excursion-parties, Sunday papers:

Resolved, That as a Synod we sincerely deplore

this sad state of facts, and heartily approve the efforts being made by various Sabbath associations to promote a better observance of the Christian Sabbath.

Resolved, That all the pastors within the bounds of the Synod be requested to preach a sermon on the proper observance of the Sabbath, on the last Sabbath of October, 1876.

Total abstinence from the use of ardent spirits, the formation of temperance societies by churches, ministers, and individual Christians, and prayer for the suppression of intemperance, were recommended. The sympathy of the Synod was expressed with the work of the Free Italian Church, and the Board of Foreign Missions were requested to receive and forward such moneys as might be offered for the support of the evangelists of that Church. The Rev. H. D. Ganse was chosen lecturer on the Vedder foundation for 1877. The Rev. Dr. T. W. Chambers had been chosen by the previous General Synod for 1876.

II. REFORMED CHURCH IN THE UNITED STATES.—The following is a summary of the statistics of this Church, as they are given in the *Almanac for the Reformed Church in the United States* (Philadelphia) for 1876:

SYNODS.	Churches.	Ministers.	Congregations.	Members.	Members unconfirmed.
United States.....	8	175	424	63,116	35,231
Ohio.....	18	143	341	23,345	11,976
Northwest.....	8	105	176	14,070	11,257
Pittsburg.....	5	60	122	9,864	8,943
Potomac.....	6	108	247	26,108	16,046
Eastern German.....	4	29	81	6,615	4,223
Total, six synods.	44	623	1,341	142,118	87,676

Total number of baptisms, 18,607; of confirmations, 8,766; of persons who communed during the year, 116,363; of Sunday-schools, 1,148; of scholars in the same, 72,205; of students for the ministry, 107. Total amount of benevolent contributions, \$89,067.14.

The *Almanac* gives a list of twelve English and four German periodicals of the Reformed Church in the United States. Of these, three are weekly, two are published every other week, two are semi-monthly, eight are monthly, and one is quarterly. The number of literary and theological institutions, as given in the *Almanac*, is seventeen.

The General Synod of the Reformed Church in the United States met at Fort Wayne, Ind., May 14th. The Rev. W. K. Zieber, D. D., of York, Pa., was chosen president. The committee appointed by the previous General Synod to confer with a committee of the General Synod of the Reformed Church of America, in reference to a union of the two Churches, reported the proceedings of a joint meeting of the two committees, which was held in December, 1874. It had not been found possible to suggest a plan of union which would be satisfactory to both Churches.

The Rev. John A. Baum was received, and

addressed the Synod as a corresponding delegate from the Reformed Church in America.

A communication was received from the General Assembly of the Presbyterian Church in the United States of America, asking the Synod to appoint a committee to consult with similar committees of other denominations in regard to holding a General Council of all Presbyterian Churches. In reply, the following resolutions were adopted:

Resolved, That this General Synod contemplates with much satisfaction the various movements, looking to a closer union of Reformed Churches related to one another by the inner ties of affinity in doctrine and government, and finds special reason for cordial interest in the proposed Council of Presbyterian Churches, as being a movement tending to bind together still more closely those Churches which hold the Westminster standards of faith.

Resolved, That inasmuch as the Reformed Church in the United States, represented by this General Synod, recognizes no Confession as possessing binding authority but the Heidelberg Catechism, while the Ecumenical Council proposed by the General Assembly of the Presbyterian Church, in the paper laid before us, respects only those Reformed Churches holding by the Westminster standards, it is not, in our judgment, relevant to the character and object of this movement of the Presbyterian Church that this General Synod appoint delegates to represent the Reformed Church in the United States in the proposed Ecumenical Council.

Resolved, That it accords with the views and desires of this body to have proper arrangements made for a convention of Reformed Churches, on a broader basis, that is to say, a Council of Churches, holding in common the recognized symbols of the Reformed branch of the Evangelical Protestant Church, and that we will coöperate with any suitable measures which may be proposed to effect such a convention.

Provision was made by which a pastoral charge where the German language is prevailingly used in worship, though located within the bounds of an English classis, may be connected with the nearest German classis, and the corresponding privilege may be exercised by an English charge situated within the bounds of a German classis. The judgment of the Synod was expressed that whenever a report for the transfer of a charge from one classis to another, under the circumstances indicated, is presented in a regular manner, the classis to which the report is made should not refuse to grant it, unless there be grave and sufficient reasons for so doing; also that such reports ought to be made with as great a unanimity as possible, and should never be made unless a majority of the legally-qualified voting members of the charge are in favor of it.

The Synod resolved, "That, according to the clear provision of the constitution of the Church, all public theological teaching within the bounds of any particular Synod is placed exclusively under the direct control of that district Synod." It was, however, expressly provided that nothing in this resolution should be regarded as reversing or affirming the action of the General Synod of 1872, in reference to the so-called "super appeal case." In this case, the conduct of Dr. Bemberger, and the persons associated with him at Ursinus Col-

lege, in giving theological instruction, at the request of the Board of Directors of the institution, was pronounced not disorderly or contrary to the constitution of the Church, although they had not received authority from their Synod. The Synod resolved:

1. That the marriage bond, whether entered into under the administration of the state or the Church, is indissoluble except by natural death.

2. That, while regarding the divorces granted by the state as valid so far as temporalities are concerned, we do hereby direct the various pastors and judicatories of the Reformed Church in the United States to give no validity in their spiritual discipline to any divorce except such as has been granted on the ground of adultery by one or both parties in the marriage.

III. REFORMED CHURCH OF FRANCE.—The Synod of the Reformed Church of France, at its meetings in 1872 and 1873, formulated a confession of faith which gave expression to the Orthodox doctrines concerning the divinity of the Lord Jesus Christ, the inspiration of the Holy Scriptures, and other doctrines considered essential. It also ordered that all new ministers should be required to subscribe to this declaration, and imposed adherence to it as a qualification of voters at the consistorial and presbyterial elections. The Unitarian or Liberal party in the Church, which was very strong, opposed these acts. It protested against the new rules, and refused to obey them, while it asked the Orthodox party and the Government to consent to an equitable division of the Church, of its fund and privileges, and to the acknowledgment of the equal rights of both branches to vested endowments and support by the state. In those consistories and presbyteries which were controlled by the Liberals, the rules imposed by the Synod concerning the qualifications of voters were disregarded in the elections. This fact having been reported to M. de Cumont, Minister of Instruction and Worship in 1874, he declared the elections held under these circumstances null, and ordered new elections to be held in April, 1875, in the jurisdictions in which the orders of the Synod had been disregarded. The Liberal officaries of the consistories and presbyteries affected by M. de Cumont's order refused to take any steps toward holding the new elections. Their programme, as announced by M. de Vigié, was, neither to proceed to the new elections, nor appeal to the Council of State, but to organize compactly, as well where they were in the minority as where they were in the majority, then claim their rights, and demand an equitable division of property and privileges. By this attitude, the burden of organizing for the new elections in the Liberal parishes was thrown upon the unofficial Orthodox minorities. Elections so held, although they were not regular, inasmuch as they were held in the face of the regular consistorial authorities, were conformed to the policy of the minister, and were sustained by his declaration giving them validity.

When the administration of the Department of Instruction and Worship was changed, a deputation of Liberals took an early opportunity to call on the new minister, M. Wallon. The minister assured his visitors that no projects to despoil the Liberals of their equal share, in case of a division of the Church, would be sustained; but he also insisted that he could promise them no relief against the nullification of their elections, and they could gain relief only by an appeal to the Council of State. The Liberal party had previously decided not to make such an appeal; but this declaration of the minister caused them to reconsider their determination. Accordingly, an appeal was made in the case of the election at Bédarieux, which had been annulled. In consequence of this new proceeding, it became necessary to adjourn the elections, which had been ordered to be held in April, till such time as the decision of the Council of State should have been announced. Early in April, the minister addressed a letter to the presidents of the presbyterial councils, notifying them of the adjournment.

The decision of the ministry annulling the elections held in the Liberal consistories brought great embarrassments upon their churches. They were left without legal organization, and without pastors whose acts could be recognized as valid, and were likely to continue in this condition for an indefinite period, or until a decision should be reached on the cases which had been carried by appeal to the Council of State. A deputation waited upon the Minister of Worship, M. Wallon, August 10th, in behalf of the churches thus situated, and asked him to confirm the nominations which had been actually made. M. Wallon regarded himself as not able to do this, because these elections of pastors had been clearly declared invalid by his predecessor, and new elections had been ordered which were only delayed pending the hearing of the appeal. He, however, decided that he might confirm the nominations provisionally while the appeal was being heard. On the 18th of August the minister issued a circular announcing that he would make such provisional confirmation in the case of each parish which would make upon him a formal official demand for it.

In making this adjustment, as the minister declared afterward, in his circular of the 14th of October, he had intended, while affording temporary relief to the embarrassed Liberal jurisdictions, to guard carefully the integrity of the decisions of his predecessor, which declared their proceedings in reference to the elections to have been irregular, and the elections to be invalid. His meaning, however, was misapprehended in some of the consistories, and his action was used to give color to proceedings which he would not approve. Accordingly, he issued another circular on the 14th of October, to correct the misinterpreta-

tions which had been given to the circular of the 18th of August, and to announce the adoption of a new method of adjusting the temporary difficulties, the meaning of which should not be mistaken. Inferences had been drawn from the propositions in his former circular, that the minister had changed his attitude, had ceased to maintain the decisions first announced, and that the consistories irregularly constituted had received, through the measures announced in the circular, an indirect but official recognition of their administrative capacity, which had been before denied them. In the face of such interpretations of his position he was obliged to pause. He would not, therefore, propose to the President of the Republic to confirm provisionally the nominations spoken of in his dispatch of the 18th of August. There was one question, however, on which his resolution had not been changed, viz., the wish to apply a remedy to the painful situation of the vacant parishes. He was not willing to leave the different acts of public worship in these parishes to be performed vicariously, or to suffer for lack of the coöperation of the state. Consequently, since he had been obliged to abandon the measure on which he had first determined, he had resolved to have recourse to another plan, which should have the advantages of that one, without being subject to the inconveniences which attended it. Until a regular, definite solution of the questions at issue should be reached, he would transmit, to the presidents of the consistories or the presbyterial councils interested, the sums necessary to secure religious services in the vacant parishes, and requite those having charge of them.

IV. THE CHRISTIAN REFORMED CHURCH OF THE NETHERLANDS.—The Christian Reformed Church of the Netherlands consists of a number of congregations who separated themselves in 1834 from the Reformed Dutch Church, chiefly for doctrinal reasons, connected with the spread of rationalistic views in the parent body. It consists of about 350 congregations, with nearly 50,000 communicants. It has a theological academy at Kampen, with four professors, a tutor, and seventy students. It has begun a mission-station at Batavia. The income of the Church for church purposes in 1874 exceeded £70,000. The meetings of the General Assembly are held every three years. That for 1875 was held at Bois-le-Duc, North Brabant, beginning May 26th. Visiting delegates were present from the United Presbytery of London and from the Reformed Church in America.

REFORMED EPISCOPAL CHURCH. "The Reformed Episcopal Church," said Bishop Cummins, writing of the second anniversary of its organization, December 2, 1875, "was organized on the 2d of December, 1873, with eight clergymen and a score of laymen, without a single congregation adhering to it. On the 2d day of December, 1875, it numbers fifty-

two clergymen and fifty congregations throughout the United States and the Dominion of Canada."

The third *General Council* of the Reformed Episcopal Church met at Chicago, Ill., May 12th. Bishop George D. Cummins presided. On the calling of the roll there were found to be present the two bishops (Cummins and Cheney), twenty-eight clergymen, three deacons, not members, but invited to seats, lay delegates from sixteen churches, and five permanent lay delegates (or laymen who took part in the first convention of the Church). The committee appointed at the previous General Council to superintend the publication of the Book of Common Prayer, reported that they had performed the work.

The Standing Committee reported that the following Churches had expressed their desire to be identified with the Reformed Episcopal Church, and, having complied with the conditions presented, had been admitted to the list of Churches: Immanuel Church, of Louisville, Ky.; Christ Church, of Toronto, Canada; Holy Trinity Church, of Jefferson City, Mo.; Victoria Church, of Victoria, British Columbia; Zion Church, of St. John's, New Brunswick; Immanuel Church, of Newark, N. J.; St. John's Church, of Sussex, New Brunswick.

The Treasurer reported that his receipts for the year ending May 10th had been \$16,522.70, and his expenditures \$16,209.34. Committees were appointed: To revise the Hymnal, and report to the next Council; to draw up a paper showing the points of difference between the Protestant Episcopal and Reformed Episcopal Churches; to prepare a translation of such parts of the Prayer-Book as are necessary for the use of the German congregations; Standing Committee on Doctrine and Worship to present to the next Annual Council a course of study and text-books for candidates for the ministry; and a special committee to collate the parochial reports, and present a digest of them to the Council. Provisions were made for the organization of sustentation, superannuation, and widows' and orphans' funds. The system of contribution by weekly offerings was recommended, to be supplemented by such special gifts as may be offered.

The following missionary districts were established:

First District: ST. JOHN'S; comprising New Brunswick, Nova Scotia, and Prince Edward Island.

Second District: OTTAWA; comprising Ontario, Quebec, and Manitoba.

Third District: PACIFIC COAST; comprising British Columbia, and all States and Territories west of the Rocky Mountains.

Fourth District: That of the EAST; comprising the New England States and the States of New York and New Jersey.

Fifth District: The CENTRAL; comprising the States of Pennsylvania and Delaware.

Sixth District: That of the SOUTH; com-

prising the State of Maryland, the District of Columbia, and all States south of the Ohio River and east of the Mississippi River.

Seventh District: That of the West and Northwest; comprising all States north of the Ohio River, west of the Mississippi River, and east of the Rocky Mountains.

The Rev. Edward Oridge, of Victoria, British Columbia, the Rev. John A. Latané, of Wheeling, W. Va., and the Rev. W. R. Nicholson, of Philadelphia, were elected missionary bishops.

An offer was made to the Council of a gift of thirty acres of ground in the neighborhood of Chicago, as the site of a Reformed Episcopal Theological Seminary, to be built within the next five years. The offer was accepted "with gratitude," and the subject was referred to the Bishops and the Standing Committee of the Missionary Jurisdiction of the Northwest.

The most important business transacted by the Council was the consideration and adoption of the articles of religion. As finally settled upon, the articles are based in the main upon the thirty-nine articles of the Protestant Episcopal Church. The number of articles was, however, reduced to thirty-five, the third, twenty-ninth, thirty-fourth, thirty-fifth, thirty-sixth, and thirty-ninth articles of the Protestant Episcopal Church having been omitted, and the tenth, eleventh, thirteenth, fourteenth, and thirty-second articles of the Reformed Episcopal Church having been added. Important changes were made in the phraseology of several articles. The articles as adopted are as follows:

ARTICLE I. Of the Holy Trinity.—There is but one living and true God, who is a spirit everlasting; of infinite power, wisdom and goodness the maker and preserver of all things, both visible and invisible. And in unity of this Godhead there be three persons, of one substance, power and eternity; the Father, the Son, and the Holy Ghost.

ART. II. Of the Word, or Son of God, which was made very man.—The Son, who is the Word of the Father, begotten from everlasting of the Father, the very and eternal God, of one substance with the Father, took man's nature in the womb of the Blessed Virgin, of her substance: so that two whole and perfect natures, that is to say, the Godhead and manhood, were joined together in one person, never to be divided, whereof is one Christ, very God and very man; who truly suffered, was crucified, dead and buried, to satisfy Divine Justice, and to reconcile us to his Father, and to be a sacrifice, not only for original sin, but also for actual sins of men.

ART. III. Of the Resurrection of Christ and his Second Coming.—Christ did truly rise from death, and took again his body, with flesh, bones, and all things appertaining to the perfection of man's nature, wherewith He ascended into heaven, and there sitteth, our High Priest and Advocate, at the right hand of the Father, whence He will return to judge the world in righteousness. This Second Coming is the blessed hope of the Church. The heavens have received him till the times of the restitution of all things. To those who look for him He shall appear a second time without sin unto salvation. Then shall He change the body of our humiliation, that it may be fashioned like unto his glorious body. He will take to himself his great power, and shall reign till He have put all enemies under his feet.

ART. IV. Of the Holy Ghost.—The Holy Ghost, proceeding from the Father and the Son, is of one substance, majesty, and glory, with the Father and the Son, very and eternal God. It is the work of the Holy Ghost to reprove and convince the world of sin, and of righteousness, and of judgment; to take of the things of Christ and show them to men; to regenerate, making men willing, leading them to faith in Christ, and forming Christ in them the hope of glory; to strengthen them with might in their inner man, that Christ may dwell in their hearts by faith and to secure in them that walking in the ways of God which is called the Fruit of the Spirit. The true Church is thus called out of the world, and is builded together for an habitation of God though the Spirit.

ART. V. Of the Sufficiency of the Holy Scriptures for Salvation.—All Scripture is given by inspiration of God. Holy men of God spake as they were moved by the Holy Ghost: Holy Scripture is, therefore, the Word of God; not only does it contain the Oracles of God, but it is itself the very Oracles of God. And hence it containeth all things necessary to salvation: so that whatsoever is not read therein, nor may be proved thereby, is not to be required of any man that it should be believed as an article of faith, or be thought requisite or necessary to salvation. In the name of the Holy Scripture we do understand the canonical books of the Old and New Testament. The book commonly called "The Apocrypha" is not a portion of God's Word, and is not, therefore, to be read in churches, nor to be used in establishing any doctrine.

ART. VI. Of the Old Testament.—The Old Testament is not contrary to the New: for both in the Old and New Testament everlasting life is offered to mankind by Christ, who is the only Mediator between God and man, being both God and man. Wherefore they are not to be heard, which feign that the old Fathers did look only for transitory promises; and although the Law given from God by Moses, as touching Ceremonies and Rites, does not bind Christian men, nor the Civil precepts thereof ought of necessity to be received in any commonwealth; yet notwithstanding, as a rule of right living, no Christian man whatsoever is free from the obedience of the Commandments which are called Moral.

ART. VII. Of Original or Birth-sin. Original sin standeth not in the following of Adam, as the Pelagians do vainly talk; but it is the fault and corruption of the nature of every man, that naturally is engendered of the offspring of Adam, whereby man is wholly gone from original righteousness, and is of his own nature inclined to evil, so that the flesh lusteth always contrary to the Spirit; and therefore in every person born into this world it deserveth God's condemnation. Men are, as the Apostle speaks, "by nature the children of wrath." And this infection of nature doth remain, yea, in them that are regenerated. And although there is no condemnation for them that are in Christ Jesus, yet the Apostle doth confess that concupiscence or lust in such hath of itself the nature of sin.

ART. VIII. Of Man's Condition by Nature.—The condition of man after the fall of Adam is such, that he cannot turn and prepare himself, by his own natural strength and good works, to faith, and calling upon God. Wherefore we have no power to do good works pleasant and acceptable to God, without the grace of God by Christ first inclining us, that we may have a good-will, and working with us, when we have that good-will.

ART. IX. Of Works before Justification.—Works commonly called good, before the grace of Christ and the inspiration of his Spirit, have not the nature of obedience to God, forasmuch as they spring not of Faith in Jesus Christ, neither do they make men meet to deserve or to receive grace.

ART. X. Of Regeneration or the New Birth.—Regeneration is the creative act of the Holy Ghost

whereby he imparts to the soul a new spiritual life. And whosoever believeth in Christ is born again, for, saith the Scripture, "ye are all the children of God by faith in Christ Jesus."

ART. XI. Of Faith.—The faith which brings justification is simply the reliance or dependence on Christ which accepts him as the sacrifice for our sins, and as our righteousness. We may thus rely on Christ, either tremblingly or confidently; but in either case it is saving faith. If, though tremblingly, we rely on him in his obedience for us unto death, instantly we come into union with him, and are justified. If, however, we confidently rely on him, then have we the comfort of our justification. Simply by faith in Christ are we justified and saved.

ART. XII. Of the Justification of Man.—We are pardoned and accounted righteous before God, only for the Merit of our Lord and Saviour Jesus Christ, by Faith; and not for our own Works or Deservings. He who knew no sin was made sin for us, that we might be made the righteousness of God in him. He bare our sins in his own body. It pleased our heavenly Father, of his infinite mercy, without any our desert or deserving, to provide for us the most precious sacrifice of Christ, whereby our ransom might be fully paid, the law fulfilled, and his justice fully satisfied. So that Christ is himself the righteousness of all them that truly do believe in him. He for them paid their ransom by his death. He for them fulfilled the law, in his life. So that now in him, and by him, every true Christian man may be called a fulfiller of the law. Wherefore, that we are justified by Faith only is a most wholesome doctrine and very full of comfort.

ART. XIII. Of Repentance.—The Repentance required by Scripture is a change of mind toward God, and is the effect of the conviction of sin, wrought by the Holy Ghost. The unconverted man may have a sense of remorse, or of shame and self-reproach, and yet he may have neither a change of mind toward God, nor any true sorrow; but when he accepts Christ as his Saviour, therein he manifests a change of mind, and is in possession of repentance unto life. The sinner comes to Christ through no labored process of repenting and sorrowing; but he comes to Christ and repentance both at once, by means of simply believing. And ever afterward his repentance is deep and genuine in proportion as his faith is simple and childlike.

ART. XIV. Of the Sonship of Believers.—Believers in Christ are born of God, through the regenerating power of his Spirit, and are partakers of the Divine nature; for if "that which is born of the flesh is flesh," so "that which is born of the Spirit is spirit." And all who are thus born of God are sons of God, and joint heirs with Christ; and therefore, without distinction of name, brethren with Christ and with one another.

ART. XV. Of Good Works.—Good Works, which are the Fruits of Faith and follow after Justification, are pleasing and acceptable to God in Christ, and do spring out, necessarily, of a true and lively Faith; inasmuch that by them a lively faith may be as evidently known as a tree discerned by the fruit. They who truly believe will seek to do the will of God, and they who do not thus seek are not to be accounted true believers.

ART. XVI. Of Works of Supererogation.—Voluntary Works, besides, over and above God's Commandments, which they call Works of Supererogation, cannot be taught without arrogancy and impiety. For by them men do declare that they do not only render unto God as much as they are bound to do, but that they do more for his sake than of bounden duty is required: Whereas Christ saith plainly, When ye have done all that are commanded to you, say, We are unprofitable servants.

ART. XVII. Salvation only in Christ.—Holy Scripture doth set out unto us the name of Jesus Christ only, whereby men must be saved. His was a

finished work, and completely sufficient. Without any merit or deserving on our part, He has secured to believers in him pardon, acceptance, sonship, sanctification, redemption, and eternal glory. Those who believe in him are in him complete. They are even now justified and have a present salvation, though they may not at all times have the sense of its possession.

ART. XVIII. Of Election, Predestination, and Free Will.—While the Scriptures distinctly set forth the election, predestination, and calling of the people of God unto eternal life, as Christ saith, "All that the Father giveth me shall come to me;" they no less positively affirm man's free agency and responsibility, and that salvation is freely offered to all through Christ. This Church, accordingly, simply affirms these doctrines as the Word of God sets them forth, and submits them to the individual judgment of its members, as taught by the Holy Spirit; strictly charging them that God commandeth all men everywhere to repent, and that we can be saved only by faith in Jesus Christ.

ART. XIX. Of Sin after Conversion.—The grant of repentance is not to be denied to such as fall into sin after conversion; that is to say, after, by the quickening into life by the Holy Ghost, they have turned to God by faith in Christ, and have been brought into that change of mind which is repentance unto life. For after we have received the Holy Ghost we may, through unbelief, carelessness, and worldiness, fall into sin, and by the grace of God we may arise again, and amend our lives; but every such fall is a grievous dishonor to our Lord, and a sore injury to ourselves.

ART. XX. Of Christ alone without Sin.—Christ, in the truth of our Nature, was made like unto us in all things, sin only excepted, from which he was clearly void, both in his flesh and in his spirit. He came to be the Lamb without spot, who by sacrifice of himself, made *once forever*, should take away the sin of the world; and sin (as St. John saith) was not in him. But all we the rest, although born again in Christ, yet offend in many things; and if we say we have no sin, we deceive ourselves, and the truth is not in us.

ART. XXI. Of the Church.—The souls dispersed in all the world, who adhere to Christ by faith, who are partakers of the Holy Ghost, and worship the Father in spirit and in truth, are the body of Christ, the House of God, the flock of the Good Shepherd—the holy, universal Christian Church. A visible Church of Christ is a congregation of believers in which the pure Word of God is preached, and Baptism and the Lord's Supper are duly ministered according to Christ's ordinance, in all those things that of necessity are requisite to the same. And those things are to be considered requisite which the Lord himself did, he himself commanded, and his apostles confirmed. As the Church of Jerusalem, Alexandria, Antioch, and Rome, have erred, so also others have erred, and may err, not only in their living and manner of Ceremonies, but also in matters of Faith.

ART. XXII. Of the Authority of a Church.—A Church hath power to decree Ceremonies, and to establish forms of worship, and laws for the government and discipline of its members, and to declare its own faith; yet it is not lawful for any Church to ordain or decide anything that is contrary to God's Word written, neither may it so expound one place of Scripture that it be repugnant to another. And as the Church ought not to decree anything against the same, so besides the same ought it not to enforce anything to be believed for necessity of salvation.

The Nicene Creed, as set forth in the Prayer-Book of this Church, and that which is commonly called the Apostles' Creed, ought to be received and believed; for they may be proved by Holy Scripture.

ART. XXIII. Of the Authority of General Councils.—General Councils (inasmuch as they be an assem-

ly of men, whereof all be not governed with the spirit and Word of God) may err, and sometimes have erred, not only in worldly matters, but also in things pertaining to God. Wherefore things ordained by them as necessary to salvation are not binding, as such, on a Christian man's conscience, unless it may be proved that they be taken out of Holy Scripture. To law or authority can override individual responsibility, and, therefore, the right of private judgment; for the individual Christian, as Christ distinctly affirms, is to be judged by the Word. The only Rule of Faith is God's Word written.

ART. XXIV. Of ministering in the Congregation.—Those who take upon themselves the office of public teaching, or ministering the ordinances in the congregation, should be lawfully called thereunto, and sent to execute the same. And those we ought to judge lawfully called and sent, which be moved to his work by the Holy Ghost, and are duly accredited by the Lord's People. That doctrine of "Apostolic Succession," by which it is taught that the ministry of the Christian Church must be derived through a series of uninterrupted ordinations, whether by factual succession or otherwise, and that without the same there can be no valid ministry, no Christian Church, and no due ministration of Baptism and the Lord's Supper, is wholly rejected as unscriptural, and productive of great mischief. This Church values its historic ministry, but recognizes and honors as equally valid the ministry of other Churches, even as God the Holy Ghost has accompanied their work with demonstration and power.

ART. XXV. Of the Sacraments.—By the word Sacrament this Church is to be understood as meaning only a symbol or sign divinely appointed. Our Lord Jesus Christ hath knit together his people in a visible company by sacraments, most few in number, most easy to be kept, most excellent in signification, viz., Baptism and the Lord's Supper. Those five so-called Sacraments, that is to say, Confirmation, Penance, Orders, Matrimony, and Extreme Unction, are not to be counted for Sacraments of the Gospel, being such as have grown partly of the corrupt following of the apostles, partly are states of life allowed by the Scriptures, but yet have no like nature of sacraments with Baptism and the Lord's Supper, for that they have not any visible sign or ceremony ordained of God. And in such only as worthily receive Baptism and the Lord's Supper are they of spiritual benefit, and yet not that of the work wrought (*ex opere operato*), as some men speak. Which word, as it is strange and unknown to Holy Scripture, so it gendereth no godly, but a very superstitious sense. In such as receive them rightly, faith is confirmed and grace increased by virtue of prayer to God. But they that receive them unworthily, purchase to themselves judgment, as St. Paul saith; while it is equally true that none, however conscious of unworthiness, are debarred from receiving them, if they are trusting in the Lord Jesus Christ alone for salvation.

ART. XXVI. Of Baptism.—Baptism represents the death of believers with Christ, and their rising with him to newness of life. It is a sign of profession, whereby they publicly declare their faith in him. It is intended as a sign of regeneration or new birth. They that are baptized are grafted into the visible Church; the promises of the forgiveness of sin and of adoption to be the sons of God by the Holy Ghost are visibly set forth. The baptism of young children is retained in this Church, as agreeable to ancient usage and not contrary to Holy Writ.

ART. XXVII. Of the Lord's Supper.—The Supper of the Lord is a memorial of our Redemption by Christ's death, for thereby we do show forth the Lord's death till He come. It is also a symbol of the soul's feeding upon Christ. And it is a sign of the communion that we should have with one another. Transubstantiation (or the change of the substance of bread and wine into the very body and blood of

Christ), in the Supper of the Lord, cannot be proved by Holy Writ, is repugnant to the plain words of Scripture, overthroweth the nature of a sacrament, and hath given occasion to many and idolatrous superstitions. Consubstantiation (or the doctrine that Christ is veiled under the unchanged bread and wine, and that his very body and blood are present therein and separate the one from the other) is utterly without warrant of Scripture, is contradictory of the fact that Christ, being raised, dieth no more, and is productive, equally with transubstantiation, of idolatrous errors and practices. We feed on Christ only through his word, and only by faith and prayer; and we feed on him whether at our private devotions, or in our meditations, or on any occasion of public worship, or in the memorial symbolism of the Supper. The elements of the Lord's Supper were not by Christ's ordinance designed to be reserved, carried about, lifted up, or worshipped.

ART. XXVIII. Of Both Kinds.—The Cup of the Lord is not to be denied to any of his people, for both the bread and the wine, by Christ's ordinance and commandment, ought to be ministered to all Christian men alike.

ART. XXIX. Of Unworthy Persons ministering in the Congregation.—Although in the visible Church the evil be ever mingled with the good, and sometimes the evil have chief authority in the ministration of the word and ordinances: yet, forasmuch as they do not the same in their own name, but in Christ's, the believer is not deprived of the benefits of God's ordinances; because, though they be ministered by evil men, yet are they Christ's institution, and set forth his promise. Nevertheless, it appertaineth to the discipline of the Church, that inquiry be made of evil ministers, and that they be accused by those that have knowledge of their offenses: and finally, being found guilty, by just judgment, be deposed.

ART. XXX. Of the one Oblation of Christ finished upon the Cross.—The Offering of Christ once made is that perfect redemption, propitiation, and satisfaction, for all the sins of the whole world, both original and actual; and there is none other satisfaction for sin, but that alone. And as there is only this one sacrifice in the Christian Church, once made, never to be repeated, so there is but the one Priest, even Jesus Christ, the Apostle and High Priest of our profession. Wherefore the sacrifices of masses, in the which it is commonly said that the Priest offers Christ for the quick and the dead, for the remission of pain or guilt, or any representations of the Lord's Supper as a sacrifice, are blasphemous fables and dangerous deceits.

ART. XXXI. Of Certain Erroneous Doctrines and Practices.—The Romish doctrines concerning purgatory, penance, and satisfaction, have no support from the Word of God, and are, besides, contradictory of the completeness and sufficiency of the redemption in Christ Jesus, of justification by faith, and of the sanctifying efficacy of God the Holy Ghost. Praying for the dead is man's tradition, vainly invented, and is in violation of the express warnings of Almighty God to the careless and unconverted. The adoration of relics and images, and the invocation of saints, besides that they are grounded upon no warranty of Scripture, are idolatrous practices, dishonoring to God, and compromising the mediatorship of Christ. It is also repugnant to the Word of God to have public prayer in the Church, or to minister the ordinances, in a tongue not understood by the people.

ART. XXXII. Of Confession and Absolution.—Private confession of sins to a priest, commonly known as Auricular Confession, has no foundation in the Word of God, and is a human invention. It makes the professed penitent a slave to mere human authority, entangles him in endless scruples and perplexities, and opens the way to many immoralities. If one sin against his fellow-man, the Scripture requires him to make confession to the offended party;

and so, if one sin and bring scandal upon the Christian Society of which he is a member. And Christians may often, with manifest profit, confess to one another their sins against God, with a view solely to instruction, correction, guidance, and encouragement in righteousness. But in any and every case confession is still to be made to God; for all sins are committed against him, as well such as offend our fellow-man, as those that offend him alone. Priestly absolution is a blasphemous usurpation of the sole prerogative of God. None can forgive sins as against God, but God alone. The blood of Jesus Christ only can cleanse us from our sins, and always we obtain forgiveness directly from God, whenever by faith in that blood we approach him with our confessions and prayers.

ART. XXXIII. *Of the Marriage of Ministers.*—Christian Ministers are not commanded by God's Law, either to vow the estate of single life, or to abstain from marriage; therefore it is lawful for them, as for all other Christian men, to marry at their own discretion.

ART. XXXIV. *Of the Power of the Civil Authority.*—The power of the civil magistrate extendeth to all men, as well Ministers as people, in all things temporal; but hath no authority in things purely spiritual. And we hold it to be the duty of all men who are professors of the Gospel, to pay respectful obedience to the civil authority, regularly and legitimately constituted.

ART. XXXV. *Of Christian Men's Goods.*—The riches and goods of Christian men are not common, but their own, to be controlled and used according to their Christian judgment. Every man ought, of such things as he possesseth, liberally to give alms to the poor, according to his ability; and, as a steward of God, he should use his means and influence in promoting the cause of truth and righteousness, to the glory of God.

The Rev. B. F. Stevens, of South Carolina, during the month of July, organized six Reformed Episcopal Churches among the freedmen, with a total of 539 members. The churches, which were in a small territory, and near to each other, were put in charge of two preachers, assisted by a lay reader. A convocation of all the organized congregations was held August 14th. Three delegates were present from each church. On the 1st of September Mr. Stevens, having completed his second round of visits to those congregations, reported them to number seven churches, with 665 members.

By the constitution of the Reformed Episcopal Church, provision is made for the formation of synods. Any six or more churches, in reasonable proximity, may be formed into a synod, for which a synodical bishop may be elected. Each synod is to be composed of all the ministers within its limits, and as many lay deputies from each congregation as the synod may determine, and is given the power to frame a constitution and canons for its own government, not conflicting with the constitution and canons of the General Council. A meeting for the organization of a synod was held at Chicago, Ill., September 28th. Eight churches were represented, six of which were in Chicago, by fifty-one delegates, of whom forty-three were lay members. A constitution was adopted, and the synod organized under the name of the Synod of Chicago.

Bishop Cheney, already Missionary Bishop of the Northwest, was elected Synodal Bishop.

RÉMUSAT, FRANÇOIS MARIE CHARLES, Comte DE, a French statesman, born March 14, 1797; died June 6, 1875. He was a grandson of Lafayette, and a nephew of Casimir Périer. He studied law and entered public life during the closing years of the reign of Charles X. Associated with M. Thiers, he hastened the revolutionary movement which drove that monarch from power and placed Louis Philippe on the French throne. He was elected deputy by Toulouse in 1830, and represented that city for six years, acting with the Liberal party, and acquiring great fame as an orator. During the parliamentary warfare from 1830 to 1848, he steadfastly supported M. Thiers, and was Minister of the Interior in the ministry which the latter formed in 1840. When subsequently his party was overthrown, Count de Rémusat devoted himself ardently to literature, and was honored with membership in the French Academy. When Louis Philippe, striving to maintain his tottering throne, summoned M. Thiers to form a ministry, Count de Rémusat was named as one of its members. Under the Provisional Government and the Republic, Count de Rémusat was successively a member of the Constituent and Legislative Assemblies, in which he pursued a conservative course. He was exiled at the *coup d'état* of 1851, but soon returned and retired to private life. In August, 1871, he succeeded M. Jules Favre in President Thiers's Cabinet as Minister for Foreign Affairs, and displayed considerable ability in promoting abroad the interests of the French Republic. He fell with the Thiers administration. Though extremely simple, the funeral of M. de Rémusat was an imposing one. With scarcely an exception, the Deputies forming the majority of the 25th February attended. There were also many belonging to the Right and the Right Centre. The Academy was represented by M. Patin and M. Vieil Castel. Among his principal works are: "*Essais de Philosophie*" (2 vols., 1834); "*Abélard*" (2 vols., 1845); "*Saint-Anselme de Canterbury*" (1858); "*Angleterre au XVIII^e Siècle*" (1856); "*Bacon, sa Vie, son Temps, sa Philosophie*" (second edition, 1858); "*Channing, sa Vie et ses Œuvres*" (second edition, 1862); "*Philosophie Religieuse*" (1864); "*L'Angleterre au XVIII^e Siècle*" (2 vols., 1865).

REUSCHLE, KARL GUSTAV, a German geographer, born December 26, 1812; died May 22, 1875. He studied mathematics and natural history in Tübingen, Paris, and Berlin, and in 1840 was appointed professor of mathematics and geography in the gymnasium at Stuttgart. His principal work, "*Tafeln complexer Primzahlen*," was published shortly before his death by the Berlin Academy of Sciences. His works "*Kepler und die Astronomie*" (1871), and "*Kopernikus, Kepler und Newton*," show his knowledge of astronomy, while his last

work, "Philosophie und die Naturwissenschaften" (1874), proves him well versed in these sciences. The large majority of his works are, however, of a geographical character. Among these are: "Kosmos für Schule und Laien" (1848), "Vollständiges Lehrbuch der Geographie: 1. Physik der Erde (1851); 2. Beschreibende Geographie" (1852; fourth edition, 1872); "Elementargeographie" (1859, fourth edition, 1874); "Handbuch der Geographie" (1858); and "Illustrierte Geographie für Schule und Haus" (1856).

RHODE ISLAND. The adjourned session of the Rhode Island Legislature, which began on the 19th of January, continued till the 16th of April. Voting for a United States Senator was immediately resumed,* the twenty-second ballot being taken on the first day. There were 104 votes cast, of which 43 were for General Ambrose E. Burnside, 27 for Nathan F. Dixon, 16 for Amos O. Barstow, and the remainder for several other candidates. Finally, General Burnside was elected on the twenty-eighth ballot, receiving 62 votes out of a total of 104, Mr. Dixon having withdrawn his name. On the 28th of January Thomas Durfee was elected Chief-Justice of the Supreme Court, in joint convention of the two Houses, receiving 70 votes out of a total of 86. Later in the session John H. Stiness, of Providence, was unanimously elected an Associate Justice of the Supreme Court.

On the 4th of March a communication from the State Constable was submitted to the Legislature by the Governor, regarding a conflict of authority between the said constable and the United States Marshal in the city of Providence. The marshal held a quantity of liquor under attachment at the suit of parties residing in another State, and allowed the same to remain on the premises of the defendant, a liquor-dealer in Providence, in the nominal charge of a book-keeper of the proprietor. The packages were labeled and kept in a portion of the saloon apart from the rest, separated by a partition, but it was claimed by the State Constable that the owner had access to them, and sold the liquor in violation of law. He accordingly attempted, on the 23d of February, to make seizure, and, the marshal refusing to designate the packages held by him under attachment, he proceeded to seize the whole. This was resisted by the marshal, who called on the chief of police to aid him. The assistance of the police was given to the marshal, although it was claimed also by the State Constable. When the matter was brought to the attention of the Legislature, an investigation by a special committee was ordered. A majority and a minority report were made by the committee. The former, after enumerating the facts as established by the evidence taken, declared that they pointed to these "irresistible conclusions:—"

1. That the attachment in question afforded no protection from seizure under the laws of the State, of liquors in the actual possession of the owner or his agents, while engaged in illegal sales of such liquors. It is not necessary even to charge the marshal with actual conspiracy in order to reach this conclusion, it being sufficient that, with full consent and authority of the attaching creditor, he so neglected to care for the property in his constructive possession as to permit its unlawful use. At the same time the conclusion is unavoidable that this official erred in allowing his office to be used as an interposition between the law and its violators.

2. That the conduct of the chief of police of the city of Providence is, upon his own showing, wholly inexcusable. An executive officer cannot play fast and loose with his duties as superior or as subordinate. Upon the assumption made by him there is no possible manner by which the laws of the State can be peaceably enforced. The paramount force of constitution and law, and official oath, is entirely overcome by the idlest word of command from a United States officer, who has no right to or title by law or usage to control the police authority, whether of the State or the city.

3. That while the occurrences which led to this inquiry are greatly to be deplored, and considering the delicacy of their position toward the marshal, the State Constable and his deputies might certainly have justified their conduct had they neglected to seize liquors supposed but not known to be included in his attachment. Yet they were under no legal obligation to show him any such favor. It is obvious that they acted only in the strict discharge of a lawful duty, in making the seizure, in refusing to recognize the marshal as being in possession of liquors which the owner was selling in flagrant violation of law, and in calling for aid from the police of Providence.

The majority of the committee concluded their report as follows:

The gravity of the questions involved in the inquiry no one can fail to appreciate. A repetition of such scenes must lead to a bloody vindication or to a general contempt for the officers of the law, still more hurtful to the community. There is no such thing as State sovereignty or State rights if our police are to become the servants of the United States Marshal, whenever it suits his caprice or his fancy, his interest or his fears.

Your committee find, however, that no action is needed in the way of providing further safeguards by legislation against unwarrantable interference or false notions of duty. It seems impossible that so great a mistake can be again made by those who exercise control over the police of the city of Providence. Disclaiming no right to censure the conduct of an officer over whom the General Assembly has no control, your committee would, perhaps, be justified in leaving a subject of such excessive delicacy without recommending any action whatever. But the facts stated in this report are such as certainly deserve attention from the authorities to whom this officer is accountable, and to their impartial review these facts may with propriety be submitted. The committee accordingly recommend the passage of the following resolution:

Resolved, That his Excellency the Governor be requested to cause to be prepared, and transmitted to the President of the United States, a statement of facts relating to the interference of the United States Marshal for the District of Rhode Island with the State Constable in the discharge of his duty in the city of Providence, on the 23d day of February, 1875.

The minority of the committee were of the opinion that they had no authority to investigate or to report, except as to the necessity of

* See ANNUAL CYCLOPEDIA for 1874.

legislation on the subject, and, obtaining no evidence of such necessity, they did not feel authorized to make any recommendation. They regarded it as a matter for the courts to deal with. A long discussion ensued, and on the last day of the session the following was adopted, in place of the resolution submitted by the majority of the committee:

Voted and Resolved, That the majority and minority reports of the joint special committee on the conflict of authority between the State Constable and the Marshal of the United States for the District of Rhode Island, with the accompanying resolution, and the evidence in the case, be respectfully referred to the Governor, to adopt such measures in the premises, not repugnant to law, as he shall deem best conducive to the interests of the State and the enforcement of the laws.

"Property liable to and exempt from taxation" was the subject of an extended inquiry by a special committee. A report was made, taking decided ground against the exemption of church property, but favoring a compromise. Its conclusion was expressed as follows:

Let the land be taxed as other land is taxed, but, as the buildings are very generally of no convertible value, let these be exempt. The funds of these institutions should also be taxed, except in the case of Government securities, which are exempted by law of Congress. This course would not, as a general rule, bear heavily upon these societies. Those of them occupying the most valuable sites can better afford to pay the tax; the small, poor churches in the country towns will scarcely feel it. If it be said that a church holding and occupying a large and very valuable lot, in the heart of a city, will be compelled to curtail its domain, the answer should be, that a sale of a portion of its land will the better enable the church to perform its true mission. The same reasoning will apply to educational and charitable institutions.

No change was made in the existing legislation on this subject.

The question of granting the right of suffrage to women was also referred to a special committee, and two reports were made upon it. The majority of the committee recommended the passage of a resolution submitting to the people for ratification an amendment of the constitution, granting the right to vote to women owning real estate. After some discussion the subject was indefinitely postponed in the House, by a vote of 81 to 29.

Among the acts passed during the session was one establishing a Board of Commissioners, of the Sinking Fund, to consist of the Governor, Treasurer, State Auditor, the chairman of the standing Committees on Finance of the Senate and House of Representatives, and other two persons to be elected by the General Assembly. The board is required to invest the funds paid to them in bonds of the United States, or those of any New England State, or of the towns and cities of Rhode Island, and, on receiving any of the bonds or certificates of indebtedness of the State, must cancel them so as to prevent their reissue. The Treasurer is required on the 1st of June, each year, to pay to the commissioners for the redemption of bonds of the State, until they

shall have matured, \$119,000 for those due in 1882; \$20,000 for those due in 1883; \$20,250 for those due in 1893; and \$21,750 for those due in 1894; these sums to form a sinking-fund for the redemption of such bonds. An act was passed constituting the Superintendent of State Charities and Correction and the Secretary of State a commission to receive and examine all complaints and communications from inmates of any insane asylum, or in relation to them, and cause inquiry to be made, when they deem it advisable, into the condition and treatment of such persons, for the purpose of securing their discharge if they are improperly confined. The Commissioners are also required to visit the asylums and examine into the condition and complaints of the inmates. Authority is given for the prosecution of the officers of these institutions in case of neglect of duty or improper treatment of the persons confided to their care. Another act authorized the Board of Education to pay annually, to each public library maintained in the State, \$50 for the first 500 volumes in such library, and \$25 for each additional 500 volumes. The Board of Education is also required to establish rules for the management of such libraries. Another act provided for taking a "census of the population, manufactures, fisheries, and business in the several cities and towns of the State," as they existed "on the 1st day of June, 1875, and every tenth year thereafter." A Superintendent of the Census was to be appointed by the Governor, who with the Governor and Secretary of State should constitute the "Census Board," and the Superintendent was authorized to appoint agents in the different cities and towns to carry out the work.

Reports were made in favor of building a new State-House on the site of the old one in Providence, and in favor of purchasing the estate of the Providence High-School for the use of the State Normal School.

The Republican State Convention gathered at Representatives' Hall in the State-House at Providence, on the 25th of March, but, the accommodations proving inadequate for the crowd in attendance, the Academy of Music was secured. The session lasted all night, reaching an adjournment at 7 A. M. of the 26th. There were numerous contesting delegations, and an organization was not effected until far into the night. The cause of the division was the effort begun in advance of the convention to secure the nomination of Henry Lippitt for Governor, by those who were in favor of a repeal of the prohibitory and constabulary acts, and the inauguration of a license system for the regulation of the liquor-traffic. The result of the convention was the triumph of the Lippitt faction, and the following ticket was nominated: For Governor, Henry Lippitt, of Providence; Lieutenant-Governor, Henry T. Sisson, of Little Compton; Secretary of State, Joshua M. Addeman, of Providence;

Attorney-General, Willard Sayles, of Providence; General Treasurer, Samuel Clark, of Lincoln. No platform was adopted.

The Democratic Convention was held in Representatives' Hall, Providence, on the 27th of March, and was very harmonious. The following was the ticket put in nomination: For Governor, Charles B. Cutler, of Warren; Lieutenant-Governor, John B. Pierce, of North Kingstown; Secretary of State, Thomas A. Reynolds, of East Greenwich; Attorney-General, Charles E. Gorman, of Providence; General Treasurer, Philip Rider, of Newport.

The only resolutions adopted were the following:

Resolved, That the convention has placed in nomination for general officers of the State men of unimpeachable integrity and of life-long reputation as Democrats, and who are in every way worthy of the support of Democrats and of all good citizens irrespective of party name.

Resolved, That we pledge our votes and influence to their election.

On the 29th of March the Prohibitionists held a convention in Providence. The following resolutions were adopted:

Resolved, That no question connected with the law-making power or its administration in the State is of equal importance with that prohibiting the manufacture and sale of intoxicating beverages.

Resolved, That the judgment of this convention is that the prohibitory law has thus far worked well, and promises better results the longer it is in force.

Resolved, That, while we seek to restrain drunkenness by the use of the law, we yet put especial emphasis upon moral agencies, and ask the cooperation of all good citizens.

Resolved, That we heartily indorse the administration of Governor Henry Howard and his associates in office, and congratulate the State upon the purity of their record.

Resolved, That the prudence, firmness, and zeal of State Constable Northrup and his deputies entitle them to the confidence and support of all good citizens.

Resolved, That we unqualifiedly condemn the practice which has so extensively corrupted the morals of this State—the buying up of the ballots of freemen in order to secure the nomination or election of unworthy men, or of any man, to office; and we call upon the citizens of every town and city in the State to use all honorable means to bring to justice any man who shall dare to offer any bribe in the coming election.

Resolved, That we call upon all friends of sobriety and virtue to assist in electing State Senators and Representatives who are in favor of retaining our present prohibitory and constabulary laws, with only such amendments as will increase their efficiency.

The nominations made were as follows: For Governor, Henry Howard, of Coventry; Lieutenant-Governor, Charles C. Van Zandt, of Newport; Secretary of State, Joshua M. Addeman, of Providence; Attorney-General, Willard Sayles, of Providence; General Treasurer, Samuel Clark, of Lincoln.

Those Republicans who were dissatisfied with the action of the regular convention called a mass meeting of "National Union Republicans, who believe that the nominations of Henry Lippitt for Governor and Henry T. Sisson for Lieutenant-Governor were secured by means

destructive to the integrity and purity of the Republican party, and perilous to all its interests." This was held at the Academy of Music, in Providence, on the 1st of April, and the following resolutions were unanimously adopted:

Whereas, The nomination of Henry Lippitt and Henry T. Sisson for the offices of Governor and Lieutenant-Governor has been accomplished through methods and practices which in their practical operation are subversive of the fundamental principles of all popular government; and—

Whereas, These nominations have called forth expressions of profound and unqualified dissatisfaction: therefore—

Resolved, That we, members of the Republican party, in mass meeting assembled, enter our solemn and indignant protest against such proceedings; that, moreover, we will not submit to such practices; and that with united voices we repudiate a nomination which has disgraced the State, imperiled the character and safety of our party, cast a stigma upon popular institutions, and, in fine, betrayed grave and sacred trusts.

Resolved, That this meeting is a testimony to the virtue, intelligence, and independence of the people; that it illustrates, in no uncertain degree, their capacity to think and to speak for themselves; that it heralds the commencement of a reform in all that relates to purity in politics and qualifications for office; that it declares that the people, when once aroused, are invincible; that it proclaims the intention to speak for their rights, to compel a recognition of them, and to sweep from the path to power any man or any set of men who may either betray them, or, by questionable means, seek to dictate who shall be their rulers.

Resolved, That in the names of Rowland Hazard and Daniel E. Day, which are now presented to the members of the Republican party for their suffrages, we recognize men, the record of whose lives is the best guarantee of their fitness for the high offices for which they are now nominated.

Resolved, That, on the first Wednesday in April, we will proclaim throughout the length and breadth of the State that "the people, like the air, is seldom heard, but when it speaks in thunder."

Resolved, That we recommend the Republicans of the several towns and wards to organize and enroll their names in accordance with the recommendation of the late National Union Republican State Committee.

The following ticket was nominated by a unanimous vote of the meeting: For Governor, Rowland Hazard, of South Kingstown; Lieutenant-Governor, Daniel E. Day, of Providence; Secretary of State, Joshua M. Addeman, of Providence; Attorney-General, Willard Sayles, of Providence; General Treasurer, Samuel Clark, of Lincoln.

Governor Howard and Lieutenant-Governor Van Zandt having declined the nominations tendered by the Prohibitionists, the candidates of the Independent Republicans were accepted by a committee to which the duty of filling vacancies had been intrusted by the convention.

The election took place on the 7th of April. The whole number of votes cast for Governor was 22,258, of which, Hazard received 8,724, Lippitt 8,368, and Cutler 5,166. There was no choice of Governor and Lieutenant-Governor, a majority of all the votes cast being required for an election. Joshua M. Addeman was elected Secretary of State, receiving 16,936

votes to 5,116 for Thomas A. Reynolds; Willard Sayles was elected Attorney-General, and Samuel Clark Treasurer, by a vote nearly as large as that of Addeman. There were failures to elect members of the Legislature in several towns, and new elections were held on the 16th of April.

The regular session of the General Assembly began at Newport on the 25th of May. It consisted of 28 Republicans and 18 Democrats in the Senate, and 60 Republicans and 12 Democrats in the House of Representatives, making the Republican majority 10 in the Senate and 48 in the House, or 58 on a joint ballot. The first business of the session was the election of Governor and Lieutenant-Governor in joint convention, or "Grand Committee" as it is called in this State. The only candidates who could be voted for were the two receiving the largest number of votes at the State election. The number of votes cast was 106, of which Henry Lippitt for Governor received 70 and Rowland Hazard 36; for Lieutenant-Governor, Henry T. Sisson received 66 and Daniel E. Day 40. Mr. Lippitt was accordingly declared elected Governor and Mr. Sisson Lieutenant-Governor.

The session continued until the 25th of June. The most important subject of legislation was the regulation of the liquor-traffic, and a joint special committee was appointed to consider propositions and report a bill. After a protracted discussion, the constabulary law was repealed, and "an act to regulate and restrain the sale of intoxicating liquors" was passed, to take the place of the prohibitory law. It authorizes the boards of aldermen of cities and the town councils of towns to grant or to refuse to grant licenses for the sale of liquors.

The aldermen of the city of Providence, however, are required to choose three commissioners for the purposes, and other towns and cities may elect commissioners, if the qualified electors so determine. The licenses granted shall run for only one year, and one half the fees shall be for the use of the town or city, and the other half turned over to the State Treasurer. Before a license is granted to any person, notice must be given, and an opportunity allowed for remonstrances. All persons licensed must enter into a bond not to violate the law, and penalties are imposed for all violations. No one can sell liquor on Sunday or to any minor or person of notoriously intemperate habits. There is a penalty for forcibly ejecting any intoxicated person from the premises on which the liquor has been sold to him, and the seller is held liable for any damage done by intoxicated persons to whom he has sold liquor. The husband, wife, parent, child, guardian, or employer, of any intemperate person may request a licensed dealer not to sell liquor to such person, and may bring suit for damages if the request is disregarded. The sheriffs of counties and their deputies, and the constables and police of towns and cities, are

charged with the execution of the law, and special constables may be appointed by town councils and the aldermen of cities for the same purpose. On the request of five qualified electors in any town a vote shall be taken at the regular town meeting on the question of permitting licenses to be granted, and, if a majority shall vote in the negative, no licenses can be granted in that town. The act does not apply to the manufacture of cider or domestic wines, or the sale thereof in quantities of not less than one gallon. Before the close of the year, \$72,501.24 had been paid into the State Treasury for licenses in twelve towns and cities. The other twenty-four towns had refused to grant licenses, or failed to make any returns.

The census, taken during the summer, furnished the following table of population, showing the change in each town in five years:

TOWNS.	POPULATION.		Gain or Loss in Five Years.
	1875.	1876.	
Barrington.....	1,185	1,111	gain 74
Bristol.....	5,629	5,802	gain 173
Warren.....	4,005	3,008	gain 997
Bristol County.....	11,019	9,421	gain 1,598
Coventry.....	4,560	4,349	gain 211
East Greenwich.....	3,190	2,660	gain 530
West Greenwich.....	1,084	1,133	loss 49
Warwick.....	11,614	10,458	gain 1,156
Kent County.....	20,848	18,595	gain 2,253

The heavy loss in the town of North Providence is due to the fact that a large portion has been annexed to Providence, and another

large portion to Pawtucket since 1870. Of the total population of 258,182, the number of colored persons is 6,271; the number of persons born in the United States, 186,609; those of American parentage, 184,680; of foreign parentage born in the United States, 51,979; born in foreign countries, 71,680. The growth of cotton manufactures is shown in the following comparative statement of the increase of population and of spindles since 1860:

YEARS.	Population.	Number of Spindles.	Number of Spindles to each Inhabitant.
1860.....	174,690	814,554	4.6
1865.....	184,965	889,695	4.5
1870.....	217,538	1,048,349	4.8
1875.....	258,389	1,415,784	5.5

The increase and increase per cent. in each of the three periods of five years were as follows:

YEARS.	INCREASE OF POPULATION.		INCREASE OF SPINDLES.	
	No.	Per Cent.	No.	Per Cent.
1860 to 1865.....	10,245	5.9	25,141	8.08
1865 to 1870.....	82,888	17.51	208,547	24.24
1870 to 1875.....	40,896	18.81	372,492	35.71

The total valuation of property in the State, on which the tax levy is based, is \$328,538,559, of which \$168,547,726 belongs to the city of Providence. The total indebtedness of cities and towns is \$9,869,757.11, of which \$8,818,046 is of the city of Providence. The bonded debt of the State at the beginning of 1876 was \$2,565,500, and the sinking-fund contained \$181,000. The State Treasury, on the 30th of April, contained a balance of \$475,850.23; the receipts from that date to November 30th were \$438,645.24, and the payments \$640,255.32, leaving a balance of \$274,238.15. From November 30 to January 11, 1876, the receipts were \$471,003.33, and the payments \$268,002.67, so that the balance at the latter date was \$477,238.81.

The number of savings-banks in the State on the 27th of November was 38; whole number of depositors 101,635; total amount due to depositors, \$51,811,330.32; average to each depositor, \$504.85; largest amount due to one depositor, \$45,113.16; increase in deposits over the previous year, \$2,539,828.76; average dividend, seven per cent. The total resources and liabilities of the 62 national banks in the State, on the 17th of December, was \$49,660,441.14. The resources and liabilities of State banks were \$5,091,697.20. The capital stock of railroads, the whole or a portion of which are located in this State, amounts to \$37,247,815. The total indebtedness is \$15,427,385. The net earnings for the year were \$2,131,002. Total number of passengers transported during the year, 20,575,973; number of passengers killed by accidents during eight months, 6; number of passengers injured, 13; number of

employés and others killed 29; number of employés and others injured, 25.

The school statistics for the year are as follows:

DAY-SCHOOLS.	
Number of different pupils enrolled.....	88,534
Average number belonging to schools.....	80,102
Average attendance.....	26,163
Number of schools (graded, 486; ungraded, 801)	737
Average length of schools, 8 months 18 days.	
Number of teachers regularly employed.....	822
Amount paid male teachers.....	\$98,617 70
Average wages paid male teachers per month.....	85 18
Amount paid female teachers.....	280,666 44
Average wages paid female teachers per month.....	46 17

EVENING-SCHOOLS.	
Number of different pupils enrolled.....	4,600
Average attendance.....	2,256
Number of schools.....	89
Average length of schools, 12 weeks.	
Number of children in the State from five to fifteen years of age, State census, June, 1875.....	58,816
Expenditure per capita of school population, five to fifteen years of age.....	\$9 17
Expenditure per capita of pupils enrolled.....	13 24
Expenditure per capita of average attendance.....	18 04

The number of inmates of the institutions on the State-farm, on the 1st of January, 1876, was 616, of whom 279 were in the workhouse, 178 in the insane asylum, and 164 in the almshouse. Of the 279 in the workhouse 206 were men, and 73 women; the increase for the year was 64 men, and 16 women. In the insane asylum there were 86 men, and 87 women, a decrease of 1 man and an increase of 2 women during the year. In the almshouse the total was made up of 61 men, 62 women, 20 boys, and 21 girls, being an increase during the year of 8 men, 18 women, and 2 boys, the number of girls being the same at the end as at the beginning of the year. A considerable addition has been made to the insane asylum. The amount paid on account of appropriations for the State-farm during the year was \$685,500.

The number of convicts in the State-prison at the beginning of the year was 67; during the year 24 were committed, 29 discharged, 3 pardoned, and 3 removed by death, leaving 56 at the end of the year. The Providence County jail contained 185 inmates on the 31st of December, of whom 71 were committed by the State. The total receipts from labor and other sources were \$10,796.45 for the prison, and \$18,101.47 for the jail; the expenditures were \$7,181.55 for the prison, and \$16,772 for the jail, showing a balance of \$3,664.90 in favor of the prison, and \$8,670.53 against the jail. A new State-prison is in process of construction on the State-farm. It will contain 252 cells. The amount thus far appropriated for the building is \$175,000, of which \$138,214.97 has been expended. A further appropriation of \$160,000 is required for its completion.

The militia of Rhode Island has been reorganized under a law passed at the close of the January session, requiring an assignment of all companies to battalions under a uniform system, instead of permitting the independent organization previously maintained. Three companies, the Newport Artillery, the United Train

of Artillery, and the Bristol Artillery, refused to organize under the new law, claiming the privileges of their special charters. Several other companies were disbanded. The force, as organized under the law, consists of 1,715 men.

Considerable progress has been made by the Commissioners of Fisheries in stocking the streams and ponds of the State with salmon, trout, shad, and black bass.

RIPLEY, HENRY JONES, D. D., an American clergyman, scholar, and Professor of Theology, was born in Boston, Mass., January 28, 1798, and died May 21, 1875. He received his earlier training in the grammar-school and a Latin school in Boston, receiving a Franklin medal at each. He entered Harvard College at fourteen, and was graduated with the class of 1816. He studied theology at Andover, and, completing his course there in 1819, he was ordained in Boston the same year. For six years he served as pastor of the Baptist Church in North Newport, Liberty County, Ga. In September, 1826, he was appointed Professor of Biblical Literature and Pastoral Duties in the Theological Institution at Newton, Mass. He afterward served as Professor of Sacred Rhetoric and Pastoral Duties, in place of Prof. Knowles, who died in 1839. He resigned his connection with the institution in 1860, after serving as professor thirty-four years. In 1844 the University of Alabama, and in 1845 Harvard University, conferred on him the degree of D. D. His principal works are "Christian Baptism" (1833); "Notes on the Four Gospels" (2 vols., 1837-'38); "Notes on the Acts of the Apostles" (1844); "Sacred Rhetoric" (1849); "Notes on the Epistle to the Romans" (1857); "Church Polity" (1867); and "Notes on the Epistle to the Hebrews" (1868).

RODBERTUS, JOHANN KARL, a German statesman, born August 12, 1805; died December 8, 1875. In 1848 he was elected a member of the Prussian Assembly, and was here the founder and the leader of the Left Centre, and on June 25th of the same year was appointed Minister of Public Worship, from which position, however, he soon retired. In 1849 he was elected to the Second Chamber. During the stormy scenes that preceded the war of 1866, he sided with Bismarck, and when the war had begun he left his party, declaring that further opposition would be treason. Among his works are: "Zur Erkenntniss unserer staatswirtschaftlichen Zustände" (1842); "Die preussische Geldkrise" (1845); "Sociale Briefe" (3 vols., 1850-'51); "Die Handelskrisen und die Hypothekenth der Grundbesitzer" (1858); "Zur Erklärung und Abhilfe der heutigen Creditnoth des Grundbesitzes" (2 vols., 1865); and "Der Normalarbeitstag" (1871).

ROMAN CATHOLIC CHURCH. The general position of the Roman Catholic Church during the year 1875, both as regards the condition of the Pope and the attitude of various governments toward it, remained unchanged.

No important act or document relating to the Church at large can be recorded. The Pope made two promotions of cardinals; on the 15th of March, when Archbishop Gianelli, of Sardinia, Archbishop Ledochowski, of Gnesen and Posen, then in prison, Archbishop McCloskey, of New York, the first American ever promoted, Henry Manning, Archbishop of Westminster, Victor Deschamps, Archbishop of Mechlin, were made cardinal-priests, and Dominic Bartolini cardinal deacon; and on the 17th of September, when Cardinal Martinelli, already in the Sacred College, in the order of deacon, was raised to that of priest; and Mgr. Roger L. Antici Mattei, Patriarch of Constantinople, John Simeoni, Archbishop of Chalcedon, Salvatore Vitelleschi, Archbishop of Selucia, who died before the close of the year, Godfrey B. St. Marc, Archbishop of Rennes, became cardinal-priests; and Mgrs. Lawrence, Randi, and Bartolomeo Pacca, became cardinal-deacons. Briefs and allocutions bore on the subject of secret societies, Christian education, the influence of exclusively pagan authors in classical studies, and similar topics. A brief of April 22d encouraged all to unite in a general dedication of the whole Church to the Sacred Heart of Jesus, on the 16th of June.

The schismatic church of Utrecht, in Holland, having notified Pope Pius IX. of the election of a new archbishop, the Pope, in a brief to the Catholic archbishop, annulled the election, and on May 18th, by a brief formally annulled it, and subsequently excommunicated Heykamp, the new archbishop, who was consecrated in defiance of the Pope.

In the kingdom of Prussia and the German Empire the Government maintained its policy; on January 18th declaring Bishop Martin, of Paderborn, deposed from the episcopacy in the Catholic Church, and in October pursuing the same course in regard to Dr. Forester, Prince-Bishop of Breslau, who had retired to the Austrian portion of his diocese. The Archbishop of Cologne and the Bishop of Treves were imprisoned in March. The coadjutor of Posen was arrested in October for administering extreme unction; priests were arrested on various charges, and the exile of members of religious orders was carried to such an extent that in June alone 174 exiled priests and religious landed in the United States, twenty more arrived in August, and five Franciscan nuns, on their way to America, perished in the wreck of the Deutschland, in December. The mass of the German Catholics were thus entirely deprived of the ministrations of their clergy, schools, asylums, hospitals, etc. In the diocese of Gnesen and Posen, the archbishop, two bishops, and 98 priests, were under arrest, and more than 50,000 Catholics without pastors. A similar condition prevailed in other parts of Prussia, every bishop and 1,400 priests having been imprisoned or fined. This led to the following encyclical from the Pope, addressed to the archbishops and bishops of Prussia:

to our Venerable Brethren the Archbishops and Bishops in Prussia. *Pius IX., Pope.*

VENERABLE BRETHREN, HEALTH AND APOSTOLIC BLESSING: That which we could never have supposed to be possible, when we recall to mind the stipulations entered into between this Apostolic See and the Prussian Government, in the twenty-first year of the present century, for the welfare and security of the Catholic cause, has actually come to pass in the most lamentable manner in your country, my venerable brethren. To the calm and peace which the Church of God enjoyed among you, has succeeded a severe and unexpected storm. To the laws recently enacted against the rights of the Church—laws which have already struck so many of her faithful and conscientious servants, not only among the clergy, but among the people also—have been added other laws, which completely overthrow the divine constitution of the Church, and annihilate the sacred rights of her bishops.

For these laws ascribe to lay judges the power of depriving the bishops and other ecclesiastical dignitaries of their dignity, and of their episcopal jurisdiction.

These same laws have raised up numerous and great obstacles in the way of those who have been called to exercise legitimate jurisdiction during the absence of the chief pastors of the flocks. These laws allow the chapters of metropolitan churches to choose, contrary to the canons, the capitulary vicars, even when the episcopal see is not yet vacant. Not to allude to other points, do not these laws authorize the prefects themselves to name, for the office of bishops, men who are not Catholics, while conferring upon them the administration of ecclesiastical property destined for the maintenance of the clergy and of the churches? You know, unhappily but too well, venerable brethren, the prejudice to established rights, the vexations, and the evil treatment which these laws and their execution have occasioned. We will say no more on this subject, in order that we may not increase the general grief in recalling these sad events.

But we are unable to keep silence on the afflictions which have befallen the dioceses of Posen-Gnesen and Paderborn. Our venerable brethren Miclas, Archbishop of Posen and Gnesen, and Conrad, Bishop of Paderborn, after having been thrown into prison and arraigned before the lay courts of law, have, moreover, with the utmost injustice, been deposed from their episcopal sees, and deprived of their jurisdiction. Moreover, their dioceses have been robbed of the holy direction of their excellent pastors, and are plunged into an abyss of misery and calamities. Truly, we who recall the words of our Lord, instead of pitying, must rather praise those venerable brethren whom we have just named: "Happy, indeed, shall you be when men shall hate you, when they shall cast you out, speak injuriously of you, and cast out your name as evil, for the sake of the Son of Man." St. Luke vi. 22: "Blessed shall you be when men shall hate you, and when they shall separate you, and shall reproach you, and cast out your name as evil for the Son of Man's sake."

Those venerable brethren have feared neither the imminent danger, nor the penalties with which these laws threaten them. Not only have they defended the rights of the Church and caused her prescriptions to be respected, but they have also esteemed it an honor, like the other pastors of your country, to be the victims of an unjust judgment, and to suffer themselves to be visited with penalties reserved only for the guilty. They have thus afforded a most brilliant example of virtue, and are a subject of edification for the whole Church.

Although brilliant panegyrics are their due rather than tears of compassion, nevertheless the degradation of the episcopal dignity, the blow aimed at the liberty and rights of the Church, the persecutions of which the bishops we have named, as well as all

their brethren, are the victims, require that we, by virtue of our Apostolic power given by God, raise our accusing voice against these laws, and against the evil deeds they have committed, and are still bent on committing, and that we defend against impious force, with our utmost energy and divine authority, the liberty of the Church thus trampled under foot.

In fulfillment of the duties of this Apostolic See, we declare publicly by this present encyclical, to all those whom it may concern, *as well as to the whole Catholic world*, that these laws are null and void, because they are entirely contrary to the divine constitution of the Church. For it is not to the great ones of the earth that the Lord has subjected the bishops of his Church in what relates to his holy service, but to Peter, to whom he has intrusted his lambs and his sheep (St. John xxi. 18, 17). It is for this reason that no temporal power, however exalted it may be, has the right to deprive of their episcopal dignity those who have been nominated by the Holy Spirit to rule in the Church (Acts of the Apostles, xx. 28).

To this melancholy posture of affairs must yet be added the following fact, unworthy of a noble nation, and which, we may believe, will be criticised severely, even by men who are not Catholics, but merely impartial. These laws are excessively severe, and threaten with the heaviest penalties those who do not obey them; they are violent, and place peaceable and inoffensive citizens in the unfortunate position of men oppressed by force against which they are not able to struggle, solely because their consciences require them to oppose these laws. One would say they were made, not for free citizens, of whom only a reasonable obedience has the right to be exacted, but for slaves who are made to obey by terror.

After what we have just said, believe not that they are to be excused who through fear obey men rather than God; but above all will those sacrilegious men be criminal who dare to take possession of the churches and exercise the ministry, depending wholly on the protection of the secular arm. These will not escape the justice of God. On the contrary, we pronounce that all these sacrilegious men, and all those who in future shall commit a like crime by usurping an ecclesiastical mission, will be, by virtue of the sacred canons, visited, in fact and of right, with the greater excommunication. We exhort all the pious faithful not to assist at the Holy Sacrifice celebrated by these men, nor to receive the Sacraments at their hands, also to avoid their society and conversation, in order that the bad leaven may not spoil the good dough.

In the midst of these tribulations your intrepidity and your perseverance have brought great consolation to our grief. The rest of the clergy and the faithful have imitated you, venerable brethren, in the terrible struggle to which they are committed. Their firmness in maintaining Catholic rights and duties is so noble, the conduct of each is so worthy of all praise, that they have attracted the attention of all, even of those the most remote, and have provoked their admiration. Could it be otherwise? Great, as is the misfortune of soldiers who have lost their chief, is the glory of the bishop who sets an example of faith to his brethren.

Why cannot we procure you some alleviation in your sufferings! But in renewing and affirming anew your protest against whatever is contrary to the constitution of the Divine Church and her rights, and against the force which has been so unjustly used toward you, we assure you that our counsels and our instructions, adapted to circumstances, shall never fail you.

Would that those who are your enemies knew that you do no wrong to the royal authority, and that you prejudice it in no degree when you refuse to give to Cæsar that which belongs to God! *God is to be obeyed rather than men.*

Let them know, at the same time, that every one of you is ready to pay his tribute to Cæsar, and to obey him in all that belongs to the civil power, not through force, but at the dictates of your conscience. Have courage, then, and continue, as you have done, to fulfill the two duties, and to obey the divine laws, for your merit will be great because you will have patience, and will not be weary of suffering for the name of Jesus Christ.

Look to him who has gone before you in much greater tribulations, and who submitted himself to the penalty of a death full of outrages, in order that they who believe in him may learn to flee from the favors of this world, not to shrink from terrors, to love tribulations through love of the truth, to fear and avoid the pleasures of the world.

It is He who has arrayed you in the line of battle, who will also vouchsafe to you the necessary strength for the combat. In him rests our hope. We submit to his will, and implore his mercy. You perceive that what He foretold has come to pass. Have confidence, then. He will vouchsafe to give you all He has promised: "In the world ye shall have tribulation, but I have overcome the world."

Believing in this victory, we humbly implore the Holy Spirit to bestow upon you peace and grace. As a proof of our special affection we bestow upon you with all our heart, as well as all the clergy and laity intrusted to your keeping, our Apostolic benediction.

Given at Rome, the 5th February of the year 1875, and in the twenty-ninth of our pontificate.

PIUS, P. P. IX.

A circular dispatch of Prince Bismarck dated May 14, 1872, on the election of the next Pope, made public about this time, speaking of the Vatican Council and its enactments regarding the infallibility and jurisdiction of the Pope, declared:

By these enactments the Pope is enabled everywhere to exercise episcopal rights and substitute his own authority for that of the local bishop. The episcopal jurisdiction has been completely superseded by direct Papal authority. The Pope no longer reserves to himself certain specified rights, as formerly, but all episcopal rights have been transferred to him. He has replaced the Bishops Principal, and it solely depends upon him practically to assume the functions of any of the local bishops, not excluding those affecting the relations of that bishop to his Government. The bishops henceforth are only the tools and wholly irresponsible employés of the Pope. They have become the officials of a foreign sovereign, and that a sovereign who, by dint of his infallibility, is a more absolute monarch than any other monarch in the world.

This drew from the German bishops a protest, signed in January and February, in which they say:

All these assertions are utterly devoid of foundation, being at variance with the wording of the Vatican enactments, as well as with the meaning of the same, such as it had been repeatedly interpreted by the Pope, the Episcopacy, and the acknowledged representatives of Catholic theological erudition. In accordance with those enactments, the Papal jurisdiction is indeed a *potestas suprema ordinaria et immediata*—a supreme official power, conferred upon the Pope by Jesus Christ, the Son of God, through Saint Peter, and extending to the whole of the Church and each individual diocese, that unity of faith, ecclesiastical discipline and government may be duly upheld. The Papal power, it is true, then, is no power confined to certain specified rights reserved by the Pope. But this is no new doctrine. On the contrary, it is a doctrine which has always been a recognized doctrine of the Catholic faith. A

well-known principle of canon law, a truth which the Vatican Council, opposing the Gallican, Jansenist, and Febronian heresies, has only confirmed and explained in accordance with the verdicts of preceding councils. In virtue of this doctrine the Pope is Bishop of Rome, not bishop of any other city or diocese, not Bishop of Cologne, Breslau, etc. But in his capacity as Bishop of Rome he is Pope—that is, Archbishop and Supreme Head of the whole Church, chief of all bishops and all the faithful believers, and his papal authority, far from being restricted to certain exceptional cases, is always and everywhere in full force. It is the duty of the Pope to control the action of the bishops, and if any bishop should be prevented from attending to the function of his office, or if any other exigency should require it, the Pope is both entitled and obliged, not as bishop of the respective dioceses, but as Pope, to issue any orders necessary for the proper administration of such dioceses. His Papal rights have been recognized by all European states as belonging to the system of the Catholic Church, and whenever any European Government had occasion to enter into negotiations with the Pope it has acknowledged him as the chief of the entire Catholic Church, including both bishops and believers, and he never has been regarded by any European Government as only the owner of certain specified and reserved rights. There is, further, absolutely nothing in the enactments of the Vatican Council to justify the assertion that the Pope has in consequence of these enactments become an absolute sovereign, and thus a sovereign more absolute than any other monarch in the world. In the first place, the field over which the ecclesiastical authority of the Pope extends is distinct from that swayed by the temporal power of a monarch, nor do Catholics deny the sovereignty of monarchs in regard to secular affairs. But, independently of this, the designation of a Pope as absolute monarch is inadmissible, even with reference to the field allotted to him, because the Pope acts under the law divine, and is bound to adhere to the ordinances laid down by Christ for his Church. The Pope cannot change the divinely-ordained constitution of the Church, though the secular legislator may be able to remodel the political arrangements intrusted to his keeping. The constitution of the Church in all its essential points is based upon the direct injunctions of the Divinity, and exempt from all arbitrary experiments of mankind. The same divine regulations which created the Pope created the bishops likewise—the bishops to have their own peculiar rights and duties, allotted to them by God himself, to modify which the Pope has neither the right nor the power. Hence it is a glaring mistake to assume the Vatican enactments to have superseded episcopal authority by Papal power, and to have replaced by the Pope the bishops, who are henceforth only his tools and employés, without any personal responsibility. Under the eternal doctrine of the Catholic Church, it has been expressly declared by the Vatican Council that the bishops are no tools of the Pope, no mere Papal employés without personal responsibility, but pastors appointed by the Holy Ghost to represent the Apostles; to govern, as good shepherds, the flocks intrusted to them. In the eighteenth century of Christian ecclesiastical history, the Papacy has been placed over and by the side of the Episcopacy, both being divinely instituted by Christ; so it will be also in the future. The Pope's ancient right of exercising his power of ecclesiastical government in any part of the Catholic world has never made episcopal authority illusory, nor is the new interpretation of this old Catholic principle calculated to raise apprehensions in this respect as to the future. It is universally known that the dioceses of the Catholic world have since the Vatican Council been directed and governed by their bishops in exactly the same manner as before that date. We especially protest against the state-

ment that the bishops, in consequence of the Vatican enactments, have become Papal employes without personal responsibility, and we beg to observe that it is not the Catholic Church which acknowledges the immoral and despotic principle that the command of a superior officer relieves the subordinate from personal responsibility. As to the opinion that the Pope, by means of infallibility, has become an absolute sovereign, it is based upon an entirely erroneous conception of the dogma of infallibility; as the Vatican Council has clearly and unmistakably pronounced papal infallibility, in accordance with the nature of things, confined to the field belonging to the doctrinal authority of the Church, and is restricted by Holy Writ, tradition, and previous decisions of the Church. The action of the Pope in governing the Church has in no way been altered by the enactment of papal infallibility. The opinion that the relations of the Pope to the Episcopacy have been changed by the Vatican Council being entirely indefensible, so the conclusion drawn from these premises that the Pope has assumed a novel position toward the governments is equally groundless. We cannot restrain ourselves from expressing the deepest regret that in the above circular dispatch the German Imperial Chancellery should have advanced opinions founded upon the assertions and conjectures of Protestant scholars and some former Catholics rebelling against the whole legitimate episcopal authority vested in the Holy See. These assertions and conjectures have been repeatedly and emphatically contradicted and refuted by the Pope, the bishops, and Catholic theologians and canonists, as the legitimate representatives of the Catholic Church. In our respective dioceses we have the right to demand that, if the principles and doctrines of our Church are to be discussed in this wise, our opinion be taken too, and that, so long as we regulate our conduct by these principles and doctrines, our words be credited. In thus correcting the erroneous version of the Catholic doctrine contained in the circular dispatch of the Prince-Chancellor, we have no wish to enter upon what is foreshadowed in that dispatch concerning the election of the next Pope. Still, we feel it our duty to protest solemnly against the attempt made to interfere with the independent election of the chief of the Catholic Church, and we declare that the validity of any Papal election can be decided only by the Church, to whose authority every Catholic will unconditionally submit, in Germany as anywhere else.—Dated January and February, 1875.

Here follow the signatures of the German bishops.

The Pope, in his Allocution of March 15th, noticed this attempt at Government interference with the election of his successor, and praised the course of the German bishops.

Finding that the Catholic episcopate and clergy did not yield, the German Government, on March 4th, introduced a law to deprive the bishops and priests of the allowance paid them by the state in consideration of the church property assumed by the state in 1803. The Catholic bishops, on the 2d of April, addressed a petition to the Emperor, remonstrating against the law. The ministry replied April 9th, charging the bishops repeatedly with falsehood. To this the bishops rejoined on the 30th, defending their course.

The action of the Government, severe in itself, was, as Catholics complained, increased by the wanton insolence and oppression of petty officers, acting without authority, as in seizing the chalice from the altar during mass at Dreihäusen, and in insulting conduct at a con-

vent at Cologne. The prohibition of pilgrimages and processions tended still more to embitter the feelings of Catholics.

A Catholic Congress of Germany met at Freiburg, September 1st, to which the Pope addressed a brief, dated August 14th, encouraging them to fortitude.

In Switzerland, the same policy prevailed. The state recognized the Old Catholics and expelled the Catholic clergy and religious. The Cathedral of Berne was taken from the Catholics January 28th, the Church of Notre-Dame, Geneva, June 4th, and both given to the Old Catholics. Priests were exiled, and on September 24th the last of the Sisters of Charity were expelled from Geneva. On the 23d of March the Pope addressed an encyclical to the Swiss bishops:

To our Venerable Brothers and Bishops, and to our dear Sons the Priests, and the Faithful of Switzerland in communion with the Apostolic See.

VENERABLE BROTHERS AND DEAR SONS, HEALTH AND APOSTOLIC BLESSING: The serious and prolonged efforts and snares which the new heretics, who call themselves Old Catholics, continue daily to multiply in Switzerland, in order to deceive the faithful people, and to tear them away from the faith of their ancestors, demand from us, according to the extent of our Apostolic charge, particular solicitude and care to preserve the spiritual interests of our sons. We know well, venerable brothers, and we deplore in the bitterness of our hearts, how these schismatics and heretics, profiting by the schismatic laws which keep under public oppression the religious liberty of Catholics in the Diocese of Basle and in other parts of the country, exercise, under the protection of the civil authority, the ministry of their condemned sect, cause forcible possession of parishes and churches to be taken by apostate priests, and spare neither frauds nor artifices to draw away miserably into schism the children of the Catholic Church. But, as deceit and trickery have always been the characteristics of heresy and schism, we must include these sons of darkness with those to whom the prophet has said, "Woe to the traitor sons who put their confidence in the darkness of Egypt; you have rejected the word and put your confidence in calumny and tumult."

They have no other desire but to deceive and to lead away into error, by their hypocrisy and dissimulation, those who are without distrust; and they say openly that they are far from rejecting the Catholic Church and its visible chief. They even affirm that they hold to the purity of the Catholic doctrine; that they are the inheritors of the faith and the only true Catholics, even while in reality they refuse to recognize all the Divine prerogatives of the Vicar of Jesus Christ upon earth, and to obey his supreme jurisdiction. We even know that, in order to spread more widely their heretical doctrines, many of them have undertaken to give instruction on sacred theology in the University of Berne, in the hope of gaining by this means some of the Catholic youth to their condemned faction. Already we have reprovved and denounced this deplorable sect who have taken from the arsenal of ancient heresies so many errors contradicting the chief principles of the Catholic faith; they attack the very foundations of the Catholic religion; they audaciously reject the dogmatic definitions of the Council of the Vatican, and in every way they work for the ruin of souls.

By our letters of the 21st November, 1873, we have published and declared that these miserable sectaries, as well as their partisans and supporters, are sepa-

rated from the communion of the Church, and should be regarded as schismatics.

We publicly renew this day this declaration, and we believe that it is our duty, venerable brothers, to exhort you to employ all your zeal, already so well tried, and all that courage which you have already displayed with so much effect in your struggles for the cause of God, and all the means in your power, in order to preserve to the souls committed to your charge unity of faith, and to remind them without cessation that they should keep away from those dangerous enemies of the flock of Christ and from their poisonous pasturage. Let them keep away from their religious ceremonies, from their instructions, from those treacherous pulpits which they have the hardihood to set up in order to betray sacred doctrines, from their writings, and from their contact. Let them have no intercourse and no relations whatever with the intruded priests and the apostates who dare to exercise the functions of the ecclesiastical ministry, and who are absolutely without any legitimate jurisdiction of mission. Let them hold such in horror as strangers and robbers, who come only to steal, and to assassinate, and to destroy.

The sons of the Church should believe that this line of conduct is enjoined to them in order that they may preserve the precious treasure of faith, without which it is impossible to please God, and that they may by the straight road of justice arrive one day at the end of faith, which is the salvation of good souls.

We are also aware that in those countries the civil authority, not content with having passed several laws contrary to the divine constitution and authority of the Church, have also framed edicts opposed to the canonical prescriptions concerning Christian marriage, which entirely do away with ecclesiastical authority and jurisdiction.

Therefore, we strenuously exhort you, venerable brethren, to explain to your faithful, by suitable instructions, the Catholic doctrine concerning Christian marriage, and to recall to them what we have frequently said respecting this sacrament in our letters and our Apostolic allocutions, particularly in those of the 9th and 27th of September, 1852. By this means they will better understand the holiness and virtue of this sacrament, and by piously conforming to the canonical laws upon this matter they will avoid those evils which fall upon families and upon human society, when the holiness of marriage is despoised. As for you, our beloved sons, the pastors and priests who have not only the charge of sanctifying yourselves, but also of saving and of sanctifying others, we trust in the Lord that in the midst of the snares of the wicked, and the dangers that menace you, you will, faithful to the piety and zeal of which you have given so many striking proofs, continue to afford to your bishops great consolation and powerful aid. Under their direction you will labor with courage and determination in the cause of God, of the Church, and of the salvation of souls. You will sustain the courage of the faithful, you will remedy the weakness of those who waver, and you will obtain day by day a greater increase of those merits which your patience, your priestly constancy, and your courage, will acquire for you in the sight of God. Heavy is the burden of trials to be borne by the ministers of Christ; but our confidence is in him who has overcome the world, who sustains those who labor in his name, and who reserves for them in heaven an imperishable crown of glory.

And you, beloved sons, the faithful of all Switzerland, we address to you the expression of our paternal solicitude for your salvation. You all know what is the value of the Catholic faith which God has intrusted to you. Do not spare either pains or labor to guard faithfully this precious gift, and to preserve intact and entire the glory of the ancient religion which you have received from your ancestors. Therefore, we earnestly recommend you to remain

closely attached to your legitimate pastors, who have received a lawful mission from this Apostolic See, and who watch over your souls for whom they will have to render an account to God.

Have ever before your eyes these words of eternal truth: "He who is not with me is against me; he who does not gather with me scattereth." Be faithful to this doctrine; love his yoke, so full of sweetness. Drive far from you with horror those of whom our Redeemer has said, "Beware of the false prophets who come to you in the clothing of sheep, but who are ravening wolves." Resist courageously in the faith the ancient enemy of the human race, "until the right hand of Almighty God shall break in pieces all those arms of the demons to whom it is permitted to dare anything, so that the victory of the faithful of Christ shall be more manifest, because there where truth is mistress divine consolation is never wanting.—*S. Leo.*

We have thought it well to write these things to you, venerable brothers and dear sons, in order to fulfill the duty of our supreme charge, which obliges us to save from all danger of error the whole flock of Christ, and to defend its safety and the unity of the faith and of the Church. But as every perfect gift comes down from above, from the Father of light, we earnestly implore him to sustain your strength in the struggle, and to cover you with the eagle of his protection. May He deign to bestow a look of propitiation upon your country, and may error and impiety disappear from it, so that it may, in peace and repose, enjoy truth and justice! Neither do we forget to implore heavenly light for those poor wanderers, so that they may cease to amass upon their heads treasures of wrath for the day of wrath and of the revelation of the just judgment of God, and that, turning from the error of their life, they may, while there is yet time, make a sincere repentance.

Join your fervent prayers to ours, venerable brothers and dear sons, so that we may obtain the timely help of Divine grace and mercy, and receive the Apostolic benediction that we, with all love, and in the Lord, accord from the bottom of our heart to each and all of you, as an assurance of our particular affection.

Given at Rome the 23d day of March, 1875, in the twenty-ninth year of our pontificate.

PIUS IX., Pope.

The Catholic bishops of Switzerland met at Fribourg on the 28th of April to concert measures for the crisis.

In Russia great severities had been practised to compel the members of the United Greek Church to join the Established Church of the Empire. An excommunicated priest named Popiel was appointed by the Government to administer the Catholic diocese of Chelm during a vacancy. Clergymen of the Established Church were then placed in the churches, and refusal to attend severely punished. A widespread trouble ensued, and the harshest steps were taken by the Government: four hundred Catholic priests were exiled to Siberia between 1872 and 1875, of whom, in the last year, only one hundred survived, and collections were made in Europe to save them. The severities were noticed in the diplomatic correspondence of the American minister. Some leniency may be shown toward the close of the year.

In the rest of Europe there were few important events. A council of all the Catholic bishops of Ireland met at Maynooth in September; a Catholic Congress at San Gaetano.

Florence, in the same month. The year of the Jubilee led to increased devotion, manifested in pilgrimages, processions, and the frequentation of churches; but this excited hostility in some parts, notably in Belgium, where Liberal mobs attacked the *Corpus Christi* processions in Brussels, Ghent, and Antwerp.

In America, the stringent school law in the province of New Brunswick continued to excite strong feeling among Catholics, at whom it was aimed, and in January trouble took place at Caraquet, in which blood was shed; a Catholic religious procession was attacked while going from one church to another in Toronto, in September. The famous Guibord case, in which the *Institut Canadien*, after being defeated in the Dominion courts, appealed to the Privy Council in England, was decided by that tribunal, which declared that a Catholic bishop can excommunicate only individuals, and not a class of persons holding heterodox views. The *fabrique* of Montreal was ordered to allow the burial, which took place November 16th. An excitement was caused by an ejectment suit brought by the Sulpicians of Montreal to remove a Protestant chapel erected without authority on their grounds at Oka, near the Lake of the Two Mountains.

In the United States hostility to the Catholic Church was shown in New Jersey, which refused to permit Catholic inmates of penal and eleemosynary institutions to attend the worship of their own church; and in Ohio, where a law granting the liberty was repealed, although New York and Massachusetts granted it. An act called the "Gray Nuns Act," passed May 15, 1875, in New York, though virtually repealed June 9, 1875, excited sectarian action, and was formally repealed. Constitutional amendments in New Jersey provided for taxing church property and for preventing any denomination from obtaining any portion of the school-funds. The President, in a speech at Des Moines, September 30th, foreshadowed the anti-Catholic agitation as part of the next presidential campaign, and in his message more definitely brought it forward, by recommending a constitutional amendment vesting the direction of the public schools in the Federal Government, and prohibiting all religious or irreligious instruction, and also recommending the taxation of church property. The removal of Chief-Justice Duane, of Arizona, for delivering a lecture espousing the Catholic view of the question, took place soon after, December 11th.

Complaints were made by the Osage and Pueblo Catholic Indians, of interference with their religious rights, and a "Ladies' Catholic Indian Mission Association," the first of the kind in the United States, was formed at Washington, D. C., October 28th.

Mexico pursued a course of hostility, expelling even the Sisters of Charity, many of whom arrived early in the year in California and Texas. On the 19th of March, the archbishops of the republic issued a pastoral, pro-

testing against the laws of December 10th-14th, 1874. The affixing of placards at Acapulco reflecting on the Catholic religion led to scenes of violence among the populace and an attack on a Protestant church. The trial of the murderers of the Rev. Mr. Stephens, killed in 1874, resulted in the punishment of several of the guilty, but neither in that case nor at Acapulco was any complicity or instigation proved against the Catholic clergy, as appears by the correspondence of the Mexican Government and the American minister.

In Brazil, the administrator of Olinda was arrested in May, and Canon Andrade, his successor protested against the Government action as illegal. The agitation throughout the country led to the overthrow of the ministry and the formation of a new ministry under Caixias. The result was, the release of the two imprisoned bishops on September 20th. The Bishop of Olinda proceeded to Rome, and a special envoy was sent to the Pope, leading to an arrangement by which the interdict on the chapels was removed.

In Buenos Ayres the recall of the Jesuits by the bishop, who confided to them the direction of a college, led to a Liberal outbreak. The college was attacked and in part demolished, and several of the Jesuits killed or wounded.

Persia, in May, granted religious freedom to Catholics, and in China reparation was made for violence done to Catholic missions.

Among the losses of the Catholic churches was Dom Gueranger, Abbot of Solesmes, the reviver of the Benedictines in France, author of "The Liturgical Year," "Origins of the Roman Church," "The Pontifical Monarchy," etc., who died at his Abbey of Solesmes, January 30, 1875. The Pope, to honor so illustrious a man, conferred special privileges on the abbots of that house.

On the 18th of April, Brother Olympe, Superior of the Christian Brothers, died.

Five cardinals died during the year: Cardinal Barili, March 8th; Cardinal Mathieu, July 5th; Cardinal Grassellini, September; Cardinal di Silvestri, November 24th; Cardinal Rauscher, November 26th.

ROOSEVELT, Judge JAMES I., was born in New York City December 14, 1795, and died at his residence in that city April 5, 1875. He was a distinguished member of one of the oldest families in the city. In 1812 he entered the Freshman Class of Columbia College. He was graduated in 1815, and entered the office of Peter Jay, with whom he studied law. He was admitted to the bar in 1818, and became Mr. Jay's partner. The same year Mr. Jay was elected to the Legislature, and all the business of the firm devolved upon the junior partner. Mr. Roosevelt followed his profession until 1830. During his professional career he applied himself more particularly to questions relating to chancery practice. He early identified himself with the Democratic party, and was for a time the treasurer of the Tam-

many General Committee. In 1828 he was elected to the Common Council, and was re-elected in 1830. At the close of his term, being much exhausted, he temporarily retired from professional life, and went upon a European tour. While in Madrid he became engaged to the daughter of General Van Ness, then American minister to Spain. In 1831 he returned and resumed the practice of law. Soon afterward he was appointed Commissioner of the Almshouse and other public charitable institutions of the city. In 1835 he was elected to the Legislature, and again in 1840. In 1841 he was elected to Congress. He was one of President Tyler's select committee. At the close of his congressional term in 1843, he was tendered a renomination, but declined. He then took a second tour to Europe, where he remained for a year, studying foreign law in the courts of England, France, and Holland. In 1851 he accepted the nomination for Justice of the Supreme Court in the New York district, to which he was elected by a large majority. He filled this responsible position for eight years, and during one year occupied, *ex officio*, a seat in the Court of Appeals. At the close of his judicial career he was requested by President Buchanan to accept the office of United States Attorney for the Southern District of New York, and at the close of President Buchanan's Administration he resigned and retired to private life.

RUBEN, CHRISTOPH, a German painter, born in 1805; died July 8, 1875. He visited the Art Academy of Düsseldorf, and went with Cornelius to Munich. In 1841 he was appointed a teacher in the Academy of Prague, and in 1852 director of the Academy of Vienna, which position he retained up to his death. Among his best works is "Columbus discovering the New World." He also used the subjects of German tales for his paintings. The paintings in the Belvedere, in Prague, representing various scenes from Bohemian history, were also among his best works.

RÜCKERT, HEINRICH, a German historian, eldest son of the celebrated poet Friedrich Rückert, born February 14, 1823; died September 11, 1875. He studied history and philology in Erlangen, Bonn, and Berlin, was appointed Privatdocent in the University of Jena in 1845, and Professor of German Archaeology in the University of Breslau, in which position he remained up to his death. He wrote: "Annalen der deutschen Geschichte" (3 vols., 1850; revised edition, 1861); "Geschichte des Mittelalters" (1852); "Deutsche Literaturgeschichte in der Zeit des Ueberganges aus dem Heidenthum in das Christenthum" (2 vols., 1853-'54); "Leben des heiligen Ludwig, Landgrafen von Thüringen" (1850); "Der Welsche Gast" (1851); "Marienleben des Bruders Philip vom Kartäuserorden" (1853); "Lohen-grin" (1857).

RUSSIA (Empire of all the Russias), an empire in Europe and Asia. Emperor, Alexan-

der II., born April 17 (April 29, new style), 1818; succeeded his father, February 13 (March 2), 1855; crowned at Moscow, August 26 (September 7), 1856. Son of the Emperor: Heir-apparent, Grand-duke Alexander, born February 26 (March 10), 1845; married November 4, 1866, to Maria Dagmar (born November 26, 1847), daughter of King Christian IX., of Denmark. (Offspring of the union are two sons: Nicholas, born May 6, 1868; and George, born April 28, 1871.)

The area and population of the great divisions of the Russian Empire were, according to the latest dates, as follows:

The annexation of Khokan, which was com-
pleted in the early part of 1876, added 28,270
square miles and 800,000 inhabitants to the
Russian Empire.

The Russian Government is more determined
than ever to spread the Russian language and
Russian institutions over the whole of the em-

pire. An instruction, issued in May to the
officials of Orenburg, describes with much detail
the policy of the Government in this matter.
The above district comprises the provinces of
Perm, Ufa, and Orenburg, whose inhabitants
are mostly of Asiatic origin, there being up-
ward of two millions of Bashkirs, Kirgheez,
Mordvins, Tchouvassches, Tcheremisses, etc.,
nearly all either Mohammedans or pagans.
The Government directs that by means of the
schools "the various parts of the empire shall
be so unified that all may be penetrated with
the same ideas and feelings toward the state,
and that the principles hostile to the Russian
Empire, which are based on the blindness of
ignorance or on obstinate isolation, may totally
disappear." The chief object of the schools in
districts inhabited by non-Russian nationalities
is "to prevent those who are not Russians
from giving themselves up to the dangerous
isolation of narrow national tendencies and to
religious intolerance; in a word, to convert an
inaccessible and reserved mass of people into
citizens of the Russian state, with a warm
sympathy for its interests." There is to be no
compulsion as to the abandonment of religious
doctrines or national peculiarities; but the
Government considers it has an "undoubted
right" to require a knowledge of Russian from
all its subjects; "Russian must become not
only an object of study, but a means of study."

The official estimate of revenue and expendi-
ture for the years 1875-'76 is as follows (value
expressed in rubles, one ruble = \$0.772):

YEARS.	Revenue.	Expenditure.	Surplus.
1875.....	559,361,198	554,106,410	3,255,788
1876.....	570,188,308	570,032,188	66,170

The public debt of Russia, on January 1,
1875, amounted to 2,409,579,986 rubles. This
sum includes advances made to railroad com-
panies, to cities, and other corporations, to the
amount of 634,489,942 rubles. Deducting this
amount, the real public debt would be 1,775,-
090,044 rubles.

The movement of commerce in the years
1872 and 1873 was as follows (expressed in
thousands of rubles):

COUNTRIES.	IMPORTS.		EXPORTS.	
	1872.	1873.	1872.	1873.
Germany.....	171,823	167,013	77,319	109,991

The length of railroads in operation on January 1, 1874, amounted to 18,796 kilometres. At the close of the year 1872 the telegraph-lines in operation had an aggregate length of 78,078 kilometres, while the length of wire was 155,444 kilometres.

The Russian Ministry of Communications has ordered an inquiry to be made into the canal system of the empire, with the view of increasing its utility for public traffic. At present, the Baltic Sea is placed in direct communication with the Caspian by means of three canals, all debouching into the Volga—the Vyshne Volotchsk, the Tishyin, and the Maria Canal, which is the largest of the three. The lakes of Ladoga and Ilmen, on which navigation is dangerous, owing to the prevalence of sudden squalls, are surrounded by canals, and it is possible to proceed from the White Sea to the Baltic by means of a canal connecting it with the Dwina, and to the Caspian by another canal, which connects it with the Sheksna, a branch of the Volga. There are canals between affluents of the Dwina and the Kama, which facilitate direct communication between the White Sea and the Caspian; and the Duna and Dnieper, the Vistula and the Niemen, etc., are also connected by canals. Most of these canals, however, have so deteriorated in the course of time, that few of them are used, except the Maria Canal. The Government has decided to take the necessary steps for this purpose as soon as the inquiry is completed.

The operations of the Russians in Central Asia were, in 1875, of more than usual importance. An insurrection, which in July broke out against the Khan of Khokan, soon assumed the character of a Mohammedan war against the Russians, in which both parties of the khanate population, the settled (Sartes), and

the nomads (Kirgheez and Kiptchaks), took part. An invasion of the Russian territory resulted in the defeat of the invaders, the march of the Russians into the khanate, the occupation of the city of Khokan, and the occupation of a part* of the khanate to the Russian dominions. (*See KHOKAN.*)

The Khans of Bokhara and Khiva continued throughout the year in peaceful submission to the Russian rule. An important expedition, under the command of Colonel Ivanoff, was sent, in January, against the Toorkoman tribes which inhabit the country inclosed by the Caspian and Aral Seas, the Amoo Darya, Afghanistan, and Persia. Most of these tribes are tributaries of Khiva, and the Russian expedition was undertaken under the pretext of punishing them for their insurrection against the Khan of Khiva. The Russian newspapers extol the brilliant manner in which the campaign was conducted, and the remarkable results which it has produced. According to the accounts given by the Russian papers, the detachment under Colonel Ivanoff, consisting of 1,500 men, crossed the Amoo Darya on the 17th of January, and directed its course toward Kooni-Oorgentch. Before setting out, Colonel Ivanoff sent a proclamation to all the Toorkoman tribes, demanding instant submission; then, after causing rumors to be circulated that he intended to march to Kizib-Tasleer, he advanced thirty-three versts in that direction and bivouacked on the banks of an irrigation canal under the walls of Kooni-Oorgentch. The next morning at daybreak the army approached the town, but instead of continuing its march southward, it turned suddenly aside toward the northwest, passed through the town, and surprised the encampments of the Kool-Yomoods, eight versts from it. So unexpected was the attack that not a single tent had been struck. The tribe, possessing 1,000 tents, was considered the most refractory one of all; it having pillaged a Persian caravan in 1874, and attacked the Khivan officials sent to demand its submission. For this reason Colonel Ivanoff determined to strike terror into the hearts of the rest of the Toorkoman tribes by punishing this one severely, and, dividing his army

* In the early part of 1876 the whole of the khanate was annexed to Russia, and organized as a Russian province.

into two detachments, he dispatched one, consisting of 150 Cossacks, to burn all the encampments situated within a radius of four miles of the Russian camp at Boyoodor, while he, with the main body, ravaged the rest of the country belonging to those nomads. Out of the 1,000 tents, only two were spared, because their owners had befriended the Russians while on the march to Khiva. The cattle were confiscated, and the poor wretches were left with only their lives. The news of the punishment inflicted on the Kool-Yomoods spread rapidly among the neighboring nomads. Colonel Ivanoff again sent warnings to the Toorkoman chiefs, and then, to give them time to reflect, marched southward to Ak-Kala. The inhabitants of Kooni-Oorgentch, delighted at the punishment inflicted on the Kool-Yomoods, furnished fuel and forage at extremely moderate prices. While the troops were stationed at Ak-Kala, the Khan of Khiva sent a letter to Colonel Ivanoff, thanking him for what he had done, and announcing that all the Toorkomans seemed inclined to submit, with the exception of the Yomoods of Kazavat, who were still hesitating which side they should take. He also offered to place himself at the head of his Oozbecks and join the expedition if the Russian commander judged it necessary, but Ivanoff refused to allow him to do so. He said he was quite able to punish the Toorkomans without any assistance from the Khan, and advised him to make a lasting peace with the nomads as soon as possible, as Russia could not always be sending soldiers to fight his battles for him. In June a new expedition, about 1,000 strong, left Krasnovodsk, on the Caspian Sea, under the command of General Lomakin. Having reached the wells of Igda, in the steppe between the Caspian and the Amoo-Darya, General Lomakin received some Toorkoman chiefs from the south, among them Budai Verdi Khan, brother of Kaushit Khan, the head chief of the Merv Toorkomans. These guests assured the general that, though their tribes had been formerly hostile to Russia, they were now animated by feelings of friendship and sympathy. The general then ordered a small detachment to escort the engineers and other scientific members of the expedition along the ancient bed of the Amoo-Darya to Sary Kamish, where they were met by about fifty Khivese troopers, the main force retracing its steps and proceeding farther south to visit the Russian possessions on the Lower Attreck. The reconnoitring party which left for Sary Kamish arrived safely at the Toharyshli Wells, situated 150 versts in a northwesterly direction, where the principal chiefs of the Teking tribes declared to General Lomakin that the Tekings had, in a special assembly, resolved to submit to Russia, and to surrender all the prisoners in their hands. The surrender of the latter was, accordingly, at once effected. The nomad tribes friendly to Russia now leave caravans unmolested, and have punished those

who had committed hostile acts against Russians. The expedition to the Attreck River, which has its mouth in the southeast corner of the Caspian Sea, and constitutes part of the frontier between Persia and Russia, did not start until August. Russian accounts of this expedition state that a detachment under the command of the chief of the Transcaspian Military District marched in the direction of Lakes Shairdy and Bugdailly, on the way to Tchikishliar, in the vicinity of the mouth of the Attreck. Another detachment proceeded thither by water, being conveyed by the Caspian Sea flotilla. Although two stretches of country, of 57 and 50½ versts respectively, had to be traversed without water, and with the thermometer ranging almost continually above 90°, the march of the first column was accomplished quickly, and without detriment to the health of the troops, each of the above distances being performed in less than twenty-four hours. In the neighborhood of the Shairdy and Bugdailly Lakes, the column met 3,000 Thibits, belonging to the nomadic Toorkoman tribes. A perfectly good understanding prevailed between them and the Russian troops, and no disturbance occurred. The Toorkomans informed General Lomakin that the Afghan Ishkan, who had arrived to incite the tribes to revolt against the Russians and the Persians, had found no adherents, and was finally killed. Other tribes on their passage sent delegates to General Lomakin, offering their services. The column remained ten days on the shores of Lake Bugdailly, and General Lomakin, with some other officers, visited the ruins of the ancient cities Mestorian and Meshed. The land in this district was exceedingly fertile, and the wheat-crop plentiful. Mestorian must apparently have been one of the largest cities of Central Asia. The march from Lake Bugdailly to Tchikishliar, a distance of 110 versts, was also most successfully accomplished. At the latter place, the column met a battalion of the Schirwan Regiment, which had already arrived by transport across the Caspian Sea. The inhabitants received the Russian troops in a most friendly manner. After a week's rest at Tchikishliar, the column started for Attreck and Lake Tchat, to explore the upper course of the Attreck.

The expedition to the Attreck produced a profound impression both in Russia and in England, for in both countries it was looked upon as a preparatory step for the occupation of Merv. This town is the headquarters of the Toorkomans hostile to Russia, and is looked upon as a point of the utmost military importance. It is on the caravan-road from Meshed to Khiva and Bokhara, and its possession by Russia would complete the subjection of Central Asia to Russia. A strong Russian force in Merv to the south of Khiva and Bokhara will find it comparatively easy to keep down extensive insurrections in the khanates, as

they would be completely encircled by the Russians. Merv was once one of the four imperial cities of Khorassan, and the capital of many of the Persian sultans, especially of the Seljook dynasty, but has in modern times greatly declined, especially since the beginning of the present century, when it was sacked by the Oozbecks. It now has only a population of 8,000, but in the hands of the Russians it cannot fail to become more flourishing than at any former period. The Russian papers, while clamoring for the occupation of Merv, disclaim any hostile intentions toward England, and argue that a pacification of the Toorkomans might prove as advantageous to England as to Russia. English statesmen and writers are fully agreed as to the importance which Merv will have for the Russians, though there is a difference of opinion as to whether it would involve a direct danger for the English interests. Sir Henry Rawlinson, in his work "The British in Asia" (London, 1875), thus sets forth the views of those English statesmen who believe that an occupation of Merv by the Russians would precipitate a crisis in the Central Asiatic question:

A scheme of territorial settlement is said to have been much discussed in influential quarters in the early part of the present year, by which it was thought the Toorkoman respite might be indefinitely prolonged, so as to remove all future cause of disagreement between England and Russia, so indeed as to restore peace permanently to Central Asia. According to this scheme, Russia was to declare her territory between the Caspian and the Aral to be bounded on the south by the old bed of the Oxus throughout its course, recognizing all the region beyond as the "Independent Toorkoman Steppe." Now it seemed incredible that Russia should voluntarily consent to a surrender of this nature, which would compromise the safety of the military and commercial lines that she had been at such pains to establish across the steppe; and would further necessitate a withdrawal from Petro-Alexandrovsk, which could not be permanently held without lateral support from the Caspian; but we were nevertheless assured that the project had been approved by the peace party in Russia, and that a moderate degree of pressure on the part of England was alone required to insure its adoption. That pressure certainly was not exerted, and the project, if it ever existed, except in the imagination of certain enthusiastic politicians, accordingly fell through. In its place we are now informed that the long-contemplated expedition against the Toorkomans is on the eve of accomplishment, a double column of attack having been organized, with instructions to advance simultaneously into the country of the Tekkehs from Chikishlar and the bay of Michaelofski, south of Krasnovodsk, and to commence serious operations against the nomads. By many, no doubt, this movement will be regarded as "the beginning of the end;" but for my own part, I venture to think that "the end is not yet." The present expedition may pave the way to important results, but time is required before anything serious can be accomplished. Large preparations indeed must be made, stores and supplies must be concentrated both to the east and the west; and above all, grave explanations must take place with England, and negotiations with Persia, before Russia can settle down in Merv, throw up intrenchments, found a colony, draw in populations, and directly threaten the Afghan frontier. What is proposed at present is probably to sweep up the Yomuts

and Goklands as the force marches to the eastward, and thus make a strong demonstration against the Tekkehs. The western division of this tribe, already more or less demoralized, is not likely to offer any sustained resistance—though desultory skirmishes may be expected to occur—and General Lomakia will accordingly be able, as he advances, to establish along the skirts of the hills a line of posts, connecting the advanced station at Kabriz—or possibly at Ashkabád—with the Russian base on the Caspian. At the extreme point to which the columns may penetrate, a fort will no doubt be erected, whence the same influences, both of conciliation and pressure, will be directed against the Tekkehs of Akhal and Merv, that have already been so successfully employed against their western brethren from Krasnovodsk and Chikishlar. Disunion will be introduced among the eastern Tekkehs as among the western; portions of the tribe will give in their allegiance, while the stubborn who elect to fight for their ancestral pastures will be denounced as rebels and marked down for future chastisement. But Russia will no doubt proceed in this matter with the same wariness and skill that have characterized her previous movements. The first expedition is always tentative. A second expedition will in all probability be organized next year, but even that effort may perhaps extend Russia's dominion no farther than Akhal, and a third expedition may thus be necessary before the great and crowning success be attained in the capture and occupation of Merv; the Oxus in the mean time, however, being thoroughly opened up to navigation, and regular communication being established by means of a line of wells and military posts between the Oxus and the Murgháb. This last-named precaution, indeed, is absolutely necessary with a view of connecting Petro-Alexandrovsk with Merv, and thus forming a continuous frontier; and it will not be less important both to the growth of Merv as a commercial emporium, and to its strength and stability as the extreme Russian post to the south, that there should be a thorough understanding with Persia, and a secure passage across the desert which intervenes between Merv and Serakhs.

If these auxiliary measures should be fully executed, and Merv, whose natural advantages are of the highest order, should thus, in due course of time, take rank with Samarcand and Tashkend as one of the bulwarks of the Russian position toward India, then, and not till then, would the danger of collision with England assume a tangible form. The Amir Shere Ali, has already foreseen under such circumstances that the eastern Tekkehs, together with the Saruk and Salor tribes, who encamp to the south of Merv, would be driven up the valley of the Murgháb, and be thus forced to take refuge across the border in the Afghan district of Badkheis, whence they would continue to raid and plunder as of their wont, throwing the whole frontier into confusion, and provoking pursuit and punishment. Retribution exacted from the Toorkomans on Afghan soil would inevitably lead to collision with Afghan subjects, with the Tamshidis and Tymuris especially, who guard the northwestern frontier, and any such aggression on Herat territory would be the sure prelude to our own interference. Putting aside, indeed, the obligation on our part to protect Afghanistan from invasion—an obligation which was indicated by Lord Derby in his very important speech of May, 1875—the mere fact of Russian troops being stationed in any considerable number at Merv—although drawn to that point in their legitimate pursuit of the Tekkehs, and detained there in order to hold the tribes permanently in check—would be fraught with such peril to our Indian interests that we could not remain passive, even if we wished. There is one point, indeed, the pivot of the whole Eastern question, which must never be lost sight of—we cannot afford to expose Herat to the risk of

being taken by a Russian *coup-de-main*. If the Russian force is sufficiently near to threaten the safety of the key of India, we must also have a British force sufficiently near to protect it.

All other questions relating to the Russian position in Central Asia are, as far as the British interests are concerned, of much inferior importance to the Toorkoman expedition and its results. At the present moment, indeed, it may be assumed that the attention of Russia is steadily turned in the direction of Merv and Herat, and that she will be mainly guided in her general Asiatic policy by considerations affecting this special question. Whether, for instance, the Khan of Khiva be continued in the nominal chiefship, or whether he be superseded by a Russian governor, will depend upon which arrangement promises best for the control of the Toorkoman tribes; and even the great engineering works, the ship-canal and railway between the Caspian and the Aral, which are about to be commenced, are probably regarded by Russia as of more value in strengthening her position on the Oxus, with a view to the occupation and restoration of Merv, than as improving the communications with Toorkistan. (See *PERSIA*.)

In May the Russian Government concluded a convention with Japan, by which the Japanese part of the island of Saghalien is ceded to Russia. Japan received in return the sole sovereignty over the Kurile Islands, eighteen in number. The La Peyrouse Strait is declared the boundary for the future between the two empires south of Saghalien, and the strait separating the northernmost Kurile island, Siur-nushia, from the promontory. Ropatsuka, in Kamtschatka, is to serve as boundary in the north. The treaty reserves to the inhabitants of the ceded territories the free choice of their future nationality. They may remain Japanese and Russian subjects respectively without forfeiting any of their rights of ownership which are guaranteed by the treaty.

It appears from official statistics that between the years 1822 and 1872 no less than 500,000 persons have been banished to Siberia; yet there has been scarcely any perceptible increase in the population; and now, as fifty years ago, there is not one inhabitant per square verst. The reason of this is that the number of persons who make their escape from Siberia continues to be very great. In 1873, for instance, the number of persons entered on the lists as condemned to banishment in the Irkootsk district was 10,387, while 1,994 only were to be traced as residing there; and in the ten years from 1835 to 1845 no fewer than 12,652 fugitives were recaptured. In 1859 the exiles in the Government factories at Nertchinsk attempted to escape in a body, and 580 of them have been returned as "missing" ever since. The great number of criminals and escaped convicts in the country prevents its free development, and the Minister of Communications, General Possiet, urges that the system of transportation to Siberia should be given up altogether. "That country," he says, "is more than twice as large as European Russia, and its natural wealth is still far from being appreciated. Is it to be condemned to serve forever as a residence for the criminals of a popu-

lation of seventy millions? Now that the Pacific is gradually becoming a second Mediterranean—that Russia, by acquiring the Amoor district, has reached its coast, and the border states have developed themselves with great rapidity—the time has arrived to place Siberia also on the road of progress, and relieve it of the disgrace of being the home of criminals." This view finds many advocates in the Russian press.

In June the town of Morshamsk, on the right bank of the River Tena, Russia, was entirely destroyed by fire. It had a population of 20,000, and contained three churches, and several manufactories and saw-mills. In August a similar fate befell the town of Briansk, in the government of Orel. Two-thirds of the town were destroyed, and the inhabitants fled in a panic to the fields, where they passed the night. A heavy rain alone saved the town from complete destruction.

On September 26 (October 8), 1874, the Russian Government issued a circular to its diplomatic agents, for the purpose of obtaining the opinions of the different Governments on the propositions of an international declaration concerning the laws and customs of war, submitted to the Brussels Conference, and the revised project, as agreed upon there, in order to formulate these propositions in some definite international act or treaty. The German Government was the first to accept the proposition. Sweden followed in February. On February 20th Earl Derby sent a dispatch to the British ambassador in St. Petersburg, in which he refused to accede to the proposition in the following words:

In my dispatch of the 28th of September I stated that her Majesty's Government desired it to be distinctly understood that by authorizing the signature of the final protocol, they did not accept the rules thereto annexed. A careful consideration of the whole matter has convinced them that it is their duty firmly to repudiate, on behalf of Great Britain and her allies, in any future war, any project for altering the principles of international law upon which this country has hitherto acted, and above all to refuse to be a party to any agreement the effect of which would be to facilitate aggressive wars, and to paralyze the patriotic resistance of an invaded people.

In the beginning of February, 1875, the Russian Government permitted the publication of the proceedings of the Brussels Congress in the Russian papers. Up to that time they had only been published in a supplement to the French *Journal de Saint-Petersbourg*, of which only a limited number of copies were printed.

On June 2d the International Telegraphic Congress was opened in St. Petersburg. The American Government, and others, had received an official invitation from Russia. At first the invitation was declined on the ground that telegraphing in the United States was done by private enterprise, which was not subject to the control of the Government. Mr. de Voigt, the *chargé d'affaires* in Washington, then intimated a disposition to receive delegates from private companies. This was made known

to the presidents of two of the most important companies, who, however, declined to be represented. It was finally determined by the Government to authorize Mr. E. Schuyler, the American *chargé d'affaires* in St. Petersburg, to attend the Congress. Besides all of the European states, Persia, Japan, Egypt, and the United States, were represented by delegates, while representatives were also present of the Anglo-American Telegraph Co., the Brazilian Submarine Co., the Black Sea Co., the Eastern Extension Co., the Great Northern Telegraph Co., and the Vereinigte Deutsche Telegraphen-Gesellschaft. The chief improvements which the Congress resolved to introduce are a provision against an abuse which had arisen in some languages by limiting the length of the single word; the introduction of urgent and

registered dispatches; the experimental introduction of telegraphic notices; the tariff by single word for the extra European service, and the adoption of two uniform rates, according to route, for the correspondence of Europe with India.

RYAN, Right Hon. Sir EDWARD, a British lawyer, born in 1793; died August 22, 1875. He graduated from Trinity College, Cambridge, and was called to the bar at Lincoln's Inn in 1817. He was successively a Puisne Judge and Chief-Justice at Calcutta, became a Privy Councillor in 1843, a Commissioner of Railways in 1846, and was a Civil Service Commissioner, a member of the Senate of the University of London, and of the Council of University College. He was a Fellow of the Royal Society.

S

SACK, KARL HEINRICH, a German theologian, born October 17, 1790; died October 16, 1875. He first studied law and then theology at the University of Göttingen, and afterward in Berlin. He took part in the campaigns of 1818 and 1815. As early as 1812 he wrote "Reden an deutsche Jünglinge über Werth und Reiz der Theologie und des geistlichen Standes." In 1816 he undertook with his elder brother a trip through Holland, England, Switzerland, and Germany, and as a result of it published "Ansichten und Beobachtungen über Religion und Kirche in England" (1818). In 1818 he was appointed extraordinary and in 1823 ordinary Professor of Theology in Bonn. In 1843 he undertook a trip to Scotland, and upon his return published "Die Kirche von Schottland." In 1846 he represented the Evangelical Theological Faculty of Bonn at the General Synod in Berlin, and in 1847 was created a Consistorialrath in Magdeburg. He published, besides the above-mentioned works: "Christliche Apologetik" (1829, second edition, 1841); "Christliche Polemik" (1838); *Katechismus der christlichen Lehre für die Jugend evang. Gemeinden* (1819, second edition, 1834); and "Geschichte der Predigt in der deutschen evangelischen Kirche von Mosheim bis auf die letzten Jahre von Schleiermacher und Menken" (1866, second edition, 1875).

SAINT-GEORGES, JULES HENRI VERNON, a French dramatic author, born in 1801; died December 23, 1875. He wrote partly alone, and partly together with Scribe and others, the words of a large number of operas, which with music by Auber and Halévy have been produced at almost all the prominent theatres of Europe. Among his best known operas are: "Les Mousquetaires de la Reine;" "Le Val d'Andorre;" and "L'Ambassadrice." He was also the author of several novels.

SAMOAN or NAVIGATOR'S ISLANDS, a group of islands in the South Pacific, between

latitudes 13° 30' and 14° 30' south, and longitudes 168° and 173° west. There are four principal islands, viz.: Manna, Tutuila, Upolu, and Savaii; and five smaller: Orosenga, Ofoo, Manono, and Apolima, besides some islets. The area of these eight islands was, according to Wilkes's survey, 1,650 square miles; according to a planimetric calculation made in the Geographical Institution of Perth, it was 1,162.53 square miles; and according to another estimate (Dr. Gräffe, "Topographie der Schifferinseln," in the *Journal des Muséums Geoffroy*, No. 1, Hamburg, 1873), only 1,086.9 square miles. The population is estimated at about 33,000. Dr. Gräffe gives for the several islands the following area and population:

ISLANDS.	Square Miles.	Population.
Savaii.....	659.0	10,100
Upolu.....	385.6	15,000
Apolima.....	1.8	
Manono.....	3.3	300
Tutuila.....	52.2	2,500
Manus.....	20.0	
Orosenga.....	6.0	600
Ofoo.....	9.0	

According to a census which was taken in 1869, the religious denominations were divided as follows: Adherents of London Missionary Society, Independents and Presbyterians, 27,021; Wesleyan Church, 5,082; Roman Catholic, 3,004; total, 35,107. The trade of Samoa is virtually controlled by a few German houses. The exports are cotton and copra; the former insignificant at present, but the copra-trade is considerable and growing into larger proportions. Copra is the dried meat or fruit of the ripe cocoanut, which is gathered and prepared by the natives. It is shipped to Europe, where it meets a ready sale. The oil enters largely into the manufacture of the best candles. The copra in European marts is quoted at about \$95 per ton. There being no regular opposition, it is purchased

from the natives at about \$35 per ton in trade, equal to about, say, \$20 per ton. There is an estimated yearly export of 84,775 tons, with a home value of \$3,803,625.

The natives are tall and well built, and of an olive complexion. They possess considerable intelligence. In the matter of dress they have not passed far beyond the most primitive state, so that the national Legislature was forced to punish with a fine of \$100 any member who should appear naked in the session! The group is exceedingly well fitted for a coaling-station. It has several good harbors, Pango-Pango on Tutuila, Apia and Faloliti on Upolu, and Asan in Savaii.

A civil war raged on these islands in 1872, caused by the proclamation of a young chief to be king, without the consent of the separate districts, as demanded by custom. It devastated and impoverished the country, the chiefs selling their land at merely nominal prices, in order to obtain arms and ammunition. This caused great suffering and dissensions among the natives; and when, in 1872, Commodore Meade, of the United States Navy, visited the islands, the chiefs caused him to take the harbor of Pango-Pango under the protection of the United States. In 1873 a special agent, Colonel A. B. Steinberger, was sent to these islands by the United States Government, who reported a large majority of the chiefs and the inhabitants in favor of a protectorate by the United States. In February, 1875, Colonel Steinberger was again sent to the islands, arriving at Pango-Pango in the latter part of March. The object of this second expedition was to establish, if possible, a permanent government, and to examine closely the demands for damages made against the natives. The arrival of Colonel Steinberger was hailed with great enthusiasm by the natives, who immediately sent a large amount of provisions on board. On April 22d Colonel Steinberger, with the American officers, went to the seat of government, where about ten thousand natives were assembled. After the various documents had been read, he delivered the presents of President Grant, consisting of arms and ammunition, and a new flag, composed of seven alternate red and white stripes, with one white star on a blue field. A constitution was also presented to the assembled Taimuas, which was adopted on May 18th, with the single change that, instead of electing the King for life, he shall be elected for four years only, the dignity to alternate between the families of Malietoa and Topura. Colonel Steinberger was also elected prime-minister for life. According to the new constitution, the Legislature consists of a Senate, called Taimua, and an Assembly, called Taipuia. The Senate consists of fifteen members, who belong to the first families of the country, and the basis of representation in the Assembly is one member for every two thousand inhabitants, so that the Assembly consists at present of eighteen mem-

bers, who are elected for a term of two years. The school law imposes a tax on every village for the support of elementary schools, in which the native as well as the English language shall be taught. The marriage and divorce laws are framed after those of California. Trial by jury has also been instituted. If a white man is on trial, the consul of his government may select two of his countrymen to serve on the jury; while, if a native is on trial, the jury is composed entirely of natives. The armed force of the kingdom consists of one hundred and fifty men. In Apia, the capital, a regular police force has been organized. At present there are only three saloons in Apia, and at ten in the evening a cannon is fired as a signal for all saloons to close. Roads are constructed throughout the island.

SAVIGNY, KARL FRIEDRICH VON, a Prussian diplomatist and statesman, born September 19, 1814; died February 11, 1875. He was the son of Friedrich Karl von Savigny, one of the greatest jurists of his times. He studied in his youth in Catholic institutions, and finished his education in the Universities of Paris, Berlin, and Munich. He entered upon the diplomatic career in 1838, and, having served at the legations at various foreign courts, he returned to Germany in 1849, in which year he was appointed ambassador in Baden. In 1859 he was transferred to the court of Dresden, and in 1863 to Brussels. In all of these positions, he was very successful in advancing the interests of Prussia, and in lessening the influence of Austria in the affairs of the Germanic Confederation. In 1864 he was appointed the ambassador of Prussia at the Federal Diet, in Frankfurt. Here he took a prominent part in the events which led to the war of 1866. His declaration on June 1, 1866, that the Confederation, in its existing form did not fulfill its chief objects, and that on June 14th, that the Confederation was dissolved, are among the most important events in German history during the present century. He also took a leading part in the negotiations which led to the union of North Germany after the victory of Sadowa, and was regarded as being the immediate representative of Prince Bismarck in such matters. He was expected to be the probable chancellor of the new Confederation, and so regarded himself, and, when Prince Bismarck was appointed to that position, he openly declared his disappointment, and quitted the diplomatic service. In 1867 he was elected a member of the Reichstag, and in 1870 of the Prussian House of Deputies. In both of these positions he was the leader of the Ultramontane or Catholic party, declaring the war of 1866 to be a wrong on the part of Prussia, and explaining his action at that time as being under orders of Prince Bismarck. M. de Savigny married in 1858 a sister of Count Harry von Arnim. (See ARNIM.)

SCHNAASE, KARL, a German art-historian, born September 7, 1798; died May 20, 1875.

He studied law in Heidelberg and Berlin, and was employed by the Government from 1819 to 1825 in Dantzic and Königsberg. Having made a trip to Italy in which he gathered a considerable art-knowledge, in 1826 he was appointed Assessor in Königsberg, three years later Councilor in the Court at Marienwerder, and soon after received an appointment in Düsseldorf. In this the representative city of German art, he found plenty of opportunities to cultivate his favorite study. Among several trips which he undertook from this city was one to the Netherlands, as the result of which he published the "Niederländische Briefe" (1834). He also contributed a large number of articles to various art-journals. His principal work, however, is "Geschichte der bildenden Künste" (1843-'64), the second edition of which he prepared together with Lützow and Friederichs (1866-'67). In 1848 he was appointed Obertribunalsrath in Berlin, which position he resigned in 1857, in order to devote himself entirely to art-history. In 1858 he founded the *Christliche Kunstblatt*, which he published for a large number of years with Schnorr von Carolsfeld and von Grun-eisen.

SCHNEIDER, EUGÈNE, a French manufacturer and politician, born in April, 1805; died November 27, 1875. He early embraced a commercial career, and in 1830 became director of the important machine-works at Cren-sot, which now employ not fewer than 10,000 workmen. In 1865 M. Schneider, whose ambition it had been to compete with English labor in iron-works, was much gratified by receiving an order for fourteen railway-engines from England. In 1845 he was elected to the Chamber of Deputies and to the Council-General of Saône-et-Loire for the canton of Montcenis. In 1851 he became Minister of Commerce and Agriculture, and after the *coup d'état* was elected as a government candidate to the Corps Législatif, of which he became one of the vice-presidents. In 1865 he replaced the Duc de Morny on several occasions as president, having been reelected in 1857 and 1863 for his department. From 1867 he was always appointed President of the Corps Législatif. When in 1869 the Emperor promoted M. Jérôme David, one of the vice-presidents, to be Grand Officer of the Legion of Honor, M. Schneider resigned his post, but resumed it upon the declaration of the Emperor disclaiming any intentions ascribed to the nomination by M. Schneider. He was created a Grand Officer of the Legion of Honor in 1857, and decorated with the Grand Cross in 1868; was from 1845 a member of the General Council of Manufacturers, for which he drew up several reports. He had also been a Governor of the Bank of France, and President of the Société Générale.

SEIDL, JOHANN GABRIEL, an Austrian poet and archæologist, born June 21, 1805; died July 18, 1875. He studied law, was appointed

professor in the gymnasium in Cilli in 1829, and in 1840 went to Vienna as custodian of the coin and antiquarian cabinet. His works, both in prose and poetry, are very numerous. His poems were very popular. He published "Gedichte in niederösterreichischer Mundart" (fourth edition, 1844), "Dichtungen" (3 vols., 1828-'28), "Bifolien" (fifth edition, 1855), "Liedertafel" (1840), "Lieder der Nacht" (second edition, 1851), and "Natar und Herz" (third edition, 1859). He also published some plays. The best known of these were "Das erste Veilchen," "Die Unzertrennlichen," "Das letzte Fensterl'n," and "Drei Jahre nach dem letzten Fensterl'n." The two latter pieces were produced with great success. Among his novels, "Pentaméron" (1843) is probably best known.

SELWYN, Rev. WILLIAM, an English minister, born in 1806; died April 24, 1875. He was educated at Eton and St. John's College, Cambridge, where he graduated in 1828. He held in succession the rectory of Branston and the vicarage of Melbourne, was appointed to a canonry in Ely Chapel in 1833, Margaret Professor of Divinity in the University of Cambridge in 1855, and in 1859 chaplain to the Queen. He wrote: "Horræ Hebraicæ" (1848), "The Principles of Cathedral Reform" (1848), "Two Charts of Prophecy" (1848), "Notes on the Revision of the Authorized Version of the Bible" (1856), "Critical Notes on the Septuagint" (1856), and "Thoughts on Holy Scripture" (1864).

SMITH, Mrs. GERRIT, died at Peterborough, N. Y., on the 6th of March. She was the daughter of Mr. William Fitzhugh, of Hagerstown, Md., where she was born January 11, 1805. She was married to Mr. Smith when only 17 years old. She heartily coöperated with her husband in his political and charitable views and exertions. For half a century she presided over the indiscriminate and ceaseless hospitalities of the Smith Mansion at Peterborough. She was equally attentive to the fugitive slave and distinguished guest. Some of the borrowers and beggars who were naturally attracted to Peterborough by the large wealth of Mr. Smith, upon his refusal to aid them, learned to appeal to Mrs. Smith, who did not often send anybody empty away. The home charities were left pretty much to herself, while Mr. Smith gave much of his attention to the distant objects of his bounty. For miles around the village the poor and needy, whether worthy or unworthy, were supplied annually under her direction with loads of flour, beef, poultry, blankets, garments, and a good deal of money. Highly cultivated, excelling in recitations from the poets, and skillful in music and song, she yet loved to steal out with her knitting-work in hand and take tea with humble neighbors, in order to find out and supply their wants. Mrs. Smith was greatly beloved by the people of Madison County. She left two children, Colonel Green Smith and Mrs. Elizabeth Smith Miller.

SOUTH CAROLINA. The Legislature of this State, in accordance with the adjournment taken in December, 1874, for a recess, resumed their session on the 12th of January, 1875, when Governor Chamberlain sent to that body his special message concerning the affairs and wants of the State.

He takes notice that the heads of public offices and institutions have generally failed to furnish him at the proper time with the annual reports which the law requires of them, stating, "Even at this late day, nearly two months and a half after the close of the last fiscal year, and seven weeks after the annual meeting of the General Assembly, I have barely been able to obtain several of the most important reports in time to make a brief and imperfect examination of them." As the delay of such reports cannot but be hurtful to the public service, the Governor urges the Legislature to remedy the evil by removing its cause, from whatever source it may proceed.

On January 12th, the first day of the reopened session, the following resolution was introduced, subsequently adopted and acted upon in the Senate concerning one of its members: "That a special commission of three be appointed to investigate and report within ten days on the charges made against T. C. Andrews, Senator from Orangeburg, in the alleged confession of one John L. Humbert, late Treasurer of Orangeburg County, and published in the *Daily News and Courier* of the city of Charleston."

The committee proceeded to Orangeburg, where they took the testimony of the County Treasurer. He confirmed his statement implicating Senator Andrews; and would have placed in their hands the written proofs of the Senator's pecuniary transactions with him by using the County Treasury's money, but was not allowed to go to his house, even escorted, to obtain the papers. He was then in prison awaiting his trial on the charge of having misapplied the county funds intrusted to him. He was afterward convicted on his own confession as well as other evidence, and sentenced to the State-prison. The committee heard also the testimony of Senator Andrews, besides that of some other witnesses. In order to facilitate the collection of evidence, the number of its members was subsequently increased from three to five.

On February 5, 1875, they made their report, submitting also the evidence which they had collected. In this report they unanimously express their conviction that "the conduct and transactions of Senator T. C. Andrews with John L. Humbert, County Treasurer, of Orangeburg, in his office and official character, have been highly improper and unbecoming a Senator." Only in the punishment to be inflicted they disagree: three of them recommending that Senator Andrews should be expelled from the Senate; two, that a resolution of censure be passed by the Senate upon his conduct.

The matter was taken up for action on the 11th of February, when, in accordance with the two different recommendations made by the majority and minority of the committee in their united report, two different resolutions were offered for adoption.

An animated debate then took place on the resolution for expulsion, in which all the Senators participated, except Mr. Andrews, who was present, with the final result that, on the resolution for expulsion being put to vote, two-thirds of the votes being necessary for its adoption, it was rejected by a very large majority—yeas 12, nays 19.

The question of taking a vote on the resolution for censure being then in order, some Senators successively moved to lay it on the table, and to indefinitely postpone; several among them regarding it inconsistent, useless, and unjust to proceed to censure a man for what he had just been declared not guilty of, and acquitted. The resolution for censure was then withdrawn by its author, and Mr. Andrews continued to occupy his seat in the Senate unapproached.

Under a joint resolution, introduced and adopted in the Senate on February 3, 1875, and concurred in by the House, a special joint committee of seven was appointed "to ascertain what bonds of the State have been funded under the act to reduce the volume of the public debt, and provide for the payment of the same; what interest coupons have been funded under the said act; also whether the funds for the payment of interest, raised under the said act, have been kept separate and apart from all other funds, as provided for in the said act and as otherwise provided by law."

In execution of the duty assigned them, the committee examined the books of the Treasurer's office, heard his sworn testimony and that of others connected with his and the Controller-General's department, and, on February 24th, submitted to the General Assembly a full report of their investigations. The substance of their findings, in reference to the three points specified in the resolution, is as follows: That, of the \$2,473,884.93 of bonds funded by the State Treasurer up to the time of the investigation, \$978,500 belong to a class which, in the united judgment of the Senate, as expressed by a unanimous vote on February 4, 1875, should not have been funded at all; that, of the amount of interest coupons funded by the State Treasurer, \$454,021 should not have been funded, and that the funding of them was a fraud upon the State, and that the funds provided for the payment of interest raised under the funding act "have not been kept by the State Treasurer separate and apart, as provided for in the said act, and as otherwise provided by law."

By a written communication, dated February 25, 1875, the State Treasurer requested the General Assembly to suspend all discussion on the report of the special joint committee on

his acts till March 1st, when he would present a written reply to the said report in all its parts. He did so on the day named, and his reply was read to the General Assembly at the sitting of March 3d. In it the State Treasurer passes in review all the statements and conclusions set down by the investigating committee against him, in regard to fact as well as law, refuting them at length and in detail. At the conclusion he says, among other things, "In submitting this reply, I say distinctly that I ask no favor, nor any immunity from the full responsibility for my acts."

In the debate which took place after the reading of the Treasurer's reply, and which was continued on the next and following days, almost all the members of the Lower House, with very few exceptions, expressed their opinion to be that, in the charges preferred by the investigating committee against the Treasurer, there was no sufficient ground for impeachment. A motion was made to address the Governor, and ask the removal of the State Treasurer from his office for neglect of duty, and for assuming to interpret at his discretion the law directing the course to be pursued in the performance of his official duties; which motion was agreed to. A resolution to that effect was adopted March 6th in the House of Representatives, by a vote of yeas 92, nays 20, and concurred in by the Senate—yeas 19, nays 6—on the same day.

The joint committee appointed to prepare the address reported it on March 10th. The document recites that the General Assembly, "by a vote of two-thirds of each House, and in the execution of the authority vested in them under section 4 of Article VII. of the constitution of the State," address the Governor, and ask that F. L. Cardozo be removed from the office of State Treasurer, on the following two charges:

CHARGE 1. That the said F. L. Cardozo, State Treasurer, has been guilty of misconduct and irregularity in the administration of his office.

To this charge six specifications are appended, taken from the points made against him in the previous report of the investigating committee, with reference to his having funded bonds and interest coupons which should not have been funded, and to his not having kept the State funds separate and apart.

CHARGE 2. That the said F. L. Cardozo, State Treasurer, has been guilty of willful neglect of duty.

To this charge one specification is appended, namely:

That whereas it is provided, by section 33 of Chapter XII. of the Revised Statutes, that "the Treasurer shall, at the end of every month, report to the Controller-General an accurate statement of the cash transactions of the Treasury of every department," yet the said F. L. Cardozo, State Treasurer, has, since the 31st of October, 1874, wholly omitted to report to the Controller-General any statement of the cash transactions of the Treasury.

To the tenor of this address the committee subjoined the recommendation—

That a copy of the charges be served upon the Treasurer, and that he be required to appear before both Houses in joint assembly, on Tuesday, the 16th instant, to make answer to the same.

The committee also promised to submit rules of procedure in due time.

This report was presented to each of the two Houses separately, and, after discussion, adopted in both. The rules and regulations to govern the proceedings of the trial were submitted, and, after deliberation, adopted.

By a letter, under date of March 12th, the State Treasurer requested of the Legislature a postponement of the hearing of the case for ten days, that his counsel might have time to prepare his defense. His request was voted upon in the Senate, and rejected—yeas 7, nays 17.

At the request of the Treasurer's counsel, consisting of three distinguished members of the South Carolina bar, the General Assembly, on the 16th of March, postponed the hearing of the case to the 18th. The matter was then argued for the defendant by his counsel. Their argument occupied two days.

On March 20th, the General Assembly, each House by itself, deliberated on the subject, with the following result: The address to the Governor for the removal of F. L. Cardozo from the office of State Treasurer was, after a lengthy discussion, put to the vote on its adoption, and it was rejected: in the House of Representatives, yeas 45, nays 68; in the Senate, yeas 11, nays 18.

For the purpose of filling the seat on the bench made vacant by the death of Judge John T. Green, the two Houses of the Legislature met in joint convention on February 11, 1875. The nominees were Franklin J. Moses, Jr., ex-Governor of South Carolina, L. C. Northrop, Archibald J. Shaw, C. D. Melton, and W. J. Whipper. After the sixth ballot—in which the vote stood, Northrop 69, Shaw 86, Moses 85—Mr. Moses stepped on the floor of the House, withdrew his name as a candidate, and urged his supporters to cast their votes for Mr. Shaw, the Conservative nominee. At the seventh ballot Mr. Shaw received, in consequence, 76 votes out of 186, the whole number cast, and was declared elected. For Controller-General, Thomas C. Dunn, a member of the Senate, received 92 votes, and was declared elected.

On March 26th the General Assembly adjourned *sine die*.

Among the most important acts of a public character passed at this session are the following:

Joint resolution to ratify the amendment to the constitution of the State relative to the terms of office of Controller-General, Secretary of State, Treasurer, Attorney-General, Adjutant and Inspector-General, and Superintendent of Education.

An act directing and requiring the publication of monthly statements by the State Treasurer.

An act to provide for the enumeration of the inhabitants of the State.

An act to declare and protect the rights of women and children under policies of life-insurance taken for their benefit.

An act to regulate the practice of dentistry, and protect the people against empiricism in relation thereto in the State of South Carolina.

An act to protect and encourage stock-raising in South Carolina.

A joint resolution authorizing and directing the trustees of the State Orphan Asylum to remove that institution from the city of Charleston to the city of Columbia, was passed. Also a joint resolution to remove the Asylum for the Deaf and Dumb and the Blind to the city of Columbia.

The members of the General Assembly met together again for the regular session of 1875-'76 on the 23d of November.

The financial condition of the State is as follows:

The amount of her funded debt under the funding act is:

Funded in the fiscal year ending Oct. 31, 1874.	\$1,987,169 05
Funded in the year ending October 31, 1875....	5,238,848 60

Total.....	\$7,226,018 65
------------	----------------

Total amount of contingent liabilities arising from State indorsement of railroad bonds.	\$4,792,608 30
Deficiencies for the year.....	292,100 87
Unpaid appropriations.....	864,584 06

The receipts for the last fiscal year, under the specific tax levies from all sources, amounted to \$1,805,607.78, and the expenditures for all purposes, to \$1,178,677.41; leaving a balance in the Treasury of \$126,890.37.

The aggregate value of the taxable property in the State, assessed for the fiscal year ending October 31, 1875, was \$143,326,135, consisting of \$38,177,218 of real estate, \$46,791,006 of personal property, and \$8,857,911 of railroad property.

The entire amount of the taxable property possessed in 1874 was, \$145,143,023, consisting of \$90,095,407 of real estate, and \$55,047,616 of personal property.

A large portion of the personal property taxed in the new assessment represents property which in former years has escaped taxation.

Out of the \$1,555,201, taxes charged by the several auditors against the various county treasurers for the year, there was only \$12,519.47 returned *nulla bona*. The amount of such returns in 1874 was above \$40,000; and in 1873 it exceeded \$51,000.

The appropriation for legislative expenses in the last fiscal year was reduced to \$150,000 from \$190,000 in the previous year. The cost of each regular session during the period between 1868 and 1873 averaged about \$320,000. That of 1871-'72 amounted alone to \$617,234.

Besides these legislative expenses, which

might be called ordinary, a great deal of money was annually paid out of the public Treasury for the Legislature under the name of contingent expenses. The great extravagance which in former years prevailed in regard to these expenses is now largely reduced.

The floating indebtedness of the State is considered a matter of difficult liquidation. It requires great circumspection and judgment to select and pass upon the claims of which such debt is composed.

Public instruction seems to have satisfactorily progressed during the last scholastic year. The aggregate number of youths between six and sixteen years of age was 239,264, of whom 85,566 were white, and 153,698 colored—an increase since 1873 of 9,162. The total attendance of both sexes and colors in the schools numbered 110,416: white children, 47,001; colored, 63,415; an increase of 5,678 over last year.

The whole number of free common schools in the State was 2,580, or 227 more than in the previous year.

The entire number of teachers was 2,855: white, 1,876; colored, 979; an increase over last year of 228.

The average length of school-time in the year was four months and a half.

The schoolhouses in the State numbered in the aggregate 2,847, an increase of 119 over the preceding year.

The condition of the State University appears to have been improved. The whole number of students who attended it during the year ending October 31, 1875, was 233, classified as follows: In the preparatory department, 102; law, 20; medicine, 2; academic schools, 107.

The State Normal School is flourishing in all respects.

The Agricultural College and Mechanic Institute are not in so satisfactory a condition as could be desired.

The State Orphan Asylum has been removed from Charleston to Columbia. The number of its inmates in November, 1875, was 84: boys, 35; girls, 49.

The State Asylum for the Insane is remarkably well administered, and accomplishes the purpose for which it is intended.

The State Penitentiary is under good administration and discipline. The number of convicts therein on October 31, 1874, was 168. The number received during the year ending October 31, 1875, was 321, including 9 who escaped and were recaptured, making a total of 489 for the year. Of this number 46 were pardoned by Governor Moses within the month of November, 1874, and 16 by Governor Chamberlain from that date to October 31, 1875; 44 were discharged by expiration of sentence, 4 by commutation of sentence, and 21 by the effect of the regulation allowing a deduction of one-twelfth from the time of sentence for good behavior; 24 have escaped; 6 died, one of these having been shot by a guard in an alter-

cation, and one drowned; and 6 who should prior to May 1, 1875, have been left out of the records as "escaped;" making a total of 162 discharged, and leaving 322 in confinement on the 31st of October, 1875. Of this number 318 are males; 4, females.

The ports of Charleston, Hilton Head, and Georgetown, and the whole seaboard of South Carolina, were exempt in 1875 from epidemic diseases and from yellow fever. This good result, so far as it may depend on human means, is attributed chiefly to the vigilant foresight of the health-officers at the above-named points. Having put themselves in direct communication with Havana and Key West, where the yellow fever manifested itself as early as March, 1875, they rigidly enforced the quarantine laws in the examination of vessels coming from those, or other suspected, localities.

Respecting the centennial celebration at Philadelphia, in 1876, a Joint Special Committee of four was appointed by the General Assembly at the previous session, "to collect information of the resources of the State for representation at the Centennial Exhibition at Philadelphia."

In addition to this Legislative Committee, Governor Chamberlain, in October, 1875, appointed a commission, consisting of nine prominent citizens of the State, "to have in charge the perfecting of such arrangements as they may adopt for promoting and securing the proper representation of South Carolina—her resources, history, and industries—at the centennial celebration."

In accordance with a concurrent resolution the two Houses of the General Assembly met in joint convention on December 16, 1875, and elected the following persons to office:

For Associate Justice of the Supreme Court, J. J. Wright, colored.

For Circuit Judges—First Circuit, W. J. Whipper; Second Circuit, P. L. Wiggins, the present Solicitor of the same Circuit; Third Circuit, Franklin J. Moses, Jr., ex-Governor of South Carolina; Fourth Circuit, J. P. Townsend; Fifth Circuit, J. Carpenter; Sixth Circuit, Thomas J. McWey; Seventh Circuit, L. C. Northrop; Eighth Circuit, T. J. Cooke.

At the announcement of some among these judicial elections by the Legislature, especially of the two relating to the First and Third Circuits, a very great dissatisfaction manifested itself among a large portion of the people, Republicans as well as Democrats, throughout the State, and chiefly among the residents of the two circuits concerned. They loudly expressed their unwillingness to acquiesce in the elections made, and their determination not to allow the judges-elect to occupy the judicial seats of their circuits.

On December 21, 1875, Governor Chamberlain formally refused to issue the usual commissions to F. J. Moses, Jr., and W. J. Whipper, as Judges-elect for the Third and First Circuits respectively, taking the ground that, as the

terms of the present incumbents do not expire till after the next general election in 1876, the General Assembly had no right to elect their successors.

In approbation of this action of the Governor, the president of the Charleston Chamber of Commerce, the presidents of five banks, and seven among the leading commercial firms in that city, on December 22d, signed an address to him, saying: "We tender you, for the community of Charleston and the State, our thanks for your action in refusing to sign the commissions. We will do all we can to sustain you in what you have done."

On December 24th a call was signed by a large number of the citizens of the town of Sumter, in which F. J. Moses, Jr., was born and grew up, inviting their fellow-citizens of the county to assemble in public meeting or sales-day in January, "to take action upon the election of judges, and to uphold Governor Chamberlain in his course in relation thereto."

On December 26th a public meeting was held at Charleston, which is in the First Circuit, for the purpose of taking action against the judicial elections by the Legislature for the First and Third Circuits. The meeting had an unusually large attendance from within and outside the city, and was addressed by several prominent citizens. A platform was read and adopted by it as if with one voice, in which, besides some resolutions approving the above-stated action of the Governor, and promising to stand by him in it, there are the two following:

Resolved, That as citizens of this State we protest against the action of the General Assembly in electing as judges men so notoriously corrupt as W. J. Whipper and F. J. Moses, Jr., and avow our determination to resist it to the end.

2. That we protest against the continuance in office of legislators so regardless of duty, and so reckless of the character, the peace, and the prosperity of the State, and we will use every effort to drive them from power.

These resolutions were formally approved and indorsed by the bar of Orangeburg on December 28th, when a number of its members signed an address to the Governor, informing him of their action.

At the end of December, 1875, the Republicans held a mass-meeting in Charleston, for the purpose of sustaining the action of the General Assembly in the judicial elections for the First and Third Circuits. It is stated that the bulk of the colored people of Charleston did not attend this meeting.

The judges-elect for those two circuits protested on their part against the action of the Governor in refusing to sign their commissions, and expressed their determination not to wait but to apply to the Supreme Court for protection against the Governor by a writ of *mandamus*.

The State census taken in 1875, in compliance with the law enacted at the previous session for that purpose, was completed in No-

vember the same year. It gives South Carolina an aggregate population of 925,145, the two races included; and sets the number of their respective voters at 74,199 for the whites, and 110,744 for the negroes; the colored voters exceeding the white by more than 36,000.

Compared with the United States census of 1870, which gives South Carolina a total population, white and black, of 705,606, the State census of 1875 makes her people increase in five years at the rate of above 30 per centum. During the ten years from 1860 to 1870, on account of the late civil war, there was no increase of population, but a loss of 0.56 per cent. In the preceding ten years, between 1850 and 1860, her gain in population was 5.27 per cent.

SPAIN, a kingdom of Southern Europe. King, Alfonso XII., born November 28, 1857, proclaimed King December 30, 1874. The area of Spain is 195,774 square miles; the population in 1870 was 16,835,506. The area of the Spanish colonies* was 117,209 square miles; the population, 8,093,610.

The movement of population from 1865 to 1870 was as follows:

YEAR.	Marriages.	INCLUDING STILLBORN		Stillborn.	Surplus of Births.
		Births.	Deaths.		
1865.....		621,050	588,580	5,650	68,470
1866.....		613,951	463,654	5,233	155,297
1867.....		624,213	457,151	5,560	187,061
1868.....		679,563	543,690	4,822	20,978
1869.....		602,237	550,560	5,206	51,727
1870.....	104,713				90,117

The budget for the financial year 1874-'75 estimates the revenue and the expenditure as follows (value expressed in pesetas, 1 peseta = 19.3 cts.):

REVENUE.	
1. Direct taxes.....	151,184,565
2. Indirect taxes.....	110,926,986
3. Stamps and state monopolies.....	182,710,879
4. Receipts from national domain.....	57,912,771
5. Receipts from the Philippine Islands.....	2,963,909
6. Indemnification of war from Morocco.....	1,756,275
7. Arrears of preceding financial years.....	23,619,580
8. Exemption from military service.....	68,690,800
Total.....	544,794,751
Arrears of the financial years 1873 and 1874....	64,746,890
Grand total.....	609,541,141
EXPENDITURE.	
1. Civil list.....	2,996,667
2. Presidency of the Executive.....	827,592
3. Legislature.....	795,704
4. Public debt.....	43,898,551
5. Justice.....	1,082,920
6. Pensions.....	81,508,049
7. Presidency of Ministerial Council.....	513,818
8. Ministry of State.....	3,066,513
9. " " Justice.....	22,248,271
10. " " War.....	245,781,957
11. " " Marine.....	82,911,778
12. " " the Interior.....	19,291,575
13. Fomento.....	36,267,343
14. Finances.....	64,744,401
Total of the expenditure in the financial year 1874-'75.....	510,585,948
Arrears of the financial year 1873-'74.....	94,959,626
Grand total.....	605,125,569

* For a detailed account of the area and population of each of the colonies, see ANNUAL CYCLOPEDIA for 1874.

The public debt and its annual interest were, according to a notice published by the Government in the "Guia oficial de España" of 1875, as follows, in December, 1871, and in June, 1875 (value expressed in reals, 1 real equal 5 cents):

TIME.	Capital of Debt.	Interest.
December, 1871.....	29,784,586,152	810,211,218
June, 1874.....	40,481,140,883	1,028,122,504

At the end of June, 1875, the debt had risen, according to an account published in one of the Madrid papers, to 53,000,000,000 reals.

The Spanish army is to consist, in time of peace, of 91,400 men; in time of war, of 216,000 men. The fleet, in 1874, was composed as follows:

NAVY.	Guns.	Horse-power.
<i>Vessels of the First Class:</i>		
6 iron-clads.....	105	8,900
10 screw-frigates.....	418	5,390
2 wheel-steamers.....	82	1,000
<i>Vessels of the Second Class:</i>		
10 wheel-steamers.....	48	8,130
10 screw-steamers.....	47	1,920
2 transports.....	..	600
<i>Vessels of the Third Class:</i>		
16 screw-steamers.....	89	1,660
35 gunboats.....	85	1,400
7 wheel-steamers.....	18	567
4 wheel-steamers.....	..	530
<i>Vessels not classified:</i>		
2 steamers.....	4	810
19 fuerzas-sutiles.....	19	464
123	755	21,161

The aggregate length of the railroads in operation amounted, on January 1, 1875, to 5,444 kilometres (1 kilometre = 0.62 m.); the aggregate length of the telegraph-lines, on January 1, 1871, to 11,754 kilometres. Cuba has about 640 kilometres.

The proclamation of Prince Alfonso as King of Spain, which had ushered in the new year, was received quietly in Madrid. There seemed, indeed, to be a general feeling of relief that the provisional state of things was over, and a belief that all would go well now that a definitive Government had been established. In the streets there was a good deal of excitement, and the *cafés* were crowded. Many houses were illuminated the same night, and in the morning flags were displayed and the bells were rung. At first the Radicals and Republicans were disposed to resist, but, finding no troops on their side, they submitted. Conferences with the principal officers of the Madrid garrison had taken place the previous day, and the artillery and engineers refused to fight against the prince. Señor Sagasta telegraphed this intelligence to Marshal Serrano, and the marshal, in reply, said that he could not rely upon the support of his troops. Thereupon Señor Sagasta resigned, after protesting. The ministry which was formed under the leader-

ship of Antonio Canovas del Castillo, on the last day of 1874, was as follows: Canovas del Castillo, President; Marquis de Molins, Minister of the Navy; Pedro Salaviera, Minister of Finance; Abelardo de Ayala, Colonial Minister; Marquis de Orovio, Minister of Commerce and Public Works; Alejandro Castro, Minister of Foreign Affairs; Francisco de Cardenas, Minister of Justice; General Jovellar, Minister of War; Francisco Romero Robledo, Minister of the Interior. On January 3d, the ministry sent a circular dispatch to its diplomatic agents at foreign courts, notifying them of the change that had taken place, and instructing them to bring it to the notice of the governments to whom they were accredited. The King entered the harbor of Barcelona on January 9th, where he was received with great enthusiasm. After

passing through Valencia and other cities he arrived in Madrid on the 14th, where his reception was as enthusiastic as it had been on all parts of the route.

He hastened to place himself on a friendly footing with the Pope. Immediately upon his entrance into Spain he asked for the blessing of the Pope, which was granted without delay. The Minister of Justice, Cardenas, soon after issued a circular to the cardinals, archbishops, and bishops, in which he stated that "a new era was about to begin, in which the friendly relations with the Holy Father, interrupted for a time by the injustice and excesses of the immediate past, were again to be resumed, and the losses sustained by the Church were to be made good." A royal decree soon after ordained the return of the church property, con-

BARCELONA.

fiscated under the previous governments, while the Protestant churches in Madrid were closed. A royal decree of February 9th revoked the law passed under the Republican Government allowing civil marriages. All such marriages were declared illegal, as also those entered into by former nuns or priests. On April 28th the papal nuncio Simeoni, arrived in Madrid. In May a decree was published permitting newspapers to discuss all constitutional questions, and authorizing public meetings of all legal parties. A meeting of former ministers, deputies, and senators, resolved to restore the party of the "Union Liberal" as it had been founded in the time of O'Donnell, with the same political principles, and the unconditional recognition of the monarchy of Alfonso XII. On May 27th a meeting of three hundred and forty-one members of the former Senate of Spain was held in Madrid. Of these, two hundred and thirty-eight had sent in written ad-

hesions to the Government of Alfonso XII. Resolutions were passed advocating the union of all the monarchical parties, with a view to support parliamentary government and the constitutional rule of the young King. It was also resolved that a sub-committee should be formed to draw up a political programme, to be submitted on a future occasion. In the beginning of June, General Jovellar resigned his position as Minister of War, to take command of the Army of the Centre, and General Primo de Rivera took his place. In July the commission of nine members, appointed to prepare the draft of a new constitution for the kingdom of Spain, concluded their labors. The draft opened with a declaration of individual and religious liberty. The Legislature is to consist of a Senate and Chamber of Deputies. The Senate shall be composed of three hundred members, of whom one-third are hereditary, one-third appointed by the crown, and

one-third elected by corporations. All grandees of Spain, possessing an income of over fifty thousand pesetas, are also entitled to a seat in the Senate. The Chamber of Deputies is to be elected for five years, one deputy for fifty thousand inhabitants. The King has the right to dissolve the Chamber and the elective senators, and new elections are to take place within three months. The King also appoints the President and Vice-President of the Senate, and has an absolute veto. The magistracy is to be irremovable. At the beginning of September the three ministers, Castro, Cardenas, and Orovio, who represented the ultra-royalists, being averse to the maintenance of universal suffrage, sent in their resignation in opposition to the wishes of Señor Canovas, who urged that the Government ought to respect the state of affairs legally established, and leave to the future Cortes the task of modifying the electoral law, if any alteration should then be considered necessary. After a session of six hours, in which Canovas tried to prevent a rupture, the whole ministry resigned. The King thereupon requested Señor Canovas to form a new cabinet, but he declined the task on the ground that, having for a long time presided over a cabinet which represented the conciliation of the old parties, he ought not to remain in power at the head of one party only. King Alfonso consequently expressed his gratitude to the late premier, and intrusted General Jovellar with the formation of a new ministry, which was, on Sept. 11th, constituted as follows: President of the Council and Minister of War, General Jovellar; Minister of Foreign Affairs, Alcala Galiano; Minister of Justice, Calderon Collantes; Minister of Marine, Duran y Lira; Minister of Finance, Salaviera; Minister of the Interior, Romero Robledo; Minister of Public Works, Martin Herrera; and Minister of Colonies, Ayala.

In a circular note to the bishops, the papal nuncio, Mgr. Simeoni, demanded religious unity and the execution of the Concordat of 1851, and called attention to the fact that otherwise the good feeling existing between the Vatican and the cabinet would be disturbed. The Concordat of 1851 enforced the principle of religious exclusiveness to its utmost extent. The Catholic religion is declared the only ruling one in Spain, while every other religion is prohibited. The other articles have reference to the schools and to the sale of obnoxious books. In reply to a Spanish note called forth by Cardinal Simeoni's circular, the Vatican further stated that it did not desire to embarrass the new Spanish Government; it particularly wished to assist it, but only by such means as would be truly efficacious, and which would not permit the rupture of that sacred tie which has always been the glory of Spain. Religious unity, which was now sought to be banished, could not impede the development of civilization, but was on the contrary its true beacon. It was the duty of the papacy to

combat not civilization, which was brought forward merely as a pretext, but the corruption invading the hearts of nations. In adhering to the positions taken, the papacy believed it rendered great service not only to the Spanish Government, but to all Spain. The conduct of the papal nuncio and of the Vatican must be regarded from this point of view. But, if Spain, moved by extreme necessity, wished to draw up an understanding on the same principles under another form, the papacy would be open to negotiation, with the object of introducing acceptable modifications into the Concordat. After each one had declared its views, it was to be seen how far the Vatican could accept the draft of the new constitution. In conclusion the Vatican accepted the declaration of the Spanish Government that it was desirous of coming to an understanding, and stated that instructions to negotiate had been given the nuncio at Madrid. On November 28th King Alfonso came of age, being eighteen years old. The day was celebrated in various ways. On December 2d another ministerial change occurred. The following new ministers entered their offices on that day: Canovas del Castillo, President of the Ministerial Council; Calderon Collantes, Minister of Foreign Affairs; Martin Herrera, Minister of Justice; and Torreno, Minister of Public Works. The other heads of departments remained unchanged. On December 22d General Jovellar resigned his position as Minister of War, in order to accept the position of Captain-General of Cuba, and General Ceballos was appointed in his place.

At the close of the year a royal decree was promulgated, convoking the Cortes for February 15, 1876. Deputies and Senators were to be elected by universal suffrage on this occasion only. The elections were to commence on the 20th of January in Spain. The decree further provided that the towns in Biscay and Navarre, which would be free from the presence of hostile factions, should elect deputies and senators for the parts of those provinces occupied by the enemy. Another decree was issued imposing penalties upon the press for attacks upon the King, the royal family, and the constitutional monarchy, and instituting a tribunal composed of three judges, in each of the royal courts, to try newspaper offenses.

The proclamation of Alfonso as King of Spain had no effect on the Carlist movement. The following official dispatch was issued from the Carlist headquarters: "The *Alfonsist pronunciamiento* produces no change in the Carlist situation. There is no defection in the Carlist army. The Carlist army will be strengthened and that of the enemy weakened by the change. As heretofore, the contest must be decided by the armies in the field." On January 18th a battle took place at Santa Coloma de Farnes, in which the united Carlist bands of the province of Gerona, under the command of Saballs, Huguet, and others, were completely routed.

The Carlists' loss was seventy dead, while the Government troops only lost six dead and thirty-two wounded. Upon his arrival in the Basque provinces, King Alfonso issued a proclamation to the inhabitants, calling upon them to lay down their arms, and offering a pardon to all those who would submit to his authority. In consequence, defections from the Carlist army became quite frequent. Toward the end of January a general advance of the Government troops toward Pampeluna took place. In the beginning of February they succeeded in relieving this city, which had been besieged by the Carlists for five months, and in taking from the latter Puente del Reina, and other strong places, and forcing them to retire to Estella. Owing to extreme carelessness, however, on the part of the Government troops, the Carlists succeeded in recapturing Lacar, thus enabling them to bring their artillery safely to Estella. In the mean while, General Loma, in Guipuzcoa, also continued to advance, and occupied the whole coast up to Zumaya, from which city he drove the Carlists, pursuing them to Cestona. In February, several changes were made in the Army of the North. General Laserna was replaced by General de Quesada y Mathews, in the command of that army, and General Echeverria took command of the Second Corps of the Army of the North, in place of General Prima de Rivera, who had only held that position since January, while General Echague was appointed to the chief command of the Army of the Centre. On February 26th the Carlists made a severe attack on Bilbao, but were repulsed, with considerable loss. In March the Carlist cause suffered a severe loss in the defection of General Cabrera, one of its oldest partisans. He published an appeal to the Carlists, calling upon them to lay down their arms, stating that the country imperatively demanded peace. Appended to the appeal was a convention, offered by the Madrid ministry and accepted by Cabrera. It provided that the Basque and Navarre provinces which submitted to King Alfonso within a month should enjoy their *fueros* as they existed before the present war; that all Carlist civil and military appointments and decorations, after having been duly proved before Cabrera, should be recognized, their holders being incorporated in the Alfonsist army and civil service, but that this privilege should not extend to persons who did not submit within a month after the publication of the convention. Cabrera was to have the right of proposing appointments, decorations, or rewards, to officers who, without exercising an active command, had deserved this favor by their conduct under present circumstances. The Madrid Government would undertake, in concert with the Cortes, to make good the material damage sustained by communities and individuals in districts then the theatre of war. Immediately after the appearance of this document only eight Carlist officers took advantage

of the convention and submitted to King Alfonso; but as the year progressed the defections from the Carlist army increased to an alarming extent. Serious differences also arose between Don Carlos and the Carlist Council for Navarre. The Navarrese Junta left Estella and established itself at San Esteban, near the French frontier. The Carlists at Renteria, Oyarzum, and around Bilbao, hoisted a flag of truce and fraternized with the royal troops.

The defection of General Cabrera caused Don Carlos to proceed with great severity against any other of his generals suspected of treason. Thus, General Lizarraga, one of the most prominent leaders of the Carlist cause, was arrested in Catalonia in March. During the month of March the Government troops continued to advance at various points. In Catalonia General Campos captured the city of Olot, taking 800 prisoners, and soon after gained another decisive victory at Ridaura. In April the Government made a new levy of troops, at which the total number of recruits obtained was 41,000. During the month of April the war continued with varying success. In the beginning of April the Carlists were defeated in an engagement near Tolosa in Guipuzcoa, while a few days after, the royal troops lost Fort Aspe, near Santander, with 200 prisoners and four guns. Toward the latter part of the month a portion of the Carlist forces on the frontier of Navarre revolted against their leaders. They demanded peace, and submission to the Government of King Alfonso. In May a report, stated to be official, was published, of the Carlist forces in the provinces of Navarre, Guipuzcoa, Alava, and Castile. In this report, the total number of men was stated as 40,029, but, as neither the Basque Tercio, nor Jandessa's brigade, nor Dorregaray's two battalions were reckoned, Don Carlos's army at that time could not, according to this report, be much less than 50,000 men. In May the Carlists shelled Guetaria and did great damage. The fire was returned from the fort and five men-of-war in the harbor, which forced the Carlists to retire with great loss. The Government forces soon gained another important victory at Montserrat. They captured the formidable positions of the Carlists on that mountain, with a loss of only 93 killed and wounded. During May General Cabrera raised a force of about 600 former Carlists for King Alfonso, which he placed under the command of Aguirre, a formerly well-known Carlist chief. Toward the close of May the Government troops under General Montenegro drove the Carlists under Dorregaray from their fortifications at Alcora, in Valencia. The Carlists lost about 100 killed and 320 wounded, and retired toward Lucerna. The Carlists were also defeated with considerable loss at Balaguer, in Lerida. In June General Jovellar was appointed to the command of the Army of the Centre. By withdrawing troops from different parts of the country, and especially from

the northwest, he got together about 40,000 men. He then entered upon a decisive campaign against Dorregaray. On June 19th General Martinez Campos succeeded in crossing the river Ebro, notwithstanding the fact that a heavy fire was kept up upon his forces by the Carlists. By this movement he established communication with General Jovellar. Shortly after, the important Carlist fortress of Miravet, on the river Ebro, after a siege of several days, was surrendered unconditionally to General Campos, with 39 officers and 550 men. Four cannon and a quantity of war-material were also captured. In the latter part of June the fleet on the northern coast

bombarded with considerable effect the Carlist ports of Berme, Madaca, Matrico, and Deva. On June 29th General Jovellar gained a decisive victory over the united forces of Dorregaray, Cucula, and Villalain, after which the Carlists retreated in great disorder toward Cantavieja. On July 2d General Martinez Campos, with the Army of Catalonia, effected a junction with Jovellar, and the combined forces then proceeded to attack Cantavieja. Three batteries were established 400 metres from Cantavieja, with which Jovellar shelled the town. Dorregaray's army, feeling incapable of resisting an attack of the Alfonsist forces, left Cantavieja, and, crossing the river Ebro,

BILBAO.

marched into Catalonia. Two thousand prisoners were taken at Cantavieja. By the retreat of Dorregaray, four provinces were cleared of the Carlists. In the province of Barcelona, the royalists suffered a defeat at Molino del Rey on June 25th. In the beginning of July Saballs, who had commanded the Carlists at Molino del Rey, was defeated with great loss at La Junquera, in Gerona. On July 6th General Martinez Campos sailed with his army for Catalonia, while General Jovellar, with the main body of the Alfonsists, recrossed the Ebro in pursuit of Dorregaray, who, with 7,000 men, had vainly attempted to cross the river Cinca. In the mean while the Alfonsist generals, Quesada and Loma, forced the Carlist positions at Trevino, and sent Tello to relieve Vittoria, in the province of Alava. Many Carlists were killed in these movements, and 40 were captured. On July 7th Vittoria was released, and was entered by the Alfonsists. On July 19th the Fort Collado del Alpuente, the last Carlist stronghold on the Ebro, sur-

rendered to General Salamanca. Toward the end of July, General Martinez Campos took the town of Seo d'Urgel, in Lerida, by assault, and then besieged the citadel to which Lizaraga had retired with 3,000 men. In August a new levy of 100,000 men was made, and the recruits ordered to join their regiments by the end of October. During the month of August the siege of Seo d'Urgel progressed steadily. Reënforcements sent out by the Carlists to relieve the town were repulsed. On the 21st General Campos was joined by General Jovellar, who assumed direction of the siege. The garrison hoisted a flag of truce on the 24th, and surrendered on the 27th. The royalists took 820 prisoners, of which about 100 were officers, and captured 37 cannon. The Carlists' loss during the siege was 40 killed and 100 wounded, while the royalists lost about 800 killed and wounded. During September and October several minor engagements took place, which generally resulted in favor of the Government. In Catalonia General Delatre suc-

ceeded in completely dispersing the last remnants of the Carlists. In October the Carlists again bombarded San Sebastian, doing great damage. Toward the close of the year the defection from the Carlist ranks increased to an alarming extent. Every day brought new reports of whole bands of Carlists who had crossed over into France, or submitted to the King's officers. The dissensions in the Carlist army also gained ground. Thus, Generals Dorregaray and Saballs were arrested and tried by a court-martial for compromising the Carlist position in Catalonia.

In the early part of November Don Carlos wrote a letter to King Alfonso, offering his services in case of a war with the United States. The letter was as follows:

The attitude of President Grant is a prelude to war between Spain and the United States if you do not recognize the independence of Cuba. The revolution which you represent is responsible for this parricidal rebellion. Had I reigned, it would not have occurred; at least, not gained strength. Now, however, the integrity of the country is at stake, and all her children are bound to defend it. Should war break out, I offer you a truce as long as the contest lasts; but maintain my rights to the crown, as I retain the conviction that I shall one day wear it. I cannot send my loyal volunteers to Cuba, but I will defend these provinces and the Cantabrian coast, and will send out privateers manned by the indomitable population of that coast, which will pursue the merchant-ships of our enemies, and perhaps chase them into their own harbors. If you accept the truce, let us appoint representatives to settle the conditions. If you refuse, the world will be the witness that Catholic Spain has nobly done her duty.

In November General Quesada, after establishing a line of fortifications between Vittoria and Logroño, and driving the Carlists from the entire district of Rioja, marched toward Pampeluna. Having captured San Cristobal and all the Carlist positions in the neighborhood of Pampeluna, he succeeded in relieving that city after three days' hard fighting, in which twelve battalions of Carlists were routed with heavy loss. In the latter part of November the Carlists again began to bombard San Sebastian. A cabinet council on December 2d decided upon the formation of two armies of five divisions each; one in Navarre, to be commanded by General Martinez Campos; and the other in the Basque provinces, to be commanded by General Quesada. On December 14th General Moriones, with 3,000 men, relieved San Sebastian, and immediately set to work to clear Guipuzcoa of the Carlists. Shortly after, a large number of troops was sent to Hernani, which was very hard pressed by the Carlists. The question of the policy to be observed as to the return of Queen Isabella loomed up in March. On March 29th the Duke de Montpensier, having applied to the Marquis de Molino, the Spanish ambassador in Paris, for a passport to Spain, the marquis declined to grant it. The reason alleged for the refusal was, that if a passport were given to the Duke de Montpensier, ex-Queen Isabella would deem herself

equally entitled to one, and he added that the Madrid Government "considered her return to Spain inopportune."

Toward the close of March General Concha made charges against General Jovellar, in his capacity of Minister of War, stating that, during his governorship of Cuba, General Concha was compelled to exile General Riguelme for an act of insubordination. The Minister of War approved this measure; but, nevertheless, a few days afterward, promoted General Riguelme. General Concha pointed out that the principle of authority thus lost prestige in Cuba, owing to the personal policy of General Jovellar. The Government found it difficult to defend Jovellar from these accusations. An old Spanish law prohibits the appointment of an ex-governor of a colony to any public post until formal inquiry has been had into his past administration. It was understood that, in General Jovellar's case, no such inquiry had taken place since his return from Cuba.

On February 27th the indemnity to be paid to the United States Government for the families of the men of the *Virginus*, shot by the Cuban authorities, was fixed at \$80,000, and the ratification of the agreement was signed on March 11th. Of this sum \$45,000 was paid on April 17th, and the remaining \$35,000 on May 5th.

In April the difficulties with Germany with regard to the ship *Gustav*, fired upon by the Carlists, were definitely settled by the payment of 85,000 pesetas.

On February 26th the King issued a decree revoking the educational law of October 21, 1868. By this decree the exclusive use of the text-books and prospectuses in use in the schools and colleges during Queen Isabella's time was prescribed, the independence of the professors curtailed, and the manner of public instruction was otherwise changed on a strictly reactionary basis. In consequence of this decree, Castelar resigned his position in the University of Madrid toward the close of March, while soon after the Professors Giner de los Rios, Salmeron, the former President of the Republic, Azcarate, and Gonzalez Serrano issued protests against the action of the Government. In consequence of these protests, the professors were deprived of their position and arrested, and Professor Giner was exiled. The rector, Señor Pisa Pajures, who had also resigned, was replaced by Señor La Fuente, formerly editor of a Carlist newspaper. No Liberal professor would accept the post. Much dissatisfaction was expressed at the appointment of Señor La Fuente, even the students signing a protest against it, which was presented to the Government. A large number of teachers in the provinces soon followed the example of the Madrid professors in protesting against the decree, and were mostly banished.

The insurrection in Cuba continued during the year with varying successes. Few engagements of any account were fought. The ad-

ministration of the island was changed twice during the year. In February, General Concha was succeeded by Count Valmaseda, who, resigning in December, was replaced by General Jovellar. In the beginning of November a difficulty arose with the United States, owing to the rights of American citizens in Cuba. A considerable number of notes were interchanged. Great excitement was created in Spain, by the section of President Grant's message relating to Cuba. On December 28th a circular was transmitted to all the European Governments by Mr. Fish, the Secretary of State of the United States, asking an expression of the views of each foreign executive, regarding the question of American intervention in Cuba.

On November 30th the Philippine Islands were visited by a severe tornado, in which 250 lives were lost and 3,800 dwellings destroyed.

SPRAGUE, CHARLES, an American poet, born in Boston, Mass., in 1791, and died there January 21, 1875. He entered an importing house, first as an apprentice and then as partner. In 1820 he was appointed teller in the State Bank, and in 1825 was elected cashier of the Globe Bank, holding that position till 1865, when on account of advancing age he deemed it his duty to retire. Mr. Sprague first attracted notice as a poet in 1821, when he won a prize offered for the best prologue at the opening of the Park Theatre in New York. He bore off six times in succession like honors against all competitors. These dramatic poems secured for him immediate and lasting reputation. In 1820 he delivered a poem on "Curiosity" before the Phi Beta Kappa Society in Cambridge. This has been pronounced his best production. It was afterward published in Calcutta as an original work by a British officer; and then reprinted in London, where it was much praised in some of the literary newspapers. On the 4th of July, 1825, he pronounced an oration before the citizens of Boston, written in a style of animated and popular eloquence. In 1827 he gave an address before the Massachusetts "Society for the Suppression of Intemperance." His prologues have been pronounced by a critic the best which have been written since the time of Pope; and yet these are said to be surpassed by his domestic pieces. "The Brothers," "I See Thee Still," "The Family Meeting," "Lines to a Young Mother," and "Lines on the Death of M. S. C.," are among the best poems of domestic affection and sympathy to be found in the English language. He contributed some papers to the *New England Magazine* while it was edited by his friend J. T. Buckingham. The poet-banker mixed but little with society. He never traveled beyond the limits of New England, and never entered a steamship or railway-car. His social and conversational gifts drew around him a circle of attached friends, and he seldom walked from home without a friend by his side. For the poets and writers of his ac-

quaintance he felt sympathy and appreciation. His life was a tranquil one, passed either in business or among his friends and his books. There have been three collective editions of his writings: New York, 1841, 12mo; 1850, 12mo; and his "Poetical and Prose Writings, revised by the Author" (the only complete edition), Boston, 1850, 12mo. His poems are found in school-readers, and he has long had a national reputation.

STANHOPE, PHILIP HENRY, Earl, a celebrated English historian, essayist, and legislator, born January 31, 1805; died December 24, 1875. His father was Philip Henry, fourth Earl Stanhope, and his mother Hon. Katherine, daughter of Robert, first Lord Carington. James, the first earl, was created Viscount Stanhope of Mahon in 1717, and Earl Stanhope in 1818. The family descends from a common stock with the earls of Chesterfield and Harrington, and the late earl upheld the reputation of his ancestors worthily by his learning, ability, polish of manners, and integrity. He was better known to the world at large as Lord Mahon—his title as heir-apparent to the Stanhope peerage—and ranked as one of the most distinguished historians of the present day. He was the successor of the fourth earl, and the grandson of Charles, the third earl, so famous for his mechanical genius and scientific researches, who was the inventor of the Stanhope printing-press. He was educated at Oxford, where he became B. A. in 1827 and D. C. L. in 1834. He was elected M. P. in 1830 for Wootton Bassett, and afterward for Hertford, but lost his seat at the election of 1852. In 1834, in the first Peel ministry, he was Under Secretary of State for Foreign Affairs, and during the last year of the second Peel ministry was Secretary to the Board of Control. In 1846 he was elected President of the Society of Antiquaries, and in 1858 Lord Rector of the University of Aberdeen. He was also chairman of the National Portrait Gallery, which was established in 1857 in consequence of his urgent recommendation, and was honorary antiquary to the Royal Academy. He wrote: "A Life of Belisarius," "A History of the War of Succession in Spain," "History of England from the Peace of Utrecht to that of Aix-la-Chapelle" (1837-'52), "The Court of Spain under Charles II." (1844), "Life of the Great Condé" (1845), "Historical Essays" (1848), "Narrative of the Insurrection of 1745" (1850), and "History of the Rise of Our Indian Empire" (1858). He also edited the "Letters of the Great Earl of Chesterfield" (1845), and was one of the editors of the papers left by Sir Robert Peel.

STEWART, Sir HOUSTON, a British admiral, born in 1791; died December 10, 1875. He entered the navy in 1805, and was actively employed under Sir Samuel Hood and other commanders until 1808, and took part in the Walcheren Expedition. In 1811 he was promoted to the rank of lieutenant, and was continuously

employed under Lord Keith, Sir Pultney Malcolm, and others, until in 1814 he obtained the rank of commander. He obtained post rank in June, 1817; was appointed in October, 1823, to the Menai, in which he served on the coast of North America, and commanded the Benbow, from 1839 until 1842, seeing much active service in the Mediterranean. In the bombardment of St. Jean d'Acre, of which place he was for a time senior officer, the Benbow was the first ship in action, and, during the evacuation of Syria by Ibrahim Pasha, Captain Stewart had command of the British and Austrian forces employed off the coast. For his services he was rewarded with the Companionship of the Order of the Bath. In 1855 he was appointed second in command of the naval forces off Sevastopol, and he was created a Knight Commander of the Bath and a Commander of the Legion of Honor, of which he was appointed a Grand Officer in 1857. He was visitor and Governor of Greenwich Hospital from 1869 to 1872, and had been superintendent at Devonport dockyard, and afterward of Portsmouth. From February, 1850, to December, 1852, he was one of the Lords of the Admiralty, and he was for a few months, in 1852, a representative of Greenwich in the House of Commons. He was nominated a Grand Cross of the Order of the Bath in 1865.

ST. LEONARDS, EDWARD BURTONSHAW SUGDEN, Baron, a British peer and statesman, born in February, 1781; died January 29, 1875. He took to the study of the law, and produced a treatise on "Vendors and Purchasers" which attracted considerable attention, and was shortly afterward called to the bar. In 1822 he was made a King's Counsel, in 1828 was returned to Parliament for Weymouth, and in 1829 was appointed Solicitor-General under the government of the Duke of Wellington. In 1834 he was made Lord Chancellor of Ireland by Sir Robert Peel, and occupied the same post under Sir Robert's ministry at a later period. On the return of the Conservative party to power under the Earl of Derby in 1852, he was raised to the Lord Chancellorship of England, with the title of Lord St. Leonards; and was again offered this dignity in the second Derby administration in 1858, but declined it on the ground of his advanced age.

STORER, BELLAMY, was born in Portland, Me., in 1796, and died at Cincinnati, O., on June 1st, at the age of 89 years. He graduated at Bowdoin College, and was admitted to the bar in 1817. The same year he removed to Cincinnati and began the practice of law, and took a leading part in politics. In 1824 he advocated the election of John Quincy Adams as President of the United States, and became one of the editors of *The Crisis*, the organ of his party. From 1835 to 1837 he was a member of Congress, and in 1844 he was a presidential elector, and gave his vote to Henry Clay. He was for many years professor in the Cincinnati Law School and served for nineteen years

as Judge of the Supreme Court of Cincinnati. Judge Storer was also a popular orator, speaking not only at political but at religious gatherings. At one time in early life he was a leading spirit in a band of religious young men called "Flying Artillery," who went from town to town to promote religious awakenings.

STRUENSEE, GUSTAV VON, a German novelist, better known by his *nom de plume* Gustav von See, born December 13, 1803; died September 29, 1875. He studied law in the Universities of Bonn and Berlin, and then entered the service of the state. He did not enter the literary field up to his fortieth year, when he wrote his first novel, "Das Pfarrhaus zu Aardal." His following works, "Egon" and "Ranci," gained for him considerable celebrity. He now published, at short intervals, a large number of novels, which at the time of his death amounted to over 70 volumes. Probably his best work is "Die Egoisten," published in 1853. His last novels were "Ideal und Wirklichkeit" (3 vols., 1875), and "Das Majorat" (3 vols., 1875).

SURF-CAR. A valuable invention for the rescue of human life from wrecked vessels is the "American Life-Car," manufactured by Joseph Francis, of New York City, the authorship of which is to be ascribed to Captain Douglass Ottinger, of the United States Revenue Marine. This car is the only agent yet invented for the transfer of human beings from a stranded ship on a stormy beach or rocky shore, when the surf is so violent as to render the English life-boat useless. The invention is not patented, but has been relinquished by Captain Ottinger to the use of the public. The inventor was appointed to superintend the establishment of life-saving stations on the coast of New Jersey, according to an act of Congress, in 1848, and, while upon this service, conceived the notion of a life-boat of corrugated iron. He obtained the services of a number of practical surf-men in the construction of a model, and then employed Mr. Francis to manufacture such a boat for each of the stations. The idea of a surf-car formed itself in his mind while busied in this service, and Mr. Francis was commissioned to construct the car according to the design and under the direction of Captain Ottinger. The invention has been claimed by Mr. Francis, but Captain Ottinger's name is on the files of the Patent Office, and he established his claim as the originator of this admirable invention so adequately before a committee of Congress, that an award of ten thousand dollars was granted him in consideration of its great services in the rescue of life.

The surf-car is constructed of lightly galvanized iron. When closed it is nearly water-tight. There is room in the chamber for four adults or eight children. At either end a short rope is fastened, with a metal ring at its end. These cars are in exclusive use at the stations for the saving of life along the American shore. A

small mortar of five and a half inches calibre is usually employed to bring about a connection between the ship and the shore; this projects a twenty-pound iron ball with a line attached across and over the wreck; or, at times, the

line is cast over the vessel by means of a rocket. By this line a heavy hawser is drawn out to the wreck, and made secure. With the hawser a light but stout line also is dragged out to the ship. The two rings at the ends of

THE LIFE OR SURF CAR,

Which conveys its passengers safely through the breakers of the sea when life-boats are of no avail. It gave safe transit in winter tempest on our coast, from the ships *Ayrshire*, 101; *Georgia*, 271; *Cornelius Grinnell*, 284; *Chauncey Jerome*, 70; and from other vessels, in all nearly 4,000 people. This picture shows the Life-Car on its first errand to save the shipwrecked when beyond the reach of any other aid. Invented by Captain Douglass Ottinger, U. S. E. Marine. (This invention is not patented, but left free to be used everywhere.)

the ropes attached to the life-car are slipped upon the hawser. The shore end of the line is then made fast to the outer end of the car, and another line to the other, which is played out

as the car is drawn along the hawser out to the distressed vessel. When the car is brought to the ship's deck, the lid is opened, and the passengers placed within, lying close in the low

A cannon-ball, with a rope attached, thrown across a water-logged or sinking ship during a gale too fierce for a life-boat to be used; the relief-vessel making a breakwater of the wreck, rides by a hawser in its lee, while the Life-Car is kept in transit to save the people in peril.

aperture; and the car is then drawn ashore, while the men on the deck hold it taut and steady with the outer line.

The services which this simple but incal-

culably beneficent contrivance has rendered have been signal and incontestable. Thousands of souls have been preserved by its aid where no other means of rescue could have availed.

Its efficiency was first established at the wreck of the ship *Ayrshire*, near Long Branch, N. J., when two hundred passengers, men, women, children, and infants, were safely brought to shore through a heavy-beating surf, which no

other surf-boat or life-saving apparatus known could have withstood. The surf-car had remained unemployed at the life-station near the spot of the wreck for nearly two years, and it was now put in use, as a last resort, together

A REVENUE RELIEF-CRUISER,

Anchored seaward of a vessel that has struck the ground on the sea-coast in a storm, too far off shore to be aided from land, a rope having been thrown by a cannon-ball across the vessel in distress. The Life-Car is seen on its way to rescue the shipwrecked people.

with Captain Ottinger's method for overcoming the inertia of a rope when jerked suddenly from a state of rest by a cannon-ball. After its reputation was thus established, it was often employed

with distinguished effectiveness; though the full scope of its possible usefulness has probably not yet been proved.

SWEDEN AND NORWAY,* two kingdoms of Northern Europe, united under the same dynasty. King, Oscar II., born January 21, 1829; succeeded to the throne at the death of his brother, Charles XV., September 18, 1872. Married June 6, 1857, to Sophia, born July 9, 1836, daughter of the late Duke Wilhelm of Nassau. Oldest son: Gustavus, heir-apparent, Duke of Wermland, born June 16, 1858.

The executive authority is in the hands of the King, who acts under the advice of a Council of State, composed of ten members, of whom two have the title of State Ministers, and eight that of Councilors of State; of the latter five are chiefs of departments. At the close of 1875, the Swedish Council of State was com-

posed of the following members: 1. The Minister of State and Justice, Baron B. de Geer, appointed May 11, 1875. 2. Minister of State and Foreign Affairs, Major-General Oscar M. de Björnstjerna, appointed Minister of Foreign Affairs, December 17, 1872; 3. C. J. O. Baron Ålströmer, appointed June 15, 1870; 4. Chief of the Department of the Navy, Baron F. W. de Otter, appointed December 23, 1874; 5. Chief of the Department of Ecclesiastical Affairs, Dr. J. F. Carleson, appointed May 11, 1875; 6. Chief of the Department of the Interior, C. J. Thyselius, appointed May 11, 1875; 7. H. G. de Lagerstroll, appointed May 11, 1875; 8. Chief of the Department of War, Major-General Erik Oscar Weldenhielm, appointed December 5, 1871; 9. Dr. J. H. Lovén (June 5, 1874); 10. Chief of the Department of Finance, Dr. H. L. Forsell, appointed May 11, 1875.

In Norway the King exercises his authority through a Council of State, composed of one Minister of State and nine Councilors. Two of the councilors, together with the minister, form a delegation of the Council of State, residing at Stockholm, near the King.

The area and population of Sweden, in 1874, are given in the following table. The towns which, in 1874, had a population of more than 10,000 inhabitants, were: Stockholm, 150,446; Göteborg, 68,748; Malmö, 30,676; Norrköping, 26,365; Gefle, 16,787; Carlskrona, 16,643; Upsala, 12,367; Jönköping, 12,548; Lund, 11,680.

* For latest statistics of emigration, and the army of Sweden, and the commercial navy of Norway, see *ANNUAL CYCLOPEDIA* for 1874.

In the budget for 1876 the revenue and expenditures were estimated at 95,676,018 crowns.

The public debt, at the end of 1874, amounted to 130,477,920 crowns.

The commercial navy was, according to the shipping list of 1875, as follows: 2,467 sailing-vessels, of 119,604 new lasts; and 461 steam vessels, of 17,958 new lasts, and 20,421 horse-power.

The navy, which was entirely reorganized in 1866-'67, consisted, at the beginning of 1875, of 34 steamers, 10 sailing-vessels, 87 galleys: total, 131 vessels, of 412 guns. The navy was officered and manned according to the reorganization of August 27, 1875, as follows: 1. By the "Royal Navy;" 2. By the "Reserve;" 3. By the "Bévaring." The Royal Navy comprises 2 rear-admirals, 6 commanders, 20 commodore captains, 43 captains, 69 first and second lieutenants, and 5,991 sailors, carpenters, and petty officers. The reserve consists of 76 officers, 80 petty officers, and 15 engineers, and the "Bévaring" of 40,000 men.

The aggregate length of railroads in operation, on September 1, 1875, was 3,600 kilometres; of those in course of construction, 2,600 kilometres (1 kilometre = 0.62 mile). The number of post-offices in 1873 was 641. The revenue amounted to 3,170,561 riksdalers; the expenditures to 2,869,986. The aggregate

length of the state telegraph-lines was 7,848 kilometres; and of telegraph-wires, 18,633.

The imports and exports were as follows in 1873 (value in crowns):

COUNTRIES.	Imports from.	Exports to.
Denmark.....	87,240,000	21,874,000

BERGEN, NORWAY.

The area of Norway is 122,280 square miles. The population was, in 1874, estimated at 1,796,000. The following towns had, in 1870, a population of more than 10,000 inhabitants: Christiania, 66,657 (in 1872 about 70,000, and with the suburbs 80,000); Bergen, 80,252; Drontheim, 20,858; Stavanger, 16,053; Drammen, 15,458; Christiansand, 11,468. The revenue in 1874 amounted to 9,053,000 specie dalers (1 specie daler = \$1.11), and the expen-

* 1 Swedish last = 3.27 tons.

ditures to 8,013,000 specie dalers. The public debt on December 31, 1874, was 9,660,000 specie dalers. On January 1, 1875, the troops of the line numbered 13,000 men, the reserve forces 19,000, and the landvaern 11,000. The naval force, in 1873, consisted of 125 vessels, with an armament of 324 guns. Of these 27, with 151 guns, were steamers.

The commerce in 1873 was as follows (value in specie dalers):

COUNTRIES.	Imports from.	Exports to.
Great Britain.....	15,455,000	11,542,000
Germany.....	10,612,000	5,316,000

Brazil.....	1,068,000	122,000
Other countries.....	688,000	612,000
Total, 1873.....	45,350,000	83,967,000
Total, 1872.....	34,923,000	23,252,000

The movement of shipping, in 1873, was as follows:

SHIPPING.	Vessels.	Tons.
Arrivals.....	13,450	894,429
Clearances.....	13,404	863,776

The aggregate length of railroads in operation at the end of 1874 was 502 kilometres. The aggregate length of telegraph-lines 6,415 kilometres; of wires, 10,276 kilometres.

The Swedish Riksdag met on January 16th. The presidents elected were, in the First Chamber, Lagebjelke and Asker; and, for the Second, Lagerstrale and Nyk. On the 18th the session was formally opened by the King. The transactions of the Riksdag were of no great importance. On March 8d the First Chamber rejected the Government bill providing for the changes in the fundamental law of those provisions relating to military affairs. On April 10th both Chambers adopted a resolution to reorganize the Council of State. The Second Chamber, on May 15th, rejected the military bill, demanding an army of 180,000 men and a term of service of from twelve to seventeen and a half months, and at the same time adopted a law fixing the strength of the army at 80,000 men and the term of service at ninety days. The session closed on the 26th of May.

The elections for members of the Riksdag took place during September; the members of the First Chamber, 54 in number, and the entire Second Chamber, 198 members, were voted for. Of these the *Landmanns*, or Farmer party, obtained 10 in the First Chamber, a gain of eight, and 180 in the Second Chamber, being a loss of six.

The Storting of Norway was opened on February 2d. The speech from the throne contained the following passages:

The revenues of the state have come in quite rapidly, and especially the duties have reached a figure, during the past year, never yet before attained, a proof that the consumption of the country has been unusually large. Together with the commercial progress, the general raising of prices continues, and makes the fixed salaries, which were regulated under different circumstances, insufficient. I will therefore present again to the Storting the same motion for the increase of salaries of persons in the service of the state, which has already been partly adopted. A motion will also be introduced to increase the salary of the lower military classes as made necessary by the circumstances. The demand for new railroads, and the willingness to make sacrifices for them, continue undiminished. A commission has been appointed to deliver an opinion on various questions connected with this important matter. I shall present a bill to the Storting providing for the complete reform of the monetary system, as laid down in the law of June 4, 1873. In connection herewith it will be moved that Norway join the monetary convention existing between Denmark and Sweden. Our relations with foreign powers continue to be of the most friendly nature.

In March the Storting adopted the bill introduced by the Government, joining the Scandinavian Monetary Convention. It adjourned on June 12th.

On May 24th the King and Queen left on a visit to Berlin, where, having passed through Copenhagen on the 25th, they arrived on the 28th. (See GERMANY.)

In the beginning of July the King also paid a visit to St. Petersburg. (See RUSSIA.)

SWITZERLAND, a republic of Central Europe, consisting of twenty-two cantons, three of which are divided each into two independent half-cantons. The supreme legislative and executive authority is vested in a Parliament of two Chambers, the *Ständerath*, or State Council, and the *Nationalrath*, or National Council. The first is composed of forty-four members, two for each canton. The Nationalrath consists of 135 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every 20,000 souls. Both Chambers united are called the Federal Assembly, and as such represent the supreme Government of the republic. The chief executive authority is deputed to a Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The President and Vice-President of the Federal Council, who are the first magistrates of the republic, are elected by the Federal Assembly for the term of one year, and are not reeligible till after the expiration of another year. The President of the Federal Council for the year 1875 was J. J. Scherer, of the canton of Zurich; Vice-President, E. Borel, of the canton of Neuchâtel. President of the National Council for the session of the Federal Assembly, beginning in June, 1875, J. J. Stämpfli, of the canton of Bern; Vice-President, E. Frey, of the canton of Basel Country. President of the State Council, G. Ringier, of the canton of Aargau; Vice-President, R. Droz, of the canton of Neuchâtel.

Area of Switzerland, 15,992 square miles

Population, according to the census of 1870, 2,669,147, of whom 1,566,347 (58.7 per cent.) were Evangelical; 1,084,869 (40.6 per cent.) Catholics; 11,435 members of Christian sects, and 6,996 Jews.

The total revenue of the Confederation in the year 1874 amounted to 46,844,809 francs; the expenditures to 45,586,171 francs. The budget for 1875 estimated the revenue at 39,516,000 francs; the expenditures at 39,766,000 francs. The liabilities of the republic amounted, in 1874, to 30,635,552; as a set-off against which there is Federal property amounting to 31,788,308 francs.

The Federal army consists of the "Bundesauszug" and the "Landwehr." The Bundesauszug is composed of the men from twenty to thirty-two years of age, and the Landwehr of the men from the thirty-third to the completed forty-fourth year. The nominal strength of the armed forces of the republic was as follows, on January 1, 1876:

TROOPS.	Bundesauszug.	Landwehr.	Total.
<i>Staff</i> { 1. General staff.....			54
2. Division, brigade, and regimental staffs.....			
<i>Infantry</i>	784	784	1,568
<i>Cavalry</i>	82,786	82,786	165,572
<i>Artillery</i>	8,492	8,492	6,984
<i>Engineers</i>	18,933	6,422	20,254
<i>Sanitary corps</i>	8,144	8,144	6,298
<i>Administrative troops</i>	1,656		1,656
	408	408	816
Total	106,102	97,086	208,192

The aggregate length of Swiss railways, on January 1, 1875, was 1,638 kilometres (1 kilometre = 0.62 mile), and in October, 1875, about 2,000 kilometres; that of telegraph-lines, in 1873, 5,843 kilometres; of wires, 14,169 kilometres. The Post-Office in Switzerland forwarded 48,519,764 inland, and 14,733,122 foreign letters, in 1874, making a total of 63,252,884 letters. The number of newspapers forwarded was 45,651,344, and of packages 19,925,200. The receipts of the Post-Office, in 1874, were 14,465,622 francs, and the expenditures 13,932,545 francs.

On February 13th the Federal Council appointed the following as division commanders: Aubert in Geneva, Lecomte in Lausanne, Meyer in Bern, Merian in Basel, Rothplass in Aarau, Egloff in Tagerweilen, Vögeli in Zurich, and Gingins in Lasarraz.

The Federal Assembly met on March 8th, and adjourned again on the 20th. Both Houses were mainly occupied with the religious question, the various appeals of the Bernese Catholics in favor of the extruded parish priests having come before them in constitutional course, after rejection by the Federal Executive, as well as another set arising out of the deposition of Bishop Lachat, by the Diocesan Council of the northwestern cantons which form the bishopric of Basel. In the former case, the decree of the Bernese Government, forbidding

the nonjuring priests to reside within the district in which they formerly officiated, was represented by Catholic members as an act of tyranny, and one, indeed, committed *ultra vires* by the authority of any single canton. In the case of the ex-Bishop of Basel, his advocates laid stress on the gravamen of the offenses charged against him being simply the acknowledgment of the infallibility dogma, which he but accepted in common with the rest of the episcopate. These views were combated by the speakers on the other side, upon the facts of the cases themselves; but the main argument against the appeals was, that there appeared to be no proper constitutional grounds for overruling the decisions of the executive, that the religious disputes appealed on were matters within the privileges of the cantons to settle. On the Lachat affair, the vote finally taken in the Lower House was 80 to 24 against the appeal; and the Council of Cantons supported this on division, by the smaller majority of 20 to 15. As to the Bernese question, it was not pressed to a division in the Upper House, which accepted the vote of 74 to 25 against the appeal in the National Council as decisive. On April 7th the Federal Council, in accordance with the law which provides for a vote by the people on all bills passed by the Federal Assembly on which it is demanded by 30,000 voters, or the governments of eight cantons, fixed upon May 28d as the day on which the civil marriage and the electoral laws were to be submitted to the vote of the people. For demanding the popular vote on the former, 107,476, and for a vote on the latter, 108,325 signatures had been obtained, thus far exceeding the required 80,000. At the election on May 28d the civil marriage law was adopted by a vote of 212,854 against 204,700, while the electoral law was rejected by a vote of 206,805 against 202,140.

The Federal Assembly had another short session from June 7th to July 3d, in which the principal business transacted was the decision on the Bernese question. The Assembly met again on September 5th, and adjourned on September 18th.

The newly-elected Assembly met on December 6th, and on December 10th elected the Federal Council for the year 1876. The following are the new members of the Council: Welti (Aargau), Schenck (Bern), Scherer (Zurich), Ruchonnet (Vaud), Heer (Glarus), Anderwert (Thurgau), and Hammer (Solothurn). The Council elected Welti, Federal-President; and Heer, Vice-President; Numa Droz was afterward elected in place of M. Ruchonnet, who declined.

On December 24th the assembly adjourned to March, 1876.

On January 30, 1874, the Executive Council of the canton of Bern had issued a decree expelling ninety-seven priests from the territory of the district for refusing to obey the laws. An appeal for the abrogation of this decree

was addressed to the Federal Council, and was rejected by that body on March 26, 1874. The Catholics then appealed, in March, 1875, from the decision of the Federal Council to the Federal Assembly, invoking the provision of the new constitution, adopted since that decision, which declares that no canton shall expel a citizen from its territory. In the discussion that followed it was stated that another appeal had been made to the Federal Council, raising this question of the applicability of the new constitution to the case, and a delegate from Bern moved that, in view of this fact, no action should be taken by the Assembly until the decision of the Federal Council had been given upon this new point. This motion was agreed to. On March 27th the Federal Coun-

cil issued an order, inviting the Government of Bern to report, at as early a day as possible, whether it proposed to continue in force for any considerable period of time the decree in question; and, if so, to communicate the reasons which, in its view, would render necessary the further maintenance of such an exceptional measure. On May 31st the Federal Council pronounced the decree of expulsion incompatible with the existing constitution, and directed the Government of Bern to revoke it within two months. On June 13th the canton appealed to the Federal Assembly from this decision. This body sustained the decision of the Executive, but extended the time for the revocation of the decree until the middle of November.

BERN.

The Catholic Board of Education of St.-Gall passed a resolution, on January 29th, transferring the religious instruction to the school-teachers, as the priests had not submitted to the exclusion of the dogma of infallibility and the syllabus from this instruction; and, if the priests should refuse such children communion and confession, Old Catholic priests were to be appointed.

On January 8d the Council of the canton of Geneva repealed that article of the new religious law which prescribed that the vote of at least one-third of the Catholic voters was necessary to elect the parish priests.

In the cantons of Bern and Geneva the church councils, in the beginning of February, gave permission to the Old Catholics to use the Catholic churches.

The elections for the Grand Council of the canton of Ticino took place in February. The result was a victory for the Catholics, who, dur-

ing the war of the Sonderbund in 1847, and ever since, had been out of power.

The elections for the Federal Assembly took place on October 31st. The result did not change the complexion of either Chamber, the Liberals retaining a majority in both Houses.

A terrible storm visited the canton of Geneva and the French frontier on July 8th. It was accompanied with hail, and the stones were of enormous size. The glass in all the windows in the district where the storm raged was demolished, and many persons were killed and injured.

Twenty-two hundred workmen, employed on the St.-Gothard Tunnel, struck work on July 29th, and became riotous. They gathered at the northern entrance of the tunnel and blocked it. The Swiss Government sent a body of troops to the spot, who dispersed the rioters, killing four of them and wounding a large number of others.

T

TELEGRAPHY. Among the more recent inventions and improvements in this branch of applied science, the duplex and quadruplex systems of telegraphy, and the American automatic telegraph, are the most important, having already wrought a partial revolution in this mode of sending intelligence, with promise of total and speedy displacement of the comparatively slow and costly system now in common use. The duplex telegraph, brought for the first time into practical working shape by Mr. Joseph B. Stearns, of Boston, makes it possible to send two dispatches over a single wire in opposite directions at the same time. Attempts to do this have from time to time been made ever since 1853, but without any practical success until Mr. Stearns took up the problem in 1868. It has now been brought into use on several lines; and it has also been found, as will be seen when we come to speak of the quadruplex telegraph, that the principle which underlies the invention is capable of very great extension.

To understand the duplex telegraph it must be borne in mind that the galvanic battery gives birth to a force which returns in a circuit to where it was generated, and accelerates the liberation of more force, being, like a steam-engine, employed partly in fanning its own fire. This circuit can be performed much more easily through great lengths of some substances, such as the earth and metals, than through very small spaces of others, as the air and the dilute acid of the battery. Galvanic electricity is, therefore, strictly confined in a sort of mill-round; or, for our present purposes, it may best be represented by water flowing through such a system of water-courses as is shown in the annexed cut. We will suppose them to

FIG. 1.

include a reservoir and a secondary circuit at each end. Let the reservoirs *A* and *B* have water pumped into them by force-pumps, and distributed by them to both the main and secondary circuits, in equal quantities and in the direction of the arrows, so as to maintain the water-wheels *X* and *W* in the same positions. The highest points in the system must be supposed to be at the front of the reservoirs, and the lowest at the back of them.

If an additional volume of water come from *A*, being equally divided on each side of *W*, it will not move that wheel, but it will move

the wheel *X* by destroying the balance which previously existed there. But, if a similar extra volume be at the same time sent from *B*, the pressure in that part of the circuit between *W* and *X* will overcome the opposing forces at each of the points, and both wheels will be worked, each virtually by the distant reservoir and not by its own.

If we substitute galvanic batteries for the reservoirs, wires for the water-courses, and electricity for the water, this gives us the principle of the duplex telegraph.

In the quadruplex telegraph, the invention of Mr. Thomas A. Edison, of Newark, N. J., the aim, as in the duplex, is to allow of several persons using the same wire at one time. In fact, the arrangement may be used as a duplex telegraph if required, so that the wire is by it made susceptible of either double or quadruple employ.

The instruments used are modifications of those of the Morse system. The "key" is shown in Fig. 3, and the changes made to adapt it to the uses of the quadruplex telegraph may be understood from Fig. 2. The essential part of the receiving instrument is an electro-magnet, which consists of a bent bar of soft iron, surrounded at each end by a coil of wire connected with the wire of the line. The current, passing through these coils, communicates to the iron core magnetic properties, and enables it to attract another piece of iron or steel called its armature; but, when the current ceases, the magnetism ceases also, and a spring—too weak to neutralize it—draws back the armature. It is shown in section at *M*, in Fig. 2. When the armature and the lever carrying it are discarded, and instead of them a jointed tongue of steel, as at *P M*, is inserted between the poles of the magnet, it will be unaffected by the current except when a change occurs in its direction. It is then called a polarized magnet. Its use will be explained a little further on. One of the keys, *K*, in the diagram, is provided with a spring, which is in contact with the metal of the key when this latter is in its normal position, and maintains across the key a circuit including a portion of the battery *B*. But when the key is depressed the spring comes in contact with a screw, to which another circuit is connected, applying the full strength of the battery to the line. The circuit across the key is never broken, because the spring remains in contact with the arm of the key until it begins to press against the screw. This key works the magnet *M*, which has its retractile spring so adjusted as to be overcome only by the full intensity of the current when the key is down. The other key, *K'*, is for changing the direction of the current, and working the polarized magnet,

FIG. 2.

PM. Its construction is such that, when not in use, one pole of the battery, the positive, for example, is in connection with the line, and the negative with the earth, necessitating the passage of the current through the line in the first place; but when the key is touched the negative pole is connected "to line" and the positive to earth, reversing the direction of the current. These reversals of direction operate, as has been said, the polarized magnet *PM*.

To revert to the illustration we made use of in describing the duplex, let the reader picture

to himself a water-course in which both the direction and the volume of the current can be changed at pleasure. He can suppose, in addition to the water-wheels before figured, and which will indicate the force of the stream, a pair of hinged valves or gates, which, whether the current be strong or weak, will be moved only by a change in its direction. The former will represent the ordinary magnets, and the latter the polarized magnets.

It is plain that, so far, this is only another form of duplex, sending two messages in the same direction at once.

To make it a quadruplex telegraph it is necessary, in the first place, to add to it Stearns' duplex, or a contrivance similar to it. Even then a dead-lock would happen when the currents sent from each end of the line should be of the same intensity, and opposite in direction; that is, when all eight operators were working together. To remedy this, extra batteries are introduced, which are neutralized by part of the current in the main circuit, when that is in a working condition, but are set free to work the instruments when the currents in the main circuit destroy one another. In the

FIG. 3.—MORSE KEY AND REGISTER.

diagram, Fig. 2, the extra batteries, etc., have been omitted, as also the transmitting apparatus of one station and the recording instruments of the other.

The American Automatic system may be said to have been perfected in 1873. The great rapidity with which messages are transmitted and recorded by it is its principal advantage,

but it has others—as requiring a smaller force of operators and less specially skilled. The usual work of a Morse operator is acknowledged to be about 1,500 words an hour, but, by the automatic method, to receive and print *double* that number of words per *minute* is an ordinary feat, and as many as 7,000 words have been legibly recorded in that time. As every

word contains, on an average, five letters, and as each letter is represented by a varying number of dots and dashes, each formed by a separate discharge, the circuit, it is calculated, must be "closed" and "broken" and the chemicals in the battery must cease and recommence their action 60,000 times per minute, in the ordinary working of the automatic system.

In every form of electric telegraph the signals are given by an intermittent flow of electricity. In the Morse system a "key," Fig. 3, is used which, in its normal position, "breaks" the circuit, but when depressed by the finger of the operator allows the electricity to pass through it on its mission. Arrived at the distant station, it is converted, by means of an electro-magnet, into mechanical motion, which is utilized either to produce indentations in a moving slip of paper by means of a style, or, more commonly, to give a series of taps, which the operator understands, by an instrument called a "sounder."

In the automatic system the means employed are altogether different. The message is, first of all, prepared by punching holes in a narrow ribbon of paper. These perforations are so grouped as to represent the dots and dashes of the telegraphic alphabet, and by the punching-machine, which is very complicated, all that are required to form a letter are punched at one stroke. In comparing the two systems this must not be lost sight of, as the time taken in punching must, of course, be added to the time of transmission. The machine, however, does its work more quickly than the Morse operator with his key, and, the time occupied in transmitting being so vastly less, the "automatic" may claim to have rendered old-fashioned telegraphy comparatively slow.

After the perforated slip of paper has been prepared, it is taken to the operator's table, where it is made to move forward rapidly between a metallic drum and a needle carrying two small steel wheels which rest upon it. Drum and wheels form part of the circuit, which is broken by the non-conducting paper interposed and closed when the holes permit of the wheels and the metallic cylinder beneath coming into contact. At the receiving-station a very similar arrangement does duty as a register. The paper slip is there saturated with a certain chemical solution which renders its whole substance a good conductor, and, instead of the wheels, there is an iron style or "pen." When electricity arrives over the line, it decomposes the moisture of the paper into oxygen and hydrogen, and oxidizes or rusts the pen. A little of this oxide is rubbed off by the quickly-moving paper, and enters into combination with the chemical still contained in it, producing a stain in the form of a dot or dash which corresponds with the holes punched in the paper at the sending-station (Fig. 4). Where three holes come together, both wheels form a contact, and a dash is produced, because the second wheel touches the cylinder while

the first passes over the paper between the upper holes.

The germ of the automatic system was contained in the "Chemical Telegraph" invented by Alexander Bain, a Scotchman, in 1846. Bain was the first to use the perforated paper to

FIG. 4.

transmit and the chemically-prepared paper to receive the message. But his invention, from a practical point of view, bears about the same relation to the American system that the steam-engine, as known to the ancients, does to that of James Watt. Bain's system improved by the late Sir Charles Wheatstone and known as Wheatstone's automatic system, is employed to a limited extent in Great Britain; but, thus improved, its speed does not exceed 60 to 100 words a minute.

The accompanying cut (Fig. 5) illustrates the results of attempting high speed on the Bain

FIG. 5.

telegraph. Instead of recording themselves by decided dots and dashes, the electric discharges leave indistinct and elongated traces, which, when the speed amounts to 300 words or over, run into one another and make a continuous line. This effect is due to the property which all electrified bodies have of inducing electricity in neighboring bodies. The earth, reacting on the line wire suspended above it, induces in it what is called an extra current, both on closing and breaking the circuit. On first closing the circuit the extra current runs in the contrary direction to the primary, and retards and weakens its action, so that, if suffered to record itself, it would do so by a mark like this:

the long after-part being caused partly by the accumulated electricity, and partly by the second extra current which

FIG. 6.

is in the same direction with the primary one.

In the American system this evil is made to cure itself. The inventor simply interposes

another wire with a coil, shown at *A, C, E* (Fig. 6). This divides the current, one part of which is again subdivided on reaching the earth, and a moiety of it ascending the ground-line at *D'* counteracts the first weak installment of the other. Then, as each turn of the coil, *C*, acts the part of the earth on the turn next it, the whole sets up another powerful extra current, which at first forces the full strength of the main current through the recording instrument, and ultimately counteracts the accumulated electricity and the second extra current due to the earth. In practice several such lines are used, and magnets, which are preferable, instead of coils. This occasions a great loss of electricity, but the sensitiveness of the receiving apparatus is such that less than one-fourth of the total strength of the current is sufficient to give a good record.

The chemical used by Bain in his sensitized paper was ferrocyanide of potassium, which, with the oxide from the iron pen and an extra equivalent of oxygen, forms Prussian blue. The oxygen of the air, it has been found, protracts this action, and thus arises another source of confusion, which is not affected by the device just described. A preferable combination, requiring only the protoxide of iron, which is formed immediately by the electricity, is used in the American system.

One of the most curious of the recent discoveries respecting the chemical action of electricity is that of its usefulness, under certain circumstances, as a lubricator. During Mr. Edison's experiments on the automatic telegraph he perceived that, when using a paper soaked in a certain solution, the pen was apt to slip whenever a discharge occurred. This effect was found to be so marked that a person drawing a strip of metal along the paper—leaning rather heavily on it—finds his hand obliged to move in a succession of jerks when signals are sent by a current powerful enough to overcome the resistance of his body. On this principle Mr. Edison has constructed a little instrument in which a style is kept pressed against the paper by springs, so as to make a continuous indentation, except when the current is passing. Its record is, therefore, the reverse of that of a Morse register; but the "electromotograph," as it is called, differs also from the "Morse" in being the most sensitive recording instrument known.

TENNESSEE. The Legislature adjourned toward the close of March, after a session of seventy-five days. During this time 143 laws were passed and 77 resolutions adopted. Among the most important results of the legislation is the law imposing a tax of one and a half per cent. on the gross earnings of railroads, which, it is estimated, will yield an annual revenue of from \$110,000 to \$135,000. A number of amendments to the constitution were proposed, which may be summarized as follows: The Governor, Controller, and Treasurer, to hold office for four, and Judges of the

Supreme Court for twelve years; Judges of the Supreme Court to be reduced to three in number, as under the old constitution, and all judges to be elected by the Legislature, which shall have power to create courts with both common-law and chancery jurisdiction, and to authorize misdemeanors in civil causes to be tried by a jury of less than twelve men; the Legislature also to have power to pass fence, road, and other local laws, and to make them operative in such counties as choose to adopt them; the clauses exempting \$1,000 worth of property in the hands of each tax-payer, prohibiting the State from owning a State bank, prescribing a poll-tax qualification, and prohibiting clergymen from serving in the Legislature, are stricken out; provision is made for exempting manufacturing establishments from taxation for a period not exceeding six years; future Legislatures are authorized to submit constitutional amendments directly to the people; and, in reconsidering bills vetoed by the Governor, so to amend them as to obviate his objections. Before becoming a part of the constitution, these amendments must be approved by a two-thirds vote of the next Legislature, and then be ratified by the people.

A law was passed abolishing the office of Revenue Collector, which, it is estimated, will save the State \$300,000 annually. Provision was made for the establishment of a Bureau of Agriculture, Statistics, and Mines, and for the appointment of a Commissioner of Immigration.

After a protracted contest in the Legislature, ex-President Andrew Johnson was chosen to represent the State in the United States Senate. After the death of Mr. Johnson, Governor Porter appointed David McKendree Key, of Chattanooga, to fill the vacancy in the Senate. Mr. Key was born in Tennessee, January 27, 1824, graduated at Hiwassee College in 1850, and soon after began the practice of law in Chattanooga. He was a presidential elector on the Democratic ticket in 1856, and on that headed by Breckenridge in 1860. He served in the Confederate Army as a lieutenant-colonel, was a member of the Tennessee Constitutional Convention in 1870, and was Chancellor of the Third District from 1870 until his appointment as Senator. He is a Democrat.

The present State government comprises the following Democrats: Governor, James D. Porter; Secretary of State, Charles E. Gibbs; Controller, John C. Burch; Treasurer, William Morrow. The Legislature is composed as follows:

PARTIES.	Senate.	House.	Joint Ballot.
Democrats.....	23	70	93
Republicans.....	2	5	7
Democratic majority....	21	65	86

The State is represented in the United States Senate by Senators Henry Cooper (Dem.), whose term will expire March 8, 1877, and

David McKendree Key, whose term will expire March 3, 1881; and in the House by William McFarland (Dem.), Jacob M. Thornburgh (Rep.), George G. Dibrell (Dem.), H. T. Riddle (Dem.), John M. Bright (Dem.), John F. House (Dem.), Washington O. Whithorne (Dem.), John D. C. Atkins (Dem.), William P. Caldwell (Dem.), and H. O. Young (Dem.).

The industrial resources of Tennessee are a source of vast wealth to the State. The most abundant and valuable minerals are coal, iron, and copper. The State is crossed by the great Alleghany coal-field, which extends from Pennsylvania to Alabama. In Tennessee it is nearly coextensive with the Cumberland table-land, and forms an irregular quadrilateral 71 miles wide at the northern end, and 50 miles at the southern. It covers about 5,100 square miles. The amount of coal has been estimated at 42,127,860,000 tons. The production of the State in 1870, according to the Federal census, was 3,385,450 bushels, valued at \$330,498. In 1874 there were twelve mines in operation, producing about 10,000,000 bushels annually. Iron exists in four distinct belts or areas. The eastern belt stretches across the eastern part of the State, at the base of the border range of mountains, extending into Virginia on the northeast and Georgia on the southeast. The most abundant ore in this belt is the limonite, which occurs in Johnson, Sevier, Carter, and Blunt Counties. There are also veins of magnetite and hematite ore, which will yield from 60 to 70 per cent. of metallic ores. There are five furnaces in this region, capable of producing about 15,000 tons annually; but owing to the lack of railroad facilities the amount produced does not exceed 10,000 tons. Iron-ore containing oxide of manganese is abundant in Greene County, from which spiegeleisen is made. The dyestone belt skirts the eastern base of the Cumberland table-land, extending beyond the limits of the State on the northeast and southeast. In Tennessee it reaches from Chattanooga to Cumberland Gap, about 150 miles; it spreads out laterally from 10 to 20 miles into the valley of East Tennessee, and includes the Sequatchie and Elk Valleys. The chief ore of this belt is a stratified red iron-rock, highly fossiliferous, occurring in layers, and called at many points dyestone, being sometimes used for dyeing. The ore is a variety of hematite, and yields from 50 to 60 per cent. of iron. There are four furnaces in this region. The Cumberland table-land belt of iron-ore is coextensive with the coal-field. The ore lies interstratified with shale, sandstone, and coal. It is called clay ironstone, and is an argillaceous carbonate of iron. It is inferior in quality, producing rarely more than 30 per cent., and usually not more than 20 per cent. of iron, and has not been worked. The western iron belt crosses the State north and south, and lies mainly between the central basin and the Tennessee River, though extending in some counties a few miles west of the

river. It is about 50 miles wide, and embraces an area of about 5,400 square miles. But the ore is found in available quantities only at certain points called "banks," some of which are miles in extent, while others occupy only a few acres. Some of these banks have been worked for eighty years, with no signs of exhaustion. The ore is a limonite or brown hematite, some of it being inferior in quality; in other places the yield of iron is from 40 to 55 per cent. There are eleven furnaces in this region, with a monthly capacity of about 4,230 tons. Tennessee has decided advantages for making iron, in the abundance, cheapness, and contiguity of ore and of fuel; the disadvantages are distance from market and want of transportation facilities. Valuable deposits of copper are found in Polk County, in the southeast corner of the State, covering an area of 40 square miles. The ore is smelted by two extensive companies at Ducktown, having twenty-five furnaces and employing about 900 hands. From 1865 to 1874 the larger of these companies produced 8,476,872 pounds of ingot copper. Tennessee is rich in marble, which is found in every part of the State, the varieties including black, gray, magnesian, fawn-colored, white, red, variegated, conglomerate, and breccia. Many quarries are worked. Limestone and other building-stone abound in various parts of the State. Slate is common, but little of it is valuable. Several beds of millstone have been found, the most noteworthy being in Claiborne County. Hydraulic rocks abound in many counties, especially in Hardin, Wayne, Perry, Decatur, Warren, and Montgomery, and in Knox and McMinn Counties in East Tennessee. Lithographic stone of an excellent quality occurs in McMinn County. Granite of various shades of color, some of it rivaling the Scotch granite, is found in Carter County; and unakite, a greenish compact granite, in the Unaka Mountains, being peculiar to that locality. Deposits of potter's clay are found in East Tennessee, on the Knoxville & Ohio Railroad, and in the vicinity of the Lower Tennessee River, in the counties of Hickman, Henry, Perry, and Wayne; also in Montgomery and Houston Counties. Some of this clay has been worked up into stone-ware. There are numerous potteries, the largest being in Memphis, Nashville, and Knoxville. Kaolin is found in Carter County. Fire-clay is found in Stewart and Houston Counties, and on the Cumberland River. It also exists in the coal-measures immediately underlying a seam of coal. Lead occurs in various places in East and Middle Tennessee. Mines have been worked in Washington, Monroe, and Bradley Counties; one of the most promising is the Caldwell mine on Powell's River in Union County. This vein, which fills a nearly vertical fissure, about twenty inches wide, in nearly horizontal rocks, can be traced about a mile. The two ores of zinc, smithsonite and calamine, occur in considerable deposits in various localities, especially in Clai-

borne, Union, and Jefferson Counties; they are in greatest abundance in Union County. The Stiner belt, near Powell's River, is fifty or sixty feet wide, and is marked by the absence of trees. The lead and zinc ores are often associated. Black oxide of manganese is found in small masses, associated with iron, all over the State. Iron pyrites also exists everywhere in the State; a large quantity is found associated with the copper at Ducktown. Large beds also occur near Greeneville in Greene County, and in Moore, Carter, and Perry Counties. Heavy spar or baryta, used for cheap paints, is found in Middle and East Tennessee; it is mined in Greene, Washington, Jefferson, and some other counties. It is usually associated with lead, constituting the gangue of that mineral. Asbestos exists in large quantities in Cocke County. Copperas is abundant, and specimens of gypsum have been found. Salt was formerly made in the State, but its manufacture has been discontinued. Saltpetre abounds in numerous caves throughout Middle and East Tennessee. Petroleum has been found at various points, and 10,000 barrels of it has been obtained from the wells near Spring Creek in Overton County; but the production has not been found profitable. Extensive beds of lignite are found in many of the counties of West Tennessee. Alum occurs in the same situations as copperas in Middle Tennessee. Epsom salts in many of the saltpetre-caves, and large quantities of bluestone (sulphate of copper) at Ducktown. The State collection of minerals in the Capitol comprises, besides a great variety of specimens, 200 kinds of marble, of all colors from Parian white to jet black, all found in the State. Tennessee has marked advantages in the number, variety, excellence, and medicinal value of its mineral waters. Mineral springs occur upon the lofty peaks of the Unakas and along the bases of the long ridges of the eastern valley. The Cumberland table-land abounds with sparkling chalybeate springs. There are also valuable sulphur and chalybeate springs in West Tennessee.

The climate is generally mild and remarkably salubrious, excepting in the swampy districts of West Tennessee. The eastern division is noted for its pure mountain air. The mean annual temperature along a line running east and west through the middle of the State is about 57° in the valley of East Tennessee, 58° in Middle, and 59° in West Tennessee. The temperature is about one degree higher along the southern, and about one degree lower along the northern boundary. Going from west to east there is a difference of elevation of more than 6,000 feet, which gives a wide range of climate and great variety in vegetable productions. East Tennessee, excluding its great valley, has a limited surface adapted to cultivation. The soil of Middle Tennessee is generally good, producing large crops of wheat, rye, oats, Indian-corn, buckwheat, barley, potatoes, hemp, hay, sweet-potatoes, flax, cotton, and tobacco.

The western division is almost level, and cotton, tobacco, and all kinds of grain, are grown in extraordinary abundance. The soil of this part is a rich black mould. Along the banks of the Mississippi and Tennessee are extensive canebrakes, covered with reeds. The country is well watered. The northwest part contains an extensive tract of swampy land. Nearly half of the State is wooded land, and presents almost every variety of timber found in the United States. West Tennessee is specially noted for the magnificence of its forests. The high mountains in the east are covered with forests of pine, which yield tar, pitch, turpentine, and lumber, for export; white pine, chestnut, hemlock, and black walnut, grow to immense size in the coves of the mountains. On the mountain-slopes, the sugar-maple, ash, cedar, juniper, and savin, are also abundant; and in the lower lands as well as in Middle Tennessee the poplar, hickory, black walnut, oak, beech, locust, and cherry, are found. The most extensive red-cedar forests in the United States are found in the central basin of Middle Tennessee. In the swamps and lowlands of West Tennessee the cypress, hackmatack, cottonwood, and swamp-cedar, occur in large quantities. Several wild or indigenous grasses grow spontaneously. The pawpaw, a low bushy tree or shrub, bearing a fruit somewhat resembling the banana, though inferior to it, is found in the river-bottoms. The persimmon, which is common, yields a fruit which in sweetness and pleasantness of flavor equals the date. The black haw, red haw, wild-plum, blackberry, wood-grape, muscadine, strawberry, whortleberry, gooseberry, and service-berry, all grow wild and yield luxuriantly. Nuts of various kinds abound, as the walnut, hickory-nut, hazel-nut, chestnut, pecan, and chinquapin, all forming articles of export. Ginseng is found on all the elevated lands. The wild animals are the bear, found only in the mountainous districts, deer, raccoons, foxes, opossums, and squirrels. Horses, cattle, sheep, and swine, are raised on a large scale, and many thousands are annually exported. The hills and mountain-slopes afford an abundance of fine pasturage. Much attention is given to wool-growing. Peanuts, constituting an important crop, are raised in the counties of Perry, Hickman, and Humphreys, and parts of Dickson and Lewis, all of which are on the west side of the Highland rim. The production amounted to 680,000 bushels in 1872, 110,000 in 1873, 200,000 in 1874, and 250,000 in 1875. The average yield is about 40 bushels an acre. The shipment of cotton from Tennessee amounted to 378,813 bales in 1872-'73, 489,534 in 1873-'74, and 446,674 in 1874-'75, most of which was the product of the State. In 1873 there were 613,267 acres planted with cotton. The best grows in the southern half of West Tennessee; it is grown in the whole of the central basin south of Nashville. As a tobacco-growing State Tennessee ranks third, Kentucky being first and

Virginia second. The annual product of the State varies from 20,000,000 to 25,000,000 lbs., or from 18,000 to 22,000 hogsheads. The average yield per acre is between 700 and 800 lbs., though as much as 1,800 lbs. can be produced upon the best soils in good seasons. The soil and climate are well adapted to the cultivation of grapes; much attention has recently been given to this industry, and also to the production of honey.

There has been a marked progress in many industries since 1870, especially in the manufacture of cotton, iron, liquors, and carriages

and wagons. In 1875 there were 40 cotton-mills, with 55,384 spindles; cotton consumed during the year, 6,701,718 lbs., or 14,443 bales. There are no United States customs districts in Tennessee, but Memphis and Nashville are ports of delivery in the district of Louisiana. At the close of 1875 there were 27 national banks in operation, with a capital stock of \$3,455,300, and a circulation of \$2,474,323. Tennessee had 466 miles of railroad in 1855, 1,253 in 1860, 1,296 in 1865, 1,492 in 1870, and 1,641 in 1875. The lines lying wholly or partly in the State in 1875 were as follows:

NAMES OF CORPORATIONS.	TERMINI.		Miles completed in the State in 1875.	Total Length between Termini when different from preceding.

TEXAS. The most important public event in this State during the past year was the framing of a new constitution. The chief reasons which led to the assembling of the convention for this purpose are thus stated in an address to the people of the State, made by a committee of the convention:

For six years the people have borne the burdens and oppressions inaugurated by the semi-military constitution of 1869. The evils fastened upon the State by that instrument are generally understood. Heavy taxation; an unwieldy and expensive judicial system, impoverishing to both the State and its counties; a vast political and partisan scheme under the pretense of sustaining free public schools; an unwise, expensive, and irritating system of registration; a vicious, partisan, and mercenary State police; multitudes of irresponsible partisan and useless officers; irregularities, confusions, ignorance, and prejudices, and in some cases corruption pervading the various departments of the public administration; money subsidies voted to railroads to the enormous sum of twelve million dollars of the people's money; high salaries, even to petty and useless officers in the school department, combined, until the inauguration of the present State government in January, 1874, with a partisan, oppressive, and often vicious administration of the law, thrice accompanied by declarations of martial law and the suspension of the great writ of right, the *habeas corpus*—these, fellow-citizens, were some of the evils complained of by you, the freemen of Texas, under the constitution of 1869.

The election to decide whether the convention should be called, and for a choice of dele-

gates, was held on the 1st of August. The convention, composed of ninety-nine delegates, assembled in Austin, on the 6th of September. The new constitution was ratified by the people February 15, 1876, to go into effect on the third Tuesday in April following. Under the new government the executive officers are a Governor (annual salary, \$4,000), Lieutenant-Governor, Secretary of State (\$2,000), Controller of Public Accounts (\$2,500), Treasurer (\$2,500), Commissioner of the General Land-Office (\$2,500), and Attorney-General (\$2,000, besides fees not exceeding \$2,000). They hold office for two years, and are all elected by the qualified voters, except the Secretary of State, who is appointed by the Governor and Senate. The Lieutenant-Governor is *ex officio* President of the Senate, and in that capacity receives the pay of a Senator. The Legislature consists of a Senate of thirty-one members, elected by districts, and a House of Representatives of ninety-three members, distributed among the counties. At the apportionment in 1880 the number of Representatives may be increased to not more than 150. The Representatives are elected biennially; the Senators hold office four years, one-half being elected biennially. The sessions are biennial. Two-thirds of each House are necessary to a quorum, and a two-thirds vote is necessary to overcome the Governor's

veto. Members of the Legislature receive not more than five dollars for each day's attendance, and not more than five dollars for each twenty-five miles' travel to and from the capital. The judicial authority is vested in a Supreme Court, a Court of Appeals, District Courts, county courts, and justices of the peace (inferior cases). The Supreme Court consists of a Chief-Justice and two Associates, and has appellate jurisdiction of civil cases of which the District Courts have original or appellate jurisdiction. The Court of Appeals consists of three judges, and has appellate jurisdiction of criminal cases, and of civil cases of which the county courts have original or appellate jurisdiction. The Judges of the Supreme Court and Court of Appeals are elected by the qualified voters for six years, and receive an annual salary of \$3,500 each. A District Court is held twice a year in each county, having original jurisdiction of felonies, divorce, land titles, etc., and of civil cases involving \$500 and upward, and appellate jurisdiction of probate cases from the county courts. A District Judge (annual salary, \$2,500; term, four years) is elected by the qualified voters of each of the twenty-six judicial districts. A county judge is elected by the qualified voters of each county for two years. The county courts have original jurisdiction of misdemeanors, probate cases, and civil cases involving from \$200 to \$1,000, and appellate jurisdiction of judgments of justices of the peace. The right of suffrage is conferred upon every male citizen of the United States, or person who has declared his intention to become such, of sound mind and not a pauper or convict, who has attained the age of twenty-one years, and has resided one year in the State and six months in the county or district. Elections are by ballot. In elections in cities and corporate towns to determine expenditure of money or assumption of debt only tax-payers may vote. General elections are held biennially on the Tuesday next after the first Monday of November in even years (commencing 1878). Amendments to the constitution must be proposed by two-thirds of each House of the Legislature, and approved by a majority of the people. Texas is entitled to six Representatives and two Senators in Congress, and therefore has eight votes in the electoral college.

After the most exhaustive discussion of the subject of education, the convention determined to limit the present taxation on the people in support of free schools to one-fourth of the annual revenue of the State, and a poll-tax of one dollar on each male inhabitant between the ages of twenty-one and sixty years, which, added to the annual interest on the permanent school-fund, will now amount to the annual sum of about \$775,000, so long as the general revenue shall remain as it now is. Besides this the 17,712 acres of land belonging to every county in the State is an additional fund for educational purposes. Some

of the counties have lands worth \$5 to \$10 per acre. Others are less fortunate, but to all this grant is a material auxiliary to the resources for common-school education, and provision is made for bringing it into market and preserving its principal as a perpetual fund, the interest being annually used for school-purposes by the counties themselves.

While a liberal policy is adopted for the encouragement of railway construction in the State, every needful power is retained in the hands of the people through the Legislature from time to time, so to regulate and control them as to protect the people from all unjust monopolies and unfair discriminations.

On this subject the convention has followed the example of Pennsylvania and Missouri in their constitutions recently adopted after long experience. Neither the Legislature nor any county or town may vote the public money, or fasten a debt by way of subsidy, to any private corporation, whether railroad or other association for private profit.

The convention encountered its most difficult problems in trying to reform the judiciary system of the State, under which the greatest burdens have heretofore rested on the people. For the past six years, with forty judges a part of the time on the bench, the administration of justice has been far behind in nearly all the counties. Parties litigant in civil cases, as well as parties charged with crime, have been so delayed as to amount in thousands of cases to a denial of justice. But the most potent wrong has been upon witnesses and jurors taken from their respective industries and held for days, weeks, and sometimes months, in waiting upon the courts; and the enormous cost in enforcing the criminal laws. This state of things has been deplorable, and a severe tax upon the people. Judicial delays have kept the jails filled with prisoners at a ruinous expense to the counties; and many misdemeanors having been unwisely placed in the list of felonies, the penitentiary, at great cost to the State, has been made to overflow with convicts, mostly for short terms.

It is believed that important advantages have been gained by the judiciary article of the new constitution. By its provisions it is hoped all suits, civil and criminal, may be speedily disposed of, and, if time proves it defective, the Legislature may, to a large extent, remedy the defect. The relief thus afforded to the people cannot be estimated with accuracy, but may be summed up as an enormous annual saving to the industry of the State. There will also be a substantial financial saving.

Ordinances were adopted dividing the State into twenty-six judicial districts, thirty-one senatorial districts, and seventy-nine representative districts.

On the same day on which the constitution was ratified, an election was held for State officers, which resulted in the success of the

following Democratic ticket: Governor, Richard Coke; Lieutenant-Governor, R. B. Hubbard; Controller, S. H. Darden; Treasurer, A. J. Dorn; Commissioner of Land Office, J. J. Groos; Attorney-General, H. H. Boone. Supreme Court Judges: Chief-Justice, O. M. Roberts; Associates, George F. Moore, R. S. Gould; Appellate Bench, John P. White, O. M. Winkler, M. D. Ector.

The platform upon which this ticket was elected had been adopted by the State Convention, which had assembled in Galveston early in January, and was as follows:

We, the Democracy, in convention assembled, hereby declare our principles and policy, and ask for them the popular approval:

1. We reaffirm our faith in the principles of the Democratic party as heretofore enunciated by our State Conventions; and congratulate the people upon the faithful redemption of all the pledges upon which the Democratic party was recently placed in power in Texas, and point to the honesty and efficiency of our present State administration as a guarantee of our continued fidelity to the interests of the State and people.

2. The Democratic party, now as in the past adhering to its policy of maintaining an efficient system of general education, declare it to be the duty of the Legislature of the State to speedily establish and make provision for the support and maintenance of public free schools, and to this end to exercise the whole power with which it is invested.

3. The sufferings and losses of our people on the frontier from the forays of savages, and upon the Mexican border from invasions, murder, and rapine, by the Mexican banditti, enlist our deep and sincere sympathy; and while we hereby pledge our most energetic efforts to afford them adequate protection in person and property by the State, we also earnestly appeal to the General Government to give that protection and security to our people and their property thus exposed, to which they are entitled under the Constitution of the United States.

4. That the Democratic party, firmly upholding the Constitution of the United States as the foundation and limitation of the powers of the General Government, and the safe shield of the liberties of the people, demands for the citizen the largest freedom consistent with public order, and for every State the right of self-government and home-rule; that to

uphold the former and protect the latter the Democracy of Texas plants itself for the great leading principles enunciated in the inaugural of President Jefferson and the farewell address of the immortal Jackson, and enters the contest of 1876 with the firm conviction that the elements of opposition to the national Administration should be consolidated in the approaching presidential campaign, without prejudice to the unity and perpetuity of the Democratic organization.

5. We pledge to the nominees of this convention our earnest and active support.

The assessed value of property in 1874 was \$241,841,860; in 1875 it was believed that with a proper system of assessment it would amount to \$300,000,000. The taxation of 1878 amounted to \$2,517,894, of which \$1,286,188 (\$168,254 on polls and \$1,117,934 on property) was State and \$1,231,206 county. The estimated receipts during the year ending August 31, 1876, available for the general expenses of the State, are \$1,289,348; available for school-purposes, \$715,129.70: total, \$2,004,477.70, of which \$1,400,180 are from taxes on property, \$279,000 from occupation-tax, \$170,847.70 from poll-taxes, \$125,000 from interest on permanent school-fund, and \$30,000 from office-fees. The appropriations for the same period are as follows: for executive departments, \$182,230; judicial department, \$256,625; school department, \$505,400, including \$500,000 for teachers' wages; Blind Asylum, \$16,120; Deaf and Dumb Asylum, \$14,000; Lunatic Asylum, \$38,300; penitentiary, \$40,000; interest, \$480,000; frontier defense, 150,000; other purposes, \$5,610: total, \$1,688,285. The bonded debt on August 31, 1875, amounted to \$4,107,588; floating debt, \$614,326.36: total, \$4,721,914.36. Besides this there was a debt of doubtful validity, amounting to \$829,687.66, and consisting of bonds issued by the State to the school and university funds, with accrued interest thereon.

The railroads now in operation in Texas are as follows:

LINES.	TERMINI.		Miles in Operation in the State.
	FROM	TO

The Galveston, Harrisburg & San Antonio Railroad is in progress (1876) toward San

* Consolidated as the International & Great Northern.

Antonio, and the extension of the Gulf, Western Texas & Pacific Railroad to that city is contemplated. The Houston & Texas Central

Railroad connects at Red River City with the Missouri, Kansas & Texas Railroad for St. Louis. The International Railroad is intended to extend southwest to Laredo on the Rio Grande. The Texas & Pacific Railroad has permission by its charter to continue its line across the continent to San Diego, Cal.; the Transcontinental Division, when completed, will extend from Texarkana to Fort Worth, Tarrant County, on the main line. The Texas & New Orleans Railroad was in operation to the Sabine River previous to the civil war, during which it was nearly destroyed; it is to be repaired. The Galveston & Santa Fé Railroad has been chartered to connect those two points, and forty miles are under construction.

The State institutions are the penitentiary, at Huntsville, and the Institution for the Deaf and Dumb (opened in 1857), the Institute for the Blind (1856), and the Lunatic Asylum (1861), at Austin. The labor of the convicts is leased to contractors. The number registered at the penitentiary in November, 1875, was 1,686, of whom 452 were employed at the penitentiary and the rest elsewhere. The Institution for the Deaf and Dumb in 1874 had 46 pupils (31 males and 15 females); the Blind Institute, 40 (16 males and 24 females); and the Lunatic Asylum, 127 inmates (68 males and 59 females). In 1875 an act was passed providing for the erection of two additional penitentiaries, one northeast of the Trinity River and the other west of the Colorado River.

The case of George W. Honey, referred to in the ANNUAL CYCLOPEDIA of 1872, came before the Supreme Court, and was decided in his favor. The court say that, as Mr. Honey had gone away with the intention of returning, the office of State Treasurer was not vacant, neither had he "absconded," as was represented. His accounts were also adjusted.

THIRLWALL, CONNOP, an English bishop, born at Stepney, in 1797; died July 27, 1875. He was educated at Trinity College, Cambridge, was admitted to the bar in 1825, but retired from the practice of the law in 1828, and was ordained to the ministry, becoming Rector of Kirkby-under-Dale, Yorkshire. He was consecrated Bishop of St. Davids in 1840, and continued in the discharge of the episcopal functions until 1874, when he was retired at his own request on account of incapacity by age and permanent physical infirmity, with a pension of \$10,000 a year. He was succeeded by Dr. W. Basil Jones. His first publication was a volume of essays and poems, entitled "Primitia," written before he was twelve years of age. His next book was a translation of Schleiermacher's "Critical Essays on the Gospel of St. Luke," which was published in 1825. His most important work was "The History of Greece" (1835-'40). Grote praised it highly, and declared that if it had appeared sooner he probably would never have conceived the design of his own history; and having been in-

duced to take up the task by the deficiencies of Mitford, he was pleased to note the progress shown in Thirlwall's work of "sound, enlarged views respecting the ancient world." The book is not an entertaining one, but the original researches of the author make it valuable to students. He was also one of the translators of two volumes of Niebuhr's "History of Rome," an editor of the *Cambridge Philological Museum*, and the author of a number of fugitive essays, letters, and sermons. He was regarded as the most scholarly of the English bishops.

THOMASIUS, GOTTFRIED, a German theologian, born in 1802; died January 24, 1875. Having graduated from the gymnasium at Ansbach, he studied at the Universities of Erlangen, Halle, and Berlin, and in 1829 received an appointment as minister in Nuremberg. In 1842 he went to Erlangen as Professor of Theology, which position he retained up to his death. He wrote "Origines: ein Beitrag zur Dogmengeschichte des dritten Jahrhunderts" (1837), "Beiträge zur kirchlichen Christologie" (1845), "Das Bekenntnis der evangelisch-lutherischen Kirche von der Versöhnung" (1857), and "Darstellung der lutherischen Dogmatik vom Mittelpunkt der Christologie aus" (3 parts, 1866).

TISZA, KOLOMAN DEK, a Hungarian statesman, was born December 16, 1830. In 1848 he received an appointment in the ministry of education, but after the revolution he made a trip through the Continent. In 1855 he was elected second curator of the Protestant Seminary of Nagy Szalonta. In the Convention of Debreczin he attracted general attention by his bold opposition to the patent of 1859, by which Count Thun threatened the independence of the Protestant Church of Hungary. In 1861 he was elected to the Hungarian Diet from Debreczin, where he took the place of his uncle, Count Teleki, as leader of the Left Centre, and worked with Deak up to 1866. In that year he united himself with the opposition on the Left, and agitated for a separation of Hungary from Austria, for an independent Hungarian army, and separate finances. He gradually changed his position again, and, having effected a reconciliation with the government, was appointed Minister of the Interior in the Ministry Wenckheim, in March, 1875. He was soon after unanimously reelected to the Diet from Debreczin, which has always been the chief seat of the ultra-Magyar opposition to Austrian rule. When Wenckheim resigned, in October, 1875, Tisza was appointed prime-minister in his place.

TOLDY, FRANZ, a Hungarian author, born in Buda, August 10, 1805; died December 10, 1875. He studied first philosophy and then medicine, in the University of Pesth. At the same time he paid considerable attention to the literature of his native country. Among his first works is a Hungarian translation of Schiller's "Robbers," published in 1823. He turned his attention afterward more to works per-

taining to the history of literature, and published "Handbook of Hungarian Literature" (2 vols., 1828), "Collection of Hungarian Poets" (1828), and "Relics of Hungarian Poets" (1828). In 1830 he founded with Bugát the *Orcosi Tár*, the first Hungarian medical journal, which he edited up to 1833. In the same year he was elected a member of the Hungarian Academy, of which he was secretary from 1835 to 1861. In 1833 he was appointed Professor of Dialectics in Pesth, in 1841 Director of the Institute of Fine Arts of the Kisfaludy Society, and in 1844 Director of the University Library of Pesth. It was owing chiefly to his exertions that the university was not suppressed and its rich treasures were not confiscated during the Revolution of 1849. In 1850 he was appointed Professor of *Æsthetics*, in 1861 of Hungarian Language and Literature, in 1863 Royal Councillor, and in 1863 Philosophical Dean of the University. In 1871 he celebrated his fif-

tieth anniversary as an author. He published besides the works mentioned above: "*Æsthetic Letters*" (1827), "*Kisfaludy's Life*" (1832), "*History of the National Literature of Hungary*" (2 vols., 1851), "*History of the Recent Hungarian Literature*" (1853), "*Handbook of Hungarian Language and Literature*" (2 vols., 1855), "*On the History of the Earlier Hungarian Literature*" (1869), "*Hungarian Statesmen and Authors*" (2 vols., 1868), "*The Lives of Hungarian Poets*" (1870), and many others.

TRUMPET, FOG. An instrument of undoubted value for the prevention of marine disasters is the Austrian fog-trumpet, or *Nebelhorn*, invented by Giovanni Amand, of the Technical Institute of Trieste, which was first exhibited at the Vienna Exposition. It is capable of conveying a signal to a greater distance than any of the fog-guns or other instruments hitherto used for this purpose, having been clearly heard as far as sixteen nautical miles. It

AUSTRIAN FOG-TRUMPET.

consists of metallic reeds, vibrated formerly by means of compressed air, but worked by steam in the more recently-made instruments, connected with a long straight trumpet or augments, mounted on a pivot, so that the sound may be directed toward any particular point. Through the instrumentality of a finger-board, notes of different lengths and easily distinguishable can be produced; various preconcerted signals can be transmitted in night, fog, or storm; and even verbal messages may be conveyed, according to an alphabetical formula, after the method of the Morse telegraphy. Such messages sent by one of these trumpets in use in the harbor of Trieste, which stood thirty feet above the water, were easily made out at a distance of six nautical miles. The instrument may be erected directly above the boiler, or removed some distance and connected by a pipe. Our drawing represents an instru-

ment blown by an eight-horse-power boiler under a pressure of twenty-five pounds to the square inch, capable of sounding thirty blasts in thirty seconds, audible at a distance of fifteen nautical miles; the automatic distributing valve is operated by a small apparatus connected with the boiler. When several of these horns are employed on the same coast, they may be distinguished from each other by different combinations of the long and short notes. The trumpet could be employed on steamers, as well as in lighthouses and coast-stations, and by its aid collisions be averted, and in cases of distress signals telegraphed a considerable distance in the dark or in dusky weather.

TURKEY, an empire in Eastern Europe, Western Asia, and Northern Africa. Reigning sovereign, Sultan Abdul-Aziz, born February 9, 1830; succeeded to the throne at the death of his elder brother, Sultan Abdul-Med-

jid, June 25, 1861. Sons of the Sultan: 1. Yussuf Izzedin Effendi, born October 9, 1857; 2. Mahmud Djemol Eddin Effendi, born November 20, 1862; 3. Mehemed Selim Effendi, born October 8, 1866; 4. Abdul-Medjid, born June 27, 1868. The heir-presumptive to the throne is Mehemed Murad Effendi, the nephew of the present Sultan.

The area and population were as follows, according to the latest estimates:

COUNTRIES.	Area.	Population.
1. Turkey proper in Europe	140,554	8,500,000
2. Dependencies in Europe:		
Roumania.....	46,710	4,500,000
Servia.....	16,817	1,850,000
3. Possessions in Asia.....	742,890	12,171,000
Tributary principality, Sissam (Samos).....	218	34,141
4. Dependencies and possessions in Africa:		
Egypt.....	560,391	16,922,000
Vilayet of Tripoli.....	344,428	1,150,000
Regency of Tunis.....	45,710	2,000,000
Total.....	2,207,708	47,627,000

The area and population of Turkey in Europe were as follows in 1874:

VILAYETS.	Area.	POPULATION IN 1874.			
		Christ'ns.	Moham-medans.	Jews.	Total.
Constantinople	25,526	121,267	189,540	28,248	339,055
Adrianople....	814,742	522,185	13,017	1,349,894	1,885,096
Danube.....	33,624	1,167,582	519,226	8,435	1,695,243
Salonica.....	19,983	585,231	429,410	13,500	1,028,141
Janina.....	13,860	455,601	250,649	5,000	711,250
Prisrend.....	20,811	546,509	789,984	4,028	1,340,471
Bosnia.....	23,391	850,425	480,566	6,372	1,337,363
Crete.....	3,327	160,000	38,000	2,000	200,000
Army.....			82,539		82,539
Navy.....			23,325		23,325
Total.....	139,972	4,701,857	3,619,354	75,295	8,396,006

If we add to these figures the islands in the European waters, Thasos, Imbros, Samothrace, Lemnos, and Hagiostati, together 582 square miles, the foreigners living in Turkey, etc., we may assume the present area of Turkey in Europe to be about 140,554 square miles, and the population about 8,500,000.

On October 7, 1875, the Sublime Porte decreed that during five years from January 1, 1876, the interest of the public debt be paid half in cash and half in five per cent. bonds. So much of the principal as would fall due during the same period should be paid in like manner. For this purpose, a law of October 20, 1875, authorized the Minister of Finance to issue, in the course of the next five years, five per cent. gold bonds to the total amount of £35,000,000, or 875,000,000 francs, in series of £7,000,000 each.

The Turkish army is composed of the regular, irregular, and auxiliary troops. According to a law of June 22, 1869, and later decrees, the reorganization of the army is to be completed in 1878. It is to consist of 700,000 men, divided into the active army (about 150,000 men), the first reserve (70,000 men), the second reserve, and the sedentary army (correspond-

ing to the German Landsturm). The irregular troops consist of the *gensdarmes*, the Bahi-Bozuks, Spahis, Bedouins, and other volunteer corps, together about 50,000 men. The auxiliary troops are composed of contingents furnished by the provinces not yet subject to the nizam (active army) and the tributary states, and amount to about 80,000 men. The war-vessels, in 1873, consisted of 21 iron-clads 5 frigates, 5 corvettes, 6 monitors, 6 galleys, and 99 transports. The navy was manned by 30,000 sailors and 4,000 marine troops.

The number of vessels engaged in the foreign trade was stated to be, in 1873, 231, of 37,760 tons, of which 9, of 3,049 tons, were steamers.

The number and tonnage of all vessels which arrived in the Turkish ports during 1872 were as follows:

CLASS.	Vessels.	Tons.
Foreign.....	43,200	12,736,000
Turkish.....	29,614	3,516,000
Coasting-vessels.....	178,143	1,908,000
Total.....	250,957	18,159,000

In 1874, 20,674 vessels, of 4,606,200 tons, arrived in the port of Constantinople. Of these, 4,185, of 2,697,700 tons, were steamers.

The total length of railroads in operation in 1875 was 1,536 kilometres (1 kilometre = 0.62 mile) in Europe, and 276 kilometres in Asia. The length of telegraph-lines in 1874 was 28,038, and of the wires 46,730 kilometres. The number of offices was 393, and the number of dispatches sent and received 910,130.

The Turkish dependency of Roumania was in 1875 governed by Prince Charles I., son of the late Prince Charles of Hohenzollern-Sigmaringen. Prince Charles was born April 20, 1839; elected Prince of Roumania, May 10, 1866; married November 15, 1869, to Elizabeth, Princess of Neuwied. The state ministry was at the close of 1875 composed as follows: Presidency and Interior, Catargi (appointed 1871); Finance, Cantacuzène (1871); War, Floresco (1871); Foreign Affairs, Boèresco (1873); Justice, Lahovary (1873); Agriculture, Commerce, and Public Works, Rosetti (1873); Public Instruction and Worship, Maioresco (1874). The Senate consists of 76 members, the Chamber of Deputies of 157 members, of whom 82 are for Wallachia, and 75 for Moldavia. Area, 46,710 square miles; population in 1875, about 4,500,000. About 85.5 per cent of the total population belong to the Roumanian nationality, and about 92.4 per cent to the Greek Oriental Church. In the budget of the year 1876 the revenue and expenditure were estimated at 96,217,384 francs; the public debt on January 1, 1876, amounted to 532,250,698 francs. The imports in 1874 were valued at 89,700,000 francs. In 1875 the length of the railroads in operation was 1,335 kilometres, and that of the telegraph-lines 3,819; that of wires, 6,398 kilometres.

According to the budget of 1875 the army* embraced 1,613 officers, 62,158 men, and 14,921 horses.

The present ruler of Servia, the other dependency of Turkey in Europe, Milan Obrenovitch IV., was born 1855, and succeeded to the throne by the election of the Servian National Assembly, after the assassination of his uncle, Prince Michael Obrenovitch, June, 1868; was crowned at Belgrade, and assumed the government, August 22, 1872. He was married on October 17, 1875, to Natalie de Keshko, the daughter of a Russian nobleman. The legislative authority is exercised by the Skuptchina. The former Senate has been changed into a Council of State, which prepares the laws. The Skuptchina is composed of delegates chosen by the people, at the rate of one deputy to every 2,000 electors, and consisted in 1875 of 134 members, of whom 83 were appointed by the prince, and 101 elected by the people.

According to the budget for the year 1874-'75 the revenue was 35,035,000 "tax-piasters" (1 piaster = 4 cents), and the expenditure 35,031,983 piasters. The area of Servia is 16,817 square miles; population in 1872, 1,338,505; of whom about 5,000 are Mohammedans, 1,500 Jews, 360 Protestants, 3,500 Roman Catholics, and the remainder members of the Orthodox Greek Church. The capital, Belgrade, had in 1872 a population of 26,674, exclusive of the garrison. The army, actually under arms, consists of 4,720 men, with the exception of 200 cavalry and a small artillery corps, all infantry. The strength of the reserves is 150,490 men. The imports were valued in 1872 at 32,900,000 francs; the exports at 30,900,000 francs. There were in 1875 not yet any railroads in Servia, but the construction of a road from Belgrade to Nish was begun; the aggregate length of the telegraph-lines was, in 1872, 853 miles.

OPENING OF THE BLACK SEA FROM THE BOSPORUS.

The prince of the tributary island of Samos is Constantine J. Photiades. The area of the island is 212 square miles; the population in 1874 was 84,141. In 1874 the revenue amounted to 3,343,165 piasters, and the expenditure to 3,095,320 piasters. The imports and exports are estimated at 8,000,000 and 10,000,000 piasters respectively. The commercial navy comprises 236 vessels of 4,717 tons. The movement of shipping in 1874 was 75 steamers, of 9,087 tons, and 4,803 sailing-vessels, of 41,367 tons.

The principality of Montenegro, which was formerly a tributary state of Turkey, must now be regarded as an independent state. The

prince has worked steadily and unceasingly to attain this end, and he is now treated as a sovereign prince by all the foreign powers, while Montenegro has been placed in the *Almanach de Gotha*, the standard authority on such matters in Europe, under a separate head as an independent country. It has an area of 1,701 square miles, and a population of 120,000.

The most interesting part of Turkish history during the year was an insurrection that broke out in July, in the province of Herzegovina, and which gradually spread over the whole of Bosnia, and at the end of the year even threatened to involve Servia and Montenegro. The vilayet of Bosnia, of which the Herzegovina forms the southwestern part, is situated in the extreme northwest of the Turkish Empire. It

* For a fuller account of the Roumanian army, see *ANNUAL CYCLOPEDIA* for 1874.

is separated on the north from Austrian Slavonia by the Save; on the east from the principality of Serbia by the rivers Drina, Uvac, and Lim; on the west from Dalmatia by a chain of Alps and the Unna; and on the south bounded by the last-named country, Montenegro, and Albania. It has an extent of 23,400 square miles, and a population of 1,357,984 inhabitants. The political division of Bosnia is into seven governments. The centres of population are Seralievo, Travnick, Bihac, Banjaluka, Sbornick, Novi-Bazar, Mostar, Trebigne, and Plevelji. The people belong, in great part, to the Slavic race. A small minority is composed of Jews, Bohemians, and un-naturalized foreigners. The regular Turkish troops stationed in the country under ordinary conditions number about 9,000 men. The Serbian language is the only one used, excepting among officials and soldiers. In a religious point of view the inhabitants are divided into Christians (Catholics and Orthodox Greeks) and Mohammedans. The latter—about 493,000—belong to the same race as the rest of the population. They are Servians who have embraced Islamism in order to preserve their property. These renegades, who form, under the name of *Begs*, a kind of aristocracy, possess the whole of the soil, and treat the Rayahs, or common people, who live exclusively by the cultivation of the ground, with the greatest barbarity. A very few proprietors are also to be found of Turkish origin, termed *Agas Sphaïos*, whose titles of possession date back to the conquest. The Slavi of Bosnia and the Herzegovina are tall and strong; their features are swarthy, and stamped with a manly energy. The Turkish occupation, although it has been established for so long a time, has not modified the character or the habits of the inhabitants of those countries. The food of the Slavic peasantry is of the most simple description, consisting chiefly of milk products and onions; he who can provide bread made from buckwheat is counted a man in easy circumstances. The whole of the territory of the province is mountainous. The most important river of Bosnia is the Save, which forms a part of the frontier toward Austria. Some steamboats ply upon it from Sissek, in Slavonia, to near Belgrade, where it joins the Danube. The Herzegovina, forming the southwestern part of Bosnia, has an area of 6,420 square miles, and about 290,000 inhabitants, of whom 62,000 are Mohammedans.

The insurrection arose from an opposition of the people to the tax-gatherers. It extended in the beginning to five villages, the inhabitants of which left their homes and went to the mountains, after having sent their wives and children to Dalmatia. The Porte immediately sent a commission to inquire into the grievances of the people, and to redress them, if well founded. The commission, however, was unsuccessful, and the rising spread rapidly throughout the whole district between Mostar

and the Austrian frontier toward Ragusa. After a skirmish, near Nevesigne, the Turkish authorities made an unsuccessful attempt to induce the Christian villages to lay down their arms. On August 16th two detachments of Turkish troops entered Mostar, while at the same time the Governor of Bosnia was ordered to dispatch troops against the insurgents.

The insurrection met at once with great sympathy in Serbia and Montenegro, as the inhabitants of the Herzegovina are of the same race as those of the above countries, and large numbers of volunteers crossed over to the insurgents from these countries, and subscriptions in aid of the insurrection were opened by the Servians.

In the beginning of August the insurgents succeeded after several engagements with the Turks in surrounding Trebigne. In the middle of the month an insurrection broke out in Turkish Croatia, in the district between Kostainizza and Dubicza, along the Austrian frontier. Turkish Croatia is, like that part of Croatia which is under Austrian rule, inhabited by a people of Slavonian descent, who mostly belong to the Roman Catholic and Greek Churches. The section held by Turkey forms the north part of the vilayet of Bosnia; it is small in extent, but is inhabited by a hardy, brave people, who are in sympathy with the insurgents in Herzegovina. In the mean while the great powers of Europe took a considerable interest in the insurrection. On August 19th the Russian, Austrian, and German ambassadors had a protracted conference with the Grand-Vizier. They advised a suspension of hostilities, with the view of affording an opportunity for ascertaining the grievances of the insurgents, but the Porte declined to accede to this proposition. Shortly after, however, the Porte, upon the recommendation of the six great powers, Germany, Austria, Russia, France, England, and Italy, appointed Server Pasha a special commissioner to hear and redress the grievances of the insurgents. The foreign consuls at the same time were ordered to inform the insurgents that they could count on no foreign assistance.

In August 2,500 troops arrived at Klek from Constantinople, and marching into the interior effected a junction with a force that had come overland. On August 30th they arrived at Mostar without having met with any opposition.

In the latter part of August the Turks relieved Trebigne, driving the insurgents into the mountains. On September 6th the Turkish commander of Trebigne sent a detachment to Biletj, fifteen miles to the northeast. Though the detachment consisted of fully 1,200 men, commanded by Nedjib Pasha, they were lured into an ambush, and set upon with so much fury by an inferior force that several hundred were killed or captured, the rest reaching Trebigne in a very dilapidated condition. On the 11th another Turkish detachment was defeated

on the same road, losing forty mules laden with provisions. Encouraged by success, the insurgents on the 14th assailed Biletj itself, but were discomfited. Two thousand Turks, protected by earthworks, easily carried the day against 700 insurgents, who left a good many on the field before retreating. Better luck attended the operations of the insurgents on the same day at Bobr, some twenty miles north-west of Trebigne. There the Turkish earthworks were taken by storm and occupied by the insurgents, the garrison flying in every direction. In the first flush of victory the insurgents penetrated as far as Lubigne, where a store of ammunition and provisions was seized.

In the mean while the foreign consuls met at Mostar, in order to have a conference with the Turkish commissioner and the insurgent leaders. The latter, however, failed to put in an appearance. The consuls then set on a journey through the Herzegovina, in order to look up the insurgents in their strongholds, and to counsel submission to the Porte. They were, however, unsuccessful in their efforts. A manifesto was addressed to the consuls by a number of Herzegovinians who had taken refuge in Austrian territory. It enumerated their grievances against Turkey, and concluded by rejecting the mediation of the powers and demanding the complete liberation of the country from the Ottoman rule.

In the beginning of September the Sultan issued the following firman to the governor-generals of the provinces:

There is no doubt that the welfare of the country and the well-being of its inhabitants have for their general basis the security of property, life, and honor, of each one. This security can only be obtained by a good and impartial administration of justice. This was the sense of our last imperial hattı to our grand-vizier, which read as follows: As the good administration of affairs in our empire, the welfare of the country and the happiness of its inhabitants, is the object of all our care, it is our wish that an effective protection and equal justice be enjoyed by all classes of society in such a manner that the rights and the honor of all be secured. As the ministry of justice represents one of the most important departments of state, it is absolutely necessary that it proceed in conformity with our well-meaning intentions. We, therefore, order that these intentions be proclaimed and be fully executed. Our orders and our later instructions are only issued to-day, in order to confirm our above-mentioned sovereign intentions. Their execution depends on the honest and energetic efforts which must be displayed by all dignitaries, whether they are judges or administrative officers, as well as on their willingness to produce a beneficial change of affairs. All public officers, and particularly those who are intrusted with judicial functions at the courts of the Scheri, and the civil courts, either in the capital or in provinces, must particularly see to it that the trials are conducted impartially, and in accordance with the laws of the Scheri, and the other laws in general, that all our subjects without distinction may enjoy the greatest security and justice. This is our decided imperial wish. After the preceding was brought to the notice of each one of my governor-generals, our present sovereign order proceeded from our imperial divan, and at the same time that you in your position as governor-general will receive this order you will also receive a list of

those acts which have been committed contrary to the laws of my empire, and with the knowledge of all the world. Upon the receipt of my imperial firman, you will hasten to bring these instructions to the knowledge of the judiciary as well as the administrative officers, and all of our minor officers, in the capital and all the districts of the vilayet, and you will see that our orders are promptly executed. It is understood that the officers will be treated according to their good or bad behavior. The Sublime Porte will take such measures as may seem necessary to keep informed on the course of public affairs. As you know that the least infringement or neglect of our imperial orders will bring on you a heavy responsibility, you must act accordingly. You will take care to bring to the notice of our Sublime Porte all those officers who act contrary to our commands.

On October 2d an imperial "iradé" was published, providing that agricultural populations, who peacefully follow their avocations, be exempted from a fourth of the recently-imposed tithes, and that they be relieved from the payment of arrears of taxes up to the financial year 1289 (1873-'74), the latter exemption not to apply to well-to-do classes who are indebted to the Treasury. The decree further enacted that communities are to be represented in an administrative council by persons chosen as enjoying their confidence, and the reasonable demands of such representatives will be received with attention. Deputations from the annual General Assemblies are authorized to come to Constantinople to submit to the Government their wishes. The Government is to decide which persons, enjoying the respect of their respective communities, shall be summoned from time to time to Constantinople. The information obtained from them will serve as a basis for reform measures. Special controllers are to be appointed to insure the legal apportionment and collection of the taxes. A system is already under consideration to guarantee a just treatment of the population by the conversion of tithes into a ground-tax. The decree announced that the gradual realization of these reforms had been decided upon.

General Ignatiev, the Russian ambassador, after having paid a visit to the Czar in the Crimea, returned to Constantinople on October 27th, and immediately had an interview with the Grand-Vizier, Mahmud Pasha, during which he said: "The Czar regrets that the insurrection in the Herzegovina has not yet come to an end. He ascribes this delay to the poor actions of the tribunal recently appointed in Mostar, as well as to the low degree of security enjoyed by the insurgents who return to their allegiance. These, on the contrary, are subject to annoyances on the part of the authorities. Thus, also, the delay in the execution of the promised reform is a cause of the continuance of the insurrection. It is to be hoped that an improvement in these affairs will shortly take place; if not, he can not see the Christians of the Ottoman Empire continually exposed to persecutions, and the powers will be forced to intervene."

The Porte, at the suggestion of Russia, organized in November the southern part of the Herzegovina as a separate district, and appointed for its governor Constant Effendi, an Armenian, who, however, was decidedly unpopular among the Herzegovinians. The fighting continued with varying success during the whole of the negotiations, but upon the advent of winter it generally ceased. In the beginning of November the insurgents gained an important victory at Gatchko, where they captured a provision-train, fifty tons of ammunition, and three hundred rifles, destined for Govansko.

On December 12th the Sultan issued a firman which contained the following provisions:

All subjects of the Porte, without distinction, elect the judges, the Mohammedan as well as the non-Mohammedan members of the courts, and the members of the provincial administration councils. The lawsuits between Mohammedans and non-Mohammedans will be turned over to the civil courts. No one will be imprisoned without a trial. Bad treatment of prisoners will not be permitted.

The following measures are named to prevent the arbitrary collection of taxes: Election of the tax-collectors by the Mohammedans and non-Mohammedans, and reform in the titles of real estate. The rights of possession of all subjects shall be secured, the *ghenedarmes* shall be selected from the best inhabitants of each town, *soogis* shall be abolished, and services for public works shall be kept in distinct bounds. The firman confirmed the powers of the Patriarchs, and gave to all other religious heads the right of the free exercise of their respective religions. At the same time all privileges for the founding of churches and schools were guaranteed, and all public offices opened to non-Mohammedan subjects. The amount for the exemption from military duty is adapted to the property of the inhabitants, and for non-Mohammedans shall be only one-half the amount for Mohammedans. Those unfitted for service are released from this fee. The right of holding real estate is secured to all non-Mohammedan subjects of the provinces. Testamentary provisions shall be respected. The firman furthermore provided for bringing unhindered all just complaints and wishes before the Porte. The powers of the governors and other high officials are cut down. All the provisions in the firman are for the benefit of loyal subjects only. The grand-vizier will take the necessary measures to bring these reforms into execution, while a special commission will watch over them.

On December 20th a supreme commission was appointed, consisting of all state ministers, and several Mohammedans and Christians, who were to see to the execution of the new reforms. Later two more commissions were appointed, one for commerce and agriculture, and the other for public works. Toward the close of December, Count Andrassy, the Austrian Chancellor, prepared, at the suggestion of Russia and Germany, a circular note to the great powers of Europe, which read as follows:

BUDA-PESTH, December 30, 1875.

Since the beginning of the troubles in the Herzegovina, the European cabinets interested in the general peace have directed their attention to the events which have threatened it.

The three courts of Austro-Hungary, Russia, and Germany, after having exchanged their views on

this subject, have united their efforts in favor of peace.

This object seemed to conform to the general view in such a degree, that the other cabinets, upon being invited to take part in it through their representatives in Constantinople, hastened to unite their efforts with ours.

The great powers have agreed to use all influence at their disposal to localize and to diminish its dangers and calamities, in preventing Serbia and Montenegro from taking part in the movement.

Their language has been all the more efficacious, as it has been the same, and has thus expressed the firm desire of Europe not to let the general peace be endangered by any hasty actions.

The cabinets have furthermore offered to the Turkish Government the aid of their consular agents in suppressing the outbreak. In this undertaking they have taken care to avoid all interference, and to respect the dignity, the rights, and the authority of the sovereign.

The delegates could not act as an investigating committee, nor could they make themselves the advocates of the wishes of the insurgent population. Their mission was to take from the latter all illusions of foreign assistance, and to exhort them to disperse, after having declared their wishes and their griefs. The powers only reserved the right to press those demands of the insurgents with the Turkish Government which would be found legitimate. This conciliating action of the cabinets proved sufficiently the friendly intention which had prompted the offer of their good offices. It showed that the interests of Europe, the Porte, and the insurgents, were identical, to put an end to a bloody and destructive war, and to prevent its return by serious reforms and effective improvements, which would reconcile the best interests of the country with the legitimate demands of the authorities. This is in a few words the action taken by the powers since the outbreak of the insurrection.

The cabinets have been guided up to the present time by the desire to avoid, above all, everything that might be interpreted as a premature intervention of Europe.

In accordance with these ideas, the cabinets have restricted themselves to counsel the Government of the Sultan not to confine itself to military measures only, but to make it an object to combat the evil by moral means which are destined to prevent future disorders.

In acting thus, the cabinets had the intention of giving to the Sublime Porte that moral assistance which it needed, and on the other hand to give it time to pacify the insurgent provinces, hoping that thus all danger of future complications would be avoided. Unfortunately, their hopes were not fulfilled. On the one hand the reforms published by the Porte do not seem to have had in view the pacification of the population of the insurgent provinces, nor do they seem to suffice for this object. On the other hand, the Turkish arms have not succeeded in putting an end to the insurrection.

Under these circumstances we believe the moment to have come for the powers to agree on a common policy, by which they can prevent the insurrection from endangering the peace of Europe, through its further continuance.

We have applauded, the same as the other governments, the well-meaning intentions which have inspired the recent manifestoes of the Sultan. The irade of October 3d, and the firman of December 12th, contain a series of principles destined to introduce reforms in the organization of the Ottoman Empire.

There is reason to believe that if these principles are embodied in wise legislative acts; if, above all, their execution is guided by the same enlightened views which dictated them, they will produce real improvements in the administration of Turkey.

At the same time we cannot be blind to the fact

that the reforms announced would not be able of themselves to stop for a moment the shedding of blood in the Herzegovina and Bosnia, nor to form a solid foundation for the future peace of these parts of the Ottoman Empire.

If, indeed, we examine the contents of the *iradé* of October 2d, we cannot but recognize that the Sublime Porte has paid more attention to general principles, which in a precise form will be able to serve as a basis for the administration of the empire, than to the pacification of the provinces at present in rebellion.

It is the interest of the Ottoman Government that the pacification be secured before everything else, because, as long as it is not secured, it will be impossible to put those same principles into operation which the Sublime Porte has proclaimed.

On the other hand, the state of anarchy which is devastating the northwestern provinces of Turkey does not only present difficulties for the Sublime Porte, but it also contains great dangers for the general peace; and the different European states cannot look on indifferently and see a state of affairs repeating itself, and growing worse, which already weighs heavily on commerce and industry, and which, destroying more and more every day the confidence of the public in the preservation of peace, tends to compromise graver and more important interests.

We also believe to fulfill an imperative duty in calling the serious attention of the guaranteeing powers to the necessity of recommending to the Sublime Porte to complete its action by such measures which appear indispensable to establish order and quiet in the provinces disturbed at this moment by civil war.

As a result of an exchange of ideas which has taken place between us and the cabinets of St. Petersburg and Berlin, it has been recognized that these measures must be sought for in a double direction: in the first place in a moral, and secondly in a material way.

Indeed, the material state of the Christian inhabitants of Bosnia and the Herzegovina depends chiefly on their social and moral position.

In examining the fundamental causes of the peculiar position which the Herzegovina and Bosnia have occupied during several years, the feeling of enmity and mistrust prevailing between the Christians and Mohammedans is directly patent to all. It is this disposition which has rendered it impossible to our delegates to convince the Christian inhabitants that the Turkish authorities were actuated by the sincere desire to redress their griefs. There is probably no other part of European Turkey where the antagonism between the Cross and the Crescent takes such a distinct form. This fanatical hate and mistrust must be attributed to the neighborhood of peoples of the same race, enjoying that religious liberty of which the Christians of Bosnia and the Herzegovina find themselves deprived. The incessant comparison causes them to have the idea of being subjected to the yoke of an actual servitude, that the name of *Rayah* seems to place them morally in a position inferior to that of their neighbors; and that, in a word, they feel themselves as slaves.

More than once has Europe had to occupy itself with their complaints and the means for their redress. The *hatti-houmayoun* of 1856 is one of the fruits of the solicitude of the powers. But even by the terms of this act the liberty of worship is still limited by clauses which, particularly in Bosnia and the Herzegovina, are enforced with a severity which each year brings about fresh conflicts. The construction of edifices consecrated to religious worship and to instruction, the use of bells, the formation of religious associations, etc., are still subjected to such difficulties in these provinces as appear to the Christians as so many remembrances of the war of conquest, which let the Mussulmans appear in their eyes as enemies of their faith, and confirm them in the

belief that they live under a yoke which it is their privilege and duty to throw off.

The last firman touches this point, even as it had been done by the *hatti-sheriff* of 1839, the *hatti-houmayoun* of 1856, and other acts of the Sublime Porte. It confirms the powers of the Patriarchs and other spiritual chiefs with which they are invested for the affairs of other respective communities, and for the free exercise of their worship, but at the same time designates the rights and powers as limits. It also promises facilities for building churches and schools, a promise which has been more than once laid down in official acts, but which cannot aid the process of tranquilizing, as its realization depends upon the provincial authorities, who, obeying the local pressure, cannot put it into execution, unless the principle has been distinctly enunciated.

The firman, therefore, which has just been promulgated, does not pass beyond any point not granted in the *hatti-houmayoun*, which, as I have stated, surrounds the religious liberty with restrictions, which, in the course of the last years, have provoked numerous conflicts. Restricted as they are, the concessions which it makes have never sufficed to satisfy the Christians. This will be all the less the case at the present time, after the events which have drenched the country with blood and which only embitter the contest which separates the two religions. The insurrection once suppressed, the Mohammedan element, considering itself as victor, will without doubt seek to avenge itself on the Christians for the losses which so violent a war caused them. A state of affairs which makes the coexistence of two peoples who have just emerged from so bitter a conflict possible can only be assured by placing the Christian religion on an equal footing with the Islam, and by publicly recognizing and respecting, and not only tolerating it, as is the case at present. It is for this reason that the guaranteeing powers ought in our opinion not only to demand of the Porte, but obtain of it as the first and principal concession, a full and entire religious liberty.

Equality before the law is a principle explicitly proclaimed by the *hatti-houmayoun*, and secured by legislation. It is without doubt for this reason that the recent acts of the Sultan have omitted to mention it.

But this principle, although legal, is not generally applied throughout the empire. In fact, the testimony of Christians against Mohammedans is received by the tribunals of Constantinople, and for the most part in the other large cities. But in some distant provinces, as in Bosnia and the Herzegovina, the judges refuse to recognize its validity. It would, therefore, be necessary to take such measures that in future the Christians will not have to fear a denial of justice.

Another point which calls for an urgent remedy is the farming out of the contributions. Even the *hatti-sheriff* of 1839, in speaking of this system, expressed itself in the following terms: "An evil habit still exists, which can only have disastrous consequences, that of the venal concessions, designated by the name of *iltizam*. In this system the civil and financial administration is handed over to a single man, that is to say, sometimes to the iron hand of the most violent passions and the most exacting cupidity."

And the *hatti-houmayoun* says as follows: "The most energetic and the promptest means will be advised in the collection of the taxes, especially of the tithes. The system of the direct collection shall be introduced successively, and as soon as possible, in the place of the farming-out system in all the branches of the Government."

In spite of these formal declarations, the farming-out system still exists in all its extent.

To-day the Porte brings reforms in view in this direction, without, however, saying anything definite. The firman of December 12th again desig-

notes the present system of collecting the taxes as irregular. It ordains that a mode of equalizing the taxes be sought for. It also prescribes that measures be taken "to abolish the arbitrariness in the collection of the tithes by means of the farmers," but it does not abolish the farming-out system.

If, therefore, an important and unceasing source of support of the insurrection is to be removed, one of the points which are to be demanded of the Porte is that it give a clear and decided declaration that the system of farming out the taxes be abolished for Bosnia and the Herzegovina, not only of right but in fact, and that this measure be applied immediately.

One of the causes which tend to increase materially the heavy load of taxes in Bosnia and the Herzegovina is that the inhabitants believe themselves to be financially robbed for the benefit of the central Government. They believe that the taxes are not used for the benefit of the province itself, but that the total sum gathered is immediately sent to Constantinople to be used for the central Government.

It would, therefore, be necessary to morally ease the burden of taxes which the province has to bear, by appropriating, without prejudice to the amount necessary for the expenses of the empire, a part of the taxes raised by the province for purposes which would promote its own interests.

For this purpose it would be necessary for the Porte to declare that the revenue derived from the indirect taxes be appropriated, as heretofore, for the empire, but that the funds raised by direct taxation should remain in the province, and should be exclusively applied in its interests to develop its resources and promote its welfare.

The execution of this disposition should be placed under the control of the elective commission of which mention will be made further on.

The sad condition of the Christians in Bosnia and the Herzegovina is caused chiefly by the relations existing between the land-owners and the rural population. The agrarian difficulties are always of a peculiarly bitter character in countries where the land-owners differ in religion or nationality from the mass of the peasants. There are only too many examples of contests which have arisen from such causes.

In the provinces with which we occupy ourselves almost all of the real estate which does not belong to the state or to the mosques is in the hands of Mohammedans, while the agricultural portion of the population is composed of Christians of the two rites. The agrarian question is, therefore, complicated by religious antagonism.

After the suppression of the first insurrection of the Begs of Bosnia in 1851, serfdom was abolished, but, as it often happens in a case like this, this measure, instead of alleviating the condition of the peasants, only aggravated it. They are no longer treated by the former with the same consideration as formerly. To-day we see nothing but two antagonistic interests and religions.

From the moment that the abolition of the feudal system transformed the former serfs into farmers, the excesses of the proprietors have caused numerous partial and general revolts. When a movement of this kind broke out in Bosnia, in 1858, the Porte found itself compelled to occupy itself with the difficulties which had given rise to this movement. Delegates from both parties were called to Constantinople, and, after long conferences, in which the official intervention of the ambassador of his Majesty the Emperor and King took part, a firman of the Sultan was obtained, whose provisions seemed to conciliate the interests of the agriculturists. This firman, however, was never put in operation.

It would be in place to examine whether some of the provisions of this document could not serve even at the present time as the basis for an equitable ar-

rangement apt to improve the condition of the rural population, or whether it would be advisable to let the public Treasury interfere to facilitate the execution of the measures necessary for this purpose, just as it was done some twenty years ago in Bulgaria, where the ground-rents were relieved by the emission of public rents called *ashims*. We know that the task is difficult, and that its accomplishment cannot be the work of a day; but we believe it to be important to work for the improvement of the condition of the rural population in Bosnia and the Herzegovina, and to close thus one of the most glaring wounds of the social state of these provinces. It would not seem impossible to us to find a combination which would permit the peasants to acquire gradually and on easy terms parts of uncultivated land which the state would put up at sale. If they would then still further desire to cultivate, as farmers, the properties of their Mohammedan compatriots, they would themselves in time possess a small property, which would secure for them a certain independence, and would protect them against exactions.

If we remember how little belief in the promises of the Sublime Porte is met with among the Christian population, we cannot close our eyes to the fact that the promulgated reforms would only then inspire the necessary confidence if a certain guarantee would be given that the reforms would be seriously applied. If their execution would be simply intrusted to the government of the province, we could not overcome the mistrust of which I speak. It would, therefore, be in place to establish a commission of the nobles of the country, composed half-and-half of Mohammedans and Christians, and elected by the inhabitants of the province according to a method to be determined upon by the Sublime Porte.

I have thus exposed the points the application of which it would be necessary to obtain before we could entertain any well-founded hopes of pacification.

These points are as follows:

Full and complete religious liberty.

The abolition of farming out the revenues.

A law which would guarantee that the product of the direct contributions of Bosnia and the Herzegovina be employed in the interest of the province itself, under the control of boards constituted in the sense of the firman of December 15th.

The creation of a special commission, composed of equal numbers of Mohammedans and Christians, to control the execution of the reforms proposed by the powers, as well as those contained in the irade of October 2d, and the firman of December 12th.

And, lastly, the improvement of the agrarian condition of the rural population.

The first points should be realized immediately by the Sublime Porte, and the fifth one gradually and as soon as possible.

If, independently of these conditions, which seem to us the most essential, Bosnia and the Herzegovina were to obtain the following reforms contained in the last firman: a provincial council and tribunals freely elected by the people, irremovable judges, personal liberty, dispensation of justice by laymen, guarantee against abuse, the reorganization of the police, whose action has caused so many complaints, the cessation of the abuses caused by the rendering of works for public use, a just reduction of the tax for the exemption from military service, guarantees to be given to the rights of property—if all these reforms, concerning which we ask for the opinion of the Porte, were applied to the insurgent provinces, which, judging by the text of the firman, do not seem to be benefited by them at present, we might hope to see peace return to these desolated countries.

I am coming to the end. The indefinite promises of the irade of October 2d, and of the firman of December 12th, could only raise hopes without satisfying them. On the other hand, it is to be noticed that the Turkish arms have not succeeded in put-

ting an end to the insurrection. The winter has suspended all action, the spring will see it reopen. The conviction that with the coming of spring new elements will reinforce the revolt, that Bulgaria and Candia will increase the movement, is general among the Christians. But, however that may be, it is to be foreseen that the Governments of Servia and Montenegro, which up to the present time have, not without considerable trouble, kept aloof from the insurrection, will be unable to resist the current, and even now, under the influence of events and the public opinion of their country, they seem to familiarize themselves with the idea to take part in the war at the melting of the snow.

In view of this situation, the task of the powers, who wish to avoid further complications in the interests of the general peace, becomes quite difficult. Austro-Hungary and the other two imperial courts, in the course of a confidential exchange of ideas, have come to the conclusion that if they were to restrict themselves to waiting for the result of the principles proclaimed in the last firman, principles which according to the intention of the Porte are not to be applied immediately to the countries in revolt, a quite different result would be obtained than was intended; that, on the contrary, the revolt would gain considerably in extent toward the end of the winter. The three cabinets, therefore, believe that the only chance to avoid new complications is to be found in a manifestation emanating from the powers, stating it to be their firm resolution to check the movement which threatens to overrun the whole East.

This end, however, could not be gained by the sole means of an injunction to the Governments of the principalities and the Christian subjects of the Sultan. In order that this action, very difficult in itself, may have a chance of success, it is absolutely necessary that the powers can appeal to clear, indisputable, and practical reforms, such as are particularly appropriate to improve the condition of the Herzegovina and Bosnia; in a word, that their action can found itself on facts, and not on programmes. It is only in this way that the powers will be able to emphasize their pacific counsels.

There is another difficulty, and it is the largest, which must be overcome at all hazards. This difficulty is the profound mistrust with which all promises of the Porte are met by the Christians. One of the principal causes of this mistrust will be found in the fact that more than one measure advanced in the last proclamations of the Sultan has already been proclaimed in the former hatti-sheriffs, without improving the condition of the Christians in the least.

The cabinets also believe it absolutely necessary that the Government of the Sultan, by means of an official commission, confirm its intentions with regard to the whole empire as laid down in the iradé of October 2d, and in the firman of December 12th, and that it notify the powers at the same time of its acceptance of the points above mentioned, which have for their special object the pacification of the insurgent provinces.

Without doubt the Christians in this way would not obtain the form of a guarantee which they seem to demand at this moment, but they would find a relative security in the fact itself that the reforms are recognized as indispensable by the powers, and that the Porte would be toward Europe under the obligation of putting them into execution.

This is the firm conviction gained from the former exchange of ideas between the cabinets of Austro-Hungary, of Russia, and of Germany.

Your Excellency is charged to bring this point to the knowledge of . . . , and to obtain his assistance in the work of peace, to the success of which all our efforts are directed.

If, as I hope, the views of the Government of . . . meet ours, we would propose to it, out of regard for the dignity and the independence of the Porte, not to address to it our counsels in a collective note, but

simply to instruct our representatives in Constantinople to act conjointly and in an identical manner with the Government of the Sultan in the sense which we have developed.

You will please read this dispatch to the Minister of Foreign Affairs, and leave a copy with him; and I would also be obliged to you if you would let me know, as soon as possible, what impression it made upon his Excellency. Receive, etc.

On April 25th Hussein Avni Pasha was succeeded by Essad Pasha as Grand-Vizier, and was then appointed Governor-General of Aidin. On June 15th another change in the ministry took place. Arifi Pasha, the Minister of Education, was appointed Minister of Justice, and Dshevded Pasha, the Governor-General of Albania, was appointed to the position made vacant by him. In the latter part of August Mahmud Pasha was appointed Grand-Vizier, Essad Pasha Minister of Public Works, and Server Pasha President of the Council of State.

On September 30th a convention was signed with Austria, providing for the connection of the railroads of the two countries. According to this agreement the work to finish the Belovar & Sofia Railroad was to be begun on March 31, 1876, and the whole Belovar, Sofia & Nissa road was to be finished in four years. The Austro-Hungarian Government must, on the other hand, begin and finish, during the same periods of time, the connection of the Hungarian railroads with Belgrade.

The dispute with Montenegro, in regard to the murders of Podgoricza, was finally settled by a firman of the Sultan, of April 10th, ordering the Governor of Scutari to execute the murderers under sentence of death. Considerable excitement was produced in Montenegro, in the latter part of the year, in consequence of the insurrection in Bosnia. Numerous warlike rumors were sent abroad, but the number of Montenegrins who joined the insurgents was very small.

A new ministry was formed in Servia, in January, under the leadership of Danilo Stefanovitch. The new ministry proclaimed as its policy in foreign affairs "a loyal peace policy." As the Skuptchina had a large radical majority, there were some stormy sessions. In March a motion was made that the prince may name, conjointly with the Skuptchina, his successor, but, in case he should die without having named a successor, the new prince should be elected by the people. The family of Karageorgivitch was, however, to be excluded from the succession. Before any action was taken on this motion, forty-four Radicals left the hall, in great disorder, on March 24th, thus breaking the quorum. On the following day the Skuptchina was declared closed by a decree from the prince.

The elections for the new Chamber were held in August, and resulted in a complete victory for the Radicals. In the same month Prince Milan addressed a note to the European powers who signed the Treaty of Paris, complaining that he had not been informed of their intentions regarding the insurrection which was

extending into Serbia, and which seemed to threaten to assume proportions which might render its suppression impossible. The Skuptchina met on August 28th. A new coalition ministry was formed by Ristic. Prince Milan, in formally opening the Skuptchina on September 9th, referred, in indefinite language, to the troubles in Bosnia and Herzegovina. He said he relied on his people's support in the serious task imposed by the grave crisis. Shortly after the Servian ministry issued a circular to the chiefs of the several districts, saying: "We are

living on the best terms with the Porte. We, therefore, order that you prevent this good understanding from being disturbed either by permitting volunteers to join the insurgents, or by the export of arms, ammunition, or provisions." On account, however, of the threatening concentration of Turkish troops on the frontier, the Servian Government ordered the mobilization of six frontier brigades, aggregating 24,000 men. Each soldier was supplied with 100 rounds of ammunition, and special precautions were to be taken during the night.

BELGRADE.

The address of the Skuptchina, in reply to the speech from the throne, was published on September 23d. All means necessary to protect the liberty of the people and the security of the country were placed at the disposal of Prince Milan. On October 4th the ministry resigned, and a new one, under Kaljevic, was formed. The new ministry was decidedly in favor of peace, and although the Skuptchina had a large majority in favor of war, it finally acceded to the decided wishes of the prince, who, in obedience to the pressure exercised by Austria and Russia, exerted himself to his utmost to preserve the peace. On October 29th Prince Milan adjourned the sittings of the Skuptchina one month at the request of its members. On November 12th the Servian troops were withdrawn from the frontier, as those of the Turks had been withdrawn a few days previously. The Skuptchina reassembled on November 30th.

The Roumanian Chambers were closed on March 28th by Prince Charles, by a speech in which he called attention to the general respect in which the principality was held in Europe, as other powers desired to form treaties with it, a sentiment which was warmly applauded.

The elections for the new Chambers took place on May 4th, in which the Liberal party were badly defeated.

The regular session of the Chambers was opened on November 27th, by Prince Charles in person. In the speech from the throne he called particular attention to the prosperous state of the country, and closed with the words, "We could only follow with the most vivid attention the events going on on the other side of the Danube. By means of our favorable position we were able to continue the course of peaceful reorganization, which meets the real necessities of the nation."

The famine in Asia Minor continued during the early part of the year, and was followed in March by destructive floods. The valleys of the Meander and Hermus, the great agricultural districts of Smyrna, were inundated for over a month, to the complete suspension of all farming operations, and to the destruction of a great deal of valuable property.

In March, the city of Beyrout, in Syria, was the scene of an anti-Christian riot. A great number of Mohammedans, of both sexes and of all ages, armed with knives, sticks, and stones, assembled in a suburb and assaulted every Christian they met, breaking the windows of the houses they passed. As all the Christian men of that part (chiefly the laboring-classes) were either at work or attending the Lent services in churches, the women and children were unprotected, and shut themselves up in their houses. At length a body

of police came up, who, being eventually re-enforced by a number of horse and foot soldiers, succeeded in clearing the streets. The person in command, finding the country roads filled with Mohammedans, stationed soldiers at short distances to prevent any further outbreak. Twelve Christians were found to have been badly injured, but a great number must have been seriously maltreated before they could find shelter. Six Christians and five

Mohammedans were arrested, but, as there was no charge against the former, they were released. About a week prior to the first attack, the English consul at Damascus met several Mohammedans, one of whom, though it was broad day, drew a dagger and attempted to stab him. The consul drew a small pistol and presented it at his assailants. Taking advantage of their momentary fright, he succeeded in escaping.

U

UECHTRITZ, FRIEDRICH VON, a German poet, born in 1800; died September 15, 1875. He studied law in Leipsic, held various offices in Treves and Düsseldorf, and in 1858 left the service of the Government. His first large work was the drama "Chrysostomus" (1822), which was followed by two tragedies in 1823. His tragedy "Alexander und Darius" (1827), however, was the first one to be produced successfully in Berlin. He also published the tragedy "Rosamunde" (1833), the dramatic poem "Die Babylonier in Jerusalem" (1836), a collection of poems under the title of "Der Ehrenspiegel des deutschen Volkes und vermischte Gedichte" (1842), and the novels "Albrecht Holm" (7 vols., 1852-'53), "Der Bruder der Braut" (3 vols., 1860), and "Eleazar" (3 vols., 1867).

UNITARIANS. *The Year-Book of the Unitarian Congregational Churches* for 1876 gives lists of 362 churches and 400 ministers. Of the churches 215 are set down as having pastors, and 147 as without pastors. Of the ministers 218 are designated as settled, and 182 as unsettled.

According to the English *Unitarian Pocket-Almanac* for 1876, there are in England 348 Unitarian ministers, of whom 279 are settled; 69 ministers are classed as "not settled, superannuated, or engaged in other occupations."

The fiftieth anniversary of the British and Foreign Unitarian Association was held in London, in May. The following delegates from other countries were present: The Rev. George W. Briggs, D. D., and the Hon. G. E. Baker, of the United States; Pasteur Dide, of France; Dr. Carl Manchot, of Germany; Prof. Kuenen, of Holland; Dr. Gyertyai and the Hon. Alexis Jokab, of Hungary. The exercises consisted chiefly of addresses and social meetings. An effort had been begun the year before to raise £10,000 as a jubilee-fund. The sum had been nearly obtained, and it was now proposed to increase it to £20,000.

The Dutch Protestant Association met in Rotterdam, in October. Prof. C. P. Thiele, of the Remonstrant Divinity School at Leyden, presided. Delegates were present from the Remonstrant and Walloon, the Lutheran, and Reformed Churches. The report of the Executive Committee showed that the Association

had 2,500 members. It had established Sunday-schools, instituted lectures, published books and tracts, and held public meetings in the principal cities of Holland. At the public conference addresses were made by the Rev. Mr. Spaeth, of Oldenburg, for the German Protestant Association; the Rev. Philip Henry Wicksteed, of London, for the British and Foreign Unitarian Association; and by Mr. John Fretwell, Jr., in behalf of the American Unitarian Association.

The ninth German Protestant Conference was held at Breslau, in September. The meeting was devoted chiefly to the discussion of questions relating to the general religious condition of the country and the work of the Association. Visiting delegates were present from Switzerland, Holland, and England; and Mr. John Fretwell, Jr., of England, spoke of his travels among the Unitarian and other Liberal Christian societies in the United States.

UNITED BRETHREN IN CHRIST. The twenty-second annual meeting of the Board of Missions of the United Brethren in Christ was held at Dayton, Ohio, beginning May 13th. Bishop D. Edwards presided. The total receipts for the year, including the balance in the treasury at the beginning, were reported to have been \$21,228.85; the expenditures had been \$27,758.08, showing an excess of \$6,529.23 above the receipts. Besides the general receipts of the society, the sum of \$23,732.62 had been contributed to branch treasuries, and \$50,820.49 had been paid in salaries by the Missionary Society, making a grand total of income to the missions of the Church of \$95,271.96. A permanent fund was reported, amounting to \$44,658.12. The report of the Church Erection Society showed its receipts for the year to have been \$2,941.38, its expenditures \$2,880, and its total assets to be \$10,470.38. The missionaries in Germany had labored all they were permitted to do by the authorities. One of them, the Rev. Mr. Bischoff, had been fined for preaching, and, refusing to pay the fines, had appealed to the King of Bavaria. The result of the appeal had not been ascertained. The board decided that, in case the efforts to secure the permission of the King to organize a church in Bavaria should prove unsuccessful, Mr. Bischoff should join

the mission in Saxony, or open a work in some other part of Germany, contiguous to the present mission, as might be directed by the Executive Committee. A favorable report was made of the condition of the missions in Africa, at Shengay and Bomphetook, in the Shesbro country. One of the most powerful chiefs in this district had been converted.

Reports were received concerning the domestic missions in the Virginia Valley, Philadelphia (German), Toledo, O. (German), Tennessee, Missouri, Dakota, Wisconsin, the Fox River District, in Northwestern Illinois, Kentucky, the Parkersburg (Va.) Mission Conference, Minnesota, Kansas, Colorado, California, Oregon, and the Walla Walla District. The larger part of the mission funds of the Church had been expended in the home-field. The Walla Walla Conference had been disturbed by a strange fanaticism, in consequence of which it had been dissolved, and constituted a mission district under the control of the board.

The statistics of churches, members, and ministers, were reported at the close of the year 1875 as follows:

CONFERENCES.	Organized Churches.	Number of Members.	Number of Ministers.

* Statistics of 1874.

The contributions for religious purposes amounted to \$788,304; the most important items being \$335,215 for ministerial salaries, \$38,925 for missions, \$290,000 for church building and expenses, and \$46,935 centennial contributions. The number of Sabbath-schools is 2,718, and the number of children, officers, and teachers, 160,931. The Church, in 1875, had four bishops, and the general publishing-house, at Dayton, Ohio, issued four periodicals in the English and two in the German language. The aggregate circulation of the periodicals was, on July 1, 1874, 181,500 copies. The educational institutions of the Church are Otterbein University, Westerville, Ohio; Hartsville University, Hartsville, Ind.; Westfield College, Westfield, Ill.; Lebanon Valley College, Annville, Pa.; Lane University, Lecompton, Kan.; Western College, Western, Iowa; Philomath College, Philomath, Oregon; Green Hill Seminary, Poolsville, Ind.; Roanoke Seminary, Roanoke, Ind.; and the Union Theological Seminary.

A "Woman's Missionary Association of the Church of the United Brethren in Christ" was organized at a convention called for that purpose, which met in Dayton, Ohio, October 21st.

UNITED STATES. Several resignations of important officers of the Federal Government at Washington took place during the year 1875. On April 22d George H. Williams, the Attorney-General, tendered his resignation, which was subsequently accepted by the President. His successor was Edwards Pierrepont, who accepted on April 26th. He was born in New Haven, Conn., on March 4, 1817, entered Yale College in 1833, and four years after graduated, and in 1840 was admitted to the bar. Leaving the East, he settled at Columbus, Ohio. In 1846 Mr. Pierrepont left Ohio and took up his residence in New York. He immediately began the practice of his profession in that city, and soon attained high rank at the bar and a large and lucrative practice. In 1857 he was elected as Judge of the Superior Court, to fill the vacancy caused by the death of Chief-Justice Oakley. He remained upon the bench until 1860, when he resigned and resumed practice at the bar. In 1867 he was elected by the Democracy of New York City a member of the State Constitutional Convention, in the proceedings of which he took a prominent part. In the same year, notwithstanding his affiliations with the Democratic party, he accepted the position tendered him by the Attorney-General and Secretary of State to conduct the prosecution against John H. Surratt, when the latter was placed on trial for complicity in the assassination of President Lincoln. Although he did not indorse the course of President Johnson fully, he sided with him on the question of reconstruction. He continued to act with the Democratic party until 1868, and was a member of the State Convention of that year which nominated John T. Hoffman for Governor. But the nomination

of ex-Governor Seymour for President by the Democracy did not meet his approval, and shortly after that event took place he came out in support of General Grant, defining his position and explaining the motives which actuated his course, at the same time subscribing the sum of \$12,000 toward defraying the election expenses. This course severed Mr. Pierpont's connection with the Democratic party, and he has since acted invariably with the Republicans, although always regarded as having conservative leanings. On April 2, 1869, just before the inauguration of General Grant as President, he was appointed United States District Attorney for New York City, a position which he held until July, 1870, when he was succeeded by Noah Davis, Jr.

On July 5th Columbus Delano, the Secretary of the Interior, tendered his resignation to the President. It was accepted on September 22d, and Zachariah Chandler, of Michigan, appointed his successor. Mr. Chandler had been for many years a member of the United States Senate from the State of Michigan.

Francis E. Spinner, Treasurer of the United States since 1861, tendered his resignation in March, and this office was filled by the appointment of John C. New, Cashier of the First National Bank of Indianapolis, Ind.

J. W. Douglass, the Commissioner of Internal Revenue, tendered his resignation in April, and Daniel D. Pratt, ex-Senator from Indiana, was appointed to the vacant office. Mr. Pratt was born at Palermo, Maine, October 26, 1813. He graduated at Hamilton College, New York, in 1831. In 1832 he emigrated to Indiana. During the next two years he was an assistant in the office of the Secretary of State at Indianapolis, and in the mean time studied law and was admitted to the bar. In 1836 Mr. Pratt settled in Logansport, Ind., which has continued to be his home. In 1847 he became the Whig candidate for Congress, but sustained a defeat. In the following year he was district elector on the Whig electoral ticket. In 1851 and 1853 he was a member of the Lower House of the Legislature; in 1856, Republican candidate for elector; in 1860, delegate from the State at large to the Chicago Convention. In 1868 he was elected a representative in the Forty-first Congress, but before taking his seat he was elected, in January, 1869, to the United States Senate, as successor to Thomas A. Hendricks. His term expired on March 4, 1874.

The death of Henry Wilson, of Massachusetts, the Vice-President of the United States, brought forward Thomas W. Ferry, a Senator from Michigan, as acting Vice-President. Mr. Ferry was born at Mackinaw, Mich., on June 1, 1827. He received only a common-school education and has occupied a seat in both the House and Senate of his State. He was a member of the Thirty-ninth, Fortieth, and Forty-first Congresses, and was elected to the Forty-second, but did not take his seat, having subsequently been elected to the Senate in place of Jacob M.

Howard. His term of service expires March 3, 1877. He took his seat in the Senate, March 4, 1871, and was chosen President, *pro tempore*, on March 9 and 19, 1875, and again on December 20, 1875.

The political affairs of the country were unusually quiet during the year. The following letter from President Grant to General Henry White, President of the Pennsylvania Republican Convention, attracted considerable attention as an expression of the views of the President relative to a third term in the presidential office:

EXECUTIVE MANSION,
WASHINGTON, D. C., May 29, 1875. }

DEAR SIR: A short time subsequent to the presidential election of 1872, the press, a portion of it hostile to the Republican party, and particularly to the Administration, started the cry of "Caesarism" and "The third term," calling lustily for me to define my position on the latter subject.

I believed it to be beneath the dignity of the office which I have been twice called upon to fill to answer such a question before the subject should be presented by competent authority to make a nomination, or by a body of such dignity and authority as not to make a reply a fair subject of ridicule. In fact, I have been surprised that so many sensible persons in the Republican party should permit their enemy to force upon them and their party an issue which cannot add strength to the party, no matter how met.

But a body of the dignity and party authority of a convention to make nominations for the State officers of the second State in the Union having considered this question, I deem it not improper that I should now speak. In the first place, I never sought the office for a second, nor even for a first nomination. To the first I was called from a life-position, one created by Congress expressly for me for supposed services rendered to the republic.

The position vacated I liked. It would have been most agreeable to me to have retained it until such time as Congress might have consented to my retirement, with the rank and a portion of the emoluments which I so much needed, to a home where the balance of my days might be spent in peace and the enjoyment of domestic quiet, relieved from the cares which have oppressed me so constantly now for fourteen years. But I was made to believe that the public good called me to make the sacrifice.

Without seeking the office for the "second term," the nomination was tendered to me by a unanimous vote of the delegates of all the States and Territories selected by the Republicans of each to represent their whole number for the purpose of making the nomination. I cannot say that I was not pleased at this, and at the overwhelming indorsement which their action received at the election following.

But it must be remembered that all the sacrifices except that of comfort had been made in accepting the "first term." Then, too, such a fire of personal abuse and slander had been kept up for four years, notwithstanding the conscientious performance of my duties to the best of my understanding—though I admit, in the light of subsequent events, many times subject to fair criticism—that an indorsement from the people, who alone govern republics, was a gratification that it is only human to have appreciated and enjoyed.

Now, for the "third term." I do not want it any more than I did the first. I would not write or utter a word to change the will of the people in expressing and having their choice. The question of the number of terms allowed to any one Executive can only come up fairly in the shape of a proposition to amend the Constitution, a shape in which all political parties

can participate, fixing the length of time or the number of terms for which any one person shall be eligible for the office of President.

Until such an amendment is adopted the people cannot be restricted in their choice by resolution further than they are now restricted as to age, nativity, etc. It may happen in the future history of the country that to change an Executive because he has been eight years in office will prove unfortunate if not disastrous. The idea that any man could elect himself President, or even renominate himself, is preposterous. It is a reflection upon the intelligence and patriotism of the people to suppose such a thing possible. Any man can destroy his chances for the office, but no one can force an election or even a nomination.

To recapitulate. I am not, nor have I ever been, a candidate for a renomination. I would not accept a nomination if it were tendered, unless it should come under such circumstances as to make it an imperative duty—circumstances not likely to arise. I congratulate the convention, over which you presided, for the harmony which prevailed, and for the excellent ticket put in the field, and which, I hope, may be triumphantly elected. With great respect, your obedient servant,
U. S. GRANT.

To General HARRY WHITE, President Pennsylvania Republican State Convention.

In September a reunion of the officers of the Army of the Tennessee took place at Des Moines, Iowa. On the evening of September 29th, at the Opera-House, an address of welcome and an oration were delivered. Eulogies were pronounced, and speeches made by Generals Sherman, Davis, Force, Meyers, and others. President Grant, being present on this occasion, spoke as follows:

COMRADES: It always affords me much gratification to meet my comrades in arms of ten and fourteen years ago, and to tell over again from memory the trials and hardships of those days, of hardships imposed for the preservation and perpetuation of our free institutions. We believed then, and we believe now, that we have a government worth fighting for, and if need be dying for. How many of our comrades paid the latter price for our preserved Union! Let their heroism and sacrifice be ever green in our memory. Let not the result of their sacrifices be destroyed. The Union and the free institutions for which they died should be held more dear for their sacrifices. We will not deny to any of those who fought against us any privilege under the Government which we claim for ourselves. On the contrary, we welcome all such who come forward in good faith to help build up the waste places, and to perpetuate our institutions against all enemies, as brothers in full interest with us in a common heritage; but we are not prepared to apologize for the part we took in the war.

It is to be hoped that like trials will never again befall our country. In this sentiment no class of people can more heartily join than the soldier who submitted to the dangers, trials, and hardships of the camp and the battle-field, on whichever side he fought. No class of people are more interested in guarding against a recurrence of those days. Let us, then, begin by guarding against every enemy threatening the prosperity of free republican institutions. I do not bring into this assemblage politics, certainly not partisan politics; but it is a fair subject for the soldiers, in their deliberations, to consider what may be necessary to secure the prize for which they battled. In a republic like ours, where the citizen is the sovereign, and the official the servant; where no power is exercised, except by the will of the people, it is important that the sovereign, the people, should foster intelligence, that in-

telligence which is to preserve us as a free nation. If we are to have another contest in the near future of our national existence, I predict that the dividing line will not be Mason and Dixon's; but between patriotism and intelligence on the one side, and superstition, ambition, and ignorance, on the other.

Now, the centennial year of our national existence, I believe, is a good time to begin the work of strengthening the foundations of the structure commenced by our patriotic forefathers one hundred years ago at Lexington. Let us all labor to aid all needed guarantees for the security of free thought, free speech, a free press, pure morals, unfettered religious sentiments, and of equal rights and privileges to all men irrespective of nationality, color, or religion. Encourage free schools, and resolve that not one dollar appropriated for their support shall be appropriated to the support of any sectarian schools. Resolve that neither the State nor nation, nor both combined, shall support institutions of learning other than those sufficient to afford to every child growing up in the land the opportunity of a good common-school education, unmixed with sectarian, pagan, or atheistical dogmas. Leave the matter of religion to the family altar, the church, and the private school, supported entirely by private contributions. Keep the Church and the state forever separate. With these safeguards, I believe the battles which created the Army of the Tennessee will not have been fought in vain.

Subsequently, about January 4, 1876, the statement was made that the President had explained the free-school portion of the above speech in a letter to a professor of the Iowa University, in which he said:

What I said at Des Moines was hastily noted down in pencil. I may have expressed my views imperfectly. I have not the manuscript before me, as I gave it to the secretary of the society. My idea of what I said is this:

Resolved, That the State or nation, or both combined, shall furnish to every child growing up in the land the means of acquiring a good common-school education. Such is my idea, and such I intended to have said. I feel no hostility to free education going as high as the State or national Government feels able to provide, protecting, however, every child in the privilege of a common-school education, before public means are appropriated to a higher education for the few.

Some circumstances, existing at the time, gave to this speech of the President an unusual and perhaps an undeserved force. Had he not been President, and had he not been charged by the opposition with a determined purpose to secure a third term, these remarks by him might have escaped attention. There had likewise existed during the year a more warm and excited discussion of the so-called "school question" than usual. This question consists of the claim on the part of Roman Catholics to be exempt from taxation for the support of public schools, on the ground that they cannot conscientiously send their children to these schools. This conscientiousness is based on the conviction on their part that at these schools no religious instruction is given to children, or such instruction is given as is hostile to the Catholic principles and perspective of the Catholic faith.

Accordingly, when the President's speech appeared, he was renewedly charged with seeking a "third term," and with attempting

to throw a religious question as a firebrand into the presidential contest of 1876.

Not long after, the following letter, in some unaccountable manner, appeared in the public press. It is addressed to ex-Speaker Blaine, a member of Congress from Maine:

OFFICE OF EVENING COURIER,
NEWARK, N. J., November 9, 1875. }

Hon. J. G. BLAINE.

MY DEAR SIR: Eighteen months ago I told you that you could have New Jersey in 1876. I wish now to emphasize that statement. All our people are for you, and we can carry the State beyond peradventure.

Our danger is that the West will demand the nomination. This can also be averted, of course, by a union of New England, the Middle States, and stray votes from the South. A potent factor in our next convention will be the secret anti-Catholic order. Grant is a member, and it has a good deal of strength in Congress. I think you ought to go in. It can be arranged so that you can be initiated anywhere by one person. The order is spreading widely. My obligations do not permit me to say more than this, except that Grant, no doubt, relies upon it to promote his aims.

With wisdom at Washington and with the States we have carried, we can surely hold the country. But to hold it for a hap-hazard candidate is hardly worth the candle. For one of a vast multitude I want to hold it for you. Excuse this scrawl, and believe me, yours very truly,

JOHN Y. FOSTER.

The eagerness of the opposition press was now greatly stimulated. The letter of ex-Speaker Blaine on public schools, after the election in Ohio in 1874, was reproduced (*see* BLAINE, J. G.), and the secret order was finally smoked out.

On December 28th the Executive Committee of the "O. A. U.," or Order of the American Union, issued the following address relative to the character and object of their union:

NEW YORK, December 28, 1875.

The National Executive Committee of the Order of the American Union deem it advisable to promulgate a summary of the principles which underlie and energize their actions as citizens and as members of the order. They do not here advance arguments in defense of these principles, nor offer apology for holding them: they simply state them, leaving the question of their acceptance or rejection to every man's judgment and discretion. The issues raised, by this enunciation of principles, are neither new nor extraordinary; nor will their announcement raise either new advocates or new antagonists. The issues presented are as old as the Reformation; the interests involved are identical.

1. We accept the Bible as the basis of all moral, religious, governmental, and educational undertakings.

2. We yield an unhesitating support to the Constitution and Government of the United States and of the several States.

3. We urge that the present system of our general unsectarian free-school organization shall be maintained inviolate.

4. We claim that no part of the public funds shall ever be used for the support or maintenance of any sectarian school or institution whatever.

5. We are opposed to any interference in political affairs by any man or body of men acting in behalf, or by direction of, any ecclesiastical body or powers; yet we make no war upon any man's religious creed.

The objects and purposes of our order are few and

simple, and we give them publicity. The ways and means of conducting our business matters, the methods by which we propose to secure the desired results, are peculiarly our own, and we intend to keep them to ourselves. "Third term or one term," "Democracy or Republicanism," "Hard money or soft money," "Crooked whiskey or straight," are entirely outside of our aims and plans, and receive no attention whatever. To sustain and advance the ideas above summarized, we propose to use all lawful and suitable measures at all times, that to us seem to be propitious, with all persons who labor for their triumph against all agencies which seek their overthrow and destruction. As in the past, so for the future, we invite and expect to receive the cooperation and aid of thousands upon thousands of sturdy, stalwart, patriotic, thoughtful men, who love their country with an ardor surpassing that of party, sect, or clan.

But the public attention was soon diverted from these subjects by the development of vast frauds upon the revenue of the Government by Western manufacturers of whiskey (*see* PUBLIC DOCUMENTS and MISSOURI). These frauds became exposed in the criminal trials of some of the manufacturers commenced by the Secretary of the Treasury, BENJAMIN HELM BRISTOW. To the brief biographical sketch of Mr. Bristow in the last volume of this work the following particulars are added: He was born in Elkton, Todd County, Ky., in the month of July, 1832, and was the second of a family of four children. His father, Francis N. Bristow, was widely known throughout the State as a lawyer of ability. In 1860-'61 he represented the Third District of Kentucky in the Congress of the United States, and held offices of responsibility and honor at various times. He was a member of the Constitutional Convention in 1850 which framed the State constitution. He died during the war. His mother, who is now in Elkton, was Emily Helm, daughter of Benjamin Helm, of Elizabethtown, Ky. His two sisters, Mrs. Petree and Mrs. Gill, and his brother, Frank Bristow, also reside in Elkton. At an early age, Benjamin entered Jefferson College at Canonsburg, Pa., and went diligently through the course of study there afforded. On leaving the college in 1848, he entered the law-office of his father at Elkton, and continued the study and practice of law with his father until 1857, when he removed to Hopkinsville, Christian County, where, in partnership with Judge R. L. Petree, he pursued his profession with reasonable success, until the breaking out of the war, very soon after which he entered the United States service as lieutenant-colonel of the Twenty-fifth Kentucky Regiment, commanded by Colonel Shackelford, and distinguished himself for coolness and bravery at the battles of Fort Henry, Fort Donaldson, and Pittsburg Landing (Shiloh). Returning home in 1862, he was active in raising the Eighth Kentucky Cavalry, with which he again entered the service as lieutenant-colonel, and was soon made colonel. This regiment was in many memorable battles. In the fall of 1863 he was elected to the State Senate from the Hopkinsville District of Kentucky. He was on the Committee on

Military Affairs, and stood by the Union, in those stormy times of 1863-'65, when he resigned his seat, and located in Louisville to practise his profession. In 1866 he was appointed Assistant United States District Attorney for Kentucky, and about a year thereafter succeeded Joshua Tevis, Esq., as District Attorney. The ability manifested in the administration of the office of District Attorney first brought Colonel Bristow prominently before the country. He resigned the office in 1870, and formed a law partnership with General John M. Harlan, of Louisville, Ky., from which he was called in less than a year to fill the office of Solicitor-General of the United States, at that time created. After about two years of life in Washington, he resigned the office and retired to the practice of his profession in Louisville. In the winter of 1874 Colonel Bristow was nominated for Attorney-General of the United States, to succeed Attorney-General Williams, who was nominated for Chief-Justice. But the nomination of Williams not having been confirmed, Colonel Bristow did not take his seat. In June, 1874, after the office of Secretary of the Treasury had been made vacant by the resignation of Secretary Richardson, the country was surprised by the appointment of Colonel Bristow to this important place in the cabinet. Once fairly settled and made familiar with the machinery of this department, he began a most sweeping and inexorable warfare upon the frauds which had crept in to rob the Government of its revenues.

Meantime the first session of the Forty-fourth Congress convened. For the first time during fifteen years the Democrats, or opposition, had a majority in the House of Representatives. This majority was overwhelming, numbering about seventy. MICHAEL C. KERR was chosen Speaker, and the committees were appointed under the expectation that investigations would be made in almost every department of the public service. Mr. Kerr was born near Titusville, Crawford County, Ind., in 1827. The foundation of his education was laid in the common schools of Crawford County. Having taken up his residence in Kentucky, he studied law in the University of Louisville, where he graduated with marked honors. After a short period he removed to New Albany, Ind. In 1856 he was elected to the Legislature of Indiana for two years. Besides serving in the Legislature he also acted at different periods as city attorney, and prosecuting attorney of Floyd County. In 1862 he was chosen reporter of the Supreme Court of Indiana, and edited five volumes of the reports of that body. In 1862 Mr. Kerr was chosen to the Thirty-ninth Congress. He was also reelected in 1866, 1868, 1870, and 1874.

The inflation or contraction of the currency was a subject considerably discussed during the year, and conventions on each side of the question were held in various localities. The views of those opposed to inflation were expressed in

resolutions like the following, adopted at the meeting of business-men in New York, on July 29th :

That we inflexibly set our faces against all schemes for currency inflation, or any form of paper currency, greenbacks or otherwise, so long as that currency shall consist of irredeemable promises to pay money, and we will oppose any policy which has not a direct purpose to establish the currency on a par with, and actually interconvertible with, coin.

The views of those opposed to contraction are summarily expressed in the following resolutions, being part of a series adopted by a convention in Detroit, August 23d :

2. The Government owes to the people an absolutely safe and uniform currency, adapted to their varying needs in amount, and of a value not materially different from that of other civilized nations.

3. That the providing of a currency for the people is an attribute of sovereignty, and we demand that the Government of the United States shall perform this duty in such a manner as to furnish the public an amount of currency adequate to the business requirements of the country, and independent of the action of banks or other private corporations.

4. That we are neither repudiationists nor inflationists, but the friends of a safe, sound, and reliable currency; that we propose to redeem the greenback circulation of the United States at the pleasure of the holders thereof, in bonds of the United States, bearing a low rate of interest, and convertible at the pleasure of the holders into greenbacks, thus redeeming the original promise of the Government when it first issued greenbacks, to fund them when desired into interest-paying bonds.

A National Temperance Convention assembled in Chicago on June 1st. In the series of resolutions adopted by the convention the following are entitled to notice :

Resolved, That we recommend all citizens to make the temperance issue "without concealment, without compromise," to the caucus and the polls; to nominate and vote for such candidates only, State and national, as will unqualifiedly indorse and sustain the prohibition of the liquor-traffic; that in every State, county, town, and congressional district, in the United States, Prohibition leagues be organized; also, whenever suitable nominations are not otherwise made, that independent Prohibition candidates be nominated for the suffrages of all thoughtful citizens; and that the Prohibition party should have the undivided support of all temperance voters in each State and Territory where, in their judgment, such political action is the best method of securing the enactment and enforcement of efficient prohibitory laws.

Resolved, That the time has arrived more fully to consider the relations of the national Government to its responsibility for the alcoholic liquor-traffic; that we hereby ask the Forty-fourth Congress to prohibit the manufacture and sale of all alcoholic beverages in the District of Columbia and in the Territories of the United States; and to prohibit their importation from foreign countries; to require total abstinence from all alcoholic beverages on the part of all officials and subordinates in the civil, military, and naval service, and to initiate and adopt for ratification by the several States of the Union a constitutional amendment which shall make the traffic in alcoholic beverages illegal throughout our national domain.

Resolved, That we respectfully ask the Forty-fourth Congress to authorize the appointment of a national commission of inquiry to investigate and report upon the results of the alcoholic liquor-traffic in its relations to pauperism, crime, the public health, and

general welfare, and the results of license and restrictive and prohibitory legislation for the suppression of intemperance.

Several conventions of "Granges" were held during the year, but their proceedings were confined entirely to questions of transportation and the interests of farmers.

A decision of the Supreme Court, of some importance, was rendered on November 29th. It sustained the Court of Claims in the case of the United States *vs.* the Union Pacific Railway. The question presented by this case was, whether by a true construction of the act of 1862, incorporating the Union Pacific Railway Company, as amended by the act of 1864, the United States, whenever it pays interest upon the bonds issued to aid in the construction of the road, is entitled to enforce immediate payment thereof from the company by suit or otherwise, or whether such reimbursement can be obtained only by the application of one-half the compensation due the company for services rendered to the Government, and five per cent. of the net earnings of the road after its completion. The company insisted upon the latter construction. The Government, by the Attorney-General, on the contrary, held that the plain meaning and intent of Congress, apparent from all the statutes when construed together, is that the United States is entitled, under the charter accepted by the company, to retain the whole value of the services rendered to the United States toward the payment of interest advanced by the United States upon the bonds loaned to the company.

A decision was also rendered in October, adverse to the claims of females to the right to vote under the fourteenth amendment to the Constitution. The Chief-Justice delivered the opinion that the Constitution of the United States does not confer suffrage upon any one, that being left for the States to do. Consequently women must look to the States for the right to vote in elections. In closing, he said:

Certainly if the courts can consider any question settled this is one. For nearly ninety years the people have acted upon the idea that the Constitution, when it conferred citizenship, did not necessarily confer the right of suffrage. If uniform practice long continued can settle the construction of so important an instrument as the Constitution of the United States confessedly is, most certainly it has been done here. Our province is to decide what the law is, not to declare what it should be. We have given this case the careful consideration its importance demands. If the law is wrong it ought to be changed, but the power for that is not with us. The arguments addressed to us bearing upon such a view of the subject may perhaps be sufficient to induce those having the power to make the alteration, but they ought not to be permitted to influence our judgment in determining the present rights of the parties litigating before us. No argument as to woman's need of suffrage can be considered. We can only act upon her rights as they exist. It is not for us to look at the hardship of withholding. Our duty is at an end if we find it is within the power of a State to withhold.

Being unanimously of the opinion that the Constitution of the United States does not confer the right of suffrage upon any one, and that the constitutions and laws of the several States which commit that

important trust to men alone are not necessarily void, we affirm the judgment of the court below.

Another case related to the validity of laws passed by the Legislatures of the Southern States, after they had resolved to withdraw from the Union and set up a Confederation of their own. The cases before the court involved the regularity of the incorporation of certain insurance companies which were created by the acts of the Legislature of Georgia in 1861 and 1863. The principle affirmed in the judgment, however, applies to the whole range of Confederate State legislation, and the rule laid down by the court is thus stated in the opinion delivered by Justice Strong:

All the enactments of the *de facto* Legislatures in the insurrectionary States during the war, which were not hostile to the Union or to the authority of the General Government, and which were not in conflict with the Constitution of the United States or of the States, have the same validity as if they had been enactments of legitimate Legislatures; and any other doctrine than this would work great unnecessary hardship upon the people of those States, without any corresponding benefit to the citizens of other States, and without any advantage to the national Government.

Another decision in the case of *Burk vs. Child* was to the effect that a contract to pay for lobby services is invalid. This decision was made upon the ground that all such contracts are against the maxims of sound policy.

(For the financial condition of the United States, *see* the article FINANCES. For the foreign relations of the country, *see* the President's message in PUBLIC DOCUMENTS, and the title DIPLOMATIC CORRESPONDENCE. For the military and navy affairs of the country, *see* ARMY and NAVY respectively; and for the general condition of internal affairs, *see* CONGRESS and the several States.)

UNIVERSALISTS. The United States Convention of Universalists met at Lynn, Mass., October 20th. Mr. Sidney Perham was chosen president. The treasurer and the trustees reported that the Murray centenary fund now amounted to \$120,691.10; the John G. Gunn ministerial relief fund to \$8,000; and the Ballou centenary fund to \$100 and compound interest from September 30, 1870, to September 30, 1875, or \$140.24. Appropriations had been made from the income of the Gunn fund of \$375, and a balance remained on account of income of \$645. It was advised that as the Ballou fund existed solely in the form of a promissory note, and the founder had, since giving the note, met with business reverses, which had prevented the payment of any part of the obligation, no further mention of it need be made by the trustees and treasurer. The general receipts of the treasurer for the year had been \$38,693.52, and his expenditures \$25,674.32. The indebtedness of the convention on the 1st day of October was \$29,500. The receipts from the annual collections in the parishes had been \$4,106.24, and the receipts from the missionary-boxes had been \$3,119.22. It was

stated that, during the six years in which they had been in use, these boxes had produced \$28,215.47. Fifty-six scholarships had been in force during the year, and the sum of \$8,160 had been paid on account of them. In accord with the wish, several times expressed by previous General Conventions, the Board of Trustees had undertaken to secure the foundation of a memorial church in the city of Washington, D. C. They had succeeded in obtaining subscriptions to the amount of only a little more than \$6,000, and therefore reported that they had been forced to the conclusion that neither the times nor the disposition of the Universalist people were favorable to the further prosecution of the canvass. Report was made of the prosecution of mission-work at Lawrence, Topeka, and Delphos, Kan.; Lincoln, Neb.; Black River Falls, Wis.; Des Moines and Iowa City, Iowa; New Orleans, La.; Albany, N. Y.; and Chesapeake City, Md. Mass meetings had been held in six of the Western States during the winter. Nearly all the State Conventions had resolved to hold such meetings. The churches throughout the country were reported to be strongly infused with the spirit of revival.

A meeting of the Universalist Historical Society was held in connection with the meeting of the General Convention. The society had been in existence some thirty years, but was organized anew in 1874. It possessed a library of about 1,500 volumes, which is described as "a wholly unique collection." It was the purpose of the society to make a collection of all the works of every kind that exist or shall appear in regard to the doctrine of universalism. The society desired to procure a valuable library of Greek, Latin, and French works pertaining to the subject, which exists in Paris, and a collection was taken up in aid of that object.

The annual business meeting of the Woman's Centenary Association was held in connection with the meeting of the General Convention. The treasurer reported that her receipts for the year had been \$18,554.33, and her expenditures \$678.72. The amount of \$16,014.65 had been appropriated in special gifts, and there remained a balance on hand of \$1,802. A collection of \$103.75 was taken in aid of a building-fund for a chapel at "Good Luck," N. J., on the site of the church in which John Murray preached his first sermon in America.

UTAH. For details of government, population, etc., see the previous volumes of this work. In the San Pete Valley, ninety miles south of Salt Lake City, are extensive deposits of coal. This is a lignite of superior quality, and probably of cretaceous age. The coke from it, though inferior to that of the Pittsburg coals, can be used in lead-smelting furnaces. Valuable deposits of the precious metals occur in the two mountain-ranges between which the Jordan flows, viz., the Wahsatch on the east, and the Oquirrh on the west. These ranges

are traversed by cañons, usually narrow and precipitous, opening into the Jordan Valley, and affording access to the mining districts. The Utah Southern Railroad, with several narrow-gauge branches, furnishes transportation to the smelting-works in the valley, and to Salt Lake City and Ogden. The principal mining districts are as follows: Parley's Park, Big Cottonwood, Little Cottonwood, and American Fork, in the Wahsatch Range; Bingham, Dry Cañon, Ophir, and Camp Floyd, in the Oquirrh Range; Yintic and West Yintic, in the Yintic Mountains; and South Star, North Star, San Francisco, and Lincoln, in the southwestern part of the Territory. The ores are chiefly argentiferous carbonate of lead and galena, with some copper-ore in the southern districts, and in a few localities ores sufficiently free from lead and other base metals to be successfully reduced by the Washoe process of stamping and pan-amalgamation. The value of gold, silver, and lead produced in Utah since 1868 has been estimated as follows:

YEARS.	Gold.	Silver.	Lead.	Aggreg.
1868-'69.	\$600,000			\$600,000
1870.....	800,000	\$1,000,000		1,800,000
1871.....	231,000	2,079,000	\$500,000	2,809,000
1872.....	100,008	2,845,979	675,477	3,121,464
1873.....	52,426	3,725,775	958,865	4,736,066
1874.....	92,023	3,519,508	1,430,044	5,541,565
1875.....				6,441,688
Total..	\$1,865,527	\$12,909,503	\$3,563,396	\$23,548,566

In 1875 there were also produced \$102,148 worth of copper, \$26,878 worth of iron, and \$400,000 worth (50,000 tons) of coal. The number of acres of land under cultivation in 1875 is reported at 347,750; bushels of wheat raised, 2,775,000; barley, 397,500; oats, 539,000; Indian-corn, 800,000; potatoes, 1,807,000; tons of hay, 175,000; pounds of wool, 1,000,000; value of all agricultural products, \$-236,022; of manufactures, \$2,803,985, nearly half flour. The value of imports into the Territory, chiefly merchandise and manufactured articles, was \$9,150,851; of exports therefrom, mineral and agricultural products, \$6,435,858. The following table gives the mileage of railroad in the Territory:

Lines.	Number of Miles in Operation.
American Fork	10
Bingham Cañon	29
Central & Union Pacific	286
Summit County	6
Utah Central	87
Utah Northern	80
Utah Southern	73
Utah Western	56
Wahsatch & Jordan Valley	10
Total	560

The assessed value of property in 1875 was \$23,289,180, and the Territorial tax \$58,220.95. The amount in the Territorial Treasury on January 1, 1874, was \$35,655.47; receipts during the following two years, \$104,539.23; total, \$140,195.70; disbursements during the same period, \$139,662.46; balance January 1, 1876,

\$532.24. There is a small Territorial debt, but the dues from various counties are sufficient to pay it off and leave a balance in the Treasury.

The school statistics for 1875 are as follows: Whole number of school-districts, 236; number reporting, 163; number of schools, 296; teachers, 258; children of school age (four to sixteen), 35,696; increase over 1874, 2,399; pupils enrolled in public schools, 19,278, or 54 per cent.; in private schools, 3,542, or 10 per cent.; total enrollment, 22,820, or 64 per cent.; average attendance in public schools, 13,462; in private schools, 2,487; total average attendance, 15,899; amount paid teachers in public schools, \$95,532.70; in private schools, \$50,-

345; total salaries of teachers, \$145,877.70; amount appropriated by the Territory, \$15,000; raised by local taxation, \$20,267.28; tuition fees, \$95,532.70; total amount raised, \$180,799.98; expended, in addition to this, for building purposes, \$49,568.87; superintendents' salaries, \$3,450; tuition fees in private schools paid out in salaries, \$50,845; total expenditure for school purposes, \$234,163.85; value of public-school property, \$438,665; private-school property, \$72,850; total value of all school property, \$511,515. No appropriation of either money or lands has ever been made by the General Government for the benefit of the schools of Utah Territory.

V

VERMONT. The extra session of the Vermont Legislature, called for the purpose of taking such action as was made necessary by the destruction of the Reform School at Waterbury by fire, on the 12th of December, 1874, continued only three days, January 13th, 14th, and 15th. An act was passed providing for a new Reform School at Vergennes, and the purchase for the purpose of the Champlain Arsenal property, for a sum not exceeding \$11,000, and such additional land as might be required, at a cost of not more than \$8,000. The amount appropriated for the purchase, and the construction and fitting up of new buildings, was \$30,000, and the trustees were authorized to sell the property at Waterbury. A separate act made the proceeds of this sale available for the benefit of the new institution at Vergennes, and provided for the transfer of the pupils thither as soon as practicable after the buildings had been completed. Another act provided for the admission of girls to the Reform School, "upon the same terms and for the same offenses that boys are now admitted," and required the trustees to "arrange buildings for the complete separation of the sexes, except for educational and religious instruction, and such recreation as may be allowed by the trustees and superintendent at their discretion." For this latter purpose the sum of \$5,000 was appropriated. Another act provided that no boy under ten years of age should be sentenced to the Reform School for any offense punishable by fine only, except for non-payment of the fine. Yet another gives the Judges of the Supreme Court jurisdiction over the boys in the Reform School to examine into any case brought before them on petition, and discharge the offender or remand him to custody, "or make such order or orders in the case as to such judge shall seem just and reasonable." The only act passed not relating to the Reform School was one appropriating \$12,500 for enlarging and improving the State-prison. The Arsenal-grounds at Vergennes consist of 28 acres, and the buildings, which

cost the United States \$136,000, had been recently sold for \$10,000. The additional ground which it was proposed to purchase for the Reform School consisted of an adjoining farm of 107 acres.

The fiscal year in this State begins with August 1st. On that date in 1874 the Treasurer had on hand a balance from the previous year of \$367,883.29, and the receipts of the year following amounted to \$462,723.64. The expenditures of the year were \$678,162.45, leaving a balance on hand, August 1, 1875, of \$152,444.48. The liabilities of the State consist of \$167,500 of bonds due in 1876 and 1878, \$135,500 due to the Agricultural College Fund, and floating debts to the amount of \$25,584.26; total, \$328,584.26. Against this, it had, on the 1st of August, resources, in cash and taxes due, of \$324,940.29, leaving the excess of liabilities over resources at \$3,643.97. The yearly income from school lands, in the various towns of the State, amounts in the aggregate to \$15,122.29, which is devoted to the support of common schools in the several towns.

The line of the Green Mountain Railroad has been surveyed from Rochester to Middlesex, a distance of 36½ miles. From Rochester to Granville Summit, 12½ miles, there is a rise of 573 feet, and from Granville Summit to Middlesex, 24½ miles, there is a descent of 859 feet.

The town of Montpelier was visited by two destructive fires in March and April, the most severe occurring on the 30th of the latter month. Nearly one-half of the business portion of the town was destroyed, and the total loss was over \$200,000.

A State Convention of the Woman's Temperance Union was held at Rutland on the 28th of September. A plan of organization for unions throughout the State was adopted, and the general purposes were set forth in the following resolutions:

Resolved, That we, the women of Vermont, recognize, in the general uprising of women all over our country against the liquor-traffic, the desperation of

broken-hearted wives and mothers, driven to despair by all that makes life dear; we recognize in their prayer a cry to the all-merciful Father for relief from a burden greater than can be borne, a cry to which our hearts respond in the deepest sympathy; we recognize in every effort of women for the promotion of temperance a work of love, and realize the necessity for renewed effort.

Resolved, That we, as wives,*sisters, mothers, daughters, pledge ourselves anew—co-laborers as co-sufferers—to bring to our work all the strength of our great love, with all the courage, perseverance, of a mother defending her young. Our courage shall equal our great necessity; our perseverance shall be measured only by our love; fully believing, if we use all the means the good God has given us to remove the temptation, which is the open gate to all crime, that our prayers will be answered, and our dear ones will not be led into temptation too great for them, and we shall be delivered from evil, and thus shall we cast up the highway by which his reign and kingdom shall come to us.

Resolved, That all reasons urged in favor of a license law are equally applicable to law referring to every vice and crime.

Resolved, That prohibition is the only principle consistent with Christian law; it is the "thou shalt not" of every one of the ten commandments to the liquor-seller and his victim; its perfect enforcement is the fulfilling of the law of love, not only to women and children, but to every member of the community.

Resolved, That we, in behalf of the women of Vermont, present our sincere thanks to the good and true men who have fought and are still fighting the battle of prohibition, and to those who have in any way done service against our common foe.

Resolved, That we reiterate our protest against the election of intemperate men to seats in our legislative halls or to political offices; we ask, for ourselves and for our children, and in the name of justice and humanity, that our legislative halls be not desecrated and our State disgraced by drunken law-makers.

Resolved, That we deem the poisonous wine commonly used at the communion service a means of temptation, therefore an unfit emblem of the Saviour's precious blood, and would urge every temperance union to labor to secure the use of unfermented wine at this service in all the churches in our State.

Resolved, That we most heartily approve the position taken by the faculties of our colleges on the subject of boat-racing; we recognize the measure as a conservator of morals.

A meeting of the State Board of Agriculture was held at Ludlow on the 1st and 2d of December, at which papers were read and discussions carried on upon topics of interest to farmers. At the close of the meeting the following resolutions were adopted:

Whereas, The Legislature of Vermont has, in its wisdom, seen fit to create a Board of Agriculture for the benefit of the farming community, and as said board has held a very interesting meeting in this place; therefore—

Resolved, That we earnestly recommend the board to the farmers in the sections where meetings may be held, knowing that they will reap great benefits in attending them.

Resolved, That we cordially invite the board to hold a meeting here in December of 1876.

The State Grange of the Patrons of Husbandry held its annual session at Burlington on the 14th and 15th of December. Among the resolutions adopted were the following:

Whereas, The cost of transporting the products of

our country to market is, in many instances, so onerous upon the producer that he receives nothing beyond the cost of production, and thus the industries of the country become paralyzed; and—

Whereas, The superiority of water to rail transportation is universally admitted; and—

Whereas, By the enlargement of the Welland Canal now in progress, only the connection of the waters of the St. Lawrence (the grand river of the North) with Lake Champlain is requisite to enable New England and the West to interchange their commodities: therefore—

Resolved, That in our opinion the speedy construction of the Caughnawaga Ship-Canal is of vital importance to, and imperatively demanded by, the welfare of the people, both East and West, and we earnestly urge our brethren throughout the whole country to assist, by all means in their power, in the performance of so grand and beneficent an undertaking.

Resolved, That we approve of the design of the National Grange to make a museum of the products of each State, and we hereby instruct the Executive Committee of the Vermont State Grange to make such collection of the products and minerals of Vermont as will show, in a creditable manner, samples of our mineral wealth, our woods for various purposes, wools, grasses, and grains; and that no money be used from the State Grange treasury in making the collection, but the expense of sending the samples may be paid from the treasury of the State Grange, to the amount of twenty-five dollars.

Resolved, That each subordinate grange in the State of Vermont set apart one day in May for setting out trees and flowers, thus adorning and beautifying our home.

What has been accomplished by the Grange was thus stated in the annual address:

It has established agents for the sale of products and for the purchase of goods, so that there is no one commission between producer and consumer. It has inaugurated a system of economy in all business matters which is gradually coming on to a cash basis. It has created a spirit of inquiry among farmers, so that they endeavor to ascertain the amount of surplus products they have to sell, and compare them with the probable demand. It has brought farmers nearer to each other socially and for business purposes. It has opened the eyes of the public to the fact that States through their Legislatures have the right to regulate by statute the rates of transportation and fares over railroads and canals; that railroads are public highways, whether owned by the State, by corporations, or by private individuals. It has inaugurated a reform which will take years to complete, but the revolution has commenced, and millions have been saved to the people. It has set the great mass of agriculturists to thinking, and in some sections their thoughts have crystallized into great and beneficial results.

A case was decided at the fall term of the United States District Court at Rutland, which resulted in awarding damages to the amount of \$15,000 for false imprisonment. The plaintiff, who had obtained money as a broker for obtaining certain substitutes for men drafted into the army in 1864, which substitutes had immediately deserted and escaped to Canada, was arrested by a provost-marshal under a military warrant, and kept in prison without trial several months, and finally turned over to the civil authorities by orders from Washington, when no indictment was found against him. The court decided that the arrest and retention of the plaintiff were altogether illegal. There was no martial law in the State at the

time, and he was not subject to military law, not belonging to the army. He was subject only to the laws of the State, which were not appealed to, and was unlawfully deprived of his liberty.

A decision was rendered in the Supreme Court of the State, early in 1876, regarding the right of school committees to exclude children from the schools for violation of the rules. On the 4th of June, Corpus-Christi day, 150 children in Brattleboro had staid away from school at the desire of their parents, to attend church. The teachers and committee had refused permission for the purpose, and the latter would not allow the children to return, except on a promise that they would not absent themselves in a similar manner or for a similar purpose again. To this the parents would not assent, and a suit was brought against the committee to compel them to admit the children to the schools. The decision in the Windham County Court, sustaining the committee, was confirmed by the Supreme Court. The points regarded as settled by this decision are: 1. That the Catholics have no more right than other denominations to interfere with the regulations of schools on account of religious customs. 2. That no constitutional right is violated by enforcing the rule relating to absentees. 3. That this rule does not interfere in any way with the legal right to worship God according to the dictates of conscience. 4. That the decisions of teachers and school committees are final within the limits of the law.

VINCKE, GEORG ERNST FRIEDRICH, Freiherr von, a German statesman, born May 15, 1811; died June 3, 1875. He studied law, and up to 1848 held various offices in the Prussian courts. In the Westphalian Diet of 1843-'45, and in the United Prussian Diet of 1847, he gained considerable celebrity as a speaker. In 1848 he was elected to the German National Assembly, where he became one of the most prominent leaders of the Constitutional party, and in 1849, in the Prussian Second Chamber, he opposed the policy of the ministry as energetically as the Democratic Left. When the Chamber, which had been dissolved in April, 1849, was called together again in 1849, he was reelected; he declined to serve, declaring the new electoral law unconstitutional, but was a member of the "Volkshaus" of the Union Parliament in Erfurt, in 1850. From 1850-'55 he was again a member of the Second Chamber, where he continued to oppose the reactionary tendencies of the ministry. From 1855 to 1858 he declined a reelection, on account of private business, but from 1858 to 1867 he was reelected at every election. He was also a member of the first and second Reichstag of the North German Confederation.

VIRGINIA. The Legislature of this State closed its session on the 31st of March, when it adjourned to the first Wednesday of December next ensuing.

A very large number of acts and joint reso-

lutions were passed of a general as well as local or private character, most of the latter class relating to internal improvements of all sorts, the protection of useful animals on land or water, and granting or amending charters of cities, towns, corporate bodies and associations of various professions, literary, beneficent, industrial, manufacturing, and others. As to the acts of a general character, numerous provisions of the existing statutes have been repealed or modified, and several amendments to the State organic law proposed.

The colored voters of Virginia met in convention at Richmond on the 20th of August, 1875, for the purpose of deliberating on the best means to secure protection, and redress of the wrongs which they complain to be their portion at the hands not only of the white citizens and local government of Virginia, but also at the hands of the leaders of the Republican party within the State and in the Federal capital. The convention was numerously attended by delegates from all parts of the State, and continued in session two days. Its proceedings, it is stated, were characterized by great excitement and some confusion. A number of speakers addressed the meeting.

The grievances of the colored people are set forth in the following resolutions:

Believing in a republican form of government such as emanated from the reversionary right of all power, that it should not or would not be deemed improper or impertinent for us, who represent nine-tenths of the Republican voters of Virginia, to state candidly and earnestly some of our grievances, which we have borne patiently as a party and a class, and to call the attention of the Administration thereto and ask, respectfully but firmly, that they be noticed, and, as far as is in the power of the Administration, that they be rectified, and the party relieved of unnecessary burdens, harmonized, inspired anew and prepared to run in the next presidential race and gloriously and triumphantly win: and whereas we deem it essential to this end that the party in the State should control its own internal economy without the interference in our local politics of political stock-brokers and speculators to dictate Federal appointments over the head of our own State Committee, and to keep them there against our respectful protests and petitions: therefore—

Resolved, That while we reiterate unflinching fidelity to the principles of the Republican party and, per consequence, fealty to the Administration, we again respectfully ask and think it right for the Administration to stretch out its hand and save us and the organization as it exists, and which we acknowledge, by recognizing such organization as the supreme power of the party, and listen to their behests rather than to those interested individuals, whether they live here, in Massachusetts, or any other portion of the land.

Resolved, That we look with the utmost anxiety and alarm at the condition of disorganization and disaffection existing in the party in the State, caused by the appointment of a number of Federal office-holders all over the State, many instances of which occur to us who are pronounced Democrats, who would blush Judas-like were Republican sentiments imputed to them, and of others who are an incubus to the party and are preparing the way for a precipitate desertion into the Democratic lines in case the late lamented Confederacy shall succeed in establishing its power and supremacy again in 1876.

The proposed amendment to the constitution which makes petty larceny a cause for disfranchisement, and which is now to be voted upon by the people for adoption or rejection, was made a subject of complaint in the convention, and denounced as unjust. A resolution condemning the amendment was adopted. The colored people seem to consider this amendment as specially intended against themselves; and it is stated that, in order to show its unfairness and partiality, a member of the convention remarked, "It is very hard that a poor negro cannot take a few chickens without losing his right to vote."

The Colored Educational Convention assembled at Richmond on August 24th. It had a good attendance, and was addressed by colored persons of note and of great influence among their people. Defects in the State school system as well as in its practical execution in regard to the colored children were pointed out.

The formation of a State society in the interest of the education of negro youths, the society to be composed of colored members, and styled "The Virginia Educational and Historical Association," was effected by this convention. A report submitted by the appropriate committee, embodying a constitution, and regulations for the government of the society, was also adopted. The object of this society is to promote the cause of education, and aid in the higher instruction of such meritorious youths as give promise of usefulness to the State and country; to encourage the growth and development of mechanical and scientific ideas by the dissemination of useful knowledge, and by the collection of statistics relative to the material interests of the colored race in Virginia, and incite it to higher and greater achievements.

The election on November 2, 1875, resulted favorably to the Conservatives; the members elected out of their party to either House of the General Assembly being in a very large majority.

The new Legislature assembled at Richmond on the 1st of December, for the regular session of 1875-'76. In the House of Delegates, Marshall Hanger was elected Speaker by a strictly party vote.

The general condition of the State, with reference to her various interests, appears to be satisfactory. The Governor officially states that "by slow and laborious processes, but with steady improvement, Virginia is emerging from the ruin wrought by war;" that "her people are acquiring new habits of energy, providence, and thrift;" and that, "equally in all the grand divisions of the State, greater industry, closer economy, and better production, are visible." The finances of the State at the end of the last fiscal year, September 30, 1875, stood as follows:

The principal of the public debt, according to the funding act which the creditors of the State have agreed to, was \$29,514,428.88; showing a reduction of \$442,584.37 from the

same date in 1874. This reduction is the result of the operations of the sinking-fund during the year. The bonds constituting the said debt are classified as follows:

Bonds with tax-receivable coupons attached..	\$19,581,500 00
Registered bonds convertible into tax-receivable coupon bonds.....	1,335,515 50
Other bonds not so convertible.....	9,277,410 35
Total principal of the debt.....	\$29,514,426 85
Arrears of unpaid interest on bonds of all classes.....	2,751,000 55
Total State debt, including principal and interest, on September 30, 1875.....	\$32,265,427 40

The whole debt proper as assumed by the funding act was \$30,478,741.49; one-half of this sum, or one-third of the entire original debt of Virginia, having been assigned to West Virginia, on which negotiations for final agreement have long been, and still are, pending between the two States. The above-mentioned amount of two-thirds assumed by Virginia as her own debt has increased since the funding act by the sum of \$1,816,715.42, which represents the accumulation of interest arrears. The average annual increase from this cause during the past four years has been \$454,178.85.

Respecting the locality where the public debt of Virginia is held, it is estimated that about \$8,000,000 are owned by citizens and corporations of Virginia; \$13,000,000 in other States; and \$8,514,426.88 in foreign countries.

It is stated that the English holders of Virginia bonds have sent an agent to treat in their name with the present General Assembly, proposing to readjust that portion of the debt which is held by them, on the basis that the bonds should bear an interest of three per cent. for the first year after the agreement, of four for the second year, and of five permanently afterward: this adjustment to embrace only the English holders so agreeing, but to have no reference to bonds held by others.

Governor Kemper refers in his message to a plan of recapitalizing the public debt by reducing the rate of its interest, and by exchanging the present bonds for new ones. Such a recapitalization, if effected, he regards as probably beneficial to both the State and her creditors, as the new bonds could not fail to command a better price in the market. At the same time he avers that there is no positive ground on which to rest any action tending to the realization of such a plan, and that it is not for the State to assume the character of a petitioner toward her creditors. He leaves to the General Assembly "to determine whether authority should be given to transact such exchange of bonds on the application of creditors."

The receipts of the State from all sources during the year ending September 30, 1875, amounted to \$2,517,790.05; besides which an additional sum of \$180,000 was raised from temporary loans.

The total expenditures, ordinary and extraordinary, not including the amounts paid to the free-school fund and for interest on public debt, amounted in the same year to \$1,018,628.54.

The amount of the taxable property in the State, as assessed for 1875, had not been fully returned in December of that year, but was known to be considerably less than the amount assessed in 1874, when it was \$332,428,256 in the aggregate, composed of \$253,486,058 of real estate, and \$78,942,198 of personal property. It was estimated on unquestionable data that, even retaining for 1875 the same value which was assessed for 1874, the net amount of taxes levied on it at the same rate, of fifty cents for every hundred dollars, would be \$1,496,943.93, while the State wants much more than this sum to cover her expenditures.

The public instruction in the State appears to have been of late years steadily improving, and the number of children attending school has vastly increased. The following summary statements of the public and private school operations in 1875 are taken from official documents:

Number between five and twenty-one years of age: white, 280,149; colored, 202,640: total, 482,789. Number of public schools: white, 3,121; colored, 1,064: total, 4,185. Average number of months taught: in cities, 9.89; in country, 5.42: total, 5.59. Number of pupils enrolled: white, 129,545; colored, 54,941: total, 184,486. Pupils in average attendance: white, 74,056; colored, 29,871: total, 103,927. Percentage of school population enrolled: white, 46.3; colored, 27.1. Average cost of tuition per month per pupil enrolled, 70 cents; whole monthly cost per pupil enrolled, 89 cents. Number of teachers: white males, 2,360; white females, 1,363; total white, 3,723; colored males, 351; colored females, 188: total colored, 539: total white and colored, 4,262.

Number of pupils between five and twenty-one in private, primary, and high schools: white, 19,466; colored, 3,819: total, 23,285. Number of students in colleges, 1,890. No colored colleges. There are 243 students at the Hampton Normal and Agricultural Institute, which is not classified as a college in the documents. Number of teachers in private schools: white males, 454; white females, 775; colored males, 33; colored females, 57: total, 1,319. Whole number of pupils, public and private, 207,771.

The aggregate receipts for the maintenance of schools during the last year amounted to \$1,021,396.68, derived from the following sources: State fund, \$478,759.46; local taxation, \$465,424.09; private donations, \$52,482.13; Peabody fund, \$23,750.

The total school expenditures for all purposes in the same year were: for current expenses, \$934,118.47, of which \$726,800.87 was paid to teachers; for permanent improvement, \$97,278.21, of which \$94,582.40 was paid for real estate, buildings, and furniture.

The Agricultural and Mechanical College, now in the third year of its existence, is also steadily increasing in its usefulness and the number of attending students. These numbered in the first year 120; in the second, 197; in the third, 222.

The charitable and penal institutions of the

State seem to be very satisfactorily managed, and realize the purpose for which they are severally intended.

The number of patients in the Eastern Lunatic Asylum at the beginning of the last fiscal year, October 1, 1874, was 294—males 131, females 163. Admitted during the year, 72—males 39, females 33. Total number of patients under treatment in the year, 366—males 170, females 196. Out of these were discharged, as recovered, 83—males 11, females 22; as improved, 8—males 4, females 4; as stationary, 1 female; died, 19—males 14, females 5. Remaining under treatment on October 1, 1875, 305—males 141, females 164. Average number in the year, 302. Number of pay patients, 13. The whole number of insane persons under treatment at this asylum during the year was larger than in any previous year since its organization. The number of recoveries, in proportion to the number admitted, was much greater than in 1874, and above the average of preceding years.

The aggregate receipts of the asylum for the last year were \$65,932.95, of which \$60,000 had been appropriated by the General Assembly. The disbursements were \$65,094.28.

The gross receipts from farm and garden products amounted for the year to \$6,100.48, of which \$3,126.38 was outlay for labor, implements, and fertilizers; leaving a net return of \$2,974.10.

The arbitration for fixing the boundary-line between Virginia and Maryland, which was progressing satisfactorily and near to its completion, has been suddenly arrested by the death of William A. Graham, a member of the board. In the arrangements now existing between the two States for the said arbitration, a modification is proposed providing that, in case another vacancy occurs in the board from any cause, it may be filled without arresting the work of the arbitration.

For the participation of Virginia in the approaching Centennial Celebration at Philadelphia, a State Board of Centennial Commissioners was appointed, which has requested of the General Assembly a suitable appropriation to enable them to complete their arrangements and execute the work assigned them.

A bill appropriating ten thousand dollars for the just-mentioned purpose was after a time introduced in the Senate, and, not without great opposition, finally passed by a vote of 24 to 10. In the House of Delegates the bill was not allowed to go further than the second reading; and on a motion subsequently made to reconsider the vote by which the House had refused to advance the bill to its third reading, the motion was lost—yeas 56, nays 58.

On the 8th of December the two Houses met in joint convention for the purpose of electing the State officers, when the following were chosen: For Secretary of State, James McDonald; First Auditor, William F. Taylor; Second Auditor, Asa Rogers; State Treas-

urer, R. M. T. Hunter; Superintendent of Public Printing, R. F. Walker; Superintendent of the Penitentiary, George F. Ströther; Register of the Land-Office, S. H. Boykin.

On December 16th both Houses of the Legislature assembled in joint convention to elect a United States Senator for six years from March 4, 1877, in place of John W. Johnston. Mr. Johnston received 127 votes, Mr. Wickham, Republican, 24; whereupon Mr. Johnston was declared elected.

On the 22d of December, 1875, at twenty minutes before midnight, the city of Richmond was visited by a violent earthquake. The shock was felt in other parts of the State, but more severely round about Richmond, and most in the city itself. Its inhabitants, the largest number of whom had then retired to rest, left their houses in alarm, and a great proportion of them remained out in the streets all night. The shock continued from thirty to fifty seconds, and was accompanied by a deep rumbling within the earth. It was stated that the atmosphere on the 22d was in a peculiar condition, the mercury in the thermometer, which in the previous days had marked 18° above

the freezing-point, having risen to 70° on the 22d.

A noteworthy event of the year 1875, for the State of Virginia, seems to have been the erection of the statue of General Thomas J. Jackson, surnamed "Stonewall Jackson," on the Capitol Square at Richmond. The unveiling took place on the 26th of October, with appropriate and imposing ceremonies, performed amid extraordinary pomp and solemnity, in the presence of the civil authorities of the State, all its military and civic organizations, and a vast multitude of spectators.

The monumental structure upon which the statue rests is north of the Capitol building; is of James River granite; and is composed of a base course of three members, sub-plinth, plinth, and cornice capital.

The composition and appearance of the statue are briefly described as follows:

The statue is seven feet in height, and represents the general standing, clothed in the uniform worn by him at the time of his death. His left hand is resting on his sword, which is planted on a portion of the broken fortification. His head is turned to the right side, the hand of which, holding a glove, rests on the hip.

W

WADAY,* a state of Central Africa, was explored for the first time by Dr. Nachtigal, a German traveler, during the year 1878. Dr. Nachtigal gives it an area of 64,000 English square miles, and a population of about 2,500,000. Dr. Barth, in 1855, estimated the area at 4,780 German square miles, and the population at 5,000,000. Two Europeans had entered Waday before Dr. Nachtigal—Dr. Vogel and Moritz von Beurmann, both of whom were murdered by the natives, Vogel in 1856 and Beurmann in 1868. Gerhard Rohlfs, during his last journey to Bornoo, attempted to enter Waday, but was deterred by the great danger attending such an enterprise.

The area, as given above, is that of Waday proper. The King, however, rules also over a large number of tributary and vassal states. These are the Khittiri territory, and parts of Kanem and Bahar-el-Gazal, in the west; a part of Borku, and the countries of the Wanya and the Bideyat, in the north; and in the south Runga and Kuti. Adding these countries to the kingdom, the area of the latter is about doubled, while from 1,000,000 to 2,000,000 inhabitants are added to the population. In an account given at a meeting of the Berlin Geographical Society, Nachtigal described the country as follows: "The kingdom is divided into the following provinces—the northern province, Dar Turtalu; the southern province, Dar Turlulu; the eastern province, Dar Toluk, containing only the tribes

of Massalet-el-Hausch and Sungor; the western province, Dar Luluk, containing all the western tribes from Kooka to Baghirmi; the Dar Kodro, the mountainous districts in the southwest; the Dar-el-Bahor; and the Dar Dshungertang, in the south. The religion of the people is Mohammedan, and their customs resemble those of most uncivilized Mohammedan countries. The King is looked upon as a sort of divinity; his mother must be of the dominant race; he must be without any physical or mental defect, always eat alone, and never drink beer. His word is sacred, and he must never break it, even if the most disastrous consequences were to ensue from his not doing so."

WALDECK, JEAN FRÉDÉRIC DE, a French traveler and artist, born March 16, 1766; died May 2, 1875, having attained the extreme old age of 109 years. In 1793 he was present at the siege of Toulon, in 1794 joined the army in Italy as a volunteer, and in 1798 followed the expedition into Egypt, but as an observer, not as a soldier. After the failure of Napoleon's Egyptian plans, De Waldeck determined to travel in Africa, and accordingly set out on an expedition having for its object the traversing Egypt from north to south. He left Assouas with four companions, but fatigue and sickness attacked the adventurers, four of them died, and De Waldeck, left alone, was only able to reach the Portuguese settlements on the coast after four months of danger and privation. After having revisited France, he reëmbarked for the Mauritius, then made a turn in the Indian Ocean. In 1819 he visited Chili, and later

* For an account of Dr. Nachtigal's journey, see ANNUAL CYCLOPEDIA for 1874, page 849.

made an archaeological expedition in Guatemala, and on his return established himself in London. Here he occupied himself with making the lithographic drawings which were to illustrate a work upon the ruins of Palanqué and Chiapas. But believing, from his own observations, that the designs he had been employed to put upon stone were incorrect, he determined to visit these ruins for himself, and, taking a position as mining engineer, left England for the silver-mines of Italpuxahua. He remained in this position only a short time, and set out to visit the Toltec and Aztec ruins. Encouraged at first by the Government, he passed three industrious years in studying in detail the ruins at Palanqué, in making maps of the region, and in collecting specimens of the flora and fauna. Falling out with Santa Anna, he lost the greater part of his drawings and his note-books, and was obliged to give up his researches, and returned to Europe after twelve years' absence in the New World. After his return he busied himself with archaeological studies, and sold to the French Government his drawings made in Palanqué, the publication of which was begun in 1863, and for which he himself, after his 100th year, made the lithographs. He was made a member of the council of the Society of American Archaeology, and in 1837 published "Voyage archéologique et pittoresque dans le Yucatan."

WALKER, AMASA, LL. D., died at North Brookfield, Mass., October 29th. He was born at Woodstock, Conn., May 4, 1799, and was educated in the common school in North Brookfield. Between the years 1825 and 1840 he was engaged in mercantile pursuits in Boston. Having for many years been an earnest student of political economy, in 1842 he accepted a professorship of that science at Oberlin, where he continued for about seven years. He then returned to Massachusetts, and engaged in politics, leaving the Democratic party and joining that of Free Soil. He was in 1848 elected member of the Massachusetts House of Representatives, and in 1849 became State Senator. In 1851 he was chosen Secretary of State by the coalition then formed in the Massachusetts Legislature. Among the early Abolitionists he was distinguished for his generosity, acumen, sagacity, and common-sense. Prof. Walker was a member of the Massachusetts Constitutional Convention in 1853, and was elected to Congress in 1862. In 1861 he became a lecturer on political economy at Amherst College. In 1843 he went to Europe as a delegate of the first International Peace Convention, and again in a like capacity in 1849. He was the author "The Science of Wealth," of which five editions have been published. He was also a frequent contributor to the periodical press on finance and other parts of political economy. He was a clear and forcible advocate of free trade.

WANZER SEWING-MACHINE. R. M. Wanzer, of Hamilton, Canada, has won a

place among the most deserving improvers of the sewing-machine, and has also proved himself one of the most energetic manufacturers and exporters of that invaluable instrument, creating depots and opening up markets in Europe and the East, which other makers have scarcely been able to reach. The results of Mr. Wanzer's inventive studies, known in the trade under the names of the "Wanzer" and the "Little Wanzer" sewing-machines of various classes, are an improvement on the Hunt-Howe (shuttle and lock-stitch) model, with novel adaptations for the prevention of the breakage of the needle or thread, and of the failure or unevenness of the stitches. The shuttle and needle are made to complete their motions at the same instant. An improved thread-holder feeds out the thread at a firm and equal tension, releasing it at the instant the needle pierces the fabric. As there is no strain on the eye of the needle, it cannot be deflected and broken, nor go to the wrong side of the thread. The inventor claims for his instrument that it is capable of a greater range of work, and that it is more durable, of simpler construction, and less likely to break, than any other. A principal distinction of the Wanzer machines is their comparative cheapness. Various prize-medals and honorary titles, awarded to Mr. Wanzer in different countries, attest the real merits of his manufacture. The extensive factory of Wanzer & Co., in Hamilton, Province of Ontario, Canada, is capable of producing as many as fifteen hundred machines a week, and this enterprising house is not only competing with the other manufacturers in the older markets, but is trying to introduce its product into the countries of Eastern Europe and Asia, in which sewing-machines are as yet a rarity.

WASHINGTON TERRITORY. The population in 1853 was 3,965; in 1860, 11,594; in 1870, 23,855, including 207 colored persons, 234 Chinese, and 1,819 non-tribal Indians; in 1875, estimated by the Governor at 36,000. There are seven Indian agencies in the Territory for the supervision of the tribal Indians, viz., the Colville in the northwest, Yakima in the south, Neah Bay and Quinalt in the coast, and Nisqually, Skokomish, and Tulalip on Puget Sound. The size of reservations and number of Indians belonging to each agency, according to the report of the United States Commissioner of Indian Affairs for 1875, are as follows:

AGENCIES.	Reservations, Acres.	Indians.
Colville.....	2,800,000	8,117
Neah Bay.....	28,040	558
Nisqually.....	82,200	1,329
Quinalt.....	224,000	574
Skokomish.....	4,987	850
Tulalip.....	49,281	3,350
Yakima.....	800,000	8,650
Total.....	3,933,508	18,329

These Indians are divided into about forty small tribes. The production of lumber is the most important industry in the Territory. The entire product in 1870 consisted of 128,743,000 feet of lumber, 17,000,000 laths, and 10,450,000 shingles. The quantity of all kinds of lumber produced in 1875 is estimated at 250,000,000 feet, valued at about \$3,000,000. The Territory constitutes one customs district, that of Puget Sound, of which Port Townsend is the port of entry. The value of imports from foreign countries for the year ending July 31, 1875, was \$49,125; of exports to foreign countries, \$759,230, including 38,907,000 feet of assorted lumber, valued at \$352,510, and live-stock, grain, provisions, etc., valued at \$406,720. The number of entrances was 315, with an aggregate tonnage of 117,062; clearances, 348, tonnage 184,506. The entrances in the coastwise trade were 182, tonnage 75,215; clearances, 51, tonnage 22,123. There were 18 vessels built, of an aggregate tonnage of 8,986; number of vessels owned in the district, 108, tonnage 26,548. Including domestic commerce, which is carried on chiefly with San Francisco, the total value of exports for the year is estimated at \$5,000,000. The fisheries are of considerable importance; their value, according to the census of 1870, was \$289,746. The product consisted of 1,000 quintals of cod, 70,000 bushels of oysters, 2,143 barrels of salmon, and 1,810,000 pounds of canned salmon. The salmon-fishery, the most valuable, is carried on chiefly in the Columbia River, near its mouth. Oysters are shipped from Shoalwater Bay to Portland, Oregon, and San Francisco. There are two railroads in the Territory, the Pacific division of the Northern Pacific and the Walla Walla and Columbia (narrow gauge). The former extends from Kalama, on the Columbia River, to Tacoma, on Puget Sound, one hundred and five miles, and is designed to form part of the transcontinental line now completed west to the Missouri River in Dakota. The latter extends from Walla Walla to Wallula, on the Columbia River, thirty-two miles.

The valuation of property in 1860 and 1870, according to the Federal census, was as follows:

YEARS.	ASSESSED VALUE.			True Value of Real and Personal Estate.
	Real Estate.	Personal Estate.	Total.	
1860.....	\$1,876,068	\$2,518,672	\$4,394,735	\$5,601,466
1870....	5,146,776	5,496,087	10,642,863	13,562,164

The total taxation in 1870 was \$163,992, of which \$33,743 was Territorial, \$119,291 county, and \$10,955 town, city, etc.; public debt, \$88,827, of which \$71,196 was county, and \$17,631 town, city, etc. The assessed value of property in 1875 was \$14,569,156; Territorial tax levied, \$58,295.33. The balance in the treasury on September 30, 1873, was \$3,805.25; receipts during the two following years, \$87,-

936.06; disbursements, \$79,398.69; balance October 1, 1875, \$12,342.71. The Territorial debt on that date amounted to \$20,599.99. There is a Territorial Insane Asylum at Steilacoom. A penitentiary has been erected by the United States on McNeil's Island, in Puget Sound, near Steilacoom. The public schools are supported by taxation, fines under criminal statutes, and private contributions. In 1875 there were 305 districts; schools taught, 238; persons of school age (four to twenty-one), 11,291; number attending school, 7,546; teachers, 240; amount paid teachers, \$48,356; school revenue, \$51,556. The Territorial University at Seattle has a preparatory department in operation. Holy Angels' College (Roman Catholic) is at Vancouver. Three counties (Columbia, San Juan, and Whitman) have been formed since 1870, making twenty-four in all.

WEST VIRGINIA. The provisions of the law passed on February 20, 1876, enacting the temporary removal of the seat of government from Charleston to Wheeling, were carried into effect on May 21st. The Governor and the other executive officers removed to the city of Wheeling; but the archives and other movable property of the State could not be taken out of Charleston till the latter part of September ensuing; the delay was owing to the obstruction caused by the residents of the Third District of West Virginia, chiefly of the city of Charleston. Soon after the adjournment of the Legislature, members of the Charleston bar presented to Governor Jacob a protest against the execution of the said law as unconstitutional; and on April 30th a process by writ of injunction, granted by the Judge of the Ninth Circuit Court, was served on the Governor and the other officers of the Executive Department, and on the Clerks of both Houses of the Legislature, restraining them from removing any papers, books, or other movable property of the Legislative and Executive Departments, from Charleston to Wheeling, or elsewhere, "until the further order of the Circuit Court of Kanawha County, or of a judge in vacation."

The question of the alleged unconstitutionality of the act was argued in the first instance before the Circuit Court of Kanawha County, which decided it on May 18th, by affirming the act constitutional, and dissolving the injunction; asserting also its own jurisdiction, which the Governor had refused to recognize, and granting to the plaintiffs a suspending order that they might apply for an appeal and *superseas*. In the second instance the case was heard by the Supreme Court of Appeals in September, when all the judges, by a unanimous decision, affirmed the controverted act to be constitutional, and also denied the jurisdiction of the Circuit Court of Kanawha County in the matter.

Before the close of September the archives and all other movable property appertaining to the Executive and Legislative Departments

were transferred from Charleston to Wheeling, and located in suitable buildings.

After a recess of several months' duration, the members of the legislative body met for the first time at Wheeling on the 10th of November, 1875, when, in accordance with the terms of a joint resolution adopted on the 24th of the previous February, each of the two Houses was called to order by its presiding officer, and the session reopened.

The financial condition of the State at the close of the fiscal year ending September 30, 1875, was as follows: Balance in the Treasury on September 30, 1874, \$282,364.12; receipts from all sources during the year, \$547,426.26; making a total of available money on hand for the year of \$829,790.38.

The expenditures for all purposes during the same year amounted to \$576,171.97; leaving a balance in the Treasury on October 1, 1875, of \$253,618.41.

The amount of this balance is made up of the following distinct funds: State fund, \$14,458.68; school-fund, \$31,973.34; and general school-fund, \$207,188.39.

The lands and buildings of West Virginia have been assessed anew by the revaluation commissioners in 1875. From the commissioners' table, exhibiting the increase or decrease in the number of acres for the several counties in detail, it appears that the aggregate number of acres in the State is 24,178,695, or 453,527 acres less than in the former assessment; while the aggregate amount of the revalued lands and buildings in 1875 is set down at \$110,922,030.88, or \$11,233,827.27 more than in 1874, when their total value was reckoned at \$99,688,203.61.

The working of the free-school system in the State seems to continue the same. A bill proposing amendments to the school law was introduced and discussed by the Legislature at the previous session, and was still under consideration.

The State University at Morgantown appears to be in a satisfactory condition, the number of students who attend to the several branches of instruction given in it being about the same as before.

The expenditures of the university during the last year amounted to \$29,316.89; of which nearly \$9,000 were applied to construction and repairs. Its estimated expenses for the present year are set down by the regents at \$39,274.14; and a corresponding appropriation is asked.

The normal schools are in very successful operation.

In the State Hospital for the Insane, on September 30, 1875, there were 349 patients. Their highest number during the year was 357; the lowest, 345. The number of insane persons discharged cured, within the same period, was eighteen.

The average cost of maintaining each patient through the whole year, including all expenses

of salaries, medicines, and clothing, amounted to \$125.18.

The total expenditures of the hospital for the year were \$69,310.53; of which sum \$17,772.04 was for construction, \$4,989.15 for repairs, \$2,919.56 for transportation of patients, and \$43,629.78 for current expenses.

Of the insane persons previously detained in the jails for want of room within the institution, all the whites have been removed to the section of the hospital-building which has lately been completed and furnished for their reception.

There are about a dozen colored insane still remaining in the jails. For their accommodation and treatment, the directors of the hospital urge the erection of a substantial brick building.

The Institution for the Deaf-Mutes and the Blind at Romney has recently been thoroughly reorganized, and is at present in a most satisfactory condition in all its departments. The aggregate number of pupils of both classes in attendance at the time of the last session of the Legislature was 72; of whom 53 were deaf-mutes, and 19 blind. By the beginning of November, 1875, they numbered 80—63 and 17 respectively—and 26 more had been already admitted, though not yet within the institution; making a total of 106. For the reception of these 26 new pupils an addition had lately been made to the building of the asylum, which is now capacious enough to accommodate 120 pupils. Its workshops having become inadequate to its requirements, the Board of Regents desire a suitable appropriation for their erection.

The expenditures of this institution, during the year last past, amounted to \$36,898.38; of which \$9,818.98 were for construction. The outlay on this account for the present year, to finish the new part of the building, and to erect the additional workshops, is set down by the Board of Regents at \$11,000.

Of the various and useful instruction imparted to the inmates of this institution, and of the proficiency which they make in it, a noteworthy specimen was publicly exhibited on December 10, 1875, at Wheeling, whither the principal of the asylum had brought about twenty pupils from the two classes for that purpose. The Legislature was formally invited by the principal to be present at the entertainment. Questions and problems in algebra and arithmetic were satisfactorily solved and answered without the help of written figures. The exercises in Latin and geometry were omitted for want of time. The deaf-mutes, among other things, recited the Lord's Prayer in the sign-language, and wrote on the black-board. The site of any city in Europe was readily found by the blind on embossed maps. One of them, a boy, drew the map of West Virginia on a large slate, and divided it into 54 counties. They entertained the audience also with vocal and instrumental music well

executed; and the members of the orchestra on the occasion were all blind.

The State Penitentiary appears to be under good management and discipline. The number of convicts detained in it, on September 30, 1875, was 105. During the year ending that day, 31 convicts were discharged for expiration of sentence, two pardoned, and two died.

In consequence of the increased value of convicts' labor, the cost to the State for their support is gradually diminishing; and it is estimated that when the penitentiary shall be provided with suitable workshops and machinery, so that all the labor of convicts can be hired to contractors, it will then become self-supporting.

The aggregate expenditures of the penitentiary during the last fiscal year amounted to \$48,426.99. Of this sum \$10,104.98 were expended for the support of the convicts; \$9,864.98 for the payment of their guards; \$20,457.03 for construction; the rest for the salaries of the superintendent, commissary, and clerk.

The improvement of the Kanawha River, for which the Federal Congress has made an appropriation, is progressing satisfactorily; a system of locks and dams having been devised for that purpose, and the work upon some of the locks commenced. From the accomplishment of the intended works on this river much greater benefits are anticipated for West Virginia than from any other internal improvement in the State.

The most noteworthy event of the session, reopened on the 10th of November, 1875, seems to be the action taken by the Legislature for the impeachment of the Treasurer and the Auditor of the State, and the actual commencement of the trials. By a resolution adopted by the House of Delegates at the previous session, a special committee of seven was appointed "to investigate and report the condition of the State's finances;" the principal object of the investigation being to inquire into the acts of the above-mentioned officers, who were alleged, among other things, to have, by favor and improper agreement, deposited the State funds with certain banks in larger amounts than allowed by law, the favored banks paying them money therefor.

The committee attended to the duty assigned them, and made a report on the result of their labor, concluding with affirming the truth of the improper transactions alleged against those two officers, and recommending their impeachment. A resolution to this effect was adopted by the House on the 24th of February, 1875.

On October 20th the committee resumed the work of their investigation at Wheeling, and on the 11th of November, the second day of the reopened session, the chairman submitted to the House a supplemental report, signed by himself and three others among his colleagues, in which, after briefly referring to the previous report, and reaffirming the conclu-

sions and recommendations therein contained, they presented to the House the evidence collected during the investigation made on the subject since the 20th of October.

A minority report, signed by two members of the same committee, was also submitted to the House, setting forth the reasons of their dissent from the majority, and maintaining that, from the oral and written evidence collected during the whole investigation, no case of impeachment against those officers could possibly be entertained before the law of the State, in that the date of the improper acts charged belongs, not to the present, but to a former term of their respective offices; and that their truth is far from being legally proved. They aver, moreover, that, even if the alleged transactions had occurred during the present term, and were legally proved, they could not constitute any sufficient ground for impeachment, because the public funds deposited through those transactions have been entirely safe to the State, as both the principal and the interest accrued on it during the time of such deposits had been punctually paid into her Treasury by the banks concerned; and chiefly because the law of West Virginia does not recognize her Treasurer and Auditor in these operations as acting in the capacity of State officers, but considers and allows them to act only in their individual capacity as private persons. The authors of the minority report seem to insinuate that, if any impropriety or blame can be attached to the acts of those officers in the matter under consideration, it must be attributed to the defect or want of law regulating their action in reference to the custody and safety of the State money, saying "that there ought to be appropriate legislation to prevent any possible speculation with or profiting by the use of the public funds, in any way, directly or indirectly, by any of the State officers, there can be no doubt."

They conclude the report with proposing and recommending the adoption of the following resolutions:

Resolved, That the resolution of this House passed on the 24th day of February, 1875, in so far as the same directs the impeachment of E. A. Bennett, present Auditor of this State, be and the same is hereby rescinded.

Resolved, That the resolution of this House passed on the 24th day of February, 1875, in so far as the same directs the impeachment of John S. Berdick, the present State Treasurer, be and the same is hereby rescinded.

Both reports were ordered to be printed. Upon the proposition to adopt the majority report, and, chiefly upon the motion to indefinitely postpone the articles of impeachment against the Treasurer and the Auditor of the State, there were long and frequently-repeated debates. On November 27th the motion of indefinite postponement was put to the vote by the Speaker, and lost—yeas 28, nays 36.

At the same sitting, the chairman of the Committee on Investigation read the articles

of impeachment against the State Treasurer, twenty-one in number, for action. They were voted upon separately, and adopted. The articles against the State Auditor, numbering eight, were acted upon in the same way on November 29th, and also adopted.

The Board of Managers appointed by the House to prosecute the Treasurer and the Auditor of the State laid the said articles before the Senate on December 2d, and in the name of the House of Delegates, and the people of West Virginia, formally requested that body, as a high court of impeachment, to try those two officers upon the charges preferred against them, for misdemeanor and malfeasance in office.

At the close of the year 1875 these impeachment cases had not been determined.

WHEATSTONE, CHARLES, an English inventor, born at Gloucester in 1802; died October 20, 1875. In early life he was a manufacturer of musical instruments, and made researches in the science of acoustics. He displayed much mechanical ingenuity in the construction of instruments and apparatus. He published, in 1834, an "Account of Experiments to Measure the Velocity of Electricity and the duration of Electric Light." In the same year he became Professor of Philosophy in King's College, London. He invented the stereoscope, which he described in his "Contributions to Physiology of Vision," published in 1838. He was one of the several persons who, in 1837, claimed the honor of the invention of the electric telegraph. Wheatstone and his partner, Cooke, obtained, in 1837, a patent for apparatus which they invented for sending signals by means of electric currents. They were successful in the practical application of their invention, which soon came into extensive use. He afterward invented several improvements, among which is the magneto-alphabetical telegraph. He was vice-president of the Royal Society, and was a corresponding member of the French Institute, as well as of several of the leading academies of Europe. At the Universal Exhibition of Paris, in 1855, he was one of the jurors in the class "Heat, Light, and Electricity," and was created a Knight of the Legion of Honor.

WILKINSON, Sir JOHN GARDINER, F. R. S., a British archaeologist and geographer, born in 1797; died October 29, 1875. After having finished his studies in Harrow and Exeter College, Oxford, he made a trip to Egypt. Here he applied himself with great zeal and energy to the study of the ancient history and the architectural remains of that country. He was knighted in 1839, in reward of his valuable contributions to archaeological literature. He wrote: "Manners and Customs of the Ancient Egyptians, derived from a Comparison of the Painting, Sculpture, and Monuments still existing with the Accounts of the Ancient Authors" (1837-'41); "History of Modern Egypt and Thebes" (1844); "Dalmatia and Montenegro,

with a Journey to Mostar, in Herzegovina, and Remarks on the Slavonic Nations" (1848); "Egyptians in the Time of the Pharaohs" (1857); and "On Color" (1859).

WILLIS, Rev. ROBERT, F. R. S., a British scholar, born in 1800; died in January, 1875. He graduated from Caius College, Cambridge, in 1826, and was chosen Fellow of his college. In 1837 he was appointed Jacksonian Professor of Natural and Experimental Philosophy in Cambridge. He was one of the founders of the Archaeological Society in 1843, and from its annual meetings he prepared the "Architectural Histories" of the principal English cathedrals. He also wrote "Apparatus for the Use of Lecturers in Mechanical Philosophy" (1831), "Remarks on the Architecture of the Middle Ages and of Italy" (1835); "Principles of Mechanism for the Use of Students" (1841), "Architectural History of the Holy Sepulchre," and "Architectural Nomenclature of the Middle Ages."

WILSON, HENRY, was born in Farmington, N. H., February 16, 1812, and died at Washington, D. C., November 22, 1875, aged 63 years. His original name was Jeremiah Jones Colbath or "Colbaith." His father was a hired farm-laborer whose ancestors were from the north of Ireland. At the age of ten Jeremiah was apprenticed to a farmer in his native town. He went to school at intervals about a year during the eleven years of his apprenticeship. At the age of twenty-one he was enabled by an act of the Legislature to bear the name of Henry Wilson. In December, 1838, he walked from Farmington to Natick, Mass., in search of work, and hired himself to a shoemaker until he had learned the trade. Having worked for two years and saved some money, he returned to his native State and studied in the academies of Stafford, Walsborough, and Concord; but, the person to whom he had intrusted his savings having failed, he was in 1838 compelled to return to Natick and resume work as a shoemaker. While here he was active in forming and sustaining a debating society among the young men of the town. In 1835, when attempts were made in some parts of the country violently to put down the discussion of the slavery question, young Wilson entered ardently in the contest as an Abolitionist. In 1838 he made his first visit to Washington. The impressions made on his mind by the slavery he saw in the District of Columbia were given in a speech he delivered many years afterward (1863) in Philadelphia. He first appeared in politics in 1840 as the advocate of the election of General Harrison, the Whig candidate for the presidency. During the next five years he was three times elected a Representative to the Legislature from Natick, and twice a State Senator from Middlesex County. In 1845 he took a leading part in calling a convention in Massachusetts in opposition to the admission of Texas into the Union as a slave State, and was appointed with the

poet Whittier to carry to Washington a long petition from Massachusetts against the measure. In the year 1846 he offered a resolution in the Legislature denouncing slavery, and supported it by an elaborate and comprehensive speech. In 1848 he was a delegate to the Whig National Convention held in Philadelphia and on the rejection of antislavery resolutions he spoke in protest and withdrew. On his return he defended his action to his constituents and soon after bought *The Boston Republican*, and edited it for two years in the interest of the "Free-Soil" party. In 1850 and again in 1851 he was a member of the State Senate, and during both terms was President of the Senate. As chairman of the "Free-Soil" Committee he contrived the coalition which elected Mr. Boutwell Governor in 1851, and in 1852 Messrs. Rantoul and Sumner United States Senators. In 1852 he was made president of the "Free Soil" National Convention assembled at Pittsburgh, chairman of the National Committee, and candidate for Congress. He failed of his election by only ninety-three votes. He was a member of the Massachusetts Constitutional Convention of 1853, in which he attempted to secure the admission of blacks into the militia, and in the same year was defeated as "Free-Soil" candidate for Governor. In 1855 he was elected to succeed Edward Everett in the United States Senate, where he acted with the American or "Know-nothing" party, who had aided in his election. But in the "Know-nothing" Convention held in Philadelphia in 1855 he remonstrated against the pro-slavery platform it adopted, and by the withdrawal of himself and friends divided and broke up the party. Mr. Wilson now joined in organizing the Republicans on the basis of opposition to the extension of slavery, when on the 22d of May, 1856, Mr. Sumner, his colleague, was assaulted by Mr. Brooks, of South Carolina. Mr. Wilson, in a speech to the Senate, the next morning, denounced the act as "brutal, murderous, and cowardly." For this language he was challenged by Mr. Brooks, but he declined the challenge on the ground that dueling is a barbarous and unlawful practice, while he stated that he believed in the right of self-defense in the broadest sense. Mr. Wilson's first speeches in the Senate were in favor of the repeal of the Fugitive Slave Law and the abolition of slavery in the District of Columbia. His speech in defense of free labor, made in reply to Mr. Hammond, of South Carolina, March, 1859, had a very large circulation in the Northern States. In the same year he was reelected to the Senate by a nearly unanimous vote. In March, 1861, he was made chairman of the Committee on Military Affairs, of which he had been a member for four years previous. In this capacity he induced Congress to authorize the employment of five hundred thousand volunteers and the reorganization of the military system of the United States. His extraordinary exertions during this short session won for him the

admiration of General Scott. In the reform and reconstruction acts passed by the Thirty-seventh and Thirty-eighth Congresses Mr. Wilson took a leading part. He was reelected for the term beginning 1865 and ending 1871. In 1872 Mr. Wilson visited Europe. Toward the close of his third term as Senator he was again reelected for the term extending from 1871 to 1877. In June, 1872, he was nominated as Vice-President, to which office he was elected. In 1873 he was stricken with paralysis, from which he never fully recovered. His death was caused by apoplexy. He wrote the following voluminous work: "History of the Rise and Fall of the Slave Power in America." The first volume was completed in 1872. During the summer of 1875, he labored, often ten hours a day, on the pages of the third volume, which he has left incomplete. His minor works are: "History of the Antislavery Measures of Congress;" "Military Measures of the United States Congress;" "Testimonials of American Statesmen and Jurists to the Truths of Christianity;" and "History of the Reconstruction Measures of the Thirty-ninth and Fortieth Congresses."

WISLICENUS, GUSTAV ADOLF, a German theologian, born November 20, 1808; died October 14, 1875. In Halle, where he studied theology, he took part in the political movement of the students, and in 1824 was sentenced to twelve years' imprisonment, but was pardoned in 1829. In 1834 he received an appointment as minister in Kleinichstedt, and in 1841 in Halle. In consequence of a liberal address delivered in Köthen in 1844, he was called upon by the Consistory of Saxony to produce the manuscript of it. In answer to this he gave in a pamphlet, "Ob Schrift, ob Geist," a complete exposition of his views. In 1846 he was removed from his position, and from that time acted as preacher for the Freie Gemeinden. In 1853, in consequence of his work, "Die Bibel im Lichte der Bildung unserer Zeit," he was again prosecuted, and, foreseeing his conviction, he left Prussia in 1853, and was soon after sentenced to three years' imprisonment. He then went to the United States, where he first delivered lectures in Boston. In May, 1854, he went to New York, and for a time had charge of a school in Hoboken. In 1856 he returned to Europe and settled permanently at Zürich. Here he wrote his principal work, "Die Bibel für denkende Leser" (2 vols., 1863-'64). In 1873 he published "Gewalt und Zukunft der Religion."

WISCONSIN. The Legislature assembled January 13th and adjourned March 6th, which is the shortest session ever held except that of twenty-five years ago. The work of the session comprises 344 laws, 7 joint resolutions, and 12 memorials to Congress. One of the most important subjects before the Legislature was that of railroads. The result, however, was simply an amendment of the Potter law. The principle of this law is not changed; the

right of State control remains unchanged, but the rates are modified. The amended law is, in this respect, more favorable to the railroad companies than was the Potter law, and is regarded as a compromise between the companies and the friends of the Potter law.

On the 4th of February, when twelve ballots had been taken, Angus Cameron was elected to the United States Senate for six years from the 4th of March, 1875, as the successor of M. H. Carpenter.

Mr. Cameron was born at Caledonia, N. Y., in 1826; went to Wisconsin in 1857, where he was elected to the State Senate in 1863, and was reelected to that body in 1871; was a member of the House in 1866 and 1867, being the Speaker during the latter year. From 1866 to 1875 he was one of the Regents of the University of Wisconsin. He is a lawyer by profession, and was elected to the Senate by the combined votes of Republicans, Democrats, and Liberals.

The State finances are reported to be in a sound condition. The total State debt, September 30, 1875, amounted to \$2,252,057, and was classified as follows: Bonds outstanding, \$14,000; due to the school-fund, \$1,559,700; university fund, \$111,000; Agricultural College fund, \$51,600; normal-school fund, \$515,700; currency certificates, \$57.

The total balance in the Treasury, September 30, 1874, was \$378,345; September 30, 1875, it was \$277,681. The general-fund balance, September 30, 1874, was \$125,581; September 30, 1875, \$1,846. The entire receipts amounted to \$1,750,806.48; the disbursements to \$1,851,470.02.

The most important sources of revenue and items of expenditure on account of the general fund were as follows:

RECEIPTS.	
State tax and suit tax.....	\$595,602 73
Railroad companies' tax.....	434,414 46
Plank-road companies' tax.....	173 84
Telegraph companies' tax.....	2,258 00
Bonds receivable.....	510 00
Insurance companies' tax and fees.....	67,859 05
Hawkers and peddlers.....	18,061 76
Miscellaneous.....	20,578 84
Total.....	\$1,184,458 67

DISBURSEMENTS.	
Salaries and permanent appropriations.....	\$262,686 40
Legislative expenses.....	86,645 50
State-prison and charitable institutions.....	565,030 50
Miscellaneous.....	845,905 99
Total.....	\$1,260,168 39

The total valuation of real and personal property, as determined by the State Board of Assessments, with the amount and rate of State taxes levied, has been as follows:

YEAR.	Valuation.	State Tax.	Rate per Cent.
1871.....	\$455,900,500	\$629,148 10	1.38 milles.
1872.....	890,454,875	763,291 55	1.96 "
1873.....	890,454,875	671,539 88	1.73 "
1874.....	431,285,859	526,606 85	1.35 "
1875.....	431,285,859	589,799 83	1.40 "

The value of property exempt from taxation, besides 1,511 miles of railroad not valued, has been reported as follows, no returns having been received from several counties:

United States property.....	\$609,015
State property.....	146,005
County property.....	1,078,518
Town, city, and village property.....	822,950
Common-school property.....	1,655,349
Church property.....	8,951,738
Railroad property.....	4,801,758
Cemetery property.....	220,550
College and academy property.....	602,800
All other property.....	790,978
Total property exempt.....	\$14,174,721

The whole amount of lands held by the State, September 30, 1875, was 1,622,642 acres.

The condition of the charitable and correctional institutions for 1875 was as follows:

NAME OF INSTITUTION.	Where situated.	Is what Year opened.	NUMBER OF INMATES IN 1875.		Ordinary Current Expenditures.
			Total.	Average.	
Institute for the Blind.....	Janesville.....	1850	82	59	\$18,964
Institute for the Deaf and Dumb.....	Delavan.....	1852	181	182	33,918
State Hospital for the Insane.....	Madison.....	1860	507	364	96,692
Northern Hospital for the Insane.....	Oshkosh.....	1873	351	257	89,324
Industrial School for Boys.....	Waukesha.....	1860	412	301	45,156
State-prison.....	Waupun.....	1851	857	240	

In the State-prison convict-labor is performed on account of the State, the chief industries being the manufacture of chairs, wagons, boots and shoes, clothing, and stonework. The institution is not self-sustaining. The receipts from labor, etc., in 1875, amounted to about \$53,000. The total disbursements were about \$100,000. The State appropriation was \$46,341. The present site of the prison is deemed to be unfavorable on account of its great distance from sources of supply and a market for the industrial products of the prison. At its session in 1875 the Legislature passed a joint resolution providing for the ap-

pointment of a commission to consider the expediency of removing the prison, to recommend a more suitable site, and to report to the next Legislature. The resolution further suggests that the prison-buildings at Waupun be transformed into an institution for the incurably insane of the State, of whom there are about five hundred confined in the poor-houses and jails of the different counties.

Steps have been taken to discontinue the Soldiers' Orphans' Home at Madison. This institution was organized in 1866. It continued in successful operation, with an average annual attendance of about two hundred, un-

til 1874, when, most of the orphans having become able to support themselves, the Board of Trustees was directed to find places in private families for those who remained. The number of orphans who have received the benefits of the institution exceeds six hundred. The total cost to the State for the purchase of buildings and the maintenance of the institution has been about \$342,000.

The Legislature has authorized the transfer of the buildings and grounds of the Soldiers' Orphans' Home to the Regents of the State University for a medical college.

The State census, taken in 1875, shows the total population to be 1,236,579, or a gain of 181,909 since 1870. The following is a comparative statement, by counties, of the State census of 1875, and the Federal census of 1870:

COUNTIES.	1875.	1870.	Gain.	Loss.

The Republican State Convention assembled in Madison, July 7th, and nominated the following ticket: For Governor, Harrison Ludington, of Milwaukee; Lieutenant-Governor, H. L. Eaton, of Richland; Secretary of State, H. B. Warner, of Pierce; Treasurer, Henry Baltz, of Manitowoc; Attorney-General, John R. Bennett, of Rock; Superintendent of Public Instruction, Robert Graham, of Winnebago. The following platform was adopted:

Resolved, That the Republicans of Wisconsin declare their unalterable adherence to the indissoluble union of the States; the sovereignty of the Federal Government in the functions assigned to it by the Constitution, the rights of the State, and the equality of all men before the law.

That we declare parties to be only deserving of support so long as they advance wise and patriotic principles, and promote the honest and efficient administration of public affairs.

That we regard labor as entitled in a high degree to the protection of the Government in all its rights.

That we are in favor of the freedom of religious opinion; and we therefore oppose any union between Church and State, or interference with religious faith or worship, or any legislation in the interest of any particular creed.

That we stand by free education, our public school-system, the taxation of all for its support, and no division of the school-fund for any sectarian purpose.

That we hold that true education and sound morals are the best agencies for promoting the laudable cause of temperance.

That we accept with approval the letter of President Grant discouraging the continuance in office of any Chief-Magistrate of the nation for a longer period than two terms.

That we approve of the present Republican national Administration, and especially the earnest efforts to collect the revenue, to prevent and punish frauds, to expose past violations and to guard against their recurrence in the future.

That we indorse the policy of adjusting difficulties between this and foreign nations by arbitration instead of war; and, as friends of justice, peace, and humanity, we shall hail the day when this policy shall be adopted throughout the world.

That we adhere to the doctrine of legislative control over railroads and other corporations, deriving their powers and franchises from the State, for the mutual benefit of the people and such corporations, without injustice to the interests of either; which policy was inaugurated and will continue to be fostered by the Republican party of Wisconsin, to the end that just and fair rates of transportation may be secured to all the people, while all unjust and oppressive acts of monopolies should be prohibited.

That we favor the early attainment of a currency convertible with coin, and therefore advocate the gradual resumption of specie payments by continuous steps in that direction, in such manner as to disturb the business interests of the country as little as possible.

That we are in favor of a tariff for revenue only, so adjusted as to be the least burdensome and most favorable to the interests of labor and industry.

That we desire such a revision of the patent laws as will relieve industry from the oppression of monopolies, and at the same time secure to the inventor a fair remuneration and to the public the benefit of the invention upon equitable terms.

That the Republican party will continue, by all the means in the power of the State, to encourage immigration, as an important agency in developing the resources and promoting the prosperity of the nation.

That with the experience of the past, in reference to national and State administrations, we have abundant evidence that the best interests of the people demand the continuance of the enlightened and liberal policy of the Republican party in its well-defined and clearly-announced purpose, to foster the agricultural, industrial, and commercial interests of the country; by a judicious system of internal improvements, having for their objects the enlargement of facilities and reduction in the cost of transportation for our inter-State commerce; by an honest and faithful administration of the laws; and by a firm adherence to the principles of justice and progress.

The Democratic Convention was held in Milwaukee on the 8th of September, and, having renominated the persons then in office, adopted the following resolutions:

Resolved, That the representatives of the Democratic and Liberal Reform and Independent electors of Wisconsin, in convention assembled, congratulate the people of the State, regardless of partisan distinction, upon the progress thus far made in the reduction of the State's expenditures, in the vigorous and impartial administration of the laws, in the repeal of obnoxious legislation, in the additional protection assured the industrial and producing classes, and in the banishment of the debasing spirit of political partyism from official places; and we resolve and declare—

1. That we will abide by the principles of political reform adopted by the People's Reform Convention of 1873, and subsequently readopted by fifteen thousand majority of the people of Wisconsin at the polls; and—

2. That we will abide by the declaration of principles unanimously agreed on by the Reform and Independent members of the Wisconsin Legislature of 1875, to wit: Preservation of the public credit; honest payment of the national debt; rigid economy in State and Federal administrations; more and cheaper facilities for transportation within and without the State; completion of the Fox and Wisconsin Rivers improvements; sound currency in coin or its equivalent; tariff for revenue only, levying lighter duties upon articles of necessity than upon articles of luxury; the sovereignty of the State over corporations of its own creation; no sympathy for men who vote or apologize for Crédit Mobilier corruptions in Congress or elsewhere, or who affiliate with men of corrupt practices in State or Federal legislation; the sovereignty of the Federal Government in the exercise of its delegated powers; the sovereignty of the States and the people as to all powers not delegated to the Federal Government nor prohibited to the States; the supremacy of civil authority in times of peace, and liberty, equality, and fraternity for all men under the law; the freedom of the press from Federal gag-laws; freedom of religion and opinion; hostility to all State or Federal enactments which usurp jurisdiction over private conscience, or punish one man for the offenses of another; the elevation of labor and its permanent and positive protection in all its rights without injustice to capital, and the perpetual subordination of the interests of party to principles and to the good of the whole people.

We furthermore resolve and declare that, being but one people and having but one country, it is essential to our national peace and prosperity that harmony prevail between the Federal and State governments in all their legal and constitutional relations; that toward that end it is necessary that the Constitution, with all its amendments, be acknowledged as the supreme law throughout the land, and that no effort be made to counteract the letter or spirit of its provisions. But we strongly condemn all attempts by the Federal Government to absorb

or exercise powers not expressly delegated by the Constitution, and the interference of the Federal Administration in matters of purely local concern.

2. That in the administration of our national affairs of late years we find but little to praise and much to regret and disapprove.

3. That the framers of our Government wisely guarded against the union of Church and State, and we insist that the principles of our constitution in this respect shall be adhered to strictly and forever, and that, in the administration of our public affairs, all sectarian issues shall be discarded.

4. That under our constitution the school-fund and its revenues are set apart and exclusively devoted to the support and maintenance of the public schools, and that all agitation relating to a division of the same is impolitic and uncalled for; that such schools are an independent element of republican institutions, and we believe in more and more perfecting the system, so as to bring a thorough and free common-school education within the reach of all, but we also insist that, as required by the constitution, the public schools throughout our State shall be kept free from sectarian instruction, in order that they may be accessible to all, without interference with the rights of conscience.

5. That the power given to the Legislature by the constitution of our State to exempt property from taxation was expected to be exercised with the utmost caution; but much complaint has been made that the power has been used with very little restraint, to the detriment of public interests, and we accordingly recommend an early revision of the laws upon that subject.

6. That, after the many unsuccessful efforts of the Republican party of Wisconsin to promote temperance by prohibitory legislation, we rejoice in the final acknowledgment that true education and sound morals are the best agencies for that purpose; but that we deem it essential to remain vigilant rather than confide in declarations possibly dictated by partisan exigency instead of by settled convictions of principle and duty; and we furthermore recommend any amendment of the present excise law necessary to secure every portion of the people from arbitrary infringements upon the letter and spirit of its provisions.

7. That we congratulate the people of Wisconsin upon the settlement of the question of the sovereignty of the State over corporations of its creation, and upon the perpetual source of redress thus assured against aggressions from monopolized capital, and we demand that the power of the State thus established shall be firmly and continuously exercised for the complete protection of the people from every form of corporate injustice, extortion, or aggression; and we repeat and declare that the improvement of old and construction of new lines of railway are necessary to the progress and development of the State, and that railroad companies are entitled to reasonable and reliable compensation for actual capital and labor thus employed.

8. That the use or contribution of money by party candidates, for the purpose of directly or indirectly corrupting public opinion, is an offense which demands the execration of all enlightened and patriotic men, and we insist upon a prompt and vigorous enforcement of the law to punish the crime of bribery committed at or before elections, and upon such

amendment of said law as experience may prove necessary to the full protection of the ballot-box from crimes of this class.

9. That the vast annual contributions of the country for the support of the National Government warrant a more rapid reduction of the national debt, and a corresponding relief of the people from the burden of annual interest paid from the profits of their industry.

10. That we demand an early revision of the patent laws, and a more liberal legislation for the protection of the people in this department from the exactions of aggregated capital.

11. That we sincerely deplore the recent failure of enlightened men to establish civil-service reform in the administration of the National Government; that, in the opinion of this convention, appointments to office in this State and nation should be based on the permanent qualifications of honesty and capacity, and not upon partisan service; and we earnestly invite a united effort of all patriotic men to guard the people from the evils of partisan and official corruption, for prompt and condign punishment of crime in official places, and for the restoration of pure and economical government in every department of the public service.

The existing State officers were renominated by acclamation, as follows: Governor, William R. Taylor; Lieutenant-Governor, Charles D. Parker; Secretary of State, Peter Dayton; State Treasurer, Ferdinand Kuchu; Attorney-General, A. Scott Sloan; Superintendent of Public Instruction, Edward Learing.

The Republican candidate for Governor, Harrison Ludington, was elected; the other officers chosen were Democrats. The vote was as follows:

Governor: Harrison Ludington, 85,155; William R. Taylor, 84,814; C. E. Hammond, 460; scattering, 141.

Lieutenant-Governor: C. D. Parker, 85,437; Henry L. Eaton, 84,238; L. D. Gilfillan, 407; scattering, 180.

Secretary of State: Peter Doyle, 85,102; Hans B. Warner, 84,484; H. W. Brown, 406; scattering, 195.

Treasurer: Ferdinand Kuehn, 86,230; Henry Baltz, 83,426; J. Turner, 407; scattering, 179.

Harrison Ludington, the present Governor of Wisconsin, was born in Putnam County, N. Y., July 31, 1812. At the age of nineteen years he emigrated to Wisconsin, reaching Milwaukee in November, 1838. Soon after he opened a small store. Since 1851 he has been engaged in an extensive business of manufacturing and selling lumber. He has three times been elected Mayor of Milwaukee. He has been an enthusiastic Republican since the organization of that party. Before being elected Governor, he was an unsuccessful candidate for Congress.

Z

ZACHARIÆ, HEINRICH ALBERT, a German jurist, born November 20, 1806; died May 8, 1875. He studied law in Göttingen, became lecturer at that university in 1830, extraordinary professor in 1835, and ordinary Professor

of Law in 1842. In 1848 he was a member of the German National Assembly. In 1863 he was appointed a member of the Council of State, and in 1867 was elected to the first Reichstag of the North-German Confederation.

tion, where he took part in the framing of the constitution. In the latter part of 1867 he was elected a life-member of the Prussian Herrenhaus by the university. He wrote: "Lehre vom Versuche der Verbrechen" (2 vols., 1836-'39); "Die Gebrechen und die Reform des deutschen Strafprocesses" (2 vols., 1861-'68); "Das Handbuch des deutschen Strafprocesses" (2 vols., 1861-'68); "Das deutsche Staats- und Bundesrecht" (3 vols., third edition, 1865-'66). Among his political works are

"Zur Schleswig-Holstein'schen Frage" (1847), "Die Schweizerische Eidgenossenschaft, der Sonderbund und die Bundesrevision" (1848), "Die Reform der deutschen Bundesverfassung" (1859), "Das rechtliche Verhältniss des fürstlichen Kammerguts" (1861), "Das Successionsrecht im Gesammthause Braunschweig-Lüneburg und der ausschliessliche Anspruch Hannovers auf das Herzogthum Braunschweig" (1862).

INDEX OF CONTENTS.

A

Abyssinia.—Area, 1; population, 1; successor of Theodore, 1; progress of the Egyptians, 1; belief of the people, 1; Swedish missionaries, 1; German Colonization Company, 2.

AGARD, LOUIS A. E.—Biographical sketch of, 2.

ADAMS, GEORGE E.—Decease of, 587.

Adventists.—Statistics, 2; General Conference, 2; Christian Association, 2; its objects, 2; publications, 8; Evangelical Adventists, 8.

Africanists.—Boundaries, 8; ruler, 8; state of the country, 8; danger from the Toorkoman tribes, 8; only country separating Russian and British possessions, 4; the plans of each, 4.

Africa.—The advance of Egypt, 5; civil wars in Abyssinia, 5; sultanate of Morocco, 5; Tripoli, 5; British dominions in South Africa, 5; union of English possessions, 5; Liberia, 5; Senegal, 5; war against the Ashantees, 6; Lower Congo, 6; area and population of countries, 6; Algeria, 7.

Agriculture.—Crops in 1875 in the United States, 7; grasshoppers, 7; other insects, 7; wheat, 7; corn, 7; rye, 7; oats, 8; barley, 8; buckwheat, 8; potatoes, 8; rice, 8; sugar, 8; maple-sugar and molasses, 8; sorghum, 8; hay, 9; fruit, 9; tobacco, 9; cotton, 10; fattening cattle, 10.

Alabama.—Session of the Legislature, 11; protest relative to proceedings in Louisiana, 11; memorial to the President relative to the State legislation, 11; action of the Legislature, 11; resolutions relative to the election of Senator Spencer, 12; report on the Treasurer's affairs, 12; act to regulate elections, 12, 18; important legislation of the session, 18; question of a constitutional convention, 18; decided by an election, 14; assembling of the convention, 14; financial condition of the State, 14; recommendations relative to, 14, 15; the Declaration of Rights, 15; State boundaries, 15; local and special legislation, 15; executive and judicial departments, 16; qualifications of electors, 16; taxation, 17; education, 17; corporations, 17; adoption of the constitution, 18; vote of the people, 18; State debt, 18; railroads, 18; Insane Asylum, 18; validity of bonds issued by the city of Montgomery, 18; centennial commissioners, 18.

Alaska.—Report of Special Agent Elliott, 19; its agricultural statements disputed, 19.

ALEXIA, ANN.—Decease of, 573.

America.—Political questions in the United States, 20; Centennial Exhibition, 20; Argentine revolution, 20; Peru, 20; assassination of the President, 20; Brazil, 20; commercial failures, 20; colonization bills, 20.

ANCILOT, MARGUERITE L. V. O.—A French authoress, 20; biographical sketch of, 20.

VOL. XV.—49 A

ANDERSEN, HANS CHRISTIAN.—A Danish author, 21; biographical sketch of, 21.

ANDERSON, HENRY J.—Decease of, 584.

ANDRASSY, Count.—The Austrian Chancellor, 786; his circular to the great powers of Europe on the insurrections in Turkey, 786.

ANDREX, KARL.—A German geographer, 21; biographical sketch of, 21.

Anglican Churches.—Convocation of Canterbury, 22; report on the Rubrica, 22; use of Westminster Abbey, 22; "Ornaments Rubric," 22; position of the celebrant in the administration of the Lord's Supper, 22; Pastoral of the Bishops, 22, 23; reasons of bishops not signing, 24; Church Missionary Society, 24; Society for the Propagation of the Gospel, 24; Exeter Rerodos Case, 24; Martin vs. Mackonochie, 25; right to the title of Reverend, 25; right to exclude from communion in case of heresy, 26; increase of the episcopate, 26; coadjutor bishops in India, 26; the Church Congress, 27; subjects discussed, 27; Irish Church, 27; revision of the Prayer Book, 27; changes, 28; Synod of Rupert's Land, 29.

ANTHON, WILLIAM H.—Decease of, 586.

ANTHONY, HENRY B.—Senator from Rhode Island, 188; on counting the electoral vote for President, 189.

Appeal, International Court of.—Inaugurated in Egypt, 264.

ARZELANDER, FRIEDRICH W. A.—A German astronomer, 29; biographical sketch of, 29.

Argentine Republic.—Extent, 29; boundaries, 29; immigration, 29; colonies, 30; government, 30; governors of provinces, 30; revenue and expenditures, 30; budget, 31; home debts, 31; navy, 31; public instruction, 31; normal-school law, 31; exports and imports, 32; articles of export, 32; shipping movement, 33; railways, 33; telegraph-lines, 34; post-office, 34; manufacturing industry, 34; President's message, 34; negotiations with Brazil, 35.

Arizona.—(See ANNUAL CYCLOPEDIA, 1874.)

Arkansas.—Message of the Governor respecting "terrorism" in the State, 35; investigating committee of Congress, 36; majority and minority reports, 36; message of President Grant, 36; action of Congress, 36; legislative resolutions on Federal interference, 36; legislation on the finances, 37; suspension of sales for taxes, 37; new election law, 38; new school law, 38; regulation of the labor system, 38; other acts, 39; adjourned session, 39; action on the finances, 39; Centennial Exhibition, 40; meeting of the State Grange, 40; agricultural products, 40; grape cultivation, 40; partners in a bankrupt firm not entitled to assets out of the bankrupt estate, 40.

ARMSBY, JAMES H.—Decease of, 586.

Army of the United States.—Headquarters, 41; military divisions, 41; officers, 41; desertions, 41; expenditures, 41; arsenals, 41; military operations, 42; signal-service, 42;

- national cemeteries, 43; preservation of war records, 43.
- ARNIM, HARRY K. E.—German diplomatist, a biographical sketch of, 42-44.
- ARNOT, WILLIAM.—A Scottish preacher and author, 45; biographical sketch of, 45.
- ARTHUR, WILLIAM.—Decease of, 585.
- Asia*.—Area, population, and divisions, 46; progress of Russia, 46; Emperor of China, decease of, 46; progress in Japan, 47; Acheen, 47; Kashgar, 47.
- ASPINWALL, WILLIAM H.—An eminent merchant, 47; a biographical sketch of, 47.
- ASTOR, WILLIAM B.—Biographical sketch of, 48.
- Astronomical Phenomena and Progress*.—Solar researches, 49; sun's diameter, 49; transit of Venus, 49; list of stations for observation, 49-51; incidental results, 51; Alexander's hypothesis, 52; asteroida, 52; comets, 52; meteors, 52; Iowa meteorite, 53; diameters of planets, 53; researches on the Uranian and Neptunian systems, 53; color of Uranus, 54; binary stars, 54; Burnham's sixth catalogue of new double stars, 54.
- ATHON, JAMES.—Decease of, 535.
- ATOCHA, A. A.—Decease of, 574.
- Australia and Polynesia*.—Principal occupations, 54; statistics of New South Wales, 54; area and population, 55; agricultural statistics, 55; live-stock statistics, 55; mineral resources, 55; revenue, imports, and exports, 56; chief articles of export, 56; telegraph statistics, 56; commercial marine, 57; novel immigration scheme, 57; Feejee Islands, 57; mortality, 57.
- Austro-Hungarian Monarchy*.—Government, 58; area and population, 58; population of different crown-lands, 58; ministry, 58; common debt, 58; commerce, 58; shipping, 58; railroads, 58; telegraphs, 58; bill to regulate the relations of Old Catholics, 59; budget, 59; school legislation, 59; protection and free trade, 59; joint annual meeting of delegates, 59; proceedings, 59; Maximilian's monument, 60; relations to foreign powers, 60; visit of the Emperor to Italy, 60; to Dalmatia, 60; opening of provincial Diets, 60; financial crisis in Austria, 60; the trial of the director-general, 61; centenary of the incorporation of the Bukovina with Austria, 61; inundations, 62; change of the bed of the Danube, 62; relations between Austria and Germany, 63.
- AYLLANDEA, NICOLÁS.—President of Argentine Republic, 62; biographical sketch of, 63.
- AVERY, BENJAMIN P.—Decease of, 588.
- AVEZAC-MACATA, MARIE A. P.—French geographer, 68; biographical sketch of, 68.
- B**
- BABCOCK, RUFUS.—A clergyman and author, 63; biographical sketch of, 63.
- BAKER, WILLIAM H.—Decease of, 576.
- BALCH, LEWIS P. W.—Decease of, 576.
- BALTHAZAR, CASIMIR V. A.—A French artist, 63; biographical sketch of, 63.
- Baptists*.—Statistics of regular Baptists, 64; number and condition of the missions, 65; Educational Commission, 65; Home Mission, 65; Publication Society, 65; Historical Society, 65; Woman's Society, 66; German Conference, 65; Bible Union, 66; Southern Baptist Convention, 67; Free-Will Baptists, 67; statistics, anniversaries, etc., 68; Seventh-Day Baptists, 68; General Conference, 68; Baptists in Nova Scotia and New Brunswick, 69; do. in Great Britain, 69; Scottish Baptists, 70.
- BARGE, ANTOINE LOUIS.—A French sculptor, 70; biographical sketch of, 70.
- BARRY, General HENRY W.—Decease of, 578.
- BAUER, WILHELM.—A German inventor, 71; biographical sketch of, 71.
- BAYARD, THOMAS F.—Senator from Delaware, 126; on resumption of specie payments, 152; on compulsory education, 173; on counting the electoral vote, 192-193; relative to military interference in Louisiana, 215; biographical sketch of, 71.
- BECK, JAMES B.—Elected Senator in Kentucky, 418; biographical sketch of, 418.
- BEDEL, JOHN.—Decease of, 578.
- Belgium*.—Government, 73; area and population, 73; finances, 73; emigration of workmen, 73; universities, 73; budget, 73; electors, 73; schools and teachers, 73; army, 73; commerce, 73; railroads, 73; coal-fields, 73; diplomatic complication with Germany, 73; complaints of Germany, 73; answer of the Belgian Government, 74; reply of Prince Bismarck, 74; action of the Chamber of Deputies, 74; investigations, 74, 75; action of the Senate, 75; further replies of Bismarck, 75; the embassy to the Pope, 75; military honors to the new cardinal, 75; subscription of the press, 75; elections, 76; new Chamber, 76; important lawsuits, 76; religious disturbances, 76; international conference on sugar bounties, 77; decease of M. d'Omalius d'Halloy, 77.
- Beloochistan*.—Boundaries, 77; area and population, 77; border towns, 77; differences between the Khan of Kalat and the Indian Government, 78.
- BENNING, HENRY L.—Decease of, 579.
- BENNINGSEN, RUDOLPH.—Biographical sketch of, 53.
- BERNARD, WILLIAM B.—American dramatist, 73; biographical sketch of, 73.
- BERNHARDY, GOTTFRIED.—A German philologist, 73; biographical sketch of, 73.
- BIDDLE, THOMAS.—Decease of, 575.
- BIGLOW, JOHN.—Biographical sketch of, 564.
- BINNET, HORACE.—An American lawyer, 79; biographical sketch of, 79.
- BISMARCK.—His letter to Count von Arnim in 1873, 43.
- BLAINE, JAMES G.—An American statesman, 79; letter on the public-school question, 79; biographical sketch of, 79; Speaker of the House, 139.
- BLAIR, FRANCIS P.—Decease of, 578.
- BLATCHFORD, RICHARD M.—Decease of, 582.
- BLECKNER, RICHARD W.—Decease of, 575.
- BLEEK, WILHELM H. K.—A philologist, 80; biographical sketch of, 82.
- BLODGETT, WILLIAM.—Decease of, 585.
- BLOW, HENRY T.—Decease of, 582.
- BOEHM, HENRY.—Decease of, 588.
- BOGOT, LEWIS V.—Senator from Missouri, 151; on resumption of specie payments, 151.
- Bokhara*.—Boundaries, 80; treaty with Russia, 80; the relations with Russia, 81.
- Bolivia*.—Boundaries, 82; government officers, 82; army, 82; revenue, 82; debt, 82; report of foreign bondholders, 82; high credit in Europe, 82; claim for maps, 83; foreign trade, 83; mining industry, 83; railways, 83; concessions, 84; affairs at Cochabamba, 84; elections, 84.
- BOYCE, JAMES.—A Baptist clergyman, 84; biographical sketch of, 84.
- BRAMLETTE, THOMAS J.—Decease of, 571.
- Brazil*.—Boundaries, 85; slaves, 85; population, 85; colonization bill, 85; Government, 86; officers of state, 86; cabinet, 86; Legislature, 86; bishops, 86; army, 86; military affairs, 87; navy, 87; exports and imports, 87; revenue, 88; expenditures, 88; national debt, 88; schools, 88; Emperor's speech to the Brazilian Chamber, 88; legislation, 89.
- BRECKENRIDGE, JOHN C.—An American statesman, 89; biographical sketch of, 90.

BRIGHT, JESSE D.—Decease of, 576.
 BRISTOW, BENJAMIN H.—Biographical sketch of, 745.
 BUCKNOW, BARON PHILIP DE.—A Russian statesman, 90; biographical sketch of, 90.
 BUCHANAN, ROBERT.—A Scotch clergyman, 90; biographical sketch of, 90.
 BUCKINGHAM, WILLIAM A.—An American statesman, 91; biographical sketch of, 91.
 BUTTER.—Vice-President of the French Ministerial Council, 812.
 BUTTINGTON, JAMES.—Decease of, 573.
 BURLING, CELIA.—Decease of, 560.
 BURMA.—Area and population, 91; difficulties with the British Government, 91; expedition of Colonel Browne, 91; the disputed territory, 92; other difficulties, 93; preparations for war, 93; message by the British envoy, 93; negotiations completed, 94; annexation of Burmah discussed, 94.
 BUTLER, BENJAMIN F.—Representative from Massachusetts, 183; on the bill to improve the currency, 141; on the civil-rights bill, 157, 158, 166; on the term of the presidential office, 207.
 BUTTERWORTH, SAMUEL F.—Decease of, 575.
 BYLER, REID P.—Decease of, 574.

C

CALLAUX, EUGÈNE.—French Minister of Public Works, 814.
 CAIN, RICHARD H.—Representative from South Carolina, 183; on the civil-rights bill, 165.
 CALIFORNIA.—Boundaries, 95; value of property, 95; taxation, 95; revenue and expenditures, 95; debt, 95; delinquent taxes, 95; State Capitol, 96; insurance companies, 96; savings-banks, 96; State-prison, 96; death-penalty, 96; Deaf and Dumb Asylum, 96; university, 97; State lands, 96; immigration, 97; Republican Convention and platform, 98; People's Independent party Convention and platform, 99, 100; Democratic Convention and platform, 101; Temperance Reform Convention, 101; results of the election, 101; the question of a constitutional convention, 102; amendments to the constitution prepared, 102; session of the State Grange, 102; views of the Governor on irrigation, 103; suspension of the Bank of California, 103; decision of the court on the tax levy, 103; decision on the education of colored children, 104.
 CARPEAUX, JEAN B.—A French sculptor, 104; biographical notice of, 104.
 CARROLL, JOHN S.—Governor of Maryland, 475; biographical sketch of, 475.
 CARREL, DOUGLASS.—Decease of, 577.
 CENTRAL AMERICA.—Area and population, 104; states included, 104; proposed basis for the new republic, 104.
 CHANDLER, ZACHARIAH.—Appointed Secretary of the Interior, 743.
 CHARLICK, OLIVER.—Decease of, 575.
 CHASE, HORACE.—Decease of, 573.
 CHEMISTRY.—Salicylic acid, 104; properties, 105; antiseptic, 105; action on vegetation, 106; new process for purifying illuminating gas, 106; researches on the coloring principles of madder, 107; improved process for preparing sulphate of nickel, 107; water-analysis, 107; influence on vegetation of arsenical poisons in the soil, 107; improved manufacture of sulphuric acid, 108; a new coloring-matter, 109; detection of lead in the tin lining of vessels, 109; action of light on silver salts, 109; do. on cane-sugar, 109; new test for the detection of prussic acid, 109; explosion of methyl nitrate, 110; maltose, 110; new process for determining the extraneous alcohol

in wine, 110; new arsenical green paints, 110; action of saline solutions on tin, 111; formation of nitrogen compounds in nature, 111; atmospheric peroxide of hydrogen, 111; chemical changes attending the growth and ripening of fruits, 111; detection of arsenic in organic matter, 112; detection of artificially-colored wine, 112; new method of preparing vermilion, 112; improvements in chemical apparatus, 113; cotton gunpowder, 113; influence of ammonia on the color of flowers, 113; source of ammonia in the air, 114.
 CHILI.—Boundaries, 114; dispute with the Argentine Government, 114; its action, 115; protest of the Chilean minister, 115; lengthy reply, 115; population, 116; do. of towns, 116; ministry, 116; army and navy, 116; imports and exports, 116; coal-fields, 116; revenue, 117; debt, 117; arbitration between Peru and Chili, 117; elections, 117.
 CHINA.—Ruler, 117; foreigners, 118; importance of Ching-Kiung, 118; death of the Emperor, 118; his successor, 118; difficulty between China and Great Britain, 119; murder of Mr. Margary, 119; proceedings of the Chinese, 119; feelings of the natives, 120; new minister to England, 120; sketch of, 120; settlement with Japan, 120; conflict with southern aborigines of Formosa, 120; purpose to reconquer Kashgar, 121; civil disturbances, 121; attacks upon foreigners, 122; American missionaries assailed, 122; treaty between China and Japan, 123; decease of the Dalai-Lama, 123.
 CHRISTIAN ASSOCIATIONS.—Annual convention, 123; statistics, 123; reports of local associations, 124; General Conference at Hamburg, 124.
 CHRISTIAN UNION.—Second annual convention, 124; proceedings, 124; plan of coöperation for the churches, 125; report, 125.
 CHUBBUCK, SAMUEL W.—Decease of, 577.
 CHURCH OF GOD.—Triennial meeting, 126; proceedings, 126; resolutions, 126.
 COLLINS, GEORGE C.—Decease of, 572.
 COLLINS, NAPOLEON.—A naval officer, 126; biographical sketch of, 126.
 COLOMBIA.—President and cabinet, 127; Governors of States, 127; revenue, 127; debt, 127; Congress, 127; Northern Railway Company, 127; exploration of the Isthmus, 128; foreign relations, 128; conflict with State governments, 128.
 COLORADO.—Officers of the Territory, 128; formation of the Territory, 128; population and valuation, 128; pastoral area, 129; irrigation, 129; mines, 129; coal, 129; prehistoric ruins, 129; grasshoppers, 129.
 COLORADO BEETLE.—The first appearance, 130; description, 130; advance eastward, 130; loss sustained by its ravages, 130; means by which to check it, 131.
 COMMERCE OF THE UNITED STATES.—Foreign imports, 131; do. at New York, 131; during separate years, 131; free goods, 132; specie, 132; classification of imports, 132; receipts of customs at New York, 132; exports, 133; foreign free, 133; foreign dutiable, 133; specie and bullion, 133; exports exclusive of specie, 133; number and capacity of coast and inland steam-vessels, 133, 134; loss of life, 134; explosions, 134.
 CONGREGATIONALISTS.—Twenty-second annual meeting, 134; Home Missionary Society, 134; American Missionary Society, 134; foreign missions, 135; statistics, 135; operations for ten years, 135; Hawaiian Association, 136; Union of Ontario, 136; of England and Wales, 136; autumnal meeting, 136; London Missionary Society, 137.
 CONGRESS, UNITED STATES.—Second session of the Forty-third, 138; list of members, 138.
 In the House, a bill for the improvement of the currency considered, 139; the bill, 139; extract from the

message, 189; its truthfulness, 189; the bill is a proposition to abate the foreign indebtedness, 189; sole object in proposing to issue convertible bonds, 189; evil counsels seem to prevail, 140; a demand for gold created beyond the means of the country to meet, 140; why so little difference between gold and paper in France? 140; how stands the greenback now? 140; what does the bill propose? 141; it would quicken every industry in the country, 141; no political interest in this question, 141; what has been proposed and said, 141; the proposition is simply asking the Government to pay interest on the money loaned to it, 142; why is all business enterprise crippled? 142; what is the objection to contraction? 142; one-quarter of all the property of the country is invested in debt, 142; the consequence is, we are eaten up by interest, 142; let the Government borrow at a low rate of interest, and it will come down lower, 142.

Expansion sure to follow this bill, 143; all agree upon the evil and the mischief to be remedied, 143; money is high because of the apprehension that Congress is going to inflate the currency, 143; only the power of self-preservation probably can authorize the Government to issue this kind of paper, 144; opinion of the Secretary of the Treasury on the first issue of legal tenders, 144; war with its necessities and burdens being past, they look to us to cause these notes to pass away, 144; reasons for voting against the bill, 144; let the greenbacks be exchangeable for gold at the Treasury, 145; there is illimitable expansion in this bill, 145; no final action taken, 146.

In the Senate, a bill reported from the Committee on Finance to provide for the resumption of specie payments, 146; the bill, 146; explanation of the features of the bill, 146, 147; it simply follows the example set by the States, by England, and by other nations, 147; it provides ample means to prepare for and to maintain resumption, 147; three different plans proposed to prepare for resumption, 148; one is contraction, 148; another is the conversion of United States notes into a bond, 148; the third is a graduated scale for resumption in coin and bullion, 148; all of these plans are omitted from the bill, 148.

Are the greenbacks, when retired, to be canceled and destroyed, 148? it is not proposed to decide that question in this bill, 149; what are the provisions made in the bill to prepare the way for specie payments? 149; what will be the effect of free banking? 149; what is the third and last section of this bill? 149; complete resumption in four years and retiring eighty per cent. of greenbacks for every hundred issued in bank-notes, 150; what additional bank currency will be called for in four years? 150; it will not be ten million dollars, 150; the bill does not tell whether the retired greenbacks are to be poured out again, 150; amendment proposed to receive legal tenders in part for duties, 150; further amendment moved to make duties payable in legal tenders after July 1, 1873, 151; customs duties are pledged for the payment of interest on the public debt, 151; the bill disregards this pledge, 151; make the legal tenders good as coin, 151; this bill is rather averse than favorable to resumption, 152; amendment to the amendment rejected, 152; the amendment rejected, 152; other amendments offered and rejected, 152; the construction of this bill, if it becomes a law, belongs to another tribunal, 152; object of those who introduced the bill twofold, 154; how can we get back to specie payments? 154; motion to recommit the bill lost, 154; motion to retire two million greenbacks monthly lost, 154; bill passed, 155.

In the House, the bill reported, 155; passed, 155; message from the President on his approval of the bill, 156.

In the House, a bill to protect all citizens in their civil rights considered, 156; moved to amend by striking out all in reference to public schools, 156; the amendment, 157; no intention to make social equality, 157; it is a question of common right in a public conveyance, 157; a foolish prejudice on this matter, 157; why not make the individual who does the injury responsible in damages? 157; two reasons for going to the United States courts, 158; whatever right and power a State had previous to the constitutional amendment it still has, except in certain particulars, 158; the bill is in harmony with the Constitution as construed by the Supreme Court, 158, not in the province of the States or the Federal Government to enforce constitutional guarantees, 159; there is a constitutional prohibition against religious prescription, 159; the question is clear, 160; the Federal Government cannot go into the States to exercise legislative powers over the people, 160; no grant of power in the amendment, 161; cases quoted, 161; decisions of the Supreme Court, 162; the court has decided that the rights and privileges of citizens are left to the States for protection, 162; no difficulty in any of the States on account of this bill, 163; the only trouble to-day is that the colored man is so loyal to the Government, 163; in South Carolina the reconstruction policy is not a failure, 163; social aspect of this subject, 164; the passage of the bill is a measure of justice and equity, 164; reference to the public schools, 164; no part of this bill so important as the school clause, 165; the great cry against the Southern people is their ignorance, 165; upon this school question we should be careful that we do not inflict on the several States an injury that we ought to avoid, 166; this is a question of equal civil rights to all citizens, 166; it is said this bill is intended as a stab at constitutional liberty, 167; two kinds of opinion in the Republican party on schools, 167; the amendment agreed to, 167; preamble adopted, 167; bill passed, 168.

In the Senate, the above bill reported without amendment, 168; what does the bill propose? 168; to secure the fundamental rights in the Constitution, 168; the Constitution is a bill of rights, 168; what does the bill provide? 168; details, 168; bill passed, 169.

In the House, the appropriation bill to defray the expenses of Government considered, 169; an amendment to increase the appropriation to the Commissioner of Education moved, 170; his office-force too small, 170; common-school systems in their infancy in large portions of the Union, 170; proper functions of the bureau, 170; two policies presented, 171; opposed to all this bureaucratic system, 171; the powers of Congress, 171; it is simply a question of education, 171; you may create a hundred bureaus of some value, 171; no duty with respect to education is imposed on Congress, 172; speech of the minister of Spain, 172; opposed to the General Government imposing upon the people any system of education, 172; amendment rejected, 172.

In the Senate, the bill for the government of the District of Columbia being under consideration, 173; object that it introduced compulsory education from the age of six to the age of eighteen, 173; to be enforced by punishment of the child, 173; motion to strike out, 173; child to be deprived of employment, 173; penalty of giving employment, 173; the law with regard to manufacturers, 173; compulsory education not a desirable thing, 174; another punishment for the parent that he shall not be registered as a voter, 174; a small smack of know-nothingism, 174; vote first to fill the children's bellies, 175; the compulsory system is not for the rich, 175; the interference coercively by the State with the natural duty of the parent, 175; what is the object of this compulsory

system? 176; these inquisitorial, prying, coercive regulations contrary to the spirit of our institutions, 176; amendment agreed to, 176; motion to strike out lost, 177; further amendment agreed to, 177.

In the Senate, a joint resolution to amend the Constitution reported, 177; relates to the method of electing President and Vice-President, 177; threatened danger from the imperfection of the pending system, 177; the proposition, 177; the election of electors is placed absolutely under the control of State Legislatures; Congress has no power over the election, or to determine any question in regard to their election, 177; with two exceptions everything is left to the States, 178; Congress has no power to provide for contesting the election of electors, 179; the States have made no provision for contesting the election of electors, 178; the law of 1793 in effect prohibited any contest, 178; they vote by ballot, 178; how is the vote to be counted? 179; the power given to the President of the Senate, 179; how completely the theory of the electoral college has failed! 179; how has it turned out in practice? 180; dangers and difficulties attending this system, 180; its unfairness, 180; four Presidents have had less than a majority of the popular vote, 180; better elect the President by the people, 180; the electoral college has never come within ten per cent. of representing the popular vote, 181; compare the district system with the general-ticket system, 181; illustration of the dangers of the system, 181; a large fraud in a city controls the election for Governor and for President, 181; when you elect by general ticket, no man can vote unless he has a party in the State large enough to hold a convention and put a ticket in the field, 182; the danger of the present system, 182; in 1857 the electoral vote of Wisconsin was not cast on the day fixed by law, 183; the danger was escaped because the vote was not needed to decide the election, 183; consideration of the twenty-second rule of the two Houses, 183; the rule, 183; it is grossly unconstitutional, 184; it enables either House to throw out the vote of any or of all the States, 184; the vote of Arkansas objected to at the last count, 184; the case of Texas, 184; vote of Georgia lost, 184; action in the case of Texas, 185; by this rule either House, against the other, may throw out the vote of every State in the Union for President, and disfranchise the people and throw the election into the House of Representatives, 185; what is an election by the House? 185; it is full of danger, 185; summing up of points, 186; no method now of contesting a fraudulent election of electors, 186; the original theory that the people could not be intrusted with the election has failed, 186; this question is too important to be passed over, 186.

The dangers have not been exaggerated, 187; the report provides no sufficient or safe mode of counting the electoral vote, 187; Congress can dispense with the twenty-second rule, 187; not willing that Congress shall have the power to provide for counting the votes, 188; the resolution proposes a sweeping change in the mode of electing the President, 188; what are the words of the Constitution? 188; they go to the ultimate result, 188; some better mode than this rule should be devised, 188; Congress may provide by law a tribunal which, in case of a dispute, after the Constitution has exhausted itself, of this opening and counting the votes, shall decide who is legally elected, 189; the subject considered in reference to the smaller States, 189; the case of Polk, 189; that of John Quincy Adams, 189; the election of Jefferson, 190; the existing system is an acknowledged failure of the expectations with which it was adopted, 190; it restricts the choice of the people, 190; it makes necessary the caucus or convention, 191; the machinery is an obstacle

rather than a facility, 191; the amendment proposed secures the rights of individual selection, 191; a plurality, next to an absolute majority, presents the most natural and fairest mode of election, 192; the present system gives immense power to majorities, 192; the danger of a disputed election for President, in a State whose electoral vote would decide the contest, is a most serious one, 192.

A joint resolution offered to repeal the twenty-second rule, 193; the constitutional amendment reported cannot be adopted before the next presidential election, 193; the existence of this rule imperils the peace of the nation, 193; an amendment moved instead of the repeal, 193; no objection to an electoral vote shall be valid unless sustained by both Houses, 193; the constitutionality of the rule altogether may well be doubted, 194; it was passed in 1865, 194; where can the power be found giving the two Houses of Congress the right to say whether votes shall be counted or not be counted? 194; the duty of the President of the Senate is simply ministerial, 194; no rule which can be framed that will not be open to defeat by some supposititious case, 195; all the votes received must be counted, 195; provisions of the Constitution, 195; no question of contest before 1872, 196; it is said that the decision of the question who has received the votes of a State for President rests with the President of the Senate, 196; the proposition now is to reverse the rule, 197; every return should be considered as correct, and not rejected unless both Houses concur, 197; take the case of Louisiana, 197; the question was, who were the electors, 197; it is asked, What have you to do when there come up two returns from a State? 197; the amendment does not provide for such a case, 198; proceedings in the case of two returns, 198; fearful temptation to throw the election into the House of Representatives, 198; suppose the cases of two years ago under this rule, 199; the rule in its present condition is a magazine that may be exploded at any moment, 199; resolution referred to the Committee on Privileges and Elections, 199; committee ask to be discharged from further consideration, 199.

A bill reported on the same subject and considered, 199; the bill proposes to meet the dangerous difficulty of two sets of electors, 199; all votes shall be counted unless both Houses concur to reject them, 199; an opportunity given to raise a false claim to defeat a true election, 199; the second section does not meet the want which all recognize as existing in the Constitution, 200; only an amendment of the Constitution will answer, 200; suppose the second section stricken out, 201; both Houses accept or reject, 201; cannot heap up the votes of a State, 201; what must we do where there is more than one return? 202; same as at the last count, 202; the difficulty under the Constitution, 202; what does the bill say? 203; amendment offered and agreed to, 203; not a word been said in favor of the principles of the bill, 204; if necessary, it should be passed at the next session, 204; motion to postpone lost, 204; nothing partisan in the bill, 204; the bill more dangerous than the rule, 205; if passed into a law, the President becomes charged with its execution, 205; the Constitution is operative, and you cannot add to or diminish its powers, 206; if it becomes a law, how will you get rid of it in future? 206; bill passed, 206.

In the House, resolutions fixing the term of the presidential office to six years offered, 206; the time has arrived for such a change, 206; suppose the President to die after the first week, would not the Vice-President be ineligible to a second term? 207; the people should have a right to elect a man as many times as they choose, 207; question taken, 208; lost, 208.

In the Senate, a resolution offered calling for information relative to military interference with the Legislature of Louisiana, 204; moved to amend by adding "if in the judgment of the President it is not incompatible with the public interests," 209; this is not a case in which we interfere with warlike movements, 209; to what does this resolution relate? 209; it seems as if all sensibility on the subject of liberty was being lost in this land, 210; is Louisiana the only State in which troubles occur? 210; scenes in Ohio, 210; in Pennsylvania, 210; if we are to have information on this subject, let us have the whole history, 210; the purport, the sum and substance of the resolution, 211; has the Senate ever refused to insert such words in a resolution, when proposed? 211; time that the people should ascertain if the amendments for human rights have any vitality, 212; shall an innocent man have a right to call on the Government to protect him? 212; this speech has been delivered at least half a dozen times within a few years in the Senate, 212; what have Southern outrages to do with the subject-matter before the Senate? 212; the time has passed when plain violations of law can be defended by such a cry, 214; what warrant for charging the people of Louisiana with being a set of assassins? 214; why is Louisiana agitated? 214; further debate, 215, 216; the amendment agreed to, 217; the resolution agreed to, 217; answer of the President, 217.

In the Senate, resolutions to elect the President by a direct vote of the people offered and referred, 217.

Congress adjourned, 217; act for the resumption of specie payments, 217.
